The Bruce Battalion Souvenir number appeared on Saturday and we believe everyone will bear us out when we say that it was quite up to "advance notices." The amateur editors and managers proved that their enthusiasm was well matched by their ability, and they produced a distinctly creditable paper. The public paid a very sincere compliment to the lady editors by buying up the whole edition like "hot cakes." The first copies were issued at 9 a. m. Saturday and by 6 p. m. nearly 3,000 copies had been disposed of. About 3,500 copies were printed and these will probably be sold before this item appears in print. It is expected that over and above expenses, the ladies of Walkerton Chapter, Daughters of the Empire, will have in the neighborhood of three hundred and fifty dollars from the Souvenir Number to apply to patriotic purposes.

The Editorial Board was composed of the following ladies:—Miss McGregor, Mrs. Sieveright: Advertising, Mrs. Shelton; Circulation, Miss Truax; Military, Mrs. Wiese: Woman's Work, Mrs. Dixon:—Note and Comment, Miss M. Ross: Household, Miss Benton.

The Board had the valuable assistance of the following Committees:—

Advertising: Mrs. Appel, Mrs. Benton, Miss Savill, Mrs. R. Kreuger, Miss Rowland.

Circulation: Mrs. O. E. Klein, Mrs. MacNamara, Miss Fairservice, Miss Warren.

Woman's Work: Mrs. N. Robertson, Mrs. W. M Shaw, Mrs. McCool, Miss Roether.

Military: Mrs. Whitehead, Mrs. Hepburn, Miss Sinclair, Miss MacFarlane, Miss Farewell.

Household: Mrs. Harry Truax, Miss M. Robertson.

Personal: Miss Stead, Miss Duncan Miss A. Thompson, Miss Haughan, Mrs. Frank Eidt, Miss L. Wettlaufer.

THE CONTRACTS LET

Fixing Up Of The Town Hall will Cost $1160.

The Town Council held a special meeting last Wednesday night and awarded the contracts for buttressing of the Town Hall walls and the construction of iron stairway exit at the west end of the building. The contract for iron stairway was awarded to Mr. S. F. Ellinghausen; mason work to Herman Becker; carpentery to Richard Baker; at a total cost of $1100. A by-law was also passed authorizing the issue of the consolidated debentures of the town.

IMPRESSIVE SERVICE

For Private Harold McNeil at Chesley—160th Bugle Band and Many Walkerton Citizens Present

The 160th Bugle Band, accompanied by a number of citizens, attended memorial service at Chesley Presbyterian Church on Sunday. The service was in memory of Private Harold McNeil, son of Mr. Joseph McNeil, manager of the Bank of Hamilton Chesley, who fell in the Battle of St. Eloi, on the 18th of April. This young man was so well-known and popular in Chesley, and such a hard worker in all the organizations of the Presbyterian Church, that his loss was keenly felt. The sermon by Rev. Mr. Slits was a very impressive one, many being moved to tears. The organist played the "Dead March in Saul" and at the conclusion of the service, Sergeant Tucker of the Bugle Band sounded 'The Last Post' from the vacant chair in the choir loft. The Bugle Band was in attendance for parade before and after the services. Volunteer automobiles furnished by citizens of Walkerton, Cargill, and Mildmay provided the transportation of the Bugle Band and the officers accompanying it.

The following gentlemen attended the services:—W. D. Cargill, M. P. P., David Robertson, K. C, John Rowland, D. McKerracher Arthur Collins, John Kerman, N. C. McKay, George Sirrs, Wm. Paterson, Chris. Kolpin, Wm Schwalm, E. Kalbfleisch, M. Ziegler also; Miss Marion Robertson.

MARRIED

McRAE—MURRAY—At the Manse, Walkerton, on Wednesday, April 26th, by Rev. Thos. Wilson, Miss Jessie Abagil Murray of Pinkerton to Mr. James Alex. McRae of Bruce Tp.

HOFFMAN—HOLLAND—At Hanover, on April 25th, Miss Arnetta Elizabeth Holland, daughter of Mr. Charles Holland of Carrick, to Mr. Walter Hoffman, son of Mr. and Mrs. John Hoffman, by Rev. J. Laypold.

Young Lady Wanted

For steady position. Apply at Telescope Office.

For Immediate Sale

House and lot, also a cow, 3 pigs and a horse with buggy and cutter. Apply to Geo. P. Ernewein, Greenock P. O.

✦ ✦ ✦

Two Ads Omitted

The ads. of two Walkerton merchants, Messrs G. T. Rourke and C. H. Rogers should have appeared in the Bruce Battalion Souvenir Number but were inadvertently omitted by our mechanical staff.

✦ ✦ ✦

Sergt. White Ill.

Mr. Jos. M. White had word this week that his son, Sergt. J. H. White has been having a serious time of it in the Military Hospital at Toronto. On Monday of last week he was operated on for healing of the ear which had developed from quinsy. Afterwards it was found that the mastoid bone had been affected, requiring a further operation behind the ear on Wednesday. Sergt. White is reported to be making good progress but it will be fully two weeks before he can be moved to his home here.

✦ ✦ ✦

Died Suddenly.

The death occurred suddenly at Toronto on Saturday, of Mrs. Albert Jones, of Belleville, formerly Miss Kathleen O'Connor of Walkerton. She was visiting her sister, Mrs. J. W. Purcell at the Arlington Hotel, at the time of her death. Mrs. Jones was well-known in Walkerton, having visited here on many occasions during the life of her late brother. The remains were brought to Walkerton for interment on the noon train Tuesday. Service was conducted by Rev. R. Purdue, pastor of St. Thomas Church. Those who were present from a distance were:—Mr. Jones, Mr. Purcell, and Mr. Bligh O'Connor of Toronto.

✦ ✦ ✦

Died Suddenly

Mrs. P. Todd had a telegram yesterday announcing the sudden death from heart failure of her son-in-law Mr. Charles Pearson of Toronto. His wife and family are at present holidaying at Atlantic City, and as Mr. Pearson had been perfectly well, the news of his death would come as a very severe shock. Mr. Pearson returned recently from Atlantic City, his wife being unable to accompany him at the time owing to their son Charles Jr. taking sick. He is still ill with fever at Atlantic City. Mr. Pearson was the surviving member of the well-known real estate firm of Pearson Bros His late brother, and business partner, Arthur who passed away last December, was a son-in-law of Mr. N. Crawford of Walkerton.

✦ ✦ ✦

Fell Into The River

Little Kenneth Johnston, the five year old son of Mr. and Mrs. A. P. Johnston, fell into the river near the C. P. R. bridge last Wednesday morning, and according to the story told by his young companions, had a very narrow escape. He succeeded in grasping a tree clump near the bank and was pulled out in a very wet and very frightened condition. One of the youngsters, "Busty" Truax, seven years old, is reported to have started a fire, like a true scout, to dry the victim's clothes and then conducted him home in an express wagon. Kenneth was none the worse for his mishap the next day but he is going to keep away from the river until he gets bigger.

✦ ✦ ✦

Removing To Beamsville

Walkerton is losing one of her oldest citizens the coming week. Mr. Matthew Hudson is leaving next Monday, accompanied by his daughter, Miss Hudson, to make his home at Beamsville. It is nearly forty years since Mr. Hudson left Newfoundland, the land of his birth, and came to Walkerton. Practically all that time, up to last Fall when he retired from active work, he was engaged at Truax's mill. In his quiet, unassuming way he has led the honest, upright life which counts in any community, and he has the good-will and high regard of all who know him. Both Mr. Hudson and his daughter were active in the work of the Methodist Church where their places will be hard to fill. Mr. Hudson has secured a comfortable place at Beamsville with a nice fruit garden attached, and as his son, Ernest, now publisher of the Beamsville Express, will make his home with them, life in the new surroundings has much that is pleasant to offer.

✦ ✦ ✦

THE SERGEANT-MAJOR

(Omitted from Special Edition.)

Another veteran is Sergt. Major Britton who was born in England and has served for 21 years. He saw service in South Africa where he spent two years and three months, receiving the Queen's and King's long service and good conduct medal. He came to Canada in 1912 and for four years, acted as Sergt. Major of 32nd Bruce Regiment. The Battalion is fortunate in having as Sergeant Major a man of such wide experience.

To Raise $12,000.00 For Patriotic Purposes

Two Days' Canvas Planned

Canvas of the Town will be Made on Thursday and Friday, May 18 and 19—Public Meeting to be Addressed by a Prominent Outside Speaker on May 17.—Committee of Citizens Are Convinced that Walkerton Can and Will Do That.

That Walkerton should do her fair share towards providing for the dependents of our soldiers at the Front and helping the Red Cross, and that the citizens will respond worthily to the call when the opportunity is presented, was the unanimous conviction of a representative meeting of citizens held at the Town Hall on Friday night. After hearing Mr. A. M. Miller, Associate Secretary of the Fund, the meeting decided unanimously to put on a campaign here on Thursday and Friday, May 18th and 19th with the object of raising $12,000 in Walkerton, for patriotic purposes. Three-quarters of the amount will go to the Patriotic Fund and one-quarter to the Red Cross.

After outlining the work which the Patriotic Fund is doing, which will require $8,000,000 during 1916 alone, Mr. Miller explained the method of campaign which had been adopted in other places, pointing out that in no place where an organized campaign had been undertaken had the subscriptions amounted to less than $4 per head of population. At this rate Walkerton's contribution would be twelve thousand dollars, and the meeting decided unanimously to adopt that amount as the objective for the campaign.

A public meeting will be held on the evening of Wednesday, May 17th, when the claims of the Patriotic Fund will be presented by a leading speaker from the Association headquarters.

Reeve Alex. McNab, president of the Bruce County Patriotic Association, was named as Chairman of the Committee and Mr. L. C. Benton, Secretary.

The Managing Committee will be composed of the Executives of the local Patriotic Fund Association and Red Cross Association.

The following citizens were named as a General Committee:—D. Robertson, J. Warren, Rev. T. Wilson, Rev. J. F. Cummings. Rev. Mr. Perdue, Rev. Mr. Rock, Jos. Morgan, J. McCool, L. A. Eedy, Geo. D. McKay, R. M. Player K. M. Taylor, N. C. McKay, W. M. Shaw, L. C. Benton, A. McNab, Rev. D. A. Walker, Mayor Lippert, M. J. Ramsey, D. McKerracher, Major Henderson, H. G. Hunter, T. J. Jenkins, E. McConnell, J. A. Wesley, H. M. Ley.

It was decided that the canvass be made, not in districts, but from a list of names divided among the canvassers, which has proven a better arrangement in other towns.

Three-quarters goes to the Patriotic Fund and one-quarter to the Red Cross but individual subscribers will have an opportunity to allot their subscriptions differently if they so wish.

Mrs. James Warren is representing the W. M. S. of Knox Church at the provincial meeting at London this week.

Mr. Hank Irwin has taken Mrs. D. Martin's furnished house on Gibson St Mrs. Irwin came over from Paisley on Friday.

Head quarters office of A (Walkerton) Company has been opened in the Business College with Major McNally in charge.

Rev. L. H. Fletch is prepared to remove to his new charge at Rockingham. He will preach his farewell sermon next Sunday evening.

Rev. J. D. Damm who was stationed here two years ago, now of Medicine Hat, will occupy his former pulpit in the Evangelical church on Sunday morning.

Mrs. John McDermet of Emo, New Ontario, after an absence of twenty four years, is here on an extended visit to her mother Mrs. Hutton of Brant who is ill.

The maple syrup season this year was a poor one, but this does not necessarily mean that there will be any lack in the supply of "real maple sugar."

A mean dog poisoner is at work in Kincardine. Twenty good dogs have been poisoned within two weeks. A reward of $25 has been offered for evidence.

Gordon Alexander, Bervie, has enlisted in the Army Medical Corps at London. He rented his farm in the West, shaped up his affairs and came back to obey duty's call.

Rev. W. J. Todd of Ida Grove, Idaho, is spending a few days here with his mother Mrs. A. Todd. He is on his way to attend General Conference in the Eastern States.

Owing to the Presbyterian and Methodist basements being used by the soldiers, union prayer meeting will be held at the Baptist Church every Wednesday evening.

If the Battalion is permitted to stay here as late as June 2nd, a march to Chesley is planned, when the 160th will formally receive the colors, so generously donated by Mr. M. A. Halliday.

A new dental office will be opened in town the first of the week. The representative of a dental supply house leased appartments in the Wiser Block on Saturday for a client, whose name he did not mention.

Mr. Richard Lee had word from Toronto this week that his brother, Mr. Arthur Lee is very greatly improved. He left Wellesley Hospital on Tuesday and after he has spent a week at his sister's home in Toronto, hopes to be well enough to return home to Tara.

A military ball will be held in the Victoria Rink on Friday evening of this week (May 5). Dancing commences at 8 p. m. Gentlemen $1, ladies with lunch free. Crock's orchestra from Guelph will furnish the music. Proceeds go to Regimental Canteen.

Rev. and Mrs. Sanderson enjoyed a visit this week from their son, Mr. Stan Sanderson of Chesley. Possibly nobody in that hustling town to the north has a busier time of it than Mr. Sanderson. Besides acting as Principal of the Public School, he is Town Clerk and Treasurer, and finds time to lead the church choir on Sunday.

Ret[illegible] Soldier Fined

Magistrate James Tolton made an example of a returned soldier charged with assaulting a citizen at the G. T. R. station on Tuesday night. The magistrate assessed him $14 in all, or 10 days. He paid. Everybody likes to honour the boys who come back from the Front and it is unfortunate when they forget to respect the rights of citizenship which they have been fighting to uphold.

✦ ✦ ✦

A Close Call

Mr. J. E. McGregor had an experience last Wednesday morning which he would not care to have repeated. A rifle bullet grazed his neck as he was working in the yard, imbedding itself in a plank just beside him. It was entirely too close to be comfortable, as a variation of one inch would have put Mr. McGregor on the casualty list. The penalty for discharging fire-arms within the corporation limits is severe and it is hoped that offenders will take warning from this near-accident.

✦ ✦ ✦

At Police Court

An item which appeared in our local contemporary last week led to an interesting development. The paragraph stated that a bicycle rider had settled with Chief Ferguson for riding on the sidewalk by handing him $3.00. The Chief who was highly indignant at the suggestion that he had been guilty of a serious offence, made inquiry and found that the story had emanated from a young dry goods clerk. The Chief interviewed the clerk who confessed that while riding on the sidewalk he had met a friend who advised him to get off the walk or Chief Ferguson would get him, adding "He got me the other day and collected $3." Having got so much of the facts, the Chief decided to have the whole matter cleared up in Court, so he laid a charge of riding on the sidewalk against the clerk and had the friend summoned as a witness. The case was tried before Magistrate Tolton on Monday night. When it came to a show down the friend denied having said what was reported which had no foundation in fact. The net result was that the Chief was entirely cleared in the matter and the clerk, who gave the information to the reporter, was $5 lighter in pocket after paying his fine and the court's costs.

MOBILIZING TODAY

Four Hundred Men of the 160th Batt. are Headed for Walkerton.

The various detachments of the 160th are now headed Walkertonwards and within another twenty-four hours will be quartered in the County Town. The greatest number are expected from Wiarton and intermediate points on Thursday morning. As 507 men are out helping the farmers, and there are already about three hundred soldiers in Walkerton, the men coming in on Wednesday and Thursday will total about four hundred.

It has been a busy week at headquarters getting ready for them, but we understand that the new arrivals will find everything in shape. Arrangements for messing and quarters have been arranged as follows:—

"A" Co. (Walkerton) are in private billets and at the Business College. They will be "messed" at the Methodist Sunday School Rooms.

"B" Co. will have their mess and quarters at the Exhibition Grounds.

"C" Co. (Wiarton and Cape Croker) will be billeted at the Station Hotel and Victoria Block. Mess arrangements have been made for the company at the roller rink.

"D" Co. will have quarters at the Victoria Rink and mess in the Presbyterian Church basement.

The bugle band, brass band, pioneer section and machine gun section are accommodated at private billets.

HOUSE BROKEN INTO

Young Vandals Wreck Interior of East Ward House During Owner's Absence.

Mr. and Mrs. Joseph Jones, a respected couple of the East Ward, locked up their house some months ago and went to Toronto to spend the winter with a married daughter. A day or so ago it was discovered that in their absence the house had been broken into by a number of youths of the neighborhood and the contents most wantonly destroyed. Almost every article of furniture in the place was literally smashed to pieces and the contents of both drawers and closets thrown together in a conglomerate mess all over the house. Lace curtains were torn from the windows and rubbed in grime. The china and crockeryware in the house was smashed into little bits. Articles such as flour were strewn all over as if the intruders were vying with one another in adding to the messiness of the scene. If an earthquake had struck the building, it could not have wrought a more desolate sight. Chief Ferguson has the names of the offenders and there are uncomfortable times ahead for the young offanders and their parents when the wheels of the law start moving.

FARMER SERIOUSLY HURT

Harry Dossman Of Culross Badly Disabled In Runaway Accident When Bit Broke.

The breaking of their horse's bit, as they drove off to church on Sunday morning, resulted in a serious accident to Mr. and Mrs. Harry Dossman, a recently married couple, of Culross Tp. The former sustained two fractures of his leg, one a compound fracture, and a bad dislocation of the ankle. He also suffered some internal injury, but not serious, it is hoped. His wife had no bones broken but is still confined to her bed through shock and the bad shaking up which she received.

It all happened in a few moments. They were in the lane leading to the road, and just after the bit broke, the buggy scraped the fence. This frightened the horse and as Mr. Dossman had now no control of the animal, he called to his wife to jump. As he leaped himself, his leg must have got a twist in the wheel. Mrs. Dossman hesitated to jump and remained in the rig during its mad career down the lane. The buggy collided with a post and she was thrown out, landing a considerable distance away from the wrecked buggy, and though no bones were broken, she was badly shaken up and seriously bruised.

Mr. and Mrs. Dossman are both well known in Walkerton, the latter being a daughter of Mr. and Mrs. Jos. Batte Sr. of Gibson St. After their marriage in January last, they went to reside on the old Dossman homestead in Culross. Their many friends here were sorry to hear of their serious mishap. It is believed that Mr. Dossman will be laid up for fully a year.

I. O. O. F. AT CHURCH

An Inspiring Message To Members Of The Oddfellows Order By Rev. R. Perdue.

The members of Walkerton Lodge no. 94, I. O. O. F. paraded to St. Thomas Church on Sunday morning. There was a splendid turnout of the brethren, who were marshalled by Sec. Jas. Crawford. Rev. R. Perdue, delivered an inspiring message based on Luke 10 : 27: Thou shalt love the Lord thy God with all thy heart, and with all thy mind and with all thy strength, and thy neighbor as thyself. This text, he said, was the best definition of true religion, and summarized both the old and new testaments. He dwelt especially upon the last part of the text as exemplified in the parable of the Good Samaritan. Creeds are of no great account unless they are crystallized in action, and affect character and conduct. If any man tried to serve God without loving his neighbor, he failed in both. There is more good in the world every day but we are all still far short of the mark. On returning to the lodge rooms the brethren passed a hearty vote of thanks to the Rev. Mr. Perdue, the choir, and the officials of the church.

BIG DEMONSTRATION

Grand Program will be Put on Here on Victoria Day.

Arrangements for a Grand Military Demonstration at Walkerton on the Twenty-fourth of May were made at a public meeting in the Town Hall on Friday afternoon. A program will be put on by the soldiers including physical drills, bayonet exercises, signallers, battalion drill, exhibition by machine guns, bomb throwing, trench warfare, bugle and brass bands. The proceeds of the day will be devoted to purchasing mess tents for the 160th. It is expected that thousands of people from all parts of the county will take advantage of the last opportunity to see the soldier boys before they go to London.

The committees having the arrangements in hand are composed as follows:—

Chairman, John Henderson; Secretary, Geo. D. McKay; Treasurer, E. M. Taylor.

Program Committee:—David Robertson, Judge Klein, Art McCartney, E. M. Taylor, F. W. Lippert.

Grounds Committee:—Alexander George, John Ernst, Geo. Lettner, Wm. George, T. J. Jenkins, John McKinnon, Duncan McKerracher, R. M. Player.

Printing & Publicity, Committee: A. E. McNab, W. J. McNally, W. M. Shaw, A. Collins, H. M. Ley, R. G. Hunter, John Rowland.

Railway Committee:—John Rowland, A. E. McNab, D. McKerracher, Norman Walford, Norman Hinson.

Finance Committee—David Robertson, W. H. McBurney, C. S. Stephens.

WIT AND HUMOR

CHANGED STATUS.

(Baltimore American)

"Was the fugitive bank officer the cashier?"

"He was, but now he's a runner."

YES.

(Judge)

"This war gas must certainly be a deadly vapor."

"Yes. I had to quit going to the Club on account of it."

A HIGHLY POLISHED MAN.

(Boston Transcript)

"Mr. Binnick is very polished, isn't he?"

"Very! Everything he says reflects on someone."

LEXICOGRAPHY.

(Judge)

Mr. Popp—Here's a county out in Illinois where every ninth man has an automobile.

Johnny Popp—Oh, Dad, is that what they mean by the submerged tenth?

SOMETIMES HAPPENS.

(Detroit Free Press)

"Her ideal is shattered."

"What happened to it?"

"She married it."

PROMISING.

(Pacific Unitarian)

"Every time the baby looks into my face he smiles," said Mr. Meekins.

"Well," asked his wife, "it may not be exactly polite, but it shows he has a sense of humor."

A SURE THING.

(Life)

"I asked you, sir, would you take your daughter to see a play like that?"

"And I answer you, sir, that the chances are nine to one that she has already seen it."

STRICTLY UP-TO-DATE.

(Life)

"Has your best girl gone back on you?"

The Efficiency Expert—You'll have to wait until I consult my card index system.

LOGICAL.

(London Opinion)

"Why don't you move into more comfortable quarters, old man?"

"I can't even pay the rent of this miserable hole."

"Well, since you don't pay rent, why not get something better?"

HEARD IN THE HOTEL BARBER SHOP.

(Lehigh Burr)

Porter—Boss yo' sho' am dusty.

Patron of the Hotel—All right, then you may brush off about 10 cents' worth.

CLEVER.

(Pitt Panther)

The Bartender—That slick counterfeiter stopped at the Castoria Hotel and paid his bill with some of his wares.

The Cop—Paid out bad dollars for good quarters, eh?

ONLY A PHARMACIST CAN TELL.

(Pitt Panther)

"I want to buy some perfume."

"About how much, Miss?"

"Oh! about a scent's worth."

NOT SO DEEP.

(Kansas City Journal)

"His book is said to be rather deep."

"Can't be very deep. That little bit of a girl over yonder told me she managed to wade through it."

YE SCHOOL OF EDUCATION.

(Pitt Panther)

Hub—I just read an account of two girls getting lost in the Alps in midwinter.

Wife—Terrible! Were they frozen to death?

Hub—No, they warmed themselves on the mountain ranges.

WELL OFF.

(Cleveland Plain Dealer)

The Slum Worker—You look like a very worthy person.

The Flattered One—Oh, I'm all right, ma'am. I managed to get along first rate. I ain't got nobody to support. I'm a single woman.

PROOF POSITIVE.

(Life)

"Herbert, you weren't listening to what I said."

"Er—what makes you think that, darling?"

"I asked you if you could let me have $20 and you smiled and said, 'Yes, dearest.'"

ANOTHER BOOK AGENT.

(The Craftsman)

"Please, ma'am," said the maid, "there's a man at the door with the new telephone directories."

"Tell him to go away," replied the old mistress. "I haven't read the old one yet."

NOT BACKWARD.

(Puck)

Country School Teacher—You notice that boy who stands at the foot of the class? Well, last summer he was the brightest boy in school.

Committeeman—He is now. I notice the foot of the class is nearest the stove.

A SHREWD BOY.

(Kansas City Journal)

"You are a fine little fellow."

"Yessir."

"And may be president some day."

"That's right, sir. And a quarter invested now might arouse a gratitude that might get you an important office when that times arrives."

ABOUT A PROVERB.

(London Opinion.)

"Brevity is the soul of wit," observed the sage.

"Maybe," replied the fool, "but I never feel very witty when I am short."

THE PATRIOT.

(Detroit Free Press.)

"What have you ever done to show your patriotism?"

"Well, I always shoot off two or three dollars' worth of fireworks every Fourth of July."

PERPETUAL WONDER.

(Kansas City Journal)

"I wonder how Flubdub can afford an auto. Don't you?"

"No, I don't wonder how he can afford an auto. I know he can't afford an auto. But how do galoots like him manage to get hold of autos? That is what flabbergasts me."

GOOD COVER.

(Kansas City Star)

"Why, Johnny," said a mother to her 4-year-old son, "aren't you ashamed to go about with such a dirty face?"

"Don't you worry about it, mamma," he replied. "As soon as I get a little bigger I'll raise whiskers, then you won't notice the dirt."

REPARTEE.

(Richmond Times Despatch)

She—One thing is sure. I don't intend to be criticised and censured because I have failed to realize your expectations.

He—You misunderstand me entirely. All that I have done is to express my conviction that you have more than justified my fears.

Father—Marjorie, if you drink so much tea you will be an old maid.

Marjorie—I don't believe that at all. Mamma drinks lots of tea, and she's been married twice and isn't an old maid yet.—Boston Transcript.

'TWIXT LOVE AND PRIDE

Charlie Trevanion, at the end of the room, was smiling sweetly into Rachel Younge's eyes, while inwardly his blood was boiling at the scandalous manner in which Frances Sylverton was flirting with that "fellow" Hervey just beside the conservatory door. She might at least have had the decency, he thought, to go beyond the remark of the people in the ball-room; but she was careless of public opinion to a fault, and never had any heart, and was of all girls, etc., etc. And all the time Miss Sylverton was as jealous as possible of the smiles Charles Trevanion was bestowing on that faded little partner of his, and would not have moved from the prominent position she had taken up—for the double purpose of tormenting herself and enraging the man she loved—for anything that could be offered her.

Eddie, however, heart-whole and no matter how— lifted from his shoulders, was enjoying himself to the best free, with the weight of his debts—of his ability—flirting here and there indiscriminately with each new face that presented itself, and accepting the joys of the present hour without thought or fear of the future, as it was his nature to do under all circumstances. He laughed, chatted, and made pretty speeches to pretty partners, even while amusing himself by watching Rachel Younge's transparent efforts to enslave his elder brother.

"No go, Miss Rachel," he thought; "your trumps ain't high enough." But a few minutes afterward, seeing the damsel alone and looking slightly dejected, he gave up hopes of securing a more attractive companion, and took Miss Younge out of her Slough of Despond, by whirling her round the room to the music of the waltz then playing.

Thoroughly good natured, and at the same time thoroughly unstable, Eddie was not to be depended on, a good deal of utter worthlessness being mixed up with the brightness of his disposition. However, to-night he had done for Rachel what perhaps worthier men would have refrained from doing, and she was grateful to him for it. It was not the pleasantest sensation in the world to find herself sitting solus in a crowded ball-room under the eyes of a more successful rival, and Miss Younge was thankful that Frances Sylverton's dark-grey orbs should not so behold her. Besides, Eddie, if not exactly the rose himself, was near to the rose, in point of blood at all events; so she went home shortly afterward with the King's Abbott party, satisfied on the whole with the results of her evening.

Mildred scarcely spoke during the homeward drive beneath the starlight, and said "Good-night," to the others almost immediately after their arrival at the house.

"How tired I am!" she observed. "Good-night, mamma;" and she kissed Lady Caroline on both cheeks.

"Yes, that's right; go to bed at once, my darling," her mother returned. "You danced too much, I think. I wonder when those stupid boys will think it proper to order the dog-cart and come home also?"

"I shall come to you for a few minutes, Milly," Mabel declared, with alarming brightness, considering the hour of night, or rather morning," so don't lock your door for a while."

"Very good," Mildred rejoiced, lazily. "Of course you have something of vital importance to communicate, or you would not talk of conversing at this unusual hour, so I'll wait for you. Come soon, however, if you wish to find me sympathetic." She went up the stairs listlessly to her bedroom as she finished speaking.

CHAPTER X.

"It was a delicious evening, wasn't it!" began Mabel, enthusiastically, half an hour later, settling herself comfortably opposite her sister's fire.

"Very like all balls, I think," Miss Trevanion answered—"a mixture of bad dancing, unhealthy eating and time-worn compliments—a little sweetness, and no end of bitterness."

"Then you didn't enjoy yourself?" asked Mabel, with disappointment in her tone.

"Oh, yes, I did, immensely. Can anything be pleasanter, more heart-stirring, than to hear your own praises sounded until long after midnight, all in the same drowsy tone."

"Of course you refer to Lord Lyndon. Then why did you dance so much with him?"

"To see how much of him I could endure—to see how much wretched dancing and idiotic nonsense I could put up with during one evening, I suppose." "Besides"—with a mocking laugh—"have you forgotten, my dear Mabel, what an excellent thing it would be if Lord Lyndon should be graciously pleased to bestow upon me his hand and—ah!—fortune! Just fancy what a blessing it would be to the family—a real live lord as son-in-law, brother-in-law and husband! Consider the intoxicating rapture of sitting opposite his lordship at breakfast and pouring out tea for his lordship until death us did part!"

"Nonsense, Mildred; don't talk like that. I hate to hear such speeches. A title is all very well, but it doesn't make up for everything; and you would be the last girl in the world to sell yourself to any man."

"The very last perhaps: but who can say what may happen?" Miss Trevanion said, dreamily.

"Of course you would be," Mabel acquiesced, cheerily. "And now, talking of dancing, it is most unfair of you to stigmatize all the dancing to-night as bad. Why, Denzil Younge is one of the very best dancers I have ever met."

"I didn't dance with him," Mildred said, coldly; and then, after a slight pause, "He is not in love with you, then, after all, Mabel?"

"In love with me!" echoed Mabel. "Well, that's the calmest thing I have ever heard! Surely, my dear Mildred, you would not require any poor man to be in love with two sisters at once!"

"I don't understand you," said Mildred.

"Don't you? I should have thought his infatuation for another member of this household was pretty apparent by this time."

"I hope he is not in love with me, if that is what you mean," Mildred exclaimed, with some show of irritation, getting up from her seat and going over to the dressing-table, where she stood for some minutes, her back turned to her sister, idly toying with the many articles scattered about.

"Why?" demanded Mabel, throwing herself back in the lounging-chair, with the air of a person prepared to argue the question to the end.

"Because, should he ask me to marry him—which is a most unlikely thing to occur," said Mildred, in a low voice, "I should refuse."

"Well, I think you might do a great deal worse than marry him," "the queen" declared, emphatically. "And how you could compare him for one moment with that insipid earl I cannot imagine—a creature who dreams of nothing, I do believe, from morning to night beyond his horses, and the correct treatment of the pug. Now Denzil, on the contrary, though quite as much up in horseflesh as my lord is, has the good breeding to suppress his knowledge—in the drawing-room at all events."

"There, there—if it has come to 'breeding,' we won't follow up the subject," interrupted Miss Trevanion, impatiently. "I don't find it sufficiently interested to care to watch for daylight over it. Are you going to sit up until dawn, Mabel? Because I am not; and so I should advise you to get to bed at once, unless you wish to look like a ghost in the morning. By the bye, that extremely good-looking new admirer of yours said something to mamma about calling to-morrow, did he not?"

"Yes—I don't know. It is cruel of me to keep you up like this," stammered Mabel, with a faint blush, starting to her feet as she spoke; "you are looking quite pale and wan. I am afraid, after all, Milly you found the ball a bore, and here have I been teasing you about it. Good-night, dear."

"Good-night, my darling," returned Miss Trevanion, suddenly, kissing her with rapid, unexpected warmth.

After this they separated for the night and got to bed, and dreamed their several dreams of joy or sorrow, as the case might be.

* * * *

Sir George and his wife, in their room, at about the same time as the foregoing conversation had been held, were having a few words together on the same subject.

"Well, Carry," said Sir George, "you were wrong, I think, my love; I don't believe Denzil Younge is as much taken with Mabel as you gave me to understand, eh?"

"No, but he is dreadfully in love with Mildred," his wife said.

"Well, nothing could be better."

"Nothing could be worse, you mean."

"Why?"

"Because she will refuse him."

"In the name of patience, for what?" demanded Sir George, explosively. "Is it because he is rich, handsome and prosperous?"

"No; but simply because his father has sold cotton."

"Fiddle-de-dee!" exclaimed Sir George, with great exasperation, and he strode up and down the room twice with rapid, hasty footsteps. "Look here, Carry," he then said, "something must be done. My affairs altogether are in a very critical state. Bolton told me so in as many words the other day. He said that I could not weather the storm much longer—that I had not, in fact, a leg to stand on (these were his own words, I assure you)—that money must be got somehow and so on. And where the deuce am I to get ready money, do you suppose? Every method of procuring it that I know of has been used up long ago. I see nothing but absolute ruin staring me in the face. And here is this willful girl actually throwing away fifty thousand pounds a year—every penny of of it, as sure as my name is Trevanion!"

By this time Sir George was greatly excited, and was pacing up the carpet and down again, with his arms crossed under the tails of his dress coat. Lady Caroline had subsided into silent weeping.

"Well, well, there is no use in anticipating evils," continued her husband, presently, who having succeeded in raising the storm was now equally desirous of laying it: "perhaps—who knows?—affairs may brighten."

"If she would even encourage Lord Lyndon," said poor Lady Caroline, dolefully, still weeping.

"Ay, just so," returned Sir George; "but how she could throw over Younge for such a heavy substitute as Lyndon passes my comprehension. I declare I should prefer Denzil with no antecedents than that fellow with all his ancestors. Besides, Lyndon's rent roll is barely twenty thousand a year—not even half the other's."

"Still, I think that would do very nicely," put in lady Caroline, meekly. "If she could only be induced to look kindly on any one, I should be satisfied."

"So should I, so long as the 'some one' had Denzil's money," observed Sir George, and went back to his dressing-room to finish his preparations for bed-time, and think over the inconsistent conduct of his daughter Mildred.

CHAPTER XI.

The Younges' visit was drawing to a close. Nearly a month had elapsed since their arrival, and Mrs. Younge began to speak seriously of the day that should see them depart. This she mentioned with regret—a regret audibly shared in by most of the young Trevanions, with whom the elder pair and Denzil were immense favorites. Sir George, too, seemed sorry at the prospect of so soon losing his old schoolfellow, while Lady Caroline, glancing at the son-in-law whom she would so gladly have welcomed, sighed a disappointed sigh with all sincerity.

"We must give a ball, or something, before their departure," whispered Sir George to his wife; and, after much arguing, the "something", in the shape of tableaux vivants, with a dance, afterward, had won the day.

It was six o'clock on a dark November evening, and in the inner hall the younger members of the household had assembled. Though large and spacious, the hall was unsorts of weird shadows into dark corners far in the distance.

Grouped round the fire that burned lighted save by the wood fire that blazed and crackled and threw all low on the hearthstone—no fire-grate having ever disfigured the quaint old-fashioned appearance of the hall—the Trevanions and their guests, with the red light illuminating their features, formed a group well worthy of a painter's hand. Mildred lay back in a heavy arm-chair, her fair hair contrasting strongly against the velvet covering which gleamed blood-red in the uncertain flame. At her feet sat Mabel, gay and animated, supporting her own opinions vigorously against the united attacks of Eddie and Roy Blount, the latter now an almost daily visitor at King's Abbott. Rachel Younge, at the other side, small and innocent-looking, was endeavoring to make what havoc she could with the heart of unsuspecting Charles Trevanion; while Denzil, his beautiful soft blue eyes alive with laughter, came every now and then with overwhelming force to Mabel's assistance.

"I think a tableau taken from each of the 'Idyls' would be charming," said Mabel, decisively, following up her argument.

"So they would," said Eddie—"especially one taken from that part beginning 'Then on his foot she set her own, and climbed'—you remember? I always fancy, when I read that, how graceful Enid must have looked under the circumstances. I have no doubt old Bess would stand quiet during the performance, if mother wouldn't object to her presence in the drawing room. You could be Enid, you know, Mabel, and we could ask old Bates to be your Geraint. As he is a sworn admirer of yours, of course he would consent."

"Nonsense!" cried Mab. "Can't you talk sense? We shall never have anything arranged if you will not give your mind to it. What is your opinion, Mildred? Do you approve of the 'Idyls'?"

"It is as yet by far the best suggestion," answered Mildred, heartily. "Let us take that pretty part where Geraint first sees her at her father's ruined castle."

"Yes," said Mabel, eagerly; "and then we could have the scene from 'Elaine,' where she is in the garden with Sir Lancelot, or on her death bed, singing, with her father and brothers around her."

"That is where she is shrilling it, is it not?" Eddie asked, innocently.

"Eddie," cried Mabel, desperately, "I declare you would take the romance out of anything; so refrain from talking altogether, if you cannot make suitable suggestions. Now let me see—we have named two really good tableaux; and, talking of gardens, there is that scene in 'Faust' where Marguerite is trying her fortune. Oh, Milly"—turning toward her sister—"that is the very thing for you. With your flaxen hair and blue eyes, you will make the loveliest of Marguerites; and we can have Faust in the background admiring."

"Mephistopheles—who is to personate him?" asked Blount, from the semi-darkness, where he stood leaning against Mildred's chair.

"You shall," answered "the queen," mischievously, turning her face coquettishly in his direction: "it will be the right man in the right place at last. Seeing you now in the firelight, it seems to me that the Satanic expression that characterizes your face is more remarkable than usual."

"Is that a thing to be wondered at?" said Blount, laughing, "considering the heartless manner in which I have been snubbed and contradicted this entire evening? To appear amiable would be more than human nature could compass."

At this moment there came a thundering knock at the hall door. Mildred being in dreamland, was rudely brought back to earth.

"Oh, what is that?" she was asked.

"'Tis but a gentle tapping, tapping, at our chamber door," replied Eddie, reassuringly.

"Who can it be?" said Mab, all eager curiosity.

"Sir George, most likely," answered Denzil, smiling at her eagerness. "I know he was out about the yard half an hour ago just before I came in."

"No," said Mab; "he always comes in by the kitchen way, or by his study. I think it's—"

The inner door opened and Frances Sylverton came forward in full riding costume, her cheeks flushed by the chill evening air, her hair slightly shaken from its usual neatness.

"Enter, Lady Macbeth!" cried Mab. "Oh, Frances, I cannot say how glad I am to see you; you are more than welcome, and you must stay to-night and help us out of our difficulties."

"That I cannot," returned Miss Sylverton, with heavy emphasis; "I have ridden over with a message from papa to Sir George, and must deliver it and carry back the answer."

"What is it about? Nothing serious, I hope, Frances?" asked Mildred, anxiously.

"Turnips, I think," said Frances, glancing at the note she carried in her hand.

"Turnips!" repeated Mildred, disdainfully. "As if turnips could not keep until to-morrow! Why, I thought it was a matter of life or death! Indeed, we cannot let you go back on such a cold, dark night. Eddie, tell the man Frances will remain."

"No, no, Mildred," began Miss Sylverton.

"But I must be home early to-morrow morning," still protested Frances, though rather faintly this time; "I have particular business to transact, and I know if once I establish myself here, I shall not be able to manage it."

"If that is all," said Charlie, who had not as yet spoken, "I promise faithfully to drive you home myself in the morning as early as ever you please. Will that do?"

"Yes," said Miss Sylverton, turning round on him a beautiful, pleased smile; "and so, after all, I do surrender. Well, it is an honorable defeat at all events; I did my best. Eddie, run and tell Thomas that he must go back alone, and to give my love to papa, and say that it is all right about the message, and that I shall be home the earliest thing possible in the morning." So it came about that Frances Sylverton stayed on at King's Abbott that night, and was soon as deeply immersed as the rest of the party in the all-important topic of the tableaux.

"I have been thinking of such a charming one," she declared, presently, when Mabel had informed her of the two already decided on; "that picture of the 'Black Brunswicker.' I have set my heart on seeing Mildred in such a tableau. Will you take one of the characters, Milly?"

"It seems to me that you have all set your hearts on giving me the principal parts," said Mildred, hesitatingly; "perhaps somebody else would like to appear in the tableau just proposed."

(To be continued.)

Ginger up and have some pep. Variety is the spice of life.

Days of Rheumatism Now Over!
Wonderful Miracles Worked by "Nerviline"

Its Strange Power is the Marvel of Thousands it Has Cured.

You will welcome the good news that "Nerviline" rapidly relieves the most excruciating pains.

Nerviline penetrates deeply into the tissue, and possesses pain-subduing power at least five times greater than anything heretofore discovered. Its curative influence upon rheumatic pains is really wonderful.

Nerviline is offered to the people of this community under a positive guarantee of its reliableness.

As a curative agent of severest pain, every rheumatic should test this great remedy.

Rheumatism is the greatest test Nerviline has to meet. It cures pains, big and little, but to rheumatics especially it is a great blessing, just as it is to those who suffer from neuralgia, sciatica, lumbago, stiffness or enlarged joints.

Remember this: There is nothing harmful in Nerviline.

You can use it freely on your children for their aches and pains. It is dependable, reliable, safe. Nothing to equal good old Nerviline as a general family remedy.

Get the large 50 cent family bottle; it is far more economical than the 25 cent trial size. Sold by dealers everywhere, or direct from The Catarrhozone Co., Kingston, Canada.

Dolly's Dress.

When Dolly dresses for a dance
I gaze at her aghast,
My soul with dire forebodings of
Disaster overcast.
Her skirt is so exceeding short,
Her waist is very low,
Extremes to meet would only have
A little way to go.

If Fashion should decide the skirt
Be shorter, yet, alack!
And evening bodices be cut
Still lower in the back,
(Which journals of the modes announce
Will be the next decree
From autocrats sartorial),
O where will Dolly be!
—Minna Irving in Judge.

Brick-shaped bread pans, which produce a loaf of bread from which dainty individual slices may be cut are far superior to the old-fashioned big sorts.

Spreading Good News Broadcast

WANTS EVERYBODY TO KNOW DODD'S KIDNEY PILLS CURED HIM.

Louis Champagne, After a Long Period of Sickness and Weakness, Says He Found New Health in Dodd's Kidney Pills.

Millerand, Ont., May 1.—(Special.)—Strong and hearty again after a long period of weakness and ill-health, Louis Champagne, a well-known resident of this place, is spreading broadcast the good news that he found new health and strength in Dodd's Kidney Pills.

"For a long time," Mr. Champagne states in an interview, "I suffered from kidney disease and backache. My appetite was uncertain, and I got up in the morning with a bitter taste in my mouth. There were flashes of light before my eyes, and I had a dragging sensation across the loins. My limbs were heavy and I was always tired.

"Then I decided to try Dodd's Kidney Pills, and I am glad to be able to say that two boxes made me well. I recommend Dodd's Kidney Pills to all those who suffer from feebleness or bad kidneys."

If you have the symptoms mentioned by Mr. Champagne, you may be sure your kidneys need attention. Neglected kidneys are the cause of more than half the ills mankind is heir to. The way to treat sick or weak kidneys is to use Dodd's Kidney Pills.

ANTIQUES

Were proofs needed to demonstrate the advantages of a knowledge of the antique in the development of modern artistic industries, one has only to make careful study of the characteristic features of modern products to connect them with the work of ancient craftsmen.

While all artistic industries have benefitted in this way, workers in gold and in silver, in bronze and brass, and copper, in ivory and in wood, perhaps the widest reaching results have accrued from the arts and crafts associated with ceramics, and while Egypt, Greece and Italy all contributed largely, it is safe to say that to the Orient belongs by far the greatest share.

Other undisputed facts in this connection, supported by history and tradition, are those which fix the initiation and development of the various branches of ancient ceramic art with the rulers of the several nations practising them.

The manufacture of fine pottery seems to have been a Royal prerogative. So much so was this the case in Oriental cities that even the color of the ware produced was under absolute control, and any infraction of the standing order was punishable in the most severe forms. Particularly was this the case with the color known to the Celestial as the "Yu-Yao," "the blue of the sky seen between the clouds after rain," which was the exclusive right of the Imperial household for use on its pottery. Blues in great variety have largely influenced the artist in pottery throughout all ages, but to China belong the credit of having originated most of them.

As the "Yu-Yao" is among the very earliest of which we have distinct mention in the history of Chinese porcelain, it may be set down as a pioneer of the many blues introduced and received with more or less favor during later periods, and possessing names of equally poetic derivation, such as "moonlight blue," "liquid dawn," and "the blue of the prune skin," while the names of others, such as "peacock," "periwinkle," "sapphire," "lapis" and "steel" suggest their own origin, and others possessing distinctive features were the "Mazarine" or "powder-blue," and the "Mohammedan" blue.

CURBING THE DRINKERS.

The New Scheme That is Being Tried in Parts of Sweden.

The "Stockholm system" of allowing each citizen only a fixed quantity of spirituous drink, which was inaugurated just after the war started, has now been extended to thirty-one of the hundred districts in Sweden. The system which is now in operation was devised by Dr. Ivan Bratt. It allows every citizen in good standing to buy one liter and no more of spirituous liquor every five days.

To make this plan feasible each person is provided with a small book resembling a commutation railroad ticket, from which a coupon is torn every time the consumer buys his liter of whiskey, brandy, cognac, punch, schnapps or whatever kind of alcoholic beverage he fancies. At the same time his book is stamped with the date of the purchase, so that it is clear to the dealer when he made his last purchase. Without showing his book no citizen of Stockholm has the remotest chance of obtaining a bottle of liquor anywhere in the city.

It is true that in some cases, however, exceptions are made. If one can persuade the authorities that on account of his social position and the demands of constant entertainment one liter every five days is totally inadequate and if the authorities are convinced that such a person can be trusted with more liquor without abusing the privilege conferred upon him he is then given a special license to purchase two, three or more liters, according to the circumstances. On the other hand, if the person is a drunkard, has a police record or has in any other way incurred the displeasure of the authorities he is allowed no liquor at all.

Minard's Liniment, Lumberman's Friend.

THE WHOLE TRUTH.

(Montreal Star)

What the nation will desire above all things will be a relentless and unlimited probing of the whole business. We want to know the truth, and the whole truth; and, if it be shown that the country has been plundered in her hour of supreme agony, no punishment will be too great for the scoundrels who have enriched themselves by robbing the cartridge-belts of our boys to go into action.

Finger Nails Show Health.

Our finger nails are made of a horny material that is in some ways like the material that makes our skin. But it is more like the material that makes our hair. It is after all different from either of these, and is more like horn than any other part of our bodies. The special cells at the base of the nails form a material for our nails, and therefore the health of our finger nails depends on these cells. If you are not in good health, or if you do not take good care of your skin your finger nails will show that they are not healthy. If your blood is out of order, the cells that make the finger nails will not do their work properly and then little white spots will appear on the nails. So you see those little white spots on the finger nails are a sign of bad health.

CONTINUOUS PERFORMANCE.

(Daily [illegible])

"They have their baby photographed frequently."

"So frequently that they could paste the photographs together and have a film."

A GOOD MEDICINE FOR THE SPRING

Do Not Use Harsh Purgatives—A Tonic Is All You Need.

Not exactly sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite fickle, sometimes headaches, and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order—that the indoor life of winter has left its mark upon you and may easily develop into more serious trouble.

Do not dose yourself with purgatives, as so many people do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. Any doctor will tell you this is true. What you need in spring is a tonic that will make new blood and build up the nerves. Dr. Williams' Pink Pills is the only medicine that can do this speedily, safely and surely. Every dose of this medicine makes new blood, which clears the skin, strengthens the appetite and makes tired, depressed men, women and children bright, active and strong. L. R. Whitman, Harmony Mills, N. B. says: "As a tonic and strength builder I consider Dr. Williams' Pink Pills wonderful. My whole system was badly run down, and although I faithfully took a tonic given me by my doctor, I could note no improvement. Then I began Dr. Williams' Pink Pills and was soon restored to my old time health. I can most heartily indorse this medicine."

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Careless Driving.

As motorcars multiply in numbers it is evident that increasingly careful driving is called for. The driver, who "hits her up" endangers not only his own safety, but the safety of other driving is called for. The driver, who fail to slacken speed when they come to cross streets. There are drivers who dash around corners or across a boulevard at a high speed. It cannot be too strongly emphasized that the really competent driver always has his car under control; that he always drives on the theory that every other driver may be careless or may lose his head. Caution marks the competent driver. Recklessness belongs only to the jay.—Kansas City Times.

Keep Minard's Liniment in the house.

COMPLETE SUCCESS.

(Kansas City Journal)

"Somebody told Vanessa that if she would walk backward down the stairs she would see her intended."

"Did it work?"

"Completely. She fell down the stairs and now she is engaged to the doctor they called in."

IF SUBJECT TO COLDS HERE IS GOOD ADVICE

Don't load your stomach with cough syrups. Send healing medication through the nostrils—sent it into the passages that are subject to colds and catarrh. Easy to do this with Catarrhozone, which cures a cold in ten minutes. Even to the lungs goes the healing vapor of Catarrhozone—all through the bronchial tubes, nostrils and air passages—everywhere a trace of disease remains with Catarrhozone follow. You'll not have colds, nor will you suffer from sniffles, bronchitis, or throat trouble if Catarrhozone is used. Get it to-day, but beware of dangerous substitutes meant to deceive you for genuine Catarrhozone, large size, two months' treatment, costs you $1.00; small size 50c; sample size 25c.

TRAVEL IN CANADA "POST GRADUATE COURSE" FOR BUSINESS MEN

Journey Across Dominion to Prince Rupert and Down the Pacific Coast a Splendid Education, Says Prominent New York Merchant.

"A post-graduate course for the man of business," that is how Mr. Prentice, director of the H. L. Judd Company, one of the large business organizations of the United States, describes the trip over the Grand Trunk Pacific from Winnipeg to Prince Rupert and down the coast to Seattle.

"To take such a journey, improving oneself by observation and coming into contact with great natural wonders, may be considered a part of the education of a man wishing to consider himself among the cultured," writes Mr. Prentice.

"When I reached Winnipeg I put up at the Grand Trunk Pacific's fine hotel at Fort Garry. Fine is really too tame a word, and I think it would be more just to the company to describe it as magnificent. I was charmed with this hotel. Its situation is extremely good and everything in the furnishings and appointments seems to be in such harmony and good taste. The service was excellent, the employees courteous and every attention was given to the comfort of the guests. At the Macdonald, in Edmonton, belonging also to the railway, I found the same class of treatment which had so delighted me at Fort Garry; a beautifully furnished room with an immaculately clean bathroom. Such a fine hotel would have been thought entirely out of keeping with the town a few years ago. Edmonton is destined, I believe, to become a large metropolis.

"I left Edmonton westbound at night, and in the morning found myself in the midst of fine scenery, we having reached the entrance to the Rocky Mountains. I hope some day to be able to spend a long holiday in Jasper Park and in the vicinity of Mount Robson. The glimpse of the scenery which one gets from the train make one wish for closer contact with such wild natural charms. There is fine scenery between Jasper and Prince George, but I think I enjoyed most of all that through which the train passes as it skirts the bank of the Skeena. Snow-capped mountains are visible all the way, and it is a delightful trip right up to Prince Rupert, which, owing to its ideal situation, will no doubt become a very large city in the course of a few years. I embarked on the steamship "Prince Rupert," and continued on this vessel right through to Seattle. The appointments of the steamer are first-class in every respect, and I cannot too highly praise the urbanity and courtesy of the captain and other officers of the ship, or the excellent service of the dining-room. I have pleasure in anticipating a return to the Pacific by this same route, and if possible taking in the trip northward to Alaska.

"The Grand Trunk Pacific have a fine proposition, and I think they are doing their best to make the trip across the continent pleasant and agreeable to their passengers. The management deserve great praise for their enterprise, the trains being very comfortable, and the service in the dining cars excellent.

Made in Canada.

FRANCE AND GERMANY

(Alphonse Aulard in Chicago Tribune.)

Alphonse Aulard, professor of the history of the French revolution of the University of Paris and author of the "Histoire Politique de la Revolution Française," has made a career out of the defence of the tradition of the French revolution against the attacks of the reaction, notably of Taine. Since the opening of the war he has had a considerable calming influence on the more violent French opinion and has done much by his articles in the Parisian daily press to soothe useless, wasteful hatred, and to direct French energy into more effective channels. He has stimulated the courage of citizens by bluntly telling them the truth about the military and diplomatic situation.

Is it true, as many Germans assert, that France hated Germany, thought of nothing but a war of revenge, and underhandedly prepared an attack, which Germany, thus menaced in her very existence, only anticipated?

No, it is not true.

If there are among the Germans who say this, some who believe it, and if there are among the citizens of neutral countries some who accept this theory and thereby fall into error regarding the responsibility of the belligerents, it is because they have only a superficial knowledge of French affairs and the French spirit, because they mistake a few manifestations of individuals for an expression of our public opinion as a whole.

It is certain that immediately after the war of 1870-1871, which bled us and mutilated us, we felt hatred for German victors and conquerors. It is certain that at first the treaty of Frankfort was considered by us as only a truce document, and another war appeared to us to be rapidly inevitable.

But this hatred cooled off quickly, making place for a feeling of admiring astonishment at the powerful economic development of Germany; we even came to admire her philologists. The notion of almost immediate war came slowly to a point where it was put off indefinitely. Gambetta, himself, the true chief of our national defence, the man who has stood out for a struggle to the bitter end, gave the example of resignation and awaited the restoration of Alsace-Lorraine as the fruit of peaceful negotiation only.

It was Germany who twice appeared to be seeking an excuse for attacking us; it was Germany's continual menaces and her enormous military development which obliged us to be ready for war against our will.

She forced us to prepare, too, by the tyrannical brutality with which she treated the inhabitants of Alsace-Lorraine.

The German annexation of Alsace-Lorraine, as threatening to the peace of the world, could have obtained a sort of voluntary resignation from the French people only under the condition that the conquered provinces should have been content under German rule. Now they are unhappy and their state of suffering was known to everybody. The odious stupidities of the Germans in Alsace-Lorraine have had almost as strong an influence as the act of annexation itself in making a cordial reconciliation between France and Germany impossible.

However, our love of peace was so strong, that our intellectuals and our leaders of opinion came to avoid any expression which bore any relation to the possibility of an offensive war against Germany.

If I may speak of myself as an example, I remember that soon after the war, in which I had fought as a volunteer, I published a biography of Danton for the use of primary schools in which I proposed to the children for their civic motto the phrase of Danton, "Do all our disputes kill a single Prussian?" A few years later I cut the phrase out of a later edition, for I thought that we had got out of danger of war into normal life again, and I hoped strongly that pacific measures would secure a just organization of Europe.

Similarly our most important educational association, the Ligue l'Enseignement suppressed its motto, "By the Pen and by the Sword," which it had adopted immediately after the [illegible]

Then the Nationalists, as we call the most burning patriots, contented themselves with not believing in the pacific intentions of Germany and with asking for increased armaments in order the better to protect ourselves. They wished that France should arm herself to the teeth against a possible German attack especially during these last years. Never did they ask for a French attack against Germany.

The ardor with which these same Nationalists supported and developed France's colonial policy showed clearly that at bottom they did not wish to attack Germany. For the effort necessary to conquer and develop Tonkin, Tunis, Madagascar and Morocco removed the possibility of a simultaneous preparation for conquest of Germany and at the same time these colonial successes, in satisfying national pride, made the memory of our humiliation of 1871 less bitter.

In reality French Republicans came to put all their confidence and all their ardor into the spread of liberal and democratic ideas. They hoped that by creating in Europe an atmosphere of democracy they would little by little induce the establishment of free institutions in all the nations, so that war might be prevented and national injustices be repaired—the restoration of the independence of Alsace-Lorraine included—by the mere force of the functioning of these free institutions.

In short, we wished to establish in France a model democracy whose influence would win over, among other peoples, the Germans, influencing them, to substitute a liberal, modern and pacific government for their absolutist, old-fashioned, warlike government.

* * *

Among French Democrats the Socialists went so far as to believe that the German people were on the point of entering or had already entered into the democratic condition. Taking seriously certain speeches and certain acts of the German Socialists, they candidly believed that the Germans were at one with them to oppose, even by revolt, any war whatsoever, and even that these German Socialists would destroy the absolutism of the government of their own country.

The talks between French and German Socialists came to be frequent. The illusion of a German socialism as the brother of French socialism, the friend of peace at any price, the friend of France, capable of disobeying the Kaiser in so far as he might be inclined to make war, got control of even clear heads in France. Thus the leader of French Socialists, the strongest and most enlightened mind in French politics since Mirabeau, the late Jean Jaures, not only dreamed of a reconciliation with Germany but actually believed that such a rapprochement was practically realizable, and not far away, as he frequently told me himself.

It was not only the Socialists of France who showed their love of peace in conferring in a friendly spirit with the Germans, but even the republicans who were not Socialists, did not hesitate to undertake such relations; in the spring of 1913 more than a hundred French parliamentarians conferred with some German representative legislators at Berne.

As for the increase in our armaments, they were never undertaken except in answer to sudden and enormous German increases, as an indispensable, vital necessity, and always with the strongest hope that the increases would never be of any use.

Alas, the insufficiency of our military preparations should not be attributed to any negligence or weakness, but above all, to this illusion of ours that there would not be any war. Our lack of adequate military preparation, which has been such a bane to us, is only another proof of our pacific intentions.

Even during the critical days of the end of July, 1914, French opinion weighted on the government and influenced it not to precipitate a declaration toward war, for France wanted peace, and not war, so profoundly, not from fear, but ought of wisdom, that up to the very last moment she persisted in believing peace still possible.

France accepted war because it was imposed upon her, she could not have avoided war without dishonoring herself by accepting the odious crushing of Serbia, prelude to the crushing or subjugation of all the free nations, prelude to the tyrannical hegemony of Prussianized Germany. In accepting this war France felt herself to be the champion of the right of peoples to independence; she has accepted it with all her soul, and she will carry it through to the end, to the triumph of liberty over despotism, to the victory of the principles of the future over the principles of the past.

Sailor Hats Here Again

The sailor hat has been ushered in again, differing very slightly from those of last season except in detail. Such combinations as Milan straw and glazed kid or oil cloth, and chip straw are shown extensively. The colors in the later are developed in plain dotted and checked effects. The hat illustrated is faced with Milan, the top being of rose and white plaid oilcloth.

SWISS DIVORCE CASES.

The Court Always Tries to Settle Them by Reconciliation.

In one important respect the Swiss surpass other nations in the management of their divorce cases, says an English correspondent.

In every town there is a kind of official paper known as the Feuille d'Avis, in which one may read daily the following announcement:

"M. and Mme. X., who are in instance of divorce, are requested to appear privately before the judge, alone with their lawyers, in order to come to a reconciliation if possible."

Before the beginning of every divorce case in Switzerland this notice is published and sent out to the interested parties, leaving the couple, of course, free to attend before the judge or not, as they wish. Often the couple meet.

Although there are no statistics published on the subject, I am told by a leading lawyer in Geneva whose specialty is divorce cases that at least 26 per cent. of divorce cases—"much to my loss, unfortunately," the lawyer added, with a smile—are settled by the paternal advice of the judge at these meetings out of court.

In fact, Swiss lawyers will not definitely take up a divorce case until it was passed through the reconciliation process.

If one of the couple does not attend the rendezvous this means that the affair is to be fought out, but in any case Swiss divorces are not expensive.

OTHER PAPERS VIEWS

THE IMPORTANT QUESTION.

(St. Thomas Journal)

Canada's war expenditure is nearly one million dollars a day. How much of this do the grafters get?

WISE LITTLE HOLLAND.

(St. Thomas Journal)

At any rate Holland refrains from writing notes.

A SUSPICIOUS SIGN.

(Woodstock Sentinel-Review)

Members of the Legislature have been complimenting the farmers. That's funny, and no election in sight.

THIS BACKWARD SPRING.

(Guelph Mercury)

It hurts like an itchy shirt to have to buy a ton of coal at this season of the year.

COSTLY.

(Pittsburg Gazette-Times)

Kid shoes may cost $10 a pair next season according to the manufacturers. Great Scott! What will they charge for grown-ups?

HIS LOVING FRIENDS.

(Ottawa Free Press)

No, it isn't true that Hon. Robert Rogers and Hon. J. D. Reid were only prevented from going to New York to greet Sir Sam by the most pressing engagements at home.

PROBABILITIES.

(Guelph Mercury)

Probabilities:
June—Dry.
July—Drier.
August—Driest.
September—Driestest.

TEUTONICUS ALIBITIS.

(Pittsburg Gazette-Times)

A Spanish scientist has found a form of insanity that results from the close confinement in a submarine and causes its victims to commit wild acts. That's the thing Germany has been looking for. It's called Teutonicus Alibitis.

EXPLAINED.

(Toronto Star)

The painstaking way in which President Wilson has pursued and secured all facts concerning the sinking of non-combatant vessels by the Germans during the past couple of years is most significant. He must be collecting material to write a book after he quits the Presidency.

PROMISES ON TAP.

(Toronto Star)

President Wilson has definitely made up his mind. He will insist on having a new promise from Germany. And he will get it. Berlin is as anxious for American friendship that a new promise will be shipped to Washington when ever one is wanted.

THE HUN AT LARGE.

(Buffalo Express.)

An Amsterdam paper says the story that Great Britain had sent an ultimatum to Holland emanated from the German legation. Evidently the same kind of propoganda work is being carried on in Holland that we have seen illustrated in this country.

SARCASTIC.

(New York Sun)

Berlin's assurance that no German undersea boat or other war craft could have attacked the Channel boat Sussex appears to have been conveyed to Ambassador Gerard with all the ceremonious solemnity so important a declaration of innocence required.

It will, Americans may be sure, exonerate Wilhelmstrasse of all responsibility in the premises; and in no uncertain fashion it indicates the authors of this tragedy.

If Germany did not torpedo the steamship, France or England must have; and it is plain that the Teutonic authorities will expect the United States to accept and act upon this theory without quibbling and without loss of time.

ROUGING THE REPORTS.

(New York Times)

The fact remains that a significant change has been noticeable for some months in the Berlin summaries of the campaign. For a year or more of the war Berlin told the truth, could afford to tell it. Notably since the beginning of the Verdun assault there have been suppressions, glossings, falsifications. A state of military things not so rosy as could be wished must be rouged for the benefit of the people at home. In the East the German propagandists have carried on a campaign of Pan-Munchausenism calculated for Oriental latitudes. That deceives nobody. German expectation from the East is dead. But if the sober scientific, exact German mind is monkeying with the facts in the West, the conclusion is evident.

IF BRITAIN "WENT DRY."

(The Independent, New York)

Their (the British) drink bill for last year was $909,790,000, and probably they are now spending a billion dollars a year on something which many people in the United States and England manage to get along without. The war has cost Great Britain about $7,500,000,000. If we subtract from this the loans to other countries, which will presumably be repaid, and the money spent on feeding the soldiers, who would have had to be fed and clothed anyhow, though not so well in time of peace, we should have left, using the estimate of Sir George Paish, a net loss to the country of about $2,500,000,000. If then, Great Britain should go dry, as Russia has, its total war losses could be paid up within the next three years, not allowing anything for the gain in industrial efficiency and the saving from the crime and impaired health which incidentally results from the consumption of a billion dollars' worth of liquor a year.

Old Grouch—It's no use whining to me; I can see through you. Beggar—So yer ought, mister, when I ain't had nothin' t' eat for a week.—Boston Transcript.

Chats With the Doctor

BY A PHYSICIAN

INFLUENCE OF MIND ON BODY.

During the past thirty years we have witnessed an extraordinary development under numerous names and forms, of a highly important and essential principle in the art of healing. This is the power of the mind in curing physical ills dependent on a morbid or perverted state of the nervous system. The results of judicious resort to this great force are often marvellous, what people would call miraculous. And it is well that they should be fully recognized and appreciated no less by the wise doctor than by the non-medical public, who often appeal to it in total ignorance of the underlying principle involved— and hence are apt to be led astray or even swindled by specious impostors of both sexes.

"Christian Science" is the most fashionable and popular form under which the healing influence of the mind is thus appealed to, and has more or less permanently secured the adhesion of a large section of the public both here and in America. Then we have "Faith Healing," "Nature Healing," "Higher Thought," "Psychopathy," "Hypnotic Suggestion" and I know not how many more. All utilize the principle, in many cases no doubt beneficially. All largely open the door to the mercenary impostor, whose sole object is gain, and who hesitates at no falsehood or deceit that will serve his purpose.

MENTAL IMPRESSIONS.

There can be no question that a powerful mental impression, however attained, has almost incredible effect (on susceptible individuals, not by any means on all) for good or for evil. Take first the latter. I suppose most people know more or less what "Tapu" —our "Taboo"—is among savages; a magical ceremony of punishment. Among the Maoris, says an observer, "Tapu is—an awful weapon. I have seen a strong young man die the same day he was tapued; the victims die under it as though their strength ran out as water. An Australian black, finding he had broken, by no fault of his own, a taboo of ceremonial cleanliness, took to his bed and died in a fortnight." (E. Tregear, "Journal of Anthropological Institute," XIX., 100.)

Then for healing benefits, every Christian Scientist will tell you of wonderful cures when the orthodox practitioner had failed. Miracles have been wrought in all ages of the world among people, who looked for them and had faith in the magician or healer who professed to work them. Thus they were performed not only by Divine personages, but by several of the Roman Emperors, notable Vespasian; and our own kings (in particular that pious monarch, Charles II.) used to touch for the "king's evil," otherwise scrofula—often, I doubt not, with perfect success. Was not the great Dr. Samuel Johnson one of these patients? To this day miracles are common enough, I believe, in Russia.

MENTAL CURE OF NERVOUS DISORDER.

I suppose the root of it all is that so many of our disorders are of nervous origin, and the lesson to be drawn is that the mind should be studied and kept in proper balance, just as we aim at doing with the body. We should always strive after cheerfulness, and eschew useless worry that can do no good. Thus only can we expect health.

Only we must recognize what these things really mean, and so avoid imposture. No amount of "Faith Healing" will pull out a tooth, or remove a tumour; although, in the latter instance, at least, you find plenty of otherwise sane people who solemnly tell you they know it has been done. The mental impression never serves to obliterate a gross and palpable lesion. It deals only with functional maladies by means of the nerves which regulate function, and you must not expect from it more.

Not seldom indeed a visit to the doctor particularly if he has a title, or is a "great specialist" in a capital town—is only a variety of "faith healing." The cure is due to what you have heard, or imagine you have heard, about this great man; to his outward grandeur and magnificence as shown by handsome house, liveried servants, and so forth not in the least to the physic he describes for you. Such is, and has been, human nature in all the ages of the world.

CUTS, ULCERS AND ABRASIONS.

The first thing you have to study, in healing any cut or wound, however inflicted, is to keep it clean; the second is to keep it dry. That is, I mean, in the first stage, when you want to secure quick union of the skin edges, and when the lesion has not become an open sore, slowly healing up by granulations.

Thus a piece of sticking plaster serves to glue cut edges together, and to prevent the access of dirt or dust. Then you procure healing within a very few days; even when the wound is lengthy, and has had to be sewn up.

It is best not to wash out a recent and perfectly clean wound; or to let water come in any way in contact with it. On the other hand, should the wound have been inflicted by a dirty instrument, have been fouled by anything, especially by soil, it is in the highest degree important to cleanse it thoroughly. Hot water containing a little tincture of iodine should be used in the strength of two teaspoonfuls to the pint. Under some circumstances, as with our soldiers in the trenches, it is well to use a camel's hair brush, and paint the wound thoroughly with the undiluted iodine tincture; disregarding the smart.

When the wound has not healed by "first intention," as doctors call it—i. e., when the cut edges have not adhered—and you have a granular ulcer to treat, then lotions must be resorted to. The best I know is made by adding 2 grains of calomel to a fluid ounce of lime water (liquid calcis.) This is the old-fashioned "Black Wash," before that was spoilt in the official British Pharmacopoeia by the addition of glycerine. It was originally used and recommended for only one kind of ulcer, but it is equally efficient for every granulating sore—including the common ulcerated leg.

You dress the ulcer twice a day with a piece of lint, cut exactly to its size, and soaked in this lotion. Over that you place a piece of guta-percha tissue a little larger, and keep on with a bandage or with plaster, according to locality. Discharge is to be carefully wiped off, and every precaution taken to secure cleanliness; but here again it is best never to wash the sore itself. To secure the "dryness" referred to, dust around with powdered borax, which absorbs the moisture of the skin.

For small surface abrasions which do not penetrate beneath the true skin, zinc ointment applied on lint twice daily forms the best dressing.

MIDDLE AGE IN WOMEN.

This generally arrives between the ages of 44 and 50, but no fixed rule applies all round. Almost always there are digestive and other troubles, of which the most universally complained of is the unpleasant, almost painful "flushings." These result from disturbed balance of the circulation; but the exciting cause nearly always depends on some error in diet.

At this trying period sufferers have to avoid constipation, and to strive after as quiet and regular a life as circumstances will permit. There should be no late hours or overheated rooms.

It is best to abstain entirely from alcoholic drinks, and to take tea not more than once a day. Oatmeal porridge for breakfast is specially wholesome. It is well, wherever possible, to lie down for an hour in the afternoon. Cheerfulness and tranquility of mind are essential.

If medicine, other than of an aperient nature, be required, a small teaspoonful of sal volatile may be taken twice daily in milk.

GATHERED FROM HERE AND THERE.

A caterpillar will eat twice its own weight in leaves every 24 hours.

A good grade of paper can now be commercially made from the hop refuse of breweries which has heretofore been thrown away.

Uncle Sam made $2,500,000 last year from the sale of wood from the Government forests.

Since the outbreak of the war 30,000 settlers from the United States have entered Canada.

Two per cent. of metallic sodium will harden lead so that it will ring when struck.

A novelty in dabbing brushes is one in which the bristles are so arranged that they may be pushed forward by means of plugs as they wear down, and thus the life of the brush is increased considerably.

A Swiss aviator rose to the height of 19,800 feet, overtopping the best previous ascent.

The United States produces 60 per cent. of the oil of the world.

The "trench knife" is a new weapon of warfare, with a blade of about 16 inches. It is used for fighting in the trenches where there is no room to swing a sword or bayonet.

In the U. S. electricity is a $3,000,000,000 industry.

The street lighting bills of the city of New York for 1915 will be $400,000 less than for 1914. A goodly portion of the saving is said to have been effected by the use of nitrogen-filled tungsten lamps in place of the arc lamps.

Upward of 300 children are being killed each year in the streets of New York and about 7,500 others injured.

London has 1,500 churches.

In time lost and medical attention, the wage-earners of the U. S. have an annual sick bill of $680,000,000.

While much has been done to improve the condition of the employed by factory inspection, yet the statement is made authoritatively that the real solution of the public health problem lies in the improvement of the home.

The total value of tires used in 1915 in the United States, including solid tires for trucks, tires for 'buses and taxicabs, amounts therefor to $250,000,000 in round numbers. To this sum should be added about 200,000 motorcycle tires, worth from $5 to $10 each.

To find a splinter under the finger-nail is often difficult. By placing the fleshy part of the finger against the lens of a pocket flashlight in a dark room, however, the splinter can be plainly seen through the nail almost as if it were under the X-ray.

The new rice crop pays California $70 an acre, or more than finest wheat land gives.

The public electrical stations of the U. S. represent a valuation of $400,000,000.

United States rice exportations quadrupled in a year.

A new German invention consists of a wedge-shaped cushion, the sides and bottom of which are smooth, is covered on top with a sheet of rubber sponge that absorbs the perspiration of the invalid and prevents bed sores.

Running Water.

Have you ever noticed, when the water has almost all run out of the bathtub, how the light particles on the surface seem then to race out much faster than the water? As a matter of fact, they are travelling faster than most of the water, but no faster than that on the surface.

The reason is not far to seek. Running water, even in a river, goes at different rates, but faster on the top surface right in the middle of the stream. Friction with the sides and bottom makes the water there go more slowly. So the light particles on top of the water in the bathtub, along with the surface water, rush ahead at a good rate.

This particular peculiarity in rivers is utilized by boatmen when they have to go up a swift stream; they always paddle up near the bank. And at curves, as the water swings outward, they take the inside bank, for there the water is almost still. On the other hand, in coming down the very centre of the stream is chosen.—St. Louis Republic.

"Circumstances alter cases," said the lawyer, gravely. "Yep," said the client. "But in my case it's the circumstances that I'm hiring you to alter."—Detroit Free Press.

Shakespeare

Shakespeare lovers generally and the many friends in Hamilton of Mr. Chas. H. Dutton, formerly of this city, but now a resident of Hartford, Conn., in particular, will be delighted with the following appreciation of the immortal Bard of Avon, from the pen of Mr. Dutton, well known during his residence here as a lover of good books, with an especial reverence for the works of the genius whose gifts to mankind he here extols:

For three hundred years the world has been consciously richer by the product of one fertile brain. And we do well to take advantage of the convenience of a rounded period of years to pay a tribute of praise to the wonderful producer. He praises most who receives most; for the very act of receiving is the highest praise we can offer. He poured forth his riches, a lavish gift, free and open-handed, and each may take just as much as he can carry —his ability to carry being increased every time he returns.

The position he holds to-day, by sheer merit, proves that Shakespeare was not of time. The combination of elements known as the man has long since passed. But the immortal part—the genius of the man—is with us more and more. Each generation discovers new virtues. His work is neither ancient nor modern; it is elemental, therefore of all time.

Neither was his work of place. We have searched nook and cranny of leafy Warwickshire with keen enjoyment, but it was not there we had our most intimate moments. In our inmost thoughts, in the hidden workings of our mind, we meet him at his nearest, and gain health and strength from the contact. There, all can enjoy his gift. There is no restriction of time or of place; no restriction of nationality; the temporal, the accidental, give way before so universal a giving. Whoever can may receive. "Thought is the property of him who can entertain it."

Many words of admiration have been written and will be written in these days of celebration; many words of constructive criticism and interpretation are being published, following out some of the innumerable ramifications of Shakespeare's genius. And good exercise it is and the present a good time. But here for a few short moments let us simply give him praise. Let us make an offering to his memory by naming before him some of his greatest admirers—a garland of great names. If these could admire—could not help admiring—does it not prove his worth? First, we call to mind his own public, the Elizabethan people, whom the revival of learning, and all the glorious events of the age, had awakened to an unusual intensity of life; they learned from him and admired. Then, champion of freedom, John Milton; what admiration to come from such a man! Pope and Johnson we remember of another age, an age of different ideals, but still admiring. Scott, Coleridge, and the great men of the so-called Gothic revival; Goethe, Schiller, Victor Hugo, Emerson, what magnificent company he gathers round him, all unanimous in one thing, in admiration of his wonderful genius.

On through the nineteenth century he holds his sway, and the greatest of their day are his admirers. And now in the twentieth, we cannot do too much to celebrate the fact that for three hundred years we have enjoyed his influence, shared with him his tears, and joined him in his great and wholesome laughter.

Then to our garland we can add the names of others, not leaders of thought as those we have already named, but great interpreters, men and women illumined by the light he carries. Garrick, Kemble, Kean, Mrs Siddons, Macready, Irving; their fame is his. And we think of many who are still with us, still reflecting his glory, who would deem no praise for themselves higher than that they reflect well. We call to mind also the names of artists, musicians, poets, all who have found inspiration in him to call forth their own, that the world might be doubly enriched.

What a garland of great names we could make for public celebration. But after all our loud rejoicing, let us, one by one, on this anniversary day each in his own way, quietly betake to himself, reach down a well-used volume, and enjoy and honor to the full, in the sacred privacy of his own mind, one, who, above all others, knew and discovered to us our little strengths and our great weaknesses, our loves, our sorrows, and our joys; whose nature was of the elements, unspoiled; whose limits we have not found; who needs no praise to show him great: "Who did the stars and sunbeams know, self-school'd, self-scann'd, self-honour'd, self-secure."

Use MILBURN'S LAXA-LIVER PILLS FOR A SLUGGISH LIVER.

When the liver becomes sluggish it is an indication that the bowels are not working properly, and if they do not move regularly many complications are liable to set in.

Constipation, sick headache, bilious headache, jaundice, heartburn, water brash, catarrh of the stomach, etc., all come from a disordered liver.

Milburn's Laxa-Liver Pills stimulate the sluggish liver, clean the coated tongue, sweeten the obnoxious breath, clean away all waste and poisonous matter from the system, and prevent as well as cure all complaints arising from a liver which has become inactive.

Mrs. John V. Tanton, Bernam, Ont., writes: "I take great pleasure in writing you concerning the great value I have received by using your Milburn's Laxa-Liver Pills for a sluggish liver. When my liver got bad, I would have severe headaches, but after using a couple of vials, I am not bothered with them any more."

Milburn's Laxa-Liver Pills are 25c a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

THE POULTRY WORLD

WHITE DIARRHOEA.

With a disease so weakening and so fatal in its effects as white diarrhoea, every precaution should be taken to protect a flock against its ravages. It affects eggs, young chicks and mature fowls. Evidently there can be no real protection unless every possible avenue of infection is checked. Yards, roosting places and scratching pens should be kept as sanitary as possible as a preliminary precaution, but the main efforts of the poultry keeper should centre around the protection of the flocks as the primary source of contagion.

The best protection against white diarrhoea is to breed only from sound stock. Violation of this principle has frequently brought financial ruin to producers of eggs for incubation. For the complete eradication of this disease from poultry farms, stock which give evidence of weakness or the least signs of the disease should not be used for breeding purposes.

The average poultry keeper may not be able to determine whether all his fowls are free from white diarrhoea or not. Nevertheless, it is a safe course to select for the production of hatching eggs only the healthiest and most vigorous hens.

As a mere matter of successful incubation and for maintaining the vigor of the resulting chicks, this is the key to the whole situation in the control of white diarrhoea. For the prevention or elimination of this disease eggs used for incubation must be produced from sound, uninfected stock. This means more careful selection of breeding hens. If this precaution is not taken white diarrhoea may become so firmly established in the flock and its surroundings as to render all future efforts to control the disease of little or no avail.

Every precaution should also be taken to protect breeding stock from infection. They should be kept in clean houses and yards; they should receive wholesome food and the best of care and management. By no means should they be permitted to come in contact with infected chicks.

Unless one is absolutely certain as to the condition of the hens used for the production of hatching eggs the latter should be disinfected before they are incubated. There are two effective means of disinfecting eggs.

1. Strong methylated spirit can be used for rapidly wiping the eggs. They should be carefully and quickly dried after this treatment before being put in the incubator or under a hen.

2. The eggs may be dipped in a weak solution of creolin and water. They may be placed in the incubator immediately after being dipped.

Both of these methods have proved effective and neither form of treatment apparently injures the hatchability of the eggs. Where an incubator is used, the precaution should be taken to disinfect the inside of the machine every time it is used and before the eggs are placed therein.

The feeding of sour milk to chicks appears to be an easy means of controlling white diarrhoea. The purpose of sour milk is to suppress intestinal putrefaction which the parasite of this disease sets up. Milk contains a quantity of sugar which is acted upon by certain fermentation organisms. These bacteria counteract the parasite of white diarrhoea. The feeding of sour milk is an important agent in lessening the dangers of great losses from this disease.

On account of the ravages of white diarrhoea, especially during the first few days of the life of baby chicks, it is important to begin feeding sour milk early where the presence of this disease is suspected. Moreover, sour milk should be continually kept before the chicks until the dangerous period of the disease has passed.

A poultry expert in Great Britain has used catechu to prevent white diarrhoea. Ten to fifteen grains of crude catechu were dissolved in one gallon of water. This was given to the chicks as drinking water. They drank it greedily and made rapid improvement in health. The treatment is given usually for ten days. If these precautions are taken by poultry keepers, there is little reason to dread the ravages of white diarrhoea.

HATS MOUNTED ON DIZZY HEIGHTS

The extreme height of many of the small spring hats is a distinctive feature. The hat illustrated is a smart creation in green rough straw. A dashing wing effect of rose velvet surmounts the crown, and large crushed roses are placed at intervals.

FARMER VINCENT'S WISE SAYINGS.

Swapping eggs does not accomplish much unless you know what you are getting.

It is my honest opinion, with twenty-five years to back it, that when any man tells me he can pick out eggs that will hatch out pullets, just by the looks of them, he wants me to think he is a good deal smarter than he is. I can guess as well as he can, and not a bit better.

Don't think because it is a machine that an incubator will run itself. It is pretty particular business to attend to an incubator so that it will do good work.

If you hustle you can even yet build a good fireproof house for the hatching business. Then you can go to sleep and not fear that the incubator may set the house afire before morning.

Success with poultry lies at the end of years of hard work, thought, reading and experience.

No one is better situated than the everyday farmer to work out improvements in poultry stock, and yet the average farmer is just the one who has done least of this work.

Don't brag much about what you are doing this year. Next year's experience may knock it all on the head.

When we pick out eggs from hens that have a good laying record we take a big step ahead. That is the way we want to go, too.

Green food increases the probability of fertility in the eggs a hen lays.

Pluck is a more staple article than luck.

A man with shiftless habits never has record-breaking hens.

Good poultry raisers are not necessarily good marketers. It will pay to study the markets.

Fish in Former Times.

Men of former ages, unless they lived near the sea or a river, had great difficulties in gratifying their taste for fish. The great houses had their fish ponds or stews, but sea fish, such as cod, beam, sturgeon, herring and sprats, were salted, and the excessive consumption of highly salted fish in the middle ages is said to have produced leprosy. Fish was also baked in pies to enable it to be carried for great distances.

Witches and Fairies.

Belief in witchcraft, still an article of the popular creed in Essex and may be elsewhere in England, is not the only survival of the kind. In the south of Ireland are still to be found people who believe in fairies. The writer knew an Irishwoman, one of thousands of her class, who would not travel a country road after dark for fear of them, though what they would do deponent sayeth not.—Pall Mall Gazette.

OUR HARD TASK.

(Buffalo Express)

Remembering that the whole population of the Dominion is only 8,000,000, how can the prophecy of the enthusiasts, that Canada will send 500,000 men to the front, be realized without serious crippling the life of the country? How can one person in every sixteen be sent to war when from the fifteen have to be deducted the women, children and old men, as well as enough able-bodied men to run the shops and farms?

Had Dyspepsia.

Says: HE NEARLY TURNED UP HIS TOES.

Burdock Blood Bitters CURED HIM.

Mr. H. N. Manderson, Stettler, Alta., writes: "About twenty-five years ago, in the Province of Quebec, I came pretty near turning up my toes with dyspepsia. A cousin of mine persuaded me to try Burdock Blood Bitters. In about two weeks I could eat anything from raw fat pork to unleavened bread. Three bottles did the job, and I have never been troubled with my stomach since. You would say that this is wonderful if you could only see what we sometimes have to live on in this country; bannock, half cooked beans, etc."

Burdock Blood Bitters has been on the market for the past forty years, and cannot be excelled as a medicine for all diseases or disorders of the stomach.

Behind The Bolted Door?

YOU will find a gripping detective story in the May number of MACLEAN'S MAGAZINE—"Behind the Bolted Door"—by Arthur E. McFarlane. Full of mystery, tense with interest, alive with action, passing strange in plot and incident, it is baffling until the last paragraph of the last chapter.

This McFarlane story is but one of many "specials" in the May MACLEAN'S—an issue really remarkable for its high quality, as witness the following writers. These contributors are, as you will recognize, a most exceptional company—the best known of Canadian writers.

Arthur E. McFarlane
Stephen Leacock
Nellie L. McClung
Robert W. Service
Agnes C. Laut

EDITORIALS BY:
Sir Herbert Ames
N. W. Rowell
C. C. James
James L. Hughes
J. P. Downey

And next issue (June), the first of ARTHUR STRINGER'S new serial story, "The Anatomy of Love."

MACLEAN'S MAGAZINE has one feature which commends it to all readers—its Review of Reviews department. Here is reprinted the heart of the best things appearing in the leading magazines and periodicals of the world. So in MACLEAN'S one gets the essence of many magazines.

Rich promise in this May Number of many hours of genuine entertainment and profitable reading. A big 15 cents' worth—more than you find in a $1.50 work of fiction. For the price of a new novel, you can have twelve numbers of MACLEAN'S.

MACLEAN'S MAGAZINE is Canada's best periodical publication. It is out-and-out Canadian and is doing a fine work for the encouragement of Canadian literature and writers. As a good Canadian, you should be a yearly subscriber.

Begin your Subscription with the May Issue, $1.50

Just write your name and address on this advertisement, and mail to the publishers—The MacLean Publishing Co. Ltd., 143 University Ave., Toronto. Bill for $1.50 will be sent later. Enclose remittance if you prefer.

Pte. Ed. G. Eidt Tells of the 71st. Batt's Trip to England and Gives Some Interesting First Impressions of the "Tight Little Isle" — Short Letter from Will Hanley—Jos. W. Fritz Writes of Conditions in Canadian West.

WITH THE 71ST.

Pte. Ed. G. Eidt writes an interesting account of the 71st Batt's. trip to England in a letter to his mother, which we are privileged to publish.

Bramshott Camp,
Liphook, Hants,
England.
April 12th, 1916.

Dear Mother:—

We all arrived safely in camp this morning at 4 o'clock. I suppose you have been worrying at not hearing from me for so long. The journey just took two weeks to the day, so it will be a month since we left before you receive this letter.

We arrived in Halifax about Saturday noon. We all had a fine trip through the Maratime Provinces, but were glad to leave the train after such a long journey. We spent that night in barracks in Halifax, and went aboard the White Star Liner Olympic the next afternoon. The Olympic is a sister ship of the Titanic and is the second largest vessel afloat. Four battalions, 69th of eastern Ontario, 61st of Winnipeg, 67th of Vancouver and the west, and also nurses and several other corps from Toronto, making in all about 6,500 soldiers, besides 800 of the crew. Things were rather crowded, but we had the best of weather and on the whole had a very good voyage. We started from Halifax Wednesday afternoon after lying at anchor in the harbor for two days and on Monday afternoon, April 18th, we sighted the south coast of the Emerald Isle. We travelled along the Irish coast for a while, and although the weather was hazy that day we could plainly see the winding roads and green fields up among the hills. It was a contrast to the snow of Canada. We crossed the Irish Sea in the night and in the morning sighted the coast of England. The Olympic dropped her anchor in the harbor of Liverpool, in the Mersey River at 8.30 a. m. and docked about 11 o'clock. The troops landed in the afternoon and were marched right to the trains. The 71st were all aboard their trains about 5.30 and started for Bramshott, away in the south of England (near Shorncliffe.) The trains are very small—like toy trains beside the trains in Canada. The coaches are divided into compartments, four to a coach, about eight of us travelling in each compartment. We saw a little of England before it got dark; after that all blinds were kept down. We passed a station about every ten minutes—some are only a mile apart. The cities seem very crowded with very narrow streets and thousands of houses like tenement buildings. The country is very pretty. It is a land of green fields and hedges, with here and there a little spot of woods. We passed through Birmingham on our way. We arrived at the station of Liphook about 3.30 a. m. and had a two-mile march in the dark with full equipment out to camp.

We are quartered in what they call huts, shanties about 100 feet long with board floors, one platoon in each hut. They are quite comfortable and we have things handy, the "Y" a short distance away and a big canteen. There are hundreds of huts just like ours so there must be a good many thousand soldiers here.

The city of London is 48 miles from here and I will likely go up and see at least part of it when I get leave. Soldiers travel at the rate of a cent a mile return on all English railroads.

We are having quite a time getting acquainted with the English money. We lose four cents on every dollar in changing from Canadian to English.

Well I must close. I will try and get a picture of the Olympic and send it to you in my next letter. She carried the largest lot of troops this trip that every left Canada. We were escorted by two torpedo-boat destroyers who met us about half a day out from the Irish coast, and left us just outside the harbor of Liverpool. There are over ten miles of floating docks at Liverpool and the harbor seems nothing but a mass of spars and masts of vessels.

Good-bye for now,
Ed.

Four Days Later

Bramshott Camp,
Sunday, April 16th,

Dear Mother:—

It is raining hard today, in fact it has rained every day since we came here. It is very unlike Canada in this respect. If a black cloud appears in the sky there's sure to be a shower, whereas at home a cloud more often passes over. It is very cold at night and in the early morning here, a prospect we didn't expect for this time of the year in England. But we have plenty of warm blankets now and we sleep quite comfortably at nights. The mud dries up very quickly after rain, however, and the sand and dust whirls everywhere, and sometimes we come in from parade as black as coal stokers. But in all, we are contented with conditions here, as we have everything handy and get pretty good grub.

Things begin to look a little more like real the thing now. We hear the boom of the big guns of the batteries at practice and often see long supply and ammunition columns on the move across country, and once in a while an aeroplane passes over the camp. We attended church parade this morning. We all marched up the road in the usual column of route, headed by our brass and bugle bands to a big field or commons about half a mile from camp where service was held. Six or seven battalions were on the field and the hymns were played by one of the bands.

Some of the 34th men are still here, among whom are Capt. Martyn, Ab. Earwaker, Billie Winters and some other members of the staff. Their band is still here. Joe Wallace was in seeing the boys but I was out at the time so missed seeing him. Haven't seen any of them yet, but am going down to their quarters this afternoon or tomorrow. They expect to leave for Shorncliffe in a few days. The 34th is all broken up, and the boys are scattered all over. The 74th and 75th battalions of Toronto are stationed right next us. George Porter, Jimmie Small and Teddy Kidd are in the 75th.

The country around here is very pretty although the scenes are very different to anything we have seen in our own land. There are lots of trees, mostly elm, and other kinds, in fact more shade than in Walkerton. A couple of us took a walk down through the woods last night and saw several pheasants, which of course are protected game. They are very tame and we approached within a couple of yards of them. The English woods are very well kept and are as soft as carpet underfoot from moss are so much rain. The roads are well-kept too and are made of stone. They wind in and out everywhere, with all kinds of bypaths and roads running into the woods, so that it is very easy to follow the wrong road here. There are several little villages back in the woods—Bramshott, Grayshott, Aldershott and Liphook Station.

We are to have six days' leave beginning with Tuesday and we can go anywhere we like, so we're all going out to see a little of England. Some are going to Scotland and some to Ireland too. I am going up to London and Shorncliffe with some of the boys. We'll likely see Bob Turner and the rest of the Walkerton boys at Shorncliffe. After our leave we'll all have to knuckle down to hard drill for a few months, until we're ready for the next step toward the firing line.

Am in the best of health as are all the Walkerton boys.

Ed.

+ + +

FROM LANCE CORP. HANLEY

Mrs. Timothy Hanley of Chepstow had the following word from Lance-Corporal Will Hanley, "Somewhere in France":—Myself and the rest of the Battalion are enjoying good health and are keeping ourselves well cheered with the amusements we have back of the firing line. The mud has all disappeared and the weather is very fine. The roads are beginning to bother a little from dust. The bombardments still grow in intensity along the greater portion of the line. I received your card written on St. Patrick's Day in Toronto. Best wishes to all and that you will enjoy a happy Easter.

LETTER FROM JOS. FRITZ

Shaunavon, Sask.,
Apr. 23rd, 1916.

Editor Telescope,
Walkerton, Ont.

Dear Friend:—

Just a few lines to let you all know that I am well, hoping that these few lines will find you all the same. The weather is very raw and windy this spring, and very poor growing weather. Farmers started seeding about the 13th, mostly all the Summer fallow and breaking is seeded. The farmers are busy burning stubble at present, but it is poor weather for that purpose as there is a white frost nearly every night. We had a very rough and cold winter in this Country from Christmas till about the 10th of February, then it broke and got very mild for some time, but the winter was not all over. We had a cold spell after that again and it seems as if the winter was not all over yet, as we have a snow skift once in a while. We only had one decent shower of of rain this Spring. I am not very well acquainin here as yet, so I cannot give you very many names of Bruce County people. I may send you a list of some of them later on. The snow is almost all gone around here, except in some Coolie or hillside, where it is laid about eight to twelve feet deep. I was talking to a traveller this week, and he says that in all his travels through this Western country this is the best he has seen for Spring weather. He claims that in the surrounding Countries there's lots of snow, and a poor lookout for seeding. How are the Bruce County farmers getting along with their seeding? I suppose they have a backward Spring too. I am surprised to see so many men of Bruce County join the Army. What will all the girls do after the boys are all gone to the War? Of course, I am here, but don't amount to much, ha, ha.

Yours very truly,
Jos. W. Fritz.

CANADA'S CALL
FOR SERVICE AT HOME

Produce More and Save More The Empire needs food. If you are not in the fighting line you may be in the producing line. Labour is limited—all the more reason to do more than ever before. Grow food for the men who are fighting for you. The Allies need all the food that you can produce. Every little helps. You are responsible for your own work. If you cannot produce as much as you would like, produce all you can. Work with the right spirit. Put fighting energy into your effort and produce now when it counts. The more you produce the more you can save. Producing and saving are war-service.

Make Your Labour Efficient In war-time do not waste time and energy on unimportant and unprofitable work. Economize labour. Put off unproductive work till after the war, and, if possible, help in producing something needed now. Let us not waste labour. Canada needs it all. If possible help to feed the Allies. Make your backyard a productive garden. Cultivate it with a will. Make your labour count for as much as possible.

Do Not Waste Materials There should be no waste in war-time. Canada could pay the annual interest on her war expenditure out of what we waste on our farms, in our factories, in our homes. Every pound of food saved from waste is as good as a pound of increased production. The way for a nation to save is for every individual to save. France is strong to-day because of thrift in time of peace. The men and women of Great Britain are not only "doing" but are learning to "do without."

Spend Your Money Wisely Practise economy in the home by eliminating luxuries. Wasting our dollars here weakens our strength at the Front. Your savings will help Canada to finance the war. Save your money for the next Dominion War issue. There can be no better investment.

. . Your . .
Office Stationery

BUSINESS Stationery should reveal the spirit of the business for which it is used. An appropriate letter head for a profession would be inappropriate for a mercantile house.

The typographical appearance of a letter head for a doctor should be small, neat, dignified—almost feminine; for a blacksmith, black, rugged, plain; for a vaudeville performer, loud, showy, big; for a bank, rich, dignified, restrained; for a store, neat, practical, harmonious, and so on.

Correspondence paper should not reflect poor judgment. Everything counts in these days of sharp competition.

POETS' CORNER

I REMEMBER, I REMEMBER

(From the London Express, with apologies to Thomas Hood.)

I remember, I remember,
The days before the war,
When without thought I calmly bought
The things I hankered for,
I spent no end on books and flowers,
And tickets for the play.
But now I'm really glad the war
Has borne that power away.

I remember, I remember
The clothes I used to buy,
And if so be they pleased my taste,
The price escaped my eye.
But now I look at every coin
Before I let it go,
And, with my betters, scrape and screw,
And like it ever so.

I remember, I remember
The smoothly running car,
That made me feel extremely grand
And sped me near and far.
But now through mud I stride serene,
My string-bag gripped secure;
I spread my bread with margarine,
And swank because I'm poor.

—Jessie Pope.

THE BUGLES OF ENGLAND

The Bugles of England
Were blowing over the sea—
As they had called a thousand years,
Calling now to me.
They woke me from my dreaming
At the dawning of the day.
The Bugles of England,
And how could I stay?

The Bugles of England
Unfurled across the sea,
Floating out upon the winds
Were beckoning to me.
Storm-rent and battle-torn,
Smoke-stained and gray,
The Banners of England,
And how could I stay?

Oh! England I heard the cry
Of those who died for thee,
Sounding like an organ voice
Across the wintry sea.
They lived and died for England
And gladly went their way—
England! Oh! England!
How could I stay?

News About Town

Mr. Thos. Dixon left on a short visit to Edmonton.

Lieut. Roy Whitehead is taking his Captain's course at London.

Lieut. Oliver left on Monday to take his qualifying course at London.

Quarterly meeting will be held at the Methodist Church next Sunday.

Lieut. H. Henderson returned this week from London where he took his qualifying course.

Mrs. Monroe and child of Thorold are visiting Mrs. Monroe's mother, Mrs. Thos. Gibson.

Mr. Henry Clark came up from Galt this week and is spending a few days with old friends in town.

Miss Grace Chalmers, teacher of Dundalk, spent the week-end with her friend, Miss Donalda McKechnie.

The Baptist Sunday School will meet at 9.30 a. m. during the summer months, commencing next Sunday.

Mrs. Alph Stevens, Emlette and Lorne, visited the former's brother, Mr. Hugh Traynor, South Line, recently.

Miss Annie Sillers and Messrs. T. G. Lamb and Albert J. Mielhausen of Walkerton have secured the degree of Bachelor of Arts at Queens University.

At an adjourned meeting of the Bowling Club held on Friday night, Mr. R. M. Player was elected President, and Mr. Ed. McConnell, Vice-president.

Mrs. (chief) Ferguson went to Palmerston on Saturday to see her son, Pte. Will Ferguson, who underwent a serious operation last week. He is making good progress.

Mr. Hugh Montgomery of Greenock underwent an operation on his neck at the County Hospital on Wednesday morning. The operation was performed by Dr. Hall.

Use Rexall Orderlies for Chronic Constipation; they are gentle in action, mild and natural. Sold only by Rexall Drug Stores, 15c and 25c boxes. A. P. Sieveright.

Mr. Arthur Ellis, an Old Walkerton boy, was a visitor in town Friday. He is a member of the firm of Lowrey and Ellis, publishers of the Petrolia Advertiser.

The Baptist Congregation enjoyed two splendid discourses on Sunday by Rev. Amos Tovell of Guelph, Children's Aid Agent for Wellington County.

If your hair seems lifeless try the Rexall "93" Hair Tonic; all Rexall Drug Stores sell it under an absolute money-back guarantee—50c and $1.00 bottles. A. P. Sieveright.

Pte. Harry Lesage of the 160th was in a bad way on Saturday. It appears that some of his young lady friends showed a marked coolness when passing him on the street. The cause of the trouble was located when it was found that by an unfortunate error, Harry was listed in the 160th Roll of Honor as a married man. It is hoped that this item will clear the air for Harry.

PUBLIC SCHOOL REPORT

Standing of the Pupils in the Various Forms for the Month of May.

GRADE VII

Entrance Test. Total mark 900, Honours 675, Pass 540.

Honours—S. Bremner 765, N. Shaw and J. Norrish 699.

Pass—I. Moore 612, H. Reichenbach 607, L. Bryce 606, A. Kerry 601, C. McKay 591.

Below Pass or failed on a subject (An asterisk denotes failure in one subject)—*C. Attwood 577, *J. Kenny 574, *L. Wallace 566, *G. Van Horne 560, N. McCarter, 526, T. Crawford 491.

Jr. IV—Honours—M. Hylker, G. Miller, M. Royce (equal). Pass—W. George, F. Wilton, V. Selling, G. Thompson, A. Everett, J. Rennie.

M. Willoughby,
Principal.

GRADE VI

Seniors—Honours—Edward Miller, Bruce Hunter, Milton McGregor, (Mabel Godwin, Minnie Petteplace, Claude Johnston) John Emmel. Pass—Albert Reichenbach, Frank Fruin, Elda Searle, Keyworth Sutton, Vera Anderson, John Dietsche.

Juniors—Honours—Muriel Lumley. Pass—Helen Wilson, Francis Crawford, Dora White, Allan Schaow, Elmer Kolpin, Marguerite Johnston, Tom Etherton, Edward Fennell, Edwin Faust.

J. Stead.

GRADE V

Sen. Hon—Alma Searle, Emma Schaus, Mary Perdue. Pass—Earle Forsythe, Frances Nutting, Pearl Riehl, Jack Knepfler, Eric Ramsay, Madaleen Hyslop, Doris Van Horne Dorothy Truax, Gladys Sutton.

Jun.—Pass—Charlie Gordon, Guy Ramsey, Marie Schwindt, Clifford Yates, Millard White.

M. Rose.

GRADE IV

Honours—Ila Moore, Franklin Bosh, Verna Anderson, Jean Lowe, Waldon Forsythe, Adeline Firstbrook.

Pass—Ethel Riley, Jack McConnell, Dorothea Crawford, Wesley Kain, Audrey McNeill, Delbert Anderson, Earl Pletsch, Norman Truax, Harry Myles, Jack Van Horne, Doris Polley, Willie Goode, Wallace Jerome, Clara Buehlow.

M. Sinclair.

GRADE III

Jun. Second—Honours—H. Paull, N. Fortune, W. Munt, O. Dietsche, R. Hampson, A. Taggart, G. George, E Singer, F. Johnston. Pass—W. Hehn, E. Webber, M. Dietz, D. George, G. Mawbinney.

Sen. First—Honours—N. Forsythe, C. Pletsch. Pass—B. Orner, A. Buehlow, I. Schmidt, (G. Gordon, L. Mortimer) J. Griffin, E. Truax, J. Nutting, O. Paull.

Agnes Warren.

GRADE II

First Book—Honours—Orlando Fisk, Keith Perdue, Bruce Smith. Pass—Joe Webber, Herbert Moore, James Hiscox, Stewart Fennell.

Primer—Honours—Ruth Hunter, Fred Miller, Emil Dietsche, Archie Reichenbach, Thelma McEwen, Herbert George. Pass—Lomax Player, Margaret Shaw, Sheldon Anderson.

W. Thompson.

GRADE I

Sr. Pr.—Margaret Jones, Elizabeth Taylor, Dorothy Lancaster, Sheila Taylor, Mabel Faust, Jean George, Gladys Hilker, Jack Hiscox, Willie Klempp, Maud Hunt, Frank Hartman.

Mid. Pr.—Kenneth Dowling, Walter Monk, Howard Johnston, Willie Fennell, Clarence Buehlow, Ivan Baulk.

Jr. Pr.—Arthur Whitehead, Gwendoline Hilker, Helen Royce, Jack McDougall, Edith Long, Florence McCarter, Jean Walker, Peter Van Horne, Ernest Nutting, Milton Ramsey, Percy Nutting, Ruth Pye, Gilda Bowlby.

A. D. Thompson.

ETIQUETTE FOR SOLDIERS

Hints on etiquette are commonly rather useless. They tell you not to do things which only a frank barbarian would do. They omit very often to tell you the very points where uninstructed good breeding does not suffice.

Military etiquette, like social etiquette, is broadly based on common-sense, but here also there is a variety of details which might not seem quite obvious to newcomers. As a vast number of young men, total strangers to the military tradition, now have the King's commission, it may not be useless to point out a few of the betises and solecisms which they should avoid.

Take the matter, for example, of an officer's conduct to women. Lord Kitchener's advice, to be "courteous and not more than courteous," is not in question; we are simply dealing with the ordinary meetings of the street, the railway station, or the park. An officer should never take off his cap in greeting. He salutes. The woman, on her side, should address him by the title of his rank if he is a captain or anything above a captain. But she must not call a lieutenant anything but "Mr." and should address him by letter as "Esq." Nobody ever uses the title "lieutenant" in the army, though it is perfectly correct in the senior service, and usually the word "subaltern" is used when speaking of an officer below that of captain. It is terrible for a subaltern to label his luggage as that of Lieutenant so-and-so. An exception, however, may be made in regard to a uniform case, which, of course, bears details as to his regiment.

On no account should an officer be seen in public arm-in-arm with a woman. It is a high misdemeanour—a terrible letting-down of that most sacred thing, the King's uniform. This warning ought not to be necessary, but one actually does see a good many young subalterns some with one, and some with two, girls on their arms. Privates and non-commissioned officers are allowed a good deal of latitude in our army, which, in this respect, is a contrast to the French. The French government strictly forbids any soldier in uniform to walk about arm-in-arm with a girl. But then, in France uniform of any sort is worshipped with a fervour unknown here.

The British army traditions as to uniform are, however, very stringent on many points. In uniform, every officer, non-commissioned officer, and private is supposed to carry a light cane of regulation pattern. The pattern is not absolutely insisted upon, but a fancy cane, anything of the dog's-head kind, is anathema. Yet this point is often ignored by young soldiers, some of whom may even be seen with a hunting crop, lash and all, which, to a military eye, gives an indescribably rakish, lose, and unmilitary effect. Further, no officer in uniform should be seen walking with his hands in his pockets, as so many newly joined subalterns are.

A pipe must not be smoked, in public, at any rate, while in uniform. A cigarette is admissible. Of course, in present conditions, when men are always in uniform, it is no crime against etiquette to enjoy a pipe in semi-private circumstances, but it should be strictly avoided in the street.

There is a tendency with the "temporary second lieutenant" to look on uniform with a certain levity. He is apt to regard extreme punctiliousness as "rot," and, perhaps, in his anxiety to avoid the Scylla of "side," gets involved in the Charybdis of carelessness. The truth is that it is not finicking vanity that lies behind the soldierly conception of perfect neatness. The dignity of the King's uniform is so solemn a thing that every man is expected to look his very best, and the first duty of a soldier is to be clean, smart, and free from any suspicion either of slovenliness or cheap dandyism. Thus, on no account should fancy socks be worn with uniform. The ex-"nuts" in khaki, who go in for decorated ankles, are committing the unpardonable sin, and exposing themselves to the gentle displeasure of officers of older standing.

Saluting is a pitfall to the unwary. A private's salute should always be returned, or, for that matter, any salute. Carelessness on this point on the part of a newly joined subaltern gives rise to a good deal of feeling. If a soldier salutes a group of officers it is customary for the senior officer alone to return the salute. In the new conditions it very often happens that two young men who have been at school together, or have been close neighbours find themselves, the one in a lieutenant's uniform, and the other in the ranks. In these circumstances a good deal of the strictness of the days when the gentleman ranker was a rare exception has been put on one side. There was a time when "an officer and a gentleman" would be liable to disciplinary measures if seen foregathering with a private soldier. Now it is a common thing for an officer and a private soldier to be seen in a tea shop together. Still, there are some formalities that cannot be omitted. The private must always first salute. He must not run up to his chum, and shake hands, and say, "How are you, old fellow?" It cannot be too often repeated that it is the uniform and not the individual, to whom the salute is given.

There are a good many other small points, but those dealt with here are suggestive enough to cover a great deal of minor detail. There are larger questions, of course, but they come under the heading of ordinary good breeding. A gentleman, whether new to the army or not, will recognize that loudness of any kind, "showing off," conspicuous behaviour in a public place, and so forth, is bad form for anybody, and doubly bad form for him who has the high honour of wearing the King's uniform.

The Home Washer

The easiest running of all washers is on exhibition at our store. Call and see it. Its speed balance wheel and steel ball-bearings make it so easy to run that any child can operate it.

THE FRASER STUDIO

"I Am Afraid to Quit Advertising!"

ADVERTISING is not only the greatest business of the present day—it is an absolute necessity for twentieth-century business, declared Hugh Chalmers, head of the automobile company which bears his name, in a recent address before members of the Los Angeles Advertising Club and several hundred business men of that city. "I advertise because I have to—not because I want to. Advertising increases my sales in such a fashion that I simply cannot afford to be without it. The only man who can't advertise is the one who has so much business he can't handle it, or the man who has so little business it isn't worth his while. None of us are in the first class, and none of us will admit that we are in the second. I once asked Gerhard Mennen if he believed his advertising was successful—if he thought it was worth doing. He was then spending $850,000 a year. He told me he didn't know whether his advertising was successful or not. 'I will tell you how it is, Mr. Chalmers,' he said. I was running a retail drug store and an advertising man came and said if I would advertise in the town papers I would do more business, and I advertised and I did more business; and they came to me and said if I would advertise all over the State I could get business all over the State, and I advertised and I got the business; and they told me to branch out into New York State and Pennsylvania and I would get more business, and I did, and they were right; and I have gone on from year to year doing more advertising and getting more business, and I will tell you the truth—I am afraid to quit!'"

CROSS PURPOSES

"I—I was thinking." And Frank fairly stammered over this brilliant reply.

"So deeply that it was a shame to interrupt you."

"No, no, not at all. In fact, I was thinking—I was afraid you would find this place very stupid—I was wondering what we could do that you would like."

"You were thinking about that?" Mrs. Austin, who had thought Frank very boyish and sulky at dinner, looked up at him now with sudden interest. She was surprised and a little touched, for there was no mistaking Frank's sincerity. "But, Mr. Leicester," she said, "there is no occasion for this terrible anxiety. I assure you I'm not a difficult person to amuse. What made you think I was?"

"No; I didn't think it," said Frank. "But if there is nothing at all, how—then?"

"Come, it isn't so bad as that. There must be soft walks, for instance."

"Oh, well, yes, there are some walks," Frank admitted, rather grudgingly. "I didn't know whether you would care for walks."

"Yes, in moderation. Not what you call walking, I dare say. And drives?"

"Yes," he said; "you can drive as much as ever you like; only I don't exactly know what there is to drive to."

"You are not encouraging," said Mrs. Austin, with a little laugh.

"There is a ruin," said Frank. "Tiny and I were thinking that perhaps you would like to go to-morrow afternoon, if it is fine. But it is nothing of a place," he continued, fixing his brown eyes despondently on the floor, as if he saw the whole thing in the compass of an Indian rug.

"Ruined too much, or not ruined enough?" she inquired.

"Oh, ruined quite enough—too much if anything."

"I like a neglected ruin; I hate restorations. I am sure I shall like to see this one," said Mrs. Austin, graciously. "And what is this building, or, rather, what was it?"

"Well," Frank replied, "it's a bit of a little tower—Culverdale Castle some people call it." (He had invariably called it so himself till that evening.) "Perhaps," he added, with a fine irony, for he was growing more fluent, "it might have been the fashion to have your castles small when this one was built; or perhaps it wasn't quite full grown when it began to fall to pieces—I don't know. But Culverdale Castle—O Lord!" Frank's tone as he spoke of his little ruin conveyed contemptuous disgust, as if it were no more than a decayed tooth.

Mrs. Austin slowly turned a ring on her finger. "I don't know that I'm so very particular about the size of the ruins," she said; "some people are, I believe. I remember going once to see the remains of a Roman villa with some friends. I think they expected to find it standing up with a knocker on the door, and they were very much disappointed; in fact, they said it was a swindle. I won't say your ruin is a swindle, Mr. Leicester, especially after all your warnings."

"You may if you like," said Frank, gloomily. "I think myself a thing ought to be a decent size. What did you say just now—that you didn't like 'em restored?"

"No, I don't. Why? Has this been restored?"

He shook his head. "It's all right then. I only thought that if you would have liked a little more of it, I might have gone over to-morrow with a hod of mortar and a barrow-load of stones and done it up for you. Only then you couldn't have driven there till Saturday."

"Thank you," said Mrs. Austin, smiling; "I think I would rather go to-morrow, and see it as it is."

"Well, only you won't expect anything, will you?"

"No, I won't. Do you always depreciate Culverdale and everything belonging to it in this fashion?"

The point-blank question, asked in the quietest of tones, was not easy to answer. "I don't know; not particularly," said the disingenuous young man. "It does well enough for me, you know."

"I suspect it would do well [illegible] them [illegible]" [illegible] said Mrs. Austin, replied. "That was rather a pretty road I came by from the station this afternoon—you shall not run everything down so unmercifully." Frank colored with pleasure to hear her defending Culverdale. He felt as if she were taking his part against himself. "And, by the way," she went on, "there is one thing I want to see which you do not propose to show me, apparently."

Frank emerged from the depth of his despair. "What is that—tell me?"

"Why," said Mrs. Austin, "I want you to show me over your house. I am sure you have all manner of delightful old things stored away here. I caught sight of a lovely old cupboard at the top of the stairs, as I came down, which looked as if it ought to be a perfect mine of wealth."

"What sort of old things?" Frank inquired, anxiously. "Old china, do you mean, and pictures, and old work—do you care for them?"

"Why, yes; don't we all care for them nowadays?" said Mrs. Austin, with something which, though hardly so much as a smile, was like soft sunshine while she spoke. "I'm not conspicuously behind the age, Mr. Leicester—I'm very like other people."

"That I don't believe," muttered Frank, under his breath. It was doubtful whether his companion caught the words or not. Her eyes rested on him with a faintly inquiring expression, and he went on hurriedly. "Let me show you, then. You shall see all that there is."

"That will be very good of you. I should like it very much. I suppose you know everything in the house by heart?" said Mrs. Austin, furling and unfurling her fan, and looking up kindly at Frank.

"All those things! No, indeed I don't," the young man answered, half laughing and half confused. "I know there are a lot of old pictures and heirlooms about the place. I've always been meaning to learn all about them, but I never have. But I'll find out," he added, courageously.

"It doesn't sound as if you would be a very trustworthy guide."

"Oh, try me first!" he exclaimed. "Then, when you have exhausted my stock of information, you can have somebody else who knows more; and then——"

"And then?" she repeated, when he paused.

"Why," said Frank, blushing like a shy school boy, "then I think you had better teach me."

Mrs. Austin looked at him smilingly. "It would only be common gratitude, wouldn't it?" she said.

"It is a bargain, then," he urged. "But when? Candle-light isn't any good, you know. Will to-morrow morning do?"

She answered that to-morrow morning would suit her perfectly, and looked past Frank in a way that made him turn and discover Mr. Gilbert South at his elbow, smiling agreeably, and holding a piece of music. He promptly announced the nature of his errand.

"Miss Vivian has sent me to ask if you will sing this with her."

Frank hesitated: looking at the song, at Mr. South, at Tiny, who from her music-stool surveyed the scene, and waited the result of her embassy.

"Pray do," said Mrs. Austin. "Especially as I see that Miss Vivian has chosen a song which happens to be a favorite of mine."

"All right!" said Frank, and taking it from Mr. South, he went to the piano. He had had his back to Tiny during his talk, and now that he walked toward her it was with a clouded face. He had suddenly recollected that there was no occasion for him to amuse Mrs. Austin. South had been invited on purpose to do that. "I dare say she was wishing for him all the time!" thought Frank, with a bitter throb of jealousy. "Well, I don't care; I'll show her the house to-morrow. It's my house—it's all I have, and I will have that, at any rate! And he shan't come with us either; the others can take him round if they like."

"Aren't you very grateful?" said Tiny, in a whisper, looking up at him with a sunny little face, and arching her delicate brows as if to point the question. "I saw how good you were, and I knew how you must hate it."

"Your eyes are very sharp," Frank replied.

She nodded. "Oh, but it wasn't only then," she said, setting up the music before her, and flattening the page with a touch of her soft little brown hand. "I looked at you at dinner time, and I saw you didn't like her. I can always tell whether you like people or not."

"Can you? What do you think if I behave to anybody just as I do to you?"

"I shall not answer that question," said Tiny, firmly. "You seem to have forgotten that we are never to talk about anybody but people in general, and you didn't behave to her just as you do to me, so that has nothing whatever to do with it. Do you know, I think I have the best of it this evening. I said I shouldn't like her, and I don't; but he is rather nice."

"Rather nice, is he?"

"Yes," Tiny answered, "he is. Now, are you ready?"

Mrs. Austin, listening to her young friend's performance, decided that he had a pleasant voice, sadly in want of a little training. "Do you sing now?" she asked Gilbert South.

The "now" marked a remembrance that he sung of old.

"Not to-night," he answered hastily; "to-morrow, perhaps."

"Dear me! Everything seems to be for to-morrow," said Mrs. Austin, leaning back in her chair and looking down.

"I should rather have said that everything had been yesterday," South answered, in a low voice.

"To-day comes off badly either way," she rejoined, lightly, but without raising her eyes. "It generally does, I think."

He fancied there was a touch of mockery in her tone, but he could not be sure. "Do not say anything against to-day," he said; "I have looked forward to it for a long while."

"Ah, then you are sure to be disappointed!"

"Am I disappointed?" said Gilbert. "That [illegible] I want to know." He turned quickly to the piano. "Thank you; that is a charming song." He went back to Tiny Vivian, while Mrs. Austin, softly murmuring her thanks, rose and returned to Mrs. Leicester, who roused herself from a state of drowsy contentment to entertain her.

Frank had no further opportunity that evening. Perhaps had one presented itself he would hardly have taken advantage of it. When the party separated for the night, he lingered at the door, and caught a glimpse of Mrs. Austin going up the shallow steps of polished oak, and that moment taught him that his old staircase was a fitting background for a picture. Coming back, he took up his accustomed position on the hearth-rug, so absorbed in his own thoughts that he seemed almost sullen. He was glad that Mr. South was tired, and would not stay to smoke and talk. He bade Tiny a brief good-night; he stood looking heavily at his mother as she wandered about the room, gathering up her scattered possessions.

"You don't like these people," do you?" she said.

Frank muttered something to the effect that South was well enough.

"No, but you don't like them. I didn't much suppose you would; but I thought you wouldn't mind for once. We don't often have anybody you don't like."

"All right," said Frank. "I didn't complain, did I?"

"No; and it was very nice of you to go and talk to Mildred Austin this evening. You did go and talk to her? I didn't dream it, surely? I was half asleep, I think."

"Yes; I talked to her."

"And you know it is only for poor Carrie's sake—just a fancy of mine. It won't be for long, Frank."

"No," said Frank. "I don't at all suppose it will be for long."

"Mildred was always considered very good-looking," Mrs. Leicester remarked, in a musing tone, standing still with a work-basket in her hand. "Of course she has gone off a good deal—though really not so much as one might have expected—since I first knew her. But I know she isn't your style of beauty, even if she were not elderly, as you and Tiny were saying this afternoon. Oh, you young folks!" And Mrs. Leicester ended her sentence with a good-humored chuckle of reminiscence.

There was a pause before Frank opened his lips. Since the time was just long enough to permit of making an appeal to high Heaven, it may be hoped that it was so employed. "I'm sure I never said she was my style," he answered; and added, in a lower voice, "I know very well she isn't!" And with that he turned on his heel and went away to bed.

It was evident that young Leicester might dream his new dream with little fear of discovery, unless Gilbert South should detect his secret. Mrs. Leicester and Tiny Vivian had both perceived that Frank did not like Mrs. Austin. Tiny, being keener sighted than the elder lady, might possibly reconsider the matter; but such a conviction is not lightly set aside. Life is long enough for many changes; but it is not long enough to allow of our recognising many changes in our friends. Having once settled what they must be (which is easily done, since there is but one really complicated human being in the world), it is obviously necessary that they should always be what we have determined they are. How otherwise could we go through life with any feeling of security? It would be little less intolerable than if the hills and valleys, fields and high-roads around us, should shift about and journey in different directions, under a sky whose stars were playing hide-and-seek with the astronomers.

II.

If Frank had discovered Mrs. Austin's supreme loveliness and charm in the soft lights and shadows of the evening, it was appropriately reserved for Mrs. Austin to perceive that the morning was the time which best suited her young host. If Mr. South, and perhaps Mrs. Austin herself, should chance to be a little pale and languid, a little conscious of a shadowy past,

"Clouding o'er the new-born day
"With regrets of yester-morn,"

a little disinclined to recommence the monotonous journey from dawn to dusk, which after all seemed to lead to nothing very splendid, one would have said that Frank Leicester was alive and glad with all the life and gladness of the newly-awakened world. He was not in the breakfast-room when Mrs. Austin came down, but, before she had well answered Mrs. Leicester's questions about her night's rest, she heard that he had been out and about for a couple of hours. "He was here a minute or two ago," said Tiny Vivian, herself a radiant, bright-eyed, early riser; "he will be back directly. He only went into the garden." And as the words were uttered Mrs. Austin looked out, and saw Frank emerging from an opening in the tall yew-hedge which bounded the view on one side, and coming up the path, with the sunshine glistening on the short waves of his brown hair, and his dog leaping at his lifted hand. If there was a touch of something rustic about Frank, it was an unmixed charm just then, as he opened the glass door and stepped in, fresh as if he had been steeped to the heart in the air and sunshine of "the country green." He brought a breath of the sweet morning with him, telling how he had brushed through leafy ways and looked across his level meadows before his guests were ready to lift their tired heads from their pillows. He had gone to bed with a heavy heart, but he came forward now, happy and hopeful in spite of himself, and prodigiously hungry.

Breakfast over, Mrs. Leicester excused herself on the plea of orders to give to the housekeeper. "That means and hour's gossip," said Frank to a family portrait.

"It means your dinner, you ungrateful boy!" Mrs. Leicester replied, as she opened the door.

There was a brief silence after her departure. The four who remained, and whose duty it was to amuse and to be amused, seemed a little uncertain how to set about it. Tiny was the first to make an effort. A suggestive remark, aimed at Mr. South, brought him to her side where she stood at the window; a dialogue on gardens followed as naturally as possible, and in less than five minutes the pair were setting out to study the example which lay before them, basking in the yellow September sunshine. Mrs. Austin, meanwhile, was glancing over the Times, and young Leicester, as he leaned against the chimney-piece, penciled figures on the back of an envelope, and added or subtracted in a curiously haphazard fashion. He never once looked at Mr. South and Tiny, and Tiny was apparently unconscious that Mrs. Austin and he were alive. When the couple were fairly gone, and the sound of their footsteps and voices had died away, Frank drew a long breath, glanced at his bit of paper as if he did not think much of arithmetic in general, tore it across, and stood waiting his companion's pleasure and reflecting on the advantages of early rising.

While Mrs. Austin was yet half asleep Frank and Tiny had held a consultation on the lawn, under the tulip trees. Starting from the ascertained fact of his dislike to the strangers, it struck Tiny as very nice of him to say that he would show Mrs. Austin round the house after breakfast. But, knowing that even Frank was mortal, she was not surprised that he set a limit to his self-sacrifice. "Look here, Tiny, I can't stand both of them," he had said. "You'll have to take your friend South away somewhere. You like him best, you say—well, I don't. Besides, I expect I shall have enough of him to-morrow. Take him round the grounds, can't you?" And when Tiny hazarded a smiling reference to the story they had heard the day before, he stopped her rather abruptly. "Oh, let my mother mind her own match-making—it's no concern of ours. We've only got to keep the secret. And don't you see, Tiny, it would look rather very queer if you and I walked off and left them to themselves?" Tiny saw that. "They'll have time enough and to spare," said Frank, finally.

"So they will," she assented. "This afternoon, when you are out of the way."

"Yes," said Frank, gazing intently at a weed in the turf, "they'll have this afternoon." And so it happened that, while the afternoon was reserved for Gilbert South, Frank had the morning.

(To be continued.)

WHAT THE COUNTRY WANTS.

(Montreal Star.)

The opinion is expressed at Ottawa that Sir Sam Hughes will "make the fur fly" over the Kyte Shell Committee charges when he gets back. Provided it is the fur of the guilty parties, that is what the country wants, and it doesn't care whose fur it is, either.

SUNDAY SCHOOL LESSON

March 7, 1910. Lesson vi.

The Missionaries of Antioch.—Acts 11: 19-30; 12: 25-13: 12.

Commentary.—I. The Gospel in Antioch (vs. 19-26.) 19. Scattered abroad—The martyrdom of Stephen occasioned the loss of a noble Christian and an effective gospel minister; and it also resulted in a wide dissemination of the gospel. Christians went out from Jerusalem to remote regions of the then known world to proclaim Christ as the Saviour of men. In this instance it is impressively true that the blood of the martyrs becomes the seed of the church. As far as Phenice—"Phoenicia."—R. V. The region along the Mediterranean in which Tyre and Sidon were situated. Cyprus—An island in the northeastern part of the Mediterranean Sea, about sixty miles from the eastern shore. It is a rich island and its name was given to copper which was found there in large quantities. The inhabitants were noted for their wickedness. Cyprus was the birthplace of Barnabas. Antioch—The capital of Syria and an important commercial centre. It was situated on the Orontes River, sixteen miles from the sea, and three hundred miles north of Jerusalem. Preaching the word—These preachers went forth with a divine message and not with their own theories. They preached the truths the people needed to hear. Unto the Jews only—They had not yet received the instruction that had come to Peter in a vision at Joppa, and did not know that the time had come to proclaim the gospel to the Gentiles. 20. Cyrene—A city in northern Africa in the region which is now Tripoli. Were come to Antioch—The men of Cyprus and Cyrene were on their way homeward from Jerusalem and had reached Antioch when the events before us occurred. Spake unto the Grecians—"Spake unto the Greeks also."—R. V. The Greeks represented those who had not become Jews. They were Gentiles. These preachers from Cyprus and Cyrene seemed to have received a larger vision of the purpose of the gospel than had the Jewish Christians of Judea. 21. The hand of the Lord was with them—The hand of the Lord stands for his power. These men were fitted to preach the gospel and were empowered for their work. A great number believed—It was because the hand of the Lord was upon the preachers that their hearers were brought to believe the gospel message. Those who truly believed the truth concerning Jesus turned to the Lord. To turn to the Lord meant for them to turn from idolatry and every other known sin. It meant for them to hear the reproach of Christ and to be known as his followers.

22. Tidings of these things came.... Jerusalem—There was communication between Jerusalem, which was recognized as the centre of the Christian church from which the progress of the new faith was watched. They—The church at Jerusalem. Sent forth Barnabas—His fitness for the important duty of looking after the interests of the church in giving needed warning, instruction and encouragement, is readily seen from what is said of him in v. 24. As far as Antioch—To ascertain whether or not the work reported there was genuine. 23. Had seen the grace of God—The effects of divine grace are clearly discernible. Salvation makes a radical change in the appearance and life of those who accept of it. The heart is changed and the new life within is manifest in the conduct. Was glad God's people always rejoice when souls are being saved. Barnabas was so fully in sympathy with the gospel plan and understood it so well, that he rejoiced in the salvation of the Gentiles. Exhorted them—Barnabas understood how much was involved in the steps the people of Antioch had taken and he urged them to be steadfast in their purpose to follow Jesus. Cleave unto the Lord—Keep fast hold upon the Lord by constant obedience and a steady faith. 24. A good man—He had received the grace of God in his heart and was fully devoted to his service. He was in a position to help others. Full of the Holy Ghost—The Holy Spirit had come upon Barnabas as he came upon the disciples at Pentecost. Faith—He believed [illegible] in God's power, love and faithfulness. Much people was added unto the Lord—It is a mighty gospel that leads men to give up their idolatry and their sinful lives and that changes their natures so that they become humble, pure in heart and godlike. The preaching of the gospel in its purity with the fulness of the Spirit will produce results.

25. Tarsus—Saul's home. It was about one hundred miles northwest of Antioch. To seek Saul—A new step was to be taken in the work of evangelizing the world. Barnabas believed Saul was the man who should take an important place in carrying the gospel to the Gentiles. The Lord had raised him up for that work. God's calls and the calls of his church are in agreement. 26. A whole year—A year's service in this important place was a fitting preparation for it to become a great centre of missionary effort. Called Christians first in Antioch—The followers of Jesus called themselves Nazarenes, Galileans or Greek-Jews, and it is probable that the enemies of Christ at Antioch called them Christians in derision. The name is a most appropriate one whether given in ridicule or in soberness. It acknowledges not only Christ, but also his office and mission. Happy is he who rightly bears the name.

II. Relief for the needy (vs. 27-30). A prophet from Jerusalem, named Agabus, predicted that a famine should afflict the inhabited world. This came to pass during the reign of Claudius Caesar. When the famine visited Palestine, there was distress among the Christians there. With true Christian liberality the church at Antioch gave according to their ability and sent relief to them. They sent it to the elders at Jerusalem by Barnabas and Saul, to be distributed among the needy.

III. Missionaries sent out (12. 25-13. 12). 25. The return of Barnabas and Saul to Antioch meant additional aid in the missionary enterprise soon to be begun, for John Mark came with them. 1. prophets—Those who deliver messages from the Lord. They may declare the truths of religion or they may foretell future events. Teachers—Those who explain the scriptures or give instruction in spiritual matters. Simeon that was called Niger—Simeon is a Jewish name. Niger is a Latin word meaning black, and it may have been applied to him because of his complexion. Lucius of Cyrene—It is probable that he was a Jew of Cyrene in Africa. He may have been related to Paul (Rom. 16. 21). Manaen—A man closely associated with nobility, for he was brought up with Herod Antipas. 2. Ministered to the Lord—From the following verse we conclude that this ministry consisted of prayer and fasting. The Holy Ghost said—The Spirit made clear to the church at Antioch what he would have them do. Separate me Barnabas and Saul—The Spirit inspired the church to set these two apostles apart for the work of extending Christ's kingdom among the Gentiles. He had already called them personally, and he called them also by the church. 3. Fasted and prayed—The church sought divine guidance and fasted that they might be in deeper communion with God and that their prayers might be more effective. Laid their hands on them—By this act the two apostles were given the authority of the church for their work as missionaries to the Gentiles. Sent them away—It is not stated to what field the church sent them or that they sent them in any particular direction. In the next verse we note that the Spirit directed them to Cyprus the home of Barnabas. 4-12. Barnabas and Saul were successful in their mission on the island. The Lord wrought a miracle in causing Elymas to be blind for a time to rebuke him for his sin, and to lead the proconsul, Sergius Paulus, to receive the gospel. Henceforth Saul is called by the Roman name Paul and no longer by his Hebrew name Saul.

Questions—What occurred at the time of Stephen's death? How was the persecution made a blessing? Mention some of the places where the disciples had preached. Where was Phenice? Cyprus? Antioch? Cyrene? Who was Barnabas? Why was he sent to Antioch? What exhortation did he give? Where was Tarsus? Why did Barnabas go to see Saul? How long were they in Antioch? Where, why, by whom, was the name Christian given to the disciples? What did Agabus prophesy? What did the brethren at Antioch do? Why did the church fast and pray? Who chose Barnabas and Saul for the missionary work? At what city did they first land? What took place at Paphos? What caused the deputy to believe?

PRACTICAL SURVEY.

Topic—Church Expansion.

I. The outgrowth of persecution.

II. The origin of foreign missions.

I. The outgrowth of persecution. Persecution was the first means of propagating the gospel. Three distinct lines of expansion started from the dispersion of the Jerusalem church, Philip's mission to Samaria, Peter's mission to Cornelius and the work at Antioch. The very efforts to crush the gospel gave it new vigor and wider spread. The fugitives did not flee from the cause they had espoused nor relax their efforts to advance it. It was on account of the proportions to which their work had grown and the fame of it that travelled to Jerusalem, that Barnabas was sent to Antioch to inquire into matters and to insure harmonious working between those who labored for the Jews and those who labored for the Gentiles. The conversion of Cornelius had prepared the church at Jerusalem for such tidings as they received from Antioch. They showed their sympathy for the work by sending such a man as Barnabas. As a representative of the church at Jerusalem, his approval would give the work a new impetus, as being done under the sanction of the mother church. Barnabas held the unique position that both the church at Jerusalem and the people of Antioch had claims upon him. He was in sympathy with both. It was the Greeks who were being received from beyond the strict borders of the old race. The events at Antioch could not well be mistaken. The gospel had been preached there to the heathen with great power and success. Barnabas proved himself true to his name and well fitted for his mission. He recognized the wondrous effects of God's grace upon the Grecian believers at Antioch. He found a work of conversion going on. He found an unexpected but grand field for work there. He was sent to make inquiry. He remained to co-operate. He had energy to contribute, an influence to exert. He did not waste his joy in idle contemplation. He rejoiced to behold the growing establishment of the church of Christ. It was a triumph of Christian principle to recognize the grace of God under new forms and in so strange a place, considering the strong convictions which Jewish Christians had to overcome. The mission of Barnabas authenticated the genuineness of Christianity at Antioch. He called in Saul as one more eminently adapted for the work to be his companion. It was no small service to bring into the foreground the man who was to be the means of doing such a work as Paul accomplished for mankind. Antioch was a new capital for Christianity with altogether Gentile associations.

II. The origin of foreign missions. We here lose sight for a time of the church at Jerusalem and the apostles while Antioch becomes the centre of church history and missionary activities. It was a centre of commanding influence in spreading the gospel. The church was in suitable condition to hear the divine call. They were offering their services to the Lord and he designated what their services should be. There was a new departure in the policy of the church. Here began the first organization on behalf of foreign missions. The principles which made it proper to preach the gospel at Antioch made it proper to preach it everywhere. The appointment of Barnabas and Saul was an important event in each of their lives. They were to be solemnly set apart for their special work. The Lord did not require the church to cripple itself for the sake of missions. The forces of the church were growing. Saul had been chosen for the work, but the Holy Spirit had finally to give the word of command and direction. He selected his workers, but required the church to make outward and formal recognition of his selection. From Antioch first went forth the preachers of the gospel with the express purpose of disseminating it among the nations of the world. Back of them was the authority of the Spirit and the authority of the Church. They entered upon their work with wisdom. Elymas, the sorcerer, found fault with the gospel. Barnabas and Saul were called upon to clear up the points at issue. The Spirit of Truth was too mighty for the spirit of lies. The overthrow of opposition made the victory of truth the more conspicuous. The blindness of the false prophet opened the eyes of the deputy. The sorcerer was vanquished and the governor converted.

SUNDAY AT HOME

THE DOORWAY OF OUR HOME.

The doorway of the old home
Is stained with age and small;
And in the early twilight,
When purple shadows fall
Across the little doorstep,
My half-shut eyes can see
A row of clear-cut visions,
That stands and smiles at me.

The doorway of the old home
Has often opened wide
For school girl and for student,
For mother and for bride;
And soldier feet have travelled,
While eyes were dim with pain,
Across the narrow threshold,
That ne'er came back again.

The doorway of the old home
Has heard love's stories told;
Has seen the splendid autumn
Of people growing old.
And baby hands have fumbled
At lock and heavy key;
And feeble arms stretched from it
To children out at sea.

The doorway of the old home
Is stained with age and small;
And yet in glowing summer,
In winter and in fall,
It gives a cheery welcome,
And knowing eyes may see
The row of clear-cut visions
That stand and smile at me.

Margaret F. Sangster, jun.

LOVE ONE ANOTHER.

The love of God is shed abroad in our hearts by the Holy Ghost, which is given unto us. Ye have not received the spirit of bondage again to fear; but ye have received the Spirit of adoption, whereby we cry, Abba, Father. The Spirit itself beareth witness with our spirit, that we are the children of God. He that believeth on the Son of God hath the witness in himself.

In this was manifested the love of God towards us, because that God sent His only begotten Son into the world, that we might live through Him. In whom we have redemption through His blood, the forgiveness of sins, according to the riches of His grace. That in the ages to come He might show the exceeding riches of His grace in His kindness toward us through Jesus Christ.

Beloved, if God so loved us, we ought also to love one another.

RELIGION.

An eminent English writer says, "Religion is not a proposition, but a system; it is a rite, a creed, a philosophy, a rule of duty, all at once." In the New Testament I read a shorter definition: "He that hath the Son hath life, and he that hath not the Son hath not life." Who hath sailed round that mysterious island called Life? What do you know about its rivers, mountains, caverns, bays and harbors, its shoals, its reefs, its tides of danger? Life is simple, says one. Nay, says another, Life is complex. I find in me a law that when I would do good, evil is present with me. What is man? and a recluse answered: "Man is the tadpole of an archangel without its tail." Pascal says: "there is a religion contrary to our nature, which establishes itself in men's minds with so much mildness as to use no external force; with so much energy that no tortures could silence its martyrs and confessor. The holiness, devotion, humility of its true disciples, its sacred books, their super human grandeur, their admirable simplicity. Consider the character of its founder. His disciples unlettered men, yet possessed of wisdom sufficient to confound the ablest philosophers."

Life is a challenge! Some wonder, despise and perish, some wonder and adore, and carry a child-heart. Of such is the Kingdom of Heaven. The child heart wants things now, knows no impossibilities. Strange to say, this life fills the dinner pail full every time; nay, the cup runneth over, there is an over-spill, there is more than can be used, the chancellor of the exchequer has always a surplus. You follow on to know, and this you are daily learning. "He giveth more grace." There are abundant fragments left after the feast. Ask every one that knows and they will tell the same tale.

Where this Life is there is no fear. When the [illegible] has a great work for His servants to do, He makes them blind, whether it be Elijah, Jeremiah, the Baptist or Paul. Blind to danger, the number and force of foes. In this blindness you can sing, the fearful and unbelieving never sing. Valor is the salt of all the virtues, the whole soul is seasoned. There may be dangers, there may be night, but He giveth songs in the night, songs of victory. "Fear not," is Heaven's high behest.

In Alexandria, the beautiful slave Potaiurne, when about to be stripped in order to be thrown into the cauldron of hot pitch, said to the prefect, "I pray you rather let me be dipped down slowly into it, with my clothes on, and you shall see with what patience I am gifted by Him of whom you are ignorant, Jesus Christ."

When the populace in the same city had beaten out the aged Apollinia's teeth, and lit a fire to burn her, unless she would blaspheme, she leaped into the fire herself, and so gained her crown.

"He shall reign from pole to pole,
With inimitable sway;
He shall reign, when like a scroll,
Yonder heavens have passed away."

H. T. Miller.

Food and Health.

Your stomach has no teeth.

Eat slowly; take plenty of time.

Health depends on what we digest well.

Your palate will often get your stomach into trouble.

Food should be neither too hot nor yet too cold.

Most people eat too much; when in doubt eat nothing.

All good foods when well digested make good blood for you.

There is no such thing as a "blood-making" food or a blood-making" drink.

Cook food well; select it carefully; eat in moderation and you will have good health.

Wigg—That fellow Sapphedde boasts that he never jumps at conclusions. Wagg—No, he makes his mistakes quite leisurely and methodically.

PESTS OF THE TROPICS.

Insects Whose Bite is Like the Touch of Redhot Iron.

The pestiferous insects that infest the region tributary to the headwaters of the Amazon make life miserable for any one who may venture into the region. Commander H. A. Edwards of the Bolivia-Brazil Boundary Commission, declares that there is no escaping them and that you are always scratching or slapping your body, except when you are under your mosquito net—and even then if you are not asleep.

In camp ants are a continual nuisance. They eat your clothes, gnaw the softer parts of your boots and ravage the food. Many kinds bite savagely. One kind, which the natives call itashi, lives in palosantos or holy posts—trees that they hollow out themselves. Their bite is like the touch of a redhot iron, and if any one inadvertently leans against a palosanto the little red demons swarm out upon him instantly, and so bite him that for an hour afterward his life is almost unbearable.

Most dreaded of all are the tucandeiras—black ants with bodies one and a half inches long that live in the forks of trees, but that often invade your tent. They bite very hard and probably inject some sort of poison into their victims, for the part bitten swells and pains excruciatingly. The sauba or leaf carrying ants, black ants that make broad, straight roads of their own and move about in armies with scouts and flanking parties, gray ants that live in mounds of red earth six feet high, yellow ants that dwell in rotten wood—all make the traveler unwelcome, either by damaging his belongings or by inflicting pain on his person.

Mosquitoes, the bite of which is not only painful and irritating, but imparts malaria and yellow fever; various phlebotomous flies that inject the germs of what is called three day fever; wasps of all kinds; bees of all sizes; hornets as large as the smaller humming birds; the matoucha and tabana, a sort of mangrove fly with a taste for bloodsucking—each and every one of them does its share toward making the life of the explorer in those regions almost unbearable. There are flies that lay their eggs in your flesh or in your clothes.

Where there is any sort of grass you cannot guard against the attack of the muqim, a microscopic tick whose sojourn on your body causes a most tantalizing itch that you can alleviate only by sponging your body night and morning with alcohol. And in many places the pium, a small black fly that looks like a speck of dust, drives you half crazy by its bite. Although those regions are a paradise for the entomologist, the ordinary traveler will hardly regard them in that light.

THE RIVER THAMES.

Crimes and Mysteries of London's Great Artery.

London's great artery, the river Thames, hides many a grim story under its murky waters, some of them centuries old, some of them merely incidents of yesterday. Just as no other river has quite the same wonder as belongs to the Thames, so no other river is so wrapped in mystery, so surrounded with stories of tragedy and crime.

Many of the old waterside houses, which rise sheer with the bank, contain rooms in which the floor is built directly over the water—floors upon which one could stand in apparently perfect safety while some one in an adjacent room worked a lever which caused the floor to open and his victim to drop into the river.

A gambling club is said to have met in such a room once a year to play for tremendous stakes. The party played on until one of their members was ruined. Then the rest of the men went away in silence, while the ruined man went down into the dark waters.

One of the old waterside houses at Wrapping, too, is among the bits of the Thames with a reputation for being haunted. A flight of steps leads from the house to the river, but these steps are disused, and the door at the top of them is walled up. Despite this, often people passing by on the river at night time swear to having seen two men [illegible] through the walled door and down the steps. Then, after lowering some bundle into the waters, they return to the house. The identity of the men and the contents of their bundle remain among the insoluble stories of the Thames.

The Thames police force of about 200 men is employed to guard against all sorts of additions to the mysteries of the Thames, and their task is of far greater magnitude than might be casually imagined. Most imperative is it that each member of this force shall be an expert swimmer and understand the right methods for dealing with persons rescued from the water.

A very large number of persons are saved from intentional and accidental drowning in the river every year, an average number somewhere between seventy and a hundred. But the number of persons who are "found drowned" strikes a still greater average—it is never less and often more than 100 in a year—besides which it is well known that the waters of the river close above many persons of whom nothing more is ever seen or heard.

But if stones could speak the bridges across the Thames could tell many pitiful and grim life stories, especially Waterloo bridge, which has such sad associations as to have gained it the sobriquet of "The Bridge of Sighs."

Incidentally, Waterloo bridge is another part of the Thames which is said to be haunted. It is not so very long since a more than usually clear sighted man went to the police with the information that he had seen a woman jump from the parapet of Waterloo bridge. He had been crossing the bridge late one night, when he noticed a woman in black walking in front of him. Suddenly he saw her make an appealing gesture, but before he could reach the woman she had disappeared.

That was all. There was no splash following her disappearance, and no result came from the search which was made. Those who are familiar with the history of the river said that the man had seen the ghost of Waterloo bridge—the tragic woman in black, of whom nothing is known save that she haunts the London "Bridge of Sighs."

Another mysterious thing about the Thames, which no amount of police supervision will destroy, is the "ghost" boats which have been and are frequently seen in various parts of the river. It is a fact that river police patrols have actually given chase to such ghost ships, to find there is nothing substantial to be found on reaching the place where the ships had seemed to be.

One of the most curious stories of this kind is that of the mysterious boat which was seen making its way along the water toward London bridge one day, about a quarter of a century ago. As she neared the bridge there was a tremendous explosion, a vivid burst of light, and then—nothing! Not so much as a splinter of wood remained of the boat which had been, and the story of it lingers from that day to this as one of the hundreds of tragic unknown things which form the secrets of the river of mystery.—London Answers.

STING OF THE AGY.

A Madagascar Plant That Can Drive Men Mad With Pain.

Among the many peculiar and disconcerting plants and creatures that abound in Madagascar, probably none is more surprising or disconcerting than the agy tree, so called, which is not a tree, but a climbing plant. The following incident, quoted by Mr. James Sibree, F. R. G. S., in "A Naturalist in Madagascar," illustrates the painful result of contact with the agy. The story is told by a Mr. Montgomery:

Walking under some trees and pushing aside the reeds and grass, I was startled by a sudden tingling and prickling sensation over the backs of my hands and fingers. I stopped in sudden surprise, for the pain was severe, and I had touched nothing except the grass. But in another minute the pain increased, the tingling, burning sensation seemed to be extending rapidly up my wrists, and I could see nothing to cause it. As I lowered my head to look scalding pain shot into my ears and neck and grew worse every instant. Dazed and bewildered, I stood a few seconds in helplessness, for I could neither see nor guess at the cause of the terrible distress. Then I got back to my company with agony written plain enough on every line of my face.

The men started up when they saw me, crying: "You have been stung by the agy!" Some of them led me to a seat, others rushed for water from the river, and two or three brought sand heaped up in their hands. Then they chafed me with the sand and water to stake out the stinging hairs, which they knew caused the mischief. As they rubbed me I felt the pain abate, and after they had chafed me for about a quarter of an hour I was comparatively free from pain. While the men were rubbing me I was able to discern to some extent the cause of my distress. Countless hairs, like tiny arrows, almost transparent, pointed at either end and from a third to a fourth of an inch long, had dropped on me in an invisible shower from the agy tree as I stood under it. Before I came away that afternoon, very cautiously I ventured to examine the tree at a little distance and found that the tiny hairs grew outside a thickish pod or shell not quite so large as a small banana. The pods were fully ripe (unluckily for me) just at that time, and the light wind was scattering their coverings.

A REAL DRAWING ROOM.

(Judge)

"She's a great favorite in drawing rooms."

"Why, I heard she was a popular model!"

"She is!"

Was All Choked Up

Could Hardly Breathe.

BRONCHITIS

Was The Cause; The Cure Was

DR. WOOD'S Norway Pine Syrup.

Mrs. Garnet Burns, North Augusta, Ont., writes: "I caught a dreadful cold, going to town, and about a week after I became all choked up, and could hardly breathe, and could scarcely sleep at night for coughing. I went to the doctor, and he told me that I was getting bronchitis. My husband went to the druggists, and asked them if they had a cough medicine of any kind that they could recommend. The druggist brought out a bottle of Dr. Wood's Norway Pine Syrup. I started using it, and it completely cured me of my cold. I cannot tell you how thankful I was to get rid of that awful nasty cold. I shall always keep a bottle of Dr. Wood's Norway Pine Syrup on hand, and I shall only be too glad to recommend it to all others."

Dr. Wood's Norway Pine Syrup is a remedy that has been on the market for the past twenty-five years, and we can recommend it, without a doubt, as being the best cure for coughs and colds that you can possibly procure.

There are a lot of imitations on the market, so when you go to your drug or dealer see that you get "Dr. Wood put up in a yellow wrapper; three trees the trade mark; the price, 2 50c.

The genuine is manufactured by T. Milburn Co., Limited, Toronto,

Heart Would Beat Violently. Nerves Seemed to Be Out of Order.

The heart always works in sympathy with the nerves, and unless the heart is working properly the whole nerve system is liable to become unstrung, and the heart itself become affected.

Milburn's Heart and Nerve Pills will build up the unstrung nervous system, and strengthen the weak heart, so that the sufferer will enjoy the very best of health for years to come.

Mrs. John N. Hicks, Huntsville, Ont., writes: "I am sending you my testimony for the benefit I have received from using Milburn's Heart and Nerve Pills. As a nerve and heart builder they have done wonders for me. At times my heart would beat violently, and my nerves seemed to be all out of order, but after using a few boxes of Milburn's Heart and Nerve Pills I feel like recommending them to others that they might receive benefit as I did."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years, and are universally considered to be unrivalled as a medicine for all disorders of the heart or nerves.

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FARM AND GARDEN

ASPARAGUS CULTURE.

The cultivation of asparagus is becoming more general each year. It is one of the earliest, as well as most delicious and surest products of the garden. Asparagus is unique in its position among other vegetagles, in that when planted it lasts a lifetime.

The asparagus plant starts producing seed when two years old, but it is not best to use seed from plants under four years old. When fully developed, the asparagus stalks will attain a height of from five to to six feet, with numerous branches upon which are produced a profusion of bright scarlet berries, each berry containing from three to six seeds.

The start, however, is usualy made with plants. There should be a careful selection of the individual plants to be set out. A crown with four or five strong, well-developed buds is far better than a dozen weak and sickly ones. If possible, only plants with not over six buds should be selected. The roots, too, should be strong and of uniform thickness, succulent and not too fibrous. The best roots are the cheapest.

Asparagus thrives in almost any good, well-drained soil, but does best in deep, rich, loose loams. Satisfactory crops are obtained in good [illegible] land. The plants gratefully re[illegible] to liberal manuring and good [illegible]. It is possible to give [illegible] manure. [illegible] should be free from roots, [illegible] any material that will inter[illegible] the growth of the spears. [illegible] no kind should be allowed in the asparagus bed on account of the shade thus made, and also for the reason that the roots of the trees make heavy drafts upon the soil. Shade must be avoided, not only from trees, but hedges, hills, or buildings. There should also be a protection from cold winds.

For commercial purposes, on a large scale, a well-drained, light, deep, sandy loam, with a light clay sub-soil is best. A heavy clay soil, or land with a hard-pan sub-soil, or any soil that is cold and wet, is not suitable for asparagus.

The bed must be kept free from weeds.

SETTING OUT PLANTS.

The best time for setting out the plants is in the spring, when the soil can be worked to good advantage. From April to the middle of June is the best season. Transplanting must never be done in the fall. In planting in June however, preparation must be made for watering the plants in case of drouth.

In planting the work should be done as expeditiously as possible, so as not to expose the roots to the drying influences of sun or wind

The ground must first be plowed and harrowed or spaded and raked over, so as to get it into a mellow condition; then the rows for planting are laid out. Some prefer having the rows run north and south, but more important than that is having the rows run with the slope of the land.

Asparagus should never be planted closer than two feet in rows that are three feet apart.

Our forefathers planted asparagus in a different manner than is adopted at the present day. They would dig deep trenches by plowing a furrow each way, and if deemed necessary going over the ground a sufficient number of times to make the furrows from eight to ten inches deep. After this the loose soil is thrown out with a shovel so as to leave the trenches in a uniform depth of about a foot, and of the same width at the bottom. Some fertilizing material should be scattered in the trenches before planting. Some growers spread decomposed manure over the bottom of the furrow to a depth of about three inches, covering it with two inches of fine soil.

The roots are then placed in the furrow, the crown in the centre, and the rootlets spread out evenly and horizontally, like the spokes of a wheel, and at once covered with three inches of fine mellow soil which is pressed around them! If at planting time the ground should be dry it should be pressed down quite firmly about the roots, so as to prevent their drying out, and to hasten their growth.

CULTIVATION AND AFTER CARE.

Throughout the first season cultivate carefully, working the soil toward the plants. At the end of the first season the tops will be about three feet high. As soon as dead in the fall remove and cultivate the whole bed, about four inches deep, without regard to the rows. Again, the following spring, begin cultivation as soon as the ground will allow.

It is best not to do any cutting of the crop until the spring of the third year. Cultivation the second year should be the same as the first. Cutting should end about the middle of June. At this time the entire bed should be thoroughly cultivated three inches deep, and a good coating of well-rotted barnyard manure added.

FARM NEWS AND VIEWS.

You may be able to argue yourself into believing that shallow plowing and one-crop farming is best, but you can't argue Nature into decorating land so handled with bumper yields. However, land shouldn't be deepened too much at a time. From shallow to deep plowing all at once is bad—and worse in the spring.

When applying lime use it on crops that respond most readily to it. Spinach, beets, lettuce, cantaloupes and cabbage like sweet soils.

In general, the cow that gives the most milk produces it at the least cost per quart. Cows have certain definite requirements both for the production of milk and for maintaining body energy. The nearer we can come to supplying these certain requirements, the cheaper will we produce milk and keep the cows in good flesh. Cottonseed meal is the cheapest source of protein; corn silage and corn grain are the cheapest sources of fat and energy. Alfalfa and clover hay are worth three times as much as timothy for milk production. Let all the cows eat what roughage they will clean up. Feed one pound of grain for every three or four pounds of milk produced. The New Jersey Experiment Station gives the following ration: Alfalfa hay, corn silage, cornmeal, each three parts; cottonseed meal, two parts; wheat bran, one part.

The preparation of the garden soil is of far more importance than most gardeners realize. The vegetables must have a deep, mellow, friable soil to hold moisture and promote the life and development of soil organisms so important to a fertile soil. The soil should be broken early and vegetation incorporated in time for it to decay. A large per cent. of vegetable matter usually in its final state of decomposition called humus is necessary. It may then be necessary to rebreak, harrow and cross-harrow in order that a deep mulch may be had.

Commercial dried pulp is held in high regard by many dairymen as an excellent succulent food for dairy cows. Excepting the loss of sugar, it is nearly equal in feeding value to fresh beets. Dairymen will do well to investigate this new addition to dairy feeds.

Using the same ground for a garden, year after year, requires that a large amount of barnyard manure be worked into the soil every year.

In making provisions for disinfecting the stables, don't overlook sunshine and fresh air.

It may not be advisable to grow sweet clover on land that will produce good crops of red clover and alfalfa. These crops require rich, well-fertilized soil. It is a poor land crop, and probably its greatest value will be found in its use as a green manuring crop. It will enable the farmer to fill his unproductive soils with humus, and bring the land to a condition that will enable the crop to utilize the fertility it contains.

No Girl Need Have A Blotched Face

Whether it be in capturing the heart of man, or making her way through the world by the toil of her hands, a charming and pretty face gives any girl a big advantage. Poor complexion and rough, sallow skin are caused by blood disorders. The cure is simple. Just use Dr. Hamilton's Pills—a reliable family remedy that has for years been the foremost blood remedy in America. That soft glow will return to the cheeks, the eyes will brighten, appetite will improve, strength and endurance will come because sound health has been established. Get a 25c. box of Dr. Hamilton's Pills to-day. Sold everywhere.

STRANGE GIANTS.

The Jiengs of the Soudan Have Many Peculiar Customs.

Some interesting facts about a strange race of giants in the Soudan are given by the Rev. C. Lea-Wilson, who has been carrying on missionary work in a district of the White Nile, a thousand miles south of Khartoum.

"It was only at the beginning of last year," he tells the London Chronicle, "that a first attempt was made to penetrate to the west of the river into the Bahr-el-Ghazel. We travelled here for about 200 miles, and fixed on a large clearing in the forest for our station, in the neighborhood are about 8,000 people, known as Jieng, who are among the tallest tribes in the world. They are jet black, typical negroes, and do not practice either cannibalism or human sacrifice. They have admirable qualities, and I have never seen among them a case of cruelty to women or children.

"They have many curious habits. For some reason, apparently unknown even to themselves, all adults have six of their teeth removed. This does not add to their personal charm, but they are great dandies. They employ a kind of native toothbrush with which they clean their teeth by means of wood ash. They take great pride and devote much time to the dressing of their hair, powder their faces and wear ostrich feathers.

They have a habit, when at rest, of standing on one foot like storks. They believe in a supreme being to whom they sacrifice through their chiefs or witch doctors. Just before I left they made great preparations for a rain sacrifice, but the rain came the same afternoon before the sacrifice was offered."

Mr. Lea-Wilson states that the surrounding country is like a zoological garden. Elephants, giraffes, rhinos, buffaloes, lions and leopards abound.

The Jieng people are remarkably brave and they killed two man-eating lions with spears alone. This means that the first men attacking the animal are killed to a certainty, before their companions are enabled to rush in and despatch the wounded animal.

They also hunt elephants in the very primitive and dangerous fashion of dropping weighted spears upon the elephant from the branches of trees. These spears remain fixed and the elephant exists for days, until it is exhausted by the increasing number of spears which are embedded in its hide. The country is full of ivory, large quantities of which are hidden or buried and will probably never be found.

In one little village the people killed 15 hippos in three days, simply by throwing spears at the huge creatures from their canoes.—Philadelphia Public Ledger.

QUEERLY NAMED INNS.

The names of the inns and public houses in England are always a source of unceasing delight to the American tourist, fond of the picturesque. Some of the quaintest titles have recently been collected into a list that is both historically interesting and whimsically absurd. Among the thousand and one signs given in the collection can be found "William Rufus," "Save the Queen," "Prince Regent," "Royal Oak," "White Hart," "Bottle and Wedge," "Cat and the Wheel" and "Cat and the Fiddle."

"The Bear and Ragged Staff" and "Fish and Ring" refer first to the well-known family of the Dudleys and secondly to the legend of Saint [illegible]. Poetry is recognized in "The Shakespeare," "The Robert Burns" and "The Childe Harold," as Walter Scott gave for a motto for an inn close to the famous field of Flodden, "Drink, weary pilgrim, drink and pay."

Izaak Walton is remembered in the "Compleat Angler," which sport in general is represented by plenty of "Cricketers," a "Bat and Ball" and an "Umpire." "The Great White Horse" brings before the eyes the rotund figure of little Mr. Pickwick, while the "Dun Cow" recalls Guy, Earl of Warwick.

Heroes are immortalized in "Lord Wolseley," "Nelson," "Napier," "Wellington," "Raglan," "Gordon," "Randolph," "Garibaldi," and heroines in the American admirer of Captain John Smith, of itinerant memory, the Indian maiden Pocahontas. Other suggestive signs bear the names of "Highland Laddie," "The Ozone," "The Final," "The Pillars of Hercules." In fact, the oddity and the number of names given are simply astonishing and form an interesting peep into the middle-class English character.

Oil of turpentine, mixed with a little corrosive sublimate, will destroy bedbugs. A liberal use of hot water is also effective.

THE OLDEST BOOK.

Playing Cards Are Said to Antedate All Others.

"This is the oldest book in the world," said the wise woman of the party of card players, indicating the pack of cards held in her hands. "Its leaves have been called playing cards since the fourteenth century, but they were known as far back as history teaches, by the Chinese, Persians and Egyptians, not to name the ancients of prehistoric times. A pack of cards said to be a thousand years old is preserved in the museum of the Royal Asiatic Society.

"The women who play bridge all the morning and then all the afternoon, and after that go to bridge parties in the evening," said another of the party, "little think what ancient things they are playing with. But what was the purpose of this book in the time before it became a game?"

"The mystic book," answered the wise woman, "held the hidden wisdom of the ancient world. It was used by the priests in their temples when the world was young. Call its origin Egyptian or what you will, it is full of astronomical symbolism, and the wisdom of numbers; such learning as men had of old was carefully concealed from the uninitiated. But to those who could read it the mystic text book was a veritable book of fate.

"The cards, for one thing, are all symbols of the astrological art. Each one is an emblem. It would tire you if I should attempt to go into the subject deeply. I can only glance along the top waves of the deep ocean. But notice a few particulars which lie upon the surface.

"The fifty-two emblems or pages of this book represent the fifty-two weeks in the year. The twelve court emblems are the twelve months, and thirteen cards in each suit represent the sun and the twelve signs of the zodiac, the four suit figures the four seasons

"Further—but this you can easily see—the heart is the emblem of spring and love, the trefoil or clover leaf—we call it club—of summer and knowledge the diamond of autumn and wealth, and the acorn or spade, of winter, labor and death.

"The pages of this book are in red and black. White was once used in place of red. These colors in the cards symbolize night and day, astronomically and the lights and shades of life as applied to man.

"Look closely at the court cards and notice the emblems carried. These all survive from the ancient forms. The queens hold the lotus flower, supplemented in the case of the queen of spades by the distaff, emblem of industry, kept through all the long centuries. The king and queen of clubs bear symbols of wisdom, the king still plainly showing the winged globe.

"Each suit has its mystic symbolism, corresponding to the planets, in both suit and spots. Venus and Mercury rule hearts. Mars and the Earth rule clubs. Jupiter and Neptune diamonds. Saturn and Uranus spades. But I am becoming too astrological. I must close this fascinating book."

"No, no," the others protested. And then some one asked, "What about the joker?"

"Oh, the joker is a modern invention. He does not count in any serious game of life or of cards. Yet there was in the days of old always a court jester, so this new card is not really out of place among queens and kings."

Faith will move mountains, but for the average man a moving van is more practical.

ROYAL YEAST CAKES

The best yeast in the world. Makes perfect bread.

WINNIPEG MONTREAL

SAVED BY AN EAGLE.

Tale of Woman's Treachery and Man's Savage Revenge.

Taxidermists in Spokane recently preserved an eagle which not only is one of the largest ever killed, but which also has played an important part in the romance of the Colville Indians for two score years. The big bird has a spread of six feet and is the property of Clair Hunt, alloting agent for the Indians on the south half of the Colville reservation, in Eastern Washington.

This eagle is credited by the Indians with saving a man's life and indirectly causing a double murder. The story, as told by one of the leading tribesmen, in substance follows:

About 30 years ago two young Indians, twin brothers, fell in love with the most beautiful and attractive young squaw on the reservation. The rivalry continued for two years. Finally one captured the prize much to the disappointment of the jealous brother. For several months the successful brother lived happily with his young and beautiful bride in a tepee in the shadow of the cliff where the far-famed eagle's nest was located.

One day the disappointed brother rode up to the tepee and proposed to his fortunate brother that they climb to the top of the mountain and secure eagle feathers from the shelf on the cliff. The proposition was agreed to and after reaching the brink of the cliff it was agreed that the married brother, who was much the lighter, should be let down by the means of a long rope to the nest. As soon as he was lowered to the shelf the brother above dropped the rope and retreated to the tepee, took his brother's bride behind him on his cayuse and rode away down the valley, leaving his unfortunate rival on the shelf of rock 200 feet from the top with no possible means of escape.

From his high perch the Indian husband could see his bride being carried away down the valley. It was nearly sunset when the old eagle that is now perched in the Bank of Colville came soaring down in front of the nest and with a shrill scream swooped down upon the unwelcome visitor, burying his talons in the face and neck of the despondent young brave. The jilted husband, not caring whether he lived or died, grasping the legs of the infuriated bird and plunged over the cliff. Down, down the bird and its human passenger floated to the valley below and landed within a few yards of the deserted tepee. The big eagle soared back to his home on the cliff; the young Indian mounted his cayuse and rode in pursuit of the brother who had stolen his unfaithful but beautiful wife.

At about 10 o'clock that evening the enraged husband caught up with the runaway couple. In the heat of passion [illegible] he killed both his twin brother and his beautiful bride. It is a fact that the great eagle's nest was on the ledge of rock 200 feet from the bottom of the chasm and 100 feet from the top, and that the Indians used to lower themselves on ropes to this refuge to get eagle feathers for their headdress.—Tacoma Gazette.

In ten years 800 persons were found guilty of murder in Austria, but only 22 were put to death.

Gyroscope In Aviation

Most people are able to stand on the ball of one foot and keep their balance. Close your eyes and try to do the same thing, and it is not as simple as it seems. This, however, is exactly the situation in which an aviator finds himself when he flies into a fog bank. But here the result of a mistake is infinitely more serious. There is nothing for his eye to take as a basis from which to form any judgment, and he is forced to rely on the instinctive workings of his muscles.

This is only one of the reasons why some automatic stabilizer has been sought so much of late years. On June 18th last, at Bezons, France, Lawrence B. Sperry drove a Curtiss hydroplane equipped with a gyroscopic stabilizer and performed feats that would have been pronounced impossible a few years ago. His father, Elmer A. Sperry, was the inventor.

Standing in his machine with both hands in the air, touching no levers, the young man told his mechanic to climb out on one of the planes. The man did so, yet he had no more desire to die than you or I have. He calmly obeyed orders, stepped out on the wing as he might have sauntered out on the balcony of a house. Nothing happened. The machine maintained a horizontal course, while the ailerons did extra work. Lateral stability had been demonstrated. Next the mechanic climbed aft toward the propeller some five or six feet. Again the machine was undisturbed. Longitudinal stability was proved.

It is almost needless to add that a stabilizer that will stand such tests as these will stand equally well unfavorable weather conditions. M. Rene Quinton, president of the National Aerial League of France, was taken up by Sperry later, in a strong, gusty wind that whipped the branches of the trees along the Seine. This remarkable young man, Sperry—he is only 21—thereupon proceeded to set the automatic device for a rise of 6 degrees to the horizon. Without touching his hands to any control he continued in that position as long as he wanted to, and M. Quinton testifies he felt as if he were in an ordinary machine on a calm day. It must be remembered that all this time, in which about a half a mile was covered, the hydroplane was automatically compensating for every blast of wind that struck it, and M. Quinton insisted that there was a gale blowing all the time.

Four small gyroscopes do the governing. Two of them take care of the lateral stability and two protect the longitudinal equilibrium. Each is in its own airtight case, so that the vacuum may be retained. These gyroscopes are turning inside the cases at a speed of 12,000 revolutions a minute. Pretty high that, but you do not fully realize it until we say it means 200 turns a second. Now you can see why vacuum is necessary. All friction with the air has to be avoided at that speed.

Moreover, if the power at any moment should give out unexpectedly, these gyroscopes will keep on turning for about thirty minutes and still be available as stabilizers, time enough to land from any conceivable height to which a machine would go.

The cases are the size of an ordinary baseball, and the power required for all four is about half that needed to run the ordinary light. They consume about six watts of electric power apiece. No one will suppose that an instrument so small and requiring so little electric power can of itself keep a heavy hydroplane from upsetting; and of course it does not. These four gyroscopes simply set into motion the motors that change the planes, known as servo-motors, and are electrically controlled.

The whole stabilizer is thrown on or off at the will of the operator by a foot pedal which, by the way, is the only foot control on the Curtiss boat. When the stabilizer is active, the pilot has no other responsibility than to steer his rudder. A strong example of this was given when Sperry took up a man who had never operated an aeroplane before and, as he had only to steer and was bothered with no other conditions or responsibilities, he made a most creditable flight. With this stabilizer, it will be seen, the military aviator may lock his rudder, make sketches or take observations and so have a much more comfortable feeling than under the old conditions of flying.

One of the great difficulties in hand operation of both the elevating planes and side controls is that the machine has to make a very appreciable deviation from any normal flying position before the operator is conscious of it, and he, in turn, makes a correspondingly large corrective setting of the planes. So the average flying in any strong wind is a series of dips become smaller. But to some extent they are always there.

With the gyroscope stabilizer the servo-motors are brought into play at the first tendency of the machine to tilt or dip, and the deviation is corrected without the airman having any knowledge of its start.

The generator that makes the alternating current for the gyroscopes can also supply power for wireless messages and thus keep the operator in touch with his base. Lieutenant H. N. N. Bellinger, in some experiments performed with Lawrence Sperry last summer at Hammondsport, has already demonstrated the practicability of the invention for military use and several have been ordered by the United States government.

Amazing delicacy of action has been reached. Among other adaptations of the Sperry gyroscope is that of recording the roll and pitch of ships. In tests on board the United States steamship Worden pendulous gyros were used for recording the roll and pitch of the ship. They were used to maintain the athwartship and fore and aft axes, and these gyros operated pencil arms resting on a paper tape, moved by clockwork. It was found that this mechanism was so sensitive to changes in the angle or roll or pitch of the vessel that it would indicate the roll caused by two men moving from one side of the ship to the other.—Philadelphia Public Ledger.

"This typewriting gets on my nerves." "Now I'm well and enjoy my work."

Neurasthenia or Exhaustion of the Nervous System.

It is quite possible for the nervous system to be considerably exhausted before you realize the seriousness of your condition. You do not feel up to the mark, are easily tired out, worry over little things, and get cross and irritable, but do not consider yourself sick.

For this reason we shall give an outline of the symptoms so that you may be warned in time and use preventive treatment at a time when it will do the most good.

1. General discomfort—excitement and depression alternating.
2. Headache and sometimes dizziness, and deafness.
3. Disturbed, restless, unrefreshing sleep, interrupted by dreams.
4. Weakness of memory, particularly of recent events.
5. Blurring sight, noises and ringing in the ears.
6. Disturbance of sensibility or feeling, as in hands, or, with women, in the breasts.
7. Coldness of parts of body or flushing and sweats.
8. Lack of tone, easily fatigued, dyspepsia.
9. Fear to be alone, or in a crowd, fear of things falling, fear of travelling, etc.

These symptoms indicate that the nerves are being starved for lack of rich, red blood. Certain elements are lacking which can best be supplied by Dr. Chase's Nerve Food.

This cure is easily available and awaits alone your action in applying it. There is no question of the merits of this food cure. Enquiry among your friends will prove to you that many thousands of women, and men, too, are being restored to health and vigor by use of Dr. Chase's Nerve Food.

50 cents a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations disappoint.

Dr. Chase's Recipe Book, 1,000 selected recipes, sent free if you mention this paper.

CULTIVATE JUDGMENT.

Its Possession is What Makes a Man Successful in Business.

It was one of the intellectual shocks of my manhood to discover that an analytical chemist could often get only $50 a month. I had long looked with awe upon the accurate percentages and detailed reports of the analytical chemist. This water contains 2.341 grains of such and such substance per gallon. I wondered at the marvelous man who could get out such fine results, and to learn that he at times gets but $50 a month was a shock.

The explanation is this. The chemical analysis of ordinary specimens is a technical process of a perfectly definite character. If a work is definite and therefore capable of being reduced to clear-cut instructions, the pay that it commands is not likely to be high even though the work itself is complicated. It requires good memory and painstaking obedience to instructions. Many persons have these qualities. The scarce attribute is judgment that indefinable quality capable of meeting a new situation and handling it with common sense or gumption, to put it in a homely term.

Judgment is indefinite. We cannot lay out instructions in advance to tell the manager how to meet situations. To buy good raw material he must learn to know the raw materials, and many of the tests he applies are too fine for words to reduce to instructions. He must decide for indefinite reasons that now is a good time to enlarge or retrench; that here is a good place to open in business; that now is a good time to buy or to run low on stock; that this man needs to be hired; that this man needs to be fired.

It is in the making of decisions that successful management lies. And most of these decisions are beyond rule. They are indefinite. They are judgment.

TEST "ALL WOOL" BY FIRE

To Detect Cotton Fibres Burn a Sample of the Cloth.

Until the proper labeling of textiles has been made compulsory there are certain simple tests by means of which one may determine whether an "all wool" fabric is really all wool or not. The old way of telling by feeling and looking is no longer reliable, for cotton can be made both to feel and look like wool. The only sure way is to take samples of the goods home with you and make tests of them there.

If a piece of cotton cloth is ignited it will be found to burn rather rapidly with a bright, steady flame. There is no disagreeable odor, and when the material is completely consumed there will be left only a small amount of light gray, fluffy ash. If a piece of pure wool is lighted it will be found to burn much more slowly and with a less steady flame, emitting a characteristic, mild hissing noise and a strong odor very similar to that of burned horn. There will be much more ash remaining than in the case of cotton, and it will be in the form of a crinkly, black, crisp ball.

In applying this test to a fabric the whole sample should not be burned at once, for if it is a so-called wool piece containing considerable cotton it will be very difficult to determine whether it is burning more like cotton or wool. Threads should be taken from the sample, several each from the warp and the woof, and burned separately. With a very little practice one will be able to detect the cotton threads by a characteristic manner of burning. Sometimes it is well to pick a thread apart with a pin and test the individual fibre with the flame in determining whether the thread is entirely wool or mixed with cotton.

LAW OLD AND NEW.

A Cynical View of Past Methods and Those of the Present.

Law, more especially criminal law, has usually been an occult science. It is still the practice in Burma, we believe, to give two disputants candles of the same size, to be lighted at the same time. The one whose candle burns longest gets judgment against the other.

Less than 100 years ago a defendant in an English criminal trial appealed to the ordeal of battle, and the court was more or less surprised to find that the ancient law on which he relied had never been repealed.

Determining a man's guilt or innocence by his ability to walk on hot plowshares or carry a hot iron or drink a poisonous decoction or by throwing him bound into water has been practiced for ages among many peoples. The mediaeval method of letting accused and accuser fight it out with weapons was common over Europe.

Our modest ancestors confessed their inability to find the merits of the case and so relegated the whole affair to the intervention of supernatural agencies. The main difference is that we are less modest. Instead of the ordeal of battle or the old key and bible test of the "sieve witch," we have the defendant play a game of trip the court. If he can catch the judge putting down an "i" dot over an "e" he wins and is pronounced innocent.

NOTHING TO EQUAL BABY'S OWN TABLETS

Mrs. Lawrence M. Brown, Walton, N. S., writes: "I have used Baby's Own Tablets for the past ten years and believe there is nothing to equal them for little ones. They instantly banish constipation and teething troubles and unlike any other medicine I have used they are pleasant to take and do not gripe the baby." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

HOW TO KEEP MILK.

Housewives Would Do Well to Follow These Instructions.

Always take the milk into the house as soon as possible. In warm weather put the can where the sun cannot shine on it. Milk is frequently spoiled because it has been in the sunshine two or three hours.

Except in very cold weather milk cannot be kept properly without ice. Always put it in the refrigerator as soon as it is received, and unless the milk bottle is in actual contact with the ice it will be colder in the bottom of the refrigerator than in the top, as the cold air settles rapidly.

Do not take milk from the original bottle and fill it when needed. It should never be stored in a bowl or pitcher, says The Mother's Magazine. Always clean the edge of the milk bottle and wash off the top of the cap before removing the cap. Keep the cap snapped in place except when actually pouring the milk from the bottle.

No matter how clean your home may be, milk will deteriorate if exposed to the air. One of the best ways of serving milk on the table, from the sanitary standpoint, is in the original bottle. Always keep in mind the fact milk is easily contaminated from dust, odor and flies. As many as [illegible] typhoid bacteria have been found on a single fly, and in thousands upon thousands of cases intestinal disorder in infants has resulted from flies contaminating the [illegible] upon which babies were fed. In one experiment 414 flies were examined and were found to carry an average of [illegible] bacteria per fly, such as might readily cause intestinal disorders in infants.

Always keep the refrigerator clean and sweet. Inspect it and scald it out every week, wiping up at once any particle of food, liquid or solid, that may be spilled in it. Do your share in keeping the empty bottles clean. Do not wash them with soap or cloth, but first rinse them with cold or slightly warm water, and then scald them. If you scald them before rinsing with cold or warm water, the boiling water will make the milk stick to the glass.

Be fair to your neighbors, just as you would have them be fair to you. If any contagious disease breaks out in your family do not return any of the bottles to the milkman until you have consulted your doctor and he has advised you how to sterilize them.

JAVANESE WEDDINGS.

Marriages Are Celebrated When Principals Reach Age of Ten.

If the history of Romeo and Juliet were to be translated into Malay, the Javanese would be overcome with wonder at the troubles which befell those ill-starred lovers. The method in vogue among European nations of compelling two young people to regulate their own love affairs would excite the commiseration of a mother of Java, for she would regard it as the refinement of cruelty to throw her daughter or her son upon their own resources, with no kindly hand to arrange the details of the most important transaction of one's life.

The gentle, brown subjects of Queen Wilhelmina, who live in the great island over which she reigns from her tulip gardens 6,000 miles away, never have the disagreeable incidents of breach of promise or elopement. No fond heart is ever jolted by jilt, and the unpleasant effects of colds and influenza, as results of exposure to the night air while serenading some damsel, are not among the dangers to be faced by the jeunesse doree of the land of the coffee berry and the betel nut.

In the well organized social scheme of Java, marriages are made as soon as the little strangers open their blinking, slanting bits of black eyes upon the world. As soon as a baby is born, a suitable husband or wife is sought out among the families of the same social set, and the parents of the future wedded pair arrange all the details nicely and comfortably, and much trouble is thus averted the young people by this simple procedure. The children grow up together, and when they arrive at the ages of 10 or 12, preparations are begun for the celebrations of the marriage ceremony.

Much planning of the wedding gown of the bride is avoided by the simple process of painting her face and the upper portion of her body with a liberal coat of yellow ochre. The rest of her figure is enveloped in two "sarongs," or square pieces of cloth, the upper one coming under the arm pits and over the chest and the lower one wrapped around the hips and coming down to the feet. The "sarongs" are brilliantly covered with native dyes and the more expensive bear designs of much beauty and taste.

As the hour of the ceremony draws near, a richly beaded and embroidered crown is placed upon the bride's head. Hanging down on each side from the crown are long strings of tuberoses, threaded on thin strips of bamboo, reaching to below the waist. The oldest women in the village are selected for bridesmaids, and they deck the bride up in her finery and touch up the yellow ochre with paint brushes wherever the pigment shows signs of wear. The bride is rarely over ten years of age at this time.

Here is an estimate of vessels withdrawn from U. S. commerce since the beginning of the European war: German and Austrian ships interned throughout the world, 3,024 ships, 6,633,000 tons; British ships requisitioned, 2,300 ships, tonnage not known; Russian ships requisitioned, number unknown, but about 500,000 tons. No reliable figures can be gained about the French and Italian ships taken for war use, but the number is known to be large. Perhaps the total number of ships lost to trade is 7,000. To this must be added the vast number that has been sent to the bottom since the war began, about which no figures are obtainable now.

PILES CURED at HOME by New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P, 8, Windsor, Ont.

CURRENT COMMENT

Well, who put the fun in Funston?

Pay your Patriotic Fund subscription.

Premier Asquith must be the smooth talker.

Now, let an ultimatum be sent to Villa.

What does Bernstorff know about the Welland Canal plot?

King Constantine can now blame his wife for his troubles.

Von Papen is just a common criminal refugee from justice.

Some day the Crown Prince will be making a home run.

Few compliments are being paid to the weather these days.

Sir Max Aitken's book "Canada in Flanders" has made a record in this country, over 42,000 copies having been sold.

There will be no four per cent. beer. Two and a half is all that will be given.

How long can Bernstorff keep out of that Welland Canal plot? Did you Papen keep him in the dark?

But how will Germany be able to pay for all these ships she has blown up?

Armed and unarmed vessels all look alike to the German submarine commander.

There are few dogs in Germany. The most of them have been run through the sausage machine.

The Kaiser, to be sure, is under indictment for murder in England. He may yet have to stand trial.

The Chicago packers must have got into the British pork barrel when they got all that money.

The Germans crisis has shoved Villa off the front page of the U. S. newspapers.

Munition factories cannot be too careful as to the men they employ as shell inspectors, watchmen, etc.

We would breathe more easily if we knew that Gen. Townshend and party were quite safe.

If the French have captured the German submarine that sunk the Sussex, President Wilson should put another clause in his note.

Let us hope that Britain's Mesopotamia campaign will not end like the Gallipoli one. The safety of 40,000 men is a stake.

Canada had enlisted on the 15th of this month 309,616 soldiers since the war began. The cry is for more men and the right kind of men.

So, if Bernstorff was caught redhanded with a bomb in his hand to blow up the Capitol, would he be immune from arrest?

S. S. McClure, who has been all through Germany, declares that the German babies are getting all the milk that they can drink. Another German lie nailed.

According to the railway figures just issued by the Department of Railways, the Toronto, Hamilton & Buffalo Railway increased its mileage during the year ending June 30th, 1915, by 14.83 miles.

A French Parliamentarian told the English the other day that they did not get up early enough. Now Halifax, N.S., proposes to put the clock forward an hour on May 1st, and get up an hour earlier.

The New York District Attorney's annual report asserts that men are more criminal than women, bachelors than benedicts, young men than old men, some Italians than some Japanese. It might have extended the comparisons with profit.

We have received from the proprietors of Punch a copy of the edition which was published in New York some months ago by German Americans, containing a lot of old Punch cartoons calculated to cause ill-feeling between the States and Britain. On threat of prosecution, the publication was withdrawn from circulation and the remaining copies confiscated. The copy we received was one of those confiscated.

The German submarine commander's description of the "long black craft without a flag," which he torpedoed on general principles, has recalled the spectre vessels of "The Lay of the Ancient Mariner," to the Philadelphia Record:

At first it seem'd a little speck,
And then it seem'd a mist:
It moved and moved, and took at last
A certain shape, I wist.

A speck, a mist, a shape, I wist;
And still it near'd and near'd;
As if it dodged a water-sprite,
It plunged, and tack'd, and veer'd.

* * * * *

The sun's rim dips; the stars rush out;
At one stride comes the dark;
With far-heard whisper, o'er the sea,
Off shot the spectre bark.

The wood consumed in the United States in the manufacture of paper amounts annually to 4,500,000 tons, and every year the demand for some substitute grows more urgent.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

GLAMIS

Ploughing and seeding has been the order of the day for the past week Weather conditions at time of writing are very unfavourable.

Miss Phylis Moffat has been visiting Major and Mrs. Moffat of Walkerton.

Mr. Duncan Guest of Bervie paid a short visit here last week.

Mrs. and Miss Abell of Cargill were visitors at W. J. McKeeman's over the week-end.

Ptes. Mac. McKinnon and John Kitchen have gone to take a course in Military Training School in Walkerton.

Miss Jennie McKeeman who has been training in Wellesly Hospital, Toronto, for past four months is home for a rest.

Miss Florence Clark of Bradley spent the past week with her aunt, Mrs. W. H. McNally.

Mr. McConley is spending this week with his parents in Tara.

Misses Pinkerton of Pinkerton were guests of Mrs. J. D. Robertson last week.

Mr. N. C. McFarlane has been confined to the house the past week with an attack of La Grippe; all hope to see him back to work in the shop soon.

Mr. McDonald of Ripley visited his sister, Mrs. C. McKinnon last week.

Misses Mary Webb and Nettie Gunn returned to Stratford Normal on Monday.

A number of new books have been placed on the Public Library shelves this week.

Miss McCreth, nurse of Kincardine, is in attendance with Mrs. Chas. McKinnon. Mrs. McKinnon's many friends will be pleased to learn she is doing nicely.

Quite a number of the boys of the Tiverton platoon are home for seeding.

Mr. R. J. McNally, a former resident and blacksmith here, but now of Kintore, lost his blacksmith shop and stable by fire. The cause of fire is unknown. His friends are sorry to hear of his heavy loss.

Pte. Clyde McKeeman left for Toronto on Friday where he expects to join the Transports for overseas service.

Misses Alice Coombe and Ena McKenzie of Kincardine were visitors here last week.

Messrs. John E. and Robert McNally of Sarnia and Kintore accompanied their father's remains here on Wednesday from Sarnia.

Farmers! Better count your pigs! One farmer had 11 at night but only 10 in the morning.—Carried away!

Mrs. Kitchen has rented the house and lot two door west of the Post Office from Mr. Wm. McKenzie and is moving in this week.

Mr. John McNally, Sr., aged 93 years passed away at the home of his son, John E. at Sarnia on Monday, April 24th, after a lingering illness. Mr. McNally was a highly respected old gentleman and was a resident here for a good number of years until he left for Sarnia a year ago. His wife predeceased him seven months ago. He leaves four sons to mourn his loss; Wm. H. at Glamis; George of McCauly, Man.; John E. of Sarnia and Robert of Kintore. The remains were brought from Sarnia on Wednesday arriving at Pinkerton Station on noon train. Interment was made in Purdy's Cemetery. To bereaved ones sympathy is extended.

CARGILL

Mr. and Mrs. C. W. Keeling were in Listowel on Thursday.

Mrs. McEllen of Harbour Springs, Mich., and Mrs. Dwaky of Detroit returned to their respective homes on Friday after attending the funeral of their late mother, Mrs. Connors on Tuesday last.

Mr. James Elder was in Goderich one day last week visiting his brother, Robert, who we regret to report is ill.

The autos are once more to be seen on the roads.

Mr. W. D. Cargill, M. P. P., was a visitor in Sarnia last week.

Mrs. and Miss Martin, Mrs. Grice, Mrs. Dietrich, Misses E. Loughleen McCoy, and Messrs Sirrs and Grice were in Walkerton on Friday.

SPARLING—WARNOCK.

On Tuesday of this week a pretty matrimonial event was solemnized at the home of Mr. and Mrs. Wm. Warnock, Albert St., when their youngest daughter, Miss Iris May joined hand and heart with Mr. Roy M. Sparling, also of Goderich, son of Mr. and Mrs. Henry Sparling of Cargill. The ceremony was performed in the drawing-room which was tastefully bedecked with Easter lilies and daffodils. Rev. Geo. E. Ross, B. D., officiated while the wedding march was play by the Bride's sister, Miss Grace Warnock of Thessalon. The event was witnessed by about thirty invited guests who formed a horse shoe of good luck around the contracting parties while the nuptial knot was being tied. The bride wore her travelling costume of navy blue taffeta with hat to match. After congratulations had been offered the newly wedded couple, the company partook of a dainty luncheon and at the conclusion the bride's health was proposed by Rev. Mr. Ross and the groom made a fitting response. The bride was the recipient of many handsome presents, a beautiful bar-pin studded with diamonds set in platinum being the gift of the groom. The pianist, Miss Grace Warnock, received from the groom a pretty pearl brooch. Mr. and Mrs. Sparling's wedding trip included a visit to the bride's sister, Mrs. A. R. Black of Pasadena, California, for which place they left on the 2:35 train, a large company being present at the station to give them a royal send off. The bride and groom have a large circle of friends in Goderich who join in wishing for them a very happy wedded life. The groom is telegrapher for the G. T. R. there and is popular in business and social circles. Roy learned telegraphy with Agt. Clancy and was agent at Pinkerton for some time. We wish Mr. and Mrs. Sparling a long and happy life.

Mrs. Thos. and Miss Bessie Abell spent the week-end in Glamis at Mr. W. J. McKeeman's.

Mr. and Mrs. J. Jacobs and daughter of New Hamburg were visitors at J. Brown's last week.

Mr. Frank Smith of the Royal Bank spent a few days this week in Stratford

Mr. Robert Elder who lived here for some years but more recently of Goderich, died on Monday and his remains were interred in the Anglican Cemetery here on Wednesday. A full report will appear next week.

Mr. Ed. Smith of Toronto is visiting his wife and family at the home of Mrs John Hall, Sr. We regret to report that Mrs. Smith is not in the best of health.

Miss Mary O'Connell was in the County Town on Monday.

Mrs. W. D. and the Misses Juanita and Phyllis Cargill who spent the winter in Toronto returned home on Monday.

The supply of the special edition of 160th Batt. Telescopes has been received and it reflects great credit on the ladies who had charge of it.

Mr. W. L. Keeling of Toronto is spending his holidays with his parents here.

FORMOSA

Ploughing has started and the automobiles have taken to the road. This will be a great summer for automobiles.

There was not very much maple syrup harvested here this year.

Albert and Leo Winterhalt of Preston visited here and in Chepstowe last week and left for home again last Saturday.

The roads were in a bad state but are improving now.

Peter Kubry, Geo. Seitz and Joseph Heuck are in delicate health.

One of Chas. Weiler's best cows had her leg broken last week.

DIED—On Monday last, George, son of Joseph Kraemer, aged 30 years 7 months. The remains were interred here last week.

DIED—Last Thursday, Anthony Massel of Culross, aged 87 years 6 mos. The remains were buried here last Saturday.

Some farmers are busy putting up wire fences.

April was a cold and wet month, we hope May will be better.

Weiler and Son are making improvements in their saw-mill.

Mrs. Tony Schumacher and two daughters of Walkerton are visiting their relations here the last ten days.

RIVERSDALE

Mr. Geo. Benninger returned home after completing his course at the O. A. C. Guelph.

Mr. Wm. McDonald is having his store remodeled and shingled.

While driving to church last Sunday Mrs. C. Brown had the misfortune to be kicked by the horse she was driving. We are glad to state she is getting along nicely.

Mr. Bert Chateau left for Walkerton on Monday where he is employed for the summer.

Mr. A. Heldmiller spent Sunday in Teeswater.

Miss A. Barry has returned after spending her holidays in St. Marys.

Mr. Wm. Heldmiller Sr. spent the week end at Formosa.

Mr. Eugene Dietrich has returned to Grand Valley after spending the holidays at his home here.

Mrs. S. Scharbach has purchased a fine Mason & Risch piano.

A quiet wedding took place at the home of Gilbert Chatreau on Tuesday evening at six p. m. when Miss Susan Chatreau was united in marriage to Mr. James Halliday. We wish them every success and happiness in their new life.

PINKERTON

Mr. Russell Birrell of Toronto is spending a few holidays at his home here.

Mr. Paxton is now employed at the grist mill.

A contest for a centre place which was donated by Miss Lamb is now being carried on in this district under the auspices of the Red Cross Society here.

Miss Alma Reid returned from Harriston on Friday.

A very pleasant evening was spent at Mr. Fred Gibb's last week at which the gramophone figured largely.

A very pleasant social evening was enjoyed by a large number of the members of the Y. P. S. here when they assembled at the home of Mr. A. Pinkerton on Wednesday evening last.

Prayer meeting will be held at the home of Mr. A. Gregg on Thursday evening of this week.

Miss Carlotta Mutrie visited at Mt. Forest last week.

Miss Verna Donnelly and Mr. Gordon Pinkerton returned to Stratford Normal.

Mr. James Thompson was in the village on Sunday in his new Overland car.

HANOVER

Miss Mary Adams who was holidaying in England recently after a year of nursing at Malta, has been sent to France.

Mrs. Frank Cain, whose death occurred near Elmwood last Wednesday was a daughter of Mr. and Mrs. Jas. Bolden of Brant, and was well and favourably known in the Township. She leaves a family of three children.

A pleasant event took place in St. James' church at the close of Evening song on Easter Day, when the president of the A. Y. P. A., Mr. A. V. Cook presented the church members who have enlisted of the congregation each with a Prayer book and New Testament, bound in khaki. The names of the enlisted men are Pte. Geo. Jenkinson, Pte. Thos. Brownlee, Pte. R. Fry, Pte. J. Huenemoerder, Pte. Bert Paterson. The A. Y. P. A. are making a practice of presenting Prayer books and Testaments to all church members who enlist.

A sad death occurred in town on Tuesday of last week when John E. Weis, son of Mr. and Mrs. Samuel Weis, passed away at the early age of, 20 years and 10 months. Death was the result of tuberculosis. Deceased went to Flint, Mich., one year ago and took a position in the electrical works. He became ill in the fall and arrived home in a critical condition. From then until his death he made a brave fight for life but it proved unavailing. Besides his sorrowing parents he leaves three sisters and one brother to mourn his death. Deceased was a bright young fellow and he had many friends

Pte. R. Jucksch is in the hospital suffering from shock from the explosion of a shrapnel shell. He expects to be back in the trenches soon again.

Mrs. Chas. Oppertshauser was drowned while fishing in the Saugeen just South of Hanover on Friday last. Efforts have been made to recover the body by diving but so far it has not been recovered. The water is said to be 35ft. where she went down. Just how the accident happened is not known. Mrs. Oppertshauser had a young girl with her who was minding her baby in a carriage. She told the girl to go on and she would join her in a minute. The girl got tired waiting and returned to find her missing. She leaves a husband and small family.

MILDMAY

Privates A. Schulteis, C. Wendt, E. Harper, N. Kauffman, and C. Schulteis left on Tuesday morning Apr. 25th for Walkerton. Pte. Wendt and Pte. Kauffman are attending the N. C. O. school. Pte. A. Schulteis is one of the tailors and Pte. C. Schulteis is assisting in the baking for the Battalion.

Although the 1st. of May generally stirs up our anglers in the wee sma' hours to catch the speckled ones this year things are very quiet. Well anyway there is hardly any place left to fish in that has not been leased.

Mr. Chas. Wendt made a business trip to Toronto during Easter week.

Mr. Harry Gowdy returned to Listowel on Saturday.

Rev. Mr. Stafford of Elora delivered an unusually fine address on "True Manliness" to men on Sunday evening and also sang one of his popular solos.

Mr. W. F. Wendt and Pte. Stephen Hickling made a motorcycle trip to Harriston on Saturday last.

Rev. J. Burn has been stationed in Mildmay as pastor for the Evangelical Church for the coming year.

The marriage of Doris eldest daughter of Mr. and Mrs. Henry Wiseman of the 10th con. to Mr. Otto Saushu of Berlin took place on Tuesday April 25th. at the home of the bride's parents. The Rev. Mr. Brackenbush officiated. The bride was assisted by Miss Margaret Pinchmier while Mr. Conrad Wiseman, brother of the bride assisted the groom. The happy young couple will reside in Berlin where the groom has a good position in the Overland Sales Co.

Dr. Wilson has purchased an Overland Roadster from the agent P. Reuber here.

Pte. Geo. Helwig left on Monday morning to go to London to take a course which will qualify him for a lieutenancy.

OTTER CREEK

Private Russel Hutton is home at present helping to put in the seeding.

Private G. A. Fenner is engaged in farm work for one month at Mr. August Pletsch's of Brant

Mrs. Heipel and daughter of Clifford are visiting at Mr. and Mrs. Henry Dippel's this week.

By all appearances of the weather we are in for a late spring. A good many people were through seeding last year by this time, while this year some have not started to sow, not being able to get onto the land but if the weather took a change and gave us a few days of sunshine the seeding would be rushed in pretty quick. We hope this may be the case.

GREENOCK

Everybody is busy seeding these days.

Mr. Martin Massel bought a driving horse last week from Mr. George Bruder of Walkerton.

Miss Marie Forsythe of Formosa spent Sunday with her mother here.

Mr. and Mrs. Jake Kraemer attended the funeral of their nephew Mr. Geo. Kraemer at Formosa last Friday.

Mr. Fred and Alex. Kraemer are busy shingling a barn for Mr. Ed. Steiffler of Ambleside this week.

Quite a number from this burg attended the funeral of Mr. Anthony Massel at Formosa last Saturday.

The death occurred on Thursday last of Anthony Massel, an old and respected resident of this section. Although in his 87th year, he had been hale and hearty, and thought nothing of walking a few miles. He was one of the first settlers of Culross. One son and one daughter survive:—John Massel on the homestead and Mrs. G. P. Ernewein of Greenock.

MAPLE HILL

Miss Sara Little of Stratford and Miss Maggie of Barrow Bay spent the Easter holidays at their home here.

Miss Sarah Rae, School teacher of Mildmay, spent Sunday with her aunt, Mrs. Threndyle.

Mr. Wm. Flynn of Hanover is building a driving shed for Mr. Jas. McWhinney.

Mrs. Frank Cain, (nee Miss Sarah Bolden) who is very well and far known in these parts, passed away at her home in Elmwood last Wednesday.

Mr. Stephen Little who has been on the sick list is able to be out again.

Mr. Oliver Inglis made a business trip to Goderich last week.

Mrs. Frank Secord of Meaford has been visiting her parents here.

The Brant Farmers Club intend holding a Patriotic Dance sometime soon. They are following the good example of our girls.

Mr. and Mrs. John Felsing spent Sunday at Mr John White's.

+ + +

Although still in opposition, the Liberals, under Mr. Rowell, actually obtained many reforms in the Legislature this session. This leads the Hamilton Spectator (Con.) to admit that the statement made by a speaker at London that Mr. Rowell was practically leading the Legislature, was more than half true.

NOTICE

Walkerton, May 1, 1916.

I, John Polfuss, Jr., of the Township of Carrick hereby retract any statements that may have been made by me that were detrimental to recruiting and apologize for any words that I may have used casting any reflection on the King's Uniform.

Signed, JOHN POLFUSS, Jr.

COURT OF REVISION

TOWNSHIP OF BRANT, 1916

Court of Revision for the year 1916 for hearing complaints respecting the assessment roll of the Township of Brant will be held at the Township Hall, Brant, on Tuesday 25th day of May at 1 o'clock p. m. By order of Council.

M. A. McCALLUM,
Township Clerk.

NOTICE TO CREDITORS

IN THE MATTER OF THE ESTATE OF JOHN STANLEY REID, Deceased, late of the Town of Walkerton, in the County of Bruce.

NOTICE is hereby given that all persons having any claims or demands against the late JOHN STANLEY REID, who died on or about the First day of February, A. D., 1916, at the Town of Walkerton in the County of Bruce, are requested to send by post prepaid or to deliver to the undersigned Administratrix of the said estate their names and addresses and full particulars in writing of their claims and statements of their accounts and nature of the securities, if any, held by them.

AND TAKE NOTICE that after the 1st day of June, A. D., 1916, the said Administratrix will proceed to distribute the assets of the said deceased among the persons entitled thereto, having regard only to the claims of which she shall then have had notice, and the said Administratrix will not be liable for the said assets or any part thereof to any person or persons of whose claims she shall not then have received notice.

DATED at Walkerton, this 19th day of April, A.D., 1916.

E. C. REID,
Administratrix,
Walkerton, Ontario

The Rexall Store

If there's room for more hair on your head we recommend Rexall "93" Hair tonic.

Drives away dandruff, makes the hair glossy without greasiness, stops the falling out and promote's a healthy growth.

Sold exclusively at Rexall Drug Stores, 50c. and $1.00 bottles.

A. P. SIEVERIGHT

Miss Grace Hogg of New York is visiting at her uncle's, Mr. John Hogg, of Carrick.

Mrs. Peter Bruder and children of Strome, Alberta, visited last week at Mrs. John Kuntz.

Mrs. Glebe and little son, of Hanover, were visitors at Mr. Thos. Cunningham's this week.

Miss Freda McCrum, trained nurse of New York, is spending a couple of weeks at her old home.

Mrs. Gibson removed into her new residential quarters back of the jewelery store on Tuesday.

Mr. Chris Ernest had his thumb badly lacerated by a saw at the Bobbie factory on Tuesday.

Dr. James Morgan of Peterboro visited his mother Mrs. D. Morgan and other relatives here last week.

Miss Norma Smith has accepted a position as stenographer with the Peppler Furniture Co. in Hanover.

Mr. Con. Hossfeld, 14th Con. Carrick, is about the only farmer in this section who has finished his seeding.

Mr. and Mrs. John McNab of Elsinor, motored here and spent the week-end with Mr. and Mrs. Jos. M. White.

A few copies of the 160th Bruce Battalion Number may still be had at Mr. Whitehead's office or the Telescope.

Up to May 14th, marriage licenses will cost $2. After that date they will cost $5. Now, who wants to save $3.

Mr. Mike La France is leaving this week to take a position at Guelph. Mike's many friends here wish him success.

There is always a compensation. Now gasoline is so high mud has made it unfit to run a car upon the roads this spring.

John McLean, Frank Schnurr, J. J. Schumacher, John McCool and Mrs. Crompton are among the new auto owners in town.

Liggett's Chocolates, pure and delicious are received fresh almost every day at all Rexall Drug Stores, the exclusive agents.—A. P. Sieveright.

John Smith, the escaped prisoner from Guelph Prison Farm, was taken from the County Goal to Kingston Penetentiary on Monday.

Mrs. Ramsey, who has been visiting her daughter, Mrs. N. A. Walford returned home to Hespeler on Tuesday, accompanied by her little son.

The Annual Meeting of the Brant Ladies Hospital Aid will meet in the Council Chamber on Sat. May 20th, at 3.30 p. m.—J. A. Rowand Sec.

Dan Kramp offered his services to the Divisional Signalling Corps at Toronto on Tuesday, but was not accepted owing to a slight physical disability.

Mr. C. W. Cryderman, Collector of Inland Revenue, is in Hamilton this week writing on examinations in connection with the work of his department.

You will feel better and live longer if you keep your bowels regular by the occasional use of Rexall Orderlies—15c and 25c boxes at Rexall Stores only.—A. P. Sieveright.

The service in Knox Church on Sunday evening will be in honor of "Mother". The Hymns our mother taught us to sing will be sung and the sermon will be of mother.

Pte. Joe Cain was here on a farewell visit Wednesday before leaving for the Front. Joe has been transferred from the 147th to the 4th Pioneer Batt. which sails shortly.

The name of Eth. Reichenbach, a Walkerton boy with the 34th Batt. in England, was in the casualty list last week as "seriously ill." It is reported that he is down with meningitis.

Probabilities:
June—Dry.
July—Drier.
August—Driest.
September—Driest-est.—Guelph Mercury.

Mr. Richard Lee had word that his brother Arthur was sufficently recovered to return home to Tara from Toronto on Saturday. Mr. Lee is going over to Tara for the week-end to see him.

John, the four year old son of Mr. Adam Seigmiller jr. of Carrick, received a nasty scalp wound as the result of falling off the verandah and striking his head against a stone wall on Friday.

John Rowland, jr., and Clayton Freeman were accepted as members of the Divisional Signalling Corps at Toronto on Tuesday. The boys are back to town for a few days waiting to be called upon.

Mrs. J. S. Reed still has the following household goods she wishes to dispose of, and may be seen at Mr. Vogan's—Parlor furniture, kitchen table, Happy Thought range, electric fixtures couch, toilet set, carpet and fruit jars.

The boys forming the Tiverton Platoon of the 160th Battalion were each presented with a pair of socks by the ladies of the Underwood Red Cross Society. The Bruce Township Council presented each township volunteer with a check as a mark of appreciation.

The Council Will Build New Permanent Road

From Station to Station

Urged by Large Deputation of Citizens, Councillors Decide to Delay No Longer and Will Prepare Proposition to Submit to the Ratepayers of Walkerton.

Citizens who have felt time and again that they were experiencing all the perils of an ocean voyage while travelling from the station in the town bus will be glad to know that at last something is going to be done about it. In response to the representations of a large deputation of business men of the town at Monday night's meeting the town Council decided to put a proposition for a new permanent roadway, from station to station, up to the people. The Streets Committee will first secure information, estimates and advice, after which the Council proposes to submit a by-law to the ratepayers.

Our Awful Roads.

Mr. John Rowland, who headed the deputation, stated that bad roads were the worst knocker any town had. Bad roads were keeping traffic away from Walkerton. Every motorist who went through town spent something. He knew the Council had no money on hand to spend on roads but urged them to issue debentures and build one good permanent road from station to station. Mr. Rowland quoted figures to show that about 15,000 tons of freight were handled in Walkerton the past year. So bad had the station road become that teaming was well nigh impossible. If nothing was done the town draymen threatened to raise their rate 1 cent per hundred pounds. This would cost the merchants of the town about $1200 per year and of course their customers, representing all classes of people would have to pay the shot. Mr. Rowland spoke of good roads he had inspected at Palmerston and other places, and suggested getting Mr. Young, the expert Government road builder up from Guelph for consultation.

Mayor Lippert said the best macadamized roads only last a short time. That was the experience of other municipalities. He had a quotation one time of $40,000 for a macadam roadway from station to station and Durham St. He was prepared to fix the present road but doubted the wisdom of spending a lot of money on a new roadway.

Wm. George said that the Council had promised year after year to do something, but had done nothing. Travelling men remarked every day on the condition of the Walkerton roads. If the town did not do something up would go the freight rate and he could have the council held responsible for any accidents happening his rigs.

Mr. Sandy George pointed out that they used to be able to draw 2½ tons on the station road. Now 1½ tons was the outside limit. The road was getting worse and worse.

Mr. W. M. Shaw said his firm had to pay $23 extra on one item of cartage alone this spring owing to the bad roads.'

Mr. R. Lee, representing Truax & Son, said he did not wish to tell the council how to remedy conditions, but his firm would like to have roads which would carry their teaming.

Mr. R. M. Player, manager of the Walkerton Egg & Dairy Co., said that the condition of the roads was a serious handicap to his firm.

Council will Act

The matter was dealt with by the Streets Committee. Chairman Russell was in favor of committing the council at once to a bylaw. He would not take chances on having the road proposition shelved.

An amendment by Reeve McNab and Coun. Pletsch was passed however, asking the Streets Committee to submit to the council at its next regular meeting, a proposed improved roadway between the two stations with estimates of probable cost, with a view to submitting a bylaw to the ratepayers. The committee was authorised to consult an engineer, if necessary.

Couns. Pletsch and Douglas moved that the poll tax be increased to $5. —Carried.

Town Clerk Collins submitted his report of the Vital Statistics for the quarter ending March 31st:—Births 8, marriages 13, deaths 18.

A Good Move

Couns. McCarter and Leitner had a motion ready, which would provide for the enumeration of the outdoor closets of the town, and for the maintaining of them in proper condition. Coun. McCarter agreed to withhold his motion in the meantime on the understanding that the Board of Health would act shortly in the matter. Mayor Lippert said the Board of Health was about to carry out a number of suggestions made by the District Health officer, Dr. McNally. In case the Board of Health does not act promptly in the matter, it will be taken up by the Council at the next regular meeting.

By-law no 1096 was passed, authorizing the Mayor and Treasurer to borrow $5 000 from the Merchants Bank.

The Council decided to hold Court of Revision of the Assessment Roll on Monday night, May 29th, at 7.30 p. m.

It appears that the price of street oil has nearly doubled since last year. The Council will oil the streets which are petitioned for. Coun. Russell could not see the sense of oiling the back streets and would substitute water for oil claiming that many citizens had no use for the oil.

The Streets Committee recommended that a sewer, petitioned for by Mrs. Schumaker and others, be laid as soon as possible.

160th BATT. NUMBER

A few copies of the Souvenir Number of the Telescope issued by Walkerton Chapter Daughters of the Empire are still available, and may be had either at Mr. Whitehead's office or at the Telescope Office. Ten cents a copy.

Read the ads.

Mr. Thomas Etsell has been engaged as sexton of Knox Church.

Mr. and Mrs. James A. Lamb, of Brant, announce the engagement of their daughter, Norma, to George Lawrence McClennan, of the Bank of Montreal, Sherbrooke, Que., the marriage to take place early in June.

The continuous wet weather, week after week, is becoming a very serious matter for the farmers. They are now several weeks late with their seeding. A good many have not got started yet and those who are most advanced, have the greater part of their seeding to do yet.

TO BE DECORATED

Chester Clendening, a former Walkerton boy, now with a Pioneer Battalion in France, is to be decorated for conspicuous bravery. This news was received here on Monday in a letter from Ed. Erdman to his mother. Ed. says that a Canadian Engineer and four Pioneers, of which Chester Clendening was one, pulled off a daring night stunt in front of the German trenches for which all five are to be decorated. Chester is a son of Mr. W. S. Clendening, formerly Public School Inspector here, but now of Delburne, Alta.

Constable Collins of Kincardine brought down a man named Amos Fritzell of Kinlough to the County Gaol on Wednesday. Fritzell appeared before Magistrate Johnston of Kinlough on a seduction charge on Tuesday and was remanded until the 17th.

Mr. H. Irwin removed his household to Walkerton, where his headquarters in horse-buying have been for some time. It is a decided gain to Walkerton business interests to have an enterprising dealer, such as Mr. Irwin, located there, and a loss to Paisley when he and his estimable wife cease to be citizens of our burg.—Paisley Advocate.

Robert and William Osborne, sons of Mr. and Mrs. Albert Osborne, former residents of Greenock, and later of Bruce Tp., both joined the 160th at Port Elgin, where the family now reside. Both soldiers have received wrist watches from Port Elgin citizens, the presentation being made at their home.

Recently Sergt. Frank Holdsworth visited the roller skating rink at Walkerton. It was on a Saturday night and the rotund sergeant put on a pair of skates. It was his first attempt, and needless to say it took all his agility to keep his feet and at times the skates got the best of him. On Sunday there were a slim congregations at church. On inquiry the pastors found that many of the stay-at-homes had pains in the side caused by the enjoyment of watching Frank skate. He went back at it on Monday night and conquered the rollers as he does everything else he tackles.—Kincardine Reporter

Flowers For Mother's Day.

Cut flowers for Mother's Day, Sunday next, May 14th. Good assortment.—H. M. Norrish, phone 118.

+ + +

Wanted

A household for the Y. W. C. A. Berlin, Ont. Good wages. Apply to Miss J. Rolston, General Secretary.

+ + +

Notice

The Narva Women's Institute will hold their Annual Business Meeting at Mrs. S. Garland's, 12 con. Greenock, on Wed. May 17th. at 2.30 p. m.

+ + +

Paisley Soldier Killed.

A wire received by Mrs. Thos. McGregor, con. 6, Bruce, on Wednesday morning announced that her brother, Thos. Babcock, had been killed in action on April 28th.

+ + +

Collecting Old Newspapers.

The children of the Public School are busy these days collecting old newspapers and magazines to be sold for Red Cross funds. On Saturday last they collected 1100 lbs. Parents and townspeople are asked to co-operate with the children in this worthy work.

+ + +

St. Thomas' Vestry Meeting

Favorable reports of the year's work were given at the Annual Vestry Meeting of St. Thomas Church. The report of the Wardens, Messrs. W. H. McBurney and R. V. Baker, showed a small balance of funds on hand. Sergt. James was appointed lay delegate to Synod at London in June.

+ + +

Left for Rockingham

Rev. L. H. Pletsch preached his farewell sermon at the Evangelical church on Sunday evening. On Monday Mr. and Mrs. Pletsch left for their new home at Rockingham in the Ottawa Valley, accompanied by the best wishes of the congregation here. Rev. J. H. Grenzebach, the new pastor, is expected here from Dashwood before the end of the week,

+ + +

Four Brothers in Ministry

Rev. Thos. Wilson enjoyed a visit this week from his brother, Rev. Wm. Wilson of Saskatoon and together they visited their brother, Rev. J. R. Wilson of Rothsay on Monday. Of five brothers in the Wilson family four are in the ministry. The two not mentioned are Rev. Alex. Wilson of Mandaumin, and Capt. Eric Wilson, who is Paymaster of a Hamilton Batt.

+ + +

Pies for the Soldiers

The men of the 160th Batt. are enjoying a pie treat Wednesday night from the ladies of the surrounding country, through Mrs. M. J. Ramsey. 180 pies were provided for the purpose. Next week the ladies of Walkerton will be called upon for pies, and as there will be several hundred more soldiers in town by that time, the canvassers will depend upon receiving a liberal supply of pies from the ladies.

+ + +

Soldier Hurt

Pte. Jack Morlock was rather badly hurt by the breaking of a scantling with which he and some companions were having a bit of fun at the Exhibition grounds on Monday. At first it was feared that he had suffered an internal rupture and an operation was performed to determine the extent of the injury. He is now making good progress at the County Hospital. Pte. Morlock is a son of Rev. Mr. Morlock, formerly pastor of the Evangelical Church here.

+ + +

Broke His Nose.

Eric Ramsey, son of Mr. and Mrs. M. J. Ramsey, was the victim of a nasty accident while playing baseball on Saturday afternoon. He was catching behind the bat and a backward swing by the batsman caught him on one side of the nose. The force of the blow smashed the cartilage almost to a pulp, although the bridge of the nose was not fractured. For a time it was feared that his eyesight might be affected. On Sunday Eric was operated on at the County Hospital and the injured organ is now making good progress towards recovery.

+ + +

Old Walkerton Boy.

The Methodist Congregation enjoyed an able sermon on Sunday night by an old Walkerton boy, Rev. W. J. Todd of Ida Grove, Iowa. Taking for his text the words, "The Lord hath triumphed gloriously," from the Song of Moses found in the book of Exodus. Mr. Todd, who is a powerful and vigorous speaker, dwelt on the absolute certainty of the divine promise, giving a most helpful and hopeful message. Mr. Todd is the eldest son of a family which has given three sons to the Christian ministry, the others being Rev. T. H. Todd of Niagara Falls, and Rev. Edgar Todd of Queenston. Mr. Todd is spending a few days here with his mother, Mrs. A. Todd, East Ward, while on his way to attend a General Conference of the Methodist Episcopal Church in the Eastern States.

160th BATTALION

Will Not Go to Barrie, But London—Col. Weir Pleased with Local Arrangements.

Lt. Col. Weir expressed himself this week as well pleased with the working out of the arrangements for quartering, messing and drill for the men of the 160th Batt. in Walkerton. The men are in good health and spirits and are getting in some good work these days. Only five men of the entire Batt. are in the hospital and these are all doing well.

The Col. complimented the local contractors on the quality of the victuals they have supplied thus far and the good service they are providing. The 160th has a good line-up of cooks and the culinary dept. is well looked after all round.

There was some talk on the street this week of the Batt. going to camp at Barrie but there is nothing in these rumors. The Batt. will go to London. About the first of the month it is expected they will pull out, although the date is not yet definitely fixed.

Private Gibbons Coming

The Patriotic Campaign Committee has succeeded in securing an exceptionally attractive speaker for the public meeting to be held at Knox Church next Wednesday night, May 17th, in Private Gibbons. Pte. Gibbons was one of the Queen's Own, First Canadian Contingent. He was wounded and taken prisoner at St. Julien, and subsequently spent four months in a German prison camp hospital. He has a thrilling story to tell, and knows well how to tell it. One of the officials of the Association said:—He is the best patriotic speaker I have yet heard.

+ + +

Death of D. A. Allerdyce

Death came to David A. Allerdyce, a farmer of the Elora Road, Brant, on Tuesday night, following a lengthy illness in which he proved a patient and forbearing sufferer. Mr. Allerdyce was a native of Greenock Tp. but had lived on his present farm the last twelve years. Besides his wife he leaves three children, Albert, John, and Emmie, in their teens at home. Joseph Allerdyce living near Hamilton, and F. J. Allerdyce of Cargill are brothers. The funeral is being held on Thursday afternoon from his late residence to Cargill Cemetery. Service will be conducted by Rev. Mr. Holmes of Cargill.

+ + +

Boys were Remanded

Two young lads appeared before Magistrate Tolton last Thursday night charged with the breaking into Mr. Joseph Jones' house, Eastward, and committing the depredations referred to in last week's Telescope. They were sent up for trail before Judge Klein. They appeared before the Judge on Monday morning and both pleaded guilty. The Judge remanded them until next Monday to consider what would be best to do with the young culprits. The Judge may send them to Reformatory, suspend sentence, or hand them over as wards to the Children's Aid Society. Neither of the boys have been attending school lately although they are both under school age.

WANTED

We are in need of a man with canvassing experience, of good reputation to take up the agency for Bruce county to handle our beautiful picture of the "Sinking of the Lusitania." This picture is hand painted on glass, and interlined with Japanese Pearl. Size of picture with rich gilt frame, 28x34 inches. Exceptional opportunity for capable man. This picture is a real seller over 15,000 having been sold in Montreal, for further particulars, address, Harrington & Barrett, 48 St. Alexander St., Montreal.

160th PROMOTIONS

Pte. V. W. Shouldice to be Sergeant of "B" Co.

Sergt. J. Spicer to be Sergeant-Major of "C" Co.

Sergt. Camp to be quartermaster-Sergt. of "C"

Pte. G. Heddon to be quartermaster-Sergt. of "B" Co.

DIED

MOSACK—In Walkerton, on Monday, May 8th, Catherine Mosack, relict of the late Michael Mosack, aged 83 years, 10 months, 11 days.

ALLERDYCE—In Brant, on Tuesday, May 9th, David Allerdyce, aged 46 years, 4 months, and 1 day.

+ + +

BORN

REUBER—In Carrick, on Saturday, April 29th, to Mr. and Mrs. Wm. Reuber, a son.

WRIGHT—In Mildmay, on Tuesday, May 2nd, to Mr. and Mrs. H. G. Wright, a son.

KLEIN—In Carrick, on Wednesday, May 3rd, to Mr. and Mrs. George A. Klein, a son.

CURRENT COMMENT

The Irish Republic had a short but a merry time of it.

Gen. Smuts goes on from victory to victory, with no regrets to report.

Of course Sir Roger Casement can plead brain-storm.

King Constantine seems to be getting it going and coming.

The Germans appear to have taken over the Black Hand business.

The main thing is that Von der Goltz is dead.

The States found it easy to get into Mexico. Will it be as easy to get out?

The only way to stave off conscription in Britain is to enlist voluntarily.

Americans in Germany, as a safety first precaution, might step over into Holland or Switzerland.

As between Roosevelt and Wilson the pro-Germans have not much choice.

Is Sir Roger Casement a British or a German subject? Much may depend on the answer to that question.

The threat to assassinate Spring Rice is what might have been expected. This is not war. It is plain murder.

Now that the Toronto Mail and Empire is beginning to sneer at Britain's part in the war, we might well ask what the censor is doing.

The Irish don't know what they want; but will never be contented until they get it.—Lord Dufferin. That saying may have once been true, but it is not true to-day.

More or less reliable reports come from Berlin that Germany is preparing to make concessions to the United States in the matter of the submarine warfare. But the German press is still hostile in its comments.

Portland, Oregon, has invited Premier Borden to its tenth annual rose festival, when the great Columbia river highway will be dedicated. Along with this information comes the statement that 25,000,000 rose flowers bloom in that city each year.

So far as heard from there are no May day labor troubles in either Europe or Canada. But there are quite a few labor upheavals in the United States and a great labor demonstration was held in New York to-day.

The master cutler at Sheffield writes that 160,000 razors for the use of soldiers at the front have already been received, of which 135,000 have been forwarded after having been put in order by the staff of workmen organized at Cutlers' Hall. Some of the Hamilton barbers have been collecting razors for the soldiers. Have any been sent on?

There are apparently newspapers and newspaper correspondents who have not the fear of the Chief Censor before their eyes. In obeying or disobeying his instructions (and really there have been flagrant disobedience) he has stated that "it is for them to decide whether they prefer to play the enemy's game or the Empire's." We strive to do the latter.

A report from the laboratory of the Inland Revenue Department shows that of 128 samples of butter inspected by the department, 122 samples were genuine, 4 adulterated, and 12 slightly below standard requirements. Of ten samples shown in the Hamilton city market all were genuine, in one water being slightly in excess of the standard. This is an excellent showing.

In the United States note to Britain protesting against interference with the trade of neutrals, the statement was made that the States was championing the cause of neutral nations. In its reply, which was received at Washington the other day, the British Government draws the attention of the States to the fact that "The first act of this war was the unprovoked invasion by the enemy of neutral territory—that of Belgium— which he was solemnly pledged by treaty to protect." How has the States championed Belgium's rights?

THE IRISH TRAITOR.

(Buffalo Express)

It is not probable that Sir Roger had any following in Ireland or could have raised a rebellion if he had succeeded in landing with his cargo of arms. He was never active in Irish politics and had not lived in the country enough to be well-known among Irishmen. Nobody appears to have known that he was a champion of Irish independence until he suddenly turned up in that character in Germany after the present war began. The supposition that he is not mentally responsible has much to support it. Certainly no greater misfortune could have befallen Ireland than the rebellion which he aimed to bring about.

SWEDES HELD IN PERSIA.

(By Times Special Cable.)

London, April 26.—The arrest of four Swedish officers in Persia is reported in an Exchange Telegraph despatch from Copenhagen. It is said Colonels Killander and Pozelius and Captains Angman and Erickson have been made prisoner by Russians near Shiraz.

The Persian gendarmerie is in command of Swedish officers, of whom there are normally 36.

'TWIXT LOVE AND PRIDE

"Well, if they should, it is very unfortunate, because they cannot," returned Frances. "You will have to appear, Milly, so that's settled. And now, whom would you like to look sympathetic about? Mr. Younge, I think it must be you; you have the kindest face amongst us."

"Thank you, Miss Sylverton," said Denzil, stupidly enough. His eyes were fixed on Mildred, and as he looked the picture rose before his mind. Would she ever consent to stand with him? Ah, never!

"I think it is too bad I should monopolize all the good things," put in Mildred, quietly, and with perfect unconcern; "I want very much to be Marguerite in the garden scene, and I will not accept both. You, Frances, or Miss Younge, will answer the purpose admirably."

"Do not waste a good part on me," said Rachel, meekly, but with emphasis—she had not a perfect temper, and since Charlie's defection on the advent of Miss Sylverton had been feeling anything but amiable toward mankind in general. "I know I should make but a sorry attempt at any kind of acting—it is not in my nature." ("Not it," murmured Frances, sotto voce.) "Put me in any minor position, in something not prominent, and perhaps I shall get through without disgracing myself, with a little help from Miss Sylverton. You can act perfectly, I am sure, Miss Sylverton." This very sweetly.

"You evidently think it is my nature," said Frances, with a good-humored laugh. "Well, perhaps it is. Sometimes I fancy I should prove a superb actress, if I had but the opportunities. And—who knows?—it may be that I shall yet end my days on the stage, and look back in coming years on the evening when I was teaching Miss Younge for her first appearance before the British public. Isn't that a touching little idea, Charlie?"

"I don't think so at all," said Charlie, crossly.

"Don't you, really?" rejoined Miss Sylverton, innocently. "Well, for my part, I don't think the stage and the limelights half bad things. But to return to the original subject—Mildred, you must be our Black Brunswicker's love."

"No, indeed, I will not," returned Mildred, with gentle decision; "you shall, Frances, and Charlie or Mr. Blount can be your companion."

"I think the Brunswicker would suit me," put in Charlie, hurriedly, much to Frances' edification. "If you will agree to it, Miss Sylverton."

"Don't you think you are a little fair?" demanded she, with the most provoking air of indifference as to who might occupy the desired position.

"Just as you please, of course," replied Trevanion, huffily.

"Yet, still," went on Frances, seemingly bent altogether on the effect of the picture to the exclusion of all minor considerations, "Mr. Blount may be a little too tall—perhaps after all, Charlie, you will be the better man. Well, now that that is decided, we will proceed. Queenie, get a pencil and paper, and note off what is arranged. Now for number four—King Cophetua and the Beggarmaid. Who will be King Cophetua and who will be Beggarmaid? Nobody can object to the latter character, however ugly it may appear, as the maid afterward became queen."

"Why, I think we have our king and queen ready made," said Mildred. "Here is Queen Mab"—patting her sister's cheek as it leaned against her knee—"and your name is 'Roy,' is it not, Mr. Blount?"

"Yes," answered Mr. Blount, beginning fully to appreciate the delights to be derived from private theatricals—"and that's a capital idea of yours, Miss Trevanion; but I am afraid I shall never be able to look like a king, shall I?"

"Never," said Eddie. "You haven't the smallest touch of royalty about you. You don't look dignified enough. Better let me take your part—I feel as if I could hold it."

"Thanks—you're very kind," said Blount—"but I think I'll stick to it, now that I've got it—that is, if you don't object, Miss Trevanion," turning to Mabel.

"No, I don't object," said "the queen," with a look that expressed more than her words.

"Number five," cried Frances. "Write away, Mabel—we are positively getting on. Now, Miss Younge"—pleasantly—"you really must sacrifice your feelings, and consent to do something for the benefit of society. Will you be Cinderella, trying on the lucky glass slipper? I always think the character a pretty one—and your feet are undeniable. Charlie, you shall try the slipper on, while Eddie, as the prince, stands by to see fair play. Do you give in, Miss Younge?"

"I think not, thanks," murmured Miss Younge, in a tone strangely made up of ill temper and an overpowering desire to show herself off to the best advantage.

"Oh, do!" cried Mab. "It will have such a pretty effect, and you and I, Frances, can stand behind and look spiteful as the wicked sisters."

Thus adjured, Miss Younge, after another faint refusal, consented.

"We must not forget Lord Lyndon, Captain Harvey and 'Sonny' Sunnerly," went on Mab, presently. "They asked so earnestly to be allowed to join that we cannot omit them. Mildred, will you be Enid to Lord Lyndon's Geraint?"

Mildred paused. Denzil, who had not spoken since her refusal to act with him a little while before, moved round uneasily, and turned his great eyes expectantly upon her.

"Yes, if you wish it," she said, slowly.

"Not if I wish it, darling," exclaimed Mabel, gayly; "but, if you wish it—do you?"

"Yes," answered Mildred.

Denzil bit his lip hard, and a sudden passionate light came into his eyes for a moment, but almost directly afterward it disappeared again, and in a minute or two he had noiselessly quitted the room.

"And I will be Vivien to Captain Harvey's Merlin," laughed Miss Sylverton, merrily; "that will be delicious; if his vanity will only permit him to wear the white beard. Nobody can envy me in that part, at all events, as Vivien was such an odious character."

So they ran on, the current of their conversation threatening never to run dry, until the dressing-bell rang the knell summoning them to their respective apartments.

"Frances, go up through the school room to my room," whispered Mildred, "and take any dress you see. I shall be with you immediately."

Mabel and Miss Younge had disappeared through the lower part of the hall. Frances nodded, and, moving in the indicated direction, found herself presently in the fire-lit school-room; but, before she had time to cross to the door opposite, which led to the upper parts of the house, Charlie Trevanion was beside her, and laid his hand lightly upon her shoulder.

"Frances," he began, in an agitated whisper, "you did not mean it, did you? Say you did not, or at least promise me you will never think of it again."

"Did not mean what? Think of what?" asked Miss Sylverton, facing round and opening her large eyes surprisedly.

"Why, what you said about doing Vivien to Harvey's Merlin. Of course I know you did not really mean it—that you only said it to tease, but I want you to say so. If I saw you sitting at that fellow's feet—"

A pause.

"Well," said Frances, "go on. You have evidently something else to add. If you saw me sitting at that fellow's feet—"

"But you won't, darling—will you?" inquired Charlie, coaxingly, speaking with eager unhappiness, and wisely refusing to complete the threat conveyed in his former speech. "You will not make me miserable for such a cause. If you have the slightest feeling or even friendship for me, you will give up the idea—you will promise me never to think of it again."

"And if I do give this promise?" asked Miss Sylverton, softly. She was experiencing a slightly subdued sensation, born of the deep anxiety expressed both in his tone and bearing. Her usual perversity had deserted her in this her hour of need, and she found herself nearer to acknowledging a master than she had ever found herself before.

As the half-concession left her lips, Charlie Trevanion uttered an exclamation of delighted surprise, and, thus far emboldened, passed his arm around her waist.

Raising her hand to prevent this act of oppression—only to have it imprisoned and held fast—Miss Sylverton, with a sigh that plainly intimated how tyrannical she considered the entire transaction, resigned herself to her fate.

For a few minutes neither spoke, and then Charlie said, tenderly:

"I wonder when it was that I first began to love you? Oh, you remember, Frances? Or was it that I never did begin—that my love for you has ever been a part of my life?"

"I remember all about it," answered Frances, with a faint return to the former archness.

"You do?" he said, smiling. "Tell me, then."

"It was when I was fifteen and you were something over twenty that it all began. Do you recollect one day in the kitchen garden at home, when six or eight of us were together, and having been inclined thereto by some unpardonable impertinence on your part, I raised my hand and boxed your ears? Have you forgotten?"

"No—how is it possible that I should?" said Trevanion, with a laugh.

"Well, that caused all the mischief. Never shall I forget the expression on your face when my hand came down with anything but gentle violence upon it. It was astonishment mingled with awe and admiration. You had no idea that I was capable of so much spirit; and you fell in love with me then and there."

"And have never swerved from my allegiance ever since," supplemented Charlie. "Surely such patience, being a virtue, should have its own reward. Frances,"—with a sudden lowering of tone—"will you tell me now what you have never yet told me, whether you care for me even a little?"

"How can I?" said Frances, provokingly. She had quite recovered from the fit of subjection by this, and sought once more to exhibit her successful powers of teasing. "That would be a most difficult story to tell, because you have never boxed my ears yet, you know, and because—oh, because of many other things. Still"—repentantly—"if it would make you any the happier to hear it, I—"

Sounds in the hall—footsteps rapidly approaching—Eddie's unmistakable laugh.

Frances started violently, and half moved away, while Charlie's arm, which had slightly relaxed its hold, tightened again perceptibly, and he bent his head to a level with hers.

The last moment had come; already as the hand of the approaching visitant all but closed upon the door; for a second longer, Miss Sylverton hesitated, and then Charlie Trevanion pressed upon her lips his first kiss since childhood days.

A few second later Eddie entered.

"All alone, Charlie?" said he.

"All alone," answered Charlie, with the utmost cheerfulness.

CHAPTER XII.

At length the night arrived that was decided on for the representation of the theatricals, and found King's Abbott in a state of confusion impossible and hopeless to describe, the most remarkable feature in the whole case being that nobody seemed in a proper frame of mind, the spirits of all being either too high or too low to suit the part allotted them, so that a sensation of mingled terror and delight prevailed through every dressing-room in the house.

There had been numerous meetings and rehearsals, for the most part pleasurable, although here and there disputes had arisen about trifles light as air, and everything had been arranged as the most approved principles. Nevertheless, even now at the last moment, when all was finally settled, not a man amongst them but felt convinced that he could perform his neighbor's role with greater honor and eclat than his own, and that his talents were miserably thrown away in the scenes assigned to him. However, it was too late now for further alterations or objections, so with the best grace they possessed they made themselves "ready for the fray."

The guests were assembled in the large drawing-room, facing the folding-doors, behind which, in a small back apartment, the stage had been erected. Already were the younger members of the audience showing signs of impatience, when the doors were thrown open, the curtain rose, and in the centre of the stage Mildred Trevanion as Marguerite stood revealed.

Denzil—who had begged hard to be allowed to withdraw from the entire thing, but whose petition had been scoffed at by Mabel and Miss Sylverton—as Faust, and Lord Lyndon as Mephistophles, enlivened the background. Mildred herself, with her long fair hair plaited and falling far below her waist, with the inevitable flower in her hand with which she vainly seeks to learn her fate, and with a soft innocent smile of expectancy on her lips, formed a picture at once tender and perfect in every detail. At least so thought the spectators, who, as the curtain fell, concealing her from view, applauded long and heartily.

After this followed Miss Sylverton and Charlie in the "Black Brunswicker," and Mabel and Roy Blount as Lancelot and Elaine, which, also was much admired and applauded. Indeed, all the "Idyls" passed off remarkably well, save and except that in which Lord Lyndon figured. He had to appear as Geraint, when Enid stands before him in her pretty old-world finery; but, instead of looking, as he should looked, all disappointment and anxiety, for the redundancy of the faded silk, he burst out into an uncontrollable laugh, incited thereto by Eddie, who, with his back well turned to the audience, and a goodly amount of white beard and padding showing, was doing the "heavy father" to perfection.

Then came "The United Kingdom," when Frances Sylverton, as "Ireland," undoubtedly carried off the crown of victory. Perhaps altogether Miss Sylverton might have been termed the great success of the evening, as in all her movements and looks she was one piece of beautiful sparkling life.

The tableaux terminated with a scene from the Court of Louis XIV., the dresses for which, as most of the others, were sent down from London. It was charmingly arranged, and might have been considered faultless but for "Sonny" Sunnerly, who, coming on in frantic haste at the last moment, appeared flushed but complacent, as usual, with his Louis Quatorze wig carefully arranged with the back to the front. This circumstance, in itself so ludicrous, was considerably heightened in effect by "Sonny's" rosy cheeks, which convulsed the beholders, while sending a thrill of anguish largely commingled with hysteria through his fellow-players. However, in spite of this unlucky contretemps, the scene was declared to be most successful, little Sunnerly finishing his part serenely grave and sweetly unconscious to the end.

After the tableaux followed a ball, to effect a change of raiment for which soon caused the rapid emptying of the impromptu theatre.

Denzil, who scarcely felt in humor for balls or any other sort of amusement just then, passed through the library door which opened off the late scene of merriment, and sank wearily into an armchair beside the fireplace.

He was feeling sadly dispirited and out of place, amidst all the gaiety surrounding him; a sense of miserable depression was weighing him down. His one thought was Mildred; his one deep abiding pain, the fear of hearing her engagement to Lyndon openly acknowledged.

For the past week this pain had been growing almost past endurance, as he witnessed the apparently satisfied manner in which she accepted his lordship's marked attentions. He hated himself for this fatuity—this meanness, as it appeared to him—that compelled him to love and long for a woman who showed him plainly every hour of the day how little she valued either him or his devotion. Still he could not conquer it.

As these thoughts rose once more unbidden to his mind and took possession of him, he roused himself determinedly, and, getting up from his chair, threw out his arms with a quick impulse from him, as though resolved upon the moment to be free.

Just then the door opened, and Mildred entered. She came in swiftly, and advanced so rapidly toward the chimney-piece that, until she was within a foot of him, she was not aware of his presence there and acknowledged her surprise by a sudden start and exclamation of alarm.

"I beg your pardon," he said; "I did not mean to frighten you."

Even as he spoke a wild determination to know the worst from her own lips without loss of time seized hold upon him.

"I came for a book," explained Mildred, hurriedly. "Ah, here it is! In the confusion I hardly remembered where I had left it."

"Can you spare me a few minutes?" asked Denzil, without giving himself liberty to think further.

"Certainly," answered Mildred, in a tone of marked surprise. "But do you not think that another time would be more convenient? You see"—glancing at the clock—"how late it is! The ball will commence in less than half an hour, and we shall not be ready."

"I will not detain you long," he said "two or three minutes at the furthest. Indeed a few words will comprise all that I have to say. You must have seen"—desperately—"you must know for yourself——"

"Stay," cried Mildred, faintly—"do not go on! You have said enough—believe me——"

"It is too late now to stop me," interrupted Denzil, passionately. "I must go on to tell you the one thought that occupies me day and night. Now that the time has come, you shall not prevent me from speaking." He paused, and then went on again in a tone completely changed, low and imploringly. "Reject me—despise me, if you will," he said—"only hear me."

To this, although he waited as if in expectation, she made no answer. Perhaps, had she then once more forbidden him, he might forever have held his peace. But she kept complete silence, standing opposite him with folded hands and eyes steadily directed toward his, as though attracted by some magnetic influence.

(To be continued.)

THE CONGESTION FROM A BAD COLD LOOSENED UP IN ONE HOUR

If Rubbed on at Night You're Well Next Morning.

Nerviline Never Fails

When that cold comes, how is it to be cured? This method is simplicity itself. Rub the chest and throat vigorously with "Nerviline." Rub it in good and deep. Lots of rubbing can't do any harm. Then put some Nerviline in the water and use it as a gargle; this will ease the cough, cut out the phlegm, assist in breaking up the cold quickly.

There is no telling how quickly Nerviline breaks up a hard racking cough, eases a tight chest, relieves a pleuritic pain. Why there isn't another liniment with half the power, the penetrative qualities, the honest merit that has made Nerviline the most popular American household liniment.

A large 50c bottle of Nerviline cures ills of the whole family, and makes doctor's bill small. Get it to-day. The large large size is more economical than the 25c trial size. Sold by dealers everywhere, or direct from the Catarrhozone Co., Kingston, Canada.

Could Lift a Ton and a Half.

A Scotchman, said to be the last of the Stuarts, was possessed with an extraordinary strength, from which circumstance he got the byname of Jemmy Strength. Among other feats, he could carry a twenty-four pounder cannon and had been known to lift a cart load of hay weighing a ton and a half upon his back. Many a time he took up a jackass and carrying it on his shoulders, walked through the tollgate.

Pangs of a Snake.

Examine the finest cambric needle under a high power microscope and its point will look rough and blunt. A snake's fang similarly inspected appears perfectly smooth and sharp. In each fang is a groove which connects by a tube with a sort of bag—the poison gland—just beneath the eye. When the snake strikes a muscular contraction simultaneously forces the venom out of the bag through the tube and along the groove into the flesh of the person attacked. Snake poison, generally speaking, has two distinct effects. It destroys in some mysterious way the fibrin of the blood, thereby causing the latter to behave as if diluted and to filter through the walls of the veins and arteries. In addition, it paralyzes the nerve centres and so affects the heart, sometimes bringing death by suffocation.

THE SHORTEST DAY.

(Ottawa Citizen)

Der Tag seems to be the shortest day in the Teuton calendar. It lasted only twenty minutes on this last occasion.

She Did Not Heed the Danger Signals

BUT DODDS' KIDNEY PILLS CURED HER DIABETES.

Mrs. McDonald Might Have Saved Herself Months of Pain, Sleeplessness and Anxiety by Using Dodd's Kidney Pills Earlier.

Grand Narrows, Victoria Co., N. S., May 8.—(Special.) That Dodd's Kidney Pills will cure kidney disease in its worst form is evidenced by the case of Mrs. Roderick McDonald, an estimable resident of this place. Mrs. McDonald suffered from diabetes for two years, and found her first relief in Dodd's Kidney Pills.

"I am sure I would be in my grave to-day but for Dodd's Kidney Pills," Mrs. McDonald states. "The doctor attended me for five months for diabetes, but I was worse when I stopped taking his medicine than when I started. I could not get a wink of sleep.

"As soon as I started taking Dodd's Kidney Pills I fell into a solid sleep for one hour, and soon I got so that I could sleep fine.

"Dodd's Kidney Pills have done so much for me that I feel like recommending them to everybody."

Mrs. McDonald states that her earlier symptoms were shortness of breath, dizziness, backache and a bitter taste in her mouth in the morning. All these are symptoms of kidney trouble—danger signals that no one can afford to neglect. Had she heeded them and taken Dodd's Kidney Pills she would have saved herself months of pain and anxiety.

ANTIQUES

The word "Nankin" is a name so long associated with pottery ware that it may justly be claimed as an antique. To many the name would have significance only in regard to color, the Nankin blue of the Oriental potter, the "tender azure of a sky just washed by gentle April rains," as Longfellow so beautifully describes it; to others it would mean the rice-bowls, the ginger-jars, and the miscellanea of the Celestial home.

Nankin porcelain, and Nankin blue have been names to conjure with in the centuries from the tenth onward, not only so long as they remained exclusively Oriental products, but long afterwards, when the Delft wares of Holland were made in such vast quantities as reproductions. The large trade in porcelain between China and Europe was first begun in Holland. Patterns of the blue willow, blue Nankin and the blue onion—later called the "Danish"—were the order of the day, in its first period of its introduction, and it is worthy of note that these same designs are popular decorations to this day.

About the middle of the seventeenth century the Chinese were rigorously pushing their trade with Europe, and had then realized the necessity of providing articles and forms appropriate to the manners and customs of western life. Prior to this time, plates were made like saucers and cups were without handles, and such articles as tureens, vegetable dishes, sauce boats, rim plates and handled teacups were unknown to the Oriental, and must of necessity be provided if the volume of trade was to be increased, and the hold upon European markets maintained.

Applied embossments, to serve as handles and knobs, took a definite form: tureens were fitted with masks and grotesque heads of animals for these purposes; cups, jugs, etc., received handles formed like twisted branches, springing from the body and continuing in foliated sprays over the surface, forming more or less ornamental designs, sometimes to be carried further by other methods of decoration.

The Nankin porcelain originated in the town of King-te-Chin, in the Province of Keang-Su, and obtained its name from the fact that the shipping port of this district was Nanking.

King-te-Chin had been the chief centre of the porcelain trade for many years. The importance of the city and the extent of its porcelain industry may be guessed from the fact of about one million people being employed, and three thousand firing kilns being operated. Longfellow thus writes of it in his "Keramos":

"And, birdlike, poised on balanced wing,
Above the town of King-te-tching,
A burning town, or seeming so,
Three thousand furnaces that glow
Incessantly, and fill the air
With smoke uprising gyre on gyre,
And painted by the lurid glare
Of jets and flashes of red fire."

EYES OF THE DEER.

An Incident That Spoiled a Hunter's Pleasure in the Chase.

A Canadian hunter tells this incident of how he once came face to face with his quarry and hadn't the heart to fire: "It was a case of 'buck fever,' such as a novice might experience, for I had been a hunter for many years and had killed a good many deer.

"This was a particularly fine buck that I had followed for three days. A strong man can run any deer to earth in time, and at last I had my prey out. From the top of a hill I sighted him a few miles away. He had given up the fight and had stretched himself out in the snow. As I stalked him he changed his position and took shelter behind a bowlder, and, using the same bowlder for a shelter, I came suddenly face to face with him. He didn't attempt to run away, but stood there looking at me with the most piteous pair of eyes I ever saw.

"Shot? I could no more have shot him than I could have shot a child. Had the chance come from a distance of a hundred yards I would have shot him down and carried his antlers home in triumph, but once having looked into those eyes it would have been nothing less than murder. I have hunted deer since then but I find the sport affords me little pleasure. Whenever I draw a bead the picture of those mute, appealing eyes comes before me, and though it has not prevented me from pulling the trigger, I have always felt glad somehow when my bullet failed to find its mark."

Minard's Liniment, Lumberman's Friend.

Blobbs—Has that fellow Bigheddo much popularity? Slobbs—Tons of it, but unfortunately it begins and ends with himself.

HAVE YOU A BAD SORE?

If so, remember these facts—Zam-Buk is by far the most widely used balm in Canada! Why has it become so popular? Because it heals sores, cures skin diseases, and does what is claimed for it. Why not let it heal your sore?

Remember that Zam-Buk is altogether different to the ordinary ointments. Most of these consist of animal fats. Zam-Buk contains no trace of any animal fat, or any mineral matter. It is absolutely herbal.

Remember that Zam-Buk is at the same time healing, soothing, and antiseptic. Kills poison instantly, and all harmful germs. It is suitable alike for recent injuries and diseases, and for chronic sores, ulcers, etc. Test how different and superior Zam-Buk really is. All druggists and stores at 50c. box. Use also Zam-Buk Soap. Relieves sunburn and prevents freckles. Best for baby's bath. 25c. tablet.

Spring.

When is it spring? When spirits rise,
Pure crocus-birds, where the snow dies;
When children play outdoors till dark;
When the sap trickles up the bark;
When bits of blue sky flit and sing,
Playing at birds—then is it spring!

When is it spring? When the bee hums;
When through the open window comes
The breeze, and summer license claims
To swing and toss the picture frames;
When the walk dries; the robins call;
The brown hens doze by the sunny wall,
One foot drawn up to warm, or sing,
With half-filmed eyes—then is it spring!

Nay, each night prove a treacherous sign;
But when old waters seem new wine;
When all our mates are half divine;
When love comes easier than hate;
When we have no more shrugs at Fate,
But think sometimes of God, and late
Our swiftest serving seems to be;
When bright ways numberless we see,
And thoughts spring up, and hopes run free,
And wild new dreams are all on wing,
Till we must either fly or sing
With riotous life—be sure 'tis spring.

—Edward Rowland Sill in Philadelphia Record.

Minard's Liniment used by Physicians

THE FUTILITY OF KNOWLEDGE.

(Judge)

"You can't make me believe a college education gits you anything," says the young man who had won two medals for fox-trotting.

"Still I always thought college fellows was awful swell," replied the girl.

"Nothin' doin'! We got one of them in our office that always says 'whom' and 'notwithstanding' and say, I heard the boss 'callin' him down' to-day the worst I ever seen. What's the use knowin' them kind of words if you can't talk back?"

At the Yarmouth Y. M. C. A. Boys' Camp, held at Tusket Falls in August, I found MINARD'S LINIMENT most beneficial for sunburn, an immediate relief for colic and toothache.

ALFRED STOKES,
General Secretary.

THE CURIOUS BANANA TREE.

A Plant That Will Practically Grow While You Wait.

If a good sized, healthy banana tree is cut off a few feet above the ground during the wet season the trees will not die, but nine times out of ten will send up a new shoot from the centre of the trunk and will grow fast enough to make up for lost time, for within forty-eight hours it will rear waving green leaves triumphantly above the severed trunk.

The secret lies in the fact that the trunk of the banana tree is not hard and woody like other trees, but is really composed of undeveloped leaves wrapped tightly together in a spiral form. When the tree grows these rolled up leaves push upward and merely unroll. Thus no time is lost in forming buds and growing leaves as to ordinary trees. When the trunk is cut off it doesn't interfere with the growth of the leaves, because they are always pushing up from the centre of the stalk. If you will roll a sheet of paper tightly and push against one end you will see exactly how the leaves are pushed up from the trunk of the banana tree, and if you cut the roll in two you will find that it doesn't prevent you from pushing out the centre of the roll as before.

Although the banana tree repairs an injury so rapidly and well, the shoot formed from the cut stalk seldom bears fruit or flowers. As these shoots are taller and stronger than the original trees, however, they are much better adapted to withstand wind and storms, and the natives frequently cut the banana trees in order to force them to produce the strong, fruitless growth and to serve as windbreaks for other crops.

Ask for Minard's and take no other.

COMPLIMENTARY.

(Boston Transcript.)

He—But I asked you, dearest, to keep our engagement a secret for the present.

She—I couldn't help it. That hateful Miss Oldum said the reason I wasn't married was because no fool had proposed to me, so I up and told her you had.

IS YOUR WAGON LOPSIDED?

Have worn axles made the wheels all out of gear? You could have prevented that condition—and you can still help it with

MICA AXLE GREASE

The mica does it. It fills the worn pores of the axle. Won't gum. Kills friction.

WANTED—GIRLS OF GOOD thus to train for nurses. Wellandra Hospital, St. Catharines.

Cleanliness in Persia.

The Persian spends hours in the "hammams" (Turkish baths), which are very handsome buildings decorated with tiles and embellished with numerous exhortations as to the value of cleanliness. The smallest village in Persia has its hammam and bathing is almost a religious function. When the hot room and massage are finished the Persian is shaved, and the whole top of his head is likewise shaved, though the hair over the ear is left and allowed to grow down to the neck. This strange coiffure has a religious meaning, as the two locks are meant for the angel of death to hold when he carries the believer to paradise.

Keep Minard's Liniment in the house

IF THEY DON'T DISAGREE.

(St. Louis Post Dispatch.)

"It takes two to make a quarrel."

"Yes, and very often it takes a jury to settle it."

NEW STRENGTH IN THE SPRING

Nature Needs Aid in Making New Health-Giving Blood.

In the spring the system needs a tonic. To be healthy you must have new blood, just as the trees must have new sap to renew their vitality. Nature demands it, and without this new blood you will feel weak and languid. You may have twinges of rheumatism or the sharp stabbing pains of neuralgia. Often there are disfiguring pimples or eruptions on the skin. In other cases there is merely a feeling of tiredness and a variable appetite. Any of these are signs that the blood is out of order—that the indoor life of winter has lessened your vitality. What you need in spring is a tonic medicine to put you right, and in all the world of medicine there is no tonic can equal Dr. Williams' Pink Pills. These pills actually make new, rich, red blood—your greatest need in spring. This new blood drives out the seeds of disease and makes easily tired men, women and children bright, active and strong. Mrs. Eugene Cadarette, Amherstburg, Ont., says: "I suffered for a long time from dizziness, pain in the back and sick headache, and nothing I took did me any good until I began Dr. Williams Pink Pills. These cured me after taking six boxes and I now feel better than I ever did in my life. I had fallen off in weight to 82 pounds, and after taking the Pills I had increased to 1[illegible] pounds."

These Pills are sold by all medicine dealers, or can be had by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Why Boiled Water Freezes Easi

Water which is hot, of course, cannot freeze until it has parted with its heat, but water that has been boiled will, other things being equal, freeze sooner than water which has not been boiled. A slight disturbance of water disposes it to freeze more rapidly, and this is the cause which accelerates the freezing of boiled water. The water that has been boiled has lost the air naturally contained in it, which on exposure to the atmosphere it begins again to attract and absorb. During this process of absorption a motion is necessarily produced among its particles, slight certainly and imperceptible, yet probably sufficient to accelerate its congelation. In unboiled water this disturbance does not exist. Indeed, water when kept perfectly at rest can be reduced several degrees below the freezing point without its becoming ice.

NOW'S THEIR CHANCE.

(Browning's Magazine.)

"And so you are convinced, friend," asked the curate, "that this is a place of eternal punishment?"

"I am," replied the uncharitable parishioner. "There's nothing in this world bad enough for some people."

What Does Your Food Cost? You could easily spend two dollars for a meal and not get as much real, body-building nutriment as you get in two **Shredded Wheat Biscuits**, the food that contains all the muscle-making material in the whole wheat grain prepared in a digestible form. Two Shredded Wheat Biscuits with milk or cream will make a complete, perfect meal at a cost of not over five cents. A food for youngsters and grown-ups. Eat it for breakfast with milk or cream; eat it for luncheon with fresh berries or other fruits; a perfect meal for the Spring days.

Made in Canada.

Dr. Osler's Optimistic Outlook on the War

(By Edward Marshall.)

London, March 15.—Sir William Osler, among the greatest of the world's medical and surgical authorities, as famous in America as he is eminent in Europe, not only has watched the war from London and the quiet of the university town in which he lives, but has visited the war-zone hospitals in France, has studied the transportation of the wounded, has regarded the injuries and illnesses of the great conflict with expert, sympathetic eyes, and he is as keen a philosopher as a physician. So the interview which follows may be regarded as one of the most notable to grow out of the war.

He sees the war with eyes more sorrowful than they might be if he did not so much believe in youth. It is the youth of Europe which is dying in the struggle, as it always is the youth of nations which is wiped away by war. That hurst him.

"I don't know much about the fighting side of it," he said, despite his visits to the front. "But I am proud of what my countrymen, the English and Canadians, have accomplished.

"When one remembers that in one short year the British Army was expanded from 200,000 men to two-and-a-half or three millions, the achievement must seem wonderful. And the achievement of my countrymen is not more marvelous than that of France.

"The handling of the sick and wounded by all the Allied nations has been extraordinary from the start. The fact that nearly all the fighting has been done in thickly populated country highly cultivated and therefore fertilized for many years, and thus inevitably thoroughly infected with septic germs, especially with the so-called 'gas baccilus,' (producing so-called gas-gangrene), has made the problem very difficult.

"This bacillus, like the germ of tetanus, will be found in all highly cultivated lands. It was discovered by Walsh, of Johns Hopkins, and infection from it forms one of the great problems of the war.

EVERY WOUND INFECTED.

"Practically every shell and shrapnel wound in this great conflict is infected when it reaches the base hospital, despite every precaution which modern science has devised. The majority of rifle-bullet wounds are not infected. Shell and shrapnel usually carry foreign substances into the wound they make, as bits of clothing or surface of the skin dirt.

"Some advances have been made in treatment, principally through thorough washing and free tissue drainage so that a surprisingly large number of infected men are now recovering.

"One of the most surprising records of the war is that of the large number of sufferers from chest wounds who have finally recovered. In the American Civil War the man who had been shot through the lungs was usually looked upon as hopeless.

"In this war the majority of victims of the sort get well. Some remarkable recoveries are of record even where the hemorrhage into the lungs from bullet wounds has been extensive. High velocity bullets which pass through the lungs are very rarely fatal unless they puncture some big artery. They are likely, especially at long range to sterilize their own wounds through sheer heat. Shell and shrapnel do not do this.

MEDICAL SIDE OF THE WAR.

"Considering the war from the medical, rather than from the surgical side, we find astonishing small percentages of sickness from the several so-called 'camp fevers.' Inoculation and careful regard for purity of water supply has made typhoid almost a negligible quantity in this war, although the region of conflict in Flanders is badly infected.

"Now, too, for the first time in a great war, medical science recognizes the great peril of the fly and fights it with intelligenbe. The fly's work in the American-Spanish war was terrible. If my memory serves me rightly there were twenty thousand cases of typhoid, then, among 105,000 men.

"In this war, speaking broadly, there in the west is practically no dysentery, typhoid or cholera, although typhoid has struck hard in the eastern theatre.

"No achievement of this war of mighty armies has been more remarkable than that of the departments which care for the wounded. Here advance has been as great as that in the calibre and range of the artillery.

WOUNDED WONDERFULLY HANDLED.

"Perfect organization begins upon the very battlefield, where first-aid treatment has been notably developed since the days of the American Spanish war. Hospitals at which the wounded men are further treated, and, especially, are sorted, are close or the firing-line. Those of the French, especially, are perfectly equipped with flying ambulance corps of motor vehicles which get the wounded first to these field hospitals, and, later, from them to the railheads, whence they are distributed among base hospitals. Everything of this sort is done very competently, I fancy, by all the fighting armies, although, naturally, I am familiar only with the work of the French and British medical departments.

"This minute and efficient care for the war's wounded is, perhaps, the most amazing feature of the conflict, and next, perhaps, we must rank the celerity with which England, an unprepared democracy, put three million men and more into the field. A similar task took Lincoln longer in the American civil war days, but, of course, speed facilities had not then reached that high stage of development which characterizes them to-day.

"The only good things about war are that it calls for general self-sacrifice, that it brings out courage and endurance, and that it powerfully develops individual initiative.

"Four or five months' service, if it does not kill a man, or wound him, or infect him, will send him home a different individual and perhaps a better man. This is not an argument for the existence of great armies in peace-time, for peace-time military training does not bring about the same results.

WHAT WAR TRAINING DOES.

"The betterment is not purely or even mainly physical; it is principally psychological.

"The millions under arms are not fighting for themselves; they are fighting for their imperilled countries; they are thinking not of fame, but of the threatened future of their flags and their posterity, not of money, but of principles. That helps.

"The British Empire has lost terribly of money and lives, but it has gained enormously through the cementing of its varying and widely separated people by the sense of common danger and a newly wakened patriotism."

I asked Sir William to discuss the future.

"I am not a pessimist when I regard the future," he answered, "although no one could be more entirely conscious of the horrors of this war.

"But the vast tragedy of it cannot be denied, especially by any man who has made the welfare of the race his study. It is a cataclysm.

"If we win, and we must win, the fact that thousands have been brought across the seas to fight will make a different, a broader and a better people of us, as a whole.

"The trump card in this struggle will be found to be the British navy. I am sure and its triumph at the game will knit the British people very closely into one great whole, while it was not impossible that, until this war came, the bonds which bound them had been somewhat loosening.

"The women are as firm as the men in their determination that our cause must triumph. The English have a wonderful reserve. We do not wear our hearts upon our sleeves. British self-control has ever been the best of British qualities and this war has increased it wonderfully.

"Some concerted effort, I am told, already has begun to get women to the colonies. It is not improbable that restrictions may be placed upon male emigration. Such a course would be unpopular in our great Dominions, but may be wholly necessary.

"Nature even does far better than we think she will in cases of emergency. She always finds for ills new remedies which are likely to escape the prophecies of the philosopher in his easy chair.

"The entrance of women into industry may be good or may be bad. In certain sections of the north women have gone far too numerously into factory work. To put the young or the prospective mother on a bench at a machine at factory labor is unprofitable business, but if the war makes men so valuable that in England they will wholly leave domestic service, and get at hard, outdoor work, the general result can but be helpful.

MEN DOING WOMEN'S WORK.

Why should this club, for instance, have, as it did before the war began, forty or fifty strong young men at work which might as well be done and now is well done by women? The elimination of the men from work which can be done by women is sadly needed in this country. Perhaps the war will bring about the needful change.

"If the indoors work should be monopolized by women while the war is on, they should do it well, and if the outdoor life of soldiering should make the men who used to do that indoor work unwilling to return to it when the end comes to the war, would it not be reasonable to suppose that, seeking out-door lives, they might do something to see to it that the waste land of this kingdom is made productive for the future?

"That would be a great advance, I believe in the suggestion that each waste acre should be heavily taxed. In the United Kingdom there are millions of quite useless acres which, instead of lying idle, should be closely cultivated.

"But war will have its very bad effect on matrimony, and that must strike at the very foundations of the race. We cannot get around the argument that the next generation will show far larger ratios of unmarried women.

"This will increase enthusiasm for the preservation of infant life. A good movement to that end already is well under way throughout America. It is gradually taking hold in England. That will tell.

"I am striving hard for optimism, you will see, although the facts more easily might give a text for pessimistic forecasts of the future. History, however, shows that pessimistic forecasts never have been fully realized when dealing largely with the race.

"My hope is that this war means that autocracy and everything it stands for is now in its last ditch.

"If it should prove to be the contrary, a victory for autocracy, if France and England should be vanquished, no one would be left to carry on the battle but the great inheritor of the ideals of self-government, the United States.

"America must face and realize that fact. If Germany wins, this country, England, would not be fit to live in. Nor would America, ere long, unless she made a wining fight against our conquerors."

I asked Sir William what effect he thought the war would have on scientific progress as a whole.

"Of course the world must lose in science through diversion of the minds and efforts of the Germans from constructive work to that of pure destruction," he replied. "But in this I hope America will find her greatest opportunity and by redoubled efforts enthrone herself upon an even higher pinnacle than that which she has occupied, rendering even greater service to the world than she has done before.

"If we compare the days of civilization with the total of the days since we have been on earth, we find we are contemporaries of the Pharoahs, and man has been a fighting creature all that time!

"But only within our day have we really begun to penetrate the secrets of old Mother Nature. See what has happened in the memory of the present generation! May we not, therefore, hope? Must we not admit that notwithstanding the great war humanity's real outlook never was so bright?"

Beautiful Blue Lake.

Perhaps the most striking instance to be seen in the whole world of the wonderful apparent coloring of bodies of water is the marvelously beautiful Blue Lake in Switzerland. Encompassed on all sides by lofty mountains, their lower ranges luxuriantly clothed with verdure down to the edge of the water and adorned with many fine forest trees, while their higher acclivities are garbed in a mantle of eternal snow, the little lake nestling in its deep, hollow basin, is quite startling in its singular and strange beauty. The water, although really pure and colorless, appears to be of a most intense sky blue. And its transparency is so remarkable that a small coin dropped into the water in the centre of the lake reaches the bottom, apparently more than a hundred feet beneath.

Garden Fete Frock. Handsome summer frock for festive occasions, fashioned of exquisitely embroidered batiste.

The Mother's Lament

(By F. G. H. Pattison, Winona, Ont.)

I did not raise my boy to be a colonel
  But had I known how simply it were done—
No need to face the murd'rous foe infernal
  Nor rush to slay the sanguinary Hun.

No need to flay the hide from off the Kaiser
  Nor pull his teeth out slowly one by one —
If I had only been a little wiser
  And "savvied" how to train my only son.

I could have raised my boy to be a colonel
  And kept him far from either shot or shell
He would have had a cinch on life eternal
  And drawn a double salary as well.

Entirely freed from all my fears maternal
  And only proud of duty nobly done
I would have raised my boy to be a colonel
  Of course I mean an "honorary" one.

I would have raised my boy a gallant colonel
  His form with weapons splendidly arrayed
His portrait in this fine old family journal
  A-leading of his men to church parade.

Oh! why did not a government paternal
  Explain to me just how to play the game?
I could have made my boy a bang-up colonel
  And held him to my apron just the same.

When colonel-making comes to be diurnal
  Colonels in bunches everywhere will stand
When every mother's boy is raised a colonel
  Will happiness then reign throughout the land?

Seed Potatoes

The man who grows good potatoes when potatoes are needed is a public benefactor.

According to present production and consumption in Ontario, from twenty-five to thirty people, or from five to six families, are supplied with potatoes for one year from each average acre of land which the farmer plants with this crop. An increase of fifty per cent, in yield would mean an increase in the amount of potatoes produced on each average acre of land sufficient to supply about one dozen people for twelve months. In most years Ontario imports potatoes from the Maritime Provinces, and at the present time a part of our supply is coming from the Provinces of Alberta and of British Columbia. Ontario is well adapted to the production of potatoes of excellent quality, and should supply at least her own demands.

The potato crop of Ontario could be decidedly and economically improved by a more general use of pure, well-bred seed of a few of the best varieties, by the adoption of better methods of culture, and by a more complete control of insects and diseases. It should be the aim of every grower to produce large yields of uniform potatoes free from disease and of high table quality. Varieties of potatoes differ greatly, not only in yield per acre, but also in freedom from rot and in cooking qualities. For instance, in the trying season of 1915, the varieties of potatoes grown under conditions that were uniform at the Ontario Agricultural College varied in yield per acre from 13 to 366 bushels, in amount of rot from less than one to over seventy per cent., and in table quality from 36 to 83 out of a maximum of 100 points. Some kinds are found to be very susceptible to rot, and others to be almost immune. The table quality of potatoes varies far more than many people realize when mealiness, flavor and appearance of different varieties are taken into consideration and are carefully determined.

In each of four years an experiment has been conducted at the Agricultural College in testing under similar conditions potatoes obtained from different sources. For instance, eighteen lots of Empire State potatoes were secured from eight different sources, five in the Province of New Brunswick and three in Ontario. Seed potatoes grown about one hundred and forty miles north of Guelph in Muskoka district, near the Muskoka lakes, have given a higher yield per acre than those obtained from any other source in each of the four years of this experiment. Seed potatoes grown in a cool, moist climate which prevents maturity are often superior to those which have ripened in a hot, dry climate. Immature seed potatoes are usually inferior for table use, but furnish excellent seed. Potatoes grown in Ontario in a comparatively cold, wet season like that of 1915 are likely to be of good quality for planting, providing they are free from disease. Tubers showing discoloration or signs of rot on the outer surface or when cut should not be used for planting.

There are far too many varieties of potatoes grown on the farms of Ontario. This is one of the greatest weaknesses in the potato industry of the Province. It is a defect that should be remedied as soon as possible. If Ontario would confine herself to a few of the best varieties of potatoes the annual crop would be increased in yield, in quality and in commercial value.

There are over one thousand named varieties of potatoes in North America, and fully four hundred have been grown under experiment at the Ontario Agricultural College. Many of these are quite inferior, even though they have been extravagantly advertised; some are old varieties under new names, and comparatively few are worthy of general cultivation by the farmers of Ontario. If these few were grown, to the exclusion of fully eighty per cent. of the kinds now under cultivation, better results would be obtained, whether the potatoes were produced for home use or for commercial purposes.

Some of the varieties of potatoes which have been prominent in the experiments at the Ontario Agricultural College and in the co-operative experiments throughout Ontario are the Empire State, the Davies' Warrior, the Rural New Yorker No 2, the Green Mountain and the Carman No. 1, of the late, and the Extra Early Eureka, the Early Ohio, and the Stray Beauty or Bliss Triumph of the early varieties. In appearance there is a similarity between the Green Mountain and the Delaware varieties, and also between the Extra Early Eureka and the Irish Cobbler varieties. In the experiments at Guelph, however, the Green Mountain and Extra Early Eureka gave the best results in yield per acre, in table quality and in freedom from rot. The three varieties of potatoes which have made particularly good records in the co-operative experiments throughout Ontario in productiveness, table quality, and popularity with the experimenters are the Davies' Warrior and the Empire State of the late, and the Extra Early Eureka of the early varieties.

In the average results of all the varieties grown in the years 1905, 1906, 1910 and 1915, in which there was more or less rot in the potato crops at the college, the Davies' Warrior, the Extra Early Eureka and the Stray Beauty produced the smallest, and the Early Rose, the Beauty of Hebron and the Early Ohio the largest percentages of rotten potatoes of all the varieties grown under uniform conditions.

It has been found to be good practice to use smooth, well shaped, sound tubers of good size and of the best varieties. These can be cut by hand into sets from one to two ounces in weight, each set containing two, three, or, even better, four eyes. It is an advantage to throw the freshly cut potato sets into finely ground land plaster, and to plant them immediately after being cut. Good results have been obtained by dropping the pieces separately from twelve to fifteen inches apart in the rows, and by having the rows twenty-eight or thirty inches apart. The potato sets can be planted from three to five inches deep, depending upon the character and the condition of the soil. Level cultivation frequently gives the best results on a light soil, and ridged cultivation on soil of a heavier nature.

It is often an advantage to expose whole seed potatoes in a subdued light in a warm room about three weeks before planting. Especially is this true if the potatoes are to be grown for early use. The production of short, thick, green sprouts before planting helps to hasten the growth and to increase the yield.

CANINE SLAUGHTER.

When Dogs Threatened Paris During the Reign of Terror.

It is a curious fact that the French capital was once threatened by a horde of hungry dogs. This event was associated with many other and more startling signs of the reign of terror. It was due to a very ntural cause. The greater part of the aristocrats who had fled or who had gone into hiding kept dogs, and very few were able to make arrangements for the care of their animals when they hurriedly left their homes.

The dogs, abandoned, took to the streets and shortly they began to congate in two packs, one occupying the Champs Elysees and one the Bois de Boulogne. Soon they became a public danger, as is evidenced by the duly recorded fact that Santerre, the brewer, proposed a law that all dogs should be hanged. So, in September, 1793, when thousands of starving animals were seeking subsistence in a city not overprovided with food, drastic measures were adopted against the Champs Elysees pack.

Two battalions of the national guard surrounded the area, leaving a gap toward the Rue Royale, while hundreds of men and boys "beat the cover." The game was driven up to the Place Royale, where troops made a battue of it. Three days consecutively was this repeated, and more than 3,000 dogs lay in the place.

It is said that one Gaspardin, who was ordered to remove the carcasses being short of means to affect this, applied for the royal equipages. To the revolutionists this appeared a timely jest and the application was granted gleefully and with applause. So Gaspardin packed the dead dogs in the gilded coaches and made a state procession through Paris.

Eat Onions.

Regular onion eaters rarely if ever fall ill from infectious diseases, and they are singularly immune from practically all ailments. Onions, too, are a grand specific for the complexion. They should be boiled whole in milk—drink the latter—or steamed and eaten with bread and butter and cheese. Then they make a satisfying and nutritious meal, on which you can do brain work or manual labor. Try onions. The taste and after smell? A mouthful of hot coffee takes away both.—London Fail.

Feathers High in Air

[redacted]

Some of the ladies' hats, gorgeously mounted with birds and plumage, are likely to fall before the huntsman's gun this summer. The turban is of knotted straw, the feather uncurled ostrich.

THE POULTRY WORLD

TURKEY RAISING.

There is no question but that the greatest secret in successful turkey raising is in having strong, vigorous healthy parent stock. If you hatch eggs from this kind of stock the battle is certainly half won. In selecting the breeding stock the best birds are none too good and are the cheapest in the end, as your future stock depends almost entirely on the parent birds. Select a male with plenty of vigor and of good size, but do not use a bird of extreme heavy weight. Select females having long deep bodies, good bone and lots of vigor.

If yearling or two-year-old hens are used as breeders, mate them with a young tom; if pullets are used, select an older tom to head the flock. A good, vigorous tom can be mated with fifteen to twenty hens, but as a rule it is not advisable to mate one tom with over ten or twelve hens.

The care of the breeding stock is the next important step. Much of the so-called bad luck in turkey raising, namely, infertile and soft shelled eggs and impaired vigor, is due to overfeeding. If the birds that have been selected as breeders have been allowed to fatten with the stock intended for market they should be reduced to medium flesh during the winter, as good results cannot be obtained from overfat breeders.

The writer has found oats to be the best food for the turkey hens during the breeding season, and feeds this almost entirely with an occasional feed of wheat or corn. Charcoal, shells and grit are kept within easy reach at all times. Ground bone also is fed, as it has a tendency to make the eggs more fertile. Just before the hens begin to lay, which is about the last of March or the first of April, make nests of straw along the fences in overturned barrels and in secluded places, and use china nest eggs, and usually little trouble will be experienced in inducing hens to lay in the nests provided for them.

The eggs should be gathered every day, kept in a cool place and turned once a day until they are set. It is a good plan to mark on each egg the date when it was laid, as by doing this one knows exactly which eggs to set first. A turkey hen will lay from fifteen to eighteen eggs and then become broody. It is an easy matter to break one from setting if taken in time, and in this way secure an extra batch of eggs, for she will lay again in a few days. I always allow the turkeys to hatch their own eggs although they may be hatched with common hens. The turkey hen seems to understand the weakness of the poults better. She moves about slowly, brooding often, while the chicken hen hustles about so that she soon tires out the tender poults.

If chicken hens are used for hatching they should be set at the same time with the turkey hens, to which all the poults may be given.

I set turkeys in coops and make the nest by scooping out the earth a depth of two or three inches. This prevents the eggs from rolling out and gives the required moisture. I then put in a layer of chaff. As a rule, I set eighteen eggs under each hen. It is a good plan to sprinkle the nest with a good lice powder or lice killer before putting the turkey on the nest. I do not remove the hen to the new nest until she has set two days on the old one, and then carefully remove her at night and place her upon the nest. After the first day I never have any trouble with them about going to their nests. The coops are opened every day and the hens can leave the nest and return at will. Place water and feed where they can get it at any time.

It takes twenty-eight days for turkey eggs to incubate. I never disturb the turkeys during the period of incubation. The poults are not removed from the nest until they are twenty-four hours old; then if the weather is dry they are removed to a coop in the orchard, which is enclosed with a high wire fence. Their coop should be dry and roomy, with a roof to shed the water so that they may be kept there during the severe rainy days. They then get water and grit, and when they are thirty-six hours old and have their first food, consisting of stale bread soaked in sweet milk and squeezed dry with the hand. I mix fine grit and a little pulverized charcoal with this and feed it for several days, after which I take corn bread or johnny cake, made of corn meal mixed with water or sweet skim milk, and a little salt added, and thoroughly baked. This is moistened with milk and mixed with grit or sand and charcoal and given several days. They are fed just what they will eat up at once and none is left to sour. They should not receive sloppy or sour food, as bowel trouble will result. The turkey hens with the poults have the range of the orchard during the day and are driven into their coops at night. If the weather is damp or the grass wet the breed must be kept in, for dampness is fatal to the poults. Turkeys are very susceptible to filth. Coops and feed dishes should be kept clean and the coop disinfected at least once a week.

The poults are confined in the orchard until they are ten days or two weeks old and then they get the range of the farm, but are driven up, and confined in the orchard every night until they learn to come home of their own accord. At this age they are fed cracked wheat and oat groats, but the baked corn meal is continued, alternating the two. Grit is in every feed whether wet or dry, and charcoal at least once a day. When the young poults begin to get their long flight feathers they require extra care and attention. These seem to grow so rapidly sometimes as to sap their vitality, and when they begin to walk around with wings drooped I pull out these flight feathers, which stops all this trouble.

By this time the poults are six weeks old and weigh around two pounds. They are then fed more liberally on grain, and I also keep before them cottage cheese, in which I put a little onion tops chopped fine. After they "shoot the red," at which time the most of our troubles are over, I place clabbered milk where they can get it whenever they want it. It is an excellent food and they will eat large quantities of it. From this time on they are practically given their liberty to roam over field and woods, receiving a light feed of grain at night just before they are shut up. This induces them to retire without any trouble.

Daffodil Time.

It is daffodil time, so the robins all
  cry,
For the sun's a big daffodil up in the
  sky,
And when down the midnight the owl
  [illegible]
Why then the round moon is a daffodil
  [illegible]
Now there to the [illegible]
  [illegible]
So merry, my masters, it's daffodil time!

It is time for the song; it is time for
  the sonnet;
It is time for friends to have a new
  bonnet,
All fashioned and furnished with things
  that are fair,
To rest like a crown on her daffodil hair.
Love beats in the heart like the pulse
  of a rhyme,
So, merry, my masters, it's daffodil time!

It is time when the hills and the vales
  cry, "Away!"
Come join in the joy of the daffodil day!
For somewhere o'er waste, with a glow
  on her face,
With her daffodil smile, and her daffodil
  grace,
There's a lilt in the air, there's a cheer,
  there's a chime,
So, merry, my masters it's daffodil time!
—Clinton Scollard in Judge.

"Did you postpone your sewing bee for bereaved Belgians on account of the bad weather?" "Oh, no; we held it on the telephone."—Omaha Bee.

His Face Was Covered With Pimples.

Pimples are not a serious trouble, but they are very unsightly.

Pimples are caused wholly by bad blood, and to get rid of them it is necessary to purify the blood of all its impurities.

Burdock Blood Bitters has made many remarkable cures; the pimples have all disappeared, and a bright, clean, complexion left behind.

Mr. Lennox D. Cooke, Indian Path, N.S., writes: "I am writing you a few lines to tell you what Burdock Blood Bitters has done for me. Last winter my face was covered with pimples. I tried different kinds of medicine, and all seemed to fail. I was one day to a friend's house, and there they advised me to use B.B.B., so I purchased two bottles, and before I had them taken I found I was getting better. I got two more, and when they were finished I was completely cured. I find it is a great blood purifier, and I recommend it to all."

Burdock Blood Bitters has been on the market for the past forty years, and is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

MY BROTHER ON THE CLYDE.

(A soliloquy by Mr. Thomas Atkins, at the time of the recent threatened tie-up of munition plants.)

I've chucked away me bay'nit an' I'm
  slingin' down me gun,
I'm fed up with the business, and now
  I'm fairly done.
I've tried to work it out all right, so help
  me Gawd I've tried;
Wot's put the kibosh on it is my brother
  on the Clyde.

'E's workin' in a fact'ry an' gits ten bob
  a day,
An' now 'e's downed 'is tools, 'e says,
  an' wants a bit more pay.
'E writes an' says these busy times is
  jist 'is bloomin' chance,
So I've downed tools these busy times—
  somewhere out 'ere in France.

Tuppence more each bloomin' hour is
  wot 'e says 'e'll git;
An' me on one-an'-two a day! Wot o'r
  it's time to quit.
It's just the opportunity, so can't I be
  as wide
As 'im wot wrote this letter 'ere, my
  brother on the Clyde?

Busy times 'e talks about! So help me,
  mate! it's funny;
'E'd stop the guns from barkin' for a
  bit o' lousy money.
It's busy times 'e'd 'ave all right if
  once 'e lets us down—
A-diggin' out 'is family from the ruins
  of 'is town.

I've chucked away me bay'nit an' I'm
  slingin' down me gun.
Two can play that bloomin' game—an'
  in comes Mister Hun;
Then down shuts all the fact'ries an'
  workshops far an' wide,
An' out o' work goes millions—an' my
  brother on the Clyde.

I don't mind all the fightin', or the
  trenches, or the mud,
Or the bitter cold at night-time wot
  [illegible]
[illegible]

I wonder if them chaps at 'ome could
  ever, even dream,
Of wot things really are like 'ere, an' not
  just wot they seem
W'en you reads 'em in the papers an'
  puffs yerself with pride—
I'd like to send a dream to 'im—my
  brother on the Clyde.

The guns are three miles back of us;
  they've got advanced position.
They're not a bloomin' bit o' good;
  they've got no ammunition.
The Germans know it right enough, an'
  then they're four to one,
An' their shells is piled up sky-high at
  ev'ry bloomin' gun.

They're comin' on in thousands an' down
  we go like dogs.
An' there you at the back of us jist use-
  less from logs.
You strikers struck the bloomin' chain
  with which we 'ad 'em tied.
I think 'e'd wake up, then, 'e would—
  my brother on the Clyde.

I've picked me rifle up again: me bit
  of iron, too;
I'm just a common soldier, so I've got to
  see it through.
An' if [illegible]
  [illegible]
Will [illegible]
  my brother on the Clyde.

The Old Wooden Warships.

The modern battleship is supposed to last twenty years. As a matter of fact, its real efficiency as a first class fighting machine is less than half that period of time. Improvements are being made so rapidly and constantly that ships are superseded often after having served only two or three commissions. It was otherwise in Nelson's time. The Victory, for example, was launched in 1766 and was therefore forty years old at the battle of Trafalgar, when she flew the admiral's flag and was accounted quite the finest line of battle ship in the British navy. And her cost, including her armament, was only about £100,000.—London Standard.

How Scott Bore Adversity.

Once when I was staying with Mr. Ruskin he took delight in showing me his Scott manuscript. He took down "Woodstock" from the shelf, and, turning the leaves over slowly and lovingly, he said: "I think this is the most precious of them all. Scott was writing this book when the news of his ruin came upon him. He was about here where I have opened it. Do you see the beautiful handwriting? Now look as I turn over the pages toward the end. Is the writing one bit less beautiful? Are there more erasures than before? That assuredly shows how a man can and should bear adversity."—London Graphic.

Was Not Much of a Believer in Patent Medicines

But Milburn's Heart and Nerve Pills Are All Right.

Mrs. Wm. McIlwain, Temperance Vale, N.B., writes: "I am not much of a believer in medicines, but I must say Milburn's Heart and Nerve Pills are all right. Some years ago I was troubled with smothering spells. In the night I would waken up with my breath all gone and think I never would get it back. I was telling a friend of my trouble, and he advised me to try Milburn's Heart and Nerve Pills. He gave me a box, and I had only taken a few of them when I could sleep all night without any trouble. I did not finish the box until some years after when I felt my trouble coming back, so I took the rest of them and they cured me."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years. The testimony of the users should be enough to convince you that what we claim for them is true. H. and N. Pills are 50c per box, 3 boxes for $1.25; at all druggists or dealers, mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

WALKERTON, MAY 11th, 1916.

MUCH ADO!

The Bruce Times has come across a case of meanness so despicable that it has well-nigh destroyed its broad and generous faith in human nature. 'Twere a pity it were not spared the afflicting sight! It appears that Mr. R. E. Truax M. P. or at least the firm with which he is connected, has been found guilty by the Times of selling sawdust to the 160th Batt, or if not to the Battalion at least to a party who afterwards turned it over to the Battalion. It appears that Mr. Truax's reputation for quiet but open-handed generosity is entirely without foundation. The Times feels apparently that the Truax firm should have given away this sawdust without charge. Why they should not charge for the sawdust in the same way that the Times charges everybody including the 160th Batt. for its job-printing is a matter which is difficult to understand. But it appears to be connected in some way in the Times' mind with the fact that Mr. Truax receives from Ottawa an annual fee of $2500, which our contemporary refers to as "boodle." We presume that Mr. Truax must be a very desperate character indeed or he would have nothing to do with this "boodle." Boodle, we find on consulting the dictionary, is a slang word meaning "money used for dishonest purposes". If what the Times says is true, and of course the Times is always right, Mr. Truax had better hurry up and return the $2500 to Sir Robert Borden, if it is not too late.

With his "boodle" thus cut off, and by adopting the practice suggested by the Times of giving away the product of his planing mill absolutely free. Mr. Truax will be able to prove a case of entire financial disinterestedness, and will be able to live (if he can live without food, clothing, or shelter) "unspotted from the world" and possibly blameless even in the sight of our high-minded contemporary.

EDITORIAL COMMENT

Oshawa Reformer:—The more some people are worth the more worthless they are.

+ + +

To produce something from the soil just now is patriotic. Are you digging your bit?

+ + +

If the upper crust of the Station Road could be removed intact, the Town might sell it to some city amusement park as a bump-the-bumps attraction.

+ + +

"Its strange, but true," says the Guelph Mercury, "that women are not nearly so anxious to go to church the Sunday after Easter as they are on Easter Sunday."

+ + +

The suggestion is made that the Clarksburg Board of Trade offer prizes for the pathmaster who will make the best piece of road on certain concessions leading to the town.

+ + +

As Mr. Henry Coleman, of the Kincardine pork curing house says "years ago if you called a man a 'og he was insulted but now we all 'ave to take our 'at off to the 'og.—Kincardine Review.

+ + +

The Town Council is to be commended for taking up the matter of a new permanent Station road. Nowhere could they spend a bit of money that would bring the town more lasting good.

+ + +

It is interesting to observe that of all the men in field and fleet who were put in high command when the war was declared, only General Joffre and Sir John Jellicoe, the admiral of the British fleet, remain undisturbed today."

+ + +

While the Cargill boys of the 160th Batt. are listed at Walkerton, owing to their having enlisted at the County Town, it must be remembered that the Village to the North of us leads the whole county in per centage of enlistment. All honor to Cargill!

THE BOYS OF THE BRUCE BATT. C. E. F.

They came from the village, they came from the town,
And they came from the farms just outside,—
But wherever they "grow" they are brave men and true,
The boys who are Canada's pride.
And we know that the Staff with its genial O. C.,
And each man in the ranks trim and true,
Will all bravely fight for the Cause that is right,
And show what real soldiers can do
And we're sure that when Fritz sees the Boys from Bruce come,
He will throw up his hands in dismay,
For 'twere useless to fight when such men of might
Are certain to carry the day.
So, Boys, here's Good Luck on your mission o'erseas,
And a safe trip wherever you roam,
And God speed, we pray, the dawn of the day
When we'll bid you a glad welcome home.

Perth.

Telescope Letter Box

Judge Klein Suggests Formation of Bruce County Patriotic League—Interesting Letters from Lieuts. Harold and S. L. Young at the Front.

BRUCE PATRIOTIC LEAGUE.

Judge Klein has addressed the following letter to a number of representative citizens of Bruce County:

Walkerton, May 9, 1916.

Dear Sir:

After the 160th Bruce Overseas Battalion has left the county of Bruce, there will be little or nothing for the Bruce County War Auxiliary to do, and I would respectfully suggest that before the Battalion leaves for training at London, "and when fully mobilized" that a meeting of the prominent men of the County of Bruce be held in Walkerton for the purpose of organizing a Bruce County Patriotic League.

If there is one thing in which we as a county have fallen short, it is perhaps in an organization to help our County. Now, we can do this, and also assist our country as well. For instance the League could very prop- [illegible]

Now, I am sending this circular to 150 men in the county, and if fifty of them reply WITHIN FIVE DAYS FAVORABLY, I will invite all the people in Bruce to assemble for the purpose of taking steps to put Bruce in the front ranks as a county organized for the benefit of all classes in agriculture, industry, education and patriotism. Will you help in this very worthy work? Will you give a day of your time to this proposition? Then notify me by return of mail that you will attend.

Let us as men who have remained "beside the stuff" while our strong sons are fighting for us, seek to make the home county strong in co-operation and help for all classes.

Yours Sincerely,
A. B. Klein,
President Bruce War Auxiliary.

LIEUTENANT HAROLD YOUNG

Mr. Ross Young of Hanover, received a letter last week from his brother, Lieut. Harold Young formerly of Walkerton, written from "somewhere in Belgium." He writes as follows:

"Well, here I am in the thick of it—in fact, it is a little corner of hell. However am getting along alright. I was shelled out of my billet an hour after arriving. One poor chap was killed—had his leg blown off. He was about thirty feet from me. We had to get out and move to billets three miles away, but one gets quite accustomed to shell fire.

I am in charge of a bunch of machine gunners and it is a great work. There is always "something doing." I have the finest men in the world.

Address your mail in future to me, care of 8th Brigade, Machine Gun Co. 3rd Division Canadians, France.

Be sure and remember me to all the boys.

I won't get any leave for three or perhaps six months, but will get hold of some shells, etc. and take them to England with me and send them to you from there. Can't send them here."

+ + +

FROM LIEUT. YOUNG

Mrs. E. J. Skelton had the following lines from Lieut. S. L. Young, a Cargill boy with the 71st in England:—

71st Batt., C. E. F.,
Bramshott Camp.
Hants, England.

We had a very pleasant train trip from Galt to Halifax and our trip overseas was swell.

We came over on the Olympic, the largest vessel afloat, the sister ship to the Titanic. She is a monster, the largest I have ever seen. I thoroughly enjoyed it although the men were none too comfortable.

The last day I was on board I caught a cold and this developed into bronchitis so they sent me up to the hospital to recuperate. I feel fine now.

The English things are different in many ways, but I would feel foolish trying to describe them to you.

When we got here, there was no place to sleep, nothing to eat, and a constant downpour of rain. These combined made it very unpleasant indeed for us. The boys did not grumble or whine and it is so much easier when they take things the right way.

We are now settled and things are going on smoothly. I have seen Lewis Honey and Teddy Kidd since coming over. There are many others here I know.

Truly yours,
S. L. Young.

Pte. Geo. Schaefter, of the 201st Batt. Toronto, visited friends in town on Thursday last. He is well-known here, having been formerly manager of the Mildmay Gazette.

Printing Costs Soar.

St. Thomas Journal: The printing, publishing and kindred trades in Canada are feeling keenly the war's influence on prices of the various supplies used by these industries. Large advances made in the prices of print-papers, inks, etc, since the war began, but present indications are that existing conditions will become much more serious during the present year. The price of newsprint has gone up twenty-five per cent in the past three months and the mills are fighting shy of all new business even at higher prices. Some indication of the trying situation that confronts Canadians mills is to be found in notices sent out to customers this week stating that they cannot undertake to fill orders under ninety days' notice. Formerly only thirty days notice was required. Conditions with Canadian mills supplying the better qualities of bookpapers, cardboards, writing papers, etc., are even worse, and none of these will guarantee future deliveries at definite prices. Prices have been climbing month after month, and in many items are practically double the ruling prices of two years ago. Even the higher grade writing papers, that cost at the mills 20 to 30 cents a pound normally are up to 45 cents. Unlike most lines of business where the burden of increased costs is promptly shifted to the consumer, publishers cannot so readily do so, and up to the present they have been bearing the burden. It has now reached the point where this cannot be done, and advances in advertising and subscription rates are bound to be made.

BE A BOOSTER!

When you pull down the town in which is your home, you are pulling down yourself, and when you build up you are building up yourself and your neighbor. Try and banish from your mind the mistaken idea that all good things are away off in some other locality. Give your town all the praise it can legitimately bear. It certainly will do you no harm and will cost you nothing: and above all, patronize your home institutions.

"I Am Afraid to Quit Advertising!"

ADVERTISING is not only the greatest business of the present day—it is an absolute necessity for twentieth-century business, declared Hugh Chalmers, head of the automobile company which bears his name, in a recent address before members of the Los Angeles Advertising Club and several hundred business men of that city. "I advertise because I have to—not because I want to. Advertising increases my sales in such a fashion that I simply cannot afford to be without it. The only man who can't advertise is the one who has so much business he can't handle it, or the man who has so little business it isn't worth his while. None of us are in the first class, and none of us will admit that we are in the second. I once asked Gerhard Mennen if he believed his advertising was successful—if he thought it was worth doing. He was then spending $850,000 a year. He told me he didn't know whether his advertising was successful or not. 'I will tell you how it is, Mr. Chalmers,' he said. I was running a retail drug store and an advertising man came and said if I would advertise in the town papers I would do more business, and I advertised and I did more business; and they came to me and said if I would advertise all over the State I could get business all over the State, and I advertised and I got the business; and they told me to branch out into New York State and Pennsylvania and I would get more business, and I did, and they were right; and I have gone on from year to year doing more advertising and getting more business, and I will tell you the truth—I am afraid to quit!' Office Stationery

BUSINESS Stationery should reveal the spirit of the business for which it is used. An appropriate letter head for a profession would be inappropriate for a mercantile house.

The typographical appearance of a letter head for a doctor should be small, neat, dignified—almost feminine; for a blacksmith, black, rugged, plain; for a vaudeville performer, loud, showy, big; for a bank, rich, dignified, restrained; for a store, neat, practical, harmonious, and so on.

Correspondence paper should not reflect poor judgment. Everything counts in these days of sharp competition.

POES' CORNER

TO THE GLAMIS BOYS OF THE 160TH BRUCE BATTALION.

Have you heard of the boys in Khaki
Who around Glamis reside?
In the hundred and sixtieth Battalion
The manhood of Bruce and her pride.
They are ready to fight for our country.
They are loyal, kindhearted and true
And when on the dread fields of battle
We know that the'r bit they will do.

They are leaving their homes and loved ones
To answer our country's call;
That we who stay home may have freedom.
Oh, how proud we are of them all!
Our interest now is still greater
Than ever it was before,
And our hearts go out with the khaki boys
From Huron's rock-bound shore.

Around Glamis now we will miss our boys
Although we will look for their return
From the far off S-ide of Flanders,
Where the Germans they will turn.
And beneath the good old Union Jack,
With other heroes too
They will teach the German Kaiser
What Right and Might can do.

And now you would like to know the names
Of those boys whom we adore.
The first is Mac McKinnon
Who stands up six feet four.
Then there is Clyde McKeeman
Who was always in the store
Unless he went to Greenock,
As he did in the days of yore.

Torrance McLennan and Albert Groves
With Will McNally too
Take in the boys of the Boundary West.
Oh, what will the fair ones do?
The Thompson boys, both Jack and Jim
Are twins, both hale and hearty;
With Neil McDermit and Macafee too
Make up the northern party.

There is Hughie Sproule and his brother Joe
Who worked with Neil McKay;
And our good friend Archie Matheson
Who with Captain Pete did stay.
And Oh that Billy Paterson and Johnny Kitchen too
With Stanley and McKenz'e
Make up the Glamis crew.

Now pardon us, dear Editor,
For taking up such space;
But you must know that Glamis
Is a very loyal place.
There are others we would write about
Who have gone on before,
In other Battalions they are found,
They are British to the core.
So good luck to the boys from Bruce
Where'er you chance to roam,
And always you will remember
You are welcome back at home.

Dan C.

News About Town

The Grey Co. Batt. goes to Niagara May 19th.

Kincardine Town Council presented wrist watches to the 160th Battalion recruits.

Mr. John Brockie, a pioneer of Greenock Tp., passed away at Fergus, where he had been making his home lately, in his 81th year.

Mr. and Mrs. J. Steinmiller and daughter, Miss Permilda, of Gorrie, visited Mrs. Steinmiller's parents, Mr. and Mrs. Adam Seigmiller the past week.

Mrs. James Smith, who was called here recently owing to the illness of her father, Mr. Hugh Fraser, returned home to London last week, accompanied by her little son, Malcolm.

Mr. William Weller of Walkerton has been compelled by illness to resign his position as teacher of Separate School No. 1, Carrick, and Miss Schumacher of Walkerton has been engaged to take charge of the school until midsummer.—Mildmay Gazette.

Mr. Wm. Mincar, a well-known resident of Paisley, passed away recently after a two weeks' illness with pneumonia. He was a veteran of the Northwest Rebellion and well-known throughout the district as a teamster and thresher. Mrs. Bannister of Walkerton is a daughter.

Colonel Allison at Ottawa was a good business man. It seems to make no difference whether they wanted to buy ammunition or sell it, the Colonel was never far distant. He reminds us of the undertaker who also sold a fine line of baby buggies. He got them going and coming.—Guelph Mercury.

While on his rounds as assessor through Carrick last week, Mr. S. F. Herrington was handed an assessment schedule dated 1875 The assessment at that time was taken on much the same basis as it is now, except that the buildings and real estate were valued together. The paper was given him by a property holder on the second con. of Carrick. Mr. John Cannell was reeve and Benjamin Crapper clerk.

W. M. McDonald, eldest son of the editor of the Chesley Enterprise left Monday for Toronto, to join the Divisional Signallers which is composed of University graduates and under graduates. W. M. had a telegraphic instrument fitted up in his study last winter and spent his spare time practising telegraphy. He expects to receive his B. A. degree in a few weeks. The Divisional Signallers expect to go to Ottawa about June 1st.

Among the successful students of the third year at Ontario Dental College are Milton Henderson Hagey of Walkerton.

Judge Klein has received a letter from Dr. McRitchie of the Kent County Patriotic League, seeking the cooperation of the Bruce War Auxiliary in urging the Provincial Government to take steps to get the unmarried civil servants to enlist, even to the extent of discharging those who will not come forward, and replacing them by returned soldiers.

"Charlie" Pearson, whose sudden death is reported from Atlantic City, was a good sportsman all his life. Latterly interested most actively in the Queen City Club bowling and curling, and the Lambton Club golfing, he was a generation ago a crack lacrosse player, and played in the Torontos in the days of the greatest fame of that team. He was a familiar figure on the first Rosedale grounds, both now covered with fine residences, when used by the lacrosse team.—Sporting Editor, Globe.

The electric metre man has again made his rounds and consumers will be handed their bills in a few days. Ours for the office will be only 50cents, the minimum charge to commercial users. We believe there are a number of others who will fare just as well as we do. We could have used half as much more for the same cost, but we used all we needed, and used it on dark days when necessary. The hydro cost to us is not proving exorbitant. The house lighting, including 45 cents for floor space, will be about one dollar for the month.—Durham Chronicle.

John Rowland brought several members of the bugle band over in his car on Sunday. When Col. Weir asked John if he would take his auto to Chesley he responded, "Sure." John is in C. J. Mickle's class as a loyal Britisher and that's saying a great deal for him. If the Minister of Militia is thinking of appointing more honorary colonels let us suggest John and C. J. for the honor. Sir Sam couldn't get two citizen who are more active in doing their bit to promote recruiting and aiding in raising funds for patriotic purposes if he searched from Nootka Sound to Hong Kong. Col. Rowland and Col. Mickle, doesn't that sound just about right?—Chesley Enterprise.

+ + +

A Great Report

A report of the Red Cross work done by Mrs. M. J. Ramsey in the past 17 months with the help of the Woman's Institute of Narva, and the ladies of Pinkerton, Riverdale, Brant, Eden Grove, and Chepstowe shows that 1356 pairs of socks, and 200 sheets for the University Base Hospital, 45 night shirts, also 75 pair of socks have been given to the men who have enlisted from Walkerton. The ladies of Narva have contributed sheets, socks, and money to this worthy work which was initiated by Mrs. Ramsey.

+ + +

Fifteen Creeds Represented.

The age, occupation, and religious denomination to which every Private of the 160th Bruce Battalion belongs was given in the Special edition of the Walkerton Telescope. Pte. Henderson Cole went to the trouble of enumerating the members or adherents of the different churches who responded to the call and this is the result: Presbyterians 154, Methodists 315, Anglicans 203, Roman Catholics 92, Baptists 72, no church preference 14, Evangelicals 8, Latter Day Saints 7, Salvation Army 7, Lutherans 8, Mennonites 8, Congregationalists 2, Protestant 1, Dutch Reformed 1, United Brethren 1,—Chesley Enterprise.

Pioneer Minister

After a short illness Rev. Jas. Sieveright, a well-known retired Presbyterian minister, died at Toronto Saturday. Born in Aberdeen, Scotland, in 1833, the late Mr. Sieveright received his early education there and came to this country when about eighteen years of age. Shortly after graduating from Queen's University, Kingston, he went to Melbourne, Quebec, where he took over his first pastorate. Five years later he went to Goderich, and after fifteen years of service there went west to Prince Albert, Saskatchewan, there he founded a church. It is interesting to note that in those days he was forced to travel from Winnipeg westward by dog-train. Returning east three years later, he went to Huntsville, his last pastorate, which he held for fifteen years. He had been active in the work of the church for sixty years. He is survived by his widow, two sons, Messrs. A. P. of Walkerton and Fred W. of Toronto, and two daughters, Mrs. W. G. MacDonald of Trenton and Miss Isabel Sieveright at home.

FARM LABORERS WANTED.

The Western Province of Canada are now experiencing an acute shortage of Farm Laborers for Spring and Summer work, which makes steady work and good wages a certainty. Saskatchewan has called for five thousand Laborers and an equal number is required in Manitoba and Alberta.

After a thorough canvas of the Territory served by the Canadian Northern R'y, it was found that an average of 21 men is required at the Points from which returns were received. An average wage of $45.00 per month, including board is being paid, the highest being $3.00 per day.

For further particulars as to the men required and the wages being paid at the various points apply to T. E. Attwood Agent, or write R. L. Fairbairn, General Passenger Agent, 68 King St. E., Toronto.

WALKERTON PUB. SCHOOL

Gets Highest Rating In All Departments In The Report Of Inspector John McCool.

The report of Inspector John McCool on his inspection of the Walkerton Public School, as read at the last meeting of the Public School Board, indicates that the school is doing excellent work. In the words of the inspector: "The School maintains its high Standard of efficiency on the part of the teachers and proficiency and progress on the part of the pupils."

Teachers' work is graded I throughout: Organization I; Teaching I; Discipline I.

Pupils' work is also graded I throughout: Proficiency I; Progress I; Deportment I.

Attendance was as follows:—

No. on the roll in Primer 65; Form I, Junior 16, Senior 16; Form II, Junior 20, Senior 29; Form III, Junior 28, Senior 29; Form IV, Junior 20, Senior 14. Total attendance at inspection, 217; total enrolment, 238; average attendance to end of last month, 162, a percentage of 69. Inspector McCool remarks that the average attendance was small because of much sickness.

Accommodations which run from I to IV, were graded as follows:—Water Closets I, Water Supply I, School Grounds I, School Buildings I, Class Rooms I, Halls I, Cap Rooms I, Desks II-III, Blackboards I-III, Lighting I, Heating I, Ventilation I.

The present value of the library is put at $113.00 and the value of maps, charts and globes at $180.00. The inspector suggests that the various numbers of the Children's Story of the War be carefully kept and bound in one volume when the war is over.

Condition of Registers and Catalogue is graded I; Caretaker's work I. Provision for part I of Entrance Examination is very good. The Inspector endorses all this section as "all excellent."

GOLD HEADED CANE

Presented to Mr. Matthew Hudson by the Truax Firm and Employees.

Mr. Mathew Hudson who is leaving shortly, with Miss Hudson, to make his home at Beamsville, was pleasantly surprised by the Truax firm and employees. He was called over to the factory, where his old shopmates were gathered, and after Mr. James Bristan, had read the following address, Mr. Richard Lee, on behalf of the firm and employees presented him with a handsome gold headed cane.

Walkerton, May 3, 1916.

Mr. Matthew Hudson,

Dear Sir:

Learning that you are about to leave the firm of R. Truax & Son, and as one of the oldest employees of the firm, and one who has always been a faithful worker during all these years, your shopmates have always found you not only willing to help in the shop, but on any other occasion when your shopmates needed help. We regret that you are leaving us, and we could not let this occasion pass without showing our appreciation of you. We therefore have much pleasure in presenting you with this gold headed cane as a slight token of our esteem for you. Hoping you may have a great number of years to use it.

Signed on behalf of the firm and employees.

R. Truax & Son, Jas. Bristan,
John Douglas, B. Sherrer.
Frank Bolden.

THE BUGLE BAND

It may interest our readers to know something of the personel of the 160th Bugle Band whose stirring notes help to give a military atmosphere to the town these days.

Sergeant A. E. Tucker, their capable leader, is not now in khaki. For eight years he was drummer and bugler in the first Battalion of the famous Gordon Highlanders.

Corp. W. J. Hampton was bugler for five years with the 32nd Bruce Batt., being sergeant bugler for three years.

Drummer D. Cocklin was for three years a member of the King's Royal Rifles.

Drummer C. D. Stevenson is another member of the old 32nd, having belonged to F. Company.

Bugler Bert McMinn is a former bugler of F. Co. 32nd, Bruce Batt.

Bugler Wilfrid Lamorandiere was formerly a bandsman of the 32nd.

Bugler H. E. Woelrich was for one year bugler with the 31st Grey Batt.

Lance Corporal S. Crowhurst was for two years drummer in the Kincardine Brass Band and one year in the Saltcoats, Sask. Silver Band.

Bugler C. H. Kempson was for two years bandsman in the Kincardine Brass Band.

Bugler F. Piper was for one year bandsman in the Kincardine Brass Band.

Drummer W. A. Grainger was for six years drummer in L. O. L. No. 866 Cargill.

Mr. G. C. Rife, who has carried on a haberdashery and tailoring business in the Calder block for the past two or three years, has vacated the premises and moved his stock back to Walkerton. For general custom work he has rented the small premises recently occupied by D. Belmont, opposite this office, and will have one of his employees in charge.—Durham Chronicle

WALKERTON'S Leading Garage and Repair Shop

All makes and models of Cars Repaired and Overhauled at this Garage.

Gasoline, Oils and Grease Spark Plugs, &c.

Showing a Roof Covered with Brantford Slates in Solid Color.

There is Safety Under This Roof

Have you ever had a fine job of decorating spoiled by a leaking roof? If you have, you certainly are in a position to appreciate the value of a roof that is positively water-proof. Some of the troubles common to wooden shingles to-day are that they are apt to split, warp or blow off as well as leak, soon after they are put on. Years ago they were good, but the quality has since gradually depreciated as the available supply of suitable timber became exhausted.

Brantford Slates have none of the faults of wooden shingles. They cannot rust. They do not allow rain to be driven under them as do metal roofs. They do not require rigid supporting as do the common tile or slate roofs. On the other hand *Brantford Slates* afford the utmost protection with little weight. They are made on a long-fibred felt "base" which is thoroughly saturated under pressure with asphaltum or mineral pitch. Crushed quarried slate particles are then deeply embedded in the surface of this "base", making it water-tight and fireproof.

Brantford Roofing

Brantford Slates are made in the natural slate colors of green, red, black and grey. The colors never fade and the slates do not require painting nor repairing. These slates are pliable and fit readily around gables and into the angles of any roof. This means a continuous roof without seams or joints. Sparks die on Brantford Slates. When you have these slates "on" you are done with the job. Remember they don't require painting or staining and may be selected to harmonize with almost any exterior color design, and the price is not beyond your reach. We would be pleased to send you samples and our Roofing Booklet.

CROSS PURPOSES

"Are you inclined to have a look around the place?" he inquired, in a meek voice, when Mrs. Austin seemed to have finished the Times. He waited for her answer with some anxiety. Suppose she should have changed her mind, or forgotten all about it! Experience, it is true, had taught him that women were flatteringly compliant when they had to deal with the young owner of Culverdale Manor. Frank's propositions were invariably applauded by his feminine listeners, and he knew very well that if he were to suggest to any girl in the neighborhood that they should ascend Mount Everest together, she would say it was a delightful idea, and would take his arm to start off that moment. Frank had never found women capricious. Though he was as ready as any other man to say "Souvent femme varie," in point of fact, in his little flirtations, it was always Mr. Francis Leicester who changed very quickly, and the girl who showed an unnecessary and sometimes unpeaceful constancy. According to experience, Frank should have had no misgivings when he reminded Mrs. Austin of her promise. But he instinctively felt that his experience was not likely to be of much service to him on this occasion. "You said you should like it—there isn't much to show you, but will you come?" he asked with simple directness.

Mrs. Austin looked up a little absently. Their talk of the evening before had not made a deep impression on her, and she had almost made up her mind to spend the morning in writing letters. When Frank spoke she had just reckoned up the most tiresome of her correspondents, and had decided that she might hope to possess an easy conscience by luncheon time. But as she met his eyes she remembered his anxiety to amuse her, and checked the answer which was on his lips. He was a nice, hospitable boy, this son of Fanny Leicester's, and if he wanted to do the honors of his home he should have his way. Her letters could wait, and she would see Frank's old china in the morning and his little ruin in the afternoon.

"Will I come?" she repeated. "Of course I will come. I shall be delighted." And she rose instantly, with a sweet readiness which filled Frank's soul with a tumult of delight.

It was speedily obvious that the young man knew very little about the things he had undertaken to show. He was vaguely proud of his heirlooms because they were heirlooms. It pleased him to think that he inherited as a matter of course what other people were so anxious to buy. His old oak had been carved for the Manor-house; his old cups and dishes had belonged to generations of dead and gone Leicesters. That was enough for him. He remembered the names of a few of the portraits, and in one or two notable cases could even tell the artist, but his remarks, as a rule, were not instructive. "Oh, I recollect that one," he would say, with a glance of recognition, "used to hang in the little room out of the gallery upstairs"; or it might be, "Do you see that queer old fellow up there? I remember I was awfully afraid of him when I was a little chap; I thought he walked." Sometimes he confined himself to a simple expression of opinion. "That's a comical get-up—doesn't she look as if she'd got a duster and a feather on her head? Do you suppose that a cap, now, or a hat?" But curiously enough, his ignorance did not affect Mrs. Austin unpleasantly. She did not feel as if Frank were an outsider, but rather as if the connection between him and the people on the walls was close enough to justify a disregard of mere book-knowledge about them. She could have learned more names and dates in a couple of days than Frank had acquired in his life, but he claimed kindred with the portraits in the very look and attitude with which he confronted them. There was a young squire of more than a century earlier who might have been his brother. Mrs. Austin called his attention to the likeness, and Frank, with his handsome head thrown back, stood gazing at him in a glow of suddenly-awakened friendliness. "I wonder who he was?" she said. "Suppose he turned out to be a namesake of yours?"

"I'm sure I don't know," the young fellow answered. "Is he really like me?" And, without waiting for a reply, he went on, "I'm idiotically ignorant."

"Don't call yourself names," said Mrs. Austin. "You certainly are ignorant, and it is very disgraceful, but I rather like it. People who know too much won't let one make any discoveries or imagine anything on one's own account. Now you leave me quite free in that respect."

Frank smiled rather ruefully. "If that is all you want, I am perfect."

They went up-stairs, and there he had rather an easier part to play, as she could appreciate what she saw without his explanation. He was eager to fit keys into locks for her, and would readily have broken open any obstinate door which resisted his efforts. Certainly if the future was to be for Gilbert South, the present time was Frank's, and he made good use of it; for, before that journey of discovery was over, the house was peopled with beautiful memories. There was Mrs. Austin pausing at the top of the stairs, and smiling at a grotesque head which grinned from the door of an old cabinet—Mrs. Austin intent on a dingy bit of tapestry, and triumphantly discovering Rebekah at the well—Mrs. Austin laughingly putting him aside when he failed to unlock a great oak chest, and turning the key with her slim white fingers—Mrs. Austin looking out from an oriel-window across the sunlit oaks and chestnuts of the park with a tranquil far-seeing gaze. There was more to remember of this; for in the act of turning away, she stopped short. "Oh, there's some beautiful old china," she said: "I must have a look at that! Don't you care for these things, really, Mr. Leicester?"

"No, I don't know—I mean yes," said Frank. "Don't you think they are women's things?"

"Women's things? Don't be so scornful," said Mrs. Austin, with her quiet smile.

"That isn't scornful," he answered, slowly. "I meant——" He paused, and looked at her, at the brown oak panelling behind her head, at the blue and white china, at her lifted hand as she put back a cup. The sunshine, slipping through the leaves which wavered outside, brightened the picture with capricious touches of gold.

"Well—you meant? I am waiting."

"Why," said Frank, "what good are these things to me? I don't understand 'em, you know. I can read the papers and go over my bailiff's accounts just as well without two blue plates and an old teapot in front of me. But when you stand there it's different—they seem to be all right, somehow."

Mrs. Austin met his gaze with a little touch of laughter just at the corners of her mouth. "Upon my word!" she said, "I didn't know that I was in such perfect harmony with an old teapot. Well, it is something, no doubt, to be able to adorn the leisure moments of life—when the bailiff is away!" Frank would have protested, but she checked him with a quick little movement of her head. "Are you going to explain yourself? Don't; an explanation is enough to spoil the most beautiful thing that ever was said, and to make the worst worse. Besides, there is no need."

"No," he answered with a laugh, "I don't suppose there is."

Mrs. Austin ended by enjoying her morning in a very bright, simple fashion, and feeling a little as if she and Frank were a couple of children engaged in some delightful piece of mischief. Frank had certainly hampered a lock, broken a little saucer, lost one key on the floor of a dark cupboard, and mixed up the remainder in hopeless confusion. He knew there were some queer old dresses somewhere—he remembered having seen them as a boy—and in the search for them he took Mrs. Austin into all sorts of shadowy corners, and made interesting discoveries of old brooms and brushes and dusty books. On one shelf he found some toys, shabby with ill-usage and long neglect. He stood looking at these for a moment, bewildered to find that he had forgotten them so utterly and remembered them so well. He stooped to touch a little painted water-cart and then put them all into the darkness again, with a lingering smile. At last he came upon the old brocades and laces of which he was in search, and looked anxiously to see whether they would please his companion. "Are they right?" he said, "or don't you care for them?" As soon as he was satisfied on this point, he would have tossed them all over the floor for her inspection, if she had permitted it. "Look like private theatricals, don't they?" he said, when he was bidden to stand on one side.

"Oh, isn't this lovely?" she exclaimed, without heeding his question.

He considered the pale delicately-flowered silk with a puzzled face. "Lovely? Isn't it rather queer and—and—washy?" he said at last.

"Oh, that won't do at all!" Mrs. Austin replied, smiling up at him. "That isn't what we say about such things nowadays. We must educate you."

"Well," said Frank, with a flash of inspiration; "I think I should know better if I saw it on." Mrs. Austin shook it out daintily to let the light fall on it, and he looked from the silk to her face, and back again. All at once he seemed to see what she would look like in it; a tall slight figure in the quaint old gown. "Yes," he said, with sudden conviction, "I see now. It's beautiful."

"You are a promising scholar," she replied. "What were you saying about theatricals just now? But these things are too good for theatricals—too real for such little candlelight shams."

"Not a bit too good—if you would act!"

She shook her head. "Not even to wear this dress! Though that would be delightful."

"Do," said Frank. "Why not? I'd get myself up like my friend downstairs—the man over the library chimneypiece, you know. Would that be right with this of yours?"

It was Mrs. Austin's turn to call up a picture, and she raised her eyes to his face. "Oh yes, I think so. We should be in the same half century at any rate, quite near enough for private theatricals."

"Oh, I say!" Frank exclaimed. "Half a century!"

"Well, I admit it would be an awkward interval in real life," said Mrs. Austin, smiling. "But I think it might do on the stage."

"Let's try it," said Frank, with his face aglow.

"No," she answered, very gently and decidedly. "Why not ask Miss Vivian?"

"Tiny!" The suggestion called him out of an enchanted world into his every-day existence, and he had to check himself lest he should say something ungracious.

"She would look charming in some of these things," said Mrs. Austin, thoughtfully.

"I dare say she would—I mean, I'm sure she would. Well, we can think of that any time."

"And do you think we can join the others any time?" his companion inquired. "I should say we had better bring our investigations to an end, and look for them. Your mother will think we are lost."

Frank attempted no remonstrance; and she laid everything back in its place with a charming dexterity, only pausing once to look at some old lace. He watched her, still with the shadow on his face which had come when that mention of Tiny's name reminded him of more than Tiny.

They went down-stairs, but could find no one. "My mother is having more than an hour's gossip to-day," said Frank. He turned to a side window and looked out. "And the others are playing lawn tennis."

Mrs. Austin provided herself with a parasol, and they went across the lawn to find the players. Tiny Vivian had enjoyed her morning very well, though she had been conscious that Frank and Mrs. Austin were a long while going round the house. She had not, however, got beyond the feeling that it was very good of Frank, and she came to meet the pair with a bright face of welcome. "Coming to play?" she said, gaily.

"All right," said Frank: and he turned to his companion. "You will, won't you?"

Mrs. Austin shook her head. "No, I can't play. No—don't offer to teach me; it's very kind of you, but I'm too old to begin now."

If he was disappointed, it was only for a moment, for in a moment he felt that he would rather not see Mrs. Austin rushing about after balls, eager, excited, flushed. Tiny might, of course, but not Mrs. Austin. "It isn't that!" he said, in answer to her smiling refusal. "You could learn anything you liked, but you are quite right—it would not be worth your learning." And he went away with long steps to fetch her a chair. When he came back, Gilbert South was describing something to Tiny in his soft voice, and Mrs. Austin stood a little apart, studying the old house with tranquil eyes.

Frank brought the chair, and an Indian shawl of his mother's, which he had picked up in the hall. "Will you have this on?" he said. "No? Then I'll put it over the chair. It's a very ugly chair." Frank had never been in the habit of eyeing his furniture so discontentedly.

"It's very comfortable," said Mrs. Austin, giving a touch to his arrangement of the drapery which seemed to make it exactly right. "Now I won't keep you from your game."

"Look here, Frank," said Tiny, lightly touching his arm with her little sunburnt fingers, "leave me out this time. You play with Mr. South."

"No, no, Miss Vivian, that won't do," Gilbert protested. "You've been describing Mr. Leicester as a champion player, and I'm not going to be pitted against him for you to laugh at my clumsiness."

"You're not clumsy," Tiny replied, quite simply.

"Thank you," said Mr. South, with a little bow. "But I'm a beginner, you know, and you have undertaken my education. Suppose you let me learn a little by looking on."

"Come then, Tiny," said Frank. After all, he had had his turn. It was only fair play to make way for the rival who was also his guest.

Gilbert strolled across to where Mrs. Gilbert sat, and threw himself on the grass at her feet. "Upon my word," he said, "I'm not sorry to rest a little. I've taken a good deal of exercise this morning."

Mrs. Austin smiled, and watched the game, though she did not understand it sufficiently to appreciate Frank's skill. She was interested in the two agile figures merely as a picture—a pretty picture in the autumn sunshine. Gilbert, at her feet, leaning on his elbow, seemed as if he also were watching the two figures, but in reality his eyes were fixed upon a third, a tall, slender girl, fair, graceful, swift, playing battledoor and shuttlecock in the stillness of a summer evening, close by an old red brick wall, on which peaches were trained. Above the wall a thin rank of trees rose against a clear sky. There was an arch over the garden patch, a tangle of climbing roses, delicate leaf-sprays, and clusters of loose white flowers, under which the girl would go when the game was over and the sun gone down. And beyond the buttressed wall, where the elm boughs were stirring in the cool evening air, was the great world, beginning at the ivy-grown gardengate and stretching away to unknown distances—to India, for instance, which lay waiting for a young fellow who was to do the most remarkable things. It was wonderful only to think of the sights he was to see, the strange faces, the strange skies, before he came home bronzed and bearded, to stroll once more along the grassy walks and find the clustered roses of a later year hanging white in the twilight. As he left the garden for the last time that home-coming had been almost as vivid and real as the tender pain of parting. Afterwards it faded away into a dim picture, and as such pictures are when what was to have become an actual future is put aside and marked, "It might have been." But now, while he lay on the turf, watching Tiny and Frank, it rose up before his eyes as clearly outlined as of old.

It could never be. The heads of the household were dead: the old home was broken up: the house was sold. Gilbert had a vague remembrance of having been told that a retired tradesman, who piqued himself on growing big pineapples, had taken the place and improved it immensely. However long his life might last, it could never hold that happy home-coming, as a hero, to the old garden, and the girl who was to wait for him there.

He raised himself a little, and turned to Mrs. Austin, who was leaning back against Frank's Indian shawl. "Do you remember," he said, "how we used to play battledoor and shuttlecock at West Hill?"

She looked down at his uplifted face. "Yes," she answered, in her tranquil voice, "I remember"; and after a just perceptible pause, she added, "perfectly."

That "perfectly" disconcerted him a little, and checked a sentence on his lips. As a rule, it is not a perfect but a discriminating memory which we desire to find in our friends. Gilbert asked himself whether there was a touch of ironical meaning in her words, or only a frank simplicity. It's a very long while ago!" he said. It was a safe remark to make, and not an original one. Yet something in his accent made it sound almost like an entreaty.

Mrs. Austin smiled. "It's a very long while ago. These young people were in the nursery then, I suppose, and now their turn has come round."

"Do we only have one turn?" said Gilbert, looking down and touching the end of the shawl which trailed on the short, dry turf.

"Ah, that I can't say!" she answered, lightly. "How can I tell what Fate may have in store for you? I fancy you are younger than I am now."

"No, no!" he exclaimed. "But tell me—am I much changed?"

Her eyes rested on him in smiling scrutiny. "No," she said; "I think you have changed very little indeed."

"You are right," he said, after a pause, "I am very little changed. And you?"

"What do you think?"

South quitted his lounging attitude, and sat up. "That's a question I can't answer. You are changed, and yet I fancy you are not changed. You were only a girl, you know——"

"And now I'm an old woman!"

He winced as if the words hurt him. "Don't say that! Not even as a joke!"

"Oh, I beg your pardon!" she protested, "I remember now I am a year and a half younger than you."

(To be continued.)

SUNDAY SCHOOL LESSON

May 14, 1916. Lesson VII.

"Lo, We Turn to the Gentiles."—Acts 13: 13-52.

Commentary.—I. The Apostles in Antioch of Pisidia (vs. 13-15.) 13. Paul and his company—Paul now becomes the central figure in this group. We note that when the church at Antioch sent forth the two apostles on this journey, they were spoken of as "Barnabas and Saul," but after the judgment that came upon Elymas and the conversion of Sergius Paulus through Paul's ministry, Paul became the leader and is henceforward recognized as such. The apostles sailed in northwesterly direction to Perga, capital of the province of Pamphylia. Perga was situated on the southern coast of Asia Minor, about midway between the east and west extremities of the coast-line. Pamphylia contained a great variety of inhabitants, as it was the dividing region between the East and the West. The record does not state whether the apostles preached in Perga at this time or not, but they did on their return visit (14: 25.) John departing from them returned to Jerusalem—This was John Mark, the writer of the second Gospel. No reason is assigned for his departure, and Paul was not pleased at his course (15: 38.) It has been conjectured that his mother in Jerusalem needed him or that he was afraid of the unhealthful climate or that he shrank from the hardships incident to missionary work in Pamphylia and Pisidia. These, however, are mere conjectures, and we learn that later John Mark was ready for missionary work (15: 37-40.) Paul speaks of him with tender affection in Col. 4: 10 and 2 Tim. 4: 11.

14. Antioch in Pisidia—Antioch lay about one hundred miles nearly north of Perga. It is thought that it may have been on this journey that Paul was in perils of robbers (2 Cor. 11: 26.) It was a mountainous region and was infested by brigands. Antioch in Pisidia was built by Seleucus and was one of the sixteen Antiochs which he founded, and named after his father. Synagogue—Though he is the apostle of the Gentiles, it is ever to the synagogue that Saint Paul first finds his way. For the law of Moses ought to be a better schoolmaster to bring men to Christ than the law of nature.—Cam. Bib. There was but one synagogue here and both Jews and Gentiles attended its services, though the Gentiles who came were probably those who were inclined toward Judaism. Sat down—As ordinary worshippers. 15. The law and the prophets—It became the practice of the Jews to read a portion of the Pentateuch, or the law, each Sabbath and also a selection from the prophets. Rulers of the synagogue—Those who had charge of the synagogue service. Sent unto them—The rulers observed the presence of the strangers and noticed that they were dignified and devoted men.

II. Paul's discourse (vs. 16-41). Paul arose in his place and, beckoning with his hand for the attention of the audience, addressed them by the honorable title, "Men of Israel." He related the early history of the Jewish race and declared that Jesus, who sprang from the lineage of David, was the Messiah. He told of the preaching of John the Baptist and of the hatred of the Jews toward Jesus, who had been unjustly put to death. God raised him from the dead and salvation was proclaimed in His name to all the world. Paul warned the congregation of the consequences of rejecting Jesus.

III. The effect of Paul's preaching (vs. 42-52). 42. As they went out, they besought (R. V.)—The best manuscripts do not include the words Jews and Gentiles. The meaning seems to be that when the apostles were leaving the synagogue, there were those who requested them to give them another discourse on the subject that had just been presented to them. They were eager to hear the gospel. 43. Jews and religious proselytes followed—Their hearts were touched by Paul's message, and Paul and Barnabas encouraged them to give heed to the convictions they had received. The grace of God had been extended so far to them that they were hungering after righteousness. If they continued to seek the Lord, they would find Him in His saving power. 44. Came almost the whole city—The preaching of the gospel had aroused great interest and an excellent opportunity came for the further declaration of the truth. 45. The Jews ....Spake against those things. The Jews were envious when they saw that the multitudes were interested in the apostles' preaching, and undertook to turn the people against the new doctrine. They could not bear to hear the declaration that Gentiles were included in the plan of salvation.

46. Waxed bold—Paul and Barnabas were not intimidated by the rage of their opposers, but were inspired by the Holy Spirit to speak forth the word with greater plainness and boldness. First....spoken to you—As the Jews were God's special people, the gospel was to be offered first to them. Ye put it from you—The language shows that the Jews of Antioch rudely and violently thrust from them the offers of mercy. Judge yourselves unworthy of everlasting life—While they thought that they alone, of all nations, were worthy of eternal life, by their conduct they declared that they were unworthy, since they had rejected Christ, the only Saviour. Everlasting life belongs to both worlds: it has a place in those who are saved here, and it reaches out into eternity. We turn to the Gentiles—The apostles considered that their duty to the Jews was done and the way was fully opened to proclaim the gospel directly to the Gentiles. 47. The Lord commanded us—The command to which the apostles referred is found in Isa. 49. 6. Thee—The Messiah. Unto the ends of the earth—Jesus came as a Saviour to all nations. 48. The Gentiles.... were glad—The gospel came as good news to them. They appreciated the great blessing that had come to them and rejoiced. Glorified the word of the Lord—They readily accepted the word and rejoiced in it. They honored it by conforming their lives to it. As many as were ordained to eternal life believed—This expression is in contrast to the one in verse 46, applying to the Jews who had judged themselves unworthy of eternal life by rejecting Jesus. Those who were disposed to receive eternal life through Jesus Christ believed and were converted. 49. Published throughout all the region—The apostles proclaimed the gospel and those who were converted aided greatly in making it known.

50. Devout and honorable women—It is noted in the history of these times that many pagan women of the higher ranks were predisposed toward Judaism.—Whedon. The Jews enlisted their efforts against the apostles. Expelled them out of their coasts—"Cast them out of their borders." R. V.—In casting out the apostles the people of Antioch were rejecting Jesus and the salvation which he offered them. 51. Shook off the dust of their feet—This was in accordance with the command that Jesus gave to His disciples when He sent them forth on their mission (Matt. 10:14). Iconium—A city in Pisidia, east of Antioch. 52. Filled with joy—They were entering upon the blessedness promised by the Master (Matt. 5: 10-12). They were persecuted and blessed.

QUESTIONS.—Where did the apostles go from Paphos? Who left them at that point? To what city did they next go? Where did they go on the Sabbath? What invitation was extended to them? Give an outline of Paul's sermon. What occurred on the next Sabbath? How did the preaching affect the Jews? What effect had it upon the Gentiles? Why did the apostles turn to the Gentiles? To what place did the apostles go from Antioch? What were their feelings?

PRACTICAL SURVEY.

Topic—Christ, the world's Savior.

I. Foretold in Jewish history.

II. Rejected by Jewish leaders.

I. Foretold in Jewish history. Paul and Barnabas exhibited the most unfaltering conviction that the gospel was fully adequate to grapple with every form of opposition that the heathen world might offer. They were a small force numerically to advance upon the intrenched idolatrous heat of Asia Minor. The lesson before us presents one of those synagogue scenes, which are of so much interest in connection with the early progress of Christianity. By the courtesy of his countrymen Paul was permitted to speak. That was an event in his history, the beginning of a battle which concluded with his words, "I have fought a good fight." Paul's address resembled that of Stephen's, delivered before the Sanhedrin. It was a brief, historical survey of Israel, a true picture of that highly favored nation, the history of the kingdom of God. The main purpose of Paul's sermon was to prove the Messiahship of Jesus and thereby proclaim the gates of life open to all men. In portraying the providential course of Israel's history, Paul outlined briefly those distinctive features which revealed the fact that from the beginning God's eye was fixed upon the uppermost parts of the earth, as well as upon the land of his chosen people. In his review Paul noted the divine selection of a people, their wonderful deliverance, their desert discipline, the expulsion of the Canaanites, the foundation of a settled system of government, the epoch of kings. This recital was pleasing to the listening Jews. Paul further declared that in Jesus the line of Israel's greatness was continued; that without the crowning fact of his resurrection the rest would have been incomplete.

II. Rejected by Jewish leaders. Paul's tact was most remarkable. He desired to impress the fact that the Hebrew scriptures which were the basis of their faith as a people, contained the promise of a Messiah; that the Messiah predicted in their scriptures had actually appeared upon earth, and that he was the Mediator through whom the world was to be saved. Paul's mode of preaching was, first of all, to appeal to the understand with a clear exposition of truth, and then to impress that truth with earnest exhortation. Paul's power as a speaker lay in the intensity of his convictions and in his strong sympathy with his audience, which made him quick to adapt himself to them and to press home his thought. He offered proofs of his statements which were within the comprehension of his audience. The gospel message which Paul presented put his hearers to the test. He warned them of the fatal consequences of rejecting the offer of salvation. The results of Paul's appeal were seen in a general spirit of religious inquiry, the conversion of many, great excitement among the classes, the stirring up of bitter persecution, the increased power of the apostles in their work. The Jews were made jealous of their new leaders and of the hold they and their doctrine were getting. They refused to admit that the redemption of the Gentiles was a part of God's plan of salvation. They said, in effect, if the Gentiles were to receive the gospel, they would not. Paul made plain their own responsibility for their attitude toward the gospel. They had learned its central truths and formed their own decision. They decreed their own sentence of condemnation. They put from themselves the word of God and thus judged themselves. To the Gentiles it was the early dawn of the promised day. They needed comfort. They greeted the good news and were blessed by it. The mixed audience of Jews, proselytes and Gentiles had the golden opportunity of listening to Paul, the profound interpreter of scripture, the large-hearted apostle to the Gentiles, the truly evangelical preacher of the Christian faith, the undaunted witness to the truth. The Jews had a great opportunity. In every possible place grace was held out to them, nevertheless they spurned it all, and forced the apostles to leave their city under the ban of the law, but with no revenge in their hearts. They grew greater in the presence of difficulties and braver as perils thickened around them. The Jews disgraced themselves, but they could not arrest the victorious course of the truth. For all their hardships the apostles had an abounding joy.

T. R. A.

Ventilate.

Let in fresh air.

The bigger the dose, the better.

The tighter your house, the tighter your colds.

The fresh air habit is a good one for everybody.

If you can't work outdoors, sleep outdoors when you can.

Tuberculosis, pneumonia, bronchitis, pleurisy and catarrh are home diseases.

Have the bedroom windows large, for one-third of life is spent in your bedroom asleep.

Breathe deeply when out walking; oxygenate the lungs, ventilate your body through your nostrils.

Fill the lungs at each breath; breathe 18 to 20 times a minute; there can be no intemperance in your fresh air.

The Chinese Government has engaged a French expert to establish a military aviation school with 12 aeroplanes of three types.

SUNDAY AT HOME

THE WEAVER.

One stitch dropped as the weaver drove
His nimble shuttle to and fro,
In and out, beneath, above,
Till the pattern seemed to bud and grow
As if the fairies had helping been—
One small stitch which could scarce be seen;
But the one stitch dropped pulled the next stitch out,
And a weak spot grew in the fabric stout;
And the perfect pattern was marked for aye
By the one small stitch that was dropped that day.

One small life in God's great plan!
How futile it seems as the ages roll,
Do what it may, or strive how it can,
To alter the sweep of the infinite whole!
A single stitch in an endless web,
A drop in the ocean's flow and ebb!
But the pattern is rent where the stitch is lost,
Or marred where the tangled threads are crossed;
And each life that fails of its true intent
Mars the perfect plan that its Master meant.

AWAKE TO RIGHTEOUSNESS.

Ye are all the children of light, and the children of the day. Therefore let us not sleep, as do others; but let us watch and be sober.

It is high time to awake out of sleep, for now is our salvation nearer than when we believed. The night is far spent, the day is at hand: let us therefore cast off the works of darkness, and let us put on the armor of light. Wherefore take unto you the whole armor of God, that ye may be able to withstand in the evil day, and having done all, to stand.—Cast away from you all your transgressions, whereby ye have transgressed, and make you a new heart and a new spirit.—Lay apart all filthiness and superfluity of naughtiness, and receive with meekness the engrafted word, which is able to save your souls.

Little children, abide in him; that, when he shall appear, we may have confidence, and not be ashamed before him at his coming. If ye know that he is righteous, ye know that every one that doeth righteousness is born of him.

THE AUTOCRAT.

The word means self and strength. Monopoly means single and to sell. Sole right to sell. In our day we go to Russia for the first where we have unlimited monarchy, limited by assassination. In the second we may glance at a great nation who claim a sole right to sell. The people are up against a cluster of machines, powerful, elastic and daring, and heads cool, clever and long will be in demand to lead the host from Egypt to the promised land.

But our spirits turn pale as we transfer our thoughts to another Ruler and a close corporation whose bonds are iron and whose ways past finding out. Day by day the men of thought is confronted, not by a thought or doctrine, but by the greatest fact found at the foundation of the universe: "I am that I am." This is not history, cold and dead, but autocracy and monopoly rolled into one. "I kill and I make alive. He that dasheth in pieces is come up before thy face."

The unconditioned absolute is here, and the monopoly that holds all in its own hands, both in buying and selling, is here also.

Let it be proclaimed to the end of the earth that every particle of grace is held in the one Imperial hand, and this grace is dispensed to personal applicants only. The cry has gone forth, and it sweeps round the world to-day, "Come unto Me."

Tens of thousands of holy and devoted men and women are proclaiming this truth in the languages of the earth. Their hands are clean, but their hands are empty, they are but finger posts pointing the way to the city of refuge, and every man must run, and win and rest.

"I am He that openeth, and no man shutteth. "The keys of all treasure hang from the golden girdle of the Great High Priest. His gifts are sovereign, appropriate and sure.

It is a loud boast that all men are free and equal. I do not object to the freedom, but no two men are alike. Some have one talent, some five, some ten. Some have half a dozen personalities rolled into one, and are sharp threshing instruments, having teeth. "Who hath made thee to differ"? The mother-in-law is against the daughter-in-law, and a man's foes are they of his own house. How wonderful is this!

But come close home; what do you know about yourself, how far can you reach, how deep can you go? We are not known to others; we know but little of ourselves. There is a secret, sacred place within, which the great monopolist has reserved for Himself. Deep in the confines of the heart no mortal soul may share.

"Where all life's mighty issues start
There is a hidden sphere, unknown
To others—there we live alone.
Alone! Alone!!
How wisely God has planned
To keep life's centre and its throne
Reserved to Him and Him alone.
We find in Him what friends gave not,
He understands and feels;
He every bleeding heart-wound heals;
This realm we occupy alone
He fills; our lives to Him are known.

H. T. Miller.

Conversing With "Ghosts."

Some scientists of real eminence have accepted the postulate of the individuality and self consciousness of the soul after the death of the body and have attempted to demonstrate their belief by asserting communication with these disembodied spirits. Sir William Crookes, a profound delver in chemistry pertaining to radioactivity, asserted years ago that he had communication with souls of dead friends, but for several years he has been silent anent this matter. Camille Flammarion, a rather speculative and sensational astronomer, declares that he has seen and conversed with the "ghosts" of dead friends. Professor William James, brother of Henry James, the novelist, promised before he died that if possible he would communicate with his friend Professor Hyslop, both eminent psychologists, but at last accounts the soul of Professor James had not spoken.—Exchange.

The man who snores in an upper berth doesn't consider other people beneath him.

A Change of Garments

One morning Lita Giaccioli, an Italian girl aged 18, was placed in a railway train at Naples by her father and mother, who bade her good-by with many kisses. She was going to Rome to visit an aunt. The compartment she entered was occupied by one person only—a man. He was small and clean shaven, and the train had not gone far into the country when he began to notice Lita, as if taking note of her height and weight. Presently he said:

"Signorina, will you please take off your hat and give it to me?"

Lita looked at him as if she did not comprehend his meaning. The man jerked her hat off her head and put his own on hers. By this time she was thoroughly frightened and made no resistance. The man forced her to exchange her outer garments with him, and when this was done he pulled a veil down over his face.

"When we make a stop," he said, "I will get out—that is, unless I see danger. If you betray me I will kill you. I am a bandit. I have been making a rich haul in Naples. The police got on to my being there, and I am surprised that they have permitted me to get out of the city. Indeed, I suspect some game on their part, and I should not wonder if they were on the lookout for me."

Lita was thoroughly cowed. Indeed, it was all she could do to keep from fainting. But she kept up till the train reached the first stop, hoping then to be relieved of him. When the train pulled up at the station the man looked out, but drew back immediately, and Lita saw that she would not be rid of him. The conductor came to the door of the compartment and put a woman into it. Lita noticed that she tipped him for finding her a seat. The newcomer was a comfort to the poor girl, though she wished she had been a man. She noticed, however, that the woman was big and strong, while the bandit was small, though wiry.

The train had scarcely pulled out of the station when the new passenger began to look scrutinizingly at Lita. As for the man, he leaned back in a corner with the veil over his face, and no one would have had reason to suspect that he was not a woman.

"Where are you going, signor?" asked the woman of Lita in a coarse voice.

"To Rome, signora."

The woman looked intently at the girl, evidently being somewhat mystified at her appearance and especially at her voice, which was thoroughly feminine.

"When the train left Naples," continued the woman, "was there not a man in this compartment?"

Lita, whose eyes were fixed on the bandit, saw his fingers twitching. She interpreted it to mean that she must reply in the negative.

"There was no one, signora, except we who are now here."

There was a pocket in the woman's dress, and Lita noticed that she kept her right hand in this pocket. When she asked the question she looked at the figure leaning back in the corner, apparently asleep.

"Signora," called the new passenger, "can you tell me the hour this train reaches Rome?"

The only reply was a snore.

Lita would have warned the woman that the person she addressed was a man and a bandit, and begged her to let him alone, fearing that he would murder them both, but she dared not do so. The woman made no further attempt to extract information from the sleeper; instead she began to look Lita over, her attention being riveted on the girl's figure that looked different from a man's.

"You're not a man," she said. "You're a woman."

Lita made no reply. The man in the corner snored on. The woman turned her attention to the sleeper.

"Signora!"

The man stirred, then asked what was wanted in a feigned voice.

"At what hour does this train reach Rome?"

"I do not know."

"What's the matter with your voice? Have you got a cold?"

"Pardon me, I am sleepy. I have been up very late every night for a week."

"Was there a man in this compartment when the train left Naples?"

"Yes; the young gentleman opposite you."

"She's not a man; she's a woman."

"Well, I have nothing to do with that, nor do I care what she is."

This was said angrily, and the bandit, losing control of his voice, betrayed his sex. Suddenly the woman's hand came out of her pocket and with it a cocked revolver, with which she covered the bandit.

"Throw up your hands, Andrea Carpi!"

The hands went up at once. The woman leaned forward and snatched away the veil.

"You are very smart, Signor Carpi, but you can't fool us carbineers all the time. I thought that by changing sex I could bag you and have succeeded. I see that you have changed clothes with this young lady."

He threw off his cloak and displayed the uniform of the national police.

Lita breathed a breath of relief. She regained her clothes, and the bandit returned with his captor by the next train to Naples.

Sauted Onions.

Some call them fried.

But sauting is not frying.

First remove the onion skins.

Then cut the onions into thin slices.

Next cover the onions with boiling water.

Add a teaspoonful of salt, boil gently 20 minutes and drain.

Now put two teaspoonfuls of butter in the same pan. When hot add the onions.

Saute 20 minutes, stirring frequently; add a saltspoonful of salt and one of pepper.

They are delicious with broiled or panned steak and should be tender and must not be burned.

Fried onions, on the other hand, are cut into thin slices, separated into rings, and cooked in deep fat at [illegible] degrees Fahr. A few rings at a time are put in the frying basket and fried till crisp and brown. A sprinkle of salt and they're ready.

A military permit now is necessary to pass through either the inner military cordon or the larger circle drawn around the city. The permit and the bearer invariably are subjected to close examination. Even a stricter watch is being maintained over persons desiring to take passage out of Ireland from Kingstown. Guards are posted at frequent intervals along every road in the country.

HONESTLY BELIEVED
HE WAS GOING INTO
CONSUMPTION.

DR. WOOD'S
Norway Pine Syrup
CURED HIM.

Mr. Frank E. Anthony, 69 Ellen Street, Winnipeg, Man., writes: "Having taken several bottles of Dr. Wood's Norway Pine Syrup, during the past few weeks, to relieve a chronic cough and general throat trouble, allow me to express my unbounded satisfaction and thanks as to its sterling qualities. A short time ago I became suddenly subject to violent coughing fits at night, and directly after rising in the morning, for about an hour, and found I was gradually losing weight. All my friends cheerfully informed me that I looked as though I were going in consumption, and I honestly believed such was the case. However, after having taken several bottles of 'Dr. Wood's' I am pleased to relate that the cough has entirely disappeared, along with all the nasty symptoms, and I have since regained the lost weight. I have no hesitation in recommending Dr. Wood's Norway Pine Syrup as a sure cure for all those troubled in a like manner."

When you ask for "Dr. Wood's" see that you get what you ask for. It is put up in a yellow wrapper; three pine trees the trade mark; the price, 25c and 50c.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Gathered From Here and There

According to the Pennsylvania mining laws a mule must be given 500 cubic feet of air per minute while a miner gets but 200 cubic feet.

An oil is secured from the tomato seeds, from which soap is made.

The adjutant or marabout bird of India, which is valued on account of its feathers, will swallow a hare or a cat whole. It stands five feet high and has a 15-foot expanse of wing.

The starfish of Japan is made use of for fertilizing the land. It contains nearly 5 per cent of nitrogen.

The percentage of defectives born among the lower animals is far less than that of the human family, and the reason is said to be due to the consumption of drugs and alcohol by the human parents.

The production of magnesite is steadily increasing in the United States, the 1914 output being 11,293 short tons, valued at $124,223.

During a recent examination of the waiters employed in New York city, 1 per cent. were found to be afflicted with contagious diseases.

Uncle Sam's investments in forests are bringing direct returns, which are increasing every year.

The available waterpower of the United States, including Alaska, amounts to more than 28,000,000 horsepower, of which approximately 7,000,000, or 25 per cent., has been developed.

SAVAGE ATHLETICS.

Canary Islanders Who Would Have Made Star Ball Players.

The Canary Islands came into subjection to Spain about the time Columbus discovered America. The conquest was due solely to the superior of European weapons and not to better skill and prowess. Native soldiers were trained athletes developed under a system that held athletic sports to be an important business, like military drill.

Spanish chronicles have left accounts of sports of the islanders. From babyhood they were trained to be brisk in self defense. As soon as they could toddle the children were pelted with mud balls that they might learn how to protect themselves. When they were boys stones and wooden darts were substituted for bits of clay.

In this rough school they acquired the rudiments of warfare which enabled them during their wars to catch in their hands the arrows shot from their enemies' crossbows.

After the conquest of the Canaries a native of the island was seen at Seville who for a silver piece let a man throw at him as many stones as he pleased from a distance of eight paces. Without moving his left foot he avoided every stone.

Another native used to defy any one to hurl an orange at him with so great rapidity that he could not catch it. Three men tried this each with a dozen oranges, and the islander caught every orange. As a further test he hit his antagonists with each of the oranges.

THE ARCH LOOTER.

(Times of India)

The most conspicuous failure of the war is the individual who did most to precipitate it—the German Crown Prince. After emerging from the Ardennes his army narrowly escaped destruction. The only reputation he has acquired is that of being the arch looter in that nest of thieves—the German Army. If for any reason this precious person is called to the Imperial throne, what will be the position of the Hohenzollern dynasty, represented by a braggart failure at the close of an unsuccessful war?

Suffered Awfully
FROM
BILIOUS HEADACHES.

When the liver becomes sluggish and inactive the bowels become constipated, the tongue becomes coated, the stomach foul and bilious headaches are the upshot.

Milburn's Laxa-Liver Pills will stimulate the sluggish liver, clean the foul-coated tongue, do away with the stomach gases and banish the disagreeable bilious headaches.

Mrs. J. C. Kidd, Sperling, B.C. writes: "I have used Milburn's Laxa-Liver Pills for bilious headaches. I suffered awfully until I started to take them. They were the only thing that ever did me any good. I never have any bilious headache any more."

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FARM GARDEN

THE CALVES TO KEEP.

From time to time, says one farm paper some exponent of more livestock rises to remark against the slaughter of the calves and not always is this without reason. We must agree that very often calves which should be kept in the herd for breeding purposes are turned away for veal and their owner gets very little profit from them, and they are not permitted to do the good in the herd which they would have done if kept for breeding purposes. However, there are large numbers of calves raised each year which should go to the veal route, and many of those which are killed while very young would be of no use if kept in the herd as breeders.

The good dairyman has a basis upon which he works in selling or keeping his calves as the case may be. He used first of all, a pure bred sire with milking propensities well marked in the blood of his ancestors. He keeps in his herd nothing but the best individual animals and the heaviest milkers and he weighs the milk from each cow or heifer regularly and systematically, and, if necessary, has the milk tested for fat so he knows exactly what each of his cows is doing and whether or not the calves from that cow are likely to go on and make valuable animals to place in his herd. If the cow, mother of the calf, cannot, through milk production, justify her existence in the herd there is little reason why the calf from such a mother should be kept past veal age, and it is far better than such a calf should go to the butcher early in life than to prove a bill of expense, in fact, a robber, in the dairy herd.

There is little use of keeping an inferior dairy calf to the age of two or three years, because it will generally cost more especially when grain is high in price, as it is now, to put meat on this wedge-shaped dairy carcass than it is worth. It would be folly then to keep all calves without discrimination. Only the best should survive for breeding purposes, and the only man who know which are the best is the man who is using a proper sire of a heavy milking strain, and is weighing the milk regularly from the cows to which the sire is bred, and keeping the calves from those cows which lead in milk production and give enough to pay for all feed and labor and leave a handsome profit besides

The point is to be able to pick out calves which should remain in the herd something must be known about the producing ability of their dams, and this cannot be estimated by the ordinary guess-work method. The scales and the tester should be made just as important in determining the future individuals which shall comprise the herd as in determining which cow now milking shall remain in the herd.

It is important also that no faulty individuals as to conformation and type be kept in the herd. It is not enough that the sire be from good milking ancestry and the cow be a heavy milker herself. They must have such confirmation and prepotency that the calves show the desirable type of the milking breeds.

Faulty calves should be discarded, even though their ancestry be right. This close selection will send thousands of calves to the block as veal which would otherwise be kept in the herd at a loss. It may be, after all, that there are not too may calves slaughtered young, but that there is not enough system followed in determining which shall go and which shall be kept. Undoubtedly, many are kept which should go, and equally true is it that many go which should be kept. The matter is in the hands of the dairyman, and the sooner he makes all his selections on conformation and type backed by production will it be righted.—Prairie Farm and Home.

PRUNING TREES.

Prune annually but never heavily.

Do not cut out large limbs.

Frost bitten wounds are slow to heal.

Never leave stubs in cutting off limbs.

Wounds heal most rapidly in spring.

Keep the trees free from suckers.

Torn wounds are generally fatal.

Summer pruning induces fruitfulness.

Heavy pruning is always followed by a heavy growth of suckers.

Winter pruning, when the tree is wholly dormant, increases the vigor of the tree.

In transplanting cut back, top and root. Burn all the wood to prevent spread of insects and disease.

Winter pruning, when the tree is wholly dormant, increases the vigor of the tree.

In transplanting cut back, top and root. Burn all the wood to prevent spread of insects and disease.

NOTES.

Corn, alfalfa, clover and grass — these four plants furnish 90 per cent. of the coarse food used by animals.

Liming is assisting farmers to secure good catches of clover.

Oats and barley, or oats, peas and barley, are excellent combinations for dairy forage.

There are many cows in this country capable of producing 400 pounds of butter in a year, but not one of them, so far as we have knowledge, came from a scrub sire.

Rev. V. H. Mayer, of Casenova, Va., has wintered a flock of milch goats in timber without bought feeds, getting three or four quarts of milk per day. He claims to have saved several babies with goats' milk, and has demonstrated the freedom of goats from tuberculosis and other diseases.

Sore or chapped teats are due to exposure or cold, wet weather and rough handling. Treat with lard or vaseline.

When a bull is stall fed he should have a plentiful supply of nitrogenous roughage, such as good, clean clover or peavine hay.

Spray pumps of many different sizes and types will give good results on the farm. Bucket pumps, knapsack sprayers and automatic sprayers will be useful in the garden and orchard, as well as in the hen house, although a larger hose or extension rod will be needed in the orchard. A barrel pump or power sprayer may be used, with good results if it is already on hand, but is more expensive than the average farm needs for hen house work.

Competition is the life of trade, when it isn't the death of it.

The Bile is an Antiseptic

Everything is good in its place. The bile, which, under certain conditions, causes so much distress, is of the greatest value as an antiseptic and cathartic when it is properly handled by the liver.

The chief function of the liver seems to be the filtering of bile from the blood, where it acts as a poison, and pouring it into the intestines, where it hastens the course of the food mass through the alimentary canal, and by its antiseptic influence prevents fermentation of the food.

When you suffer from biliousness and indigestion and have a coated tongue, bitter taste in the mouth, headaches and loss of appetite, you will do well to look to the condition of the liver. Other symptoms are wind on the stomach, which causes belching, and the formation of gas, which gives rise to dizziness and pains about the heart.

Because the liver has failed, the food in the alimentary canal is fermenting instead of being digested, looseness and constipation of the bowels alternate, the whole digestive system is thrown out of order and the blood is poisoned.

By immediately awakening the action of the liver and bowels, Dr. Chase's Kidney-Liver Pills affords relief for this condition most promptly. On this account they are generally recognized as the most effective cure for biliousness, liver complaint, indigestion, constipation, and the pains and aches which arise from poisons in the blood. The benefits are lasting because this medicine removes the cause of trouble.

One pill a dose, 25 cents a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto.
Do not be talked into accepting a substitute. Imitations disappoint.

Dr. A. W. Chase's Kidney-Liver Pills

Dr. Chase's Recipe Book, 1,000 selected recipes, sent free if you mention this paper.

6TH OVERSEAS UNIVERSITIES COMPANY, C. E. F.

REINFORCEMENTS FOR PRINCESS PATRICIA'S CANADIAN LIGHT INFANTRY.

Canadians, of whatever nationality, thrill as they recall the wonderful record made by the Princess Patricia's Canadian Light Infantry at Festubert, at Ypres, and many other battlefields in Belgium; how, in the face of overwhelming odds, they held their positions by their courage, steadiness and dogged perseverance.

For nearly a year the P. P. C. L. I. (as the Princess Patricia's Canadian Light Infantry is known in military circles) has been reinforced by a steady flow of recruits of the very finest of our Canadian manhood. These recruits, many now veterans, are determined that this fine battalion shall not lose its high record, but with their help shall have added honor and prestige in the future.

The reinforcements have been drawn from all over Canada, and the universities of Canada have made this battalion their care. Already 1,350 officers and men have gone forward under the title of the Universities Companies, and are doing their "bit" at the front or at Shorncliffe. Five Universities Companies have left Canada.

The number of men volunteering from the West has been simply wonderful. So much so that the authorities of the Western Canadian Universities decided to send overseas a battalion composed of students of the Western Universities and members of the teaching staff. This battalion is now recruiting and is called the 196th Western Universities Battalion, C. E. F.

The object of the Western Universities Battalion and of the Universities Companies is the same in that it provides a means for men to get to the front in congenial company, but though their paths are parallel, they are not identical in this respect. The Western Universities Battalion is for overseas service as a battalion, and the Universities Companies are reinforcing the Princess Patricias Canadian Light Infantry.

The P. P. C. L. I. is now composed mainly of men from the Universities Companies, and the steady flow of reinforcements for this battalion must not be allowed to stop, and further, the standard of the recruits must always be the "best that Canada can offer."

There are many men of the University type whose hearts grow warm as they read and hear the name of the Princess Pats, for they have brothers, relatives and friends in it, and they wish they could have an opportunity of joining it. To these men the news that a sixth company is being recruited, under Major McKergow, at McGill University, in Montreal, will be welcome.

The sixth company is in comfortable quarters at McGill University, and has all the advantages of the use of the McGill Campus and the University building, including the McGill Students' Union.

The Universities Companies have been almost overwhelmed with the hospitality of the residents of Montreal and its suburbs.

The training of the companies has been of an exceptionally efficient character, and has been of a nature to develop specialists, some, at musketry, others at signalling, others at tactical exercises, and again others in physical training, bayonet fighting and bombing.

The great advantage of these companies is that men of the same social status go forward together, and join a battalion in which they will find a large number of congenial spirits. Another advantage is the rapidity with which they go forward to the front. The training in Montreal usually takes about three months, and after two months further training in England they take their place in the firing line without unnecessary delay. The reason for this is the fact that these companies reinforce a battalion already at the front.

A considerable number of the men who have joined the Universities Companies have, upon reaching England, obtained commissions in the British and Canadian units. It is, of course, impossible to make any guarantee as to promotion of this character, but the nature of the training received and the reputation of the Universities Companies make the chances of promotion excellent for the type of men that the Universities Companies accept.

Intending recruits are examined locally by an army medical officer, receive their transportation to Montreal, and immediately obtain their uniform, and start their training without delay. Western men are invited to make known to their friends this company. McGill University, Montreal, will be glad to supply any further information that may be required.

Origin of the Clearing House.

In 1775 the bankers of London rented a house in Lombard street and fitted it with tables and desks for the use of their clerks as a place where bills, notes, drafts and other commercial paper might be exchanged without the trouble of personal visits of employees to all the metropolitan banks. Transfer tickets were used, and by means of this simple plan transactions involving many millions were settled without a penny changing hands. The Bank of England and all other important banks in London are members of the Clearing House Association. The first clearing house in the United States was established by the associated banks of New York in 1853.

Better Than Spanking

Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

Life Struggle of the Trees.

An interesting light is thrown on the longevity of the trees that grow along the timber line of the Rocky Mountains by Mr. Enos A. Mills in his Rocky Mountain Wonderland." He says:

A few timber line trees live a thousand years, but half that time is a ripe old age for most of the timber line veterans. The age of these trees cannot be judged by their size or by their general appearance. There may be centuries of difference in the ages of two arm in arm trees of similar size. I examined two trees that were growing within a few yards of each other in the shelter of a crag. One was fourteen feet high and sixteen inches in diameter and had 337 annual rings. The other was seven feet high and five inches in diameter, and had lived 492 years.

One day by the sunny and sheltered side of a bowlder I found a (tiny seed) bearer of an altitude of 11,800 feet. How splendidly unconscious it was of its size and its utterly wild surroundings! This brave pine bore a dainty cone, yet a drinking glass would have completely housed both the tree and its fruit.

WRITTEN BY CHILDREN.

Some Famous Hymns That Have Outlived Their Authors.

Some of the best known hymns in the language have been written by children. Everybody knows "My Faith Looks Up to Thee," a hymn with a unique record. It was the first hymn the author, Dr. Ray Palmer, ever wrote. It is by far the most popular of his hymns. It was written when he was a mere lad, and he survived its publication and popularity sixty years. It was set to music in the year of its birth and has always been sung to the same tune.

One of the best known hymns in the world is "There is a Land of Pure Delight." Yet it was written by Isaac Watts before he reached manhood. It is said that he was staying in the Isle of Wight and looking across to Hampshire when he penned the lines:

Sweet fields beyond the swelling flood
Stand dressed in living green.

That fine soldierly hymn, "Oft in Danger, Oft in Woe, Onward, Christian, Onward Go," was actually written by a boy and girl who never saw each other. The boy was poor Henry Kirke White, who died before he reached manhood, and the girl was Frances Fuller Maitland.

The fact is that when the boy poet died the little girl was not born. Exactly when Kirke White wrote his verses is not known, for they were found among his papers after his death. He had worked some sums in algebra on the same sheet.

Twenty years later the little Frances, fourteen years old, wrote the lines, beginning respectively, "Let your drooping hearts be glad," "Let not sorrow dim your eye," and "Onward, then to battle move," which made a fine hymn of what was really only a set of verses.

Frances Ridley Havergal wrote one of her best known hymns when she was a girl of fifteen. In fact, it was the first thing of any importance she ever penned. This is the pathetic hymn, "Thy Life Was Given For Me."

It was scribbled on the back of a circular in pencil and first read to an old, bedridden woman, who liked it so much that the little girl repented of her first intention to burn it, and her father wrote the well-known tune, Baca, to it.—London Tit-Bits.

Knew What He Was Doing.

At the time of the great disaster in Martinique the Italian bark Orsolina was taking on a cargo of sugar there. Her captain was accustomed to volcanoes, and he did not like the appearance of Mont Pelee. Not half his cargo was on board, but he decided to sail for home.

"The volcano is all right," argued the shippers. "Finish your loading."

"I don't know anything about Mont Pelee," said the captain, "but if Vesuvius looked that way I'd get out of Naples, and I'm going to get right out of here."

The shippers threatened him with arrest. They sent customs officers to detain him, but the captain persisted in leaving. Twenty-four hours later the shippers and the customs officers lay dead in the ruins of St. Pierre.

Corns Cured Quick Applied in 5 Seconds

Sore, blistering feet from corn-pinched toes can be cured by Putnam's Extractor in 24 hours. "Putnam's" soothes away that drawing pain, eases instantly, makes the feet feel good at once. Get a 25c bottle of "Putnam's" to-day.

"ENVIRONMENT

Stronger Than Heredity in Its Influence On Life.

A short time before the Civil War a New York policeman took in charge a ten-year-old boy whom he had noticed loitering about the streets and sleeping on park benches. The little fellow was a typical waif of the slums, bearing the marks of neglect, ill usage, and a deplorable family history. Investigation showed that he had no home, his mother being dead, and his father, a degenerate ne'er-do-well, having deserted him.

So far as the authorities could ascertain, the boy himself, an undersized, shrewd-looking youngster, had not as yet developed any criminal or seriously vicious traits. But the facts of his pedigree seemed to tell heavily in his disfavor, forecasting the day when he would become in some sort an offender against society. The immediate problem was how to dispose of him, and this was solved by turning him over to a charitable organization.

It so happened that about this time an Indiana farmer and his wife determined to adopt a boy. Chance—or Providence, as I prefer to put it—brought together the farmer and an agent for the society that then had the deserted ten-year-old boy in its keeping. The upshot of their meeting was that John Brady found a home with Mr. and Mrs. John Green, of Tipton, Indiana.

Great was the astonishment in the neighborhood when people learned what the Greens had done. Even the most optimistic agreed that they were "taking a big chance," while not a few gloomily predicted that they would rue the day when they had taken into their house a New York street urchin of dubious ancestry. But Mr. and Mrs. Green, refusing to be terrorized by the bogey of heredity, devoted themselves to the upbringing of the little John. They gave him love and they gave him discipline; through the work of the farm and the power of good example they trained him to be useful, diligent, and efficient, and they sent him to the red school-house at the cross-roads to gain the elementary education he should have received while a child in New York.

At nineteen he struck out for himself, beginning his life-work by teaching school. Three years later, having practised the most rigid self-denial to save the necessary funds, he returned east to become a student at Yale. Working his way through Yale, he then entered Union Theological Seminary, from which he was ordained to the Presbyterian ministry at the age of thirty.

Meantime he had set his heart on a project inspired by gratitude for the loving care his foster-parents had lavished on him. He would establish in Texas a farm-colony for boys who, like himself, had been born and reared in the slums. It was a splendid scheme; but alas, he found that it required more capital that he could raise. Still inspired with the ideal of helping others, he now took ship to Alaska, to begin among the native tribes a missionary enterprise that included social service of a high order. In 1897, just twenty years after he had first gone to Sitka, his labors were signally rewarded, when President McKinley appointed him Governor of Alaska, a post to which he was reappointed by President Roosevelt, and which he retained until five years ago.—Pictorial Review for May.

GILLETT'S LYE
MADE IN CANADA
For making soap.
For softening water.
For removing paint.
For disinfecting refrigerators, sinks, closets, drains and for 500 other purposes.
REFUSE SUBSTITUTES.

MOTHER AND BABY

The fond mother always has the welfare of her little ones at heart. She is continually on the watch for any appearance of the maladies which threaten her little ones. Thousands of mothers have learned by experience that nothing will equal Baby's Own Tablets in keeping the children well. Concerning them Mrs. R. Morehouse, Hillsfield, N. B., writes: "Baby's Own Tablets are the best medicine I have ever used for my baby. He was very cross but the Tablets soon put him right again." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Posy.

Have it.
Have it where?
Have it anywhere.
Just as you have it.
Have it singly or by the yard.
A rose may nestle in the corsage.
Or it may perch in the centre of the hat.
One idea is to have it catch up the skirt drapery.
Yet another shows it posed at intervals with tiny rose festoons between.
On one evening dress little strings of roses serve as shoulder straps.
Two or three of them may be embroidered on a hat, which leaves Boreas in despair.
Then there are funny bunched-up bits of cloth on some hats which wouldn't fool anybody, but which are flowers by courtesy.

Wonderful for the Blood!

Cures Sallow Skin, Headache, Languor and Tiredness.

You don't need to be told how you feel—blue, sort of sickish, poor appetite, vague pains, tired in the morning. This condition is common at this season.

Fortunately there is prompt relief in Dr. Hamilton's Pills, which immediately relieve the system of all poisons and disease producing matter.

Thousands have been so utterly depressed, so worn out as to be despondent; but Dr. Hamilton's Pills always cured them. "I can speak feelingly on the power of Dr. Hamilton's Pills," writes C. T. Fearman, of Kingston. "Last spring my blood was thin and weak, I was terribly run down, had awful headaches and a gnawing, empty feeling about my stomach, I couldn't sleep or work until I used Dr. Hamilton's Pills—they did me a world of good." At all dealers in 25c boxes.

Coating Steel With Zinc.

A new process of coating structural steel or any other exposed metal with zinc is just being introduced to those who are interested in such matters, and it is attracting considerable attention because of the ease and thoroughness with which the operation is performed, even after the metal has been put in place. Powdered zinc, compressed air and heat are the three elements which are used in the process, and the zinc is driven through a gas burner by the air, where it is instantly reduced to a liquid state, and as it strikes any surface capable of sustaining the force, it adheres and cools at once.

LEMBERG RICH IN NAMES.

It Has Had Twenty-Seven Different Ones in Its Career.

Many cities are known by more than one name, but it is given to few to rejoice in more than half a dozen distinctive cognomens. But the historic Galician City of Lemberg has been known at one time or another by no less than twenty-seven different appellations.

According to the Polish Bulletin, the ancient Ruthenian names for Lwoff were Lwow, Lwiw, Lwihrad, Lwihorod, Ilwiw; the Germans called it Lemberg, Lemberg, Lemburg, Loewenburg; the Latin and pseudo Latin names include Lebburgs, Lamburga, Leontopolis, Leone, Livivia, Leopolya; in the thirteenth century it was known to the Greeks as Lithon and Litbada.

The patriarchs of Constantinople, Alexandria and Jerusalem referred to it as Leovios and Leonopolis; the Turks call it in their books Illi, Ilbo, Ilbot, Ilibow, Ilbadir; the Armenians gave to it the name of Ilof; the Russians have lately baptized it Lwoff.

The real name of the city, it is asserted, is the Polish one of Lwow, which literally translated means Lion City.

CURE YOUR BAD COUGH BY BREATHING CATARRHOZONE

You may dislike taking medicine, but coughs are best cured without medicine. The modern treatment is "Catarrhozone"—it isn't a drug—it's a healing vapor full of pine essences and healing balsams. It spreads over the surfaces that are weak and sore from coughing. Every spot that is congested is healed, irritation is soothed away, phlegm and secretions are cleaned out, and all symptoms of cold and Catarrh are cured. Nothing so quick, so sure, so pleasant as Catarrhozone. Beware of dangerous substitutes meant to deceive you for genuine Catarrhozone. All dealers sell Catarrhozone, large size, which lasts two months, price $1.00; small size 50c, sample size 25c.

BRADSTREET'S TRADE REVIEW.

Toronto—Business conditions continue favorable. The big foundries are busy. There is work for every able-bodied man. Lumber yards are doing a bigger volume of business. In the dry goods trade both sorting and placing orders are keeping pace with recent encouraging reports. Prices are still on the upgrade, in some cases double what they were a year ago. The boot and shoe trade is fairly active. Leather houses have about all they can handle and are embarrassed to fill contracts being short of skilled labor. Hide and wool houses find manufacturers taking all current receipts. The grocery trade is doing a fairly active business. Prices of all classes of food animals are climbing higher.

Montreal—Wholesale trade continues on a healthy basis. Dry goods houses are doing better, a stronger inquiry coming for summer goods, with a good volume of orders for immediate delivery. Hardware firms have had better trade last ten days. The movement of groceries have been normal. Leather and boot and shoe men both are busy on orders. Security markets have had an active period.

Winnipeg—The middle west is passing through an active period in regard to wholesale business. Retailers are buying freely now to fill depleted shelves. Scarcity is still the complaint in dry goods circles, the dye problem being responsible. Prices are advancing steadily. In the boot and shoe department trade is on the quiet side at the moment. Prices in these lines are firm also. Improvement is reported in the grocery trade.

Calgary—Business in Alberta and Saskatchewan is practically on a par with the activity in Winnipeg. Dry goods, footwear and grocery firms share in a good volume of trade. In Calgary itself the volume of business is satisfactory. Edmonton reports steady improvement.

Vancouver—Much needed improvement in general trade is noticeable. Local wholesale and retail trade is better.

Hamilton—The big industries that are at the back of present commercial prosperity continue to do well. These have large war orders ahead of them, and orders for farm implements and construction equipment have been placed in liberal volume. Orders extend even into 1917. Wholesalers find trade with county points better as the spring opens.

London—The tone of business in retail and wholesale houses is healthy. Most industries are busy.

Ottawa—Wholesalers are doing a normal trade, especially in staple goods. Manufacturers are busy. City retailers have done a satisfactory trade all spring.

Quebec—Wholesale trade is active in all lines, and while dry goods houses fear a shortage in staple lines, orders are coming in freely. Provisions and groceries are moving well, building trades are active and there is a steady demand for supplies and material. Shoe manufacturers are working full time. Collections are fairly satisfactory for the season.

Halcyon Days.

The expression "halcyon days" originated with the ancient Sicilians. They firmly believed in an old legend that during the seven days preceding and the seven following the winter solstice —Dec. 21—the halcyon, or kingfisher, brooded over her young in a nest afloat on the surface of the water and that during these fourteen days the seas would be calm and safe for the mariner; hence the name "halcyon days," when, according to Milton, "birds of color sat brooding on the charmed wave."

Sayings of the Day.

"Surely a home should be, above all things else, an honest, and a worthy, self-expression of those who live in it."—Virginia Earle.

"Perhaps never in the history of our race has the family life been in greater danger of disorganization than at the present time."—Mrs. Vernon Major, of the Academy of Dramatic Arts.

"From the heart of the woman who, loving greatly, is herself greatly loved, radiates an atmosphere of gracious charm and perfect understanding, of peace and joy and sympathy, which no outside power can rival and no untoward circumstances can destroy."—Clara E. Bickford Miller.

OTHER PAPERS VIEWS

NOT A BET—A SURE THING.

(London Advertiser)

Here's betting the German reply in Washington asks for more explanations in order to gain time.

LET THE WAR PROCEED.

(Guelph Mercury)

Speaking of preparedness. We've just got in a new case of heading type about 1 foot high. They can go ahead and take Berlin as soon as they please now.

WOUNDED BY ITS FRIENDS.

(Ottawa Citizen)

From some of the evidence in the munitions investigation it begins to look as though protection got some rough handling in the house of its friends.

SAFETY FROM ZEPPELINS.

(Pittsburg Gazette-Times)

If a mist can prevent Zeppelin bombardment of Kent, couldn't London make itself safe by synthetic fogs when nature takes a holiday?

THE FIGHTING IRISH.

(Toronto Telegram)

Ireland will be judged by the FIGHTING IRISH in the trenches, not by the TALKING IRISH in the alleys of treason, their pay houses in Germany or their sympathizers in the U.S.A.

BRITAIN'S WORST ENEMIES.

(Belleville Ontario)

At present, the Northcliffe press and the Northcliffe faction in England are more menacing to the future of the British Empire than the armies of the Kaiser.

WOMAN, THE MONOPOLIST.

(Montreal Evening News)

Woman, in fact, has monopolized dyeing altogether, just as she has monopolized everything else worth having if there are still a few bachelors left in the world, there is only one inference to be drawn.

A MATTER OF TONNAGE.

(Pittsburg Gazette-Times)

The New York American complains that all the Sussex fuss is being made over a boat smaller than a Staten Island ferry. Principle, of course, is purely a matter of tonnage.

THE WHY OF THE SHORT SKIRT.

(Guelph Mercury)

Women figure it out like this: What's the use of buying silk stockings if no person is going to see 'em Hence the "Birth of the Short Skirt."

WAS THERE ONE SUCH?

(Brantford Courier)

One of the best examples of the true Easter feeling was furnished by any woman who returned from church without having noticed how Mrs. Thingumbob was dressed.

NOT A THRIFT WORKER.

(Ottawa Free Press)

Because the weatherman put the kibosh on the Easter bonnet parade it doesn't necessarily follow that he is in league with this thrift campaign.

GOOD CAUSE FOR HATE.

(St. Thomas Journal)

Why Canadian forces are coming in for the special hate of the enemy is being made plain by the recurring Ypres-witness narratives of Canadian daring and courage.

WOULD FOOL THE GERMANS.

(Ottawa Citizen)

The British are erecting fake factories and other plants to attract the fire of Zeppelins, and cause them to waste time and ammunition. But why not fool them completely by erecting a few of our famous invisible mushroom plants?

IRELAND'S WORST ENEMIES.

(Buffalo Express)

Certainly there are no worse enemies of Ireland than those who have thus attempted to let loose the horrors of war within the country, thereby repudiating the cause for which 100,000 Irishmen have voluntarily offered their lives.

THE OTHER CASEMENTS.

(St. Thomas Journal)

Sir Roger Casement, as the arch traitor [illegible] of the empire, is more readily reckoned with than those [illegible] the mighty war by exciting political strife in such critical times are adding immeasurably to the [illegible] burdens of the empire's war leaders.

YES, IF FREED.

(St. Thomas Journal)

Once more the great Asquith has averted disaster for his government and the empire. Freed from the baleful influence of England's yellow press and its counterpart in parliament, Asquith and Lloyd George will carry the war through to success.

A MARTYR NOT WANTED.

(New York Sun)

In deciding what to do with Sir Roger Casement England might find a hint in [illegible] William III. In pardoning a noble Jacobite who had [illegible] he remarked [illegible] a martyr [illegible].

JOHN WESLEY.

(Woodstock Sentinel-Review)

Col. John Wesley Allison says he never [illegible] Hughes and the Shell Committee, and that he is a [illegible] the Allison from his [illegible] John Wesley [illegible].

DOWN ON VOLUNTEER SYSTEM.

(Ottawa Citizen)

If Great Britain had gone to conscription in August, 1914, the British would have a hundred times stronger than they are to-day, and there would not be [illegible] the empire. The reluctance of the British to abandon the free will theory has invited disaster.

To hold to the volunteer system is fanatic. It is indefensible. [illegible] given plain enough evidence of how it leads to blunders and incompetency.

EASY FOR JUDGE TUTHILL.

(Philadelphia Record)

Perhaps the Circuit Court of Cook county will now decide who was the man in the Iron Mask, who was Caspar Hauser, who wrote the Letters of Junius, what became of Louis XVII, who struck Billy Patterson, and why Theodore Roosevelt is. After giving judgment in the case of Heirs of Francis Bacon vs. All Mankind, supposed to have been decided by the verdict in the Court of History, Judge Tuthill would relish the task of solving the other historical mysteries.

GEN. LOGIE.

(Toronto Star, Thursday.)

General Logie, who was fifty years of age yesterday, now has under his command fifty thousand troops. He took up his great responsibility quite unexpectedly, and he has shown not only military ability, but wisdom in dealing with the relations between soldiers and civilians.

GEOGRAPHY, NOT PRINCIPLE.

(Philadelphia Record)

The Chicago Tribune, Colonel Roosevelt's most prominent newspaper supporter in 1912 raves over Mexico, but is gentle as a dove where Germany is concerned. Listen to it:

In the submarine controversy, despite violent press campaigns among the people to go to war with the Central Powers to establish a rule of action for the submarine or to insist upon the right of Americans to travel on [illegible] ships of belligerent nationality.

Here we see less interested in Mexico, [illegible] American rights on the ocean because we traveled more [illegible] geographical considerations, not to speak of the hyphenated vote, seem to be largely influential in forming many opinions.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

MILDMAY

BORN—In Mildmay, on Tuesday, May 2, to Mr. and Mrs. H. G. Wright, a son.

Signaller George Heise of Divisional Signal Corps of Ottawa visited in town for a few days last week.

Pte. Geo. Schefter, former editor of the Mildmay Gazette, who has enlisted in the 201st (Temperance) Batt. of Toronto, visited in town on Wednesday and Thursday last week.

A large number of Mildmay motorists motored to Hanover on Sunday, the splendid dry roads attracting many car owners to go for a spin.

Ptes. Anthony Schultels, Chas. Wendt and Norman Kaufmann of Walkerton were in town over Sunday.

Mr. and Mrs. J. R. Wendt of Wroxeter spent Sunday at Mr. C. Wendt's

Rev. John A. Marsh, of the Mildmay Presbyterian Church, since May 1st, succeeded in catching four fine strings of trout near his home at Holstein. On Saturday afternoon he also captured a 17 inch speckled trout in a pond near Mildmay.

Lieut. Dr. Zinn moved his office effects to Hanover last week and has closed his office, his time now being occupied by his work in the 160th Batt.

Mr. Art Kennedy of Harriston, Miss Bessie and Jeanette Daly of Palmerston, Mrs. Reba Schwalm and Miss Dora Wendt of Harriston motored from Harriston on Sunday and visited friends in town.

The bad spots in the road near Balaclava hill have been filled in and are now in fair shape for traffic.

Geo. Fink of Palmerston visited Mildmay friends last week. George is a fireman on the G. T. R. at Palmerston.

Rev. Mr. Mitchell of Victoria College preached in the Methodist church on Sunday. He will be stationed here during May and June.

Mr. Ed. Lobsinger who was at Elora as assistant Station Agent has been transferred to Lucknow.

Miss Alice Becker has a position at Port Elgin as Stenographer.

CARGILL

Mrs. F. F. Balsdon spent the past week with her parents in Pickering.

Our contemporary is complaining over our town not having been credited with enlistment honors in the 160th Batt. Edition of the Telescope, but had soldiers been billeted here, we would see the word Cargill oftener and Walkerton would not have been so frequently mentioned. But in the write-up of our village the enlistment was not mentioned and a few of our business men omitted. Our burg could have been given a larger splash and if short of space the extra sheet could have added.

A number from here attended the military church parade in Walkerton on Sunday.

Mr. J. J. Dick of Teeswater was in the village on Friday.

Mrs. Wm. and Miss Eleanor Jordan left on Thursday and Mrs. Thos. and Miss Bessie Abell on Monday for Brussels. We wish these two families our best wishes in their new homes.

Mr. and Mrs. O. Holgen, Mrs. Palmer and Mrs. J. Taylor were in the County Town on Saturday.

Dr. Porter of Walkerton made a business trip to our village on Saturday.

James Hardaker got part of his second finger taken off on Thursday with drag saw and Oliver Taylor had his hand jammed on Friday.

Messrs Ellinghausen and Heffernan of Walkerton assisted in the foundry for a few days last week.

Mr. Wm. White of Greenock moved into the village last week and has taken a position at the stave mill.

We regret to report that Jos. Kenney is under the doctor's care but at the time of writing is steadily improving.

Miss Mabel Clancy, our "Hello Girl" spent the week-end in Walkerton.

Monday morning of this week the death summons came to Robert Elder at his home on St. David St. Mr. Elder had been confined to his bed for only a week, but for over three months his health had been failing. He was a native of Tuckersmith having been born in that township over sixty-six years ago. When the deceased was about fourteen years of age the family moved to Cargill, in which section Mr. Elder continued to reside until about six years ago when he and his family came to Goderich. Besides his sorrowing widow, his departure is mourned by a family of three sons and three daughters:—Marie, of Toronto; Herbert, G. T. R. brakeman at Hamilton; Howard, G. T. R. agent at Norwich and James, G. T. P. agent at Jasper, Alta. He is survived also, by two sisters and two brothers:—Mrs. D. C. McKay of Toronto, Mrs. D. Noble of Walkerton, Sam of Montana and James of Cargill. All of the family with the exception of James were home for the funeral. The body was taken to Cargill on Wednesday morning for interment in Douglas Hill cemetery, a short service being conducted at the home on Tuesday evening by Rev. Geo. E. Ross. Mr. Elder was a Presbyterian in religion and a member of the Canadian Order of Foresters. The family have the sympathy of the community in their loss.—Goderich Signal, May 4th, '16.

The funeral which was held from the 12.38 a. m. train on Wednesday, May 3rd, to Douglas Hill cemetery, where service was held by Rev. H. M. Gale, was largely attended by friends and neighbors of the deceased who was highly respected and we extend our heartfelt sympathy to the bereaved ones in their sad affliction.

Football seems to be the banner game here this coming summer. No doubt there will be some SPEAKERS soon, judging by some of the addresses given on the field.

Mr. Wm. Cameron left on Monday for a week's visit at Renfrew.

Mrs. M. Bell and Mrs. B. D. Baillie and son were in Walkerton on Tuesday.

Mr. J. J. Schumacher and family and Mr. J. B. McGregor of Walkerton were in the burg on Tuesday.

At the home of Mr. and Mrs. W. Cliff (Cargill) on the evening of the 19th April, Mrs. G. Abell and Bessie were presented with a handsome clock and toilet set. The address which was read by Miss Maud McCoy at the presentation, after referring to the deep regret which the congregation and community feel with reference to the departure of Mr. and Mrs. Thomas Abell from this town for that of Brussels proceeds as follows:—"The services of Mrs. Abell in the W. A., The Ladies Aid, the Sunday School, and choir show a good combination of gifts and diligence as a worker for the Church. Bessie has rendered willing and regular service as organist in the Sunday School and on various occasions has officiated in the Church at different services. Mr. Thomas Abell has been a good Rector's Church Warden.

You will all leave with the respect and affection of the members of the Congregation being extended to you. We, the members of Holy Trinity Church, Cargill, ask Mrs. Abell and Bessie to accept these presents viz. this clock and toilet set, as a small token of our sincere appreciation of your services, and of our esteem and regard, and as a slight remembrance of our good will and of our very best wishes."

Signed on behalf of the Congregation,

Mrs. Brown,
Mrs. Chambers.

Cargill, Ontario
10th April, 1916.

Mrs. Abell who was taken by surprise and much moved by the kindness shown her, expressed her thanks in a few appropriate words.

In spite of the unconvenient weather a large gathering of friends were present and a splendid evening was spent.

GLAMIS

Miss Edith Howson returned to Clifford on Thursday after a short visit at her home here.

Mr. Jack McKeeman visited Kincardine friends on Sunday.

Messrs Thos. G. Percy, and George McKay have each purchased 50 acres of the farm of the late James McKenzie.

Mr. Henry Deehan is confined to his bed with an attack of inflammatory rheumatism.

Mr. and Mrs. Earl Avery of Armow, sundayed with Mr. and Mrs. J. D. Robertson.

Miss Margaret Symons who was clerking in Welshford's store, Paisley, has returned home.

Pte. Angus McIver of Kincardine is working with Mr. Wm. McKenzie.

A large representation of the I. O. O. F. Order from here attended Divine Service in Tiverton on Sunday.

Miss Myrtle Garland, and Master Cecil Garland are visiting at Mr. James Thompson's this week.

Miss Lila Cunningham resumed her duties in store and office this week.

Miss Ethel Pickard of Paisley is a guest of Misses Howson.

Misses Aileen Pinkerton and Sadie Colwell of Pinkerton sundayed with the latter's sister Mrs J. D. Robertson.

Messrs Thos. Colwell Sr. and Will Robinson have purchased new buggies.

Conductor Coll. D. McClean returned to his duties at Perry Sound on Thursday.

Mr. Neil C. McFarlane is under the Dr's. care, and is very ill. All hope for his speedy recovery.

Pte. John Kitchen of the Military School Walkerton spent the week end at his home here.

The Missionary Society held their meeting in the Church on Wednesday.

Private Clyde McKeeman has returned from Toronto.

Mrs. F. Beaton and family of Toronto are here for a short time and are living in Mr. Malc. MacLean's house.

Mr. J. K. McLennan met with an accident on Saturday evening when the buggy went over him in a runaway. Mr. McLennan as far as is known is not seriously hurt and hopes to be around soon. The horse was caught in a wire fence and was caught before any damage was done. The buggy was damaged considerably but everyone is pleased that the accident was not more serious.

An order of 100 copies of "The Bruce Batt. Number special edition of the Telescope" edited by the I. O. D. E. Walkerton was sent here. Who says Glamis is not Patriotic? A very newsy budget of news as well as a good piece of poetry was sent from here at the request of the Ladies Committee but the items failed to appear. We all feel that Glamis was not fairly treated in this matter.

HANOVER

A big Military Day will be held at Hanover next Friday, May 12th. when the town will give its farewell greeting to the Hanover boys in the 147th Greys. The officers of the Greys and several hundred men are coming down from Owen Sound by special train to take part.

Mr. Frank Eckenswiller, aged 53 years, an employee of the Hanover Iron Works was knocked down by an automobile and a nasty gash inflicted on his forehead.

Lt.-Col. McFarland of the 147th Greys received word to call for 50 volunteers for the Pioneers. The call was promptly responded to and the men are busy outfitting preparatory to leaving for England. It was expected that the Grey battalion would be up to strength in a few days. The removal of 50 men will retard this event as recruits are coming in slowly.

Our public school resumed operations on Monday with the usual Easter increase due to beginners. This year we have already almost 50 new scholars and our primary rooms are already well filled.

Two hundred more recruits are needed to fill up the ranks of the 147th Grey Battalion.

OTTER CREEK

Mr. Charles Smith's babe is very ill.

Miss Grace Hogg of New York was a visitor at Mr. J. Hogg's last week.

Mr. and Mrs. John Hogg left for the west on Monday last.

The friends and acquaintances of Rev. L. Pletsch met at the home of Mr. and Mrs. Philip Gress on Thursday evening to spend a last social time prior to Mr. Pletsch's leaving for Rockingham where he is stationed. There was a program consisting of readings, stump speeches and songs, after which a luncheon was served. Mr. Pletsch was an able speaker and made a very appropriate speech for the occasion. The luncheon consisted of salmon sandwiches, pea-nut sandwiches, pies, cream puffs, lemon tarts, nut cakes and home-made chocolate candy. Mr. Pletsch was very well thought of and everybody wishes him best of success in his new sphere of labor.

PINKERTON

Misses Sadie Colwell and Aileen Pinkerton spent Sunday with the former's sister, Mrs. D. Robertson, in Glamis.

A number from here attended services at Glamis, on Sunday evening.

A large crowd attended the recruiting meeting here on Wednesday evening last and listened to short but stirring addresses by Judge Klein. John Rowland, Major Moffat and Rev. Mr. Gale. Mr. W. D. Sargill, M. P. P., acted as chairman in a very efficient manner. A feature of the evening was the presentation of an address and wrist watch by the people of Brant Township to Pte. Wm. Barry of 48th Highlanders, who was wounded at the battle of Ypres. No recruits have been forth-coming as yet.

Pte. Gordon Garland spent Sunday at Mr. J. Thompson's of Glamis.

We are sorry to report the illness of Miss. Ellen Gibb. We wish her a speedy recovery.

Miss Lizzie Sweeney has returned to town after a month's absence.

Great interest is being taken in a small pony which has been purchased by Senator Donnelly and every evening, both young and old may be seen watching the pony being put through its different antics by the younger generation.

Messrs. Alam Foreman and Wm. Alexander each lost a fine horse last week.

GREENOCK

Mr. Wallace Cunningham of the Toronto University is spending a week at his home here.

Jake Schurter who was laid up with quinsy last week is able to get out again.

Mr. and Mrs. G. E. Ernewein are moving to Walkerton this week. Mr. Ernewein has a position at the Hattan Factory.

Miss Olive Schurter returned home on Saturday after spending two weeks at Walkerton.

Mr. and Mrs. Joe Lawrence of Clifford visited at Mr. Geo. Winters on Sunday.

Mrs. H. L. Hawthorne returned home last Friday after spending two weeks with her mother at Fergus.

Mr. and Mrs. Michael Schutter of Chepstowe visited at Mr. John Schurter's on Sunday.

Mr. Alex Kraemer bought Mr. Geo. Ernewein's wagonshop and stock last week. We wish Alex every success in business.

A very pretty wedding took place at Mrs. Sam Whyte's on the 3rd of May, when her niece Miss Florence Lockard was married to Mr. Fred Brindley. The happy couple will live on the groom's farm at Riversdale. We wish them every joy and success in their journey through life.

KINLOSS

The farmers of this vicinity are anxiously waiting for good seeding weather. Some east of the village have already started.

The C. O. F. held their regular meeting on Friday evening.

Our latest recruit is William Portice. Good luck to Billie.

Next Sunday is "Mothers' Day" and with our worthy pastor and new choir, it should be worth our while to attend.

Can anybody east tell us if the Kingarf road is getting better?

Miss Doris Portice has returned from the West where she spent the winter.

Miss Lyla Stanley is visiting Mrs. Latchford Thacker of Kingarf for a while.

Miss Abbie Rowe visited Mrs. Allan Keske Friday evening.

Mr. L. McDonald was home over Sunday. He is employed in the munition factory in Kincardine.

Mrs. Peter Miller is staying with her daughter, Mrs. Wesley Lecson. We understand she intends making her home there.

Miss Florence Hurd is visiting her sister, Mrs. Jno. Halladay in Teeswater.

We are pleased to have Mr. and Mrs Peter McDonald and family with us again.

The stork visited Mr. and Mrs. Alex. Caskanette and left a fine big baby.

Mr. and Mrs. Eldon Bell and Miss Violet Herd motored from Hanover on Sunday last and spent the day at their mother's.

Behind The Bolted Door?

YOU will find a gripping detective story in the May number of MACLEAN'S MAGAZINE—"Behind the Bolted Door"—by Arthur E. McFarlane. Full of mystery, tense with interest, alive with action, passing strange in plot and incident, it is baffling until the last paragraph of the last chapter.

This McFarlane story is but one of many "specials" in the May MACLEAN'S—an issue really remarkable for its high quality, as witness the following writers. These contributors are, as you will recognize, a most exceptional company—the best known of Canadian writers.

Arthur E. McFarlane
Stephen Leacock
Nellie L. McClung
Robert W. Service
Agnes C. Laut

EDITORIALS BY:
Sir Herbert Ames
N. W. Rowell
C. C. James
James L. Hughes
J. P. Downey

And next issue (June), the first of ARTHUR STRINGER'S new serial story, "The Anatomy of Love."

MACLEAN'S MAGAZINE has one feature which commends it to all readers—its Review of Reviews department. Here is reprinted the heart of the best things appearing in the leading magazines and periodicals of the world. So in MACLEAN'S one gets the essence of many magazines.

Rich promise in this May Number of many hours of genuine entertainment and profitable reading. A big 15 cents' worth—more than you find in a $1.50 work of fiction. For the price of a new novel, you can have twelve numbers of MACLEAN'S.

MACLEAN'S MAGAZINE is Canada's best periodical publication. It is out-and-out Canadian and is doing a fine work for the encouragement of Canadian literature and writers. As a good Canadian, you should be a yearly subscriber.

Begin your Subscription with the May Issue, $1.50

Just write your name and address on this advertisement, and mail to the publishers—The MacLean Publishing Co., Ltd. 143 University Ave., Toronto. Bill for $1.50 will be sent later. Enclose remittance if you prefer.

SUDDEN DEATH

Mrs. John Schnitzler Passed Away at Toronto Hospital on Monday.

A telephone message from Toronto announcing the death of Mrs. John Schnitzler came as a shock to the community on Monday night. Mrs. Schnitzler was a young woman of fine, healthy appearance, and even to those immediate friends who knew she had gone to Toronto with her husband to have a serious operation, the news of her death was no less unexpected as word had come from the hospital that she was making fine progress. It appears that she came through the operation successfully and everything was favorable until Sunday at 11 p. m. when she took a sudden hemorrhage. After that her condition became rapidly worse, and the end came at six o'clock Monday evening. Mrs. Schnitzler, who was in her 29th year, was the daughter of Mr. John Lynett of Ayton. She had been married only five years. Together with her husband she found pleasure in beautifying the home and its surroundings, and there was no more homelike little place in the town than their property on Durham St. West. For the bereaved husband, deep sympathy is felt on all sides. To allow a sister of the deceased, to reach here from Regina the funeral will not be held until Friday. Service will be held at the R. C. Church at 9.30 a. m.

BOYS GET A CHANCE

Father Pays for Destroyed Furniture and Boys Get a Year to Show Good Behavior

Judge Klein gave a decision on Monday in the case of the young housebreakers which is calculated to make good citizens out of the two young delinquents. Mr. Robertson, who appeared for the Crown in Mr. Dixon's absence reported that the father had made satisfactory restitution for the property destroyed ($150.00.) His Honor bound the father for the sum of $200 to guarantee the appearance of the boys in court on May 15th, 1917, to show that they had behaved themselves properly during the year. In case they are able to show a clean sheet for the year, no further action may be taken, otherwise they will be sent to Industrial School. Both of the boys undertake to attend Sunday School every Sunday unless sick and the younger boy must attend school every day, unless sick; and get good reports from their teachers.

PATRIOTIC LEAGUE

Leading Citizens Heartily Approve Judge Klein's Suggestion

Judge Klein's suggestion to form a Bruce Patriotic League has been enthusiastically taken up by the representative men of Bruce to whom the Judge addressed a circular letter last week. Out of 150 letters sent out, over a hundred favorable replies were received within five days. These included letters from the members of parliament, including Senator Donnelly, county councillors and leading men of all the municipalities. The Judge's idea is to arrange to give a proper welcome to returning soldiers and to get them a job, to assist in further recruiting when necessary, promote patriotism and boost Bruce County. Judge Klein intends calling a meeting of the citizens of Bruce the day before the 160th Battalion leaves Walkerton. The date is still uncertain. This will give the men an opportunity to see the soldiers and to be present when the farewell address and presentation to the Battalion by Warden McNab will be made.

WALKERTON CAMPAIGN

$3000.00 Pledged in Advance by Small Number of Citizens.

The canvass to raise $12,000 in Walkerton in two days for the Patriotic and Red Cross funds is off to a good start. The canvassers will begin their two days' effort at 9 o'clock this (Thursday) morning, with the sum of $3,000 already promised in advance by a small group of citizens as a nice little nest egg to get things going. Whether the full sum aimed at by the committee will be realized remains to be seen, but at any rate, a thoroughly organized effort is being made with plenty of steam and enthusiasm behind it, and if the citizens do their part as well as the preliminary canvass would indicate, Walkerton will have nothing to be ashamed of.

The campaign committee aims at $4 per head for every man, woman and child in Walkerton. Each subscription, unless otherwise stipulated by the donor, will be allotted three-fourths to the Patriotic Fund and one-fourth to the Red Cross Fund.

Patriotic Campaign

THURSDAY AND FRIDAY

Objections and Answers

OBJECTION 1

The Government should pay the Soldiers' dependents all they require.

FACT 1

The Government is paying much already, viz., $20.00 per month, to the dependent families of every soldier who goes to the front. This in itself is not sufficient to maintain a home. But many families have other incomes, and in their case only $20.00 per month is sufficient. The Government cannot discriminate, and the Patriotic Fund can. Whereas 60,000 families are paid separation allowances, only 36,000 receive assistance from the Patriotic Fund. Thus $600,000 per month is saved.

The work is done by volunteer help, who are the best men in the city or town in which they live. They give more sympathetic consideration to a family, especially if in distress, than any paid Government offical would. Thus many homes are kept from breaking up by the kind attention given by the Local Committee.

It provides an outlet for effort for those who cannot go to the front, and who want to have a personal and direct part in the conflict.

OBJECTION 2

That a large proportion of the funds contributed is eaten up in large salaries to highly-paid officials.

FACT 2

The cost of operation of the fund is very low. No member of the Central Committee receives any salary. The only money expended on administration is that paid to stenographers and bookkeepers necessary to attend to the correspondence and bookkeeping. Also some offices have to be kept up. So far, for every Hundred Dollars ($100) raised and administered the cost has been eight cents.

OBJECTION 3

The subscriber has no adequate guarantee that the money is being administered honestly.

FACT 3

The Fund has been incorporated by Act of Parliament, and its scope of operation carefully mapped out. The books are subject to a local audit in each community; and also to the Auditor-General of Canada. [illegible] no institution is more proof against dishonesty than the character of the men of the Executive warrant. The Executive of the Patriotic Fund is composed of men who are in the work for what they [illegible] rather than for what they can get out of it. They are men of proven integrity. These two facts furnish the best possible proof that the money is being administered honestly and wisely.

OBJECTION 4

That the dependents of many soldiers are in better circumstances than when the soldiers were at home.

FACT 4

In some cases the dependents are in better circumstances; in the most cases they are not and no monetary consideration can repay them for their sacrifice and service. The least we can do is to see that they are maintained in reasonable comfort. Every soldier who goes to fight is undertaking a bigger job than he ever tackled before, and his dependents are entitled to a correspondingly increased standard of living. Who of us is anxious to exchange positions with a private?

OBJECTION 5

That the dependents of Canal Guards are receiving money from the Patriotic Fund.

FACT 5

Only the dependents of soldiers who have enlisted for Overseas Service are entitled to help from the Fund. The dependents of Canal Guards and Home Service men do not receive any assistance.

OBJECTION 6

That a large proportion of the money is paid to the dependents of officers.

FACT 6

The Patriotic Fund considers that the pay of the officer and separation allowance to his wife are sufficient to maintain a family in comfort. Thus only the dependents of privates are entitled to help. Only in rare cases of illness or distress do the dependents of officers receive any aid from the Fund.

Passed With Honours

Among those who passed the final examinations at the Ontario College of Pharmacy this month was Mr. Oscar E. Seigmiller, son of Mr. Adam Seigmiller of Walkerton. Oscar is to be congratulated on passing with honours.

+ + +

Ed. Monahan Hurt

Mr. Ed. Monahon, section foreman on the G. T. R. at Elmwood, was badly hurt one day last week. He and some assistants were going down the track on a hand car and had to stop suddenly on meeting a train. Monahon was thrown off the jigger, with some force. Several teeth were knocked out and his leg fractured.

+ + +

Big Cattle Shipments

No less than 170 fat cattle, comprising shipments by Messrs McNab, Doerr, and Dietner, were shipped from Dunkeld Station on Saturday. The cattle were a fine bunch and were bought from farmers throughout the countryside. At the prevailing price of beef the money which changed hands on the shipments would run into a good many thousands of dollars.

+ + +

Old Papers in Abundance.

The collection of old newspapers and magazines by high and public school pupils is getting along famously. On Saturday no less than 1,200 pounds were collected, doubling the collection of the previous Saturday. The boys and girls are still on the war path for old papers and will be glad to have the co-operation of the public.

The inspector of cadets is expected here this afternoon to inspect the High School corps. The public are welcome to witness the inspection on the grounds, in case the inspector comes.

+ + +

With the 71st.

Mr. Thos. Cunningham had a letter on Monday from his son, Private Chester Cunningham, who landed recently with the 71st in England, and is now at Bramshott Camp. Chester was one of twenty-five picked men from the battalion chosen as scouts. He refers in his letter to having seen Lord Nelson's old home on one of his tramps. His squad is at present quarantined for measles, but is getting its regular dose of drill.

+ + +

A Great Contrivance.

The Walkerton Garage has just installed at big expense, a Bowser gasoline pump, one of the greatest devices ever invented so far as the motorist is concerned. While the gasoline is being pumped it separates the water and all foreign substances from the gasoline. And it's surprising how much foreign substance there is. A Walkerton auto owner who has motored a great deal throughout Western Ontario says:—"I stop wherever I see a Bowser pump."

+ + +

The Twenty-Fourth

If elaborate preparations count for anything, the Twenty-fourth will be a memorable day in Walkerton. A program including all kinds of sports and military exercises, covering morning, afternoon, and evening will provide the best of entertainment and enable the visitors to see the Battalion at its best. With the excellent railroad arrangements which the Committee has succeeded in making there should be a bumper crowd present from all parts of the county.

MEASLES IN THE 160TH

Battalion Received Official Word Yesterday to Entrain for London on June 5th, but May Be Held Up Owing to Threatened Epidemic.

Will the 160th, Bruce Battalion remain in Walkerton all summer? They certainly will, if the epidemic of measles which has broken out gets a fair hold on the Battalion. Several new cases of measles were reported yesterday and to-day. Col. Weir is isolating the victims in a temporary hospital on Bilkie's Hill just west of the Fair Grounds and hopes to stay the epidemic but if the outbreak continues, it will be all summer in Walkerton for the Battalion.

Official permission was received from headquarters yesterday for the Battalion to go to Chesley on Friday, June 2 and to entrain for London on Monday, June 5. The measles epidemic may of course change all this.

At Chesley the Battalion will be presented with the Battalion colors by the generous donor, Mr. M. A. Halliday. Chesley will have a big proposition on its hands billeting the entire Battalion for a couple of days and possibly more. Whether the Battalion will remain at Chesley and entrain for London on Monday, June 5th, or return to Walkerton on Saturday and entrain here is not known yet.

ENJOYED A FEAST

Soldiers Quartered at Old Station Hotel Given a Spread by Ladies of Neighborhood

The thirty-two soldiers who are quartered at the Station Hotel are firmly convinced that they are living in the finest neighborhood on top of earth, and the good people of the neighborhood, on the other hand, believe that nothing is too good for the soldiers. "We hated to be sent away up here," one young fellow told the Telescope, "but now we don't care how long we stay." On Friday afternoon last, there was quite a stir around the station corner. Women and small boys were seen laden with mysterious parcels, headed for the hotel. The mystery was solved at six o'clock when the boys sat down to a supper fit for a king. The women of the neighborhood, not a few of whom have boys at the front, spared no pains in getting up a good hot supper for the soldiers, and maybe they did not appreciate it. After full justice had been done to the dainties, Lance-Corporal Doug. McCallum, a sturdy Scot from Wiarton, who is in charge of the squad, expressed the boys' best thanks. The affair was gotten up by Mrs. Sutton, Mrs. Latchford and Mrs. Wallace, and all the ladies of the neighborhood made generous contributions of eatables. On Monday evening the boys "retaliated" by giving an informal concert and dance to which all the folks of the neighborhood were invited and a good time spent. Songs and recitations were given by some of the men, and a number of selections on Mr. Jerome's gramophone were enjoyed.

Four Brothers in 160th.

PTES. BERT, NORVAL, CLIFFORD, AND WILTON BELL

The four fine looking soldier boys in the above photo are sons of Mr. and Mrs. W. A. Bell of Pine River and grandsons of the late John Wilton of Carrick Tp. All are members of the 160th Bruce Battalion. The tall figure in the upper left hand corner is "Bert," who has been dangerously ill with pneumonia at the County Hospital, but is doing fine. Pte. Alvin Wilton of Walkerton, now at Bramshott Camp, England, with the 71st Batt., and Pte. Fred Wilton of Walkerton, who is with a Field Gun Section at Hamilton, are cousins of the Bell brothers.

Women's Institute Booth.

The Women's Institute purpose having a booth at the Exhibition grounds on May 24th. Proceeds to go to Patriotic Work. Donations of baking, cream, etc. gratefully received.

NEWS ABOUT TOWN

Wool wanted S. A. Rife & Co.

Mrs. H. M. Ley went to Toronto on Monday.

Brant Court of Revision, Thursday, May 25th.

Men & Boys tailored suits. S. A. Rife & Co.

Mr. Thos. Dixon arrived home from the West on Friday.

Reduced rates C. P. R. Victoria Day. Tickets at Hunters.

Pte. Dowle who was operated on for appendicitis is doing well.

Messrs John Rowland and Val. Fischer have bought new cars.

Mr. Howard Todd left on Friday on his return journey to Red Deer, Alta.

Mr. S. F. Klinghausen of the Walkerton Foundry had a telephone installed last week.

Miss MacHale, who has been visiting the Misses Schumacher returned to Chicago on Monday.

Mrs. J. J. Wilber is attending the Annual Meeting of the Daughters of the Empire at Toronto.

Mrs. Martyn is visiting friends at Hamilton this week. Mrs. Geo. Martyn is visiting at Toronto.

Mr. George P. Ernewein moved on Saturday into the house vacated by Mr. Mathew Hudson, Napier St.

Mr. Norman Robertson is back at his office this week, but is still unable to move about freely.

Corp. Treve James returned last week from Winnipeg where he went on ten days leave of absence.

Lieut. Arthur Robertson of Toronto spent a few days this week with his parents, Mr. and Mrs. David Robertson.

Mrs. H. O. O'Heron and daughter Ruth, of Simcoe are visiting her brother, Mr. T. J. Fehrenbach for a few days.

Mr. John H. Appel is confined to the home a few days with an attack of rheumatism which has settled in his foot.

Mrs. Monroe returned to Thorold on Monday, accompanied by her mother, Mrs. Gibson, who will make an extended visit.

Rexall "93" Shampoo Paste cleanses the hair and scalp imparting a lovely gloss. 25c tins. Sold only by Rexall Drug Stores.—A. P. Sieveright.

Mr. and Mrs. J. J. Schnitzler, and daughter, Marguerite of Waterloo, and Miss Marcella Weller of Berlin, arrived yesterday afternoon to attend the funeral of Mrs. John Schnitzler.

Rev. T. Wilson will preach at Beeton next Sunday, the occasion being the Anniversary Services. Rev. Mr. McCurdy of Beeton will take the work here.

Mrs. Alexander of Eden Grove, has bought Mr. Robinson's house on Victoria St. next to A. E. McNab's. The deal was put through by Mr. James Whitehead.

Mr. Charles Stephan has been confined to the house the past week with a touch of congestion. He is now doing nicely and will probably be out again in a few days.

Pte. Jack Motlock, who was hurt at the Fair grounds last week is reported to be making fine progress at the hospital and will be removed to his home at Rodney in a few days.

Mr. C. W. Cryderman returned on Saturday from Hamilton where he had been visiting on some examinations in connection with the work of the Inland Revenue Dept.

Mrs. A. B. Downing and son Kenneth who have been visiting her parents, Mr. and Mrs. S. Vogan the past four months are leaving for their home at Winnipeg Wednesday afternoon.

Mrs. E. J. Shelton, Sec. of the I. O. D. E. gratefully acknowledges the receipt of the following contributions: $57.30 from Soldiers Aid Tea Room; $5.00 from Mrs. H. R. Brewer of Calgary; $10, from Mr. D. McGilvray of Halifax; $25 from Mr. W. A. MacLean, Louisville, Ky.

Mrs. Elizabeth McKirdy, who had been spending the winter with her daughter, Mrs. J. P. Robertson at Detroit, returned this week to the home of her daughter, Mrs. John McCool. Mrs. Robertson made the journey with her, returning on Friday to Detroit.

Amos Fizzell, the old farmer of Kinlough, who has been in gaol here the past week, awaiting trial was returned to Kinlough for trial on Wednesday. Magistrate James Tolton is hearing the case. Crown Attorney Dixon is prosecuting, and O. E. Klein is defending Fizzell.

Messrs Geo. Hudson, publisher of the Haldemand Advocate of Cayuga, and Ed. Hudson, publisher of the Beamsville Express, were here on Friday helping their father to get things in shape for moving to Beamsville. Mr. and Miss Hudson left for their new home on Saturday morning.

County Council meets at Port Elgin on June 5th.

Next Wednesday will be May 24th. Victoria Day.

There is a good deal to be brought out into the open yet at the Ottawa Shell inquiry.

Rev. J. H. Grenzenbach has taken up residence in Mr. Thos Young's house on Yonge St.

Messrs. John Muirie and William Alexander of Pinkerton were in town on business Friday.

The bricking in of the large windows under the Town Hall at the rear has been completed.

Housewives will find much to interest them in the advertising columns of this week's Telescope.

Ed. Mosack leaves on Thursday for Preston where he has accepted a position in the machine shops.

Mr. William Patterson Sr. acquired a farm near Aylmer this week in a deal for an Owen Sound block.

Get your gasoline from the Bowser pump, pure filtered gasoline.—Walkerton Garage, opposite Town Hall.

Mr. A. W. Ferguson, B.A., mathematics master at the high school, is laid up with an attack of tonsilitis.

Mr. Dick Fraser is sending up a new Chevrolet car for his father, Mr. F. J. Fraser this week from Hamilton.

This year is about the latest for seeding on record in this section. A great deal of seeding yet remains to be done.

Miss Ethel Cryderman graduated from the Toronto General Hospital on May 12th, as a professional nurse with honour standing.

Inspector John McCool has purchased a Dodge Bros. touring auto from the Walkerton Garage, to be delivered the end of the week.

Two popular young officers, Lieuts. Harold Patterson and Victor McKechnie, have received confirmation of their appointments in the 160th.

As the leave of most of the 160th men who are helping with seeding expires from May 22nd to May 24th, the Battalion will be pretty well up to strength for the big military field day here on the 24th.

Oscar E. Seegmiller, who has just completed his examinations at the Ontario College of Pharmacy with honors, is writing this week for his Phm. B. degree. Oscar has taken a position in Berlin at Roos' drug store.

At Police Court

A dispute between John McPherson a Greenock Tp. farmer, and Freeman Taylor, an implement agent of the same township, has resulted in a police court case which will be tried shortly before Magistrate James Tolton. McPherson, it appears, bought a wagon from Taylor. There was some dispute over the payment, whereupon Taylor came and took the wagon away. Freeman claims that the agent had no right to do so, and laid a theft charge before Magistrate Tolton.

Children's Money Did It.

Mr. N. C. McKay of the Agricultural Department, received this week from the department at Toronto, a large photograph of the very fine and complete motor ambulance, which was presented to the Red Cross Society by the school children of Ontario. It cost over $1,700 and about one-tenth of this amount was contributed by the school children of Bruce County through Mr. McKay, from the profits of their potato war plots.

Presentation to Mr. Hudson

For upwards of forty years Mr. Matthew Hudson has been a faithful and active member of the Methodist Church. On the trustee board, quarterly board and in the various activities of the church, he has at all times been a trusty servant. Now that he is leaving to make his home elsewhere, the congregation will feel a sense of loss. This was referred to at the meeting of the quarterly official board on Thursday evening last by the pastor, Rev. D. A. Walker. Mr. Hudson was also presented with a very nice address from the official boards of the church and a handsome umbrella suitably engraved.

CROSS PURPOSES

"Oh, you may call me what you like," said Gilbert. "I can assure you I feel old enough sometimes—detestably, flatly, hopelessly old!" He spoke quickly and passionately; the sunshine lighted his fair, handsome features, and the description of himself, which was absurd in connection with his actual years, was rendered more obviously so by the fact that, apart from a certain expression of face, Gilbert South was a very young-looking man. He had the air of being conscious of every moment of his past life. One would have said that he continually "added up the mortal amount" of days, weeks, and years which he had spent on earth, and carried the total in his weary thoughts. And all the time it seemed as if he only wanted a touch of something not easy to define, of hopelessness, perhaps, or passion, or even defiance, to make him as young as he was at five and twenty. It was hardly wanting as he turned to Mrs. Austin, "Say what you please of me! It doesn't matter. But don't say it of yourself, if you——"

The sentence was never finished. "I believe those two are actually going to leave off playing," he said, in a tone of gentle acquiescence in the decrees of destiny.

When the time came for the party to set out on their excursion to the Castle, Frank saw them off with an anxious solicitude for their comfort, which pleased his mother very much. Tiny, behind the scenes, remarked it, too, and said to herself that Frank could afford to be very polite since he was going to get rid of his two bores for the whole afternoon. She liked the politeness none the less for her knowledge of her cousin's motive, and nodded him a bright farewell as she took her place in the carriage.

To the last moment young Leicester was apparently troubled with misgivings about his ruin. "You'll remember that it's a very little one," he said to Mrs. Austin, while his mother was arranging herself and her many shawls.

"Do you know that you are really heightening my expectations?" she replied. "When were you there last? I hope nobody has taken a fancy to it since then, and put it in his pocket."

Frank laughed. "I hope not," he said. "Tiny can find it for you, if it's still there. She knows where to look for it."

"Where to look for what?" Mrs. Leicester inquired. "Wild flowers? We are quite ready, tell them, Frank." And they drove off.

As soon as they were beyond the park gates Mrs. Austin was called upon to admire the scenery. "Of course, we don't pretend to have any wonderful hills and rocks and waterfalls and things," said Mrs. Leicester. "But it is just the kind of landscape I like: so simple and English and home-like. Look at that bit of path and that stile, now; wouldn't it make a sweet little water-color picture—with a pretty girl, you know, or an old woman in a red cloak?"

It struck Mrs. Austin that the stile, or any number of stiles exactly like it, had been so wearisomely fitted with simpering rustics that the suggestion was unnecessary. Mrs. Leicester, however obviously prided herself on the idea as an original one. "And I like this up and down much better than those very steep hills—they make such endless trouble with the horses," the good lady went on. She smiled kindly round on everything, and seemed to settle herself comfortably in the county as if it had been made to suit her. And, indeed, if it had been designed with that intention it would hardly have been different.

Mrs. Austin was civil, though not enthusiastic in reply. She would have preferred something wilder and more hilly; but, then, the sleek chestnuts were not her horses. Or, failing that, she would have had the pretty little undulations, which pleased Mrs. Leicester, abolished altogether. She would have liked to drive swiftly forward over wide, lonely levels, with the great arch of sky overhead. She did not appreciate the carefully kept hedges, enclosing stubble and turnips, nor the prim little plantations which looked like preparatory schools for young trees, nor the small spire which rose with an air of the utmost decorum above a neat church yard.

"There is Frank!" said Tiny Vivian. They all turned to look at the distant figure, which Tiny, who knew the road that he would take, had recognized. Frank was seen for a moment on a gentle ascent, and then lost behind a clump of trees, but the glimpse remained with Mrs. Austin as a little picture. She did not know why it was that the words "the only son of his mother, and she was a widow," came into her head as he rode away, but she realised all at once how precious the kindly, handsome, common place young fellow was in his own home. Mrs. Austin, as she sat absently looking at Frank's bit of road, was thinking of a baby's little grave, closed ten years earlier over a life too short to be borne in anybody's mind but hers. "The only son of his mother." And when she died, the little memory could interest no one but the busy people who count up births and deaths and take pleasure in averages. Even for her it had no individuality that could be expressed in words, though she would not have parted with it for all that life could give.

Meanwhile the carriage rolled smoothly on, and she looked right and left at all the views that were pointed out to her, till Mrs. Leicester was able to announce, with proud excitement, "And there—no, not there—a little farther—no, that tree is in the way for a moment—there: now, don't you see a bit of the Castle wall? Don't you, Mr. South, just beyond the field where the cow is?"

Two minutes later they pulled up by the roadside, at the point nearest to the ruins, and the party set out to walk the brief remainder of the way. There was no difficulty in finding the Castle. It stood, together with a small haystack, in the corner of a dreary little field, and consisted of a part of a tower, a few scattered fragments of stone, and the broken remains of a bit of low wall. "No doubt," said Mrs. Leicester, "it once extended much farther, and was a magnificent building." She added dignity to the bit of wall by calling it the "rampart." South, who assented to all her views, called it so too, as soon as he found out what she meant, and delighted her by suggesting the possibility of discovering foundations with the help of a little judicious digging. The good lady sat down on a fallen stone to consider the idea, while he undertook to walk round the ruins and inspect them more thoroughly. For this purpose he joined the other two who were gazing up at the tower. "I don't know anything about it, except that it is very old," Miss Vivian was saying as he came up. She looked a little doubtfully at Gilbert, as if she suspected him of possibly making fun of Culverdale Castle, which no one but Frank had any business to do; but after a minute she slipped quietly away and left him with Mrs. Austin.

"And what do you think of it?" he said.

She smiled. "Perhaps it would be more cheerful if there were more of it. It strikes me as the most melancholy little ruin I ever saw. It's a mercy the sun is shining."

"It is melancholy," he said, looking round at the flat, green meadow. The tower was of a blackish gray, crusted with lichen: the grass at its foot and the spreading docks grew coarsely from the ill-drained soil, and a sluggish little stream crawled a little way off.

"People talk of fortresses frowning," said Mrs. Austin; "I think this would if it could. There is a touch of malice about it, though it is too petty to threaten."

"It isn't amiable-looking," said Gilbert, with an air of entire conviction. He knew what he was expected to say, though in truth he was not thinking much about the Castle. They strolled a little further, and when they reached the wall he made a careful survey of the other side.

"What are you looking for?" Mrs. Austin inquired.

He laughed a little consciously. "Walls have ears, they say. It's true this might be deaf by now—it's old enough."

She raised her eyes to his face. "Does it matter whether it's deaf or not?"

"Well, yes, I think it does. There might be a country bumpkin asleep on the grass. We might wake him up."

"If I understand country bumpkins, we should be doing him a service."

Gilbert stood smiling and pulling his mustache, as if he were calling up a half-remembered scene. "Once I thought myself alone," he said, "ut—a long while ago, and I—well, I recited some poetry. Suddenly I felt an impulse to look behind a pillar, and there was a brute, in a cheap traveling suit, grinning from ear to ear. I had a great mind to kill him."

"You didn't, I hope!" said Mrs. Austin, sitting down on a broken bit of wall, and putting up her parasol: terly alone. That was in a ruin, too, "not but that there are plenty of people in cheap traveling suits."

"No, I took off my hat to him, and walked away. It didn't kill him, but I think I might as well; he couldn't have haunted me worse. However, it taught me caution."

"So it seems. And are you going to recite poetry now?"

"No; I don't think I am. At least—yes, I am going to talk about Cornwall."

"Is that poetry?"

"Isn't it?" said Gilbert, coming a step nearer. "Or, rather, wasn't it?"

"Perhaps in King Arthur's days."

"In no days of your own?—of our own," he persisted, in a low voice. "If the old time at West Hill wasn't poetry, there has been none in my life. You said this morning you had not forgotten it."

"No," she answered, "I have not; but if that were poetry, it strikes me that the volume was closed and laid away a long while ago."

"Is that true," said South. "You needn't remind me that I was the first to close it. I'm not likely to forget that. But, for the sake of those old Cornish days, I want you to let me say a word of explanation."

Mrs. Austin shook her head with a smile that was half hopeless, half compassionate. "No, no; there is no need of explanation—do not let us have any. You make me repeat myself," she added, lightly. "I told Mr. Leicester this morning that I objected to explanations."

South arched his brows. "It seems to me that it was early for Mr. Leicester to be trying to explain himself!"

"Possibly. And for you it is—late." Her tone was very kind as she went on. "Do you not see that if I had misunderstood you all these years, you could hardly set me right now. But I don't think I did misunderstand you; and for proof of it we were to be friends, and we are friends, I hope."

"It was all my fault," said South; "and to think that I never saw you from the day we parted at West Hill till yesterday! Tell me what you thought of me after I went."

She met his glance, but evaded his question. "There was no fault in the matter. Don't you remember we were to be quite free? You had a right to change your mind, and so had I."

"I was a fool! I was a raw boy—I was flattered; and she never meant anything!"

Mrs. Austin made a quick sign with her hand. "Oh, let it all rest!" she said. "You wrote afterward; you did explain all that there was to explain. It was then that we agreed to be friends. Let us keep to that. As you say, it was only a boy-and-girl affair." She rose as she spoke, but Gilbert followed her.

"It is hard," he said. "My best wouldn't have been good enough; and it is you, of all the people in the world, who know the worst of me."

She stopped, looked him in the face, and smiled. "It isn't very bad," she said, in her gentle voice; and South felt himself a feather-weight in the scale, whether for good or evil.

He was silent, but with so unsatisfied an expression that it was evident he only lacked words for the moment, and would seek to speak again later. Mrs. Austin anticipated him.

"Were you out of your teens when we said 'Good-bye?' Well, not much more, at any rate. Our real lives have been since then. I think people ought to keep their consciences in two or three compartments, and shut the lid down on all such by-gone short-comings. I am glad we have met again, if only to shake hands and say simply that we have outgrown old follies."

Gilbert looked down. "I was to have been a hero," he said, bitterly. "Do you remember?"

"Oh, I lived in King Arthur's Cornwall in those days—in Camelot and Tintagel," she replied. "No doubt you were to have been Galahad, or Percival at the very least. I expected the most wonderful things of all my friends."

"I think you did." He hesitated for a moment. "Are you more merciful now?" he asked, in a tone which was between jest and earnest.

"Oh, yes," was the ready answer. "I'm greatly changed. I can assure you that now I expect very little."

They were walking slowly at a little distance from the tower, and as the last words were spoken they caught sight of Tiny Vivian. She appeared to be intently studying the old stones. The dreary little nook in which she stood, pulling an ivy spray from the crumbling masonry, framed a picture of youth, full of delicate grace and hope. South gazed for a moment, and then turned to Mrs. Austin with a faint laugh. "She is in her teens still," he said.

When Frank came back from Bridge End that evening, he found a bunch of ivy-leaves on his dressing-table. They had evidently been carefully chosen for variety of shape and color and were very daintily arranged. He uttered an impatient exclamation when he caught sight of the significant little bouquet, and stood looking at it with a frown. He knew that his cousin had stolen in during his absence, and left it as a token that Gilbert South had had his turn that afternoon.

III.

Mrs. Leicester troubled herself very little about her match-making. When she happened to observe Mrs. Austin and Mr. South, she thought they seemed to be very good friends; and when they were out of sight, she supposed that they were together somewhere, and getting on nicely. She did not quite know what she would get them for a wedding present, but she determined to run up to town with Frank and look about her. There were sure to be pretty things in the shops. Meanwhile she was very well satisfied. Frank seemed all right, and, that being so, Mrs. Leicester hardly noticed that, as the days went by, his little cousin was not quite her simple, happy self of a fortnight earlier, and that these two, who had been such allies, were no longer on their old footing.

Gilbert made no attempt to resume the talk which was broken off in the ruined castle. He appeared to have tacitly accepted Mrs. Austin's offer of friendship without explanations; and, though from time to time he would turn to her with some allusion to the past, some "Do you remember?" which sent her thoughts away from Culverdale to scenes where he alone could follow, he touched always on those earlier recollections which needed no apology from him and no pardon from her. She would answer readily enough; but Gilbert, who remembered the time when she believed in him, was apt to imagine a delicate, yet unmistakeable irony in her untroubled smile. To Frank it revealed a wonderful far-off tranquillity; but then Frank was very much in love. Mrs. Austin had opened his eyes, and he was prepared to spend his life in a rapturous study of this first miracle. He felt himself at a disadvantage with regard to South, who could look back to a past in which she had a share instead of a degrading memory of measles and extreme youth; yet, in spite of this humility, he was not unhappy. Mrs. Austin could not fail to perceive his devotion, but she never for one moment supposed that there was anything serious or lasting in it. It seemed to her like a little nosegay of spring flowers, which she might accept with a gracious word of thanks, and she was touched by the thought of its very transitoriness. She was very kind to Frank. Within a week she had learned his ways, and looks, and words, as one might learn the few simple notes of a bird in one's garden; and yet they blessed her better than a more elaborate performance. "Poor fellow!" she would say to herself, with a half whimsical regret, "it is not my fault—I cannot help it; but if he only knew how young he seems to me, how he would hate me!" There, however, she was wrong. Frank would have forgiven her even that.

The warm September days slipped away one after the other, and the only thing of which the young lover could complain was that they were shortened in a quite unjustifiable way, which was not mentioned in the almanac. The sun was slow to rise; but when once breakfast-time had arrived, he rushed across the heavens, went headlong down the west, and Frank found himself dressing for dinner, and with the certainty that only a few short hours parted him from bed-time. It is true that the nights had grown long, so long that they could not all be spent in sleep. His light burnt late, and even when it was extinguished it did not follow that he was at rest. Sometimes he was star-gazing. He had never taken such particular notice of the stars before, but they attracted him now because they reminded him of Mrs. Austin. He had made the discovery that certain things—besides old tea-pots—were in harmony with Mrs. Austin, and consequently possessed something of her charm; and he was beginning a classification of the contents of the universe, as tried by this test. He felt that the midnight sky was very sublime, and that he himself was absurdly unimportant. How could he become more worthy of notice? What sort of destinies used people to fancy they read in the stars? Frank, as he leaned against the window, and fixed his eyes upon the far-off points of light, reflected that in all probability he would be high-sheriff one of these days. He wondered whether Mrs. Austin would like a man to be sheriff. But that would only be for a year. Perhaps it would be better to try to get into Parliament. There was a neighboring borough which was something of a forlorn hope—he might try that. There must be an election before long; perhaps Mrs. Austin would come down, wear his colors, encourage his supporters, and rejoice in his victory. Only—confound it! the ballot had spoiled all the fun, and there was no chance of a real good contest, such as they used to have in old times, when the flags were flying, the money going, and the agents outwitting each other for days together. He would have liked the gathering excitement of a prolonged battle; he would not even have minded a little rioting; in fact, an unfriendly mob, howling down any attempt at speech, and to be confronted only with good-humored coolness, and the superior manners of a gentleman, seemed less terrible to Frank than cold-blooded voters, asking questions about his views on unexpected subjects. Nevertheless, for Mrs Austin's sake he would face even that ordeal. He remembered, moreover, that the father of one of the neighboring land-owners had been made a baronet—why might he not be made a baronet? It is true that for his own part he had no especial desire to be called "Sir Francis"; but Lady Leicester" seemed to him a name not unworthy to be uttered softly at night, in the presence of the stars.

(To be continued.)

SUNDAY SCHOOL LESSON

May 21, 1916 Lesson viii

The Cripple of Lystra.—Acts 14: 1-28

Commentary.—I. The apostles at Iconium (vs. 1-7). The apostles came to Iconium from Antioch of Pisidia having been driven out of the latter place by the infuriated Jews and their sympathizers. Persecution was Satan's powerful weapon, but the Lord made use of it to enlarge His own kingdom. They preached in the synagogue in Iconium, and many of the Jews and Gentiles believed the gospel. The unbelieving Jews made it their business to stir up opposition against the apostles. After remaining for some length of time to establish the church, they left for Lystra and Derbe; but the reason for their going was that the Jews and pagans who were arrayed against them made an assault upon them. They preached the gospel in the places where they went to save their lives.

II. A lame man healed (vs. 8-18). 8. Lystra—Lystra was eighteen miles southwest of Iconium in a wild region. "From the violence of a mob excited by the Jews they fled into a wilder region where there were few or no Jews, and the cities are enumerated in the order in which they were visited, while some to which they went are unnamed, but included in the general term, 'the region round about.' The flight of the apostles is exactly in accord with Christ's injunction (Matt. 10:23)." Impotent in his feet—This man probably sat in a public place in the city and was well known in Lystra. He was afflicted with lameness in his feet and had never walked. We are reminded of the lame man that sat at the beautiful gate of the temple (Acts 3:2). 9. Heard Paul speak—It is likely that the apostles spoke in the streets of Lystra, as no mention is made of a synagogue, and the cripple heard the gospel story from Paul's lips. Steadfastly beholding him—Paul's attention was drawn to him by his earnest, wistful look. Seeing that he had faith to be made whole (R. V.)—The man's heart shone out in his face, and the Spirit within the apostle recognized that here was a fit object to be made, by his cure, a sign unto the men of Lystra.—Cam. Bib. The lame man earnestly desired to be healed and he believed that the Lord was able and willing to make him whole. 10. Said with a loud voice—Paul's earnestness in this matter and its importance brought forth in a loud and clear voice the command which follows. The people who were about Paul could hear the words and could be witnesses to this marvellous cure. At the grave of Lazarus Jesus spoke in a loud voice for the dead to come forth (John 11:43). Stand upright on thy feet—The preaching of the apostle in Lystra had set forth the power of Jesus and it would be understood that through his power, and not Paul's, the cure would be wrought. He leaped and walked—The lame man leaped up in the joyful consciousness of a power he had never felt before, and walked like those who had never had experience of infirmity.—Howson.

11. When the people saw—The miracle was so unmistakable that the people at once recognized the fact that supernatural agencies had accomplished it. Speech of Lycaonia—Paul had been speaking to the people in Greek and they understood that language, but they expressed their astonishment to one another in their native language. Evidently the apostles did not understand the language of Lycaonia or they would not have allowed them to call them gods without rebuking them. The gods are come down to us—The people looked upon the apostles as the incarnation of their deities. 12. Jupiter—The pagans regarded Jupiter as the father of the other gods. Barnabas was probably more venerable in appearance than Paul and hence would compare better with their conception of Jupiter. Mercurius—The god Mercury was regarded as swift of movement and eloquent in speech. 13. Priest of Jupiter—Since it was thought that Jupiter was in the city, the people believed that the priest who had charge of the temple of Jupiter should sacrifice to him. Oxen—For sacrifice. Garlands—Garlands were used to decorate the oxen or the altars upon which the animals were sacrificed. Unto the gates—Some think the gates of the city are meant, and some the gates of the temple of Jupiter. Others believe reference is made to the entrance of the house where the apostles lodged. The last view seems reasonable.

14. When the apostles....heard—They had no knowledge before this of the intentions of the people. Rent their clothes—To express their grief and displeasure at the course the people were taking. 15. Why do ye these things—The apostles were putting forth strenuous efforts to prevent the sacrifice in their honor. Men of like passions with you—Paul and Barnabas declared that they were men and had natures like those of the men of Lystra. Turn from these vanities—The apostles came to bring them glad tidings and to warn them to turn from their idols, which were vanities, or vain things, powerless objects, to the living God, who created all things. 16. In times past, etc.—Israel had been chosen as God's people, and only to them had He given a direct revelation of Himself. Other nations had only nature as their revelation of God. 17. Left not Himself without witness—God showed Himself to the world as wise, loving, mighty and benevolent, by His works in nature. 18. Scarce restrained they the people—The apostles took a bold stand in opposing the intended sacrifice, in calling the gods of the Lycaonians vanities and in declaring to them the living God; but they could not be consistent and do less.

III. Paul stoned (vs. 19, 20). 19. Jews from Antioch and Iconium—They were incensed at the apostles and were not satisfied with driving them out of their own cities, but were determined to stir up other cities against them. Persuaded the people—It is probable that the Jews from Antioch and Iconium induced the people of Lystra to believe that the cripple had been cured by the agency of evil spirits and that the apostles were in league with Satan. Stoned Paul—Their jealous rage carried them to such a length that they became themselves the active agents in taking vengeance on the "chief speaker" of the two missionaries.—Cam. Bib. Paul refers to this stoning in 2 Cor. 11: 25. Drew him out of the city—The mob, which had been aroused by angry Jews, supposed that they had killed Paul. The stoning took place probably in the place where the apostles had been preaching, and Paul's body was dragged outside the walls, there to lie and decay. 20. As the disciples stood round about him—The preaching of the apostles had not been in vain, for converts had been gained, and they were standing in sorrow around their fallen leader, planning for a fitting burial. He rose up—Not a few writers are of the opinion that Paul was really dead and that his rising up was a resurrection. Luke does not say that he was dead, but that the persecutors supposed that he was dead. Enough violence had been used to cause his death, and he was, to say the least, seriously injured. His rising up was certainly miraculous. The account indicates that he arose in full vigor, walked into the city and left the next day for another field of labor.

IV. Close of Paul's first missionary journey (vs. 21-28). The labors of the apostles were not stopped by the persecutions which they underwent. Having preached in Derbe, a city thirty-five miles south of Lystra, they revisited Lystra, Iconium and Antioch, encouraging the converts and appointing leaders in each church. They went through Pisidia and Pamphylia and preached in Perga. They sailed from Attalia to Antioch in Syria, where they gave a report of their labors to the church that had sent them out.

Questions.—Where did the apostles go from Antioch? Where was Lystra? What can you say of the people of that region? Whom did Paul heal? Describe the healing. What can you say of Jupiter and Mercury? Why did they liken the apostles to these gods? What did the apostles do? Give an outline of Paul's address at this time. Why did they stone Paul?

PRACTICAL SURVEY.

Topic.—Missionary itinerary.

I. Its trials and triumphs.

II. Its estimated success.

I. It trials and triumphs. In this section of church history we may trace the force of the gospel amid many distractions of men. We have a glimpse of the trial of the apostles' faithfulness in the truth, of their humility and self-sacrificing zeal and of their inspired wisdom and discretion. In their ministry at Iconium four things are noteworthy: Many conversions of Jews and Greeks, a violent opposition, demonstrations of divine power and a social separation. The [illegible]istry of the apostles laid bare the hearts of the people. The spiritual victories they won in the synagogue aroused the antagonism of the unbelieving Jews, who used their influence to injure the apostles. Persecution made them change their place, but not their purpose nor their method of working. The threatening cloud of danger did not abate their courage. They only fled to a new field of conflict. Paul always took care to adapt himself to the varying conditions and character of those among whom he labored. His theme was the same, but his method of presenting that theme was constantly changing according to circumstances and place. When they addressed Jews, they dealt with the scriptures. To heathen they drew lessons from nature, "that universal and public manuscript that lies exposed to the eyes of all men." All the knowledge of God at which they arrived by the light of nature had but little influence to reform hearts and lives of men. Beyond nature's testimony to the divine existence and attributes, Paul added the Christian system which proposes no less than the full recovery of men from sin. It pleased God to grant a special revelation to the Jews for the whole world's sake.

His proceedings with other nations are not recorded. The apostles wrought a marvellous healing at Lystra, which led to an outburst of idolatrous zeal. The people immediately deified the human agents and set about to worship them. As soon as the idea was adopted that Paul and Barnabas were gods, the people assigned to them their respective parts. Highest honors were unanimously and enthusiastically offered, only to be repudiated with holy indignation. The apostles felt most deeply the insult offered to God. They earnestly urged that the miracle was designed to open their hearts to the truth. The people of Lystra were disposed to turn the miracles into an argument in favor of their idolatrous religion. Jews from Antioch determined to carry out the purpose they had failed to execute in their own city. They were ready with a different interpretation of the miracle. The multitudes were in a state of mind to be easily persuaded. Their vanity had been wounded.

II. Its estimated success. This entire narrative conveys the idea that the apostles sought and found their strength in a divine source. Nothing else would have sustained them under the difficulties and sufferings of their mission. Undeterred by persecution, unmoved by offered fame, they went on with their commission. Jewish opposition still stood in the pathway of the gospel. Nevertheless it acquired force as it went and actually rooted itself more firmly in men's lives from the very fact that it was able to surmount opposition. It was dangerous for Paul and Barnabas to visit the same cities again, but the souls of the disciples were more to them than their own comfort and safety. If necessary, they would again face all they had before encountered. Paul was in a measure fitted by all he had borne and suffered to exhort the disciples. A deep sense of what was due to those whom they had induced to forsake their old faith to enter on a new and trying course, constrained the apostles to pursue the perilous path. They appealed to the disciples to remain steadfast in the faith in loyalty to their Lord and Saviour. Paul's miraculous escape was a great help to the faith of the disciples. Joyous was the welcome, great the thanksgiving at Antioch when the missionaries returned. Their report was in part a personal narrative and in part a report of the acceptance which the gospel message had received in the countries they had visited. Throughout the journey the apostles had shown the truest Christian courage. T. P. A.

Britain Is Doing Share

There is a carping clique in Montreal and this Province who advance a variant of the Bourassa doctrines, who say that Great Britain is not doing enough to aid France in the war, who point out that the non-participation of British troops in the Verdun operations and the arrival of Russian forces at the western front, give proof of their contention, forgetting that the command of the sea renders the Russian aid possible. This talk is mischievous and idle, calculated to mislead the ignorant and chill the ardor of recruiting in certain quarters. It is also false. It is not the opinion of the French people nor that of the soldiers of France, stretching out in the line from Belgian Ostend to the Swiss frontier. The French people know that they have been snatched from an abyss, which threatened when war broke out in August, 914.

The despatch of the British expeditionary force, its gallant service and the guardianship of the western coast of France by the British fleet saved France as it saved Paris. And the fate in store for that city at the hands of Germany may be learned from the words of General von Kluck on nearing the capital of France as quoted by M. Gabriel Honataux in an "extraordinary address recently delivered at the Sorbonne: "Yes, yes, we've got you; your France is conquered and your Paris will be destroyed. We will not leave one stone on top of another. . . . . . we will destroy all, BURN ALL. There will be only the bare earth and the ravens left to raise broods."

After the Battle of the Marne, which so decimated the English forces, came the German drive to Calais, taking rank in many respects with the Verdun operations. We know what the Canadians did there—but not until after leaving their thousands to the casualty list! The day was saved by troops sent and supplied by the Empire.

Is it necessary to touch upon the capture of Hill 70 and the Village of Loos in September? In that action consider the fortunes of one battalion; fourteen officers, with the colonel, were killed, and five wounded, out of twenty! There were five hundred casualties out of one thousand five hundred. Eighty officers went into the fight and but eight came out unscathed. These facts are from the pen of Lieut. Tuck an American, whose battalion was engaged.

The British are not at Verdun, because they are needed elsewhere—because at that point there are "strong [illegible] reserves in large units," to quote [illegible] authority. But how well the British are giving an account of themselves in their allotted positions our own casualty list and our descriptive and official despatches bear witness.

There is no shirking the Hun assaults on the part of either the British or the French, and to represent it otherwise is as puerile as malicious. The statement is a calumny, and those who make it are indeed "giving comfort to the enemy." Mr. Asquith's estimation of the French effort is not of that nature. He has recently borne testimony to "the fighting qualities of our neighboring ally," which "were never greater and more highly developed than at present." Great Britain has voted in the prosecution of the war to date almost nine billions of dollars. Her troops and ships are in all quarters of the globe. Mr. Sazanoff, Russian Foreign Minister, who is an outstanding figure in this great war possessed of striking personality and vivid phraseology, has a just appreciation of what Great Britain's participation in the struggle, in the wider sense, means: "It is my supreme political conviction," he has just declared, "that England's hold of the sea is the greatest fact of the war. We know that fact in Russia, and we are perfectly satisfied."

And that fact is known in France also." M. Emile Boutioux, a French academician, has just declared that "when peace comes France will resume her place among nations. She will fully resume her standing in the eyes of the world."

France will not be conquered; Paris will not be put to the sword and torch.

To argue that the British are not playing their part in this aim—this noble object—is as shameful and contemptible, as the advice so freely given by the insignificant clique in this province, to abstain from the salvation of the nations who are fighting for the liberty and the civilisation which shelters the carpers from danger.—Montreal Mail.

CORE OF THE EARTH.

Its Form a Mystery, but the Globe, as a Whole, Is as Rigid as Steel.

The theory that the crust of the earth is only a few miles in thickness and rests upon an intensely heated molten interior is no longer tenable. It is now known that the earth, as a whole, possesses a high degree of effective rigidity—as great as if it were composed throughout of steel. It is no doubt true that the interior of the earth is in an intensely heated condition and that it appears to possess some of the qualities of a fluid. At the same time it behaves in many respects as a solid.

Professor Milne concludes from the velocities of seismic waves at different depths that the materials and general characters of the crust of the earth that are found at the surface may extend to a depth of about thirty miles, but beyond that the material seems to merge into a fairly homogeneous nucleus. This state probably extends to a depth of six-tenths of the radius, but the remaining four-tenths form a core which differs in its physical and possibly its chemical constitution from the outer portion. What the state of this nucleus is must be a matter largely of conjecture until we have a fuller knowledge of the state of matter when subjected to the vast pressure such as exists within the earth's interior.

Additional evidence that the earth, as a whole, is at least as rigid as steel is furnished by a study of tidal phenomena and also by the variation of latitude.

Cawker—I've had another addition to my family since I saw you last. Curson—You don't say! Boy or girl? Cawker—Son in law.—Puck.

SUNDAY AT HOME

EASTER DAWN.

The Lord is risen! Wake! Bereaved Earth—
Behold the miracle of Eastertide.
Dawn fills the East and joy, divine, hath birth,
This Holy Morn He lives again—Who died.

The Lord is risen. Peal, ye joyful bells,
Ye choirs celestial, sweep your golden strings,
Sing Hallelujah! fill your anthem swells—
Up to the throne, and all glad Heaven rings.

The Lord is risen—Glorified His Brow—
The lilies bending low kiss His feet,
His hands in blessing raised—we see Him now,
As low we kneel before His Mercy-seat.

The Lord is risen. Earth rejoice, rejoice,
From pole to pole—wherever man is born,
Creation lauds Thee with united voice,
Oh Risen Lord—this happy Easter Morn.

—Winnifred Martin.

PARADE.

There was a soldier's funeral, the music played the "Dead March" in Saul. The muskets were reversed, only the butt ends of the weapons were to be seen. I tried to account for this fashion, and was led into a mist. A soldier's business is to kill men; they are counted enemies, and yet they have never done personal harm to the men who carry arms. This march past aroused some thoughts which seemed antagonistic. A soldier's business is to bring men to death, and here death seemed to confront these men with loud voice: Reverse arms! I am the victor. All you can show to the crowd is the harmless end of your deadly instruments. King George is not your King, but King Death. You march to my goal. You pile up trophies in honor of me.

When I turn to the Scriptures, I find that Death is an old king, that he reigned from Adam to Moses, from Moses to Christ, then there was a halt, and the sword was broken, and the shield was battered, and the crown lay in the snow, glinting the pale rays of the moon.

Here is a "right about." If you please. Angels are not sent to preach the Gospel, but here it strikes me the angel preached the first Gospel sermon to the women, when he sat upon the upturned throne of the cruel king. "Why seek ye the living among the dead?" He is not here, but is risen."

It is ever to be remembered that Christ came to destroy the works of the devil. He did not come to fight with men; they were too puny. He came to the arch-ringleader. He met him in fair fight, and when he fell, the victorious Master said, "I saw Satan fall like lightning from heaven." It was enough that He saw it. His disciples did not see it then, and slowly their sleepy eyes opened to the light.

What is a parade, and why?

Parade is the orderly arrangement of troops. You will find uniforms, decorations, stars, grades and ranks, and when you ask Why? The answer is: "You must strike the imagination, capture it, and fill to satisfaction. Marching to music, colors flying, bayonets flashing, hurrahs stir the blood. What is at the other end is not seen. Mahomet says: "Paradise is under the shadow of our swords," and General Sherman calls that Paradise "Hell."

Parade seems necessary to earth; it is not found in hell, for all is disorder; it is unknown in Heaven. Twelve legions of angels were in sight in the mighty conflict, one hundred and ninety-two thousand. They were not on parade, they were not for show, they did not catch the eye of the multitude. They were for service. They were part of the spirit army, who helped in the overthrow of the last enemy. But, you will say, we have still to buy our death. Yes, that is, the body, the soul is free if united to Christ, and we can say death is dead. Christ liveth, ever more, and I live in Him.

We sing on Easter Monday, "He is Risen!"

H. T. Miller.

BRADSTREET'S TRADE REVIEW

TORONTO—Business conditions are for the most part favorable. The grocery trade continues about normal. The drygoods trade is still active. Prices are ruling higher and some lines are scarce, especially cottons and woolens. Payments have been good. Hardware houses are doing a fairly active trade in such lines as lawn mowers, rakes, spades, wire netting, etc.

MONTREAL—Business conditions have shown definite improvement. Both sorting and fall orders in wholesale drygoods houses have increased. Spring and summer goods for immediate shipment are in request. Travellers are sending in more orders. Settlements are improving, except from a few localities. Trade improves also in hardware houses. Travellers from boot and shoe houses, who went out with upward revised price lists, have had a satisfactory response, the retail trade realizing the tightness in the raw materials.

WINNIPEG—Retail trade is still feeling the impetus of a good spring business, and the consequent movement from Wholesale houses has been liberal.

CALGARY—Packers at Edmonton and Calgary, like similar industries in the east, are enjoying the most active period in their history. Retail business continues to reflect increased purchasing power of rural districts in consequence of the bountiful harvests of last autumn.

VANCOUVER—Financial conditions in the city are gradually improving, but are handicapped by the serious lack of ocean bottoms. The lumbering business, which has to depend for its sustenance now mainly on the prairies, is missing a great volume of business from Europe.

HAMILTON—Trade conditions continue favorable. Foundries are overworked to such an extent that employees are complaining. With plenty of wages to spend the result of public power to buy is potently felt in retail and wholesale houses. Outside orders to wholesalers are fairly large. Remittances and collections are about normal.

LONDON—There is little new to report as business conditions in all Western Ontario continue favorable. Orders for spring and summer goods in millinery, drygoods and hardware houses keeps up, and fall placing orders in most lines of trade have been encouraging.

Ottawa—General trade conditions there are favorable. Retail business keeps steady, most manufacturers are busy, and local and outside business in wholesale firms has been normal.

Quebec—Trade as a rule is satisfactory, dry goods, groceries, provisions, hardware and footwear, all report favorably. City and country collections continue fairly satisfactory.

ST. JOHN—There is a quieting down in some lines of business owing to the apparent inability to secure deliveries, particularly drygoods. Unseasonable weather has also retarded spring trade. Collections fair.

A COLD
Settled On Her Lungs
Causing Great Pain.

THE CURE WAS
DR. WOOD'S
Norway Pine Syrup.

Miss D. M. Pickering, St. Ca Ont., writes: "Having deriv benefit from Dr. Wood's Nor Syrup, I thought I would writ you of my experience. When I out from England I contracted a cold, owing to the change of it settled on my lungs, and cau great deal of pain. I tried ever I could think of, but got no re father, who had heard a great the good qualities of Dr. Wood's N Pine Syrup, advised me to try it. I d so, and I am pleased to say, foun mediate relief. I only took one and it cured me completely. My had a severe cold also, and Dr. Norway Pine Syrup cured her never fail to keep a bottle of house."

See that none of those so-calle "syrups" are handed out to you wh go to your druggist or dealer and "Dr. Wood's." It is put up in a ye wrapper; three pine trees the trade mar price, 25c and 50c.

Manufactured only by The T. M burn Co., Limited, Toronto, Ont.

SOURCE OF SHELLAC.

East India Insects and Trees That Produce the Substance.

India is the home of the Coc ca, the insects that produce th ous substance known as shell females puncture the twigs of different kinds of trees, among to be, the bihar and the bute. the twigs become incrusted with hard nearly transparent, reddish inous substances that serves double purpose of protecting the e and the furnishing food for young insects.

The incrusted twigs are b from the trees before the young sects escape and are thoroughly in the sun. These dried twigs called "stick lac," and from th shellac and a dye analogous to coc ineal are prepared. "Seed-lac" the resinous concretion separat from the twigs, coarsely pounded a triturated with water in a mortar, which nearly all of the coloring m ter is removed.

To prepare shellac the seed-lac put into oblong cotton cloth bags an warmed over a charcoal fire. When the resin begins to melt the bags are twisted, and the pure clear resin is allowed to flow over fig wood planks or the smooth stems of the banyan tree and cools in the thin pl shells which constitute sh

Pure shellac is v much harder than easily soluble in al

Fire [illegible]inguishers.

About 1840 a Mr. Thomas Phillips, of London, invented an apparatus for putting out fire, but it was not much of a success. When put in action the steam and carbonic acid which were to extinguish the flames were not generated in sufficient quantity to do the work. A Frenchman named C lier patented a fairly successful extinguisher in 1862, since which date they have been used more or less all over the world to put out incipient fires, though, of course, they are valueless after the fire has acquired much headway.—New York American.

N. Y. CLOAK STRIKE.

New York, May 8.—The number of striking cloak, suit and skirt makers here will be reduced by 6,000 day through the return of the employees of seventy-three independent manufacturers, say officials of the union. About 65,000 are now on strike or locked out. The union officials say that they hope to settle the strike with all of the 1,600 independent shops, 600 of which have offered to make terms.

Strike leaders are investigating reports that New York manufacturers are letting their contracts to firms in Connecticut and New Jersey, and threaten strikes in those states if this is true.

Here is an estimate of vessels withdrawn from U. S. commerce since the beginning of the European war: German and Austrian ships interned throughout the world, 3,024 ships, 6,123,000 tons; British ships requisitioned, 2,300 ships, tonnage not known; Russian ships requisitioned, number unknown, but about 900,000 tons. No reliable figures can be gained about the French and Italian ships taken for war use, but the number is known to be large. Perhaps the total number of ships lost to trade is 7,000. To this must be added the vast number that has been sent to the bottom since the war began.

HALF THE ILLS OF LIFE
Are Caused By CONSTIPATION.

When the bowels become constipated the stomach gets out of order, the liver does not work properly, and then follows the violent sick headaches, the sourness of the stomach, belching of wind, heartburn, water brash, biliousness, and a general feeling that you do not care to do anything.

Keep your bowels regular by using Milburn's Laxa-Liver Pills. They will clear away all the effete matter which collects in the system and make you think that "life is worth living."

Mr. H. W. Watson, St. John, N.B., writes: "I have been troubled with constipation, for the last three years, and during that time have tried several remedies, all of which failed to help me. A friend recommended Milburn's Laxa-Liver Pills, and after using three or four vials, I felt like a new man. I am now still taking them, and am positively sure that I am on the road to recovery. I strongly recommend Milburn's Laxa-Liver Pills."

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all drug stores or dealers, or will be mailed on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FARM GARDEN

THE FERTILIZER SITUATION.

Owing to the direct and indirect effects of the European war upon the sources of supply and the cost of the more important plant food materials used in the manufacture of commercial fertilizers, conditions have arisen which are wholly without precedent in the history of the fertilizer industry. In view of these profoundly disturbing conditions, a conference was recently held by representatives of the Agricultural Experiment Stations of the New England States, New Jersey and New York, for the purpose of obtaining all possible information bearing on the situation, as a basis for furnishing advice to farmers in respect to the practical methods they can adopt during the season of 1916 to meet the unprecedented problems.

At the aforesaid conference of the several Agricultural Stations it was advised that farmers use greater care than ever before in the selection of soils for crops; the management of soils, so as to utilize to the fullest possible extent the plant-foods already in the soil; the conservation and utilization of all source of plant foods produced on the farm; the selection of such commercial plant food materials as are most economical; careful study of the plant-food needs of different crops; precautions to be observed in purchasing fertilizers.

Clay soils and clay loams meet the desired plant food conditions better than light soils, especially since heavier soils contain more available potash.

Soils which have been systematically suplied with farm manure or commercial fertilizers will meet conditions of temporary food shortage better than those which have not been so well treated.

Soils containing abundance of organic matter can do well with a minimum added supply of nitrogen.

The soil should be plowed deeper than usual and harrowed more thoroughly, which enable the soil to retain moisture to the extent most desirable.

FARM-PRODUCED PLANT FOOD.

Every form of plant-food material found on the farm must be saved and utilized.

In stables enough litter should be used to absorb completely the urine because, first, it contains a much higher percentage of nitrogen and potash than the solid increment, and, second, these are in much more quickly available form in urine than in solid increment. Dry muck is one of the best absorbents for stable use. Any muck bed on the farm should be utilized both in stables and also for direct application to soil. When manure is stored, it should be made into a compact heap with vertical sides and kept under cover, if possible. The heap should be kept moist enough to prevent overheating, but not so wet that liquid drains from it.

Mixed farm manure made from well fed animals and kept under proper conditions contains, per ton, 10 to 22 pounds of nitrogen, 5 to 7 pounds of phosphoric acid and 10 to 12 pounds of [illegible] ually allowed to go to [illegible] will be utilized. Leaves, [illegible] etc., can be given to pigs to work over into manure. Composting can be advantageously employed for vegetable and animal materials that cannot be made suitable in any other way for use as manure.

Wood ashes should be saved and carefully stored in a dry place until applied to the soil. The potash in wood ashes gives them an unusually high value at the present time. Good hardwood ashes should contain at least 5 per cent. of potash.

Advantage is being taken of the potash situation to push the sale of ground rocks containing unavailable potash. [illegible] and feldspar is one of these materials. Such materials should not be purchased under any circumstances. They are extremely costly at any price, because the potash possesses no appreciable value as plant food.

The chief dependence for 1916 must be the potash normally in the soil, largely in insoluble condition.

Professor L. L. Van Slyke, of the New York Station, gives a few specific suggestions as to what fertilizers to use for some of our most common crops, which are worth noting.

For top-dressing ordinary grasslands 100 to 200 pounds per acre of sulphate of ammonia may be used or the same amount of nitrate of soda, or of cyanamid, or of a mixture of the two can be used, or a mixed fertilizer high in nitrogen.

For clover and alfalfa an application is recommended of 600 to 1,000 pounds per acre of ashes, if obtainable.

For corn use 10 to 21 tons of farm manure and on poorer soils supplement with 300 to 500 pounds of a fertilizer containing about 2.5 per cent. of nitrogen and 10 per cent. of available phosphoric acid.

For potatoes, root-crops and vegetables in general, apply four tons of good farm manure and work it well into the soil. Supplement with 500 pounds of a fertilizer containing 2.5 to 3 per cent. of nitrogen and 8 to 10 per cent. of available phosphoric acid. If no manure is used, apply 800 to 1,000 pounds of fertilizer containing 4 per cent. of nitrogen and 8 to 10 per cent. of available phosphoric acid.

For spring seeding with cereals or grass, in usual rotations, use per acre 300 to 500 pounds of a fertilizer containing 4 to 5 per cent. of nitrogen and 8 to 10 per cent. of available phosphoric acid.

In place of applying fertilizer to orchards use thorough tillage and grow cover crops.

FARM NEWS AND VIEWS.

Blackberries need plenty of moisture, and it will not pay to plant them on the top of some dry knoll; for the fruit will not grow to perfection in such dry places, and it will be hard and sour. Choose a place where the ground is of good quality and where there is plenty of moisture. Prepare the ground thoroughly by plowing and harrowing before planting, and make the ground mellow down quite deep where you set the plants. You cannot be too particular in this respect—remember you are setting them out for profit, and not simply to see whether they will grow or not. They should be set about four feet apart one way and eight feet the other way. Keep the ground loose by constant cultivation, and the sooner you can get a good large bush the sooner you can get fruit, and keeping the ground loose will help to keep it moist.

To control borers in peach, plum and cherry trees, build around the bases of the trunks new mounds of earth 8 to 12 inches high. The mound is left throughout the summer and until October 15, when it is pulled down and the small borers destroyed before they have entered the tree.

Calves should become acquainted with silage early in life, beginning with a very small quantity in connection with other roughage and increasing gradually. In this way the young animals develop normally, making rapid gains while the cost is kept at the minimum.

THE CASE OF CASEMENT.

(Philadelphia Record).

We trust that Sir Roger Casement will not be shot or beheaded and his head stuck on a pike and, least of all, hanged, drawn and quartered, for which plenty of precedents might be found without going back many centuries in history. He cannot do Great Britain any serious injury, and he is rather entertaining to the world at large.

The interesting thing about this doughty Irish patriot is that he is not a Catholic from Connaught, but an Ulster Protestant, presumably a "blue-nosed Presbyterian," as the Republican floor leader in the House of Representatives described President Wilson. His patriotism is emphasized by the fact that for 18 years he served the Saxon tyrant, the ravager and oppressor of his native island, in various consular capacities, rising at length to the distinguished position of Consul General in Rio de Janeiro.

One would suppose that an Irish patriot would refuse to eat the bread of the conqueror, whose cruelties drove half the population from Ireland and loaded the other half with shackles. But Sir Roger entertained no objections to a salary from the Sassenach so long as no way of serving his native Ireland appeared. He retired on a pension a year before this war without having given the least indication that he loathed the British tyrant, and that his soul was consumed with a burning zeal to avenge the wrongs of the Celt. Or does he prefer to write the word Kelt?

The war, however, opened up to him the possibilities of home rule—by Prussians instead of Englishmen. No sordid considerations for the pension he was getting from London restrained him, and through Norway he easily found his way to Berlin for the purpose of getting assurances that when Germany conquered England it would respect the Emerald Isle and not "turn the green one red" by harrying the island with war. He easily obtained the assurance of amity toward Hibernia, which he sought, and communicated the fact as well as he could to his countrymen.

For various reasons the conquest of England has been deferred. It is understood that in July, 1914, Berlin had information that the moment England engaged in the war the Irish would start a fire in the rear. For some reason the fire has not occurred, though there has been rioting in Dublin. Instead of an Irish revolution, a very considerable number of Irish subjects of King George are actually serving in his armies against the Germans. It seemed to Sir Roger incumbent upon him to do a little kindling, and procuring a steamer and some arms from his German friends, he undertook to effect a landing in Ireland and call the people to rise against the brutal Briton.

Unhappily for him, the brutal Briton sank his ship and took him, and he is now, we presume, rotting in a British Bastile, or, in more commonplace language, locked up in the Tower of London. There he is surrounded by blocks and axes, racks and thumb screws, and left to speculate on the particular instrument of torture that will be first applied to him. We hope he will not share the fate of Miss Edith Cavell or 400 of the population of Louvain, or the Mayor of Alost. He would enjoy being a martyr—for a few minutes but he will be horribly uncomfortable in a cell in the Tower.

Stains.

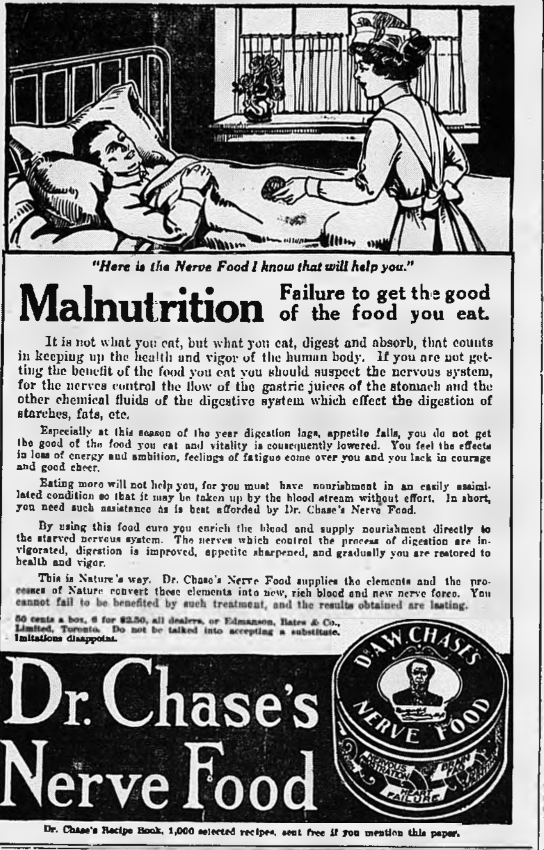
Beware!
Shun soap.
Remove the stains.
Boiling water serves.
But it must come first.
Washing with soap "sets" stains.
So be sure to first remove the stain.
Turpentine very often will remove tar spots.
An iodine stain often responds to a sponging with alcohol.
Absorbent cotton will remove milk from wool goods.
Grass stains on linen are soaked in kerosene, then washed in hot soapy water.
Turpentine and ammonia, equal parts, removes paint from most material.
Cold strong borax water in most cases will remove stains from silk gowns.
A soap exception is extended to machine grease; to remove it apply cold soapy rain water.

HARD WORKING WOMEN

Will Find New Strength Through the Use of Dr. Williams' Pink Pills.

It is useless to tell a hard working woman to take life easily and not to worry. Every woman at the head of a home; every girl in offices, shops and factories is subjected to more or less worry. These cannot be avoided. But it is the duty of every woman and every girl to save her strength as much as possible and to build up her system to meet unusual demands. Her future health depends upon it. To guard against a breakdown in health the blood must be kept rich, red and pure. To keep the blood in this condition nothing can equal Dr. Williams' Pink Pills. They strengthen the nerves, restore the appetite, bring the glow of health to pallid cheeks, and renewed energy to listless people. Women cannot always rest when they should, but they can keep up their strength and keep away disease by the occasional use of Dr. Williams' Pink Pills. Mrs. A. Rhodes, Hamilton, Ont., says: "A few years ago on coming to Canada, working long hours and close confinement began to tell upon me. I was completely run down, and finally could do no work. I was pale, suffered from headaches, did not feel well, and felt altogether very miserable. The doctor said the trouble was anaemia, and after doctoring for some weeks without getting any relief, I decided to drop the doctor and take Dr. Williams' Pink Pills. Very soon I began to notice a change for the better, and by the time I had used a half dozen boxes of the Pills I was again enjoying the best of health. I have never had any return of the sickness and never felt better in my life than I do now. I give my experience, therefore, that it may be used for the benefit of others."

You can get Dr. Williams' Pink Pills from any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.



"Here is the Nerve Food I know that will help you."

Malnutrition

Failure to get the good of the food you eat.

It is not what you eat, but what you eat, digest and absorb, that counts in keeping up the health and vigor of the human body. If you are not getting the benefit of the food you eat you should suspect the nervous system, for the nerves control the flow of the gastric juices of the stomach and the other chemical fluids of the digestive system which effect the digestion of starches, fats, etc.

Especially at this season of the year digestion lags, appetite fails, you do not get the good of the food you eat and vitality is consequently lowered. You feel the effects in loss of energy and ambition, feelings of fatigue come over you and you lack in courage and good cheer.

Eating more will not help you, for you must have nourishment in an easily assimilated condition so that it may be taken up by the blood stream without effort. In short, you need such assistance as is best afforded by Dr. Chase's Nerve Food.

By using this food cure you enrich the blood and supply nourishment directly to the starved nervous system. The nerves which control the process of digestion are invigorated, digestion is improved, appetite sharpened, and gradually you are restored to health and vigor.

This is Nature's way. Dr. Chase's Nerve Food supplies the elements and the processes of Nature convert these elements into new, rich blood and new nerve force. You cannot fail to be benefited by such treatment, and the results obtained are lasting.

50 cents a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations disappoint.

Dr. Chase's Nerve Food

BAD WRITERS.

Some Horrible Instances of Undecipherable Manuscript.

"Tell the gentleman who copied this despatch to write a larger, rounder hand, to join on the letters in the words, and to use blacker ink." Thus wrote Lord Palmerston, who was himself the most careful and beautiful writer, and a great stickler for care and legibility in this respect, to the Duke of Argyll, in 1851.

But his admonitions were evidently not taken to heart by Parliamentarians, for in 1867, when the House of Lords was in committee on the reform bill, the clerk of the House received an amendment, the writing of which was so bad that he could neither read it nor learn who had sent it. It afterwards transpired that Lord Lyttelton was the writer, and that the amendment proposed the disfranchising of all persons unable to write.

Lord Curzon, whatever he may be to-day, was in his college days an extremely illegible writer, and he is perhaps the only man who has made money out of an absolutely unreadable "fist."

One day, when a young man, he wrote two letters—one in studied phrases, to a relative, and the other, containing some very sarcastic comments on the relative, to an intimate friend. Young Curzon, unfortunately, put the letters into the wrong envelopes, and too late discovered that he had sent his candid criticisms, meant only for his friend's eyes, to the relative whom they concerned. He was perfectly horrified, and awaited his relative's reply in fear and trembling. It came:

"I have not been able to read a line of your scrawl," he read, "but I suppose it's money you're after, so I enclose a cheque."

The illegibility of Horace Greeley's handwriting was notorious, but he had a formidable rival in Mr. Joseph Choate, a former ambassador to the Court of St. James. Choate wished to obtain designs for a chimney-piece for a new house he was having built from a certain artist, but, being unable to get what he wanted, wrote to the builder, telling him to cancel the order. Instead of the workman immediately began the chimney-piece. The builder had taken Choate's letter to be a rough sketch of it!

Among living authors, the palm for bad handwriting has been awarded to Mr. Cunninghame Graham, who some years ago wrote a letter for publication in one of the newspapers. The letter duly appeared, but in so mutilated a condition that the author wrote again remonstrating indignantly with the editor. The editor retaliated by publishing the letter of remonstrance with the comment: "If in future Mr. Graham will sit in a chair when writing and not on horseback, and use a pen instead of the candle-snuffers, we think we may be able to do him justice."

The late Joaquin Miller, "the poet of the Sierras," can claim to be one of the worst writers among authors that ever lived. The secretary of a literary society received a letter from him in answer to an invitation to attend a banquet, but could not decipher a word. He wrote to the poet explaining his difficulty, and asking if the poet, in replying, would merely place a cross at the bottom of his note if he was coming, or a circle if he was not. Miller graciously complied with the request, but his intentions had to remain a mystery until the night of the banquet, for it was impossible to tell whether the mark at the bottom of his note was a cross or a circle.

From Germany comes the crowning instance of illegibility in handwriting. Johann Bacher, a musician of the last century, spent fifteen years in compiling a history of the Viennese opera. When the work was finished he submitted it to the Imperial academy. In three months it was returned with the intimation that no members of the academy could read it. Bacher tried to have it copied, but no copyist would undertake the task after seeing the manuscript.

In despair Bacher decided to dictate the work, only to find that even to himself the handwriting was indecipherable. The thought of the wasted years of unceasing research work unhinged his brain, and in a fit of depression he committed suicide.—Tit-Bits.

GETTING AN EDUCATION.

After the Age of Thirty is the Time to Start in Earnest.

According to the Saturday Evening Post, the best time to get an education—perhaps the only time—is any time after one has passed thirty. The stuff that one learns before twenty is not meant to be remembered. It is only a placing of the chutes and an arrangement of the bins for the permanent contents. From twenty to thirty one is all torn up with courting, marrying and getting a foothold in life. After that is the time for education—from then on until death or senile debility.

A man or woman past thirty is exactly at the most favorable period for mastering knowledge, training the mind, forming the taste. Some systematic effort is all that is necessary. Notice the silly and tiresome ways in which enormous numbers of people spend some of their holidays. They know what to do with their working hours, but not with their leisure.

Most of them by a little direction and a little systematic effort might develop some special interest. Boys quickly tire of mere aimless and painless play. Naturally they want a method and a goal in it. Having a goal is exactly what gives zest to the game.

And having a goal is both easy and delightful. To study anything with interest, from logarithms to caterpillars, gives one fun and profit at the same time. Try it.

NUNOBIKI WATERFALLS.

Bewitching Night Scene at a Popular Japanese Resort.

A sight in the summer life of Japan not easily forgotten is procured in a night visit to the Nunobiki waterfall, just outside Kobe, on the northeast. There are two falls, the lower or female fall of forty-three feet and the upper or male fall of eighty feet, the water gushing in each case out of the hill above and falling down the gorge to a whirling pool below. It is reached by an easy, winding climb up the cliffs of the "Million Fireflies"—tiny electric bulbs in thousands among the trees—and the thousands and thousands of gayly-clad women and children visitors shepherded by the more sombre clad men give the traveller two distinctly delightful sensations before reaching the illuminated falls themselves.

The tiny lights come and go among the trees in a bewitching way. The single light, says the Kobe Chronicle, which illuminates the higher fall will perhaps appeal to many rather than the colored lights thrown on the lower fall, and the lamp rays giving the fountain the hues of the rainbow may be regarded as artificial. Nevertheless the general effect is attractive.

To anyone who knows China it is impossible not to draw a comparison favorable to the Japanese in viewing the crowd. Entrance to the gorge is perfectly free, yet thousands flocking there every evening are neatly dressed in summer garments, every one clean and respectable, while the conduct of the great crowd is orderly and marked by a sense of quiet enjoyment. Such a scene would be almost impossible in China, and until the idea of personal cleanliness can be introduced among the swarming millions of that country we are afraid the Japanese will continue to look down upon their neighbors as inferior.

A FARCICAL TRAGEDY.

(Buffalo News)

Few rightminded people will have much sympathy with the Irish rebel prisoners and the general consensus of opinion will be that they are only reaping the whirlwind they sowed.

The whole uprising was a foolish and foolhardy affair. It was badly conceived, badly timed and failure was its fate.

The uprising will go down in history as a farcical tragedy, and the leaders given the cap and bells.

2 IN 1

SHOE POLISHES

Contain no acid and thus keep the leather soft, protecting it against cracking. They combine liquid and paste in a paste form and require only half the effort for a brilliant lasting shine. Easy to use for all the family—children and adults. Shine your shoes at home and keep them neat.

GAME IN SUMMER.

Hawks, Horned Owl and Crow Tax Skill of Hunter.

Upland birds that can be shot during the summer months are good game for the hunter. There are the various hawks, like the Cooper or hen-destroying variety, that feeds on the young grouse, as well as the farmer's unguarded flock of early [illegible], which he picks off one by one, despite the outcries of the mother and the valiant screams of the chanticleer father.

The duck hawk will start after a selected partridge and actually fly it down, as a dog will run down a hare, never leaving it from start until capture. The great horned owl also levies a heavy tribute upon roosting birds, often coming to the open poultry houses, where it will ruthlessly destroy several fowls by eating their heads and leaving the bodies piled up under the roost. This is also the way that the raccoon serves the half-grown turkeys roosting on the hay rack in the big barn about harvest time.

It will tax the rifle skill of any man to shoot a hawk, for he is very shy and must be killed at long range, if at all, as he sits on some dead limb watching for his prey in the thick grass below. Besides the hawk and owl, the hunter will find that the crow will afford lots of sport, if he can surprise one on some clearing and get a snap shot at close range, or else do some long range rifle work on a dozen or so of these birds sunning themselves on the top of some old dead tree 100 yards or so distant.

A good way for the visitor and his farmer guide to approach a bunch of these black imps at work pulling up and devouring the young kernels of the latter's recently planted corn (maize), is to crawl on hands and knees through a thick copse of undergrowth and open up the battery from the leafy mask. Of course, if the hunters have only shotguns, they must worm their way farther in, until the proper range is reached.

The Indians used to capture a young crow, tie a long fishing line to one leg and cast the youngster into the open place where the parent and other crows could see it. Then they would pull the leg of the crowlet and make it cry. This would at once bring the whole flock of its elders to its assistance, for crows are very sympathetic and are banded together for self-defense, like most robbers and thieves.

Any one of the foregoing kinds of hunting may be practised freely by any visitor to an upland farmhouse, and the more of these noxious animals and birds he kills, the better his host will be pleased.

Why the Sea Has Pearls.

A few weeks ago I was talking with a woman of deep religious sentiment who was in great distress because her very young baby had died before it was baptized.

I was led to ask natives of Norway, Finland, and other places their views on this very delicate question, and so I came across a bit of very pretty Sicilian folklore.

To the babies in Sicily life is very kind and death is gentle. Those who die unbaptized are doomed to wander, but do not wander grieving. Madonna Mary sends to them every week an angel, who lays aside his lily crown and romps with the dead babies. When he leaves them he gathers up in a golden chalice all the tears they have shed during the week. These he casts in handfuls into the sea, "and that is why the sea has pearls." I like that story.—Vancouver World.

SUMMER SCHOOL JULY AND AUGUST
GEO. Y. CHOWN REGISTRAR

FROM THE HOSPITAL COT.

(By Carl Hawes Butman.)

At first they said I was dyin',
But I prayed to my God not to go.
There's the folks back 'ome and Jimmie;
I've been missin' 'em lately, you know.
I fought best I could in the trenches,
Do you think that I wants to be 'ere?
But wot could I do? I was shot through and through,
An' they ordered me back to the rear.

We'd 'ad an 'ard fight with the Deutschers;
I must 'ave plugged forty or more.
Orders came to advance on the beggars—
I must 'ave got 'it in the fore.
But I never knowed that until later,
When I woke in a 'ospital cot,
With a nurse fussin' round, 'andy some'ow;
I was clean, but the fever burned 'ot.

To-day I'm more fit an' quite 'opeful,
That last charge—it ain't 'arf been told;
We'd been waitin' and waitin', most tiresome,
With weather first 'ot and then cold.
When it rained you were wet to your middle,
You couldn't keep dry an' stay whole;
Everyone was clear out of tobacco,
And the stench from the field 'urt your soul.

Well, the charge come at last, on a Sunday.
We was up an' away at the sign,
'Twas me and Jimmie, me Bunkie,
Were a-leadin' that khaki-clad line.
There' was bullets and shrapnel a-plenty—
Small wonder we didn't all die,
But we fired from prone on our bellies
At nothin' mostly, an' 'igh.

—From The Canadian Magazine for May.

—The 173rd Highland Battalion has been given a complete sporting outfit by E. J. Sifton, engineer and manager of the Hydro Department.

MAGIC BAKING POWDER

Clever Elephant.

"Elephants are clever animals," said a trainer, "and I once had one that could read. He was a quarrelsome beast, and one day he got into a scrape with the Bengal tiger, and before we could get them separated he had his trunk badly damaged. After the scrimmage was over the elephant broke loose and started down the street fast. 'He's going wild!' somebody shouted. 'Don't you believe it,' says I. Now where do you suppose that elephant went to?"

"Went to the surgeon's, I suppose. Can't you get up a better yarn?"

"No, he didn't go to the surgeon's. He went straight to a little shop where a sign read, 'Trunks repaired while you wait.' Of course he had made a mistake. But what do you expect of a poor dumb brute?"—London Globe.

How Ledgers Got the Name.

On the authority of the best lexicographers "ledger" is an adaptation of a once common word, "ligger," signifying any large book suited better for lying on a desk than for carrying about. Sometimes his was applied to a large account book, cartulary or the like, frequently a great breviary for use in church, as distinct from a "portas," or small one, carried by a "book bosom priest." "Coucher" is another old synonym for "ligger," the foregoer of the new general "ledger."

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength, and happiness by this method. Write to-day. Address: Mrs. M. Summers, Box 8, Windsor, Ont.

The Children's Hour.

Between the dark and the daylight,
When the night is beginning to lower,
Comes a pause in the day's occupations,
That is known as the Children's Hour.

I hear in the chamber above me
The patter of little feet,
The sound of a door that is opened,
And voices soft and sweet.

From my study I see in the lamplight,
Descending the broad hall stair,
Grave Alice, and laughing Allegra,
And Edith with golden hair.

A whisper, and then a silence;
Yet I know by their merry eyes
They are plotting and planning together
To take me by surprise.

A sudden rush from the stairway,
A sudden raid from the hall;
By three doors left unguarded,
They enter my castle wall.

They climb up into my turret
O'er the arms and back of my chair;
If I try to escape, they surround me;
They seem to be everywhere.

They almost devour me with kisses,
Their arms about me entwine
Till I think of the Bishop of Bingen
In his Mouse-Tower on the Rhine.

Do you think, O blue-eyed banditti,
Because you have scaled the wall,
Such an old moustache as I am
Is not a match for you all.

I have you fast in my fortress,
And will not let you depart,
But put you down into the dungeon
In the round-tower of my heart.

And there will I keep you forever,
Yes, forever and a day,
Till the walls shall crumble to ruin,
And moulder in dust away.

—Longfellow.

The Majesty of Calmness.

Be calm.
Be dignified.
So many try it.
So few realize it.
Calmness gives poise.
There's real majesty in it.

Compare those who have it with others.

And then plan to achieve calmness for yourself.

Hurry and worry are not only bad style—they're a disease.

Go at things sanely and calmly and keep at them in the same way.

Some of us wouldn't know our selves.

MOTHERS

REMEMBER! The ointment you put on your child's skin gets into the system just as surely as food the child eats. Don't let impure fats and mineral coloring matter (such as many of the cheap ointments contain) get into your child's blood! Zam-Buk is purely herbal. No poisonous coloring. Use it always. 50c. Box at All Druggists and Stores.

OTHER PAPERS VIEWS

A SAFE PROPHECY.

(Rochester Herald)

The next thing on the docket is the engineering of a plot by the hyphens to cause a revolution in U. S.

SOUND ADVICE.

(Guelph Herald)

Canadian papers are issuing "warnings to canoeists." The only proper advice to give a canoeist is to keep his head down when he reaches the trenches.

GREAT FOR ONTARIO.

(London Advertiser)

Horse buyers from the States are buying good horses around Wyoming for [illegible], and will sell them to European buyers for [illegible]. Great for Ontario.

A SMALL AFFAIR.

(Pittsburg Gazette-Times)

It is now stated on reliable authority that the Turks have not engaged in a wholesale Armenian massacre as reported, but killed a mere matter of [illegible].

WARNING TO ANGLERS.

(Montreal Gazette)

The anglers of Ontario should make the most of the spring season of fishing, for when the autumn comes prohibition will be in force. How can a chap fish without his customary bait?

FIERCE.

(Ottawa Citizen)

We realize that this is pretty fierce but it has been troubling us for some days and it is better exploded: Only the rasher will contend that Shakespeare's works were written by Bacon.

WORLD VIEW OF THE GERMANS.

(Toronto Star)

The world outside of Germany does not hate Germans. It regards them with wonder, as a sane man looks at a neighbor who is drifting away from sanity.

AN EXPLANATION DUE.

(Guelph Mercury)

It begins to look, from the dealings of the shell committee, that the manufacturers of Canada, after putting the Borden Government in power on the plea of no truck or trade with the Yankees, had a long explanation coming to them.

OUR BRAVE TROOPS.

(Rochester Post-Express)

Splendid intrepidity marks the conduct of the Canadian contingents in the British armies. No home scandals of munitions or equipment purchase can dim the lustre of their achievements, rob them of hard-won glory.

CASEMENT'S CRIME.

(Buffalo Express.)

Sir Roger Casement's real crime is not the legal one against the United Kingdom, but the moral one against the Irish people.

WILL ADAPT HERSELF.

(Buffalo News)

England will have to come to conscription as sure as night follows day. And British tradition for adaptability will enable her to absorb the system and use it toward ultimate success.

DOUBTFUL ABOUT EQUINES.

(Ottawa Citizen)

We might have got those Colts as cheap as claimed but our experience with painted equines of a more ancient vintage leads us to view all such transactions with a suspicious eye.

ONE GOOD RESULT.

(St. Thomas Journal)

The display of neat shoes and stockings permitted by fashions short skirt is one thing. The sanity of it compared with the trailing one of a few years ago that swept up the dirt and filth of the streets, is more important.

CANADA A RICH PRIZE.

(Philadelphia Bulletin)

It may safely be said that only the dominant power of the great battle fleet of England has kept the war thus far from our very doors. Canada would have been a rich prize, and it is not at all certain that the neutrality of the United States would have counted more than that of Belgium—in fact, there are evidences that it has been as lightly regarded.

THE REVOLTERS' FOLLY.

(Chicago Tribune)

The good judgment of the Irish revolters can be questioned. They are not helping the cause of Ireland. They are not advancing their land toward freedom. They are confirming what remains of stubborn English tory opinion in the conviction that Ireland never can be treated safely except as a subordinate.

THE WASTEFUL STRIKE.

(Buffalo Express)

Is not the strike method of settling labor troubles mighty costly for all concerned? Would one not be warranted in expecting that both employees and employers would see the error in these fights and resolve on adopting some scientific system of dealing with all labor questions?

GOOD OUT OF EVIL.

(Montreal Mail)

Out of this incident, Mr. John Redmond emerges a stronger man before Ireland and the Empire, and Great Britain emerges better unified and prepared for the present task. Ireland has had a house-cleaning and some of the worst neighbors of the Irish peasants have moved.

WHY CITY SOLDIERS EXCEL.

(St. Thomas Journal)

One British expert says city men make the better soldiers, "being used to staying up nights, while the country chap is in the habit of going to bed with the chickens." The diagnosis is wrong. Dodging automobiles and bill collectors is a more probable explanation.

PROVING THEIR ABILITY.

(London Advertiser)

John Redmond fears the trouble may delay or lose forever home rule. Why? Are not the Irish people even now striving by fighting their own traitorous countrymen to show themselves capable of governing the country and maintaining law and order, if given the power and authority.

LOST OPPORTUNITIES.

(Buffalo Express)

A French correspondent says that the British have kept [illegible] troops in Egypt all winter. They could have protected the canal better, save Townshend, taken Bagdad, and otherwise influenced the progress of the war by using three fourths of those troops for a descent on the coast of Syria or Palestine, using Cyprus as a base.

SCIENTIFIC ORDER.

(Judge)

Mr. Pessimist—What is a consulting specialist, anyhow?

Mr. Optimist—Oh, he's the big doctor that says you are going to die and tells you how to do it properly.

THE SILVER LINING.

(Sketch)

The Tender-Hearted Cook—No bad news, I 'ope, ma'am?

The Mistress—The master's been wounded.

The Cook—There now, ma'am; don't let that worry you. They tells me they can patch 'em up so's they're better than before.

VERDUN.

(Philadelphia Record)

The German Crown Prince's army, which began its attacks on Verdun on February 21, yesterday concluded its 70th day of that disastrous operation. This is a remarkable example of persistency in the face of great discouragement, but possibly the Kaiser's General Staff believes that in a military assault as in the Biblical forgiveness of sins, it must be repeated, if necessary, 70 times seven. In that case one unit has been disposed of. The French seem to regard the threatened repetition of the performance with entire complacency.

WALKERTON TELESCOPE
$1.50 per year in advance.
LORNE A. EEDY - PUBLISHER
Phone No. - 48
Residence - 146

WALKERTON, MAY 18th, 1916.

THE STATION ROAD

The Town Councillors did a good night's work when they committed themselves to the scheme of building a new permanent roadway from Station to Station. It is to be hoped that they will continue the good work by getting their facts and figures together at once, and submitting the matter to the ratepayers without delay, so that a good portion of the road, at any rate, may be completed this year.

While this town has no money to spend on fanciful or extravagant schemes, it is well to recognize the fact that Walkerton can well afford to make an expenditure such as this, which is recognized as most important for the best interest of the whole town. Walkerton forunately is exceptionally free in the burden of debt. Even after financing the proposed roadway, it is doubtful if a single town in the Province will be able to show as low a debenture debt.

The suggestion was made by one or two of the Councillors that the road be built on the frontage improvement sytem. This might be alright, if not carried too far. We must recognize that the great benefit of the road will not be, after all, to the property owners along the street, but to every individual citizen of Walkerton.

+ + +

TRUAX WAS RIGHT

In coming out squarely against any suggestion of interference from Ottawa on the bilingual school question in Ontario, Mr. Truax took a stand which is heartily commended by all classes in South Bruce. Twelve liberals stood with Mr. Truax against the Lapointe resolution, the other eleven being all from the Western Provinces. The Globe sizes up the situation well, when it says:—The Liberal members representing Ontario constituencies at Ottawa will doubtless consult their constituents before next session on the issue of bilingualism in its relation to Provincial rights. They will discover that the people of Ontario stand firmly upon the ground taken by Mr. Rowell. The Province must settle its own educational problems without interference from Ottawa in any shape or form.

EDITORIAL COMMENT

Every man has to die, but only a few have the privilege of dying for their country.

+ + +

According to a Stratford paper, if a person loses a purse containing $5 in that city it is necessary to offer a reward of $7 for its return.

+ + +

Ottawa Citizen (Conservative):—Ontario municipalities do well to watch closely the manoeuvres of the Provincial Government. It has become a bureau-cracy, like most governments when they are allowed to stay too long in office.

+ + +

Winnipeg Free Press:—It is unfortunate that a forty-two centimetre German shell cannot land somewhere in the immediate vicinity of the "constitutional" dug out where Henri Bourassa, Armand Lavergne and Senator Choquette are in hiding.

+ + +

Don't be a knocker. Hide your little hammer and try to speak well of others no matter how small you may know yourself to be. When a stranger drops in, jolly him. Tell him this is the greatest town on earth—and it is. Don't discourage him by speaking ill of your neighbor.

+ + +

An influential American weekly, in urging its readers to increase and continue their giving to the war sufferers in Belgium and Poland and Armenia, uses this striking sentence: "What is needed in our giving is not a volcano, but a steady stream." This is equally true for Canadians in our gifts to Patriotic, Red Cross, and War Relief funds.

+ + +

After all the Times paid a pretty high compliment to R. E. Truax M. P. with its sawdust story. The Times saw the need of raising a bit of dust to divert attention from the Million Dollar Rake-Off charges at Ottawa and proceeded to "start something." The ridiculous sawdust story was the worst attack it could frame up. This surely speaks volumes for Mr. Truax.

+ + +

The Shell Committee investigation begins to be interesting. After some dull but useful spade-work, something of the true inwardness of the operations of the Committee is now being revealed. While a newly-improvised United States company without any manufacturing facilities was given an order for two and a half million fuses, a well-established and reputable Canadian company possessing a large plant, was turned down flat when it sought a contract. It was nine months after the contract with the Yankee company was entered into before the first small delivery of fuses was made. It is clearly proved that at least one million dollars was divided between Allison and his friends. It looks now as if the Kyte charges would be proved up to the hilt.

With Walkerton Boys At Bramshott Camp

Corp. Reg. McCarter, of the 160th, had an interesting letter last week from his friend, Pte. Alvin Wilton, of the 71st, describing the journey to England.

Corp. Milton McCarter,
160th Bruce Batt.,
Walkerton, Ont., Can.

Dear Milt.:—

This being Sunday evening and I just came off guard, I feel too tired to go out, so I thought it a good time to drop you a few lines to let you know I am enjoying the best of health and I sincerely hope that this letter will find you the same.

Well, Milt., our trip was one that was very much enjoyed by everybody. We left Galt March 29th, travelling three nights, two days and a half on the train to Halifax, arriving April 1st when we sure got April fool good and plenty. We were waiting our turn to go aboard the boat when word came to us that we were to be quarantined for two weeks as a few cases of measles had broken out in our company on the way, but Sunday the good news came that three Platoons of the Company would be able to go with the rest of the Battalion.

The Olympic was the boat that we crossed on. She sure is some boat. She is a sister ship of the Titanic. She is 883 feet long, 81 feet wide, has 8 decks counting the boat dock. She carries a crew of 1,000 in war time and in peace half as many again. She also had 7,000 troops on board counting doctors, nurses and soldiers. We lay in Halifax harbor till the following Wednesday as she had to coal up and take on supplies. It was just 1.15 a.m. when she started on her way. The water was quite rough and the pilot boat followed us till near noon when we stopped for the pilot to get off. The pilot boat got too close and her masts smashed two of the Olympic's life boats which were left to drift also, smashing her rigging and wireless wires also one of their own life boats. It sure was some excitement and a bad beginning. The rough water didn't last very long. We were soon in calm water. The second day at sea we ran into a very heavy fog off the coast of Newfoundland, which caused us the loss of considerable time. It lasted for two days only and then we came to very warm air and clear weather which lasted the rest of the voyage. We landed in Liverpool harbor, April 11th, at 8.30 a.m., but were not taken off until nearly 5 p.m. We were marched right onto the train and landed at Liphook at 3.30 a.m., which is 2½ miles from the camp. The camp is like a large city, it is quite different from Canadian camps. Instead of tents we live in wooden huts which hold between 30 and 40 men. There are between 40 and 50 thousand men in the camp. It is some sight to see them on church parade. It sure is some long line of parade.

The 71st is nearly all quarantined in with the measles at the present time. Our hut is the only one around us that has kept clear, but we expect to get our's before long as they seem to be travelling very quickly through our quarters.

We see some very peculiar things. The scenery is very odd. There is a big aviation camp six miles from here and it is a very common thing to see aeroplanes sailing over the camp. Just before starting to write there was a very odd one went over the camp.

Your old Chum,
A. WILTON.

What I Know About Belguim

BELGIUM is undoubtedly the Gethsemane of this world shaking war. Readers of Caesar's first book of "Bellum Gallicum" will remember, that the great Roman Commander and historian tells us that of the three peoples that make up Gaul, the bravest are the Belgians—"Horum Omnium fortissimi sunt Belgae."

It has been my good fortune to have been able to study Belgium and its people at close range. I have travelled through it many times and was privileged to spend a semester at its great university, Louvain, now alas! in ruins, in the autumn of 1903. I remember very well Cardinal Mercier, who was then at the head of the School of Philosophy, and whom I frequently heard lecture in Psychology.

Louvain University is to Belgium what Oxford is to England—its glory and its pride. In the fifteenth and sixteenth centuries there was much interscholastic relation between Louvain and Oxford, professors lecturing for part of the year at Oxford, and part of the year at Louvain. This was the time of the great Erasmus, who practically directed the scholarship of Europe from his chair at Louvain.

Since leaving Louvain, I have kept up occasional correspondence with several of its professors. I hold now a letter from Rev. Father Willaerts, the Jesuit priest who prepared for death his young companion Jesuit Father Dupierieux who was shot to death by the German Army on that memorable 27th of August, 1914, when Louvain and its great University were left in ruins.

Belgium, before the war, had an enlightened Government and the greatest freedom and toleration were extended to all classes and creeds. Its School System was a Model of Justice. The people are almost equally made up of French and Flemish. In the Primary Schools the parent, whether Flemish or French, had the right to say in what language his child should receive instruction. Nothing could be fairer. In view of this fact the German Imperial Chancellor's remarks a few days ago in the Reichstag, expressing sympathy with the Flemish people of Belgium, are truly amusing, if not absurd. But this is a time of war. Let us therefore, as Canadians, seek a victory without racial hatred. It is not the Teuton who is on trial, it is "Prussian Militarism"—it is Kaiserism. Let us then be just and charitable to our German neighbor whose virtues may be not less than our own.

—THOMAS O'HAGAN.

THE POETS' COLUMN

BOYS OF BRUCE

What do you stand for, Boys of Bruce
As you mass a thousand strong?
As you tread on streets with your martial stride
Or so cheerily swing along.

What do you stand for, Boys of Bruce?
You sons of our noble sires!
You sons of mothers whose love and zeal
Keep glowing the old home fires.

Stand for your liberty, Boys of Bruce,
For honour, and truth and right!
For a land unsullied by tyrant's tread,
Untrammelled by tyrant's might?

Yes, we are proud of you, Boys of Bruce,
Who are pledged for your Empire's sake;
Proud as your names grace our honor roll
But your record is still to make.

May you prove true to our faith in you,
To the home-light's steady gleam,
True to yourselves, to your King, to your God,
Though the cost be the Price Supreme.

—MRS. LOTTIE MOORE.

LAZYBONES

I guess I'm watching for the spring—
I don't want to do anything
But sit beside a sunny wall
An' listen for the first fur call
Of the fieldlark, I otto plow,
But I don't want to do it now;
I want to go out 'bout a mile
An' bait a hook and fish a while.

I otto get a lot o' paint
And paint the place up, but I ain't;
I ain't a-gonna do a thing!
But just stretch out and watch for spring;
Here where the yellow sunbeams fall
Down on th' shiny side th' wall.
And see the buds bust on the trees.
And ketch the perfume on the breeze.

That's ever'thing I want to do;
I ain't got the ambition to
Go and dig a worm, or I might go
'Way out where the alders grow
And cut myself a slender pole
And perch beside the fishin' hole
Until the fishpole gives a swing,
An' goggle-eyes finds out it's spring.

Ambition was not made for me;
A nook beside a wayside tree,
Beside a crick, and with a pole,
And a fish lurkin' in the hole,
I'll be a happy, happy man,
Because the springtime has began,
I can be happy in the spring
If I don't even ketch a thing!

—J. M. Lewis, in Houston Post

MOTHER

"M is for the million things she gave me,
O means only that she's growing old,
T is for the tears were shed to save me,
H is for her heart of purest gold,
E is for her eyes with lovelight shining,
R means right, and right she'll always be;
Put them all together, they spell MOTHER,
A name that means the world to me."

Office Stationery

BUSINESS Stationery should reveal the spirit of the business for which it is used. An appropriate letter head for a profession would be inappropriate for a mercantile house.

The typographical appearance of a letter head for a doctor should be small, neat, dignified—almost feminine; for a blacksmith, black, rugged, plain; for a vaudeville performer, loud, showy, big; for a bank, rich, dignified, restrained; for a store, neat, practical, harmonious, and so on.

Correspondence paper should not reflect poor judgment. Everything counts in these days of sharp competition.

POETS' CORNER

OUT FISHIN'

A feller isn't thinkin' mean,
  Out fishin';
His thoughts are mostly good and clean
  Out fishin'
He doesn't knock his fellow men,
Or harbor any grudges then;
A feller's at his finest, when
  Out fishin'.

The rich are comrades to the poor,
  Out fishin';
All brothers of a common lure,
  Out fishin';
The urchin with the pin an' string
Can chum with millionaire an' king;
Vain pride is a forgotten thing.
  Out fishin'.

A feller gits a chance to dream,
  Out fishin';
He learns the beauties of a stream,
  Out fishin';
An' he can wash his soul in air
That isn't foul with selfish care,
An' relish plain an' simple fare
  Out fishin'.

A feller has no time for hate,
  Out fishin';
He isn't eager to be great,
  Out fishin';
He isn't thinkin' thoughts of pelf,
Or goods stacked high upon a shelf,
But he is always just himself,
  Out fishin'.

A feller's glad to be a friend,
  Out fishin';
A helpin' hand he'll always lend,
  Out fishin';
The brotherhood of rod an' line
An' sky an' stream is always fine;
Men come real close to God's design.
  Out fishin'.

A feller isn't plotting schemes
  Out fishin';
He's only busy with his dreams,
  Out fishin';
His livery is a coat of tan,
His creed: to do the best he can;
A feller's always mostly man,
  Out fishin'.

—By Edgar A. Guest, from Marble's Monthly Message.

News About Town

Keep up heart, boys, summer will soon be here and then you can have a swim.

The average age of the Bruce Battalion is 25, and the percentage of farmers is 33.

The most prevalent form of neutrality we have noted is the remarkable neutrality maintained by many folks between God and the devil.

Mr. J. A. Marsh was at Lucknow on Monday evening, where he rendered a number of solos in connection with a lecture given by his father, Rev. Mr. Marsh, of Holstein.

We reside in Lionhead. For several years we have lived in Lion's Head, Lionshead, Lions Head, Lyonhead, Lyon's Head, Lyons Head, or some such place.—Lionhead News.

All Rexall Druggists, everywhere, guarantee Rexall Orderlies as a safe and gentle laxative. 10c and 25c boxes.—A. P. Sieveright.

Tramp—Please, mum, I'm a Belgian refugee.

Lady—Are you? Mention a town in Belgium.

Tramp (cogitating a moment)—I would, mum, but they have all been destroyed.

A young soldier lad, who had experienced great difficulty in getting acquainted with the now fair possessor of his heart, refuses to introduce her to his chums whose blandishments, he fears, may rob him of her affections. Wise Harry.

One of the soldiers says he would not marry a Scotch girl because she cannot cook. Another says he would not marry a Canadian because she would never remain home long enough to do anything. Now, girls, get busy and prove the fallacy of these opinions.

Recognizing the fact that there has been so much litigation over the commission to be paid in real estate, the Ontario Government has brought in an act this session making it compulsory that every real estate agent must have a written agreement setting out the commission he is to receive before he can collect the amount in court on any real or personal property he sells.

Still the prices are soaring? A few weeks ago we spoke of paying $5 a pound for printing ink we formerly bought for $3. That was a sudden jar, but not quite so bad as the one we got on Tuesday when a representative from the ink house was here and asked us $15 a pound for the same ink. Fifteen dollars a pound! We'll spell it out in full so as to make no mistake about it.—Durham Chronicle.

* * *

Chesley's Record.

Chesley challenges any urban municipality in the Province to show a better record for 1915 than the following. With a population of 2,000 persons, the assessed property value is $832,770; total taxes for 1915, $22,224.60. On May 1st the collector handed in his roll showing only $31 in uncollected taxes and not one cent in water

A few days ago E. Whitley caught an 18½ pound fish off the dock at Kincardine. What are the big suckers hanging around Kincardine for?—Lionhead News.

✦ ✦ ✦

Moved to Walkerton.

Mr. and Mrs. Alex. Grant, for many years residents of our village, are moving to Walkerton next week where they will make their home. Many friends of the family will regret the departure of this industrious and talented family and many good wishes will go with them for prosperity and success in their new home.—Teeswater News.

✦ ✦ ✦

Exams. on May 27th.

History and Hygiene are two subjects on which the teacher's certificate of proficiency for Junior High School Entrance Exams. has hitherto been accepted. The Entrance Boards determine whether the pupils in each inspectorate must pass a written examination in these subjects. Inspector McCool is strongly of the opinion that History and Hygiene are too important subjects for pupils to have an imperfect knowledge of them and he has wisely decided that as far as East Bruce is concerned Entrance pupils must pass a written final examination in these subjects. The other members of the High School Entrance Boards have endorsed Inspector McCool's plan and consequently, at every examination centre in East Bruce, Entrance candidates will write off these two examinations on Saturday, May 27th.

✦ ✦ ✦

It's Lionhead Now.

For 20 years we have held the belief that the hamlet we live in was Lion's Head. But "Live and learn" says the cobbler. We are wrong. We received last week the 14th report of the Geographic Board of Canada, on page 108, of the report, it is defined as follows: "Lionhead; harbour, headland and village, Eastnor Township, Bruce County, Ont. (Not Lion Head nor Lion's Head). We have often felt undecided whether there should be an apostrophe, and we have often seen it written as one word. But now the doubts are cleared, we must call our burg "Lionhead," that's its name, for the final tribunal on the matter has decided so. Beginning this week we intend to print, write and pronounce the name correctly, there is only one way to do so, and we expect no appeal from the Board's judgment.—Lionhead News.

✦ ✦ ✦

A Formosa Pioneer.

The late Mrs. Catherine Mosack, whose death occurred at the home of her daughter, Mrs. F. Oberle, Walkerton, on May 8th, was one of the earliest pioneer settlers of Formosa. The deceased, whose maiden name was Catherine Hauser, was born in Alsace, which was at that time, a province of France, and came to Formosa at the age of 17. That was 67 years ago, and she lived in Formosa practically up to the time of her death. Her husband, the late Michael Mosack, predeceased her 22 years ago. Two sons and four daughters survive. They are:— Charles, of Imlay, Mich., and Harry, of Riversdale; Mrs. F. Feilrenbach, of Bay City, Mich., Mrs. Ambrose Kroetch, of Mt. Carmel, N.D., Mrs. F. Oberle and Miss Tillie, of Walkerton. She also leaves twenty-one grandchildren and six greatgrandchildren. The funeral which took place on Wednesday of last week, to Formosa cemetery was largely attended by relatives and friends.

✦ ✦ ✦

Back From California.

Mr. H. McCrum arrived home Tuesday night of last week from California "the land of sunshine and flowers," when he and Mrs. McCrum had been spending the winter months. The latter had arrived two weeks earlier coming through direct, but Mr. McCrum spent a few days on the return journey with his brother at Boise City, Idaho, and his son at Helena, Montana. Having gained in weight and looking the very picture of good health, it is unnecessary to ask him if he had a good trip. The Californian winter this year was ideal. Arriving in Los Angeles just after the rainy season, Mr. McCrum had nothing but mild weather and sunshine. The coldest day he experienced since leaving here four months ago, was Wednesday last, his first day home. Mr. McCrum was most favorably impressed with California in most respects, but says that the class of people living there, not speaking of the tourists, is not to be compared with those of Ontario.

THE MAIL ORDER HOUSE

Any "home merchant" who isn't awake, and fails to tell the people about his wares, should read this startling statement, made by that manager of a big Toronto mail order house, recently:— "We have a bureau whose duty it is to read the country newspapers. There is not a paper of any consequence in our territory we do not get. This bureau looks over these papers and when we find a town where the merchants do not advertise in the local papers, or where advertisers do not change their advertisements regularly, we immediately flood that section with our literature. It always brings results far in excess of the same effort put forth in territory where the local merchants use the local papers."

COUNTY CORRESPONDENCE

(Continued from Page 8)

HANOVER

Morley Metcalfe, the 7-year-old son of Mr. James E. Metcalfe, tripped and fell off the verandah steps onto the cement sidewalk, one day recently, breaking his arm.

The citizens of Markdale are planning to present the Grey Batt. with colors. Markdale is Lt.-Col. McFarlane's native town.

Seventy-two tickets were sold in Hanover at the Grand Trunk station on Wednesday of last week for the 147th Battalion Day, at Owen Sound. The excursionists had a splendid time, and enjoyed the demonstration of the 147th Greys very much.

The 147th Grey Battalion, under the command of Lt.-Col. McFarland, are scheduled to go into camp, at Niagara-on-the-Lake on May 19th.

The tentative groupings of the respective O. A. L. A. series have been drafted. Hanover intermediates are in Groups No. 1 with Orangeville, Dundalk, Shelburne, Durham and Owen Sound.

Mrs. Valentine Dresch, a former resident of Hanover, passed away at Galt at the age of 72 years.

Mr. Harvey S. Weppler, son of Mr. and Mrs. Daniel Weppler, has secured his B. A.Sc. degree with honors.

Mr. E. H. Hogate has sold the Lyric theatre to Mr. William A. Williams, of St. Catharines, who took possession Monday evening last.

It has been suggested that before the Grey battalion leaves Owen Sound, that arrangements be made with a motion picture firm to photograph the battalion on parade and thus preserve for future generations an actual record of what this county accomplished in furnishing troops for the great war.

With the view of securing 200 additional men to bring the 147th Battalion up to full war strength before the battalion leaves for Niagara on the 19th of the present month, a whirlwind campaign has been put on and will be continued until the required number of recruits is obtained. The county has been divided into ten recruiting divisions with one or more battalion officers in charge of each. These officers will have the assistance of private members of the battalion and such of the members of the local recruiting leagues as may see fit to engage in the good work. It is proposed to make a personal canvass of young men who have not yet deemed it their duty to respond to the call of their King and Country.

Rev. John Leypoldt, pastor of the Hanover Baptist Church, and Mrs. Leypoldt, sustained a double bereavement last week. Mr. Leypoldt's father, Mr. John Leypoldt, died at Philadelphia, at the age of 56 years. Death was due to dropsy. Rev. Mr. Leypoldt attended the funeral which took place on Sunday of last week. Mrs. Leypoldt's mother, Mrs. Marianna Kusch, who had been living with her for the past three years died on Sunday morning at 8 o'clock at the parsonage here. Death was also due to dropsy. Deceased had been ill six weeks. She was born in the province of Berne, Switzerland, but emigrated at the age of 7 years. She resided at Bay City and Rochester. The remains of the late Mrs. Kusch were taken to Rochester for interment.

A party from Hanover and neighboring towns went to Oshawa this week to bring home their McLaughlin cars. Four came to Hanover, one to Durham, one to Ayton, one to Walkerton and three to Shelburne. The party included: Mr. and Mrs. Adam Selling and Mr. Alvin Kurtz; Mrs. J. B. Knechtel, Miss Florence Kirchner, Mr. Geo. Francis, Mr. Harold Kormann, Mr. Herman Gruetzner, Mr. John Kalte and Mr. Norman Lorenz, all of Hanover; Mr. Henry Grasser of Southampton, Mr. G. S. Schwindt and son of Walkerton, Mr. Oscar Hahn of Durham; Mr. Valentine Damm, of Ayton and Mr. T. S. Harris, of Shelburne.

RIVERSDALE

A very pretty wedding was solemnized at the home of Mrs. Samuel White, of Greenock, on Wednesday, May 3rd, when her niece, Miss Florence Lockard, was united in marriage to Mr. Fred Brindley, of Riversdale. Reverend C. N. McKenzie performed the ceremony. The bride was charmingly attired in white silk—her travelling suit being of Alice Blue with hat to match. After a well prepared menu was enjoyed, the usual toasts were given and aptly responded to by the groom. They will reside on the groom's farm on the Durham road.

We are pleased to state that little Frank Cassidy is recovering, his broken arm being nicely on the mend.

Seeding is very late this year owing to the wet season.

Mrs. Ed. Benniger is laid up with rheumatism. We are hoping that she will have a speedy recovery.

Cleo Benniger, who has been spending a few weeks at home has left for Ayton where he intends to work at butter making this summer.

Mrs. Robt. Green and daughter, of Cargill, spent Sunday evening at the home of Robt. Chatreau.

Pte. Sam Hepburn spent Sunday in the burg.

Mr. and Mrs. Mosack visited friends in Walkerton, last Sunday.

Mr. Wilfrid Shropiro is on his route with his fine stock of spring goods.

Mr. George Hodgkinson is breaking in his fine new driver. Cheer up, girls!

Mr. and Mrs. John Rettinger spent Sunday at the home of Mr. Heidmiller.

Mr. and Mrs. Steve Scharbach Sundayed in Chepstowe.

Arbour Day was a great success at our school. The teacher and pupils made a great improvement in the appearance of the school surroundings by planting shrubs, etc.

Mr. Albert Dietrich is driving Paddy P., the fine new driver which he purchased last winter.

Mrs. L. Benniger, who has been holidaying at Hepworth, has returned to her home in Riversdale.

A BRANTFORD SLATE. 1.—Fibre Base. 2.—First coating of Asphaltum. 3.—Second coating of Asphaltum. 4.—Coating of crushed slate.

Yesterday and To-day

Wooden shingles of twenty or thirty years ago were of splendid quality, and answered the purpose very well. There was nothing better at that time. In fact no other roofing material was on the market. Yet who would think of putting on shingles to-day! When the deterioration of wooden shingles became noticeable, efforts were made to invent a roofing that would not only be an economical and permanent substitute for wooden shingles, but one that would outlast them in service.

Brantford Roofing was the result. It has "made good." The secret of its success is this: First, the base is of pure, long-fibred felt which is thoroughly saturated with asphalt or mineral pitch. The asphalt and crystal roll roofings are then thickly coated with crushed rock particles, which adhere tightly to that base, and the whole forms a permanent fireproof, water-tight roof.

Brantford Asphalt and Rubber Roofing are made in three different weights. Crystal is made in heavy weight only, and in red or green natural colors. All three grades are pliable and well suited to either flat or steep roofs.

Brantford Roofing

comes in rolls with protected ends. The layers do not stick together and the roofing is easily laid. It requires no painting or tarring when put on. It does not crack with the cold nor melt with the summer's heat. It does not curl, split, rust or blow off. It gives permanent weather and fire protection at a reasonably low initial cost.

May we send you our roofing book and samples? They will show you the real value of these roofing materials.

CURRENT COMMENT

The Irish war was made up of a series of murders.

We hope that the farmers have got all the rain they want.

The Kaiser has proven himself to be Ireland's worst enemy.

Is Sir Roger Casement still lagging superfluous on the stage.

More Russians still arrive in France, and more where these came from.

Montreal closed fifty of its liquor bars on May Day for good. Going dry slowly.

A good plan would be to make the Irish rebels pay for the damage they have done.

The Imperial Parliament is taking kindly to Asquith's conscription bill. It will save a lot of bother.

Toronto merchants are charged with selling German goods. Stop dealing with such merchants.

Great praise is given the young Irish soldiers for the manly way in which they fought in the streets of Dublin.

New York women are said to be gilding their finger nails. Now let them blacken their teeth.

More Russians arrive in France, and still the question is, Where do they come from?

Col. Carnegie's $25,000 salary is enough to make any man talk, seeing that money talks.

Germany should not worry about the British blockade if she has plenty of food.

Counting naval and military forces Britain has thrown over 5,000,000 men into the great war, and there are more to follow.

The Montreal Gazette points to the names of French Canadians appearing in the lists of casualties as an evidence that Quebec is doing its duty in this war.

But with a merchant ship and crew at the bottom of the sea who would know whether she attempted to attack or escape?

"Where would the allies be without France?" In Kaiser William's vest pocket—Charleston News and Courier. Where would the allies be without Great Britain?

Four more Irish rebels have been sentenced to death and many others to various terms of imprisonment. But Sir Roger Casement is still alive and kicking.

There will be a new color for the three cent war stamp. One cent stamp will be green, two cent red and three cent another color not yet made known. But the flavor of all three will be the same.

We have no wish to see a whole sale hanging of the Irish rebels, but some of these men who ambushed the Irish constabulary at Kilmore and murdered and wounded a number of them, deserve hanging.

We do not know what Sir Percy Lake proposes to do next. But whatever it is we hope that there will not be any more Gallipolis or Kut-el-Amaras to report. The Empire cannot afford to accept the count from the Turks a third time.

A recent order-in-Council prohibits the carrying of matches into any place wherein the manufacture of explosives is being carried on. The penalty provided is a maximum fine of $100 or a maximum sentence of six months in jail, or both. This should not be overlooked by those working in munition factories.

The New York Evening Post says that "St. Paul's second annual bird house contest exhibit was held this year early enough to give 4,000 children opportunity to buy and place in their yards houses that should persuade twice that many birds to give up their plans of going on to Canada." Canada can reciprocate by building bird houses to keep the birds here.

With $250,000 paid for telegrams to Senators adn Congressmen by the mysterious organization calling itself the American Arms Embargo Conference, and with Colonel Roosevelt's supporters spending $200,000 in a fruitless effort to elect delegates favorable to him from Massachusetts, the impression grows that there are a great many persons in the United States with more money than brains, says an American exchange. And look at the immense amount of money spent in telegrams to President Wilson by the pro-Germans praying him to keep the peace with Germany.

THE AMERICAN MAIL.

(The Outlook, New York)

There are those who are more concerned over the fact that England has delayed American mails than over the fact that Germany has murdered American citizens. Those who claim that the mails should have precedence over the lives of women and children seem to be strangely indifferent to the fate of the mail that has been diverted by German submarines. Upon what date will the mail bags lying in the hold of the Lusitania be forwarded to their destination.

A Spanish syndicate is considering building a railroad across northern Africa, 1,844 miles long.

'TWIXT LOVE AND PRIDE

They formed a curious picture, standing there in the old-fashioned dresses they had not had time to remove; Denzil in white satin breeches and rich ruffles and carefully-powdered hair, Miss Trevanion as "La Vallière," and her trailing embroidered satin robe, her fair hair also thinly powdered, and her soft white arms half bared.

The firelight flashed and darkened, its flickering rays ever and anon flaming warmly on the ancient costumes of the two standing before it, sending out crimson gems of light from the jewels that lay on Mildred's neck as her bosom rose and fell with the agitation she vainly strove to repress.

Encouraged by her speechlessness, Denzil spoke again—

"I love you," he said, simply. "I am only telling you what you have known all along—am I not? And yet, even to myself, when put into language, it seems quite different—the words sound so poor and cold. Is it altogether hopeless, Mildred? Is there any chance for me?"

She had moved a few steps backward as he began speaking, and now stood supporting herself by one hand resting on the table. She had lowered her eyes and fixed them on the ground, and appeared calm enough, though she made no response to his last appeal.

"Give me my answer," he said.

"You should not have gone on," she observed at length, her tone low, but angry. "I forbade you to do so. It was unfair to compel me to listen when you knew I wished neither to hear nor to understand."

"Give me my answer," he said again.

"What answer can I give?" she asked, with a slight impatient movement of the hand near him. "Better would it be to ask for none. I warned you before. Be satisfied now, and leave me."

"Give me my answer," he said for the third time, sternly. "I will take it from your own lips now."

"Then, as you will have it," she smiled, losing all moderation, "take from my own lips 'No.'"

There was a long pause. Denzil's face was as white as death—Miss Trevanion's scarcely less so; while the hand that lay upon the table appeared bloodless from the intensity with which she leaned upon it.

"Do you say that because my father earned his money by trade?" asked Denzil, slowly.

"It cannot matter now," she answered, coldly.

"Yes, it does," he went on, excitedly; "and I believe that, loving you as I do, I could in time have made you return my love had not your wretched pride stepped in to prevent it. Or can it be true what I have heard said—that you would, at any risk, willingly sell yourself to gain a title? If I could bring myself to think that of you if that were possible. Tell me, Mildred—is it the truth?"

"I do not understand you," said Mildred, haughtily. "I will listen to no more of your questioning, sir. Let me pass."

"It is true, then!" he exclaimed, passionately, seizing her hand to detain her. "You do not deny it. And you will sacrifice yourself to obtain possession of a mere position? I imagined you incapable of such a thing; but see how mistaken we all are in the idols we set up! I am thankful I was disillusioned in time. I am glad—yes, glad—you have refused me; as a woman who could so barter away her heart is not worthy to be the wife of any honest man."

Mildred was trembling with anger.

"That will do," she said. "You need not say another word. If you were to think forever, you could never say anything worse than that."

Indignantly she drew away her fingers from his clasp as she spoke, and with the action a small turquoise bracelet fell to the ground. Involuntarily Denzil stooped to pick it up, and, as she held out her hand to repossess herself of it, he slipped it round her arm and fastened it there once more. Then, a reckless feeling coming over him, and the small white hand he loved with such hopeless fondness being so well within his reach, he bent his head, and pressed a tender, despairing, lingering kiss upon it, after which he almost flung it from him and walked back to the fireplace.

What a sad, final farewell it seemed to him! As for Mildred, she made no further sign, but left the room as noiselessly as she had entered it.

In the hall she encountered Mabel, radiant and white-robed, who said:

"What—not yet dressed, Mildred?"

And Mildred answered, "I shall be down presently," quite calmly, and then went on to her room.

But, when the door was closed, and securely fastened, an awful sense of desolation fell upon her. For the first time in her life she felt what it was to be alone. What had she done? What was it she had thrown away forever and ever? She sunk upon her knees by her bed, and, burying her head in the [illegible], cried as if her heart would break.

When Mildred came downstairs, the ball was at its height. Denzil was there, as calm as ever, and apparently in excellent spirits, at the end of the sofa, conversing with her mother and old Blount. He was laughing, but his mirth was not constrained, neither was his manner in any way different from what it usually was; and, indeed, only one intimately acquainted with him would have noticed a certain bright gleam and glitter in his eyes, which betokened feverishness. He did not look toward the door, or in any way falter in his conversation when Mildred entered, although he knew who it was that had come in. Lady Caroline saw her, however.

"Ah, there is Mildred at last!" she said. "What a time the child has taken to dress! and how white she looks! I hope she has not been over-exciting herself."

"Tableaux are about the most fatiguing things I know," said Denzil, fairly, looking, not where Mildred stood, while somebody was inscribing his name upon her card, but straight into Lady Caroline's eyes.

Old Blount gazed at him curiously for a moment.

"A plucky lad!" he said to himself, admiringly.

"[illegible] they are," returned her ladyship to Denzil, in all good faith; "and Mildred is not too strong. Now that I see Mildred," she went on a little later, "I begin to wonder where Mabel can be. I have not noticed her among the dancers since first she came in."

Here she elevated her glasses to take an anxious maternal survey of the room. Mabel was nowhere in sight.

"Where can she have gone to?" exclaimed her mother; and just at that moment her glance fell on the curtains that draped the window at the lower end of the apartment. They were slightly parted, and through the opening could be seen the balcony beyond, and on the balcony a glimpse of a white dress.

"That must be Mabel," decided her ladyship, impatiently. "How extremely foolish of her thus to expose herself in a thin light dress to the wintery air! Who is with her?"

"My nephew, I fancy," said old Blount.

"Mabel is behaving most imprudently," observed Lady Caroline, with as much austerity in her tone as she was capable of. She will have half the county talking of her presently; and there is old Lady Atherleigh at this very instant with her spectacles on, peering in their direction. My dear Mr. Younge, will you go and tell Mabel that I want to speak to her directly."

"My dear Lady Caroline," returned Denzil, "it goes to my heart to refuse you anything, even the smallest trifle, but just consider what you have asked me to do. Were I to interfere as you wish me, I should call down so many secret bad wishes and indignant looks upon my head that I have not a doubt in the world the consequences would be fatal. I should be afraid—indeed I should. One unkind glance from her majesty would unhinge me for a week. I am not strong-minded enough, neither have I sufficient pluck, to undertake such a task."

He laughed pleasantly as he spoke; but old Blount, who had been listening, did not laugh at all, keeping preternaturally grave.

"My dear madam, he said, "why interfere at all? The lad is a good lad and a handsome lad, and will come in for all I have when I am gone. Let them alone."

So Mabel and Roy were left alone to follow their own devices, and consequently enjoyed their evening to the utmost. What if all the world were against them now? In what could it affect them? Had they not wandered into their Elysium and lost themselves amongst the hidden glories of the vast palaces of Love?

* * *

Miss Sylverton, having danced seven times consecutively with Charles Trevanion, and thereby called down upon herself the wrath and condemnation of Lady Atherleigh and all such ancient scandal-loving dames, was feeling perfectly contented and at peace with herself and all the rest of the world; while Mildred, pale and beautiful, with a disturbed heart and restless mind, danced and laughed half the night with Lord Lyndon, only to return to her room, when the ball had terminated, dissatisfied, weary and unsettled.

CHAPTER XIII.

A week later and the Younges, having bidden their adieus, had gone on their way homeward to the north—all except Denzil, who had consented, at the urgent request of Charles and Eddie Trevanion, to remain four days longer, in consideration of a hunt declared to be coming off within that period at some particularly affected "meet."

It had come off, and it was now indeed Denzil's last night at King's Abbott for some time to come. He had been shooting steadily all the morning, with the vigorous intention of warding off all cares and vexations that might arise to harass and disturb his mind; but, as the night drew on, and the hour of departure approached more closely, his self-imposed sternness gave way, and he began painfully to understand how bitterly he should miss the sight of the cold exquisite face of Mildred Trevanion during the two months that must elapse before he could avail himself of the pressing invitation he had received from Sir George and Lady Caroline, to come and stay with them again as soon as ever Christmas should be over their heads.

There were a few people to dinner, the Deverills amongst others; and it was while sitting next to Jane Deverill, endeavoring to keep up a connected dialogue with her, that he bethought himself of all these dismal things.

"Then I dare say we shall meet there," Miss Deverill was saying, a sequel of some remark made about the coming London season, quite unconscious of the fact that her seemingly attentive companion was miles away from her in imagination, writhing in some tortured region of his own conjuring.

"More than probable," said Denzil. "At least you may be quite sure, Miss Deverill, it will not be my fault if we do not."

"You know the Sidcourts, of course?" went on the usual taciturn Jane, encouraged by the apparent sincerity with which his last assurance was made.

"Know the Sidcourts!" exclaimed Charles Trevanion. "Rather! You should make tender inquiries about Lady Ethel Sidcourt—that is, the name would raise a responsive echo in his heart, if he has one. I assure you, Miss Deverill, that last season it was the most painful thing in the world to witness his conduct. He could not be got out of the house—so much so, that the old lady, looking upon it as a settled affair for her daughter, encouraged him shamefully, the upshot of the whole thing being, not as his friends had every reason to expect, a marriage—but a disgraceful bolt."

"Don't believe a word he says," put in Denzil, laughing.

"Do you mean to tell us that you were not decidedly smitten with Lady Ethel last year?" demanded Charles.

"Certainly," said Denzil. "I confess to you, Miss Deverill, I was never in love but once in my life, and that was not with Lady Ethel Sidcourt."

"Well, after that you will say anything," declared Trevanion, reproachfully.

"And what became of you that once?" asked Miss Deverill, inquisitively.

"Oh, she threw me over for some luckier fellow, of course. The old story!" said Denzil, with rather a forced laugh.

Just then Mildred raised her eyes from her work, and glanced suddenly and swiftly in his direction, while for a moment her color rose vividly. Miss Sylverton, who was also dining at King Abbott's this evening, happening to look up, intercepted both glance and blush, and judged accordingly.

She waited till a minute later in the evening, and then, putting down a book of engravings with which she had been occupied, she bade Denzil, by her eyes, approach a little nearer to her. He obeyed the summons, and came over to where she was sitting close to Mildred.

"So you are really about to leave to-morrow?" she said, kindly. "I can scarcely bring myself to believe it. You have made yourself so completely one of us that I do not know how we are to get on until we see you again."

"Is that from your heart?" asked Denzil, lightly, but with an understratum of extreme earnestness. "When I am far away I shall like to believe it was." Then, changing his tone to one somewhat lower, he added: "For myself, I cannot bear to think of this time to-morrow evening; all will be so changed, so different."

"And you have actually made up your mind to go by the early train, Mr. Younge?" called out the second Miss Deverill, from an opposite sofa, where she could just catch the heads of the conversation, and nothing more. She was a talkative girl, who liked to hear her own voice dearly, and the man beside her had been having it all his own way up to this, so a little break was necessary.

"Yes," answered Denzil; "I must start early, whether I like it or not, as I have particular business to transact in London to-morrow, and have let it run to the very last day."

"Well, the best of such decisions is," went on Miss Deverill, "one gets over one's last speeches and adieus the night before, and so can commence the journey in the morning free and unfettered." After which declaration of her sentiments she sunk back into her seat with a sigh, and once more resigned herself to the horsey prosings of her friend the squire.

"I should call that the worst of it, not the best," said Miss Sylverton, softly. "I could not bear to leave a house with no one to bid me 'good-bye,' to say how much they should miss me, or to wish me a pleasant journey."

"There are two sides to every question," answered Denzil, somewhat sadly. "Taking Miss Deverill's view of the matter, you see you escape bidding final adieus, that might, perhaps, in many cases wring the heart."

"But, still, as final farewells must be said one time or the other, I think I should prefer them at the very last moment," said Frances. "Confess, now, that you would always like some one to give you your breakfast, and say a kindly word to you before starting."

"Well, yes, I confess I should like it," responded Denzil; "but, when one chances to get up at such an unconscionable hour as half-past six, one must suffer the attendant penalties."

"I will give you your breakfast to-morrow morning, Mr. Younge, if you wish it," broke in Mildred's voice, calm and sweet.

Denzil started—an expression of [illegible] over his face. He raised his eyes, and gazed steadfastly at her.

Mildred herself appeared perfectly unmoved, her features being as composed as though no such unexpected words had fallen from her lips. Her fingers steadily unpicked the stitch that had somehow gone wrong in her woolwork, and did not even tremble in the act.

Denzil tried hard to find some suitable words in which to clothe his appreciation of her unwonted graciousness, and to beg that, for his sake, she would not put herself to such an inconvenience—but in vain; his brain seemed in confusion, and he could only mutter "Thank you" in a hurried, unnatural manner, quite foreign to his usual courteous self. Soon afterward he got up and walked abruptly away.

As for Mildred, no sooner had the words crossed her lips than she disdained herself for the utterance of them, and wished them back unsaid. But it was too late then, and she had only, with unwise impulsiveness, given fresh impetus to a passion that had far better have died away through lack of nourishment.

Ever since that fatal night in the the library Denzil and she had lived seemingly unseen and unheard by each other, as distinctly remote as though spheres had separated them, instead of so many rooms or feet, as the case might be. Now she felt that, by this one rash, uncalled-for act, she had done away with all the good so many silent days had helped to accomplish, throwing Denzil and herself back to the footing on which they had parted after his foolish declaration.

Nevertheless, having once given her word, Mildred felt that she must abide by it, and appeared at the breakfast table next morning, to all outward seeming, as imperturbable as usual.

Eddie has also risen betimes to see his friend depart, and rattled on in gallant style all through the dismal meal, leaving no space for the other two to express their opinions, had they been so inclined. At length, a footman entering to announce the arrival of the dog-cart at the hall door, Eddie rose to see to Denzil's further comforts, and so left him and Miss Trevanion at last alone.

He came toward her, and, taking both her hands, held them with a clasp that amounted almost to pain.

"Think of me kindly," he said, in a low tone, full of acute meaning.

"I will," she said.

There followed a slight pause, full of vague uncertainty, and then he said in a choked voice—

"Is it quite hopeless, Mildred?"

"You will be late for your train," murmured Miss Trevanion, very gently.

Then Eddie came in, and it was all over, and the last farewells were said. The pleasant, maddening miserable visit had come to an end, and Denzil drove away through the crisp morning air, followed by a pale, sweet memory that he felt would haunt him till he died.

So it fell out that King's Abbott was once more bereft of guests; and still the Trevanions were unhappy, because the very train that carried away—snugly ensconced among its cushions—the unhappy Denzil brought to Lady Caroline a letter that filled her gentle bosom with dire alarm.

(To be continued.)

BOTH SIDES OF THE PICTURE

(Detroit Free Press)

"Be cheerful. You can always look about you and see people worse off than you are."

"That's true. And when the bill collectors come dunning me I can always tell them of a lot of people that have more money than I, but the trouble is they won't go to them."

What Makes Mirrors Reflect?

Mirrors that are made of glass have metal placed on one side of the glass. The light will pass through the glass, but will not pass through the metal backing. Light has the property of bounding from a surface that it cannot penetrate, the same as a ball would when thrown against a surface that it cannot penetrate. The light passes through the glass of the mirror, meets the metal backing and then bounds from it. This bounding of the light from the metal surface is called reflection, and mirrors are said to reflect.

CHILDHOOD AILMENTS

The ailments of childhood are many, but most of them are caused by some derangement of the stomach and bowels. Therefore to banish these troubles the stomach must be kept sweet and the bowels regular. To do this, nothing can equal Baby's Own Tablets. Thousands of mothers have proved this. Among them is Mrs. Thomas Holmes, Blissfield, N. B., who writes: "Every mother in this locality uses Baby's Own Tablets, as we all consider them the very best medicine for childhood ailments". The Tablets are sold by medicine dealers or by mail at 25 cents a box, from The Dr. Williams' Medicine Co., Brockville, Ont.

His First "Invention."

Edison's taste for inventing began when he was quite a little boy, although the first time he attempted to be original he was a failure.

One day, when he was about five years old, his parents missed him for quite a long time. After a prolonged and fruitless search all over the house his elder sister happened to go into the fowl house, where she discovered the missing boy, sitting on the floor, his clothes smothered with broken eggs.

"What on earth are you doing there, Tom?" she asked, in astonishment.

"Well," replied the youthful genius gravely, "I thought if the hens could hatch eggs by sitting on them so could I!"

Cure Borders on the Miraculous

A SAWYER TELLS OF WONDERFUL WORK OF DODD'S KIDNEY PILLS.

He and His Wife, After Years of Doctoring, Found Quick Relief and Permanent Cure in Dodd's Kidney Pills.

Caporal Junction, Ont., May 15.—(Special.)—Bordering on the miraculous is the cure of Mr. A. Sawyer, of this place. For ten years he was an invalid. Five doctors failed to help him. When he was a complete wreck and unable to walk across his room, he decided to try Dodd's Kidney Pills. Six boxes of them made him like a new man.

"Yes, I suffered for ten years," Mr. Sawyer said in speaking of his cure. "The doctors, of whom I tried five altogether, couldn't give me any permanent relief. Some said I had rheumatism, others called it lumbago, but I got steadily worse.

"I must say I was a complete wreck when I started to take Dodd's Kidney Pills. They made a new man of me.

"My wife got the same good results from them. It was after trying several doctors and a specialist from Sault Ste. Marie, who advised her to stay in bed a month, that she decided to try Dodd's Kidney Pills. She took a dozen boxes in all with splendid results. We both praise Dodd's Kidney Pills. No one can speak too highly of them."

Dodd's Kidney Pills have a record of over a quarter of a century in Canada, during which time they have earned undying praise in all parts of the Dominion. Ask your neighbors about them.

Cooking Beets.

Wash them.
Don't scrape them.
The skin must be intact.
This is an important item.
If broken, the flavor and color goes.
Boil slowly an hour, drain and rub off the skins.
They may be diced and covered with cream sauce.
They're better with the simple French dressing.
Slice them into it while they are hot and they're delicious.
You know the proportion, three or four times as much oil as vinegar and pepper and salt to taste.

THE DEVIL'S BIBLE.

The devil's Bible is in the Royal Palace library of Stockholm, Sweden. It is a huge copy of the Scriptures, written upon 300 prepared asses' skins. One tradition declares that it took 500 years, or from the eighth to the thirteenth century, to make the copy, which is so large that it has a table to itself. Another tradition affirms that the work was done in a single night by a monk with the assistance of his satanic majesty, who, when the work was completed, gave the monk a picture of himself for the frontispiece, where, amid illuminated incantations, it is still to be seen; hence the name. This marvelous manuscript was carried off by the Swedes during the thirty years' war from a convent in Prague.

Sore Corns Go!
Absolutely Painless
No cutting, no plasters or pads to press the sore spot. Putnam's Extractor makes the corn go without pain. Takes out the sting overnight. Never fails—leaves no scar. Get a 25c bottle of Putnam's Corn Extractor to-day.

Dancing Stars.

The spectroscope makes the starry heavens to the astronomer's eye appear almost as full of mazy motions as is a cloud of gnats dancing in the sunshine. Every increase in the power of the observing apparatus brings to notice new spectroscopic binaries, which are simply double stars that cannot be seen separately either because of their extreme closeness or because only one of the is a shining body. It is the erratic motions of these stars that reveal their true character. One of them discovered within recent years is Eta Orionis, which hangs just below the belt of Orion. Sometimes this star is speeding toward the earth more than forty miles a second and a few nights later is hurrying away with a similar velocity.—New York Sun.

HOW PNEUMONIA STARTS AND HOW OFTEN PREVENTED

You catch a little cold to-day, and by to-morrow it has reached the throat, next day the lungs are affected and you wish you had used "Catarrhozone," which kills colds in five minutes. In the first place, Catarrhozone soothes the irritated membranes and relieves congestion; then it cuts out the phlegm and destroys the germs. It enables the blood to retain a natural supply of oxygen, lung food and vitality. In any cough, bronchitis or catarrh, it is guaranteed to positively cure. Beware of dangerous substitutes offered under misleading names for genuine Catarrhozone, which is sold everywhere, large size, containing two months' treatment, costs $1.00; small size, 50c; trial size 25c.

ANTIQUES

There could be no more appropriate and legitimate association of industries than are to be found in the various phases of cabinet-making and pottery-making, for the very good reasons that they have the same periods of inception and have in every stage of development been regulated and advanced by the same motives of form, design and purpose, and then may truthfully be classed as sister arts, each being in a measure necessary to the other's progress. While this was easily perceivable in the products sent west from Oriental countries, prior to mid eighteenth century times, it was very apparent when, after the discovery of china clay and china stone in Cornwall by William Cookworthy, (about 1745), the manufacture of fine porcelain was established as a British industry, and Bow and Chelsea, Worcester and Derby, Plymouth and Bristol all became engaged, and operated to full capacity, in the production of the objects of art and usefulness destined to be housed, protected and preserved, in and upon the cabinets, and sideboards designed and produced for their accommodation by contemporary pioneer cabinet-making in the persons of Thomas Chippendale, Thomas Sheraton and Hepplewhite.

The kinship existing between the two industries receives confirmation when their constructive principles, purpose and features of decoration are looked into. The half-dozen porcelain establishments named, all took their earliest inspiration for decorative motifs from the then popular products of the Orient, and one has only to look at the examples of their master craftsmen to recognize in them the characteristics of ornamentation employed in the sister art of wood-carving at the same period.

The same similarity in conception and treatment is apparent in the French products, of the same period. In these industries; also in the classical models and embellishments of the cabinets designed by the brothers Adam and the Jasper and Basalt wares of Josiah Wedgwood.

Minard's Liniment, Lumberman's Friend.

Bees and Ants.

Bees will place their honeycombs in any place regularly or irregularly shaped, and when they come to corners and angles they seem to stop and consider. They will vary the shape of the cell, so that the space is exactly filled. It could not be done more satisfactorily if the whole thing had been worked out on paper beforehand. Ants make hard and smooth roads and drive tunnels, compared to which man's efforts in making such things are insignificant.

Keep Minard's Liniment in the house.

Teeth On Their Tongues.

The biggest of fresh water fishes, the "arapaima" of the Amazon, in South America, which grows to six feet in length, has teeth on its tongue, so that the latter resembles the file, and is used as such. Some kinds of trout also have the same peculiarity. Fishes that swallow their prey entire have their teeth so supported on flexible bases as to bend backward, but not forward, in order that their victims shall not escape after they have been once seized.

If All Played Out, Try This Prescription

When that overpowering weariness and a never-rested feeling comes over you, it shows some serious disorder is undermining your health. The cure is simple. Build up the system and nourish the body back to health by pure wholesome blood.

The one sure means of doing this is with Dr. Hamilton's Pills. They are a marvellous aid to appetite,—convert all you eat into nutriment and tissue-building material. Thus a weak body is supplied with new nerve fibre, hardy muscle and firm flesh. Lasting good health is sure to follow. If you really want to get well and stay well, use Dr. Hamilton's Pills, 25c per box at all dealers.

Weather Effects.

The weather affects man in more ways, it appears, than many suspect. For example, it is believed that pressure variation due to fluctuating winds have peculiar pathological effects, that certain electrical conditions of the air induced by low atmospheric pressure have a pathological effect on nervous subjects and that solar radiation has peculiar effects which vary according to the season.

Ask for Minard's and take no other.

The Idealistic.

Never believe that young life is going to be better and stronger if you cut out all the dreams and aspirations. The people who never get beyond their immediate vocations do not do the best work in life. There are two paths in life, the materialistic and the idealistic, and it is for us to choose which we will walk in. A strong life, a true life, a noble life, can never be lived by any man or woman without the presence of what fools have always called and always will call the unreal.—Henry van Dyke.

Best Liniment of All Destroys Every Pain But Never Burns

"How thankful we are to get hold of such a wonderful household remedy as Nerviline," writes Mrs. E. P. Lamontagne from her home near Wetaskawin, Alberta. "In this faraway section, far away from a doctor or druggist, every family needs a good supply of liniment. Nerviline is the best of all. It destroys every pain, but never burns. We use Nerviline in a score of ways. If it's rheumatism, aching back, pain in the side, sciatica or stiff neck,—you can laugh at them if you have lots of Nerviline handy. For earache, toothache or cramps I don't think anything could act more quickly. For a general all-round pain remedy I can think of nothing more valuable and speedy to cure than Nerviline."

The above letter is convincing—it tells how reliable and trusty this old-time remedy is. Nerviline for forty years has been a household word in Canada. Scarcely a home in Canada you can find without Nerviline. Every community has its living examples of the wonderful curative properties of Nerviline, which will cure pains and aches anywhere in the joints or muscles. It's penetrating, soothing, warming and safe for young and old to use. Get the large 50c family size bottle; it's the most economical. Small trial size 25c at any dealer's, anywhere.

Ancients and the Aurora Borealis.

Many people believe that the aurora borealis is a phenomenon peculiar to modern times. But this is not true. The ancients used to call it chasmata, bolides and trabes, names which expressed the different colors of the lights. The scarlet aurora was looked on by the superstitious barbarians as an omen of direful slaughter, so it is not unusual for descriptions of bloody battles to contain allusions to northern lights. In the annals of Cloon-macnoise it is recorded that in 688 A. D., accompanying a terrible battle between Leinster and Munster, Ireland, a purple aurora lit the northern skies, foretelling the slaughter.

Three True Steels.

Iron and carbon steel, vanadium steel and tungsten steel are pointed out by Professor J. O. Arnold, British metallurgist, as the three true steels. The second kind is iron and carbon steel with 5 per cent. of vanadium, the iron carbide having ceased to exist, and the third kind is iron and carbon steel having 11.5 per cent. of tungsten, the iron carbide having been expelled by the tungsten. Iron and carbon steel hardens at 730 degrees C., vanadium steel just below 1,450 degrees, its melting point, and tungsten steel at 850 degrees to 1,200 degrees.—San Francisco Chronicle.

Squaring the Circle.

The origin of the problem of squaring the circle is almost lost in the mists of antiquity, but there is a record of an attempted quadrature in Egypt 500 years before the exodus of the Jews. There is also a claim, according to Hone, that the problem was solved by a discovery of Hippocrates, the geometrician of Chios—not the physician—500 B. C. Now, the efforts of Hippocrates were devoted toward converting a circle into a crescent, because he had found that the area of a figure produced by drawing two perpendicular radiuses in a circle is exactly equal to the triangle formed by the line of junction. This is the famous theorem of the "lunes of Hippocrates" and is, like glauber salt out of the philosopher's stone, an example of the useful results which sometimes follow a search for the unattainable.

Minard's Liniment used by Physicians

A FABLE.

A woman once came to the cave of a sage who was renowned for his profound analysis of her sex.

"Master," said she, "let me sit at your feet awhile. I am but a woman—faulty and foolish and weak—but I would fain be the pupil of your learning and the disciple of your virtues."

And the sage, secure in his wisdom consented.

Then he laid himself down to sleep in the shade of a rock, out of the glare of the sun. When he wakened he was blindfolded and bound hand and foot a prisoner to love.

He had protected himself against every feminine weapon except the most dangerous one—humility.

Minard's Liniment Co., Ltd.:

Gents,—I have used your Minard's Liniment in my family and also in my stables for years, and consider it the best medicine obtainable.

Yours truly,
ALFRED ROCHAV,
Proprietor Roxton Pond Hotel and Livery Stables.

PROVED ITS WORTH.

Dramatic Test That Was Made With a Bullet Proof Shirt.

"A well known war co spondent who is a personal frie of mi writes a correspondent of the chester Guardian, "tells an amus story. While in Paris at the be ning of the war in 1914 a Frenc ventor persuaded him to obtai opportunity for demonstrating usefulness of a chain armor which he claimed would resist bullet or bayonet.

"A sample shirt had been hun and fired at with satisfactory re but it was with a certain journa skepticism that my friend atte the official demonstration at He later. Anyway, to oblige the in tor he put on one of the shirt show its comfort and flexibility. was then that the French inve achieved a dramatic effect, for whipped out a Webley automatic blazed away straight at my fr chest.

"He is still alive to tell the adds the correspondent. "Befor had recovered breath a war offic ficial grasped him warmly by hand.

"Sir," he said, "you are a b man."

"My friend disappeared with be ing modesty. He had gone where could get a stiff brandy and soda.

PROMISING.

(London Opinion)

"Every time the baby looks into face he smiles," said Mr. Meekins.

"Well," answered his wife, "it may be exactly polite, but it shows he has sense of humor."

IN THE FARMER'S HOME VEGETABLE GARDEN

How to Transplant Vegetables from the Hot Bed and When---The Treatment That Gives Best Results With Different Plants.

(By L. M. McBrien in the Canadian Countryman).

When plants are taken from the hot bed or cold frame, where they have been protected from the cool air night, they will be greatly checked their growth if set out directly in open ground. But if they are gradually accustomed to the change they will not suffer any perceptible harm. days or so before planting in the ground a start should be made to gradually harden the plants by a gradual lessening of the protection they have been receiving, until, finally, protection is withdrawn during night and day. If there is danger frost, however, protection should given in any case.

"WHEN" IS IMPORTANT IN PLANTING.

There are two groups, known as ool-season and warm-season vegetables. The cool season vegetables are as, carrots, beets, parsnips, radish, lettuce, parsley, onions, cabbage, celery, spinach and cauliflower. These may be planted in the open early in May, or as soon as the ground is in condition to work up properly. Plants for transplanting should be started at

Double Wheel Hoe is a useful tool in the Farmer's Garden where horse machinery isn't used.

temperature of 50 to 55 degrees; grown in an atmosphere above this temperature they are apt to be weak and unthrifty.

The warm-season vegetables comprise tomatoes, melons, corn, beans, cucumbers, peppers and egg plant. These require a temperature not less than 60 degrees to develop properly.

In order to have a continual supply of certain vegetables, successional sowing of the seed should be made every ten days until the middle of July. In this way a supply, usually confined to a week or ten days, may be spread over several weeks.

A double wheel hoe is a useful tool where horse machinery isn't used. The surface soil may be worked up close to the plants, and left in a fine condition. It is indispensable in onion growing.

TOMATOES—STANDING UP

Tomatoes require a high temperature for best development, and do well in a warm, sunny situation. A well drained sandy loam is best. Well rotted manure at the rate of 10 to 15 tons per acre is advised. Commercial fertilizers at the rate of 500 pounds per acre may be substituted for the manure. The only time growth may be safely forced is during the first month or six weeks after transplanting; after that the vegetative growth may be made at the expense of fruit production. Plants may be placed in the open ground about the 20th of May in well cultivated soil.

Space them about 4 feet by 4 feet apart. If they are to be staked and trained to a single stem they may be set 3 feet by 1 1-2 feet apart. The stakes used are usually about 1 1-2 inches square, or small round saplings. They should be 5 1-2 feet long.

The onion bed cannot be made too rich. Well rotted manure applied in the fall and plowed about 4 inches deep, is the best fertilizer. Fifteen tons per acre is a good application. If the soil is well supplied with vegetable matter, successful fertilizers applied at the rate of 500 to 1,000 pounds per acre. The land may be used for onions year after year and there is no danger of its becoming too rich. Tillage is usually given with a wheel hoe.

RICH SOIL FOR LARGE TOPS.

Any good garden soil will grow cabbage. A northern exposure is best for the late varieties. As in the case of the onions, there is no danger of having the land over-rich, twenty tons or more of farm-yard manure may be applied per acre. Set the late cabbage in the open field not earlier than June the 15th.

Cauliflower requires a cool rich soil, much the same as for late cabbage. A northern exposure is best. Do not check the growth. Dry weather often causes failure. Water abundantly and only in the cool of the evening. When the head is three to four inches in diameter, the leaves should be tied together over it in order to develop a hard white flower.

CELERY ON MUCK LAND.

Celery is best grown in muck or peaty soil. It should be well fertilized or a pithy celery is obtained. The ground cannot be made too rich and farm yard manure, twenty to thirty tons per acre, may be safely used. All the cultivation required is to keep down the weeds and to form a fine earth mulch on the surface. Early celery may be blanched by standing board 10 to 12 inches wide on edge at each side of the row close up to the plant. Late celery is usually blanched by banking with earth.

Why France Held Verdun

When the German attack before Verdun developed to its true proportions, General Joffre and the French high command practically as a unit advocated the abandoning of Verdun. Not only did they advocate this, but precisely as Field-Marshal French issued the orders for the withdrawal from Ypres in the first battle of Flanders, Joffre is believed to have ordered the retreat from Verdun, and to his orders is attributed the loss of Douaumont, which naturally but as it turned out, erroneously—convinced the Germans that Verdun was about to fall into their hands.

Joffre's reasons were perfectly plain. To retreat for a few miles, to straighten the line and abolish the salient, was to surrender a city that had no present military value, to give over a point which was difficult to hold—which was, in fact, an invitation to attack and to attack under the most favorable circumstances for the assailant. To give up Verdun, now under the terrific fire of the most extensive artillery concentration the world ever had seen, was to give over a few miles of French territory that and nothing more. In the present trench war it is only the piercing of the line that counts. In September the French had made an advance of two or three miles in Champagne. In May and June they had scored similarly in Artois. In April of 1915 the Germans had done the same thing about Ypres; but these successes had been without morrow, because the lines behind had held.

To keep Verdun meant to spend many thousand lives, to lose it meant, from the military standpoint, just nothing, since the hills south of Verdun were quite as suitable for defensive operations. They were beyond reach of the German heavy artillery, as it was then in position, and behind these hills the French could concentrate artillery and men in sufficient quantity to meet the German concentration, which would have to be moved forward over several miles to reach the new front. Thus for many days Paris and London believed that Verdun would be evacuated, and Berlin, doubtless knowing the French point of view, steadily insisted upon the approaching fall of the town. He read the German statements and official communiques and you will find a confidence which is patently not mere manufactured confidence; the Germans believed that they were about to take Verdun because they knew that the French high command did not mean to defend it to the last ditch.

But the French high command did not have its way. One hears much in history of the evil consequences of the interference with the soldier for which the politician is responsible. Conceivably, the case of Verdun may prove one example of the wisdom of the politician and the inferior judgment of the soldier. At all events, the French statesmen, the Prime Minister, members of the Cabinet, members of the two branches of the Legislature promptly appreciated the political as contrasted with the military aspects of Verdun. They recognized what the effect upon the world would be of a shining German success, of a success that would shine because, whatever the military fact, the civil legend concerning Verdun made of it a Gibraltar.

There was then a sudden crisis, a real crisis in the political life of the Republic. The civilian government said to the military, "Verdun must be defended; it must be defended because its value, its moral value, is incalculable." To this opinion the military mind yielded, mainly, it is said, because General de Castelnau, the second in command, finally came to see the situation as the politicians saw it. As a result, de Castelnau went to Verdun. The man who had saved Nancy undertook at the eleventh hour to save Verdun, and he succeeded. With him he took Petain, who will always be remembered in French history as the actual defender of Verdun.

At Verdun, soldiers and ambulance drivers alike told me of the electrical effect of the coming of these two men. For several days the crowds of inhabitants of the villages hastily evacuated as the German advance was pushed and clogged the roads. Men said to one another, "C'est la retraite" —"This means retreat." But suddenly there was an end of retreat; the lines held. The famous Twentieth Corps, the Iron Corps of so many great achievements, arrived. Men, munitions, guns and still more guns, arrived. At the end of ten days the immediate peril was over, the first furious drive had failed before Verdun, as the French attacks had failed in Artois and Champagne a year before. Prisoners, positions, guns the Germans had captured. Their local triumph was quite as great as that of the French in the preceding September, but the French had only been compelled to shorten their lines, as the British had been forced to shorten their lines about Ypres after the gas attack in the previous spring.—From "The Battle for Verdun as France Saw It," by Frank H. Simonds, in the American Review of Reviews for May, 1916.

ODD MEMORY TEST.

A Bit of Nonsense Literature Whose Author is Unknown.

There is an odd bit of composition that has figured in nonsense literature as follows:

"So she went into a garden to pick a cabbage leaf to make an apple pie of, and a she bear, coming up the street, put her head into the shop and said, 'Do you sell any soap?' So she died, and he very imprudently married the barber, and the powder fell out of the cymbeline's wig, and poor Mrs. Mackay's puddings were quite entirely spoilt, and there were present the Garulilies and the Goblilies and the Pickaninnies and the great Panjandrum himself, with the little round button at top, and they played at the ancient game of 'catch who catch can till the gunpowder ran out of the heels of their boots.'"

The origin of the passage is obscure. Maria Edgeworth (1767-1849), quotes it in one of her stories, attributed it to Samuel Foote (1720-77). The British Quarterly Review said that Foote wrote it in order to test a certain lecturer who claimed that he could learn anything by rote on once hearing it.

Another account says that it was written by an actor named James Quinn (1693-1766) to puzzle Foote, with whom he had a wager that Foote could not memorize something that Quinn would write. Foote and Quinn both were noted actors in their day and the nonsensical passage probably was the outgrowth of some convivial contest of wits between them.

It used to figure in school rhetorics to illustrate the difficulty of memorizing something that had no sense to it.

He—Are you fond of sports, Miss Greene? She—Oh, Mr. Toughly, this is so sudden!—Life.

BRITISH HERO A GERMAN.

Wife Learns After His Death in Battle That He Was an Alien.

A remarkable story of how a German named Leibold enlisted under the name of Baker, served for nineteen years in the British army, rose to the rank of squadron sergeant-maj. or in the Seventh Hussars, and died the death of a hero in France while fighting against the country of his birth is hidden behind the granting of a certificate of naturalization to his widow, Mrs. John Mowat Breadalbane Baker, of Godalming, Surrey.

But is more remarkable is that the disclosure of Baker's German nationality surprised no one more than it did his wife.

It was not until eight months after his death that Mrs. Baker, who had been married to him since 1908, learned for the first time that her husband was a German, and that she, because of her marriage, was also a German and an "alien enemy" of England.

This discovery caused the registration of Mrs. Baker under the alien restriction order, and for a time she lost her pension. Her nationality and pension, with the arrears, have been restored to her.

Last month Mrs. Baker read in a paper that a Mrs. Leibold, a German, had been prosecuted for failing to register. In the report of the case it was stated that Mrs. Leibold had come to England from Germany after her husband's death and that she had a son, a squadron sergeant-major, who served in the Eleventh Hussars and had been killed in action.

Munchausen.

Perhaps the most voluble liar that ever lived was the Baron Munchausen—that is, the fictionized baron. The real baron was a kindly soul who lived in Germany and who in nowise deserved the evil reputation that attached to him through the use of his name in a series of highly colored adventures that appeared in print in London in 1785.

The authorship of the absurd tales is a mystery. It is generally believed that Rudolph Erich Raspe, a questionable character, wrote the stories first, but there is no absolute confirmation. Following the original series a number of additional adventures were written by less skilled pens.

The real baron found little in life to enjoy after the stories became generally circulated. Curious tourists haunted his estates and tried to trap him into relating some wild story. At first he resented their attention in a vigorous fashion, but in his declining years he grew sour and morose and finally died, a most unhappy person, in 1797.

Sinn Fein

In the light of the doings in Dublin, the following correspondence, sent, of course, before the rising, is particularly timely, as showing some of the conditions the Asquith Government has had to contend with in Ireland, and its lenience toward the few malcontents:

Dublin, Ireland, April 14.—(Correspondence of the Associated Press.)—Two organizers of the Sinn Fein Volunteers in Dublin and two others in Galway have been arrested and ordered to leave Ireland within six days. These men have been given the choice between going to some foreign country or to certain specified places in England, where they can be kept under observation. The Sinn Fein, or Irish Volunteers, practically constitute the anti-war party in Ireland. They have held frequent parades with arms, and some Conservative members of Parliament have criticised the Government for not taking strong measures to suppress the activities of this organization.

The proceedings of the Government against the "volunteers" have been very sporadic. Their little papers, following on protests in the English press, have been seized from time to time, but reappear under different names. There are more of them in existence now than before the war. The searches for arms have been isolated and unimportant. A considerable number of muskets and a dozen revolvers represent the Government's bag from all Ireland.

From time to time an organizer is arrested and sent to jail, but more are acquitted. The council have officers in Dublin, which are known to the authorities and to the public. The council has issued an official statement, which, in part, follows:

"The council of the Irish volunteers, which met on the 26th inst. (March), wish to warn the public that the general tendency of the Government's action is to force a highly dangerous situation. The Government is well aware that the possession of arms is essential to the volunteer organizations, and that volunteers cannot submit to being disarmed without surrendering and abandoning the position they have held at all times since their first formation. The volunteer organization also cannot maintain its efficiency without organizers. The raiding for arms and attempted disarming of men, therefore, can in the natural course of things only be met by resistance and bloodshed. None of the Irish volunteers recognize or will ever recognize the right of the Government to disarm them or to imprison their officers and men in any fashion.

"The council also draws attention to the repeated instances in which the Government's action has been associated with the movements of hostile crowds which are led to believe that they act under Government approval. In the council's belief this feature of the case is based on a deliberate policy of creating factious hostility between sections of the Irish people. Nothing need be hoped from remonstrance with the Government, but we appeal to the Irish people to look clearly into the facts in every instance, and keep a watch on the conduct and policy of the authorities, and to fix the responsibility for any grave consequences that may arise."

Most people in Ireland have relatives or friends in the British army, and consequently the appearance of the volunteers on parade frequently leads to trouble. In Tullamore the crowd wrecked the Sinn Fein premises, and the complaint of the Sinn Feiners was that the police did not protect them. Police protection for the anti-war party strikes most of the people, who are for the war, as a humorous demand.

THE POULTRY WORLD

POULTRY-HOUSE WHITEWASH.

All poultry buildings should be white washed once in or twice a year, and sprayed monthly with a disinfectant.

In the minds of many "whitewashing" means slaking some lime in water and splashing this solution rather carelessly over a prescribed surface. The result is all too familiar—whitewash so badly streaked as to be the most unsightly, and at the slightest touch brushing off the woodwork; in fact, remaining on scarcely long enough to be of any real value.

To execute a good permanent job—a job that will not only clean and disinfect the building, but will improve its appearance as well—one must regard the task much the same as painting. First, the walls, sides and all projections that have accumulated large quantities of dust should be carefully brushed clean with a stiff broom; otherwise the whitewash will simply form a coating or deposit over the dust and will subsequently curl up and fall off exposing the original dirt. This dust is frequently the refuge and abiding place for disease germs and vermin and should be removed, not merely put out of sight temporarily.

Whitewash is a good exterminator if allowed to come in contact with vermin, and will penetrate cracks and crevices that are in a horizontal position, such as those on dropping boards, in a thorough manner. But if it is sprayed on the dusty sides of a building it is very likely to run off the dust like water from an oiled surface.

Spraying is much easier and quicker than applying the whitewash with a brush, and if proper cleaning precautions are taken it is equally as effectual; but if one insists on following the careless method by all means use a brush, and put some carbolic acid into the wash, for in so doing the woodwork is at least partially scrubbed with the solution when it is put on.

Following is a formula for whitewash that will not rub off.

Slake half a bushel of good double-strength lime in boiling water, using just enough water to cover the lime and to keep it from burning. When the slaking process is completed add a little more water, then strain the solution to remove any sediment of sand or foreign substance. Dissolve a peck of salt in warm water and add this to the lime solution; mix thoroughly and allow it to stand for a couple of days. When ready for use thin to the proper consistency and apply to walls while hot.—Prairie Farm and Home.

FEEDING CHICKENS OF ALL AGES.

Many methods of feeding are successful. The following rations have given good results:

First Day—Yolk in body supplies food. Do not feed.

First Week—Boiled egg cut fine, bread crumbs and oatmeal, equal parts. Feed in form of mash on clean board all they will eat in twenty minutes, five times per day.

Give sour milk each forenoon and water in the afternoon.

Keep fine grit or sand before them.

One to Five Weeks—Equal parts wheat bran, shorts, oatmeal and cornmeal.

Use a mash in hopper and give good grade of commercial chick feed in litter.

Two pounds fine charcoal and one half-pound fine salt should be added to each hundred pounds mash.

Sour milk or water should be before birds at all times.

Five Weeks to Maturity—One part ground oats, one part shorts, one part wheat bran, one part cornmeal, half part beef scraps, quarter part bonemeal.

Use this as mash in hopper and give good grade of feed in litter, all they will clean up in thirty minutes, twice each day. Fresh water and grit should be before them all the time. Free range should be provided.

Fattening Ration—Two parts cornmeal, one part shorts, one part wheat bran.

Moisten with sour milk. Give cracked corn as grain, all they will eat. Clear water and grit should be provided at all times.

Balanced Egg Ration—140 lbs. corn, 255 yolks, 124 whites; 100 lbs. wheat, 115 yolks, 31 whites; 20 lbs. oats, 30 yolks, 31 whites; 20 lbs. bran, 31 yolks, 41 whites; 20 lbs. shorts, 41 yolks, 44 whites; 20 lbs. cornmeal, 50 yolks, 27 whites; 30 lbs. beef scraps, 31 yolks, 221 whites; total, 680 lbs. yolks, 630 whites.

Two lbs. charcoal and a half to one lb. salt should be added to each 100 lbs. of mash. Fresh water, grit and oyster shell should be provided at all times.

Moulding Ration—Give half ration for two weeks or till birds are poor, then build them up rapidly. Balanced egg ration good.

Technical Matters.

Seeds germinate rapidly under the influence of violet and blue rays, but, on the other hand, flies and other insects do not like these colors.

There are 56,000 seeds in a bushel of wheat.

In India the presence of peacocks denotes that there are tigers in the vicinity.

There are about 100 kinds of mosquito.

Taking the year as a whole, the tables show that there are two regions of maximum thunder storm frequency, one over Florida and the other over Mexico.

The death rate from tuberculosis, that finest and grimmest social register of general health conditions, has come down nearly 50 cent., and the average wealth of the community per capita has increased from less than $500 up to $1,500 in the United States.

While the legal talent is struggling over the definition of a cabaret entertainment, we diffidently suggest that it is a Greek dance given by an English lady of quality born in the United States. Washington Post

INDUSTRIES BOOMING.

War Renews Old Activities in English Villages.

One curious result of the war has been to revive some of the ancient half-forgotten English village industries.

Flint knapping, for instance, which has been carried on at Brandon, in Suffolk, for many generations, and which almost received its death blow—but not quite—when the old flintlock musket was superseded by the percussion-cap rifle, has recently been given a tremendous fillip owing to the demand for flints for tinder boxes by the men at the front.

Charcoal-burning, again, which was a flourishing industry in Sussex would hundreds of years ago before coal was thought of, may now be seen in full swing there once again, the war office having recently ordered large supplies for use in the trenches. Charcoal makes an ideal fuel for this purpose, being smokeless and giving out an intense heat.

The charcoal-burner pursues his calling in the open air and he works on an accepted formula handed down from earliest times through many generations. Green oak logs only must be used, and these are all cut to the same size and stacked together in such a way as to form a low, conically shaped heap.

This is then covered with freshly-cut turf, and set fire to; but it needs constant watching and attention, for if combustion proceeds too quickly the smoldering pile may burst into flame, when the resultant product will be, of course, not charcoal, but ashes. Ordinarily, if proper care be exercised, the calcining process is complete in about twelve hours; after which the stack is left to cool for a few days before being opened.

The breeding of ferrets has been a village industry in this country almost from time immemorial, but the demand for the little creatures had greatly fallen off during recent years. Now, however, owing to the insistent call for ferrets to kill the rats which swarm in the trenches in France and Flanders, the demand has jumped suddenly to far in excess of the supply, and prices have soared accordingly.

For a sadly sufficient reason, and one that will be at once apparent to everybody, the fashion for jet ornaments has been recently revived, more especially in the English border counties, with the result that a onetime flourishing Yorkshire village industry has been given a new lease of life. Among the Irish peasantry similar "mourning jewelry" is made from bog bark, the best varieties of which are nearly as black and lustrous, and equally as hard, as the best Whitby jet. This, too, is now being turned out in increasing quantities in hundreds of lonely cabins in those districts of Ireland where the raw material is found.—Pearson's Weekly.

A Bit of Praising.

You like a bit of praising when you've
mastered something well,
You like the fragrant roses and the lime-
light's gleaming spell,
And so does she; she hungers
For a bit of praising too,
In her quiet work-a-day world,
Just the same, perhaps, as you.

You like to feel you've finished what
you've started on with skill,
And you like to hear your fellows say
you haven't done so ill.
And so does he; from your lips
she would love to hear the thing
That would set her bright eyes beaming,
That would make her spirit sing.

It seems to keep you jogging and to fill
you with the dream
That makes the daily effort like a mile-
stone in the dream.
And just as you have hungered
For the praise that men may give
She hungers for your praising
That [illegible] live.
—The Hometown Bard in Baltimore Sun.

It is well to moor your bark with two anchors.—Publius Syrus.

The Weather Man's Work

A reader of The Citizen has written to call attention to inaccuracies in the official weather forecasts published by the newspapers. Citing a particular case, he says the "probs" in the morning read "generally fair," but we had a miniature blizzard.

As a matter of general information it may be explained that the weather forecasts are officially sent out twice daily to the newspapers, about 10 a. m. and 10 p. m., from the central station of the Meteorological Service of Canada, at Toronto, where all observations taken at points throughout Canada are compiled. It should be understood, however, that meteorologists are not infallible, nor do they claim infallibility. The successful solution of the problems offered by atmospheric phenomena is a goal not yet completely attained. Our most abused fellow citizen is the weather man. If his forecast be accurate we just accept it as a matter of course, but let him fail to hit it off right!

Weather forecasts are based on the readings of barometric pressure, wind direction and velocity, precipitation, temperature, etc., prevailing at certain points throughout the continent from coast to coast, where observations are taken at 8 a. m. and 8 p. m., Ottawa time. These observations are reported to headquarters by wire and at once plotted out on a special weather map. This shows at a glance the prevailing conditions and movements of all atmospheric disturbances in the preceding 12 hours.

Without going too deeply into scientific data, it may be said that low barometric pressure indicates stormy conditions and strong winds and high pressure fine weather. By watching the charts from day to day the weather experts are enabled to follow the course of the areas of low or high pressure as they move across country. For instance, if an area of low pressure is centered on the upper lakes, moving eastward, it indicates a disturbance over the Ottawa valley—if the low area continues to move this way. It may increase and bring much more disagreeable conditions than forecasted, or it may disperse altogether and leave a chap uptown with an umbrella or raincoat under a cloudless sky, though the "probs" read "rain." Of course, it may also work the other way and give us rain when fine weather was foretold.

Another serious difficulty for the weather man is that north of Ottawa there are practically no observation stations. Now some of our most serious atmospheric disturbances come from the polar regions, but there is no forewarning of their approach. We may be led to think we are in for a spell of fine weather here, when along comes a vagrant "low" the observers knew nothing about—and then there is gnashing of teeth from the chaps who left home without their raincoats. Indeed, being on the northern fringe of observation stations makes the Ottawa Valley one of the most uncertain regions on the continent for weather forecasting.

Then again, the "probs" are compiled for areas. The forecast for this region reads "Ottawa Valley and Upper St. Lawrence," which is a pretty extensive territory. In general the prediction may be a good one, but a little local disturbance may occur here and there as an exception to the general rule. Hence we have such terms as "mostly fair and warm; showers in some localities."

Moral—Don't cuss the Weather Man. Ten to one it isn't his fault.—Ottawa Citizen.

Graceful afternoon gown, made of rose taffeta and Georgette crepe, a gown that is very popular this spring.

PALPITATION OF THE HEART.

Sudden fright or emotion may cause a momentary arrest of the heart's action, or some excitement or apprehension may set up a rapid action of the heart thereby causing palpitation.

Palpitation, again, is often the result of digestive disorders arising from the stomach, or may be the result of over indulgence of tobacco or alcoholic drinks.

The only way to regulate this serious heart trouble is to use Milburn's Heart and Nerve Pills.

Mrs. I. S. Nicholls, Listowel, Ont., writes: "I was weak and run down, my heart would palpitate and I would take weak and dizzy spells. A friend advised me to try Milburn's Heart and Nerve Pills, so I started at once to use them, and found that I felt much stronger. I cannot praise your medicine too highly, for it has done me a world of good."

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25; at all dealers, or mailed direct by The T. Milburn Co., Limited, Toronto, Ont.

WOMEN AND CRIME.

Some Curious Anomalies of the Law.

To what extent can a married woman be punished for a crime committed by her under the compulsion of her husband. In obedience to his orders, or when it is committed without his knowledge or consent? The point is a particularly interesting one in these days of women's rights — and wrongs.

The law says that if a wife commits an indictable crime, i. e., one tried by jury (other than that of treason, murder, manslaughter or the keeping of a brothel or gaming house), in the presence of her husband, she is presuming to have acted under her husband's compulsion, unless the contrary is proved, and she cannot be convicted.

Thus, as Mr. W. Blake Odgers, Recorder of Bristol, points out in one of his lectures on "The Law Relating to Married Women." If a man making counterfeit coins or notes sent his wife out to change some of them and went with her, waiting in the street while she passed the bad money, she would be acting under the coercion of her husband, and it would be left for the jury to decide whether she submitted the crime under the control and subjection of her husband.

On the other hand, if it is proved in cases of robbery, pocket-picking, shoplifting, etc., that she acted freely, although her husband was present when the crime was committed, she is liable and can be convicted. To give an instance: Some time ago a certain robbery was carried out in a particularly daring and ingenious manner. A husband and wife took a house in a fashionable neighborhood, lived there for some time, and presumably, were of good standing and position.

One day they went to a jeweler's and asked to see some good jewelry, as they wanted to make a present to their sister-in-law. They were shown several articles, but wished to see some better ones, and after deciding on the style of article they asked if some could be sent to their home. The jeweler asked for their address, and upon hearing the fashionable locality had no hesitation in sending them.

The man arrived with the jewelry, was shown into a room, and at a favorable opportunity was chloroformed by the woman, while his back was turned towards her. The husband helped to tie the man up, and then departed with his wife with the jewelry. The servant, who had been sent out on some pretext, returned, and as she could get no answer and heard groans, she called the police, who broke into the house and were able to release the man. In this case the woman to all appearances did most of the crime, but even then it would be for the jury to decide whether she was acting under the coercion of her husband or under his control.

There is another interesting point which might be mentioned. That is, that the wife whose husband has to her knowledge committed a serious crime of the class known as felonies cannot be punished for sheltering him and helping him to escape punishment.

A Paradoxical River.

On the African shore, near the gulf of Aden and connecting the lake of Assal with the main ocean, may be found one of the wonderful rivers in the world. This curiosity does not flow to but from the ocean toward inland. The surface of Lake Assal itself is nearly 700 feet below the mean tide, and it is fed by this paradoxical river, which is about twenty-two miles in length. It is highly probable that the whole basin which the lagoon partly fills was once an arm of the sea, which became separated therefrom the duning of loose sand. The inflowing river has a limited volume, being fullest, of course, at high tide, and has filled the basin to such an extent that evaporation and supply exactly balance each other.

When the Back Becomes Lame

IT IS A SIGN OF KIDNEY TROUBLE

Doan's Kidney Pills cure the aching back by curing the aching kidneys beneath—for it is really the kidneys aching and not the back.

Doan's Kidney Pills are a special kidney and bladder medicine for the cure of all kidney troubles.

Mrs. Louisa Gonshaw, 683 Manning Ave., Toronto, Ont., writes: "I take great pleasure in writing you, stating the benefit I have received by using Doan's Kidney Pills. About three years ago I was terribly afflicted with lame back, and was so bad I could not even sweep the floor. I was advised to try your pills, and before I had used one box there was a great improvement, and my back was much better. However, I kept on taking them until my back was completely cured. I highly recommend 'Doan's' for lame back."

Doan's Kidney Pills are the original pill for the kidneys. See that our trade mark the "Maple Leaf" appears on the wrapper.

Doan's Kidney Pills are 50c per box, 3 boxes for $1.25; at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

LINOLEUMS

Floor Rugs, Curtains

LINES for which there is an unusual demand and which will show marked price advances in the near future.

MAPLE HILL

Mr. Thos. Little sold his horse to Mr. Fred Hanock and filled his place with a superior animal which he purchased from Mr. John Hiltens of Pentinck.

Mr. John D. Little, one of our leading stock feeders delivered 17 choice export cattle to R. Trout at Hanover on Saturday morning. This is an object lesson on production.

A LITTLE POEM

Now is the ground bury onion seeds,
Plant corn and beets and lettuce;
Chuck in some peas and lima beans;
That's if the earth don't seem too
wettish.

—"J. D."

SOLWAY

The Union Sunday School at S. S. No. 5 has opened again for the summer months.

Mrs. David Thompson is on the sick list. Miss Pauline Thompson, nurse, of Toronto is home.

Miss A. Smith of Hepworth who has been the guest of Mrs. Hutton returned to her home last week.

Miss E. McGarrity of near Durham spent over Sunday at her home here.

Mr. and Mrs. J. Strader attended the funeral of Mr. Strader's cousin of Mildmay on Monday.

GLAMIS

Mr. D. M. Finlayson of Port Elgin spent the week-end at his home here.

Miss Sarah Beere of Hamilton is visiting at Mr. Jos. Cunningham's.

Messrs Jos. Wrightson, and Clyde McKeeman took the following delegates to the Presbytery, and Woman's Auxiliary Convention in Port Elgin on Thursday:—Rev. and Mrs. Reith, Mr. and Mrs. W. J. McKeeman, Mrs. McDermid, Misses D. Gilchrist M. McKay and L. Campbell.

Mrs. Woodstock has returned to her home in the village after spending several months with friends on 5th. con. Kincardine.

Pte. Edward Chapman, of Walkerton, Sundayed with friends on the Boundary.

Miss Lila Stanley of Kinlone is visiting her cousin Mrs. Latchford, Teacher.

Rev. Mr. Nellson of Paisley will preach in the Baptist Church on Sunday morning and evening. The ordinance of Baptism will be administered at close of the morning service.

Nurse McCreath, is in attendance with Mr. Nell C. McFarlane. We regret to report he is in a critical condition.

Master Bill Martin of Southampton is spending some time with his cousin Mr. Dan A. McLean.

Misses Mary A. McKinnon, Annie McDonald, and Mr. Will Robinson spent Saturday and Sunday in Kincardine.

Mr. Angus Campbell has had a Bell telephone installed in his home.

Miss Jennie McDonald returns to her home at Shoal Lake, Man. after spending several months with relatives on 10th. con. Kincardine.

Mrs. D. M. Finlayson spent the first of the week in Port Elgin.

Private Clyde McKeeman had the misfortune to break a bone in his wrist while cranking their car in Port Elgin on Thursday evening.

Messrs Coulter, Ross McLean, and Fullerton, cattle buyers took in the largest number of cattle here on Wednesday as has been delivered here in one day for years.

Private John Kitchen spent over Sunday at his home here. We are pleased to report he has successfully passed his Exam as a Corporal and will leave shortly for London.

Miss M. Gilchrist has returned home after an extended visit with relatives in Oil City, California.

CARGILL

The village was shocked on Friday with the news that Mrs. J. E. Smith (nee Lorella Holt) had passed away at the early age of 31yrs. 1 month and 10 days. Besides a sorrowing husband and a family of three girls and one boy. She leaves her widowed mother, three sisters and two brothers: Mrs. Jas. Young, Chepstowe; Mrs. Jas. Foster, Bruce; Mrs. A. Burrows, John and Melvin on the homestead. The funeral which was held on Sunday afternoon was largely attended, services being conducted by the Rev. R. M. Gale. The sympathy of the community goes to the bereaved ones in this their sad hour of affliction.

Mr. H. E. Burrows of International Harvester Co., Harriston, made a business trip to our village on Monday.

Mr. Richard Schuett of Walkerton is at present engaged in decorating the Foresters and Masonic Halls.

Master Melvin Pearson of Eden Grove spent the past week with his aunt, Mrs. W. J. Loughleen.

D. D. G. M. W. J. Loughleen of Huron District A. F. & A. M., paid his official visit to Tiverton on Tuesday evening and on Friday 19th. he visits Moravian Lodge here when visitors from Paisley, Walkerton and other points are expected.

Mr. Joseph Orlowski of Berlin was a visitor in our village on Sunday.

Dont forget the Big Military Day in Walkerton on the 24th. and see the finest battalion raised in the province. Special train leaves here at 0.52 am giving you eleven hours in the County Town. This will likely be the last time to see the boys together as they expect to leave about June 5th. for London.

Major Tily of Toronto spent the week end at Hylhurst.

Mr. Wesley Brounscombe, who has been on Cameron's staff for the past two years, has returned to his former position in the foundry, and Mr. Geo. Welsford is his successor.

Our little burg was without protection for a few days last week, as Chief Ziegler was in London attending the Shriners' convention.

Mr. Joseph Zettler left on Thursday for Georgetown, where he has secured a position for the summer.

The funeral of the late David Allerdyce of Walkerton was held here on Thursday afternoon and was largely attended, services being conducted by Rev. Homer of the Anglican Church. The deceased was well known here, having been born on the farm now owned by his brother John, on 8th con. Greenock. Our sympathy goes to the bereaved family.

Messrs. Kyle and Saunders made a business trip to Hanover on Thursday.

Bailiff Briggs of Walkerton was in the village on Saturday.

Mrs. C. W. Keeling. Mrs. John Clark and daughter were in Walkerton on Saturday.

Mr. and Mrs. D. C. McKay, who have spent the past week visiting friends, returned to Toronto on Friday.

Mr. James Elder, G. T. P. agent, Jasper, Alta., is visiting his aunt, Mrs. Chas. Elder, this week. It is eight years since Jim left here, and the West seems to have agreed with him. He is en route to Goderich for a short visit before donning the khaki in the Engineer corps.

Mrs. John Peel of Whitby is visiting her daughter, Mrs. R. A. Fowlie.

Mr. R. A. Fowlie has moved into the "Whitehouse" for the summer months.

PINKERTON

Miss Margaret Garvey of Chepstowe spent the week-end at Mr. R. Donnelly's.

No services were held in the Presbyterian Church here on Sunday evening owing to the funeral of the late Mrs. Smith, which took place on Sunday afternoon.

Mr. Wilmer Donnelly, mail-clerk on the G. T. R., spent Sunday at his home here.

Mrs. J. A. Reid is visiting friends in Blenheim.

Mr. F. Birrell made a business trip to Toronto last week.

Prayer-meeting was held this week at the home of Mrs. A. C. McKee.

Miss Jennie Pinkerton succeeded in winning the beautiful "Irish Crochet" centre piece, kindly donated by Miss Lizzie Lamb to the Pinkerton Red Cross Society. Tickets were sold for which the handsome sum of $11.71 was realized. Congratulations, Jennie.

GREENOCK

A few around here finished seeding last week, on account of the wet weather. It is pretty late this year.

Miss Reta Koller who graduated for a nurse at the St. Michael Hospital Toronto last week is spending a couple of weeks at her home here.

Mr. and Mrs. Geo. Ernewein moved to Walkerton on Friday. On Wednesday night the neighbors presented them with a fine Arm and Rocking Chair.

Mr. Jake Koller delivered a fine horse to the Irwin Bros. on Monday at Walkerton.

Mr. Alex Kraemer is busy these days at the wagon-making. We wish Alex every sucess in his business.

Mr. Linus Koller who spent a couple of months with his brother Jake here, is visiting his sister Mrs. Schnurr at Ambleside.

Mr. Fred Kraemer is working for Mr. A. Heidmiller for a couple of weeks.

MILDMAY

Mrs. Peter Schneider of the 8th con. near Deemerton died very suddenly on Tuesday morning May 9th. Death was due to heart trouble. For more than a year she had been in poor health. The funeral took place to Deemerton cemetery on Monday morning May 15th.

Mr. Floyd Fink and Mr. W. F. Wendt visited Hanover on Saturday.

Hergott Bros., Chevrolet agents last week disposed of two cars. Mr. Joe Lobsinger purchased one for his livery business, and Mr. Alex Foly general merchant, purchased one for his family. Both are touring cars.

Mrs. James Johnston who spent the winter months at Gore Bay, Manitoulin Island, returned to Mildmay on Monday and will make her home here for the future.

Mr. John Hamel motored to Hanover on Saturday.

Mr. Peter Reuben and wife, Misses Rose Helwig, Pearl Fink and Mr. Floyd Fink made a motor trip to Walkerton and Hanover on Sunday.

Mr. and Mrs. Jacob Rumsworm of Hanover visited in town on Tuesday May 9th.

Mr. Edward Diebel spent Sunday at Neustadt.

Fourteen extra choice cattle were delivered in Mildmay on Saturday May 6th. by Messrs Michael and Jos. Beitz of the 5th con. They received a fancy price for them.

The order of the day and likewise of the family is gardening these days.

Pte. Earl Harper of Walkerton spent a short time in town on Saturday.

Mr. Peter Reuben, Overland agent went to Toronto last week and bought up Dr. Wilson's new Overland Roadster.

EAST BRUCE

Mr. John McKay is engaged with Mr. Ed. Brownscombe for the summer.

Mr. Jack Teeple spent Sunday at home.

Mr. Howard McKeeman went through the burg in his new auto on Sunday.

BORN—To Mr. and Mrs. Currie, on May 11th, twins (boy and girl.)

Mr. Jas. Lamont spent Sunday visiting friends in Eldersile on Sunday.

Mr. Joseph Foster attended the funeral of his sister-in-law at Cargill on Sunday.

Mr. Fred Burroughs has returned to the burg.

Miss Lizzie Rees is visiting at Mr. John Metcalfe's.

Mr. James McArthur spent Sunday at Glamis.

The sad news came to Mrs. Richard McGregor on the 9th of May of the death of her brother, Pte. Thomas Babcock, who was killed in action on April 28th, Somewhere in France. Pte. Babcock was one of the first to offer his services when war broke out and joined the 15th Battalion then training in Guelph, but when word came for men to fill the vacancies in the ranks of the famous Princess Pats., Pte Tom was one picked on to go. He had been in the trenches about one year when he was killed. He was a Bruce boy, having been born on the 6th concession about 21 years ago and lived there up to about ten years ago when he moved into Paisley. He leaves to mourn his loss two sisters and two brothers.

WESTFORD

On Monday evening May 1st, a number of friends and neighbours gathered at the home of Alphonsus Murray who some time ago enlisted in the Bruce Battalion. The principal feature of the evening's entertainment was the presentation of a wrist watch to him. The following address was read by J. A. Lockhart.

To Mr. Alphonsus Murray

Dear Phonse;—

To assure you of our interest in you and the great cause you have pledged yourself to champion, a few of your friends have gathered here this evening. We appreciate the sacrifice you are making in offering your services at the disposal of your King and Country.

We realize what this means to you in all you are leaving behind as well as the strenuous tests of training and the trials and danger of warfare. The spirit of those who have so nobly responded to the Empire's call, calls forth our admiration. Like others who have enlisted you will be followed by our interest and our prayers, for your safety. May you again return to fill the vacancy you are leaving. As some evidence of our esteem and good wishes accept this wrist watch.

Roy Haldenby.
Will Haldenby.

Clarence Haldenby made the presentation. Mr. Alphonsus Murray made a neat reply, thanking all for their appreciation of what he had done and assuring them that it was indeed not a sacrifice but a duty for all those who were free to enlist.

RIVERSDALE

Mrs. C. A. Stuart is visiting at the home of her mother Mrs. McDonald of Riversdale.

We are sorry to report that Mrs. John Cassidy jr. is ill with Lagrippe at the time of writing.

Under the management of Mr. Arch. McKinnon the "corduroy" part of the back line is being greatly improved, and will now be in good condition for autos.

Mrs. Robert Chatreau is at the home of her daughter Mrs. Yates of Walkerton recovering from the effects of an operation performed on Wednesday last by Dr. Hall.

Mr. Bald I. P. S. visited the Riversdale and neighbouring schools last week.

Mr. Joseph Dietrich with a number of friends motored to Kincardine on Saturday.

James Dietrich and William O'Hagan spent Sunday in Teeswater.

It is reported that Mr. Currie Thompson, formerly a Riversdale boy, has enlisted in Teeswater. Mr. Thompson, who attended Military School a few years ago will no doubt shine in the ranks. We all wish Currie every success!

Mr. Albert Dietrich and Nicholas O'Hagan brought in a fine bunch of cattle from Dunkeld on Saturday.

Mr. John O'Hagan is improving his farm by planting a grove of maple trees. He has already planted nearly fifty. He is setting a good example, as there trees in a few years will both add to the beauty of his farm and provide a shade for the public.

HANOVER

The body of Mrs. Oppertshauser of Hanover was recovered on Saturday after a persistent search lasting over two weeks. It was found in the river a short distance from the point where the unfortunate lady was drowned. The funeral was held on Sunday and was largely attended.

SUMMER STRAWS

Canadian Expeditionary Forces

Stirred by the love of liberty and honor—called by the Empire's need—undaunted by the hardships and carnage at the Front—keen to be in at the finish—Canada's finest manhood is getting into khaki!

Men who thus give up income and home comforts, and risk life itself, certainly should not have to sacrifice such civilized habits as a clean, smooth shave whenever they want it. Experience has shown that the only way to be sure of this at the front is to have a Gillette Safety Razor.

Wherever there is soap and water, and five minutes to spare, the Gillette will give a real velvet shave. Take one to the Front yourself if you can—if you cannot go, see that your enlisted friend has a

BATTALION NOTES

Now the gay Sergeant-Major's some singer
At banquets and entertainments, a winner.
When asked for a song
It's not very long,
Ere he delivers the goods like a winner.

His voice the sweet melody carried
And the audience spell-bound, they tarried,
He sure makes a hit
And he's doing his bit
And say, girls, he's bound to get married.

Just a few remarks now as I linger,
To say a word or two of the singer,
It must be confess'd,
And it is no jest,
He's both a good drill-sergeant and singer.
—JULIE

+

In the Telescope, of May 4th, a misprint caused the second verse to say, "Bugles of England" instead of "Banners of England." The Chesley Enterprise poet has been inspired to write the following after reading the poem in the Telescope:—

O, Bugles of England
I doff my cap to thee!
Ye who float upon the winds
(Tho' how I fail to see)
Storm-rent and battle-torn
Smoke-stained and ....(Say!—
My reverence o'erpowers me
Some bugles, those!—good day!)

+

A fair maiden was heard to soliloquize thus one day:—

"'Tis Leap Year! 'tis Leap Year!
Three months and more are past.
The soldiers are most dear,
Yet not one have I ask't."

There's shy Harvey and merry Bill,
There's handsome Bert and bustling Charlie,
There's Amos who is such a pill
And Harry, such a dearie.

* * *

A soldier, too shy to respond more openly, has sent in this reply:—

Fair maiden! dear maiden!
Let no more days slide
Before you select me,
And become my sweet bride.
—A TRAVESTY.

DIED

CARPENTER—In Walkerton, on Thursday, May 18th, Francis Nesbitt, infant son of Mr. and Mrs. Robert Carpenter, aged 1 year, 3 months and 23 days.

MASS MEETING JUNE 1ST.

Citizens of Bruce will Meet Here to Form County Patriotic League —Presentation to 160th Battalion.

When the Bruce War Auxiliary was organized here four months ago, it was in the nature of an experiment. Lt.-Col. Weir felt that he ought have the citizenship of Bruce lined up with him in his recruiting task, and taking a suggestion from his friend, Col. John M. Godfrey, the well-known Toronto lawyer, the Bruce War Auxiliary resulted. The experiment proved a splendid success. It is not necessary to dilate here upon the assistance which the Bruce War Auxiliary has been to the 160th Batt. The War Auxiliary has almost completed its work but there remains other important work to be done. With this idea in mind the president of the War Auxiliary, Judge Klein and Warden A. E. McNab are calling a mass meeting of the citizens of Bruce to be held here on June 1st. Every person living in the county is invited to come and have a part in it.

The meeting will be held in the Court House, Walkerton at 10 a. m. After the adjournment of the meeting in the afternoon, there will be a parade of the entire 160th Batt, which will then be fully mobolized. Warden McNab will deliver in front of the Court House a farewell address and presented to the Battalion a purse of money from the County. Prominent men of the County will also address the Battalion.

Some of the objects of the League as briefly outlined by Judge Klein and endorsed by over a hundred representative citizens of Bruce are:

1. Arrange for employment of soldiers who return.
2. Encourage admiration of disabled war heroes of Bruce.
3. Induce retired farmers to return to the land.
4. Assist in future recruiting when necessary.
5. Assist and encourage Immigration to the country.
6. Instil patriotism in the rising generation.
7. Boost the County of Bruce in general.

PROPOSED PROGRAMME

1. Meeting to open at 10 a. m. sharp, and appointment of Temporary Chairman and Secretary.
2. Reading of Communications from citizens and from "Kent County Patriotic League." and "Speakers' Patriotic League of Toronto University."
3. General Discussion as to advisability of forming League, and objects of same.
4. Appointment of Special Committee to consider and recommend the different objects and aims of the League and to report at 2 p. m.
5. Adjournment until 2 p. m.
6. Consideration of Special Committee's report at 2 p. m.
7. General Organization and Election of Officers.
8. Selection of Delegates to attend Convention intended to be called by "Speakers' Patriotic League of Toronto."
9. Any other business for the good of the League.
10. Adjournment to meet in future at a place in County outside of Walkerton.

CAR TURNED TURTLE

Three Walkerton Men Received a Bad Mussing Up.

Messrs. William George, J. H. Ranesbottom and Lieut. Little narrowly escaped serious injury early Tuesday morning, when their car turned turtle this side of Enniskillen. Lieut. Little and some friends were driving to Teeswater on Monday night, when their auto got stalled. They phoned in to J. H. Ranesbottom to get somebody to come out and help them. It was after Mr. George had driven out and got the other party safely on the way some distance ahead of them, that the Ford car, in which Messrs. George, Ranesbottom and Little were following, suddenly turned a somersault forward. They were going a good clip at the time, and got off the centre of the road, when the car ducked. Lieut. Little was thrown clear of the machine. The other two occupants were not so fortunate. Mr. George was badly knocked out, but gamely crowded out from under, however, and helped to lift the car to get his companion out. Mr. Ranesbottom was bruised across the chest and badly shaken up. Mr. George was badly bruised on the side where the steering gear hit him, and it was feared for a time that he had sustained internal injuries. Had the car not fallen across the open ditch the occupants would have been pinned tight with more serious results. The car was badly damaged, but will be in commission again in a few days.

Girl Wanted

Girl wanted for general house work. Apply to Mrs. Stead.

+ + +

$7,500 Raised

The figures of the Patriotic Fund and Red Cross canvass are not yet complete but total so far $7,500.

+ + +

Varsity Exams

Walkerton Students who were successful in their examinations at Toronto University included:—Armand Whitehead, first year law; J. W. Morgan, honours in third year Science; Wallace Cunningham, third year medicine. Leslie Huether B.A. was granted third year standing in medicine owing to his having enlisted for Overseas Service.

+ + +

Chancery Sittings

Two cases were up for trial at Chancery Sittings here this week before Mr. Justice Clute. In the case of Black vs. Connor, Henderson Black of Peterborough claimed an equitable mortgage on the Binder Twine Factory for $20,000. The case was settled satisfactory by agreement. In an ejectment case, Bland vs. Brown, Capt. Bland got a verdict of $175 and costs.

+ + +

Walkerton Boy Wounded.

Mrs. Jerome had a telegram from Ottawa on Tuesday announcing that her son, Harry Jerome, had been wounded in the left arm on May 14th, and is now in No. 3 Gen. Hospital, Boulogne, France. Harry was one of the first Walkerton boys to enlist, going over in the First Contingent along with Charlie Sutton, Walter Pitt, and others.

+ + +

Mr. Ferguson Leaving.

Mr. R. A. Ferguson, B. A., Mathematics Master at the High School, has tendered his resignation to the Board. Mr. Ferguson has proved a capable teacher as well as an efficient instructor of the Cadet Corps during the past year. We understand that Mr. Ferguson has accepted a similar position at Georgetown at an increase of $300.00 in salary.

+ + +

Frank Schaftner Writes

Mr. Charlie Schaftner received the following letter recently from his brother, Pte. Frank Schaftner, who is with the Canadian Pioneers, in England:— Just a few lines to let you know that I am well and received your very welcome letter today. I am keeping well so far and think that I will continue to do so. We are having a pretty hard time of it over here so far. They are drilling us pretty hard. I am getting on pretty well so far but all the boys are gone to the Front but a few of us. There are a few of them killed already. I don't know who they are but will let you know later. Bye-bye for this time, hoping to hear from you soon again.

+ + +

Death of Mrs. Irwin.

After only a few days' illness, Mrs. Elizabeth Irwin, widow of the late William Irwin, passed away at her residence, Queen St. north Paisley, on Friday morning last. The deceased had been a resident of Paisley for 11 years. She was a native of the Tp. of Caven, Ont, but was living in the Tp. Essay, Simcoe Co, when she was married in 1857. Six years later she went with her husband to Ashfield Tp., Co. of Huron, where Mr. Irwin died about 27 years ago. Mrs. Irwin was a very active woman, enjoying good health and the possession of her faculties up to the time of her fatal illness, which came upon her just as she was entering her 83rd year. Kindly and friendly in disposition, she was loved and esteemed by all friends and acquaintances. She is survived by a family of six sons and two daughters:—Wm. of Wiarton; George, of Dungannon, Robert and Henry, of Walkerton; Arthur, of Paisley; Thomas, of Elora Road north, Hamilton, of Glenevon, Sask; Mrs. Edwards, of Dungannon, and Mrs. J. Miller, of London. A funeral service was held at the house on Friday evening, conducted by Rev. Mr. Facey—the deceased having been a lifelong Methodist, and on Saturday the remains were taken by train to Dungannon for interment.—Paisley Advocate.

FARMERS AND HOME TOWN

There are arguments not a few in favor of farmers supporting their home town. One which nobody is likely to question, is the larger the town grows and the more prosperous it is, the higher the value of farm property within easy reach of it becomes. A clear illustration is present prices of farms near Toronto, and of land equally good, distant from a large city. Any farmer who fosters or permits a feeling of hostility to his home town is blind to his own interests. The interests of town and country are mutual.

NEWS ABOUT TOWN

County Council meets at Port Elgin June 5th.

Mr. John H. Appel is able to be around again.

William Weidner has taken a position with Art McCartney.

Not in twenty five years has sugar been so dear as it is at present.

Miss Vera Dippel spent Sunday at Mildmay as the guest of Miss Liesemer.

Practically all the soldiers who were out on seeding furlough arrived back before the 24th.

At Belleville the other day a Trenton man was fined $400 for supplying liquor to a soldier. Costly hospitality.

Mrs. William Whyte, Scott St., was taken to the County Hospital on Sunday, suffering from erysipelas in the face.

Among the recent purchasers of Overland cars are:—John Knois, Albert Waechter, John Rapp and Philip Montag.

The 160th Band will give open air concerts at the Court House on Wednesday and Saturday nights, commencing at 7.30.

Milton Aiken, who returned recently from the Front on account of wounds, is acting as instructor with the Machine Gun Section of the 160th.

At this time of year the wise and provident man lays in his winter's supply of coal—that is, of course, if the wise and provident man has the price.

A crowd of citizens gather around the armouries lawn every night at 6 o'clock to witness the interesting ceremony of mounting guard.

Mr. John Connor of St. John N. B. and his brother, Mr. P. L. Connor of Boston, were here this week in connection with a case at Chancery Court Sittings.

Amos Fizzell, the old Kinlough farmer, who was sent up for trial by Magistrate Tolton, will be tried here on the 30th by His Honor Judge Klein.

Miss Zeta Black, of Clifford, spent Sunday at Mr. W. H. McFarlane's. She sang a solo at Knox Church Sunday evening, which was very much appreciated.

Mr. Alex. Grant, shoemaker at Pettyplace's, has moved into the double residence opposite the biscuit factory, his family coming here from Teeswater this week.

The Tara detachment of the 160th marched to Hanover on Friday morning and took the train there for their home town where a big reception and presentation awaited them.

Mr. M. G. Dippel had word from his son Signaller Louis Dippel this week that all is well with him. He has been on duty at the 'phone since February last without intermission.

The photograph in Saturday's Globe of the khaki clad graduates at University Convocation showed the figure of Mr. Leslie Huether, B. A., son of Mr. and Mrs. J. B. Huether, of Walkerton.

An unknown farmer who drove to town for the Big Day received a nasty kick over the dash board as he leaned forward to straighten the lines. Two teeth were broken and his mouth and chin badly gashed.

Mrs. Albert Batte was brought home from Stratford on Saturday in a serious condition. She went on a visit to her son the previous day, and while there was seized with a paralytic stroke. Her condition is reported to be improving.

Mrs. Richard Sutton had a letter on Tuesday from Miss Lily Thick, formerly of Walkerton but now of London, England, in which she stated that she had a call recently from Pte. Charlie Sutton while he was on seven days leave. Charlie was in fine health and looked splendid.

The thirty-two soldiers, measles suspects, who were quarantined at the Station Hotel for two weeks, were released from quarantine on Friday afternoon. The boys were so well treated by the people of the neighborhood that they did not mind their enforced isolation.

Among the Walkerton brethren who attended the Masonic gathering at Cargill on Friday evening were:—Messrs. P. Bremmer, Rev. D. A. Walker, R. H. McKay, C. Petteplace, E. Myles, D. George, D. McKerracher, J. Douglas, T. Boss, M. Gibson, J. Jones, Lieut. Parker.

Two cases are up for trial at Chancery Sittings here this week before Mr. Justice Clute. In the case of Black vs. Connors, Henderson Black, of Peterborough, claims an equitable mortgage on the Binder-twine Factory here of $20,000. In an ejectment case, Capt. Bland, of Kincardine, is bringing suit against Wm. Brown.

Read the ads.

Rain, rain and still is rains.

High School Entrance exams begin on Saturday.

Judge Greig is erecting a fine spacious verandah.

Latest styles in wedding stationery at the Telescope.

Mr. M. J. Ramsey was in Toronto on business last week.

Mrs. A. P. Sieveright is spending a week or so at Beaverton.

Wm. Fraser, a Kincardine Tp. soldier, is reported wounded in France.

Mrs. (Dr.) Barnett of Galt is visiting her parents, Mr. and Mrs. H. McCrum.

Mr. A. W. Ferguson, B. A., is able to be out again, following a severe attack of tonsilitis.

Mr. John Bradley of Toronto has taken a position in G. T. Rourke's tailoring department.

Mrs. Henderson and daughter, who have been visiting Mr. and Mrs. David Robertson, returned to Toronto Monday.

Mr. Chas. Stephan, who has been laid up the past two weeks with a severe attack of bronchitis, is considerably improved.

The annual meeting of the Walkerton Women's Hospital Aid will be held in the Town Hall on Saturday, May 27th, at 3 o'clock.

Mrs. W. J. F. Ross and daughter, Greta, of Forest, are spending the week with Mrs. Ross's parents, Mr. and Mrs. R. H. McKay.

Pte. Clayton McWhinney was presented with an address and handsome wrist watch by the people of the Solway neighbourhood on Tuesday night.

Falling hair and Dandruff can be stopped, and the growth improved, by Rexall "93" Hair Tonic, which all Rexall Drug Stores guarantee.—A. P. Sieveright.

The School boys collection of old newspapers last Saturday totalled 2,000 lbs. This makes 2½ tons that the pupils of Walkerton Schools have collected thus far.

Mrs. J. C Nichol of Durham, spent the 24th with friends in town. Mrs. Nichol's husband who is an old Walkerton boy, is head tailor with the 147th Batt. now at Niagara.

Rexall Orderlies keep the bowels regular and healthy. Their action is gentle, mild and soothing. Sold only by Rexall Drug Stores, 15c and 25c boxes.—A. P. Sieveright.

Warning has been sent to the medical men of the Province that prosecutions will follow if they fail to comply with the regulations regarding the registration of births.

A private of the 160th is to be court-martialled this week on a serious offence. He is charged with being intoxicated while on guard duty and threatening his superior officer.

The nine year old son of Joe Abell, junk dealer, had his nose badly gashed by a kick from the horse on Saturday. The bridge of his nose was slightly fractured and one eyelid cut.

The Women's Institute will meet at home of Mrs. B. J. Waechter on Thursday, June 1st. Mr. N. C. McKay, B. S. A., will address the ladies and a demonstration will be given on biscuit making.

The citizens of Chesley are making great preparations for entertaining the 160th as well as large crowds of visitors on Saturday, June 3rd, when the colors are to presented to the Bruce Battalion.

You can't keep a good man down! Early Tuesday morning Billy George was lying in a ditch with a couple of broken ribs under an upturned car. The following day, Wednesday, he did a good day's work.

Immediately at the close of the Annual Meeting of the Walkerton W. H. A., the Annual Meeting of the Bruce Co. W. H. A. will be held, when reports will be presented from the various Branches.

Postmaster and Mrs. L. A. Brink, Mr. Eckelstrom, manager Bank of Hamilton, Teeswater, wife and child, and Miss Smith of Guelph, motored over from Teeswater on Wednesday and were guests of Mr. and Mrs. John H. Appel.

Dr. Slater, a recent graduate of the Ontario College of Dentistry, hailing from Galt, opened for practice this week in the rooms in the Wisser Block at one time occupied by Dr. Lount. Dr. Slater has had a very fine plant installed, imbodying the very latest ideas in dental equipment.

Mr. Thomas Dixon had a letter from his son, Elliott, who is with the 71st at Bramshott Camp. He states that the weather is good now and he is enjoying the beautiful scenery of rural England. The men are beginning to know what work is now. The other day they had a fifteen mile march with full equipment, which put them on their mettle.

Mr. Grover of Chesley was a visitor here on Friday.

Miss Florence Webster is visiting her cousin, Mrs. (Dr.) Hall.

Miss Freda McCrum left on Monday morning for New York.

Mr. Amos Hoover is visiting friends in Bentinck for a few days.

Mr. Wm. Pengelly of Toronto spent the holiday at his home here.

The 147th Grey Battalion reached Niagara Camp Friday morning.

"Mike" La France of Guelph visited at his home here over the holiday.

The ads. provide some of the best reading in this paper. Read them.

Mrs. George Kilmer of Toronto is visiting her father, Mr. N. Crawford.

Miss Ella Simpson of Allenford was a visitor at Mr. N. Eidt's on Victoria Day.

Mr. Walter Heffernan of Berlin was a visitor at his home here on Victoria Day

Miss Doris Graef of Clifford and Miss Cappie Spence of Clifford spent the 24th with Mrs. F. G. Eidt.

Printing papers, cardboards etc. have advanced from 25 to 50 per cent within the past two months.

Mrs. John Lynch and daughters, Grace and Edna, are visiting Mrs. Lynch's sister, Mrs. F. Latchford.

Capt. McNeil of Wiarton, who returned recently from Ireland, reported to Lt.-Col. Weir for duty last week.

Dr. M. A. McKechnie of the C. N. R. construction staff west of Edmonton, is home on a visit to his parents and leaves on Monday for Winnipeg to report for military duty.

Mrs. H. M. Lay left on Monday morning for Toronto, where she will join her mother, Mrs. John King, and her brother, Hon. W. L. MacKenzie King on a week's visit to New York.

Mrs. Wallace, of Paris, wife of Bandsman John Wallace of the 160th, her daughter, Olive, and son Sergt. Wallace of the 125th, were visitors at at Mrs. Joe Wallace's on the big day.

Rev. John Watt of Burgoyne has been spending a few days with her mother, Mrs. J. H. Watt. He brought down his little seven year old son, Arthur, to have his tonsils and adenoids removed.

Coun. Alex McCarter had word this week that his son Pte. Reg. McCarter is now in France. The word was sent for Reg. by Gabe Haas, who wrote under date of May 1st. "Reg. leaves this morning for France. Don't write until you hear from him."

Walkerton District meeting of the Methodist Church was held at Hanover on Friday. Reports submitted from the various appointments indicated a good year all round. Missionary givings showed a distinct advance in spite of existing conditions. Rev. D. A. Walker was appointed on the Conference Stationing Committee, The delegates present from Walkerton were:—Rev. D. A. Walker, Rev. J. W. Sanderson, and M. G. Dippel.

+ + +

Car Turned Turtle.

Sergt. Ross of the 160th was hurt, and a car belonging to Reeve Hunter of Kincardine, wrecked at Johnston's Corner's, Brant, on Friday night when the car skidded and turned turtle. Five soldiers, including Lieut. Cronin, were going to Kincardine for week-end leave when the accident occurred. Sergt. Ross sustained a badly bruised shoulder. That the other passengers escaped without injury is a wonder.

+ + +

Reg. McCarter in France.

Miss Gladys McCarter had a letter this week from her brother Reg., written on May 4th, shortly after his arrival in France. Reg. writes:—"I am the only Walkerton boy that came over with this draft. The rest are at Sandling yet, I am attached to the Canadian 13th Batt., Black Watch from Montreal. I am in kilts. You ought to see me, first opportunity I will get my picture taken. This is a beautiful country over here. Just saw Bob Turner, he came over in draft of C. E. Dick Addley came over on the same boat I did. Give my best wishes to mother for her birthday, may she have many more." Reg's. new address is:—Candian Base Depot, 13th Batt., 1st Canadians, Havre, France.

+ + +

Sad Home Coming

It was a sad home-coming that awaited Pte. Robt. Carpenter of Walkerton, on his return from England with the wounded and disabled soldiers last week. Pte. Carpenter went to England with the 34th last year, but never reached France. An operation on his feet did not remedy his disability, and after serving with the Army Service Corps in England for some time, he was given his discharge. On arriving at Quebec last Thursday, he received a telegram from home that his bright little infant son, the only child in the house, had passed away. Carpenter got special leave to hurry home, and arrived here in time to see the little one laid away. Carpenter and his wife, who was formerly Miss Morrison, are well thought of here and have deep sympathy in their sad loss.

BIGGEST DAY ON RECORD

Ten Thousand Citizens of County Throng to Walkerton to See Bruce's Own Boys of the 160th.

It is too late for a report of the Big Military Day in Walkerton on the 24th, further than to say that the celebration was a success in every way. The devoted interest which the people of Bruce have shown from the first in "our own Battalion" was again manifest, practically the whole community flocking in to get a last look at the soldier boys of which they are so proud. And the boys acquitted themselves nobly. Everything went off without a hitch or accident and with clock-work regularity. The enthusiasm reached a climax when the entire Battalion marched past the grand stand at the conclusion of a fine program of military exercises.

Everybody was pleased with the big day. The people of Bruce had an opportunity of seeing the boys at their best, under the most favorable conditions of weather, and the committee attained the object which they had in view of raising funds for tents for the Battalion. The weather was simply ideal and before daybreak the crowds began pouring in. It is estimated that there were at least ten thousand visitors in town. The Special train from the north was so crowded that it was necessary to run an extra special train back at night. Besides 450 autos from every direction bore in loads of passengers.

Sec. George D. McKay stated that the day's receipts would net between twelve and thirteen hundred dollars for the Battalion after paying all bills.

HIGH SCHOOL CADETS

Praised by the Provincial Inspector For Their Appearance and Proficiency

The High School Cadet Corps turned out for the official visit of the inspector, Capt. Barclay of London, on Thursday afternoon. The boys looked smart in their natty blue suits and created a favorable impression, not only on the inspector, but on the large company of parents and friends who were present to witness the inspection. Capt. Rowland put the company through many difficult formations. Capt. Barclay praised the appearance of the corps, their steadiness, the care taken of their uniforms, and said that their all-round efficiency was to be commended. His remarks were very encouraging to the boys and all concerned.

Thirty-two cadets were on parade in charge of the following officers:—

Instructor—R. A. Ferguson B. A.

Capt.—John Rowland jr.

Lieuts.—Clayton Fortune, Oscar Schwindt.

Sergeants—Clayton Terrell, Harold Lewis, John Frame, Will Ramsey.

The entire corps numbers over forty. The officers and cadets are certainly to be congratulated on the fine report which was given them by the inspector. They are a corps of which the School may well be proud.

MONDAY JUNE 12th

The Battalion will Leave for London—50 More Recruits Wanted.

The 160th Bruce Batt. will entrain for London on Monday June 12th. These are the present calculations. In any case the Battalion will return from Chesley after the big celebration next week. The measles epidemic, which threatened to detain the Battalion here all summer, is now well in hand, and no further delays are looked for.

Major Moffat states that fifty more recruits are wanted to fill up the gap left by men who were found physically unfit in training.

Sergt. Major Carrick of D. Co. has been made Battalion Sergt. Major. Sergt. Carrick has had experience in the Imperial service and has the long service medal. He will be succeeded as Sergeant Major of D. Co., by Sergt. Holdsworth, who has been acting as Physical Director.

Pte. Gordon Scales has been made Sergeant-Cook of the 160th.

Sergt. Van Wyck has been made Quartermaster-Sergeant of D. Co.

Bear Cub for Mascot.

The Signalling Corps are very proud of their new mascot "Teddy Bruce" Teddy is a two-months-old bear cub, which was brought down from Limehead this week and will head the boys on parade.

+ + +

Wanted.

At once, a reliable man of good address with some experience among farmers, to act as county representative for Bruce County.—Stone & Wellington, Nurserymen, Toronto.

CURRENT COMMENT

The honorary colonels have some pickings anyway.

But is the United States prepared for a war with Mexico?

In their treatment of prisoners the Turks shame the Germans.

Harry Thaw is sensible enough to keep out of the newspapers.

Can't Count Bernstorff make another attempt to invade Canada.

It is hard to say whether Germany is really starving or just shamming.

Gouin should be careful not to wreck Liberalism on the Bourassa rocks.

It takes Lord Robert Cecil to show up the German peace proposals in their proper light.

What did Colonel Allison's lady bookkeeper do to get all that money out of the Shell Committee?

While Hill 304 is being bombarded, not much is said about the other [illegible].

The London Free Press is not so sure now that Sir Wilfrid will resign.

We did call for the hanging of Sir Roger Casement, but we stopped there.

The shortage of paper can scarcely account for the shortage in women's dresses.

Some day they will be telling us how much of a front the Russians are holding in the west.

Roosevelt's hat is now in the ring. He has definitely announced himself a Presidential candidate.

When all the railways are nationalized the Government employees may want to run the country.

The Cymric being neither a warship nor a merchant ship, but a munition ship, the President will overlook its sinking.

The labor men of Halifax are opposed to the day light saving movement. They may think that they rise early enough as it is.

The Berlin people don't need to starve, they can do as the British did at Kut-el-Amara. Then they would get plenty of food.

The Boston physician's report that the danger of disease transmission by kissing is negligible does not interest us. We pass.

Liebknecht may know better than proclaim himself Provisional President of Prussia.

Britain has adopted the daylight-saving scheme, and all clocks in the Kingdom are to be set forward one hour. Canada lags behind.

For a sick man Turkey seems to be able to put up a pretty lively fight.

"Victory is certain," declared Premier Asquith.

The New York Sinn Feiners are all pro-Germans.

But Villa does not write notes to the President.

General starvation defeated the British at Kut-el-Amara.

The loss of the Cymric is [illegible] no doubt, but it is all in the game.

The British blockade is being felt in Berlin. The people are running short of food. Food riots are in order.

The Irish "rebels" who live in the States are neither being shot nor jailed. But that does not save the necks of the poor dupes over in Ireland.

Announcement is made of an increase of 40 cents a ton in the price of anthracite coal at the mines. This means that the retail price will go up also.

The Australian and New Zealand troops have arrived in France. They are the Gallipoli heroes, and are now in the trenches facing the Germans. They should give a good account of themselves.

The ex-Empress Eugenie of France was 90 years old the other day, being born in Granada on May 5, 1826, the daughter of a Spanish army officer and a Scotch mother. She spends most of her time at Farnborough, England. She is anxious to live to see the defeat of the Germans, the nation that humbled her own husband and drove him from France. Her fortune is estimated at $10,000,000.

The Grand Trunk and Grand Trunk Pacific have sent, all told, 2,962 men to the front. It has paid out over $406,000 in salaries and wages to absent men and from March onwards, in place of payments to the men, it has proposed to contribute $10,000 per month to the Patriotic Fund. The officers of the company, together with the men, had subscribed some $150,000 to this fund. The C. P. R. has also been a liberal contributor in men and money to the war.

'TWIXT LOVE AND PRIDE

The letter began, "My dear Niece," and ended, "Your attached Aunt, Harriet Disney," its contents being to the effect that Lady Eagleton—Lady Caroline's aunt by her father's side—had generously made up her mind to sacrifice her pleasures, inclinations, habits, and self generally for the purpose of bestowing her society upon her "dear niece" aforesaid. This was indeed a heavy blow, her ladyship—having attained the troublesome age of eighty-two—being one of those people whom to entertain is a kind of martyrdom and bitter humiliation.

Her two betes noires were Sir Geo. and Frances Sylverton—Sir George on the strictly Dr. Fell principle, as nobody had ever been able to discover the cause of her animosity or anything about it, beyond the fact that she did dislike him, and that very thoroughly; Miss Sylverton on account of her fearlessness and utter disregard of all unkind comment, whereas her ladyship was much given to commenting, and enjoyed seeing those within reach of her remarks duly impressed thereby.

Pride was the old lady's strong point, and seeing Mildred showing signs and tokens of the same trait, it was on her she chose to concentrate all her ambitious views. Not that she ever expressed any intention of leaving to her all or any of the moneys reported to have been amassed by her during a long lifetime—a report not without some foundation, as for thirty years she had been carefully laying up for future emergencies or lucky heirs, from a handsome annuity, her husband, good man, having died at a comparatively early age—some said of scarlet fever, some of Lady Eagleton.

Be that as it may, the news of her coming scarcely caused the rapture it should have caused in the Trevanion household, moving, as it did, Lady Caroline to tears and Charlie to accept an invitation to Ford Abbey, where the Younges resided.

As misfortunes never come single, it was just about this time also that Lady Caroline heard for the first time of Mildred's refusal of Denzil Younge. The girl had hitherto kept it nervously to herself, thinking of it now and then with mingled feelings of pain and something akin to pleasure, but outwardly suppressing all sign until this day, when Lady Caroline timidly and without preface touched on the subject of his evident admiration of her.

"It seems a pity you could not care for him, Mildred," she said, interrogatively, as though it were by no means a certainty that Mildred did not care for him; "we should all like it so much, and your father says——"

Mildred rose hastily and threw down her work, while two red spots appeared on her cheeks.

"Mamma," she said, "perhaps it will be better, and will put a stop to all further mention of this matter, if I tell you the truth. Mr. Younge did propose to me, and I refused him."

She finished almost defiantly and turned to leave the room.

"Mildred, is it possible?" exclaimed Lady Caroline, aghast, remembering on the instant all the bright thoughts and brighter dreams built upon this plan, only to lie shattered now, and dead within her breast.

"Oh, Milly!" cried Mabel, who was also present, with lively reproach and disapproval in her tone.

"Is it such a crime, then? Has nothing of the kind ever been done before?" demanded Mildred, passionately, turning for a moment to face them at the door; and then she went out and left them to their wonderings and censures on her conduct.

When eventually Sir George was told the unlucky news, it rendered him at first furious, and then despairing. Things were becoming more embarrassed and entangled day by day, the immediate possession of a large sum of money being the only hope his lawyer could hold out to him of ultimately saving the estate; and, as affairs were, it would be a difficult if not impossible task to secure it. Denzil, with his immense wealth, and out of his great love for Mildred, would have thought little of lending twice the amount required. But now all that was changed, and Mildred's had been the hand to dash the hope aside. To Sir George her conduct appeared but in one light—she could have saved him, and would not.

Both he and Lady Caroline were strangely distant and unsympathetic to her in these days; her father irritably so, her mother with a sort of mournful gravity that touched her far more. Mabel, too, who in Mildred's absence, was ever her warmest supporter, came to speak of all this disputing as "poor Denzil," and openly shrunk from any converse on the matter—conduct which incensed Mildred to the last degree. In time this sort of thing came to an end, and affairs went back to their original footing, but Mildred could not forget that she had been "sent to Coventry," and, though she made no open moan, suffered acutely from the remembrance of it in secret.

Lord Lyndon, who, at this period, showed a tact and adroitness that would have reflected honor on a cleverer man, managed to be perpetually at her side. His attentions were open and unmistakable, while he declared his inability to withdraw from her presence even for a time by the fact of his taking a shooting-box quite close to King's Abbott—vacant through the death of its owner—for the season. He rode, drove, talked with and danced attendance on Miss Trevanion on every available opportunity, while she, thrown utterly on her own resources through the coldness of her family, accepted these demonstrations of a rising attachment in a far kindlier mood than she otherwise might have done.

All the little world of Clifton were beginning to look upon it as a settled matter, there being no mistake as to whom his devotion was given, as Roy Blount's wooing, and Mabel's acceptance of it, were very transparent things indeed; besides, just now, "the queen" was too much taken up with sorrowful misgivings and tender reflections to admit of any division of her favors, young Blount having received orders to join his regiment, which was stationed in Ireland, without further delay; so that scarcely a week remained to them before "Farewell"—that saddest of all words—would have to be uttered.

The news had been communicated to Mabel in a doleful whisper, and had been received as dolefully. For once all coquetry was laid aside, and she confessed herself as miserable at the idea of his going as he could be to go. There was no actual engagement existing between them, no decisive words had been spoken; but there was a mutual, perfect understanding that left no room for outspoken declarations. Each knew how deeply the other loved, and rested satisfied with the knowledge.

CHAPTER XIV.

Lady Eagleton and her "train" arrived at King's Abbott, the "train" consisting of one long suffering maid, one ditto man, one lapdog, and one dilapidated canary, rumpled in appearance, uncertain in color, and devoid of tail, on which her ladyship lavished all the sentiments of which she was capable.

"The canary always means three months, does it not?" asked Eddie, tragically, as the cortege swept up the stairs, escorted by most of the Trevanion servants.

Mildred burst into an unrestrainable laugh.

It was so long since she had given way to any merriment so entirely from her heart that they all turned and looked at her in amazement, and then, catching the infection, joined heartily in the laughter. Mildred, growing almost hysterical presently, sunk into a chair and put her hand to her side.

"Oh, what shall we do?" she gasped. "What is to become of us? A little of Lady Eagleton goes such a very long way. Mr. Blount"—to Roy, who had walked over, as usual, and who, having seen the procession, was enjoying the whole thing as much as any of them—"I will give you anything I possess if you will show me some method of getting rid of a troublesome old woman before Christmas time."

"And I will give you anything if you will just take her out and tie her to a tree and deliberately shoot her," said Eddie, gloomily—"as that is the only method of getting rid of her that I know of."

"Edward, how can you speak so disrespectfully of your grandaunt?" put in Lady Caroline, reprovingly, walking away down the hall, her face covered with suppressed smiles.

* * * * * * *

For a week everything had gone on smoothly, or rather there had been no actual outbreaks on the part of Lady Eagleton, though smothered hints and comments had been numerous. In a covert manner she inveighed against actions, habits, acquaintances, and all that came beneath her notice, but carefully subdued any open demonstrations of disapproval until the day before Roy's departure, when she chose to be particularly offensive.

Blount had come over rather earlier than usual, it being his last day, and he and Mabel had gone for a farewell walk amongst the shrubberies and through the winter gardens where they had loved to linger all through their hurried courtship. As he was not to leave until a late train the following day, he parted from her with the assurance that he would be down the next morning to take a final farewell.

Slightly flushed, and wholly miserable, Mabel entered the small drawing room, where she found her mother, Mildred, and Lady Eagleton assembled.

"How heated you look, child! What have you been doing with yourself?" demanded the old lady the moment she came within her view.

"Walking," returned Mabel, shortly.

"With that young man again, I presume?" grunted her grandaunt, ominously; whereupon Lady Caroline began to look uneasy.

"I was walking with Mr. Blount," said the queen, defiantly. She was sore at heart, and longing for sympathy, so that the old woman's words and manner grated cruelly on her overwrought feelings.

"I really think all decency and order have gone from the world," went on Lady Eagleton. "Society nowadays is widely different from what it once was. Even common propriety is a thing of the past. In my time a young woman would scarcely be allowed, under any circumstances, to walk alone with a young man for hours together—certainly not unless they were formally betrothed, having the consent of all parties concerned—and probably not even then. I presume he has made you an offer of marriage?"

Mildred rose, as if to interfere; but Mabel spoke again, without giving her time.

"People in your time must have been depraved people indeed, Aunt Harriet," she said, with ill-suppressed indignation, "if they could make mischief out of a simple walk with one's friend. At all events, I am very glad I live in the days I do; and, if you are particularly anxious to know, I will tell you that Mr. Blount has not made me an offer of marriage, as you call it."

Her ladyship was triumphant.

"Has he not?" she said. "Then, if I were you, my dear, I would have as little more to say to him as possible. Young men who dilly-dally, and put off the evil hour, as he appears to be doing, seldom or never mean anything. I dare say he is only agreeably whiling away his time down here, and will think no more of you once his back is turned."

Mabel was choking with rage, but could think of nothing to say. Lady Caroline, who sat a little behind her aunt, put out her hand to her daughter with a gesture of sympathetic affection, but she was nervously afraid of this terrible old woman, and knew not how to interfere effectually.

"Young men now are not what young men were," continued Lady Eagleton, impressively, "and I think Mr. Blount one of the worst specimens I have yet seen. His manners are so cool; and he is so insolently self-possessed; and he has none of the well-bred diffidence, the courtly elegance that distinguished the men of my generation. He is not half good enough for you, my dear, even were he in earnest, which I am pleased to consider extremely doubtful. I will receive you for a month or two, Mabel," declared her ladyship, magnificently, "and introduce you to those with whom you ought to associate. You shall return with me to my home, and gain those advantages that this secluded country place can never afford."

"Your ladyship is wonderfully kind," returned Mabel, "but I find 'this secluded country place' quite good enough for my tastes. Besides, I could not dream of accepting your invitation."

"May I ask why not?" demanded her grandaunt, majestically.

"Because there is nothing in the world to which I should more strenuously object than to spend two months in your ladyship's society," answered Mabel, losing all sense of decorum.

"You wicked girl!" almost screamed Lady Eagleton, rising and supporting herself on her gold-headed stick while she quivered with anger. "How dare you presume so to speak to me! Caroline, why do you not order her to leave the room? Am I, at my age, and after all the sacrifices I have made for my family, to submit to the impertinence of a chit of a girl like that?"

Poor Lady Caroline was terrified.

"Dear Aunt Harriet, she did not mean it," she said—"she did not, indeed—did you, Mabel? Speak, darling, and tell her it was all a mistake."

"She shall apologize to me, or I will leave this house, never to enter it again," protested Aunt Harriet, still raging.

"So she will, I am sure. Mabel, my dearest, tell your grandaunt how sorry you are for having used the language you did," said Lady Caroline, imploringly—"apologize to her."

"Apologize for what?" demanded "the queen." "She asked me to pay her a visit, and I declined. She then inquired my reasons, and I gave them. I do not see that any apology is necessary. However," she went on, turning toward the old lady, and executing an impertinent little courtesy, "if it will in any way gratify you, I beg your pardon, and admit that I am extremely sorry to think I was the cause of putting you in such a dreadful temper." With this she escaped from the room, having succeeded in carrying away with her the last word, a circumstance that vexed her grandaunt more than all the preceding warfare.

Lady Caroline, after considerable difficulty, having managed to smooth down the old lady's ruffled plumage, she consented to forgive and forget, and once more peace was restored.

But Mabel, when the terrible "last hour" came the following day, although she never for a moment doubted Royston, yet felt somehow shy and constrained, remembering vividly that one little biting question of Lady Eagleton's as to whether he had or had not ever made her the requisite offer of marriage. At the time she would have given almost everything she was worth to have been enabled to say "Yes," but truth had compelled her to answer in the negative.

Meantime Roy's sorrow had swallowed up all nervousness and every other sentiment, leaving him only able to hold her hands and entreat that she would never forget him.

"I shall be back soon," he said—"so soon that you will scarcely have time to miss me; and meanwhile I shall write by every post, and you will do likewise, will you not?"

To which she returned a sad, half-reluctant "Yes."

Had he been less wrapped up in sad thoughts about the coming parting, he might perhaps have fancied his love somewhat cold and cruel; but, as it was, he saw nothing. Presently he spoke the words that, had they been uttered yesterday, would have caused his "queen" to stand in such a different light before her tormentor.

"Shall I write to your father?" he asked. "You know, Mabel, it is time there was some decided understanding between us. I think this should have been done before, but somehow, while with you, and feeling you to be so much my own, the necessity seemed of less import. Shall I ask your father's consent to a regular engagement, darling?"

"Yes," Mabel answered, partly comforted—"I suppose it will be best"; then, sadly breaking down, "Oh, Roy, what shall I do without you?"

After this there ensued fond words and lingering caresses, and warm assurances of never-dying love; and then they kissed their last fond kiss and parted.

CHAPTER XV.

Lady Eagleton rejoiced exceedingly at Roy's departure, while Mabel mourned, and Mildred, with her mother, expressed truest sympathy. But, as there comes to every grief some grain of comfort, so the third morning there came to Mabel a letter directed in an unknown handwriting, which she took with falsely assumed indifference that tallied but badly with her brightened eyes, and carried away to her own room, there to read and reread it at her leisure, free from curious eyes.

Her grandaunt, who seldom came down to breakfast, and who on this particular occasion had been prompted by some evil genius to do so, had witnessed the arrival of the post-bag, the distribution of the letters, and Mabel's conscious smile and blush as she received hers. As her ladyship never forgot an injury—always making it a point to repay it, if possible fourfold—and as the late skirmish in the drawing-room was still fresh in her mind, she felt this was an opportunity not to be neglected, so she spoke as follows:

"I did not imagine it possible, Caroline, that you would allow your daughters to receive and open letters from gentlemen without first handing them to you for inspection."

"My dear Aunt Harriet, what do you mean?" asked her niece, anxiously, who knew her meaning well enough, but was afraid to say so.

"I may have been mistaken," said her ladyship, with heavy accentuation, and considerable severity; "but I certainly did think I saw Mabel receive a letter just now, addressed in the handwriting of a gentleman."

Hearing this, Lady Caroline grew suddenly unhappy, and, half believing her aunt to be in the right, and half fearing she herself was acting with imprudence toward her daughters, asked Mildred privately to find out from her sister whether the letter in question was everything it ought to be.

"Not that I wish to force myself into her confidence," Lady Caroline said—"you understand that, Mildred—I have the fullest faith in Mabel, and I know the dear child would show me her letter sooner or later—but merely to satisfy your grandaunt; she is so hard on Mabel—that I want her to see how dutiful in reality she can be."

"I understand," said Mildred, who never despised her mother's weakness, however strong she might feel herself to be, and went upstairs to Mabel's room, which she found locked against all intruders.

A Matter of Business.

There is a reason for everything, even a train news agent's reluctance to pass through the cars with his packet of newspapers first. A woman who had travelled fifty miles out of New York before she had a chance to buy the afternoon paper she had neglected to provide herself with said to the boy who finally appeared with papers:

"Why do you always come through first with books and then magazines and leave the newspapers until the last?"

"Why?" exclaimed the astonished boy. "Because it's business. If I came through first with papers everybody would buy a paper and read that all through the trip and leave me with all those dollar books and twenty-five cent magazines on my hands."—New York Press.

STRONGLY RECOMMENDS BABY'S OWN TABLETS

Mrs. Alonzo Tower, Johnson's Mills, N. B., writes: "I can strongly recommend Baby's Own Tablets to all mothers whose little ones are suffering from constipation, as I have proved them an excellent medicine for this trouble." Baby's Own Tablets not only cure constipation, but they make teething easy; break up colds, expel worms and regulate the stomach and bowels. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

In a Maori Wooing House.

Among the Maoris sometimes in the whare matoro (the wooing house), a building in which the young of both sexes assembled for play, songs, dances, etc., there would be at stated times a meeting. When the fires burned low a girl would stand up in the dark and say: "I love So-and-so. I want him for my husband." If he coughed (sign of assent) or said "Yes" it was well; if only dead silence she covered her head with her robe and was ashamed. This was not often, as she generally had managed to ascertain, either by her own inquiry or by sending a girl friend, if the proposal was acceptable. On the other hand, sometimes a mother would attend and say, "I want So-and-so for my son." If not acceptable there was generally mocking, and she was told to let the young people have their house (the wooing house) to themselves.

Ask Around You For the Proof

THAT DODD'S KIDNEY PILLS ALWAYS CURE KIDNEY DISEASE.

In Every Neighborhood You Will Find People Cured of Backache, Rheumatism, Dropsy or Diabetes by Dodd's Kidney Pills.

Lac Bouchette, Lac St. Jean, Que., May 22.—(Special.)—Mr. Arthur Fleurie, well known and highly respected here, has issued a short, concise statement in regard to Dodd's Kidney Pills. It is as follows:

"I have found that Dodd's Kidney Pills are an excellent remedy and that they cure kidney disease, rheumatism and indigestion."

Mr. Fleurie has received such benefit from Dodd's Kidney Pills that he wants other sufferers to know how to find relief. He feels it is his duty to his fellowman.

If you inquire among your neighbors you will find scores of people who have found in Dodd's Kidney Pills relief from some form of kidney trouble. It may have been the dry, itching skin, dizziness, nervousness and inability to get refreshing sleep that mark the earlier stages of the disease, or it may be diabetes, dropsy, rheumatism, heart disease, or some other of the dangerous diseases that mark its advanced stages.

You will find that Dodd's Kidney Pills cure kidney trouble, no matter where or in what form it is found. Ask your neighbors for the proof.

No Favors to Beauties.

A beautiful young lady approached the ticket window at a Pennsylvania country station and in a voice like the rippling of a brook asked the agent, "What is the fare to the fair?"

Minard's Liniment Cures Garget in Cows.

How Cotton Varies.

Cotton is usually differentiated in ordinary classification by the length of its staple. "Ordinary cotton" in the United States is of several kinds, chief among them the upland cotton, with a staple of from seven-eighths to one inch in length, and Gulf of Texas cotton, of which the staple is not usually quite so long, the longest stapled cottons among the "ordinary cottons" here are the bottom land or bender cotton, with a staple of from one and one-eighth to one and one-fourth inch, and the special fancy staple cotton, one and three-eighths to one and five-eighths inch in length. The sea island cotton, which is grown on the sea islands off the coast of South Carolina, has a staple of from one and a half to two and a half inches, the average length being one and three-fourths. Egyptian cotton is being grown in Southern California, New Mexico and Arizona. Its staple is not so long as the sea island cotton, [illegible] compares rather with the upland cotton here.

How Prussia Was Reforested.

There was no need of celebrating Arbor Day in Prussia in the days when Friedrich Wilhelm I. was king, for that monarch had a plan all his own by which he replenished the forests and kept the country well supplied with fruit trees.

According to Das Buch fur Alle, the king, having observed that there was a great dearth of fruit and oak trees in Prussia and not being willing to undertake the tremendous expense of reforesting the country himself issued an order to all clergymen that, after June 21, 1720, they should refuse to perform any marriage ceremony unless the groom could produce evidence that he had just planted six fruit trees and an equal number of oaks. If it was in winter or in the middle of a dry summer, when plants would not grow, the groom had to produce and lay aside a sum of money sufficient to cover the cost of the trees and promise to plant the required number when fall or spring came.

The edict worked wonders. The next generation in Prussia had no lack of fruit and oak trees.

How Sickly Women May Get Health

If they could only be made to see that half their ills are caused by impure blood, it wouldn't take long to cure them with Dr. Hamilton's Pills. Truly a wonderful medicine that invigorates, strengthens, renews. Every tired, worn out, woman that tries Dr. Hamilton's Pills will improve rapidly, will have better color, increased appetite and better digestion.

No better rebuilding tonic can be found than Dr. Hamilton's Pills which are safe, mild and health giving. For forty years Dr. Hamilton's Pills have been America's most valued family medicine, 25c per box at all dealers.

Only One Athens Now.

There is and has been for many centuries only one Athens. But antiquity knew no fewer than nine cities or towns of that name in various parts of Greece, and even in the time of Plautus is was sometimes felt necessary to distinguish the great one as "Attic Athens." It was natural that Greek cities should take their name from Athena, the goddess of wisdom, war-like prowess and skill in the arts of life, who, according to some legends, herself founded the City of the Violet Crown. Others ascribed the naming of the city to Theseus or other mythical kings. The "s" of the termination is a real plural, for the city was given a plural name (Athenai), as being made up of several constituent parts.—London Chronicle.

PILES CURED at HOME by New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P. 8, Windsor, Ont.

TACT OF AN ACTOR.

Sothern's Happy Thought and the Unruly Gallery Gods.

It was in the year 1863 or 1864. During the summer months Sothern, with John T. Raymond and several other well-known actors occupied the local theatre of a seaside summer resort, to which he and his company drew a houseful of people several nights in the week to hear and see them act—rehearse it really was in preparation for their next winter's New York season—the most important of their plays.

The little building had, of course, a gallery, and in the gallery the "gods" became so obstreperous on occasions that it was with great difficulty the play could be proceeded with. The ringleader, a well-known rough of the town, was a man named Bill Hourahan. One night a happy inspiration seized Sothern. Having learned the name of this prominent member of the rowdy element, he addressed him in the midst of the most unearthly noises as follows: "Mr. Hourahan, will you be good enough to take charge of the gallery and keep order for me? I shall feel very grateful."

The result was magical. Bill became at once an official of the theatre and as such cracked the heads of a few of his erstwhile fellow rioters with such good effect that it was only a little time before the best of order prevailed.

Minard's Liniment Cures Distemper.

The Spit of Ceremony.

Among the Akikuyu, of East Africa, described by Mr. and Mrs. W. S. Routledge in "With a Prehistoric People," to spit upon a person or thing indicates good will. "The blacksmith spits upon the sword he has forged before handing it over to the owner. So, too, courtesy demands that a man should spit in his hand before offering it to a friend, and the female visitors spit upon the newly arrived youngster as a sign of welcome." Even in England there are relics of the same custom in the habit among the lower classes of spitting on a coin.

DOES CATARRH BOTHER YOU? ARE YOUR NOSTRILS PLUGGED?

Why not give up that snuff and stop dosing your stomach? The one cure treatment is "Catarrhozone," sure to cure because it goes where the disease really is. Certain to cure in your case because it has cured tens of thousands worse than you are. Catarrhozone is a thorough cure, because it destroys the causes as well as the effects of the disease. Relief is prompt, cure is quick with this powerful remedy, which is guaranteed to cure Catarrh in any part of the nose, throat, bronchial tubes or lungs. To be really cured, use only Catarrhozone and beware of dangerous substitutes meant to deceive you for genuine Catarrhozone, which is sold everywhere, large size, containing two months' treatment, costs $1; small size 50c; sample size 25c.

BOX 6, HAMILTON, CANADA.

MAKE EXERCISE PLAY.

To Get the Best Results It Must be Thoroughly Enjoyed.

When you exercise, play. That is one of the points most strongly urged to the attention of the public in recently published health reports.

No matter whether you are walking, gardening, exercising in a gymnasium or playing golf, keep your exercise free from the spirit of drudgery and make it all recreation. Make it as enjoyable as anything you may do throughout the entire day. If you don't, much of the good that it might do you is lost. "The very best thing a man can do," says the report, "is to make a hobby of your exercise. No matter how poor the hobby, if it induces outdoor exercise it is perfectly justifiable."

The woman who is obliged to take her baby out for a two hours' airing every day is far more fortunate than she often realizes.

The only advice the report offers the man who is going to take up a hobby for the benefit of the resulting exercise is to choose one that permits of its being followed the year round rather than one that depends upon the seasons of the year. For that reason the amateur gardener or chicken fancier is far more fortunate in his choice than the amateur geologist, botanist or ornithologist. The latter must wait on the seasons and must find favorable locations for indulging their hobbies, while the former have year round pastimes.

Corns Drop Out
INSTANT RELIEF
Paint on Putnam's Corn Extractor to-night, and corns feel better in the morning. Magical, the way "Putnam's" eases the pain, destroys the roots, kills a corn for all time. No pain. Cure guaranteed. Get a 25c bottle of "Putnam's" Extractor to-day.

Odds and Ends.

Lettuce contains a mild opiate—lettuce opium.

Salt added to mustard prevents its drying up.

Soap shredded among stored blankets drives away moths.

Sausages will not burst if rolled in flour before frying.

Lemon rubbed on a burnt stove before black leading ensures a polish.

Gold chains can be cleaned with a little sal ammoniac dissolved in wine.

Paraffin is a good cleanser for porcelain tubs and bowls or enameled ware.

Jellies will not break if the mould is rubbed with a little olive oil.

Onions absorb all poisons and noxious smells quicker than anything else.

Sponges which need cleaning should be steeped in vinegar and water for a day.

If sweet potatoes are greased before baking they will be much softer and sweeter.

Flexibility of English.

English is not only, as Richard Jefferies asserted, the most expressive and flexible of tongues, but also, in Swinburne's opinion, the most musical. He proclaimed the lines—

Music that gentlier on the spirit lies
Than tired eyelids upon tired eyes

to be unmatched for melody in any language. And few would venture to contradict such a master of music and tongues. But surely French ranks next on the roll of languages. For clearness of diction it is unrivalled, and thanks to its abundance of vowels (close on one for every consonant), it flows rhythmically from the tongue.

This is to certify that fourteen years ago I got the cords of my left wrist nearly severed, and was for about nine months that I had no use of my hand, and tried other liniments, also doctors, and was receiving no benefit. By a persuasion from a friend I got MINARD'S LINIMENT and used one bottle, which completely cured me, and have been using MINARD'S LINIMENT in my family ever since and find it the same as when I first used it, and would never be without it.

DEAD RECKONING.

One Way of Determining a Vessel's Course On an Ocean Voyage.

Dead reckoning simply means the computation of a ship's longitude and latitude from her movements as recorded in the log and without having recourse to astronomical observations. The chief elements from which the reckoning is made are these:

The point of departure—that is, the latitude and longitude sailed from or last determined—the course or direction sailed in as ascertained by the compass, the rate of sailing, measured from time to time by the log, and the time elapsed.

The various principles or methods mollowed in arriving at the reckoning are known among navigators as "plain sailing" and "middle latitude sailing." However, the data thus obtained are always liable to considerable errors by reason of currents, lee-way, fluctuations of the wind and changes in the declination of the compass. The results arrived at by dead reckoning, therefore, must of necessity be corrected as often as possible by observation of the heavenly bodies. No navigator would risk relying wholly on this method ow determining his position on an ocean voyage.—New York Times.

DOING IT BEAUTIFULLY.

(Passing Show)

Employer—I let Miss Smith off three days ago to see the last of her grandmother. What's happened to her?

Cashier—She wrote this morning to say, expects to be back to-morrow, as her grandmother is dying as fast as she can.

ISSUE NO. 21, 1916

HELP WANTED.

WANTED—COMPETENT MAID-GENeral. Family of three. Good wages. State age and experience. Address, P. O. Box 65, Hamilton, Ont.

GIRLS WILLING TO WORK ON British Army Orders, knitted underwear. Seamers, plain stitchers and learners. Bright, healthy employment. Good wages. Zimmerman Mfg. Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.

WANTED — HOUSEMAIDS AND waitresses. Previous experience not necessary. Apply, "The Welland", St. Catharines, Ontario.

WANTED—WEAVERS AND LEARners—wages paid while learning; experienced weavers earn high wages. For full particulars apply, The Slingsby Manufacturing Company, Limited, Brantford, Ontario.

FOR SALE.

FOR SALE—FANCY PIGEONS A[illegible] flying homers; prices reasonable. [illegible] Hudson, [illegible] Caroline street south, Hamilton, Ont.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCAtion to train for nurses. Apply, Wellandra Hospital, St. Catharines, Ont.

Sunshine.

Let sunshine in.

Sunshine will keep you young.

The bigger the dose the better.

Better have faded carpets than faded cheeks.

Plenty of sunshine will make the fires of life burn brightly.

Sunshine should be freely admitted to every human dwelling-place.

Let the sunshine in, and hang your daily clothing in the sunshine and fresh air and you will keep well.

Minard's Liniment Cures Dipht

Inspiration in Dreams.

Coleridge must be added to the of authors who have found inspir in dreams, for he himself has t that he composed over 200 li the "Kubla Khan" during a sleep three hours. On awaking he wro down the fragments now existing, but the interruption of a visitor banishe the rest from his mind. The first ide of "The Ancient Mariner," too, was suggested to the poet by a dream of his friend Cruickshank. And Kipling's "Greatest Story in the World" was but the half remembered dream of a commonplace young man.—London Mail.

Good-Bye, Old Backache Nerviline Will Fix Yo

Stiffness is Rubbed Right Every Sign of Pain Disappears

Gee whiz—think of it!

No more stomach dosing needed to cure your lame back.

Every trace of lameness, every of stiffness, every sign of weakness in the back's muscles can be rubbed away for all time to come by good of "Nerviline."

No other liniment can do the work so quickly, can penetrate so deeply, can bring ease and comfort to the back-weary sufferer, as Nerviline invariably does.

Backache isn't the only malady Nerviline is quick to cure. For lumbago or sciatica you would go far to find relief so speedy as Nerviline gives. For chronic rheumatism there are pain-destroying properties in Nerviline that give it first rank. The way it limbers up a stiff joint and takes soreness out of strained rheumatic muscles is simply a wonder.

If you have an ache or pain anywhere, if you have a sore back, a stiff neck, a stiff joint, a strained muscle—if you have lumbago, congested chest or sore throat, just try Nerviline. Rub it on plentifully—it won't blister, it can't do anything but cure you quickly. The large 50c family size bottle is the most economical, of course, but you can, from any dealer, also get the 25c. small size of Nerviline, the king of all pain-relieving remedies.

Arm in Arm With a Tigress.

It is related of Sir Edward Bradford that he once walked arm in arm so to speak, with a tigress. He was out shooting, and, always a fearless sportsman, had come to close quarters with his quarry. He fired, and either the ball failed to take effect, or but slightly wounded the animal. She sprang at him and seized his left arm above the elbow. The pain must have been terrible, but Sir Edward kept cool, and, realizing that it would be death to drag his mangled arm away and allow her to spring afresh at him, he deliberately walked a few agonizing paces until his comrade was able to take aim and kill the brute. Th his courage saved his life, though amputation of his arm at the should proved necessary.

A MEAN TRICK.

(Boston Transcript)

Mrs. Subbubs—Bridget, this butter that you borrowed from Mrs. Nexdore tastes exactly like the butter we sent her for what we borrowed before. I believe it's the very same.

Bridget—Shure, isn't that a mane trick, mum, an' we such reg'lar patthrons av hers.

Know Your Own Stomach. "Spring Tonics" are for those who do not know that Nature must repair wasted tissue from the food they eat. Help Natur to throw off the toxins o a heavy Winter diet by eating Shredded Wheat Bi cuit, a real whole wheat foo that is prepared in a digestible form. Follow Nature's plan—get your strength from a simple, natural food that is thoroughly cooked and easily digested. Try it for breakfast with milk or cream; eat it for luncheon with berries or other fresh fruits; make it your "meat" for the Summer days. Easily prepared, easily digested.

Made in Canada.

VOICES WORTH FORTUNES

When after Nordica's death, it was learned that her estate was worth more than $1,000,000, many were surprised that an opera singer, considering her high expenses, could accumulate such a large fortune. They fail to realize the fact that the big stars of the opera make from $1,500 to $3,000 every performance. To some the offer of a paltry $1,000 would be considered an insult.

The opera season, with its numerous performances, brings the total share of the profits for the stars from $100,000 upward. Then the incidental concerts must not be forgotten, and many of the singers have found this method of adding to their wealth even more profitable than opera singing.

While Nordica was very rich, she was not, by far, the wealthiest of her profession. Melba's fortune has been estimated at $5,000,000. Patti saved about $3,000,000 of her grand opera earnings. When Sembrich retired from the grand opera stage six years ago she was said to be worth several millions. While she has not been in the limelight nearly so long as these women, Tetrazzini is also reputed to be worth a good-sized fortune, for she has commanded $2,000 a performance without any difficulty, and it is known that she is very frugal and saving.

The other high-priced singers, Geraldine Farrar, Olive Fremstad, Emma Eames, Mary Garden, Louise Homer, Schumann-Heink and Gadski, each have their individual fortunes, which have been variously estimated from $100,000 upwards.

To the great Patti belongs the credit for making the voice a gatherer of riches. Others, prior to her day, were content with the glory that their singing brought them. A $1,000 salary for one performance would have been considered a record breaker as well as a crime. Patti found, however, after she had gained her name, that the managers wanted her and that she could get almost any price she demanded. She put her theories to a test with the result that she had the managers virtually bidding for her. Mapleson offered $4,000 and Abbey, with W. H. Vanderbilt as guarantor, made his bid $5,000. Patti showed her loyalty to Mapleson by accepting the smaller sum. Even this amount was regarded as the largest ever paid and looked upon as extremely extravagant. This undoubtedly marked a new era opera salary and the famous stars have had little trouble in getting their demands.

That Patti had good business sense back of her splendid voice was shown by the famous prima donna on many occasions. While her "last" farewell in this country was regarded as one of the big failures of the operatic world, Patti returned to Europe with from $200,000 to $300,000. Apart from the splendid accommodations furnished her en route, Patti's contract called for $5,000 a performance, and, as there were sixty concerts in the series, her combined earnings were $300,000.

Many men who receive $5,000 a year are regarded as doing well, but Patti received this sum for using her voice for forty minutes. This means that her earnings for every single minute were $125, or nearly $31 for every second she was on the stage. Every note she sang during that tour had a value of $3.77 placed upon it.

Patti's career covered a period of forty years, and in that time it was estimated she made more than $5,000,000. She made her debut as a child of seven years in Tripler hall, New York, singing arias from the Barber of Seville, and was regarded as the juvenile prodigy of the day. This was in 1850. Nine years later she made her first professional appearance in New York, singing at the Academy of Music in Lucia di Lammermoor. Her salary was $100 a week. Her fame spread and in two years she was receiving $750 a month. Her annual earnings for the next twenty years averaged from $150,000 to $175,000. During her Argentine trip in 1888 she received $250,000, which was regarded as a remarkable sum.

Melba's voice is believed to have brought her even greater riches than Patti possesses. Her magnificent residence in London, with its rich furnishings, is valued at more than $1,000,000. Her jewels are worth close to another million and she has at least $3,000,000 more in the bargain. When Melba came to this country in 1905 she carried $500,000 worth of jewels with her and had to have two detectives constantly on guard to watch her treasure. During that particular season she received $4,000 a night and sang at twenty performances, making a total of $80,000. In addition to the operatic performances, she sang twenty concerts at the same rate, the four months' work bringing her a total of $160,000.

Melba received a far higher sum during most seasons. An Australian tour alone brought her $210,000 for a five months' trip. She received an offer to return, but turned it down, preferring the quiet of her English home. Melba's work in the last few years has been confined chiefly to concert tours. She made her debut in Brussels in 1887, which shows that it took her only 28 years to make her immense fortune.

Sembrich is another of the older school of grand opera stars whose fortune is said to run into seven figures. She retired permanently from the operatic stage in 1909, but sings occasionally in concert.

While Tetrazzini has been singing for a number of years, it was only about ten years ago that it was discovered that she had a marvelous voice. In 1903 she was singing in Mexico City for $250 a performance. Six years later she was getting nearly ten times as much for her performances in this country and had European contracts that aggregated $500,000 besides. Tetrazzini was hailed as the "new Patti" when she first came here, and she has been able to command Patti prices. Tetrazzini has given all the credit for her wonderful voice to Nature. She claims never to have taken any special care of her throat, but that she spends much of her time in the outdoors.

The value of Geraldine Farrar's voice has tripled itself in the last seven years. In 1908 she was receiving $700 a performance. Now she is reputed to receive three times as much every time she sings. Even before Miss Farrar reached the high-notch salary list, she showed that she was far from being a spendthrift, for she saved $34,000 and returned this amount to her benefactress, Mrs. Bertram Webb, of Salem, Mass. A loan of $10,000 was made to Miss Farrar when she was a struggling musical student. Mrs. Webb recognized the value of her voice and wished her to have the services of some of the greatest music masters. From time to time Mrs. Webb gave the young singer large sums to tide her over critical periods in her career. When Miss Farrar loomed forth as one of America's greatest singers and she had little difficulty in filling the houses, her first thought was to repay her benefactress. She also insisted upon Mrs. Webb taking five per cent. interest. This was six years ago and since then Miss Farrar's earnings have been her own.

Mary Garden is said to receive from $85,000 to $100,000 a season. Her earnings have been high for the last eight years or since she appeared in the memorable performance of Louise at the Academy of Music.

Fremstad, Destinn and Gadski have not received less than $1,000 a performance during the last ten years. It can easily be seen that the earning capacity of their voices has been remarkable, for each of the number has sung in hundreds of operas and concerts. While Destinn's voice has brought her riches, judging from her various experiences, it does not take long for the money to slip from her fingers. Last year it was reported that the castle she had bought at Neuhas, Bohemia, had been seized to satisfy a large debt and everything in the place that was not nailed was removed.

Fremstad has been singing on the operatic stage for more than twenty years. She has always commanded good salaries and is said to be worth a neat fortune.

Mme. Homer has for years been regarded as the highest-priced contralto singer in this country. Contraltos do not receive as large sums as sopranos, but Mme. Homer has been an exception and receives more than some of the sopranos. Her voice brings her at least $1,000 a performance.

Mme. Schumann-Heink recently placed her season's earnings capacity at $182,000. Of this sum, she received $47,000 for making talking-machine records, and the rest was for concert work. Schumann-Heink is still young at 53 and she regards herself as a better singer than ever.

Separate silk skirts, some of them very smart indeed, are being shown this spring, not only in sport effects, but also for dress occasions. This is satin-striped, with black and white checked taffeta.

The discussion had become heated. "Do you want to bet?" shouted Sk'nnum. "I'll stake my reputation on it." "Well, I'll put up a nickel against it," replied Wigwag.

The man who suffers from corns should keep off his feet. Other people should keep off them, too.

Fertilizers for Small Grains

On Account of High Prices Artificial Fertilizer Will be a Paying Proposition This Year.

It is probable that there will be a considerable falling off in the number of acres sown with cereal crops this spring as compared with last year. Although farmers are just as anxious to produce as large crops as ever, both for patriotic reasons and for financial gain, the story of Burns concerning mice and men is as true to-day as when it was written.

With the large number of husky young men who are enlisting from the rural districts for overseas service the farm problem cannot be anything else than acute. The efforts of the Government to secure farm help from the United States has met with only very partial success. The idea that the soldiers should be released from military service during the harvest does not find much favor among the farmers, as it is obvious that many of them are perfectly green and their services on the farm of very little value.

If the farmers of Canada are going to maintain or even approximate the agricultural production of last year it is certain that they must do it by other means than sowing a large acreage. How can it be done, that is the question! The only way we know is to increase the fertility of the soil by the use of an extra large amount of farmyard manure suplemented with appropriate artificial fertilizers—and by making the seed bed the best possible.

In our issue of February 26th, in an article entitled "The Economical Use of Artificial Fertilizers," it was pointed out that when prices were high it pays to use a much larger application of farmyard manure and artificial fertilizer than if prices were low. It is practically certain the prices for grain of all kinds will be at least as good this fall as they were last fall—if not better—so that even if artificial fertilizers are somewhat higher than they were before the war except one's soil is particularly fertile or one can get farmyard manure very cheaply, it will pay to use them.

Oats do specially well in a moist, comparatively cool climate such as is found in many parts of British Columbia.

Cereal crops may be divided into two classes—the deep rooted and the shallow-rooted ones. Wheat and rye belong to the former and barley and oats to the latter. As a rule the deep-rooted crops do not require to be supplied with as much of the mineral fertilizers—phosphoric acid and potash—as the shallow-rooted crops, as, on account of their deeper root system, they have a more extensive feeding area and can make better use of the stored-up fertility of the soil. They are planted as a rule in the fall and are able to develop a fair root system before the soil freezes up.

When wheat and rye are sown in the spring, however, the treatment, as far as fertilizers go, should be practically the same as for oats and barley.

Wheat, on account of its deep roots, is well adapted to the stiffer soils. It does, therefore, well on clays, and can stand extremes of temperature a good deal better than can oats or barley. The latter require a comparatively moist climate and light, friable soil. Rye does best, like other crops, on a rich soil, though it does remarkably well on light poor soils that will not yield a profitable crop of oats or wheat.

When wheat and rye are sown in the fall the only fertilizer treatment they require in the spring is a top dressing of 100 to 150 lbs. per acre of nitrate of soda, if they do not come through the winter well.

If these crops are not put in till spring, what fertilizer treatment they will require all depends on the crop they follow. If they follow corn or roots and these have been given a good dressing of manure and acid phosphate they will not require any manure or artificial fertilisers at all. Again, if they follow clover no fertilizer treatment will be required, as experiments carried on at Rothamsted in England have shown that when mineral fertilizers were used on the roots—once in a four-year rotation—and wheat followed clover, the yield of wheat was greater than when wheat was grown continuously year after year and received an annual dressing of fifteen tons per acre of farmyard manure.

When wheat or rye follow some other small grain crop which has received little or no manure or artificial fertilizers, some special fertilizer treatment is required. One hundred pounds of ammonium sulphate or calcium cyanamide per acre and two hundred pounds of acid phosphate or basic slag per acre will be found profitable on most soils. On the lighter soils when potash is at normal prices it would probably pay to use 100 pounds of muriate of potash per acre as well, but with the price of potash as it stands at present it is better to rely on farmyard manure as a source of potash than to buy special potassic fertilizers.

Barley, as has been said, is a shallow-rooted crop and occupies the land for a comparatively short time. It requires, then, to have its food in a readily available form. Experiments carried on both in Europe and America have shown that this crop stands especially in need of phosphatic fertilizers. It should receive some nitrogenous fertilizer if the preceding crop has been a grain crop, but if it follows clover or roots (if the later have been well fertilized with farmyard manure) the nitrogenous fertilizers should be used but sparingly, as if used in excess they spoil the malting qualities of the crop. Barley following oats or wheat, then, may receive a light dressing of farmyard manure—applied in the fall for preference or well rotted if it is applied in the spring—and about three hundred pounds per acre of acid phosphate.

The fertilizer treatment of oats is practically the same as that for barley, only that somewhat more nitrogenous fertilizers can be used with safety. When barley and oats are grown for fodder, that is to say, when the crop is to be fed green or the straw as well as the grain is to be fed, somewhat larger application of nitrogenous fertilizers can be used than if these crops are grown specially for the grain, but at all times care must be taken not to apply too much, as there is danger of the crop lodging.—From the Canadian Countryman.

Mystery of a Diplomat.

Of disappearances most mysterious was the case of Benjamin Bathurst, who vanished Nov. 25, 1809, while engaged on a secret mission for the foreign office. Vienna was the young diplomat's objective, and, with his friend and valet, in a post chaise, Perleberg, a small northern town in north Germany, had been reached. Here Bathurst supped and slept, awaiting the arrival of fresh horses. Waking, he asked were the horses ready and passed out of the door to make inquiries. Eight people saw him go out, but none ever set eyes on him again. Various theories were set afoot—Napoleon's spies, robbers, illness. In 1852 in the forest near Perleberg a skeleton was discovered with a hole in the skull as from a heavy blunt instrument. Was it that of "the English lord," as Perleberg people surmised?

Those Who Ride.

In all the situations into life which I have looked I have found mankind divided into two grand parties, those who ride and those who are ridden. The great struggle in life seems to be which shall keep in the saddle. This, it appears to me, is the fundamental principle of politics, whether in great or little life.—From "The Young Man of Great Expectations," by Washington Irving.

Any acid spilled upon marble will quickly disfigure and spoil it. Its effect should be neutralized by pouring a solution of any alkali, such as washing soda, borax or ammonia, over the stain at once. Restore the polish by rubbing with powdered pumice stone, moistened with water. It will call for much patience and work to restore it to its first condition.

"Father," said the small boy, "what is a bandit?" "A bandit, my son, is a man who holds up people and depends on physical force instead of legal talent."—Washington Star.

Investment Bargains.

The investor who picks up desirable property when everybody is selling and no one buying will have to wait until a reasonable time to secure his reward. I recall when real estate in several large cities was a drug on the market. Everybody seemed anxious to sell and no one to buy, but the buyers in those periods have realized enormous profits, far greater than one can get in the Stock Exchange.

The man who has money, even if it is but a small amount, can always turn it over to advantage if he will wait for the opportunity. Don't go with the crowd when everyone is wild to buy something, but quietly abide an opportunity when everybody is anxious to unload and buyers are few. At such a time the bargain counter counter opens.

Only One Athens Now.

There is and has been for many centuries only one Athens. But antiquity knew no fewer than nine cities or towns of that name in various parts of Greece, and even in the time of Plautus is was sometimes felt necessary to distinguish the great one as "Attic Athens." It was natural that Greek cities should take their name from Athena, the goddess of wisdom, war-like prowess and skill in the arts of life, who, according to some legends, herself founded the City of the Violent Crown. Others ascribed the naming of the city to Theseus or other mythical kings. The "s" of the termination is a real plural, for the city was given a plural name (Athenai), as being made up of several constituent parts.—London Chronicle.

Dublin's Story One of Strife

Dublin is the subject of a war geography bulletin issued by the National Geographic Society from its headquarters in Washington, which says the revolt in Dublin recalls many stormy episodes in the history of the Irish capital on the shores of the Irish sea, 334 miles northeast of London, and less than 70 miles from Holyhead, the nearest English port. Even its legendary history, going back to the third century of the Christian era, is filled with stories of conflict, one of the earliest being a narrative of the defeat of the people of the surrounding province by the inhabitants of the town in 291.

One of the most tragic events of Dublin's early history is an echo of this hatred of the people of the country districts for those of the city. The occurrence is commemorated in Irish chronicles as the Black Monday of 1209. It was during the Easter holidays of that year, strangely paralleling the time of the present revolt that the Irish of the surrounding mountains rushed down into the valley of the Liffey river, on whose banks Dublin is situated and while the inhabitants were celebrating the religious holiday 500 of their number were killed.

The place of the massacre is still known as Bloody Fields, and for many years, in order to keep alive the sense of outrage against the hill people, the citizens on each anniversary of Black Monday would march to the scene of the massacre bearing banners inscribed with the legend, "A terror to the native Irish."

Even in the early days the vigor with which the people of Dublin waged their internine strife did not lessen the impetuosity with which they entered upon any conflict with a foreign invader. They tore down their churches to secure stones for their walls when preparing for the defence of their city against Edward Bruce, in 1316, and when the Irish Governor who had yielded to the enemy, fell into the hands of the defenders, he was brought to Dublin and starved to death.

One of the most spectacular outbreaks of the sixteenth century was that led by Silken Thomas (Sir Thomas Fitzgerald), a daring young nobleman, who, upon hearing that his father had been beheaded in the Tower of London, raised a large army and marched to the gates of Dublin, where he was admitted by the intimidated citizens. Shortly afterwards, however, when he endeavored to leave the city, he found the gates locked. He made his escape, carrying with him some of the children of the city, and with these as hostages he managed to secure the release of his followers. Subsequently this rebellion was quieted and the leaders were executed at Tyburn in 1536.

It was more than 100 years after the death of Sir Thomas that a conspiracy to seize Dublin Castle was revealed by Owen Connolly on the day before the attempt was to have been made. This was during the rebellion of 1641, and it was Connolly's information which saved Dublin for the king. Cromwell, James II and William III in turn visited Dublin with armed forces.

Another Fitzgerald loomed up as a factor in Irish unrest about the time of the French revolution. He was Lord Edward Fitzgerald, the leader of the United Irishmen, who had received his military training in America, serving under Lord Rawdon in the Revolutionary war. Lord Edward was one of the most picturesque Irish leaders of the eighteenth century, and his beautiful wife, the famous Pamela, was an equally appealing figure in the revolution of 1798, during which Lord Edward was captured and thrown into prison, where he died of wounds received in the struggle with the officers who arrested him while in bed.

A greatly loved Irish patriot and orator, Robert Emmett, headed the revolution of 1803. Emmet, while trying to make his escape, after an abortive attempt to seize Dublin Castle, was apprehended as he was saying farewell to Judge Curran's daughter, to whom he was devoted. William Smith O'Brien, from the south of Ireland, was the leader of the rebellion of 1848, in which Dublin took part. The Fenian society's activities of 1867, both in Ireland and in America, kept the capital city in a turmoil for many weeks.

Dublin Castle, which figures so conspicuously in the city's uprisings, is an unimposing structure, built originally during the first quarter of the thirteenth century. It covers nearly three times as much ground as the United States capitol building in Washington. Another building of impressive size, covering five acres, is now occupied by the Bank of Ireland, but was formerly used as the House of Parliament. The most famous institution of the city is Dublin University, or Trinity College, founded under charter from Queen Elizabeth in 1591.

GETTING AT A SECRTE

Jim Hathaway and I were not only chums, but occupied rooms in the same bachelor apartment house. Jim was a secretive chap, and especially fond of making a mystery of what was an ordinary happening. I poke fun at him for doing so, but this seemed to have no effect in stopping him from continually trying to impress me with his ability to do things without my having any knowledge of them. Then when the denouement came he would assume an air of superiority as much as to say, "I don't go about blabbing of my affairs."

There came a time when I believed that Jim had an affair on hand with a girl. The reason why I came to this conclusion was that he began to show a contempt for women. "The best thing a fellow can do with a girl," he would say, "is to let her alone. By doing so he avoids the expense of theatre tickets and flowers, only to find out later that she's encouraging some other fellow." I was not interested in Jim's love affairs, but I saw no reason why he should take pains to deceive me in the matter. However, it did not trouble me that he thought proper to do so. I was very fond of him and considered his idiosyncrasy of no real importance, not doubting but that I had others myself just as absurd.

Jim and I occupied a common living room, and one evening when we were about to go out to dinner together Jim picked up an envelope that had been left by the postman during the day, unsealed, and took out a booklet advertising some kind of goods. I noticed him looking at it, or some part of it, with apparent interest; then he tossed it in the wastebasket.

The next morning I happened to go to that same wastebasket to recover a bit of paper I had thrown in it containing an address. I stumbled on the envelope containing the advertisement and noticed that it was addressed in a familiar hand. I thought nothing of this, since girls are usually employed to address advertising matter, and was hunting on for my paper when I raked up the advertisement. It gave a list of articles that would alone interest a woman. This set me to thinking why it should have been addressed to a man. While meditating on this I noticed some lead pencil marks on the booklet. They were 8, 16, 7 1-2.

Now, had it not been for what I have said about Jim and his mysteries it would not have occurred to me that these figures were not merely something put there by some unknown person for some very ordinary purpose, but intended for a cipher. First, advertisements of a especial interest to woman are not usually mailed to men. This suggested that the booklet had been received by a woman and had been used for cipher purposes by the recipient. What better method for communication could there be? Whether the figures had a meaning or not, I resolved that if I ever got a girl whose parents would not permit me to visit her I would use this plan of communication.

I tried hard not to pry into Jim's affairs, but the puzzle was too fascinating for me to let alone. Besides, there was the temptation to beat Jim at his own game. What 8, 16, 7 1-2 meant haunted me till I hit upon the fact that the present month was August, the eighth month in the year. The present day was the 12th. Did not the present figures contain an appointment? If so, it was for August 16 at half past 7 (probably in the evening).

I could not quite bring myself to shadow my friend on that evening, but during the next month or so I noticed that he received a number of advertisements on which there were lead pencil marks. I did not try to decipher any of them. Indeed, I had not deliberately tried to decipher the first one. I had come upon it by accident, it had got into my head, and I couldn't get it out till I had solved it. What I did was to buy a wedding breakfast and leave it where Jim could see it. He was above asking me what it was for, so I told him that it was for a friend who was about to be married, adding that I could not name the person since the engagement was a secret.

The reason why I counted on Jim's coming marriage was that it is difficult if not impossible for two men to live together one of whom is engaged without the other knowing it.

Jim never told me of his engagement till a couple of weeks before the wedding. There had been no reason whatever for the secrecy attending the affair except such as influences young couples in similar cases and Jim's idiosyncrasy. The girl's parents were much pleased with the match, and Jim's parents were not living. Jim probably would have kept the secret from me longer, but he wished me to be his best man, and it was proper that he should give me timely notice.

The evening before the wedding I carried the wedding gift I had procured to the bride's home. Jim was there, and when I opened the box in which it was contained Jim started as if he had been shot. I laughed, explained the joke to the bride, and we all laughed together. But I kept them wondering for many months before I told them how I had got on to their secret.

That cured my friend of making mysteries out of very small things. Ever afterwards he was frankness to perfection. As for his wife, I doubt if she had even been so troubled.

Provoking a Husband.

A Mohammedan woman cannot of herself separate from her husband without his consent. He may divorce her with a few words spoken by himself. If she is clever, however, she will take him by surprise at an unguarded moment and contrive to do or say something which will make him so angry that before he can exercise sufficient self control to stop himself he has uttered the wished for words.

Spring Silks.

Georgette crepe, alone and combined with taffeta, seems to make the majority of the new gowns.

Crepe des Londres is a firm, lustrous silk, rather like taffeta in appearance, but with a tiny twill. We have had it before, but it is being shown again with the new spring silks.

Crepes, crepes and more crepes—crepes de chine, of course; crepes faille, crepe fleurettes and jet crepes are some of the fashionable weaves.

One of the pretty dress satins has a suede finish and is very good looking.

"What is the meaning of the word 'purchase,' Tommie?" "Don't know, pop." "Why, suppose I was to give your mother $10 to go and buy herself a bonnet; what would she do?" "Have a fit, I guess."—New York Sun.

Boss—Has that fellow Everbroke paid you anything on account yet? Collector—Only a compliment on my persistence, sir.—Boston Transcript.

This rose taffeta wrap has been designed to suit the color and style of the hour. The plaited ruching of picot-edged silk adds to the bouffant appearance of the already flaring coat.

DOAN'S KIDNEY PILLS

Relieve The Kidneys and Bladder Like Ordinary Medicines Do The Bowels.

When the kidneys get out of order the back is sure to become affected, and dull pains, sharp pains, quick twinges all point to the fact that the kidneys need attention.

Plasters and liniments will not cure the kidneys, for they cannot get to the seat of the trouble, but Doan's Kidney Pills do, and cure the kidneys quickly and permanently.

Mrs. Lizzie Melanson, Plympton, N.S., writes: "I am sending this testimonial telling you what a wonderful cure Doan's Kidney Pills made for me. For years I had suffered so with my kidneys I could hardly do my housework. I used several kinds of pills, but none of them seemed to be doing me any good. At last I was advised to try a box of Doan's Kidney Pills. When I had taken the first box I found relief. I have used five boxes, and to-day I feel like a new woman. I cannot recommend them too highly."

Doan's Kidney Pills are 50c. per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

BITS OF WIT.

POOR TEDDY.

(St. Louis Star.)

"What do you think of the Presidential primaries in Illinois?"

"Honest, it's enough to make an Oyster Bay."

BY DEGREES.

(Judge.)

"My dear, isn't that dress a trifle extreme?"

She—Extreme! Why I put this on in order that you may become accustomed to the one I am having made.

A TIP FROM PAW.

(Boston Transcript.)

Suitor—What makes you think, sir, that I will not be able to support your daughter?

Her Father—The difficulty I've had in doing it myself.

A MISNOMER.

(Browning's Magazine)

Calling an ocean steamer a tramp seems like a misnomer. No tramp needs water to get along on.

A RAKE-OFF.

(Toronto Star)

The important point about Toronto's refusal to pay the Provincial war tax is Major Church's assertion that the Ontario Government levies a war tax, but does not expend it for war purposes. The implication is that the Provincial treasury is trying to get a rake-off in the general excitement.

HEARD AT THE INTELLIGENCE OFFICE.

(Judge)

"Do you know of any cook who will remain in the country?"

"Not unless she is buried there."

THE DIFFERENCE.

(Baltimore American)

"Don't you believe the average woman can keep a secret?"

"Of course, she can; but she don't."

BOBBIE'S OBJECTION.

(Facts and Fancies)

Nurse—Wouldn't you like to go to Heaven, Bobbie, and wear a nice gold crown?

Bobbie—Not if the dentist is going to put it on.

AND LOUD.

(Browning's Magazine)

"Money talks."

"Yes. In the opera box."

COLORED HELP.

(Harper's Magazine)

The One—"What kind of help have you now—colored?"

The Other—Yes, green.

PEDESTRIAN OSCULATION.

(Judge)

"Yes, Sir! I suppose I've kissed a girl on every hundred square feet of this beach."

"Must have been some trouble to keep moving her about."

HOW BLESSINGS BRIGHTEN.

(Browning's Magazine)

Betty—Ho-hum!

Mother—What are you "Ho-humming" about, dear? Isn't the candy good?

Betty—Oh, yes, Mudder! An' de gonner it gets, de gooder it grows!"

LACK OF PREPAREDNESS.

(Judge)

"Pop, what is free speech?"

"Free speech, my son, is merely saying what we please to fellows we know we can lick."

SUPERFICIAL AID.

(Baltimore American)

"He would do anything to help a friend. He is teaching a deaf one now to see words as people speak them."

"Humph! That's mere lip service."

POOR CHILD.

(Life)

"What a lot of baby foods there are these days!"

"Yes, it is a wise child that knows its own fodder, these times."

NOISY.

(Sketch)

Mrs. Nouve-Reech—We went to the matinee at that new theatre that's just been opened the other day.

Her companion—Indeed; and what do you think of its acoustic properties?

Mrs. Nouve-Reech—Well, you know, I thought they were a trifle gaudy myself.

HE DIDN'T KNOW.

(Judge)

"Is that young lady I saw you with the other day your wife or sister?"

"Er—I haven't asked her yet."

CONSTIPATION

Is Productive Of More Ill Health Than Anything Else.

If the truth was only known you would find that over one half of the ills of life are caused by allowing the bowels to get into a constipated condition, and the sole cause of constipation is an inactive liver, and unless the liver is kept active you may rest assured that headaches, jaundice, heartburn, piles, floating specks before the eyes, a feeling as if you were going to faint, or catarrh of the stomach will follow the wrong action of this, one of the most important organs of the body.

Keep the liver active and working properly by the use of Milburn's Laxa-Liver Pills.

Miss Rose Robinson, Amherst, N.S., writes: "Having been troubled for years with constipation, and trying various so-called remedies, which did me no good whatever, I was persuaded to try Milburn's Laxa-Liver Pills. I have found them most beneficial, for they are indeed a splendid pill. I can heartily recommend them to all who suffer from constipation."

Milburn's Laxa-Liver Pills are [illegible] a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, O

GOOD NEWS FOR LOCAL MERCHANTS?

"The T. Eaton Company are planning a million-dollar mail order building for Bayside Park."

The above is from a Toronto paper, and shows how the mail order business is growing.

The people find out what the mail order store has to sell through its advertising.

The people always pay cash for what they get at the mail order house.

In the light of the paid growth of the mail order business through advertising it looks to us that if the local merchants are wise they will use advertising space to ask for a return of the trade the mail order is taking from them.

Any "home merchant" who isn't awake, and fails to tell the people about his wares, should read this startling statement made by the manager of a big Toronto mail order house recently:—

"We have a bureau whose duty is to read the country newspapers. There is not a paper of any consequence in our territory we do not get. The bureau looks over these papers and when we find a town where the merchants do not advertise in the local papers, or where the advertisers do not change their advertisements regularly, we immediately flood that section with our literature. It always brings results far in excess of the same effort put forth in territory where the local merchants use their local paper."

◆ ◆ ◆

PROPOSED PENSION SCALE

A committee of the House of Commons has recommended the following scale of pensions for those totally disabled in the war:— Rank and file, $480 per year; Squad Sergeant-Major and Quartermaster General, $510; Regimental Sergeant-Major, Master Gunner and Regimental Quartermaster Sergeant, $420; Warrant Officer, $480; Lieutenant, $720; Captain, $1,000; Major, $1,260; Lieutenant-Colonel, $1,540; Colonel, $1,890; Brigadier-General, $2,700. Loss of both eyes, both hands, or all fingers and thumbs, incurable tuberculosis, loss of both legs, insanity and permanent leaking valves of the heart will be considered total disablement. For less serious wounds there will be a lower scale of pensions.

Further grants will be made to those totally helpless. The amount will be $250 each year for all ranks up to that of lieutenant, and with an increasing scale for higher ranks. The allowance for children of soldiers of all ranks up to that of lieutenant will be $6 per month for each child, with a varying scale up to the rank of brigadier-general, whose children will receive $10 each. Pensions for children will continue until boys are 16 years of age and girls 17, unless they are mentally or physically infirm, when the pensions will continue until they are 21, or marry before that. When a soldier has been killed his widow will be entitled to 50 per cent. of his pension.

◆ ◆ ◆

THE AGRICULTURAL EDITOR

(The Toronto Globe)

A troubled subscriber to The Globe sends some verses to a contemporary. In one of them he says:

"I talk of 'Ayrshire cows' and 'silos' now,
'Performance tests' and 'average butter yield,'
Though I'd not know a silo from a cow,
If both were feeding in the selfsame field,
(I wonder would The Globe?)"

The silo is far more wonderful than any cow. It requires to be fed only once a year, and for that reason has become a prime favorite in agricultural circles. In feeding the silo soft, green stuff is the most suitable. It would be well for The Globe's troubled subscriber to keep away from the silo when it is hungry.

EDITORIAL COMMENT

"Rain! Rain! Go away,
Come again some other day."

◆ ◆ ◆

Toronto refused to pay the Patriotic tax. E tu Brute! First thing Mayor Church knows someone will agitate to have Toronto's name changed.—Lionhead News.

◆ ◆ ◆

R. E. Truax, M.P., for South Bruce, was the only Liberal from Ontario who voted against his party and his independent vote on this important language question will ensure his re-election in South Bruce.—Chesley Enterprise.

◆ ◆ ◆

We are glad to see that Mr. Truax had the back-bone to vote against his leader on the occasion. His action and that of the western Liberals who voted against the resolution will suggest that such pandering to a fanatical and unpatriotic element cannot be done without risk of losing as much as is gained.—Lucknow Sentinel.

The Ladies of Glamis Work for Red Cross

The following is a list of the work done by the Red Cross Society, since Feb. 1st, 1916: Miss M. McKinnon, 10th Kincardine, 2 pair socks; Miss H. Stanley, 10th Kincardine, 2 pair socks; Miss S. Stanley, 10th, Kincardine, 5 pair socks; Mrs. Wm. Slessor, 10th Kincardine, 2 pair socks; Mrs. R. Cooper, Kingarf, 6 pair socks; Mrs. S. Neil, Kingarf, 3 pair socks; Mrs. F. Gordon, Kingarf, 3 pair socks; Mrs. John Russel, sr., 8th Kincardine, 1 pr. socks; Miss Ada Cunningham, 9th Kincardine, 4 pair socks; Mrs. R. Russell, 9th Kincardine, 4 pair socks; Mrs. Fuller, 8th Kincardine, 1 pair socks; Miss J. Shaw, 8th Kincardine, 6 pairs socks; Miss Maude McKay, Glamis, 1 scarf; Mrs. John Wrightson, Glamis, 3 pair socks; Mrs. McCormick, Glamis, 8 pair socks; Mrs. McIntosh, Glamis, 1 pair socks; Mrs. Gamble, Glamis, 1 pair socks; Mrs. J. Cunningham, Glamis, 26 pair socks; Mrs. T. Splan, jr., Kingarf, 3 pair socks; Miss Coffey, 9th Kincardine, 1 pair socks; Mrs. A. McDermid, Glamis, 3 pair socks; Mrs. T. Percy, Glamis, 1 pair socks; Miss E. Howson, Glamis, 7 pair socks; Mrs. D. Woods, Lovat, 1 pair socks; Miss Annie Currie, Glamis, 1 pair socks; Miss S. McIntyre, Glamis, 6 pair socks; Mrs. J. K. McLennan, Glamis, 3 pair socks; Mrs. N. McFarlane, Glamis, 1 pair socks; Mrs. Allan Robertson, 9th Kincardine, 3 pair socks; Mrs. P. Gilchrist, Glamis, 1 pair socks; Mrs. D. Finlayson, Glamis, 1 pair socks; Mrs. Wm. Stringer, Kingarf, 1 pair socks.

The following donations have been made: Mrs. Thos. Splan, sr., Kingarf, pillows, pillow slips, 50 wash cloths, 125 mouth wipes; Mrs. J. K. McLennan, Glamis, 1 sheet, towels and wash cloths; Miss J. Shaw, 9th Kincardine, 4 slings. Mrs. Deehan wishes to thank her many friends for their generous help in knitting socks for the soldiers. In the past 15 months 325 pairs have been handed in to the society. Mrs. Jas. Cunningham, Glamis, has knit over 60 pairs and footed 20 pairs of socks. Miss Sara McIntyre, Glamis, knit 17 pairs and footed 8 pairs socks. Mrs. S. Stephenson, Glamis, knit 1 pair mitts, 1 scarf, 8 pairs socks and footed 8 pair socks. Others who have knit from 10 to 12 pair of socks are: Miss Howson, Glamis; Mrs. Wm. Robinson, Glamis; Mrs. John McLean, 2nd Bruce; Mrs. McCormick, Glamis; Miss J. Shaw, 9th Kincardine; Miss Alice Gardiner, 10th Kincardine.

Forty-five surgical shirts have been made: Miss M. McIntyre, Glamis, 25; Miss Maude McKay, Glamis, 6; Miss Laura Cunningham, Glamis, 13; Mrs. R. Needham, 9th Kincardine, 1.

Mrs. Deehan will be glad to give yarn to anyone for this great cause.

A Group of Officers 160th Batt.

Lieut. Oliver, Lieut. Rowland, Major Chadwick, Lieut. Parker, Lieut. Cameron

FROM TED. WILHELM

Letter to Mr. A. S. Reyce Describes 71st Batt.'s Trip to England

Dear Friend Gus:—

Arrived here three weeks ago after a two weeks' trip. We left Galt on Wednesday night, March 29th, and arrived in Halifax the next Saturday morning, we stayed on the train till about 4 o'clock Saturday afternoon then we marched to Pier No. 2 where our ship, the "Olympic" was anchored. We were waiting for our turn to get on when our Major came and told us we couldn't go because a couple of our fellows had taken measles on the train, and we had to be quarantined in Halifax for two weeks or more. Well, Gus, if there was ever a bunch of soreheads it was us then. We were put under quarantine right there on the pier and the next day they came around to see if any more fellows had any signs of them but there were not so they let Nos. 9, 10 and 11 platoons get on the ship but kept No. 12 there as the fellows that had them were all from that platoon. On Sunday night we pulled out of the pier about a mile and anchored there till Wednesday morning 9 o'clock when we pulled out, the weather being fine and the ocean nice and calm. It took us six days to come across but we were delayed a day on account of heavy fog. We had to wear our lifebelt all the way as there was big danger of submarines.

When we got near Liverpool we were met by two torpedo destroyers who escorted us back the rest of the way. We had no trouble with submarines but one of the destroyers sunk one on their way out to meet us. We arrived in Liverpool on Tuesday, April 11th. Then we took the train from there to Liphook where we arrived at 4 o'clock next morning. Then we marched from there to the camp 2½ miles with our full equipment and believe me Gus, I was ready to go to bed when we got here. This is quite a large camp. There are 20,000 soldiers here. We live in wooden shacks about 45 men to one. There is a regular city of them here. I enjoyed the trip very much but got tired of travelling near the last. I think I will like this place alright, but as much as I've seen so far give me good old Canada every time. Over half of our battalion are away on a 6 days' leave at present, expect to get mine next week, intend to go to London. It is only a little over 40 miles from here. Well, must close for tonight, Gus. Hope you are well and hoping to get a nice long letter from you soon.

Your old friend.

Office Stationery

BUSINESS Stationery should reveal the spirit of the business for which it is used. An appropriate letter head for a profession would be inappropriate for a mercantile house.

The typographical appearance of a letter head for a doctor should be small, neat, dignified—almost feminine; for a blacksmith, black, rugged, plain; for a vaudeville performer, loud, showy, big; for a bank, rich, dignified, restrained; for a store, neat, practical, harmonious, and so on.

Correspondence paper should not reflect poor judgment. Everything counts in these days of sharp competition.

DADDY'S LETTER

Daddy wrote a letter from the fighting-place last week,
Wrote it from the trenches, where they play at hide and seek;
Daddy says: "The days are bright, the sky is blue as blue,
The birds are singing always, dear, of 'Home, Sweet Home,' and you;
And tell our little curly head, the boy I left behind,
To always do his mother's will and grow up brave and kind;
It's out here in the trenches, dear, with the blue dome overhead,
That you feel that God is watching every step his children tread."
Then Daddy goes on telling of the fine pals he has met,
And how each heart is bound to heart in a sort of human net;
But mother says that Daddy is pretending all is fair,
For he never mentions bullets that are whizzing through the air,
And when we answer Daddy we will sham the same as he,
For our joy will make him stronger in the hour of victory.

News About Town

The prospects for a good hay crop are the best in years.

Tiverton is dear to the heart of one Private who could stay in Walkerton but two days.—Tiverton Watchman.

It has been proved thus far that Col. Allison, whom Sir Sam Hughes describes as the "soul of honor" participated in the shell contract rake-off to the extent of $253,000.

A soldier in the 29th Battery has been moved to write as follows from England in regard to the Bramshott Camp:—

Sure a little drop of water fell from out the sky one day;
It fell on the surface of a lump of mud and clay.
When the war office found it, it looked so sweet and rare—
They said suppose we grab it and place a camp right there.
So they covered it with Canadians, just to make the mud pile grow;
It's the only place you'll find them, no matter where you go.
They sprinkled it with rain drops just to make it nice and rare,
And they called it Bramshott camping ground—they thought we wouldn't care.

+ + +

Boy Scouts.

The members of the Wolf Patrol, Boy Scouts, enjoyed an outing on Saturday down the River. They spent the afternoon fishing, and afterwards cooked their supper in true scouts' style. The patrol consists of Patrol Leader Vernon Tovell, Corp., V. Eidt, Will Ramsey, Bryan McCool, Barry Moore, Leslie Bryce, Wilfred Inglis, Mervyn Forsythe. The Scouts have been taking a course in signalling the past two weeks and are making good progress in scouting.

THE MILITARY SPIRIT

Is Abroad in the Land and Even the Youngsters on the Streets of Walkerton Take to Drill Instead of Marbles

IF SUCH a terrible calamity could possibly happen, that the earth be afflicted in about 10 years' time with a war such as the nations are struggling with today then Canada would be immediately ready with tens of thousands of brave boys willing to defend their country for if this titanic struggle has no other good effect it is at least instilling into our boys and girls a fervid patriotism which we believe will not fade away as long as earth remains.

One of the proofs of this is to be seen every day if we but watch the kiddies on their way to school. Here is one small laddie, about six years old, in full uniform even to the badge of the 160th on his baby neck. On being spoken to he pushes his cap back from his damp curls, gives a flourish with his swagger stick, and this conversations ensues:—

"Well, Laddie, you're a fine soldier, aren't you?"

"Yes."

"What battalion do you belong to?"

"The 160th, just 'listed Saturday afternoon and I've two colts at home my father give me, nice colts too, not goin' to die neither."

"What are you going to do with the colts when you go to the war?"

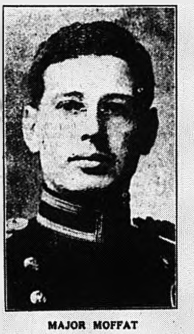
"Oh! Guess I'll ride one and lead the other!" And thus the talk runs on, his little mind so full of war news that he is the making of a fine soldier and if there is no war when he grows up, he will be ready, at any rate, to fight the wrongs that ever exist.

Another embryo man comes from a home where there is no money to spare for tiny soldier suits so happily makes his own puttees by winding rags around his thin little legs and salutes in real soldier fashion when accosted by his elders.

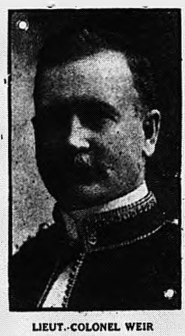
But the funniest and best of all the recruiters was a noble little band of boys on the march—a diminutive lieutenant at the head, followed by five small soldiers in civilian dress, one with a bugle, another with a wee drum, two others carrying nothing but needing all their energy to keep up with their leader and at the rear "Little Dan comes last" carrying the Union Jack, in reality "An old bit of bunting only an old colored rag" for it had braved through many days a strenuous life in the small boys' hands.

Suddenly the leader faced his small company and in a shrill, childish voice shouted "Halt" and they halted! Now came the command "Attenshun" and they attenshuned. The next in order was a scathing rebuke from the youthful leader "Now I don't want no more foolin' from you fellers, when I say quick march I mean quick march and if you fellers don't do it you're goin' to get a touch of this." Here he significantly pointed to a crude wooden sword suspended from his belt. After pausing a moment for them to realize the dire meaning of his words he suddenly turned on his heel and gave the command "Mark Time" in a voice not outrivalled even by our Lieutenant Rowland and they marked time. Then "Quick March" and they quick marched with bugle blowing, drum beating and flag bravely waving. After a block or two their number was greatly increased by raw recruits who were accepted or rejected according to the whims of the leader.

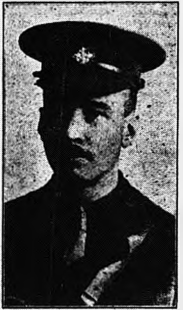
Senior Officers of the 160th (Bruce) Battalion



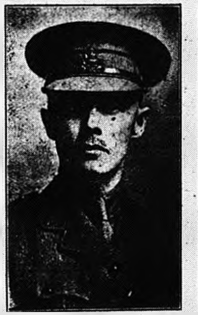
MAJOR MOFFAT



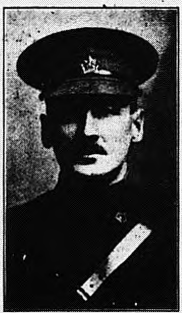
LIEUT.-COLONEL WEIR



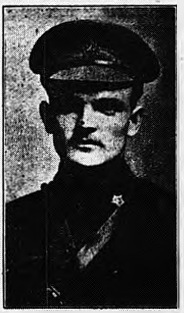
MAJOR A. W. McNALLY



CAPT. SHAW



CAPT. TODD, Q. M.



LIEUT. WHITEHEAD

A June bride? Then you may get your announcements or invitations tastefully printed at The Telescope Office.

Advertising is part of the news these days. Readers can always tell the wide awake stores by the advertisements.

The Chesley Enterprise says: The Enterprise will get in line with the other newspapers of Bruce and Grey and after July 1st the price will be $1.50 per year payable in advance.

The wet harvest of 1916 and wet spring of 1916 will make many farmers see the necessity of more tile drainage. Many Carrick farms are flooded that might be dry if properly drained.—Mildmay Gazette.

Chesley sold its $22,600 worth of 5½ per cent. hydro electric debentures to C. J. Nickle, K.C., in trust, at par.

The membership of Wesley Church, Chesley, is 246 and the givings to missions this year amount to $727.70 or nearly $3.00 each.

The Medical Officer—Not much wrong with him: Give him a Number Nine pill.

The Orderly—I'm afraid we're out of "Number Nines," sir.

The Medical Officer—Then give him a Number Four and a Number Five.—London Opinion.

Hanover citizens entertained about 350 officers and soldiers of the 147th Battalion last week. Owing to farmers being busy seeding there was not a large attendance from county points. The program consisted of signalling exercises, laying telephone wires, drills and other military performances.

Members of the Canadian expeditionary force travelling in uniform will hereafter be able to secure half-rate fares on the railways. Certificates are issued to the men by their officer commanding, and these must be produced when purchasing transportation. The new ruling applies to officers as well as men, and officers travelling on duty are required to secure certificates before departure.

APPRENTICE WANTED

(Paisley Advocate)

It is not very often we have given our readers a paragraph relative to The Advocate and its business, but the position we are in at present regarding help in the printing office prompts us to write a paragraph with a view to inducing a boy to become an apprentice. Since the writer became publisher of this modest local journal quite a number of young men have gone out into the bigger world after learning the printing or getting their first experience in newspaper work in The Advocate Office, the experience so gained enabling them to creditably fill positions elsewhere, also take advantage of opportunities to rise. Not only have these boys become successful tradesmen and journalists, but have also attained to prominent places in the life of those communities in which they became located. We hope we may be pardoned for mentioning a list of our graduates:—John Nelson, managing director of the Vancouver Daily World; O. H. Nelson, publisher of the Prince Rupert Journal; the late Geo. D. Young, of the Herald, Park Falls, Wis., and his successor, Lorne McGregor; David McDonald, publisher of The Advance, Elmwood, Man.; A. E. Quayle, editor and proprietor of The Sun, Carmangay, Alta.; Hugh Darroch, The Advocate, Ogema, Sask., and William George, who has a half interest in The Free Press at Wilkie, Sask.; Robt. Elliott, in charge of a department in a large printing office in Toronto, who is president of Toronto Typographical Union; Reuben Wittman, a foreman in the office of a daily newspaper at Moosejaw, Sask.; Jas. Sparrow, a skilled linotype operator, and Chester Pickard, who is deaf and dumb, but able to hold a steady job in Toronto offices. Our object is to point out to boys and parents of Paisley that an apprenticeship course in The Advocate office has given all these young men a good start in life, and will do the same for others. Our latest recruits have enlisted as soldiers, and the only man left on the staff desires to also don the khaki. We therefore require another apprentice, and will give one every opportunity and encouragement to attain success.

Under the caption "Wiarton not Known," the Echo dirged half a column last week. The Editor didn't explain why he didn't do his "bit" by submitting an article from Wiarton for the patriotic issue, neither did he remark that Wiarton, a town of more than 2,000 population, contributed about a score of recruits to the 160th—Lionhead News.

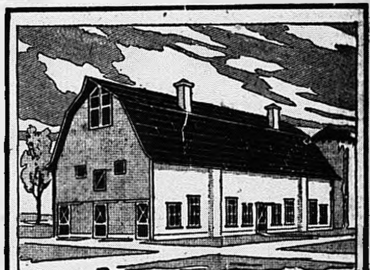
CANADIAN NORTHERN ALL THE WAY



The foundation is not the most important thing

True, you can't have a good barn without a good foundation but don't forget either that the roof has to stand most of the punishment. Upon it falls the burden of resisting the destructive influences of weather and changing seasons.

Now, the question is "Where am I going to find a roof which will meet these conditions?" Certainly not in wooden shingles which have rapidly deteriorated during the past few years. Not in anything so perishable as wood, nor yet iron, which lets in driving rain, but rather in a permanent mineral composition such as Brantford Roofing.

Now, let us look at a section of Brantford Roofing. First, you notice it has a pure, long-fibred felt base. This is thoroughly saturated with a filler coat of asphalt or mineral pitch. Then it is given another coat. Finally, the surface is thickly covered with crushed slate. You can imagine what a job rain, snow, fire or heat would have penetrating a roof like that. As for comparing

Brantford Roofing

"Nature's Waterproofing"

with shingles on the score of permanency, or protection, or appearance, or even economy, there is no comparison. You put a Brantford Roof on once, and it will last as long as the building; it will always look well and it will never need repairing.

Why not let us send you samples, also a copy of our booklet which explains how Brantford Roofing is "always on the job". Or, if you will give us the dimensions of your barn or house roof we will gladly submit estimates without charge or obligation.

CROSS PURPOSES

Mrs. Austin knew nothing of these soaring dreams, which only awaited a word from her lips to become serious intentions. She had no particular ambition on Frank's behalf; in fact, the young squire and his surroundings seemed to her almost ideally perfect. The very heaviness of life at Culverdale pleased her; there was something solid, respectable, and sincere about it; a sense of prosperous restfulness and security deeply rooted in the earth—that she found charming —for a fortnight. She liked to walk with Frank under his spreading trees, and call up faint visions of wives and sisters of by-gone Leicesters, who had known the great trunks as tender saplings, and lived and died under their gradually widening shadows. She could even find names for a few of these phantoms, for she had been to the neat little church (Frank's father had restored it), and had seen their monuments, with urns, and cherubs and festoons of marble drapery upon the walls. It was strange to look at Frank, with the sunshine glancing through a little lancet-window on his head; and to think that he too would have a tablet on those neat, cold walls one day, and that other guests would stay at the hall, and come on Sundays, and study it during service time. Frank, at her elbow read the responses, with a consciousness of his importance to the Established Church, which might have been absurd if it had not been so simple and honest. He sat through the sermon in an attitude expressive of deeper interest than Mrs. Austin found practicable. How was she to know that the whole of that discourse, as the young man heard it, was about herself?

For her own part, she had dreams; but, less happy than Frank, her dreams were of the past instead of the future. When Gilbert South had asked her if she remembered the old time at West Hill, she had answered, "Perfectly." It was quite true; the picture was there, but it had not been called up for years as his words called it up. Even when he did not speak, the knowledge that it was continually in his thoughts seemed to give it a kind of independent existence. Mrs. Austin found herself recalling it in idle moments, and dwelling on all manner of little incidents and details, which had been thrust into the background by later events. The old house and garden rose up before her as she knew them in her childish days; the gateway hung with ivy, the apple-tree under her bedroom window, warped, and leaning away from the strong west winds; the countless blossoms of narcissus and daffodil in early spring. She remembered the hoarse roar of the sea as she lay in bed on stormy nights, the shrieking of the hurrying gusts, the fierce lashing of the driven drops upon the pane, and then the stillness and the rain-washed sweetness of the morning when she woke. It all came back to her, even to the tufts of fern, and the small green leafcups growing on the garden wall; but it came back with that peculiar charm of tender remembrance which, combining many impressions of that which we have lost, creates one more beautiful than all. She saw it with a deeper color in the sea, a wilder splendor of sunsets, a pearly clearness in the morning sky, and a wonderful purity in the lucid depths of air. More than once since she came to Culverdale, it had chanced to her, falling asleep at night, while poor Frank was seeking his fortune in the stars, to dream that she saw Gilbert coming toward her along the grassy path. It was almost impossible to wake from such a dream, and not to look with curious interest at the real man when he came down to breakfast.

With all these preoccupations, it was hardly surprising that Mr. Austin did not give much thought to Tiny Vivian, beyond a vague and general good-will, which the girl did not return. Tiny had never changed her mind about Mrs. Austin. "I said I shouldn't like her, and I don't," she triumphantly repeated, one day as she stood talking to Frank.

"It's a fine thing to be consistent, isn't it?" said Frank, dryly.

"It's much better than changing one's mind forever. I can't see anything so very wonderful about her. Of course, she has been good-looking, but so have lots of people, according to what they say. And anybody might talk in that affected way, as if her words were much more precious than anybody else's. It makes me cross."

"So I see."

"I could talk like that, and walk like that too! Look here." And Tiny swept round the room in an imitation of Mrs. Austin, which would have been very tolerable to anybody but Frank.

"Oh, of course!" he said. "That's always the way. Let one woman get hold of another, and one knows what to expect."

"And pray what does one expect?"

"Well, neither justice nor mercy. I suppose you can't help it."

"Oh, indeed!" said Tiny. "Then I should like to know what Mrs. Austin says of me!"

"As far as I know she doesn't say anything," he answered, coolly.

Tiny was pained at Frank's manner, but she looked him in the face and smiled only the more resolutely. "No," she said, "of course she doesn't. That's just what I say. She's awfully stuck up and cold. I can quite understand her jilting Mr. South."

"How do you know she did jilt Mr. South?" he inquired, in an irritating tone.

"Why, Frank, didn't she go and marry that other man? Of course she jilted him, and she'd do it again just as likely as not, only I hope he won't give her the chance. He's worth fifty of her! Oh my goodness!" Tiny exclaimed, with a burst of defiant laughter, "what a regiment that would be!"

It was quite right that Tiny should speak up for Mr. South, since but for him she would have stood a chance of being somewhat neglected. Gilbert, however, would not suffer that. Apart from the fact that he found Tiny very fascinating, with her great eager eyes, her quick smiles, and the supreme charm of being still in her teens, he could never endure to see any one slighted. His nature was sweet and kindly to the core, and he was always ready to give the sympathy, which, to say the truth, he required rather lavishly. He liked to talk about himself in tones of confidential melancholy, slightly dashed with bitterness. But he would talk to you just as readily about yourself, showing a gentle warmth of interest which was flattering and agreeable. This kind of thing was new to Tiny. Frank was not in the habit of saying much about his inner feelings, and certainly would not have known what to make of Tiny's if she had attempted to express them. Perhaps the girl had been less conscious of having such feelings to express before Mr. South came. It was new to her, too, being accustomed to play a subordinate part, in consequence of youth and inexperience, to meet with some one who considered youthful impressions of far greater value than the dull and blunted opinions of middle age. The squires and rectors about Culverdale did not express such views, nor did their wives and daughters set such value on the artless ideas of a girl who had been nowhere and known nobody. Tiny, in a simple, unthinking way, had loved the country lanes and meadows among which she had been brought up; but with Mr. South's arrival came a quickened consciousness of their beauty and of her feelings about them. She was already a little less simple in consequence of his worship of simplicity, and her great brown eyes were more eager, and sometimes more thoughtful.

The time passed on till Mrs. Austin's visit was within three days of its close. She was to leave Culverdale on the Thursday, and this was the Monday evening, when a garden-party at the house of some friends of the Leicesters ended in an impromptu dance. Gilbert came up to her as she sat fanning herself, and watching the revolving couples. She shook her head in answer to his request. "Don't ask me," she said. "I haven't danced for years." And she glanced, not without a touch of amusement, at Frank, who had already been rejected, and who stood a little off, very erect and melancholy.

"Why not?" said Gilbert.

"My dancing days are over," she replied simply. "Go and dance with some of these young people. I see plenty of pretty girls who will be quite ready for a new partner."

He neither moved nor answered, and she turned her head and looked up at him from her low chair. He stood by her side with downcast eyes, pulling his moustache with what would have looked almost like an air of irritation, if she had not known that he was never really out of temper. His expression and attitude remind her of old days, when he was apt to be offended for a moment because some one had laughed at him and he never liked to be laughed at. But after a brief pause she looked at him more attentively. Old time had taught her to read Gilbert's face like an open book more readily than any other face on earth, yet there was something perplexing in it now. Did he care so much to dance with her? She leaned back and waited, knowing that he was sure to speak before long.

"It is always the same thing," he said, presently. "This is over, and that is over. And, when I remember you, everything was just beginning."

"But that was a long while ago—as I think we have frequently remarked."

Gilbert's eyes were fixed on a bit of scarlet geranium, which had fallen on the floor. "Yes," he said, "I have missed everything somehow."

"One would think you were a second Rip Van Winkle, you seem to find it so hard to realize the lapse of time. You haven't by chance been asleep for a dozen years or so, have you?"

"Upon my word, I don't know. I think perhaps I may have been." He moved the bit of red blossom with his foot, and studied it under its new aspect. "Asleep and dreaming, perhaps," he said, in a low voice.

"Well," Mrs. Austin replied, "as far as I am concerned, there is no great difficulty. Since you know the year in which I was born, you have only to buy an almanac, or to look at the top of a newspaper, and I think you will be able to calculate that I am thirty-seven."

"Oh, I know that very well. You will not let me forget it."

"Will not let you forget it? Could you forget it if I would let you?"

"No," said South, lowering his voice still more, "I don't suppose I could. I have learned my lesson, I think. But I can swear to you that I never remembered it till you taught me."

The music stopped abruptly as he spoke; and seemed to make a sudden vacancy in the air, into which there poured a confused murmur of voices and sweeping of dresses as the dancers strolled by. Among them, with a carmine flush on her soft brown cheek, went Tiny Vivian, and raised her long lashes for one brilliant glance as she passed. "Miss Vivian looks especially well to-night," Mrs. Austin remarked, looking after her, and Gilbert murmured some reply, but the expression which had perplexed his companion deepened on his face. Her attention was distracted for a moment by the arrival of the master of the house, a stout, white-whiskered old gentleman, who benignantly expressed the opinion that it was a pleasant sight to see the young people enjoying themselves. When she had agreed with him as completely as he could wish, she looked quickly round, but the tall figure had vanished from her side.

He had gone away to follow once more a useless round of thought which had grown drearily familiar to him of late. He was haunted by the memories which he had called up. He had tried to bring them to life again, and instead they flitted around him like mocking ghosts, to be seen, but never to be touched. Those happy days in Cornwall were like the opening of a poem, but it had ended in the flattest and feeblest prose. At twenty he was to have been a hero; at thirty-nine he was nothing, and knew that he never would be anything. The experience was not remarkable, but in most cases the contrast is rendered endurable by the gentle influence of time. We become accustomed to it before it is so terribly defined, and half forget the splendor of the starting-point before we reached the pitiful goal. But South was not so fortunate. He saw them both, and saw them always, in Mildred's eyes.

As he stood by the door gazing idly round, his glance suddenly encountered Tiny Vivian's. She looked at him as if she dimly divined his trouble, but turned away her head the moment he noticed her, and yet that swift glance, with its vague proffer of sympathy, came like a ray of light into his dull perplexity. Tiny's eyes, at least, had no reflection of a failure.

It happens occasionally that an unexpected chill will suddenly depress us, an undefinable blight which seems to come from nowhere in particular and to be everywhere. The weather may have something to do with it; but the chill is within as well as without, and the outward aspect of things can only emphasize its dreariness.

Something of the kind befell the inhabitants of the Manor-house on the Tuesday morning. Every one was dull, the sky was clouded, and the world seemed to have grown old. Gilbert South had a harassed and weary expression; Tiny owned to a headache; Mrs. Leicester was worried by the knowledge that fifteen people were coming to dinner, and that she must keep awake all the evening; and Frank was conscious of nothing but the shadow of Mrs. Austin's approaching departure. Mrs. Austin herself was inclined to think that she had more than enough of Culverdale. She had never known a place which depended so much on the sunshine for what beauty it possessed, and, in the uniformly diffused shadow, the low lying park and the meadows with their lines of hedge and ditch oppressed her with a sense of unendurable monotony. There was really nothing to distinguish one inclosure from another, unless it were the presence of cows or sheep. One would have said that the soil of Frank's inheritance was heavy with the dullness of many generations, which rose on sunless days like an exhalation, not precisely poisonous, since good family feelings and respectable virtues would take no harm in it, but far too dense for winged and delicate fancies. Consequently, there was no chance of escaping from it even in thought. In truth there seemed no limit to its influence. Mrs. Austin, while she dressed, looked across the river to the village and saw how the church stood solidly planted among its white grave-stones, and pointed, with a sharp little spire to a gray and dreary region on high. It was hardly an encouraging prospect.

Frank, poor fellow, suffered from her depression. He was too closely connected with his surroundings to be a congenial companion on such a day; his acres burdened him and dragged him down, and he found her not unkind, but languid and cold. Gilbert South might have called up other scenes and times by the mere sound of his voice, but he was silent at breakfast-time, and disappeared almost immediately afterward. It was vaguely understood that he had important letters to write. And, after all, Mrs. Austin was not very sure that she needed any company. As she sat in the drawing-room turning the pages of a novel as an excuse for silence, she half-unconsciously followed a thread of thought which stretched backward to her girlish days and onward to her future. She was still pursuing it in the afternoon when she drove with Tiny Vivian to the neighboring town to make some purchases for Mrs. Leicester.

The little town remained in her memory as a picture, as places sometimes do, which being seen but once, in one mood and under one aspect, are not blurred and confused by conflicting impressions. The sullen clouds were as much a part of it as the foot-worn pavement; and a man with an organ, grinding a tune which had been popular a season or two before, was just as important as the vicar who went by with a bundle of little tracts, and bowed to Miss Vivian. The carriage stopped and went on as Tiny directed, the tradesmen started out of their shops as if somebody had pulled a string, and stood bareheaded and smiling at the door while she consulted Mrs. Leicester's list of commissions. At one place she went in, and Mrs. Austin was left alone in a little square. The town hall was there, erected MDCCCXLIII.; there was also a drinking-fountain, with an inscription which she could not read. The great clock overhead struck four like a knell, and startled her just as she was thinking that Gilbert South certainly was not a hero, and yet —— And a moment later Tiny came out and said "Home" to the coachman.

They did not talk much as they drove back. When the lodge-keeper swung the gate open at the sound of their approach, it occurred to Mrs. Austin to wonder what Tiny had been thinking about so intently all the time.

That evening, after dinner, South came to her and stood for a few minutes turning over some photographs which lay at her elbow. One of them was of a place which he knew and she did not, and in answer to a question of hers he described it. He pressed his hand on the table as he spoke, and a white scar across one of his fingers stood out more prominently and caught Mrs. Austin's eye.

"That cut of yours left a mark," she said, when he had finished. "How frightened I was! do you remember?"

Gilbert looked first at his hand and then at her, with a strange, startled expression, almost as if he felt a throb of pain in his old wound. "Yes," he said, "I remember." And all at once the color came into his face as if he were a boy again. "I was cutting a stick for your brother Jack," he added hurriedly, "and the knife slipped. Your mother tied it up for me."

(To be continued.)

Girls in Korea.

Girls in Korea have no names or what would be considered names in the western world. There are no Marys or Mabels or Ruths. The little ones are given pet names at their birth, and these they bear until they are ten years old, after which they are no longer used. After her tenth birthday the young woman is known as "Mr. Kim's daughter" or "Mr. Kim's girl baby." The latter title is considered the more honorable.

If there are several daughters in the family they are distinguished by such words as "big" (for the eldest), "second," "third," "fourth," etc. After marriage they are known by their husband's name and title, with the word "house" affixed. They may also be distinguished by the name of the place from which they came when marrying, as "Mrs. of the House of Kim, the young lady who came from Koug Jo."

SUNDAY SCHOOL LESSON

May 28, 1916. Lesson IX. The Council at Jerusalem.—Acts 15: 1-35.

COMMENTARY.—I. The occasion for a Council (vs. 1, 2) Jerusalem was the great centre of the Christian faith and was Judaistic in its prejudices. Antioch was the centre of Gentile Christian influence. The church at Jerusalem was solicitous for the purity of the Christian body everywhere, and, receiving the impression that the Gentile converts at Antioch were not fully in harmony with the principles of Christianity because they did not observe Jewish rites, some tried to convince them that they could not be saved without keeping the law of Moses. Paul and Barnabas were at Antioch and strongly opposed the teaching of the men who came from Jerusalem, but were not able to convince them that any one could be saved who did not conform to the Jewish rite of circumcision. The church at Antioch decided that it was best for Paul and Barnabas and others of their number to go to Jerusalem to confer with the apostles and elders there, that a decision might be reached on the question under dispute. If the matter could be settled satisfactorily, the unity of the church would be assured; otherwise a division seemed inevitable.

II.—The Discussion (vs. 3-21). The delegates set out on their three-hundred-mile journey to Jerusalem, going along the Mediterranean coast through Phenicia and then through the plain of Esdraelon and Samaria, declaring as they went the salvation of the Gentiles. The church at Jerusalem received them cordially and to them the apostles related what the Lord had done by them among the Gentiles. The converted Pharisees were strong in their belief that the Gentiles ought to keep the law of Moses. This discussion was informal and took place before the convening of the council itself. When the council met, the different views were stated by their respective advocates. Peter then made a plea for Christian liberty based upon his experience in connection with the conversion of the Gentile Cornelius. The Lord made no difference between the Jews and Gentiles, honoring their faith by purifying their hearts. Both classes were to be saved by the grace of the Lord Jesus Christ. Paul and Barnabas related before the council that the Lord had wrought miracles among the Gentiles through their ministry. At this point James, our Lord's brother, who had charge of the church at Jerusalem, and who presided at the council, himself a Jew, gave an address in which he gave it as his judgment that the Gentiles should not be required to observe the Jewish law further than to refrain "from pollutions of idols, and from fornication, and from things strangled, and from blood."

III. A Decision Reached (vs. 22-29). 22. then pleased it the apostles and elders—The judgment, or opinion, expressed by James, became the decision of the council with no record of a dissenting voice. to send chosen men of their own company—It was fitting that men from the Jerusalem church should convey to Antioch the decision of the council, that it might come to the church there with full authority. Paul and Barnabas and their fellow delegates would report by word of mouth, but the men from Jerusalem would bear the official report of the council. Judas ... Barnabas—This man is not mentioned elsewhere in the scriptures. He may have been a brother of Joseph Barsabas (Acts 1:23). Silas—Called by Paul (2 Cor. 1:19) Silvanus. He became one of Paul's fellow laborers. among the brethren—At Jerusalem. 23 wrote letters—the decision of the council was put in writing so that there could be no confusion as to its nature. apostles and elders and brethren—Both the ministers and the laymen joined in this communication unto the ... Gentiles in Antioch and Syria and Cilicia—It appears that the perplexing question of requiring the Gentiles to keep the law of Moses had not extended beyond the regions here named. Syria was the country lying north of Palestine. Cilicia was a region lying west of the northern part of Syria and occupying the southeastern part of Asia Minor. 24. certain which went out from us—Those who had brought confusion among the Gentile converts had gone out from the church at Jerusalem, but with no authority to teach that they must keep the law of Moses. Subverting—This is a strong word in the Greek and has in it the idea of overthrow or devastation. gave no such commandment—"Gave no commandment."—R. V. The church at Jerusalem had not given those teachers any authority whatever. In their zeal for what they considered the essentials of religion, they took a course that threatened to retard the progress of the gospel. They believed so thoroughly in the teachings they were advocating, that they did not think they needed special authority.

25. It seemed good unto us—This form of expression was commonly used to state that a deliberate body had reached an agreement. Being assembled with one accord—"Having come to one accord."—R. V. Our beloved Barnabas and Paul—These words show the high esteem in which the Christians at Jerusalem held the apostles to the Gentiles. 26. Have hazarded their lives—The missionary journey that Paul and Barnabas had recently completed had exposed them to many great dangers. Indeed Paul had been stoned and left for dead in Lystra. For the name of our Lord Jesus Christ—The apostles had declared in unmistakable terms that Jesus was the Messiah and the common Lord of Jews and Gentiles. 27. We have sent .... Judas and Silas—These "chief men" would give, by word of mouth the result of the deliberations of the council. 28. It seemed good to the Holy Ghost, and to us—The Holy Spirit had guided the members of the council to a decision, and they were fully convinced that it was the mind of the Spirit. 29. Meats offered to idols—In idolatrous worship animals were slain in sacrifice to idols, and the meat was sold and used for food. In abstaining from this food the Christians would refrain from recognizing pagan gods. From blood .... things strangled—Men were forbidden to eat the blood of animals (Gen. 9: 4) before the call of Abraham, for the blood is the life. Animals that are strangled retain the blood, hence the command to abstain from eating blood would forbid the use of strangled animals as food. The command of Gen. 9: 4 is a general command and not one to Jews alone.

IV. The effect of the decision (vs. 30-35.) 30. Dismissed—Sent forth on their mission. Gathered the multitude—All the Christians of Antioch were naturally interested in the decisions of the council. 31. Rejoiced for the consolidation—The consolidation would be felt both by Jews and Gentiles, by the former because they knew how much was to be asked of their Gentile fellow worshippers; by the latter because they were declared free from the yoke of Jewish observances.—Cam. Bib. 32. Judas and Silas .... exhorted—These prophets from Jerusalem were able to give comfort to their brethren at Antioch, and their words confirming the action of the counsel were impressive. 33. They were let go in peace—The thought is that the Christians at Antioch dismissed Judas and Silas with a prayer that the divine blessing might be upon them. 34. 35. Verse 34 is omitted from the Revised Version because it lacks the authority of the best ancient manuscripts. That Silas remained at Antioch, however, is clear from v. 40 of this chapter. Paul and Barnabas remained at Antioch and labored for a while before starting on further journeys.

Questions.—What great question was perplexing the church? With whom did Paul and Barnabas contend? What did they finally decide to do? Who took part in the discussion at Jerusalem? What were some of the arguments presented? What opinion did James express? What did the church decide? Who were sent to Antioch? What was stated in the letter they carried? How was the decision received?

PRACTICAL SURVEY.

Topic.—Christian concession.

I. Inspired by prophecy and experience.

II. Extended for the promotion of piety.

I. Inspired by prophecy and experience. It was inevitable that the claims of Judaism and Christianity should come into conflict in order that the contrast between spirituality and formality in religion might be made plain. The controversy began at Antioch where Paul had many supporters. The point of contention was the claim asserted by a small section of the Jewish church at Jerusalem, or Pharisaic spirit to impose on the Gentile converts the obligations of the Mosaic law. Those Judaizing brethren assumed an authority that they did not possess. Their position was reactionary. It aimed at the reestablishment of circumcision as the condition of salvation, the going back from the principle of an internal, to that of an external religion. Paul's special mission to the Gentiles forced the matter upon the attention of the church. His declaration had gone forth that God had opened the door of faith to the Gentiles. The object of the counsel at Jerusalem was to clear away all prejudice and ignorance, every groundless opinion which stood in the way of the progress of truth. Paul had reverence for Moses—a conviction of the divine origin of the law, of the inspiration of the prophets, of the infallible authority of the scriptures, as much as his opponents had. He had a deep insight into the doctrines of divine grace, which they had not. The church at Antioch was not obliged to consult the church at Jerusalem, but it was proper to do so. Paul desired to let the leaders of the church know exactly what he had been preaching. He believed he had a commission from Christ to preach His gospel wherever he found souls to be saved. The spirit of brotherly love and faith pervaded the church council. They had no conception of church authority apart from God's Spirit. There was no assumption of superiority on Peter's part. He spoke strongly, but with deference to the judgment of all. Paul represented the Gentiles and missionary work. Barnabas the church at Antioch. James summed up the matter and gave his judgment. That first church council affords an example of Christian prudence, brotherly love and wisdom under inspired guidance. Peter's words were weighty, seeing that God had revealed directly to him the relation of the Gentiles to the gospel. He would have been intensely Jewish but for his experience in the conversion of Cornelius. The fact that the Gentiles had received the Holy Ghost, Peter considered to be a significant proof that God was pleased to save them.

II. Extended for the promotion of piety. The council of Jerusalem made very clear the distinction between liberty and authority in their relation to each other in the Christian life. The testimony of the Spirit in the facts rehearsed was plainly the voice of God to the apostles. Discussion was full, impartial and thorough. There was in Paul a noble spirit of conciliation as to methods and usages. He who had made havoc of the church now kept it together. The Council wisely met the two-fold danger, which confronted the church, by declaring that the old forms were no longer binding, but that Christian liberty ought to be set under safe, prudent and mutually accepted rules and restraints, which were necessary for the preservation of social intercourse between Jewish and Gentile brethren. Appeal to prophecy, together with the evidence that God was moving in the matter, settled the controversy and provided for established spiritual liberty. Threatened schism in the church was avoided. Such was the method of settling the first controversy in the Christian Church. Amid great dangers the least possible hurt was done to the reputation of Christianity. The decision of the Council took the form of a recommendation rather than a command. The letter, which was sent to the church at Antioch was most wisely and carefully constructed. It avoided the details of of the controversy or any report of the discussion of the council. It accused no one, but by implication supported the position of Paul. It effectually checked all agitation by the Judaizing party. T.R.A.

THE OWL A SORT OF A CAT.

(Philadelphia Star)

A woman selecting a hat at a milliner's asked, cautiously: "Is there anything about these feathers that might bring me into trouble with the Bird Protection Society?"

"No, no, madam," the milliner said.

"But, did they not belong to some bird?" the woman persisted.

"Well, madam," the milliner returned, pleasantly, "these feathers are the feathers of a howl and the howl, you know, madam, seein' as 'ow fond 'e's of mice, is more of a cat than a bird."

"Like does not always produce like." "How do you mean?" "I mean it is quite possible to sow wild oats and reap a crop of lemons."—Baltimore American.

MORAL EFFECT OF VERDUN

The French have had two months to prepare, to match guns with guns and men with men, and for more than half of that time there has been no German progress that is worth mentioning, and at points there has been appreciable French counter offensive success. The present French position suggests the comment of one of Meade's officers after the first day of Gettysburg: "Our line has been hammered into an admirable defensive position."

Germany risked much on the great offensive. She gambled that a success would break the French spirit. Here I believe she exaggerated much; but, whether right or wrong in this, she must have realized that a failure would rouse the French spirit beyond any possible conception. And this is what has happened. Without exception, Frenchmen assured me that there had been no such confidence, calm assurance, since the Battle of the Marne. France as a whole felt that for the second time she had taken full measure of German might, efficiency, power. She realized to the full the true greatness of this might. But the "Miracle of the Marne" had been repeated on the Meuse and France once more felt her own strength, not with noisy exultation—there was no celebration in Paris—but in an atmosphere that could not be mistaken.

I believe that the moral effect of the German failure at Verdun, if the failure remains absolute, will be almost beyond exaggeration. There was no lack of courage, of determination, of constancy, but there was wonder. Was the enemy, after all, too strong and could he win, at the last, by sheer weight of strength and numbers? Having done all that a man or a nation could do, France waited for the shock, met it and—broke it, drew from success a confidence that it is almost impossible to describe because it was hardly expressed in words and found no revelation in any kind of celebration.

"This, then, is the worst," Frenchmen said to one another. "They have done their utmost and it was a tremendous thing, but it was not enough. Our lines have held. We have sold them three miles of our country over half-a-dozen miles of front. They have paid for it with 200,000 casualties, but the Kaiser is not in Verdun. Paris, Nancy, Calais, Verdun—these are landmarks in German aspirations and they remain all in our hands. Yes, doubtless they will try again; they are very strong—but go and see for yourself; they have not got Verdun and they have told you what they thought of the taking of it."

I shall always remember the words of the officers who took me to the little Place d'Armes before the Verdun citadel. Here the Kaiser was to review the victorious army as it entered Verdun. Along this street the Crown Prince was to ride at the head of the conquering army. About the square the shell-stricken houses crumbled and fell. On all sides there was ruin and out beyond the guns crashed and the musket fire rolled up in billows, audible, clearly, but four miles away. "And he has not come, William," they said calmly, "and he will not come and that is something."

And Verdun was "something." It was the biggest thing since the Marne to France. It was a new confirmation of the ancient decision. The verdict of the opening battle was not set aside by the latest trial, it was rather confirmed. The defence of Verdun has entered into the heart and soul of France; it has become something like that of Sarragossa for the Spaniard—that and something more, for Saragossa fell.

But again, at the risk of repetition, I would emphasize the fact that it was men, not walls, that saved Verdun. The forts are empty; the fortress has no more value than Liege. The war of trenches is being fought at Verdun as elsewhere. The only real victory would be the piercing of the French lines, and this danger was banished even before De Castlenau came with Petain. Probably there never was any more chance of such a success here for the Germans than there was for the French in Champagne, possibly not so much.

This battle for Verdun was a battle for moral values, fought over a town which had acquired a wholly fictitious value in the minds of the German and the French people alike, in the minds of the observers the world over. Germany fought to break the spirit of France. Perhaps—I do not think so, but perhaps she estimated her expected success at a true value, but this success she did not obtain. Unless she shall obtain it hereafter, she has lost all that she hoped to gain. She has not broken, but reinvigorated the spirit of France. This, I think, is the true meaning of the Battle of Verdun, and it is the meaning that the map will not disclose, that the commentator on merely military operations cannot estimate or value.

Perhaps one might say this way: Verdun was a battle-flag. Of itself nothing is of less value in conflict. It is a thing without use to the man fighting for his life, and yet it is a thing that soldiers value most highly and die for most readily. And at the close of the contest, if it be closed, France holds the flag. What this means to the regiment Verdun means to France.—From "The Battle for Verdun as France Saw It," by Frank H. Simonds, in the American Review of Reviews for May, 1916.

Dolly's Dress.

When Dolly dresses for a dance
I gaze at her aghast,
My soul with dire forebodings of
Disaster overcast.
Her skirt is so exceeding short,
Her waist is very low,
Extremes to meet would only have
A little way to go.

If Fashion should decide the skirt
Be shorter, yet, alack!
And evening bodices be cut
Still lower in the back,
(Which journals of the modes announce
Will be the next decree
From autocrats sartorial),
O where will Dolly be!
—Minna Irving in Judge.

SAFETY FIRST AND LAST.

(Life)

Mrs. Catterson—I am actually afraid to get my book balanced, for fear I have made a mistake.

Mrs. Halterson—Why don't you do as I do? I keep on drawing the money out until they won't let me have any more.

SUNDAY AT HOME

THE MILLENNIUM.

Out of the noise of the conflict,
In the wake of the death-wind's breath,
When the heart of mankind is weary
Of slaughter and sorrow and death.

When the lifeblood of every nation
Has flowed from its every vein,
And a host of its people are burdened
With a surfeit of horror and pain.

There shall rise from the fields of carnage
To shield with protecting wings,
That peace beyond all understanding
Which a mighty struggle brings.

And the time will come in the future
When the nations of all the earth,
United by ties of devotion
And proud of their common birth.

Shall gather under one banner
To be ruled by the Lord on high,
While the gospel of hatred is banished,
For a love that shall never die.

Then out of the earthquake and fire
Shall be fashioned a healing balm
And the world, in awe, will listen
To the still small voice of calm.
—Rochester Union.

HEAR MY CRY.

Hear my cry, O God; attend unto my prayer. From the end of the earth will I cry unto thee, when my heart is overwhelmed: lead me to the rock that is higher than I.

He said unto me, my grace is sufficient for thee; for my strength is made perfect in weakness. Most gladly therefore will I rather glory in my infirmities, that the power of Christ may rest upon me. For when I am weak, then am I strong.

When (Peter) saw the wind boisterous, he was afraid; and beginning to sink, he cried, saying, Lord, save me. And immediately Jesus stretched forth His hand, and caught him, and said unto him, O thou of little faith, wherefore didst thou doubt? If thou faint in the day of adversity, thy strength is small. He giveth power to the faint; and to them that have no might he increaseth strength. The eternal God is thy refuge, and underneath are the everlasting arms. Strengthened with all might, according to his glorious power.

NOAH.

He has a place all his own. Moses led the people out of Egypt. Joshua led them into the Promised Land. But Noah is the solitary mourner over the drama of a ruined world. See him as the big ship careened to the impact of waters; her every timber trembled, but his heart trembled over a drowned world. He is chief mourner; see his scalding tears washing his face as he holds his weary head. Glad? The only gladness was that the only ship he had built held him safely on the death-dealing flood. Carpenters, caulkers, all hands employed in the building, all hopelessly submerged. Chief mourner, he comes in at the death. He hears the last mourner and the silence of the cruel waters nearly breaks his heart. The undertaker buries bodies one by one. Noah buries a world in one act. Ah, be! Will there ever be such another? The rainbow builds a bridge for my hope!

A pattern was shown to Moses on the mount as to be tabernacle; a pattern was shown to Noah as to the proportions of permanent marine architecture.

I once walked the deck of a full rigged ship, built on the model of the ark. She was a beauty for proportion and capacity and safety. Any departure from these lines involve abnormal structures, which fill the commanders with concern. These modern floating villages of two or three thousand souls fill wise people with consternation.

Look at the old ship builder and commander. He reminded those laborers. They helped to build the ark of safety. They were not saved by the ark. Outside the bulwarks is death; inside is life. There are many church members to-day; they help to build the ark of salvation like Noah's carpenters, but are they saved by the ark? Are we not to mourn over those, as Captain Noah wept in his cabin? These careless nominal members do not know what grief they are laying up for those grey-haired watchers.

See yon gray-headed pastor. How he prays for his people, with foreboding and with fear. Are they goats instead of sheep? Have they a name to live, and are dead? Good, obliging, well meaning men, workers after their kind; but, like Noah's carpenters, building for others and not going on board themselves?

We stand at the gangway of the gospel ship to-day. We entreat you to come on board for your very life. Time is very short. Eternity is long. "He that hath the Son hath life and he that hath not the Son hath not life, but the wrath of God abideth in him. H. T. Miller.

PLAYED THEM BOTH WAYS.

Magical Qualities of the Pyrennes Mineral Springs.

The French comedian Perlet was extraordinarily thin. A physician recommended him to try some bath in the Pyrenees, so he betook himself to the mineral springs, where he bathed unremittingly, but all in vain; he did not increase in size. "Patience," urged the doctor. "There is nothing like our baths for making people fat."

One day while Perlet was waiting philosophically in his bath for an embonpoint which never came he heard a conversation in the next room, from which his own was divided by only a thin partition and which was occupied by an enormous woman, fat as the Hottentot Venus.

"Doctor," she said, "I am getting tired of this." "Why?" asked the Aesculapian. "I have been here two months." "Well?" "Well, I am as enormous as I was when I came." "A little patience, madame," urged the doctor. "There is nothing like our baths for making people thin."

Perlet, hearing these words, sprang out of his bath, dressed, rushed home to his hotel, ordered his bill and left for Paris by the next train.

BRADSTREET'S TRADE

Toronto—Trade in retail and sale establishments continues on isfactory basis. Drygoods firms an encouraging showing of ord hand. Prices are firm all round; ton mills withdrew their price and have been marking goods u gar has made a serious advance ing the past few weeks. Tra strong, as general conditions po still higher prices. The leather continues active as far as de go. Price lists were withdrawn cently.

Montreal—Wholesale trade has b stimulated materially. While re tances continue fairly good, the tra is maintaining a cautious attitude to giving credit. Money is loosen going for commercial purposes steady rates.

Winnipeg—Business continues satisfactory basis in the middle Dry goods merchants report movement both in retail and wh sale departments. A fairly active mand has come to wholesalers from local merchants and from country and remittances and co tions continue fairly good. In of the higher price lists, foot firms have had good returns from vellers. A good seasonable busin is passing in groceries. Hardw merchants have similar reports make.

Calgary—Trade in retail and who sale houses is fairly active. D goods lines, both finished goods and fabrics, have been moved to retailers in liberal volume, and the general outlo is encouraging.

Vancouver.—While general trade expanding gradually the fundam industries are growing stronger the City of Vancouver itself conditions improve, street earnings show a substantial in over 1915. The movement of from wholesale firms continues and collections are on a sounder

Hamilton—Wholesale houses city continue to do a fairly business, orders being encoura both sorting and placing. Re latives of dry goods firms rep vorably to headquarters. Har has moved more freely of late, M facturers are busy on commercial ders for equipment as well as orders.

London—Trade in Western Ont. continues on a satisfactory basis.

Ottawa — Trade conditions steady. Financially, business firm generally speaking, are in a sound p sition.

Quebec—Orders are coming in fr ly. Local industries are well e ployed. Remittances on the whole fair.

Naming a Novel.

"The thing to do," said the liter man, "is to call your novel after name of the leading character."

"Why?" asked he youngest noveli

"Because the best and the most ceseful novels always have su names," the other replied. "Take great novelists. The greatest book each gets its title from the leading character's name.

"Instances are easy to give. Wha is the best novel of Dickens? It is 'David Copperfield.' What is the best novel of Thackeray? It is 'Henry Esmond.' What is the best novel of Scott? It is 'Ivanhoe.' What is the best novel of Thomas Hardy? 'Tes of the D'Urbervilles.' Of George Mer dith? 'The Ordeal of Richard Feverel.' Of Rider Haggard? 'Allan Quate main.' Of Tolstoy? 'Anna Karenina.'"

Heart Was So Weak Could Not Go Up Stairs Without Help.

When the heart becomes weak and does not do its work properly the nerves become unstrung and the whole system seems to go "all to pieces."

When this happens you need a tonic to build up both the heart and nerves, and Milburn's Heart and Nerve Pills will accomplish this for you, providing you do not let your case run too long and allow it to become chronic.

Mrs. Evangiliste Loverdure, Fo Coulonge, Que., writes: "Last summ my heart and nerves were so bad I cou not sleep at night, and my heart was weak I could not go up stairs witho help. My doctor said he could do more for me as my heart was complete done. A cousin of mine came in one da and told me that Milburn's Heart an Nerve Pills cured her completely. immediately gave her 50 cents to bri me a box, and since that day there i box always on my sideboard. I am now well, and my heart and nerves are stronger than when I was a little school girl. I advise anyone with heart trouble to try them. No doctor can beat them."

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25; for sale at all dealers; mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

[illegible]RM GARDEN

[illegible]EPING HORSES SOUND.

[illegible]orse is so much in demand at [illegible] of the year on the farm that [illegible]ll to look into his condition, [illegible]p him in the best of strength [illegible]or.

[illegible] of staleness quite often [illegible] in stabled horses, as the [illegible]ong-continued regular work, [illegible]ally so when the work is [illegible] of a rush order.

[illegible] work alone is not the [illegible] only a primary one, [illegible] dietary is likewise [illegible]ntributes eventually [illegible] staleness on ac[illegible] character. Heavy [illegible]ther whole grain, [illegible] tendency. Oats [illegible]ing effect, though [illegible] is a perfectly [illegible] and the more heat[illegible]ing the diet is, the [illegible] it is to induce staleness.

[illegible] stale condition is meant the [illegible] less impairing of the horse's [illegible]g efficiency, a depression of the [illegible]al's vital energy, and not in its [illegible] flush of health and vigor.

[illegible] of the most promising systems [illegible]leness is shown when the horse [illegible] to thrive and loses bodily con[illegible], becoming excessively finely [illegible] and looking somewhat tucked [illegible] the belly, the latter being a [illegible]ally characteristic sign. The coat [illegible] animal appears harsh and dull, [illegible]ting a "dried-up" appearance.

[illegible]ther sign is seen when the horse [illegible] work. He does not have his [illegible]ary spirit and energy, but in[illegible] to a certain degree shows list[illegible]ness or lassitude, while the action [illegible]ay lose some of its freedom and [illegible]come slower. The appetite also [illegible]ten becomes impaired or irregular, [illegible]ile the legs may develop an in[illegible]eased tendency to become filled or [illegible]ffy about the joints, after being [illegible]ought in the stable at night. In [illegible]ell-bred, highly-strung horses, when [illegible] this condition, will show increasing [illegible]ritability and nervousness. This stale [illegible]ndition does not come on suddenly, [illegible]t gradually develops in the course [illegible] weeks or of months.

THE REMEDY FOR STALENESS.

The best remedy is to turn the [illegible]nimal out on pasture, that he may [illegible]ave a thorough rest and a complete [illegible]hange from stable life and dry food. [illegible]his will put fresh life and vitality in[illegible] him, give a general toning, and the [illegible]igestion will soon become restored [illegible] a full state of efficiency as a result [illegible] wholesome and easily digested grass [illegible]iet.

In pronounced cases of staleness it [illegible]will be well to allow the horse on [illegible]asture for a couple of months, at [illegible]east. Even when horses show only [illegible]omparatively slight symptoms of [illegible]king stale, they will be much bene[illegible]ited by a run at grass in the summer [illegible]y toward the autumn, coming up nice [illegible]nd fresh and in perfect health again [illegible] the end of their spell of rest.

But in many cases it is not feasible [illegible] adopt this desirable expedient, and [illegible] these circumstances one is compelled to seek to overcome the staleness, while the horse remains in the [illegible]table and continues to do work. But [illegible] cannot be too strongly emphasized [illegible]hat a respite from all hard work is [illegible]he surest cure for this trouble, combined with a suitable alteration of the [illegible]ietary.

When a complete rest at grass is out of the question, as much work as possible must be cut out for a time. The food must be of a laxative and cooling nature, while if the animal has been heavily fed on grain, a material reduction in the grain allowance should be affected for the time being, if its work can be correspondingly cut down. Food of a specially heating character must be eliminated altogether.

Next to a grazing diet, cut green forage is the best thing, and this should, if possible, be given daily in liberal quantities. This, by reason of its succulent, highly digestible and cooling character, will speedily prove effective in relieving the symptoms of staleness and toning up the digestive organs, provided the green food is supplied in sufficient quantities.

Besides green forage, which is the most effective, other foods that prove useful in counteracting staleness are bran and linseed mashes and roots of all kinds. Still further benefit will be derived if the horse can be turned out in the pasture field for a few hours after the work is done. This affords a most welcome change and assists to alleviate any symptoms of staleness that may be present.

FARM NEWS AND VIEWS.

Treating seed oats for smut with the formalin solution this year will save the farmers of Ohio more than $500,000, according to the farm crops department, Ohio State University. To treat oats with the formalin solution secure a formalin at a drug store and mix a pint with 40 gallons of water. The oats may be sacked dipped into a barrel of this solution until they are thoroughly soaked or they may be piled upon the barn floor and sprinkled with the solution. After the treatment they should be covered with blankets for four or five hours, so that the formalin will not evaporate too quickly.

Indications are the spraying compounds will be higher in price later in the season than they are now.

Prune out old or cankered wood from the apple trees before spraying operations are begun.

A loud-smelling hog pen is an offense to the entire neighborhood, and there is no excuse for it nowadays, nor for a filthy hog wallow, with its menace to hog health.

Pull out all the old used stalks in the garden and burn them, as the eggs of the common stock borer are found in such stalks oftentimes. The destruction of the stalks will prevent injury from this pest during the summer.

Sheep fill man's stomach and warm his back, and yet a good many farmers will have nothing to do with them.

A good cow will always command a good price, regardless of market conditions. Therefore, it pays to go in for good cows, whether to keep or to sell.

Sweet clover, once cursed, is at last coming to its own. This despised plant will put pasturage into cattle, hay into the mow and humus and nitrogen into the soil, There must be some merit in it.

How much thought do you give to your potato crop? In Europe potatoes are grown on the same ground once in ten years, and whole potatoes are used for seed. Thirty to forty sacks are required per acre for seeding. Two years prior to the potato crop grass is grown on the land to prepare it for the potato. Of course, they raise better potatoes, and more of them, but then, they are more dependent upon the use of potatoes than we are over here.

Pigeons are responsible for about 20 per cent. of the spread of hog cholera, according to the authorities who are dealing with its eradication. The farmer who owns or harbors pigeons should either confine them at home or dispose of them. Pigeons fly from farm to farm in search of food, which they generally find in the feed yards. In flying long distances and visiting many yards they easily get the germs on their feet and infect a whole neighborhood before people realize that cholera is in their herds.

INDIA'S SACRED MONKEYS.

An Intruder Into Their Jungle Retreat Got a Good Scare.

In various parts of India monkeys are regarded as objects of worship. One of the principal monkey temples is at Nuddea. Such veneration is shown there to Huniman, the monkey god, that visitors may not enter the court of the temple without removing their shoes.

On one occasion an English officer in passing up the country near Nuddea, chanced to stroll into a bamboo jungle when his boat had "put to" for the night. He had not advanced far before he heard a terrific uproar all about him, and he was not a little alarmed to behold a whole army of the largest monkeys he had ever seen making toward him from all quarters.

Some jumped on the ground before him, others swung by the bamboos over his head, and many closed up the path in his rear. Several females had young ones clinging to them, but this fact did not seem to render them less agile than the others.

The Englishman knew not what to do. He yelled at the top of his voice for assistance. To his intense relief, each time that he yelled the monkeys retreated a bit. This encouraged him to persevere in his shouting, but he observed that when he himself began to retreat the monkeys would again begin to close upon him.

Then he stood still and gave one tremendous shout, whereat the monkeys went back again. This time the man had gained fully twenty yards and was about to repeat the call when there appeared a new figure upon the scene in the person of an aged, decrepit woman, hobbling through the midst of the animals.

This aged person shook two or three of the monkeys by the paws as she passed. No sooner had she come within hearing of the Britisher than she opened upon him the vials of her wrath for disturbing the sacred animals in their retirement. She bade the intruder depart, and that quickly, an order which he lost no time in executing. The monkeys all seemed implicitly to obey the old woman's bidding, making way for the man's retreat.

The old woman, it appeared, was employed by the Brahmans to supply the monkeys with their food each day, they were worshipped by all the people in the country round, who brought offerings of rice and sweetmeats to them continually.—Harper's Weekly.

Hearing Keener Than Sight.

An Irishman, an Englishman and a Scotsman once went up into a tower to see which could see the farthest through a telescope. The Englishman, who looked first said:

"Oh, Pat, I can see the minute hand of a clock four or five miles away."

"I can see the minute hand on the same clock moving," said the Scotchman.

Pat stood in amazement listening to his comrades. When he looked through he was seen to smile. Then—

"Faith, if I don't hear the same clock striking."

THIN-BLOODED PEOPLE

Often Become Seriously Ill Before They Realize It.

Some people have a tendency to become thin-blooded just as others have an inherited tendency to rheumatism or nervous disorders. The condition in which the blood becomes so thin that the whole body suffers comes on so gradually that anyone with a natural disposition in that direction should watch the symptoms carefully. Bloodlessness can be corrected more easily in the earlier stages than later. It begins with a tired feeling that rest does not overcome; the complexion becomes pale, slight exertion produces breathlessness and headaches and backaches frequently follow. In the treatment of troubles due to thin blood no other medicine has had such a great success as Dr. Williams' Pink Pills. They go right to the root of the trouble, make rich, red blood, thus restoring the weakened system to health and strength. Mr. R. F. Ashford, Peterboro, Ont., says: "Four years ago my condition became so serious that it seemed to me I possessed every pain and ache and every morbid feeling possible. For months I had been overworked, and bereavement added the last straw necessary to break down my constitution. I had a severe ever-present headache and pains in the back of my eyes, and at the same time I was seldom free from severe neuralgic pains. I was rarely hungry, and when I was it seemed to create a morbidness which made my other ills harder to bear. Of course I consulted a doctor, and he told me a rest and change of air, just the thing I was unable in the circumstances to take. I had a particularly bad spell on the day my daughter returned from college, and she insisted that I should take Dr. Williams' Pink Pills. I was decidedly skeptical, but she got some and to please her I took them. The result—After the first box I was compelled to admit that I really did feel better. After the second box I ungrudgingly admitted that they were doing me good, and after the sixth box I felt free from every ache and pain, and in gratitude I began to praise the pills to others. I am feeling as fit as I did twenty years ago, and I owe it to Dr. Williams' Pink Pills."

You can get these pills from any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

How the Blood Is Purified

By the Searching and Painstaking Work of Healthy Kidneys.

In its circulation through the body the blood not only carries nutrition to the cells and tissues, but also collects the waste material resulting from the breaking down of cells and tissues, the ashes left by the fire of life.

In due course the blood passes through the kidneys to be purified of these poisonous impurities, and these filtering organs extract each day about 50 ounces of liquids and 2 ounces of solids, 500 grains of urea and 10 grains of uric acid, the material which is found in rheumatic joints.

Sudden changes of temperature throw a great strain on the kidneys, but it is overeating and drinking that are the usual cause of trouble. In a vain effort to remove the excess of waste matter the kidneys break down, uric acid and other poisons are left in the blood and the whole system is poisoned by impure blood.

Pains in the back and limbs, severe headaches, lumbago and rheumatism are the natural result. Hardening of the arteries, excessive blood pressure, weakening of the heart's action, Bright's disease may be anticipated unless prompt action is taken.

We like to think of Dr. Chase's Kidney-Liver Pills as preventive treatment, for by their timely use you can readily prevent all these dreaded disorders. Unlike other medicines for kidney troubles, they awaken the action of liver and bowels as well as the kidneys, and thereby effect a prompt cleansing of the whole filtering and excretory systems.

There is no way by which the action of the kidneys can be so quickly aroused and the blood cleansed of impurities as by the use of Dr. Chase's Kidney-Liver Pills. It is therefore the greatest of blood purifiers and much sought for at this time of year, when everybody feels the need of a medicine to cleanse from the system the accumulation of poisonous matter.

One pill a dose, 25 cents a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto.
Do not be talked into accepting a substitute. Imitations disappoint.

DEMONSTRATION FARMS

The demonstration farms which the Canadian Pacific has set up, both east and west, have been employed with signal success in one special direction—the setting up of higher standards. Through precept and example the company has brought about a most flattering change in values. In other words, the example and encouragement of the railway company, through these farms and by other means, have caused those who have food products to sell to give closer attention to quality than was their former habit. The company insists upon the first-rate quality of food products on the cars; and has taught the farmers, both east and west, how best to supply A1 quality in butter, eggs, fowl, etc. In the neat and tidy putting up of food products, too, there has been decided improvement. The farmers have been set a fine example, and the people have seen, right at their elbow, that values can be greatly enhanced by careful attention to details.

WISE AHMED RUSHDI.

He Used the Gifts of Abdul Hamid to the Best Purpose.

Many fantastic stories are related of Abdul Hamid, the ex-sultan of Turkey, and his court. The following, however, came to me from a reliable source, writes a contributor to Chambers' Journal, and once when I told the story in company one of my listeners told me that he personally knew it to be true. It is worthy of a place among Scheherazade's famous tales.

Not far from the sultan's palace lived a certain Ahmed Rushdi Effendi, one of the hundreds of clerks employed at the sublime porte. Ahmed's duties consisted of writing ornate official communications to provincial governors. For this he was supposed to receive a salary of 200 piasters (about $8) per month. If, however, he received his salary six times a year he thought himself lucky.

Compared to many of his colleagues in the government offices, Ahmed was in comfortable circumstances. He owned his own house, so he had no rent to pay, and he gave his leisure time to cultivating the tiny garden that supplied his family with fruit and vegetables the whole year round. Ahmed Effendi, not being ambitious, was a contented man.

In his peaceful household there was only one discordant note. The cause was a dwarf peach tree in Ahmed's garden that bore every year six or eight mammoth peaches. Early in his married life his wife dreamed that her husband would one day attain eminence and that the peaches were connected with his fortune.

Fifty times each year she urged him to take the peaches as an offering to the sultan. "We are simple people," she would say. "Such magnificent peaches are not for us. Carry them, I pray thee, to the palace and present them to the benefactor of the world." But Ahmed would reply:

"Wife, no good comes to those who have relations with the palace. I, who have always been discreet, do not wish to fall under suspicion."

But at last, after 20 years, Ahmed yielded to his wife's importunity and carried the beautiful fruit to the palace. There he entrusted the peaches to the grand chamberlain, who, knowing the sultan's fondness for fruit, promptly carried them into the presence of the illuminator of the universe. The sultan graciously accepted the gift and commanded Ahmed to wait until he was at liberty in order that he might himself thank the grower of the splendid fruit.

It happened that the reception room where the scribe awaited the pleasure band of suspected bomb-throwers, and Ahmed was presently hustled away to prison with the supposed revolutionaries. He was thoroughly confused by the rough treatment of the guards and could only stammer: "I am the man who brought the peaches. I am the man who brought the peaches!"

In prison he soon became known as "the man of the peaches" and was looked upon as a harmless lunatic. After many months the suspected bomb-throwers, including Ahmed, were brought before the criminal court. He told his story to the judge and asked that the grand chamberlain be called to confirm his words. The judge granted his request and was greatly surprised when the dignitary told of the arrival of Ahmed at the palace some months ago and of his mysterious disappearance. The chamberlain took the afflicted scribe to his own suite in the palace and went to explain matters to the sultan.

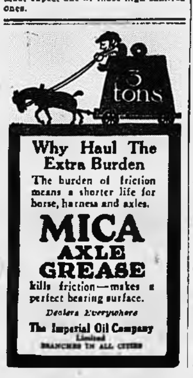
The sultan, sincerely sorry for the unlucky mistake, commanded the chamberlain to promise Ahmed that any wish of his should be fulfilled. Ahmed replied that he would accept not one, but three gifts, and that he must name them to the sultan personally. The sultan was much concerned and ordered the scribe ushered into his private study.

"Sire," said Ahmed, "I ask for a hatchet, the sume of 200 piasters and a copy of the koran."

"Your desire is granted," answered the sultan, "on condition that you explain the meaning of your singular request."

"Sire," replied our hero, "with the 200 piasters I shall obtain a divorce from my wife, the original cause of all my trouble; with the hatchet I intend to cut down my peach tree, and upon the koran I wish to swear an oath never to enter the palace gates again so long as I live."—Exchange.

The man who admits that he can't do anything and is looking for a job must expect one of those high-salaried ones.



Why Haul The Extra Burden

AGE OF THE EARTH.

Different Systems of Computing It and Their Varying Figures.

As long ago as 1860 John Phillips, the geologist, estimated that the time required for the deposition of the stratified rocks lay between 38,000,000 and 96,000,000 years. This was probably the only estimate prior to Kelvin's epoch making paper of 1862. Since that time many estimates have been made, varying all the way from 17,000,000 years to 400,000,000 years.

Kelvin was the first to discuss the age of the earth considered as a cooling body. In 1893 Clarence King introduced the important criterion of tidal stability and reached the conclusion that 24,000,000 represented the conditions. This result was adopted by Kelvin in 1897, and then he placed the limits as 20,000,000 and 40,000,000 years.

Only Sir George Darwin has discussed the age of the earth from a purely astronomical point of view. From his theory of the earth moon system he derived an estimate of more than 56,000,000 years, which for a long time stood between groups of higher and lower figures. J. Joley was the first to base estimates of the age of the earth in 1899 on the sodium contained in the ocean. Adopting the hypothesis that the sodium content of the ocean is derived at a constant rate from that of the rocks, he arrived at an age of 80,000,000 or 90,000,000 years and increased this by 10,000,00 in 1900. In 1909 Mr. Sollas made a searching inquiry into this subject and placed the age of the ocean at between 80,000,000 and 150,000,000 years.

WAKING DREAMS.

A Long Series of Events Can Be Crowded Into a Few Seconds.

It is more than likely that the great majority of dreams belong to the few moments when we are falling off to sleep and the equally brief time we take to wake up. In fact, nothing is more fully established than the fact that an apparently long dream can unfold itself in an infinitesimal space of time.

Alfred Maury relates how he had a long and vivid dream of the reign of terror in France, which included his trial before the revolutionary tribunal and his execution. He actually felt the guillotine fall. Yet that dream from beginning to end was actually caused by the fall of a certain rod which struck him on the neck and woke him up. The whole lengthy dream lasted really a couple of seconds.

A well known writer in London was sitting up late writing something he much wished to finish. Suddenly some one came into the room and announced that he was called to go to Manchester. He went out and packed his bag and went to that city, where he stayed several days and saw innumerable people. He returned in due course and transacted a lot of business in town and actually contracted for the start a new book.

Yet when he woke with a start and found it was all a dream the ink of the last word he had written was as fresh and needed the blotting paper as much as if it had only just been written. He could not have dozed longer than ten seconds.

GATHERED FROM HERE AND THERE.

A caterpillar will eat twice its own weight in leaves every 24 hours.

A good grade of paper can now be commercially made from the hop refuse of breweries which has heretofore been thrown away.

Uncle Sam made $2,500,000 last year from the sale of wood from the Government forests.

Since the outbreak of the war 30,000 settlers from the United States have entered Canada.

Two per cent. of metallic sodium will harden lead so that it will ring when struck.

A novelty in dabbing brushes is one in which the bristles are so arranged that they may be pushed forward by means of plugs as they wear down, and thus the life of the brush is increased considerably.

A Swiss aviator rose to the height of 19,800 feet, overtopping the best previous ascent.

The United States produces 60 per cent. of the oil of the world.

The "trench knife" is a new weapon of warfare, with a blade of about 15 inches. It is used for fighting in the trenches where there is no room to swing a sword or bayonet.

In the U. S. electricity is a $3,000,000,000 industry.

The street lighting bills of the city of New York for 1915 will be $400,000 less than for 1914. A goodly portion of the saving is said to have been effected by the use of nitrogen-filled tungsten lamps in place of the arc lamps.

Upward of 300 children are being killed each year in the streets of New York and about 7,500 others injured.

The new rice crop pays California $70 an acre, or more than finest wheat land gives.

In time lost and medical attention, the wage-earners of the U. S. have an annual sick bill of $650,000,000.

While much has been done to improve the condition of the employed by factory inspection, yet the statement is made authoritatively that the real solution of the public health problem lies in the improvement of the home.

The total value of tires used in 1916 in the United States, including solid tires for trucks, tires for 'buses and taxicabs, amounts therefor to $250,000,000 in round numbers. To this sum should be added about 200,000 motorcycle tires, worth from $5 to $10 each.

To find a splinter under the fingernail is often difficult. By placing the fleshy part of the finger against the lens of a pocket flashlight in a dark room, however, the splinter can be plainly seen through the nail almost as if it were under the X-ray.

The public electrical stations of the U. S. represent a valuation of $400,000,000.

A new German invention consists of a wedge-shaped cushion, the sides and bottom of which are smooth, is covered on top with a sheet of rubber sponge that absorbs the perspiration of the invalid and prevents bed sores.

"Don't you think," said the poetic leap-year maid, "that you and I would make a fine couplet?" "Well," rejoined the young man in the case, "I'm not averse to a trial."—Indianapolis Star.

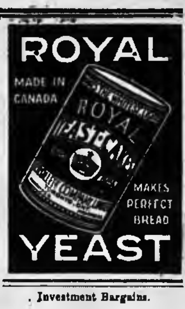
SHY ON FIGURES.

The Average Man Is Very Deficient Arithmetically.

The average man's arithmetical ability is extremely limited. This limitation it appears, is having a serious effect on industrial processes depending upon cheap labor, especially on the adoption of the metric system, which, with its large numbers and decimals, is beyond the mental calibre of workmen who must deal in numbers less than a score and preferably less than 10.

They can grasp a finite measure like a quart or a bushel, but a number like 723 millimeters conveys no idea to them. Consequently we find that arbitrary measures of capacity are being resorted to in dealing with large quantities, so that the numbers to be reported or remembered may be small. Policemen find great difficulty in perceiving and remembering large automobile numbers and are trying to devise systems by which phychologic fact, but it seems to be forgotten by those who wish to force the metric system on people who cannot use it. These measures are legal, and if they were superior they would have long ago replaced the old measure. As a matter of fact, the metric measures are losing ground even in countries where no others are legal, for the peasants in their daily tasks are compelled to stick to the old measures they evolved from the necessity of their limited use of numbers.

We expect that the unwise agitation will subside and that laboratory workers, from whom the French system is indispensable, will realize it is not suitable for every one else—particularly for the great mass of humanity who never perform any calculations except mental ones of a very simple nature. For these reasons physicians are revising their idea as to the wisdom of writing metric prescriptions. The gain to most of us is not thinking worth the mental effort of thinking in two systems—if there is any advantage at all. Small numbers easily remembered seem safest and the most practical outside of the laboratory.—American Medicine.



Investment Bargains.

The investor who picks up desirable property when everybody is selling and no one buying will have to wait until a reasonable time to secure his reward. I recall when real estate in several large cities was a drug on the market. Everybody seemed anxious to sell and no one to buy, but the buyers in those periods have realized enormous profits, far greater than one can get in the Stock Exchange.

The man who has money, even if it is but a small amount, can always turn it over to advantage if he will wait for the opportunity. Don't go with the crowd when everyone is wild to buy something, but quietly abide an opportunity when everybody is anxious to unload and buyers are few. At such a time the bargain counter counter opens.

GRAND TRUNK SYSTEM SERVES EIGHTY-NINE PER CENT. OF CANADA'S URBAN POPULATION

In the forty principal cities and towns of Canada there is a total population of 2,918,783. These figures are given in the new publication "Canada, the Country of the Twentieth Century," prepared by Mr. Watson Griffin, and issued this week from Ottawa by the authority of the Minister of Trade and Commerce, Sir George Foster. They are based upon estimates furnished by the various city clerks and city assessors, and may be considered approximately correct. An examination of these statistics shows in a very striking fashion the notable part which the Grand Trunk System plays in the commercial life of the Dominion. The cities and towns served by the railway and steamship lines owned and operated by the Grand Trunk System have a population, according to these official statistics, of 2,606,436. The Grand Trunk thus serves over 89 per cent. of Canada's urban population grouped in its forty principal centres. In addition, the Grand Trunk serves hundreds of communities with populations of less than 12,000, which is the minimum figure for inclusion in the list Mr. Watson Griffin has prepared.

ENGLAND'S GUINEA HABIT.

They Have No Such Coin There, Yet Still They Use It.

Strangers in foreign countries always find some difficulty in getting used to the current coinage. In England they find themselves up against quite a number of problems, not the least of which is the guinea, and the difficulty is not lessened by the fact that the guinea is practically obsolete as a coin of the realm. The English physician's fee is always calculated as so many guineas, and the same thing holds good at a sale of pictures or whatnot at Christie's salesrooms.

The guinea is a gold coin current for 21 shillings sterling, or about $5, but it has not been coined since the issue of the sovereign in 1817.

The guinea habit has been defended by some subtle dealers on the ground that it obfuscates the "foreign visitors to British salesrooms." On the other hand, those astute cambists have been known to growl at a few thousand sterling added to the price of a valuable picture by the adhesion to the guinea style of bidding. The story runs that the guinea was so called from the pieces struck from the bullion captured by Sir Harry Holmes in 1666 from 160 Dutch sail in Schelling bay, the bullion being from Guinea. But Shakespeare has an earlier play on the word when he mentions "guinea hen" in "Othello," as regards the auction usage of the guinea. There can be little doubt that it is a survival of the times when the extra shilling was treated as a five per cent. commission, payable by the buyer. Double commissions are, however, now obsolete. Chicago Record-Herald.

Brides in India.

A bride in India never sees her husband until after the marriage ceremony. The parents choose the wife for the son of the house without consulting either party. Sometimes the bride is as young as fourteen. The child is gorgeously dressed and placed on a dias behind a sheet, the women of the family being in attendance.

On the other side of the sheet are the bridegroom and many of his young friends. The groom keeps throwing over jewels attached to flowers, which the women on the bride's side remove and place in her lap or on her person.

This first ceremony is called the shader, and, although a man is allowed four wives, no other ever holds the same position as the first chosen for him. The others are of little importance, living their lives more or less as servants to the first wife. As the first wife gets to middle age she is known as the begum.

An optimist is a man who is anxious to hold the nail for some other fellow to drive.

PILES.

You will find relief in Zam-Buk! It eases the burning, stinging pain, stops bleeding and brings ease. Perseverance, with Zam-Buk, means cure. Why not prove this? All Druggists and Stores.— [illegible]

OTHER PAPERS VIEWS

KNOWS GERMANY.

(Rochester Herald)

If Germany had a greater navy than England it would not be in favor of "the freedom of the sea."

A SLIGHT CHANGE.

(Montreal Mail)

The new slogan for the country is "production and thrift," and the charge is heard that some people are making it, "production and theft."

THE CROOKED HUNS.

(Buffalo Express)

The Germans report an uprising against the British in the Soudan. No part of the world appears to be too remote, no tribes too barbarous to escape the attention of German agents.

SOLICITOUS FOR US.

(St. Thomas Journal)

"Billy" Sunday is reported to have made [illegible] converts in Baltimore. Hamilton, Ont., should send for him.

A SLANDER.

(Beamsville Express)

A Hamilton woman said she was followed. 'Twas only an hallucination though. They're not the kind anyone would follow.

THE MIGHTY FALLEN.

(Ottawa Evening Journal)

In protesting against the disarmament of Ireland because it will include the disarmament of Ulster, the London Times to our mind does about as wretched a thing as the lowest yellow journal could do.

CANADIAN RECRUITING METHODS

(Toronto Saturday Night.)

Our recruiting methods seem to have developed into a cross between a circus and a vaudeville show.

NO CHANCE!

(Ottawa Free Press.)

Toronto is paying a provincial war tax under protest. Is this to be taken as any commentary on Toronto's loyalty to the Provincial Government.

A NEW VIEW OF IT.

(Pittsburg Gazette-Times.)

The Irish rebellion shows the need of conscription. Had the law been in force the revolutionists would have been getting their fill of fighting elsewhere.

WORSE AND WORSE.

(Ottawa Evening Journal)

"The best way to go in for the daylight-saving business is to get up at five in the morning and make so much noise in the backyard that all your neighbors will have to get up their too."—Guelph Mercury.

Why go to bed at all?

DOHERTY'S BULL.

(Ottawa Citizen)

Saturday night in the House of Commons, criticism of Sir Charles Davidson caused the minister of justice, Hon. Mr. Doherty, to cry shame on Mr. Frank Carvell; and he expressed it with true Irish indignation by charging the opposition members with making statements "in the face of an adversary who isn't here!"

INFORMATION WANTED.

(Brantford Expositor)

A return brought down at Ottawa the other day states that all the members of parliament who have been honored with the title of "honorary colonel" are drawing pay with the exception of W. F. Cockshutt and Dr. Stewart. There ought now to be another return asked for showing what the other holders of the purely honorary title are doing for the public moneys they are thus drawing.

NOT A GOOD POLICY.

(St. Louis Globe-Democrat)

The court martial did not stretch the law. Pearse was technically guilty of high treason. He neither sought nor expected clemency. It may be that his summary execution is "good policy," though we doubt it, in view of the utter futility of his rebellion and the motives that prompted it. John Brown was likewise executed for his crazy enterprise, with full warrant of law. But it helped the cause he tried so foolishly to promote.

OPENED THE WORLD'S EYES.

(London Telegraph)

After all, it has been Germany who has remodelled and reformed Europe by sheer force of contrast. Until the full measure of her iniquity was made known the kindlier peoples of the Western world did not understand the danger that threatened them; they could not visualise the horrors that lurked in cold truth behind the scarcely credited lessons of a Bernhardi or a Treitschke. Once again, in the world's history, it has been oppression that has given birth to liberty. Germany, and no one else, has made plain the depths of savagery that German policy required if her leaders were to attain their object.

LOVE OF EASE.

(Philadelphia Record)

What is there about "love of ease" that makes the strenuous one so wroth? Love of ease is a universal human trait, and has been so from the beginning of time. It is the incentive even of war. Barbarian tribes and nations fight for slaves, and even the civilized city-states of ancient Greece made war in order to reduce their captive enemies to bondage and compel them to do all the work, so that the conquerors might enjoy lives of leisure. Love of ease is the mainspring of nearly all human activities. Men labor to obtain comforts and luxuries. If the hope of enjoying the fruits of one's work were gone no man would labor except under compulsion of law or of necessity. He who vociferates against love of ease assails all mankind, including himself.

PLACING THE BLAME.

(Chicago Tribune.)

Certainly a small minority composed only of some German born Americans or Americans of German ancestry wish to see a German military victory. The impression prevails, and it appears to be borne out by facts, that this war was brought on by the German autocracy deliberately and criminally. The impression is widespread, and the Tribune believes it is correct, that if Germany had won as sweeping a victory as was promised in the months of August and September, 1914, America's future would have been in peril.

SARCASTIC.

(Philadelphia Record.)

It is satisfactory to know that the commander of a submarine who sank the Sussex has been punished for it, but whether the penalty was "something lingering, with boiling oil in it," or was merely the withholding of an Iron Cross, has not been disclosed. Nor are we told distinctly whether he was punished for sinking the Sussex without warning or for making a bad drawing of it. It will not be forgotten that the Sussex had only one mast, and this officer drew a picture of her with two masts. The notorious German thoroughness is discredited by such a discrepancy, and it would be gratifying to learn what the Admiralty did to him for his blunder in drawing.

Wife—You believe in being prepared, don't you? Husband—I certainly do. Wife—Then I know you'll approve of my getting my complete outfit for summer before the hot weather sets in.—Judge.

LINOLEUMS
Floor Rugs, Curtains

LINES for which there is an unusual demand and which will show marked price advances in the near future.

Our early contracts in British market gives us a splendid advantage in the securing of these lines and we would suggest to all intending buyers the advisability of early selection.

To-day
We show complete ranges of Floor Oil Cloths and Linoleums from 1 to 4 yards wide. Complete range of standard sizes in Rugs 2 x 2½ yards to 4 x 4½ yards in Tapestry, Brussels and Velvet. Complete range of Lace and Scrim Curtains and curtain materials in white, cream and ecru.

NIAGARA MAID GLOVES
With the warm weather comes the demand for silk gloves. Our stock of the Famous Niagara Maid is complete in all sizes, both black and white, and double tipped fingers. Price per pair .... 50c, 75c, $1.00 and $1.25

PRETTY NEW WASH SILK BLOUSES
These Dainty New Blouses come in the season's newest mode. Made of extra heavy quality white wash silk. These waists will laundry up beautifully. The best selling silk waist we've handled in years. Price $3.50

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

CARGILL

Mrs. Wm. Palmer spent the holidays in Brussels.

D. D. G. M., W. J. Loughleen will make his official visit to Kincardine on Monday, May 29th. Deputy Grand Master Luke of Hamilton will also be present.

Mr. and Mrs. G. F. Saunders and James Alexander were in Lousie on Monday.

Mr. James Taylor who has resided here for years moved his family to Walkerton on Wednesday where he has secured a position in the Bobbin Factory. We wish them every prosperity in their new home.

Mrs. C. W. Keeling left on Thursday last for a few weeks' visit with her sister, Mrs. A. J. Helm, in Cranbrook.

Miss Greenhow, after spending the past few weeks here, returned to her home in Walkerton on Thursday.

William Palmer left last week for Brussels, where he has a contract cutting stones for a few months.

Mr. John McKinnon left on Friday to attend the funeral of Mrs. Malcolm McKinnon, at Birmingham, Mich. His mother, Mrs. S. McKinnon, of Chepston, accompanied him.

Ptes. Anderson and Clancey, and Stenographers Clancey and Loughleen, of 160th Battalion, Walkerton, spent Sunday in the Village.

Mr. and Mrs. Fedy and Mr. and Mrs. J. F. Schuett, of Mildmay, autoed to the burg on Sunday, visiting at J. D. Schuett's.

Mr. Ambrose Lettler, assistant at Port Elgin station, was a caller in the Village on Saturday.

Mrs. (Rev.) W. J. Fiddes left on Monday for a few weeks visit with her parents at Cayuga. Rev. Mr. Fiddes leaves next week to attend conference at Simcoe.

License Inspector White, of Walkerton, was here on Saturday.

Some of the young gentlemen start out strolling through the fields too early on Sundays, and hence miss the opportunity of being invited for tea.

Mr. Dan Campbell, of Rocainville, Sask., arrived on Friday for an extended visit.

Cargill is fast becoming a great egg market, no less than five dealers, including the harness maker, hardware man, and if you can't make exchanges with these gentlemen or the stores, then try the undertaker.

Mrs. B. F. Gray, of Toronto, is visiting with her daughter, Mrs. Dr. J. G. Bricker, for a few weeks.

Dr. D. C. Murray and Elsie, of Toronto, renewed acquaintances here for a few days this week.

Born—On Sunday, May 21st, to Mr. and Mrs. J. J. Schmidt, twins, a boy and a girl.

Messrs. Martin Bester and James Alexander, Jr., spent Sunday in the County Town. Wonder what's the attraction as trips are becoming more numerous.

Friday night was a memorable occasion in local Masonic circles. It was the official visit of the genial D. D. G. M., R. W. Bro. W. J. Loughleen, to his home lodge, Moravian Lodge, No. 431, and the Masonic Brethren assembled from all points of the compass, including Walkerton, Chesley, Southampton, Tiverton and other places. The first part of the evening was given up to the exemplification of the 1st degree, which was well put on by M. M. James Alexander and his efficient staff of officers. The company then repaired to the banquet hall, where a spread which did credit even to the Cargill ladies, whose reputation for providing the good things is well known. Here a company of nearly one hundred and fifty, including visitors, wives and lady friends of the members sat down. It is needless to say that full justice was done to the royal repast. A toast list followed, Wor. Bro. Geo. Sirrs capably filling the post as toastmaster. The list included the following toasts:—King and Craft; God Save the King; Grand Lodge of Canada, R. Wor. Bro. W. J. Loughleen; Canada and the Empire, Bro. Hugh McKerracher; 160th Bruce Battalion, Lieut. H. Parker; Sister Societies, Wor. Bro. Geo. Lamont, of Chesley; Education, W. Bro. (Rev.) D. A. Walker, Saugeen Lodge, Walkerton; W. Bro. (Dr.) P. J. Houston, Aldworth Lodge, Paisley; Army and Navy, R. Wor. Bro. F. C. Ryan and Wor. Bro. Steele, of Aldworth Lodge. Rt. Wor. Bro. Loughleen proposed a silent toast to the brethren who were unable to be present, especially those who are at the battle front fighting for the cause of freedom. The brethren sang "Keep the Home Fires Burning." The toast to the ladies was coupled with the names of Lieut. D. McLeod and Sergt. Kennedy. The Junior Wardens' toast was followed by the joining of hands, all singing Auld Lang Syne. The speeches of the evening were exceptionally good throughout. All had an interesting as well as a profitable time, and it was remarked by the visitors that the banquet was one of the finest they had ever had the pleasure of attending.

WESTFORD

Pte. Rosco Mahoney of Belmore spent Sunday with his cousin, Mr. John McGlynn.

Mrs. Peter Linehan visited friends in Chepstowe on Sunday.

Mr. and Mrs. Wm. Ruth visited at Mr. Frank Benniger's on Sunday.

Mr. Thomas Fallon spent Sunday with his niece, Mrs. A. Lippert of Riversdale.

PINKERTON

Ptes. Gordon Garland and Edgar Campbell resumed training in Walkerton on Monday after working for some time on the farm.

Mrs. Adam Reid was called to Paisley on Saturday owing to the severe illness of her mother, Mrs. McMillian.

A large number of the youth and beauty of Pinkerton and vicinity attended a dance in Glamis on Friday evening and all report a fine time.

Senator Donnelly returned home from Ottawa, Parliament having closed last week.

Miss Alberta Pinkerton visited at Glamis last week.

Miss Agnes Reid underwent an operation for appendicitis in Bruce County Hospital last week. We hope for a speedy recovery.

OTTER CREEK

Mr. and Mrs. John Mielhausen and family were visitors at Mr. Charles Schmidt's on Sunday last.

Miss Stella Jasper of Hanover and two of her girl friends were visitors at Mr. Walter Jasper's on Sunday last.

Mrs. Daspond and daughter from Walkerton were visiting at Mr. and Mrs. Wm. Rehopf's before moving to Galt.

BORN—To Mr. and Mrs. Theodore Loos, a son.

The infant daughter of Mr. and Mrs. Conrad Hossfeld had a touch of pneumonia but has recovered.

Miss Katie Green has returned home from Walkerton and is now at Mr. Theodore Loos's.

Mrs. Jacob Heltzmann was a visitor around these parts last week.

Mr. Garfield Inkmier of Mildmay visited at Mr. Charles Schmidt's on Sunday last.

The common saying is the wet weather is good to make young ducks grow. We think they will be over grown this year.

SOLWAY

Miss Lizzie Batte from Walkerton, spent the week end at her sister's, Mrs. George Ernest.

Mr. and Mrs. Justus Holm of Walkerton, were Sunday visitors at Mr. Julius Holm's.

Mrs. Kober of Deemerton, is spending a few weeks with her daughter Mrs. John Stemler here.

Born—To Mr. and Mrs. John Stemler a son on May 16th.

Born—To Mr. and Mrs. John Monk a son on May 21st.

Born—To Mr. and Mrs. Frank Rumig a son.

Miss Murial Rankin expects to return to Regina on Thursday after holidaying at the home of her sister, Mrs. Charles Ormiston.

Mr. and Mrs. John McWhinney from Markdale attended the reception of the son, also Mr. and Mrs. James McWhinney of Maple Hill.

Mr. Dave Coates met with a very serious accident when returning with a load of hay near his home on Tuesday morning. The load upset and Dave jumped to save himself, lighting on the bolster. Dr. Porter is in attendance.

GLAMIS

Mr. Hector McNally of Detroit, Mich. arrived home on Friday.

Miss E. Pickard returned to Paisley on Saturday after a few weeks visit with friends here.

Mr. and Mrs. Albert Pinkerton of Pinkerton were Sunday visitors with Mr. and Mrs. J. D. Robertson.

Privates Edgar McAfee, Albert Groves, Lorne Reid, Lorrance McLennan, Wilbert McNally, Will Stanley, John and James Thompson, Wilbert McLeod, Will Patterson, Neil McDermid, James Symons, Archie McLeod, and Angus McIver, who were here on furlough for seeding all left on Monday for Walkerton.

Mr. and Mrs. M. E. Peacock and daughters Eleanor and Mildred of Meaford, motored here on Saturday to see her father Mr. McFarlane who is ill. They returned home on Monday.

Miss M. McLennan of Detroit, Mich. is home on a visit to her parents, Mr. and Mrs. James McLennan.

Mr. McCauley preached in the Baptist Church at Paisley, and Williscroft on Sunday.

Mrs. James McLennan met with an accident on Friday when she was badly scalded with an explosion of a kettle.

Misses Ena, and Lily McKenzie of Kincardine spent the week end with their cousins Misses Currie.

Messrs John, and Alex McKennitt attended the funeral of their sister-in-law in Dundalk on Wednesday.

Master Jack Matheson of Southampton is visiting his uncle, Dan McLean.

Rev. Mr. Reith conducted Preparatory Services in Paisley on Friday.

Mr. Wilson Carr has accepted the office as Night Watchman for Paisley. He will commence his duties the first of June. Success, Wilson!

Miss Mary Dewar of Tiverton spent the week end with Misses Flossie McLennan and Retta McKinnon.

We are sorry to report the illness of Mr. K. McLennan. All hope to see him around soon.

On Friday evening the I. O. O. F. brethren entertained the soldier boys to a dance. A large crowd attended.

Mr. Jos. Wrighteon motored some folks to Dundalk on Wednesday.

Mr. A. Greer attended the funeral of his sister, Mrs. Irwin in Paisley last week.

Messrs W. J. John A. and Clyde McKeemen attended the Masonic Banquet in Tiverton on Tuesday.

Mrs. McDermid visited her sister Mrs. Capt. H. McKinnon 10th Con. last week.

Miss Ida Stanley is engaged at Dr. Gage's of Paisley.

On Saturday evening presentations of wrist watches were made to Privates Wilbert McNally and Archie McLeod at their homes.

Miss Eleanor Peacock of Meaford, who with her parents and sister were spending over Sunday here, met with a very painful accident on Sunday morning when she fell and broke her arm at the elbow. The break is a very serious one. All hope the little girl will get along nicely without any further trouble with her arm.

Miss Sara Beers returned to her home in Hamilton on Tuesday after a short visit at Mr. J. Cunningham's.

KINLOSS

The wet weather is putting the farmers on edge. But don't worry, everything comes to those that wait, if you wait long enough.

We are glad to see the roads drying up so the rubber tires can be out again.

Mr. Earl McDonald spent Sunday with friends in Teeswater.

A merry and yet sad host of friends met at the Grange Hall on Saturday evening and presented Ptes. Alfred Hayes, John Rumminger, William Portice, Samuel Sturgeon and Richard Portice, with a fine address read by Rev. Mr. McKue of Bervie, while Mr. Edward Harrison made the presentation of wristlet watches to each one. The boys felt it very deeply and at their request Mr. McKue replied. We are sorry to see the boys leaving us, and we will miss them very much. Our best wishes and prayers will follow the boys. They left for Walkerton on Sunday.

Mr. Duncan Campbell delivered a fine bunch of fat cattle last week.

Mr. Wallace Hewitt and Miss E. Shelton who are attending High School in Kincardine, spent Sunday at their homes here.

PRESBYTERIAN W. M. S.

Bruce County Annual Meeting Held at Port Elgin Last Week.

The annual meeting of Bruce Presbyterian Women's Missionary Society was held in Port Elgin on May 11th, fourteen auxiliaries being represented. The President Mrs. Hogg of Southampton, occupied the chair. Mrs. Munro, in a cordial little speech, welcomed the delegates, and the Hon. President, Mrs. Robertson, replied, adding a few words inciting the members to deeper consecration and more earnest service. In the address of the President, Mrs. Hogg, some of the points noted were:—That we have an auxiliary, but not a mission band, in every charge in the Presbytery; that the deficit in the general society was not the fault of the Ontario Provincial Society, as it had an increase of $11,000 last year, but Ontario members gave an average of $2.27 each, while Quebec members give $3.15 each, while Alberta and Saskatchewan also gave more per member than Ontario. Miss Case of Chesley, missionary elect for Corea, kindly offered to help any society in any way possible before her departure next Fall. Following are bare summaries of the reports given by secretaries:—There are 20 auxiliaries with a membership of 441, contributing $1402.39; 9 mission bands, with a membership of 140, contributing $161; $119 home helpers contributing $146.20; total contributions for 1916—$1712.59. Twenty bales of clothing valued at $349.50 were sent to Toronto and the Indian school at Kenora. Members take 354 copies of our Missionary Messenger. Greetings from the Presbytery were extended by Mr. Robinson of Tiverton. Mrs. McEvoy of London, in her address showed how, by organizing a department of home helpers, we could get the interest, sympathy and prayers of those unable to be present at our meetings—business girls, mothers with small children, and old and the sick.

Helpful hints from the Provincial meeting in London were most interesting as given by Miss Robertson of Southampton. The roll call showed 61 out-of-town delegates. Greetings were brought to the meeting from the sister societies of the Baptist, the Episcopal and the German Evangelical churches. Hanover is to be the next place of meeting. All the former officers but two were re-elected. Mrs. Sawers and Mrs. Dougherty resigned and Mrs. MacNab and Mrs. McLaren took their places. Appropriate closing words were given by Mrs. Staples, a delegate from Hanover. At the evening meeting the chair was occupied by Rev. Mr. Hogg of Southampton. The speaker of the evening was Mrs. McEvoy, of London, who took her hearers over our 21 mission fields and showed what the Women's Missionary Society must do to hold these "trenches" in fighting to bring the world to Christ. Music was furnished by the choir of the church. The ladies of the church provided dinner and tea for all the W. M. S. delegates and members of our Presbytery.

+ + +

160TH BRUCE BATTALION.

A telegram, what does it say,
From Ottawa it comes.
With a warning voice to Bruce County
To call upon her sons.
The news had spread and scarce before
The day had changed to night
Weir and his Battalion was up and armed
And ready for the fight.
To guard our own dear Canada,
They go a willing Band
In honor of the dear proud flag
That flutters o'er our Land.
How well we know our Bruce Battalion
Will prove with all their might
With British hearts and loyal men
When called upon to fight.
It will make Old England prouder still
When o'er the Seas shall hear
Our Bruce Battalion in Walkerton
Still hold their honor dear.
The Bruce Battalion, she need not fear to trust,
For they will go across the Sea
That the Flag will brave a thousand years
The Battle and the Breeze.

Mrs. P. Ritchie.

Arthur Stringer
Most versatile of Canadian authors, has just finished, in "The Anatomy of Love," a novel of Canadian life which combines rare drollery and whimsical humor with wholesome and satisfying romance. Mr. Stringer's brilliancy has never been more strikingly displayed than in this story, the first instalment of which appears in the June MACLEAN'S. To have secured the first rights to so important a novel is a notable achievement.

Arthur C. Laut
contributes another of her prophetic war articles—"Give America the Whole Truth." This is an examination of Germany's intrigues in the United States—a remarkable expose of Germany's aims and plottings in the Western hemisphere, written with an astounding knowledge of "inside" facts.

Robt. W. Service
provides two poems written at the front—"The Odyssey of 'Erbert 'Iggins" and "The Convalescent."

Arthur E. McFarlane
contributes a mystifying detective story, "Behind the Bolted Door?"—the best detective story since Sherlock Holmes.

Alan Sullivan
supplies a timely sketch "The Romance of Cobalt"—a sketch of the camp, past, present and future.

MACLEANS
MAGAZINE is getting the best Canadian writers to put their best work into articles and stories of particular Canadian interest. This is a deliberate policy on the part of MACLEAN'S publishers. Other Canadian writers of note whose work appears in MacLean's are:

Stephen Leacock
L. M. Montgomery
Nellie McClung
H. F. Gadsby
Arnot Craick
Robert E. Pinkerton

Not the least appreciated feature of MACLEAN'S is its popular Review of Reviews Department, which condenses for busy readers the cream of the world's best periodical literature.

MACLEAN'S MAGAZINE maintains a clean and wholesome tone. Its advertising pages are censored to exclude all objectionable advertising. MACLEAN'S can be taken into your home without any hesitancy, to be read by any member of your family.

MacLean's is $1.50 a year. Remittance for yearly subscriptions need not accompany order.

JUNE NUMBER AT ALL NEWS STANDS 15c

JUNE 3rd IN CHESLEY

The Minister of Militia has authorized the visit to Chesley on the above date for the Presentation of Colors to the Bruce Battalion.

This will be the most important event in the history of the county, and positively the last opportunity of seeing our brave boys at full strength prior to their departure for camp and overseas. An unusual military programme is being prepared. Special trains from all points have already been secured at cheap rates. Ample accommodation for visitors has been provided. Come in your thousands to give the boys an impressive send-off—No matter how many—Chesley is ready for you. Details on large bills.

TOUCHED LIVE WIRE

Fine Young Walkerton Man, Walter Schnurr, Was Victim of Fatal Accident At Port Elgin On Saturday Night.

Like a bolt from the blue came the sad intelligence on Saturday night that the life of a very popular and very promising Walkerton young man had been suddenly cut off in its very prime. Walter Schnurr, son of Mr. and Mrs. Conrad Schnurr, remarked to a friend on Saturday night that he had never felt better in his life. Shortly afterwards a moments contact with a live wire rendered his form lifeless.

Walter was in charge of the power plants at Southampton and Port Elgin for the Saugeen Power & Light Co. All day Saturday he had been engaged at Port Elgin repairing services that had been put out of commission by the severe electric storm early Saturday morning. He returned home at six o'clock in the evening believing that he had finished the work. He received a phone call after supper from the proprietor of the American Hotel, Port Elgin, stating that his lights were out. Walter said he woud be right over and got a friend to motor him the three miles to Port Elgin. He climbed up the pole and began making adjustments. Suddenly he exclaimed, "Oh." His forehead had somehow touched the live wire. He threw up his hands which touched the wires, the current badly burning his fingers as it passed through the body. It was all over in an instant. Two doctors used their best efforts for two hours but without avail.

Walter was well known in Walkerton, having been born here, and having lived always here or hereabouts. He was a genial, clean living young chap, well thought of by all. On the football field he was hard to beat. He was a member of the famous Walkerton team which won the Ontario Championship in 1912 and for two years was on Championship Mildmay teams. It is recalled also that the year Walkerton had a top notch lacrosse team, Arthur was on the line up. While in the employ of the Saugeen Power Co. he had charge of the construction of the power lines to Mildmay and Formosa, and it is only a few months ago that he was sent to Southampton.

Deep sympathy is felt for the bereaved parents and family, all the more so owing to the shockingly sudden nature of their loss. In the family of seven brothers this is the first break. The brothers and sisters are:—

William of Cleveland, O; Arthur of Sandusky, O; Ed. of Orangeville; Eugene of Calgary; Jos. and Alfred of Walkerton; Tilly of Pittsburg, Pa; Lillian and Etta at home.

The funeral was held on Wednesday morning and was very largely attended. Service was conducted by Rev. Father Haller. The pall-bearers were. Herman Runstadler and Lawrence Drumm of Walkerton; Harry Godfrey and David Weber of Mildmay; Jos. Diemert of Preston, and J. Fedy of Formosa. Among many beautiful floral tributes were wreaths from the Walkerton and Mildmay football boys; wreath from Robertson and Rowland, and wreaths from the members of the power staffs Walkerton, Southampton and Formosa; besides many from individual friends and relatives.

MEASLES NOT STOPPED

160th Batt. May Still Be Held In Walkerton All Summer

The epidemic of measles may yet keep the 160th Battalion in Walkerton all summer. Last week it was thought that the spread of the disease was stayed but a few cases still keeps cropping up. At time of going to press Lt.-Col. Weir is in London consulting with the D. O. C. and until his return it will not be known how the District Authorities feel about the proposition of taking the Battalion to London. In any case the Battalion will not leave until Monday June 12th.

Charged With House-Breaking

A constable from Palmerston arrested Peter McGillvary, of the 160th Batt, on a house-breaking charge on Friday and took him to Palmerston for trial. The offence, which McGillivary is alleged to have committed, was committed before he joined the Battalion. McGillivary is a married man and hails from Owen Sound.

✣ ✣ ✣

Charge Not Proven

In dismissing the charge against Amos Fitzell, an aged farmer of Kinlough of seducing a young girl, Judge Klein expressed the opinion that the prisoner was guilty, but stated that for a case of that kind confirmatory evidence was necessary. Fitzell is over 70 years of age and the girl is 16 years old. Crown Attorney Dixon prosecuted and O. E. Klein app[illegible] for Fitzell.

The Bowmanville Statesman says: "One of our esteemed subscribers who had fallen a few years in arrears, when asked for payment, showed a magnanimous spirit not always manifested by persons who become delinquent and are requested to pay. He wrote the editor a very nice, courteous letter, in which he says he owes us an apology for the neglect of payment and expresses appreciation of our unlimited patience. He enclosed enough money to pay in advance to January 1, 1920." A generous Telescope subscriber beats that, with his label reading "January, 1922." Some of these days we are going to get his picture framed and hang it on the wall.

✣ ✣ ✣

For the Soldiers

Wednesday June 8th is the last day we can give the soldiers a treat. Everybody send pies and cakes to the Council Chamber from 12 to 4 30 p. m.

✣ ✣ ✣

Donations to Red Cross.

Mr. K. M. Taylor, treasurer of the local branch of the Red Cross Society acknowledges the receipt of $12.08 from the pupils of the Walkerton Public School and $30.00 from the congregation of the Carlsruhe R. C. Church.

✣ ✣ ✣

$1000 to Patriotic Fund.

The Carrick Council, at its meeting on Monday, was presented with a petition bearing the names of 188 ratepayers, asking that the sum of $1000 be granted to the Patriotic Fund. The Council readily complied with the petition and granted the sum asked for. The stigma has been partially removed by this grant.—Mildmay Gazette.

✣ ✣ ✣

New Color for Stamp.

Hon. T. Chase Casgrain, Postmaster General, announced in Parliament that it had been decided to print all future two-cent stamps marked with the additional one cent for war tax making them really 3ct. stamps, in a new color. The green will remain the color for the one-cent stamps while the war-taxthree-cent stamp will be in a new color.

✣ ✣ ✣

Change in Time Table

The following changes in C. P. R. passenger train service go into effect, Monday, June 5th. Morning train will leave at 6.30 a. m., arriving at the the Union Station, Toronto, at 11.35. Afternoon train leaves 3.10 p.m. and arrive at the North Toronto or Yonge Street station at 8.10p.m. The evening train from Toronto to Walkerton at 5.25 p. m. will leave the North Toronto depot, the morning train from the Union station at 8.10 a. m.

✣ ✣ ✣

Tommie's Big Day.

A little fellow, Tommy Brent, son of Mr. and Mrs. John Brent of Chesley, not yet three years old, got away from his mother here on the holiday and wound up by wandering over two miles from home and nearly getting run over by the C. P. R. passenger train. Mrs. Brent was staying with friends in the East Ward and when the boy failed to appear she thought he must be playing with some of the neighbours children. When he could not be found, the mother became alarmed and had the whole town thoroughly scoured but without result. The next seen of Tommy was in the middle of the afternoon. The engineer on the afternoon C. P. R. train saw a small object ahead beside the track about two miles west of the town. There was Tommy sitting unconcernedly beside the track, and escaped being run over by a narrow shave. He was brought to town and turned over to Chief Ferguson, who took the little fellow home, gave him a thorough cleaning up and had him well cared for until he could be restored to his distracted parent.

NEWS ABOUT TOWN

June.

Mr. Harry McCrum was in Galt the first of the week.

Girl wanted for steady position. Apply at Telescope.

Mr. Thomas E. Attwood spent the week end in Toronto.

Mrs. (Col.) Weir is the guest of Mr. and Mrs. H. A. Stephan.

Mrs. H. M. Lay arrived home from New York Tuesday night.

Communion Service will be held at Knox Church next Sunday.

See the boys Shoes we are clearing at $1 25. Ramsey the Shoeman.

Mr. A. E. Sherrington is laid up at present with a carabuncle on his hand.

Miss Mary Bauman of Berlin spent a few days last week with relatives here.

Kolpin and Ermel delivered a new Dodge car on Saturday to Mr. John Wilton.

The excavation is completed for the new heating plant at the Baptist Church.

Rev. Thos. Wilson was a speaker at the Red Cross meeting at Ripley Tuesday night.

$2.35 Women's patent and gun metal pumps in the window. Ramsey the Shoeman.

Miss McCartney has been the guest of her cousin, Miss Florence Cunningham this week.

In stock, Women's high top White Canvas Shoes, White Heel at Ramsey's Shoe Store.

Mr. Wm. Patterson is at Aylmer at present, putting in a crop on his newly acquired farm.

The Methodist Leaguers gave an enjoyable social evening for the soldiers on Monday night.

Miss Montgomery had two growths removed from her head at the County Hospital on Friday.

A. E. Miller, managing editor of the London Free Press, was a caller in town on Saturday.

Mr. W. M. White has an attack of blood-poisoning in his hand which developed from a finger bruise.

Mrs. H. Brandon of Toronto came up to see her sister Mrs. Malcolm Thompson who has been very ill.

Mrs. R. J. Hepburn and two children arrived home last week from a visit to Montreal and Atlantic City, N.J.

Lance-Corp. Hugh Wilson of the 110th Perth Batt. spent a few days this week with his sister, Mrs. L. A. Eedy.

Rev. G. C. Rock and Rev. J. McLennan are attending the Annual meeting of the Baptist Association at Clinton this week.

Sergt.-Major Leslie Huether of the University Company, Toronto, spent Sunday with his parents, Mr. and Mrs. J. B. Huether.

Rev. D. A. Walker and Mr. J. B. Huether left on Monday to attend the Hamilton Methodist Conference which meets this year at Simcoe.

Miss Caldwell of Durham, was the guest of the Misses Rife this week. She sang beautifully "Come Ye Disconsolate", at the Methodist Church Sunday night.

Mr. Justice Clute refused about forty applications for naturalization at Chancery Court sittings here last week. He gave the opinion that aliens could not become citizens during war time.

Mrs. Margaret Rodgers, 9 Spruceside Avenue, Hamilton, Ont, announces the engagement of her youngest daughter, Mina M., to Dr. Herbert H. Sinclair, only son of the late Dr. Laughin Sinclair, Walkerton, Ont., the marriage to take place in June.

A recent letter from Wilbur Cryderman stated that he was well and getting some good hospital experience at Salonika. Wilbur has been promoted to the rank of Sergeant which is as high rank as an undergraduate in medicine is permitted to go in the hospital service.

Mr. Joseph Beitz of Dunbar, Wisconsin, arrived in town Thurday last for a visit to the old home town and vicinity, having spent nearly 30 years in the timber business in Northern Wisconsin where he has made good. He has three sisters living around here Mrs. Joseph Batte sr. of Walkerton; Mrs. M. Fehrenbach, of Hanover and Mrs. Ellig of Ambleside with whom he will spend his vacation.

Mr. R. E. Truax, M. P., and Lieut.-Col. Hugh Clark, M. P., both voted right on the bilingual question. Mr. Truax did not follow his leader. Plainly, this is an English speaking province and we are with the Government on this bilingual question. Another thing we desire to state is that we will not support any man for parliament who takes any other stand. We do not see any valid reason for [illegible] the F[illegible]

Wool wanted.—S. A. Rife & Co'y.

"Swan" Fountain Pens at Hunter's.

Delivery boy wanted.—Apply to Stephan Bros.

10 cent clear nipples, 5 cents at Sievright's Drug Store.

Mass Meeting here to-day for organizing Bruce Patriotic League.

Miss Ruby Norrish of Drayton spent Sunday with her mother, Mrs. W. Norrish.

Bandsman Harry Galbraith of the 164th Batt. Milton, was a visitor here on Sunday.

Miss Marg. Kroetsch of Regina is visiting her parents, Mr. and Mrs. H. B. Kroetsch.

Mr. Clayton Tovell is supplying as organist for St. Thomas' Church for a short time.

The young son of Mr. A. McIllwain had his lip badly cut by a flying stone, requiring several stitches.

Miss Capple Spence returned to her home in Southampton on Tuesday after spending a week here.

Mr. Frank Harris' fractured ankle is making good progress. He is now able to walk about a little with the support of a cane.

Mr. Charles Stephan is away a short time recuperating from his recent illness. He is spending the present week at Toronto.

The Entertainment Committee of the I. O. D. E. contemplate giving a garden fete on the Armoury lawn shortly. The date will be announced later.

Albert Smith, formerly of the G. T. R. has signed up with the University Company at Toronto, and is at present taking a musketry course at Niagara.

Pure fruit Flavours exclusively are used in the fillings for Liggett's chocolates which are sold and guaranteed by all Rexall Drug Stores.—A. P. Sievright.

Men of Sedentary Habits find Rexall Orderlies the ideal laxative—their action being gentle and natural. Sold only by Rexall Drug Stores 15c and 25c boxes.—A. P. Sievright.

The Sacrament of the Lord's Supper will be administered at Knox Church on Sunday morning. Preparatory Service will be held on Friday at 8 p. m., conducted by Rev. Mr. McLean of Hanover.

Twenty-five hundred lbs. of old papers were collected by the school pupils on Saturday. This makes a total of nearly four tons for the month. The collection is now ended but may be continued.

Jos Schnurr, driver of the Formosa Brewery, was fined $1 and costs amounting in $8.81 in all, by Magistrate James Tolton on Friday, for using grossly insulting language to Valentine Wissler.

Pte. Bill Ferguson, son of Chief Ferguson, was given six months relief from the Wellington Battalion last week owing to physical disability. Bill is home trying to get into shape for duty at the end of that period.

Mr. and Mrs. Nich. Obiheiser, and daughter, Mrs. Ed. Obiheiser, and Miss Nellie Schell of Berlin, and Mr. Joe Diemert of Preston, were among those who were here to attend Walter Schnurr's funeral yesterday.

Jas. Elder, A. Thompson, A. Sandford, Alex. Thompson, Wm. Stimson and E. W. Martin, of the 160th, who are billetted at the home of Mrs. Elwell, presented her with a handsome chair on Wednesday of this week. The boys took this way of showing their appreciation of their landlady's goodness to them during their sojourn in Walkerton.

The hackneyed old phase, "Now is the time to advertise," has special pertinence just now. It is in time of prosperity that money is made. As the result of big crops, demand for war munitions, etc., the country has reached a high stage of prosperity. There is plenty of money in circulation, and the people are in a mood to buy liberally. In such times as these advertising pays more generously than ever. The people are hopeful and confident, disposed to anticipate their wants, to buy the best qualities, and to purchase things they would not have felt they could afford a year ago.

Merchants ought to be able to double their trade under these conditions. But they can't get it by waiting for it. They must attract more attention, take a little more newspaper space, describe their goods a little more fully. A great deal of money will be spent in the next six [illegible]

Dr. Malcolm McKechnie, who was here spending a few days with his parents Mr. and Mrs. D. McKechnie, left on Monday for Winnipeg where he has received a good appointment in connection with the A. M. C.

Dr. Stalker had a letter from his son Jim, who is in with England with the cyclist corps, stating that they are having delightful weather over there. Jim arrived in England three weeks ago, having sailed on the Olympic.

Mr. C. W. Cryderman, collector of Inland Revenue, received word from the Department on Tuesday that he had been successful in passing the excise promotion examination, which means that he will be rated in a higher grade in the Civil Service.

Chesley is making great preparations for their military celebration on Saturday. It is expected that Premier Hearst and Rev. Robt. Johnston D. D. will be present to present the colors to the 160th Batt. on behalf of the donor, Mr. M. A. Halladay.

The case brought by John McPherson, a Greenock farmer, against Freeman Taylor, implement agent in Police Court was dismissed by Magistrate James Tolton. The case arose through a dispute over payment for a wagon. Taylor came and took the wagon away, whereupon McPherson laid a theft charge against him.

Father Cadot, the little French priest at Cake Croker, was down this week on a visit to his Indian boys of the 160th. Father Cadot exerted a great influence in the recruiting [illegible] even went so far as to turn his house into a club room for the soldiers. His many sacrifices to help the boys and the cause are much appreciated here.

The newspaper fraternity of Bruce was well represented here on the Twenty-fourth. Among the publishers we noted were:—J. J. Hunter, Kincardine Reporter; E. R. Sayles, Port Elgin Times; Wm. McDonald Chesley Enterprise; D. McKenzie, Paisley Advocate; J. Johnston, Mildmay Gazette; Geo. H. Mitchell, Hanover Post; P. Ramage, Durham Review.

Mr. David Pinkerton, an old and well-known resident of the Enniskillen neighbourhood, was suddenly stricken with paralysis while driving home from Walkerton on Friday. His whole left side is paralyzed but he is showing signs of recovery. Just ten days previous, his eldest brother, Wm., had a stroke and is reported to be in a very serious state.

Ladies and gentlemen who are bald or who have thin hair, see the beautiful Human Hair Styles in Ladies Transformation Switches, Wavy fronts, Pompadours, etc. Gentlemen's Toupees and wigs, all got up to suit all cases of Baldness. It makes you years younger looking. No charge for Tellustration. At Hartley House Walkerton, Tuesday, June 13th.

A great deal has been said about scarcity of help on the farm but conditions in the towns and cities threaten to become worse if anything. Only the other day we noticed a well-known Brant farmer, Mr. Jas. Crawford, in town helping his brother-in-law, Mr. Peter McCannell at carpentering. How would the farmers like to try a turn at keeping the wheels moving in town? We believe it would make them more contented than ever with rural life.

Mrs. Wisser and Mrs. Geo. Martyn attended the Annual Convention of the Imperial Order Daughters of the Empire at Toronto last week to which the former was the delegate from Walkerton Chapter. Among the entertainments provided for those attending the meeting were a reception at Government House by Sir John and Lady Hendrie; a musicale in Convocation Hall under the auspices of Mrs. Gooderham, President, and the other officers of the National Chapter; an interesting and instructive lecture on the War in France with views taken on her recent visit by Capt. Henshaw of Vancouver, and a visit to the I. O. D. E. Preventorium in Toronto. The meetings which were held in Columbus Hall took up the greater part of three days and were an inspiration to all who attended.

Western Reader Writes Telescope

From his farm at Youngstown, Alta., in the Medicine Hat district, Mr. H. Hehn, an old Walkerton boy and Telescope reader writes interestingly about conditions in that part of the country:—

This district consists of open prairie of very rich soil and proves to be a great wheat producer. The 1915 crop yielded from 35 to 60 bushels per acre of wheat and all the way from 60 to 100 bushels of oats. At present the town is still flooded with wheat of 1915. It is estimated that one half of the production of grain has not yet reached the market, while the new crop is already showing its green leaf and well on covering the ground with abundance of moisture, it looks promising for another good harvest. Youngstown is located on the C. N. R. between Saskatoon and [illegible] and the amount of business [illegible]

Removing To Guelph

After almost a life time spent in Walkerton, one of our most highly regarded families is arranging to remove elsewhere in a few weeks. Mr. J. B. Huetter, in company with his brother-in-law, Mr. Howard To[illegible] of Red Deer, Alta.—has bought [illegible] grocery and meat business of W. [illegible] McCrae & Son of Guelph, the business which is one of the largest of its kind in Western Ontario to be conducted from now on under the firm name of Huetter & Todd. The name Huetter has been for many years in Walkerton and for many miles around, a synonym for aggressive up-to-date merchandizing, and with the practical experience, also of Mr. Todd as a grocery merchant, the new firm has everything to warrant the highest success. The removal of Mr. and Mrs. Huetter will be regretted by a very wide circle of personal friends, and possibly no where will their loss be more severely felt than in the Methodist Church, where both have been active leaders in the work for a number of years. [illegible] younger [illegible] Huetter, H. A. [illegible] although [illegible] him away [illegible]

sighted, self-possessed, putting aside his attempt to utter his repentance with gentle words about friendship. Frank might well worship her in his boyish fashion; he was quite right he had never seen Mildred Fairfax but for his own part, Gilbert, had he known her intentions, instead of gratefully blessing good Mrs. Leicester, would rather have been inclined to complain to her, very ungratefully and unjustly. "You have

'Unsettled the pure picture in my mind;
A girl who was so perfect so distinct,
I detest all change,
And most a change in aught I loved long since.'"

That was the worst of it. He could not even go back to his dream. Call them up as he would with anxious efforts, his memories of his old love had been slowly dying, day by day, ever since he came to Culverdale. The actual recollections remained, cold, dead facts, but nothing more. There were moments when Tiny Vivian, just because of her youth and hopefulness, seemed nearer the true spirit of his former love than Mrs. Austin. It was not unnatural. If we idealize the past, and most of us do, there is an interval after which old books should not be reopened, old haunts should not be revisited, nor old loves sought out, except with a deliberate view to disenchantment. We expect too much. No sympathy is so perfect as that which we imagine. And Gilbert South had been especially fanciful and dreamy in his recollections. He had had, as it were, just a glimpse of Mildred's pure, girlish love, and then he had been drawn away by a woman older than himself who wanted a little amusement. He had been made a fool of, coarsely, by a practised flirt. Afterward he attempted to go back; he wrote a dozen letters of [illegible] and repentance, and of course sent off the worst. It was a failure, and partly in pique, partly in real disgust at himself, for he had a delicate taste, and his first faithlessness left an unpleasant flavor in his mouth, he swore constancy to Mildred's memory as he supposed, but in reality to himself as he would have had himself. It was that former self, as well as his former love, he had hoped to find again when he met Mrs. Austin.

With her it was different. She had trusted him, and he had failed her; the pain had been keen, but with a touch of scorn in it. And later, when the wound was healed and all bitterness gone, she thought of him, not unkindly, but as one whose nature was light and fickle. When she discovered how constantly he had looked back to that old love which she supposed was utterly forgotten, her memory awoke like the autumn blossoming of spring flowers.

On that last day all the interest seemed to be concentrated on the water expedition, as if it were indeed a voyage of vast importance. Nobody thought about the people who meant to call on old Mrs. Carleton; but one would have said that Frank and Mrs. Austin were going to discover a new island at least, and indeed the young fellow had such an impression concerning it as, if it happens to be verified, we call a presentiment. Mr. South and Tiny came down to the river to see them off, but, owing to some little delay in Frank's arrangements, they were obliged to go back, lest they should keep Mrs. Leicester waiting, and leave Mrs. Austin where she stood, a slim, dark figure at the water's edge. The dull gray surface, with its floating leaves and its grasses drawn by the silent current, was shaded by great groups of trees, whose dusky greenness was lighted here and there by gleams of autumn yellow. Mrs. Austin did not move; no breath of wind stirred the dark masses of foliage overhead; it was like a picture with something of melancholy stateliness about it. When Frank was ready the solitary figure disappeared from the bank, and they went gliding from under the shadow of the trees out into the wide, sunless fields.

Honestly, it was not a very beautiful scene. To Frank, who had known it all his life, the question of its beauty or ugliness did not occur; it was simply the river, and as such it had moulded his conception of all rivers. On its dark waters such childish dreams as he had known had embarked and set sail. As a boy he had fished there, just as four or five urchins were fishing now. They stared open-mouthed and silent, at young Mr. Leicester and his boat, but took no notice of the lady who looked with a musing smile at the little rustic group as she went by. Presently came a curve in the stream, where a clump of alders grew, and osiers leaned despondently over the water which was eating the earth away from their roots. The more distant prospect showed a monotonous variety of plowed land and pasture, with lines of trees following the hedges, and here and there a cottage or two and a bit of road. Mrs. Austin and Frank talked as they went. He told her how one bitter winter the river was frozen, and he skated to the farm where they were going now. He pointed out a curly house, and spoke of the people who lived there. He showed how far the floods had reached in a wet season, a muddy expanse in which little files of cropped willows seemed to wade knee deep, and the water washed through the gates of lost meadows. And he broke off suddenly in the midst of what he was saying to ask, "Where shall you be this time to-morrow?"

"Half way to London, I should think," she answered; "I don't know how long the journey takes."

Frank looked at her, and was silent. He wondered whether he should speak as they came back.

The Greens' house stood by the roadside a little way from the river. The farm buildings and some big stacks had a pleasant, prosperous air; but the house itself was an ugly little plastered box, with a bit of fireless garden in front, blossoming with prim, sulphur-colored dahlias. Frank did not seem to have much to say to old Green, after all. The two exchanged a few words, and then came to the little parlor, where Mrs.
a horse-h sof

lan to the farmer's wife. Frank was on very pleasant terms with his tenants, who evidently thought their young landlord a most important personage. Other people were "high," but vaguely "high," and a duke would not have impressed Mrs. Green as much as Mr. Leicester from the Manor House. The Prince of Wales, perhaps, as a young man residing in palaces, and holding a well defined position as the Queen's son, might have eclipsed Frank, but it would have taken a prince to do it. Mrs. Austin perceived, with a single smile, how unimportant she was compared with her companion, but she was not in a mood to be amused by that or anything else that afternoon. She was glad to leave the house, to escape from hospitable offers of cake and home-made wine, and to find herself once more upon the road. Even then, however, the old farmer insisted that Frank should look at a shed which was not satisfactory, and she had to wait while the matter was discussed.

There was a little pond, with neat white railings, just opposite the house, and she strolled across and stood by it with a mysterious sense of loneliness and desolation upon her. Still as the afternoon was, she fancied that there was a mournful little rustling in the boughs of a stunted oak which grew a few yards away. The little pool mirrored a vacant gray sky. It was absurd, and yet she felt as if she would have given anything to see Gilbert South coming toward her; instead of which, it was Frank who had torn himself away from the farmer and darted across the road.

"I've kept you waiting," he said; "I'm so sorry! Oh, and you are tired, aren't you?"

"A little," she allowed. "Nothing to matter."

"It's too bad of me! What can I do?" he exclaimed, with anxious solicitude. "Come in again, and let Mrs. Green make you some tea."

"Oh, no, no," she said. "I would rather go back."

Frank was in despair. "What a brute I am!" he reproached himself.

Mrs. Austin fairly laughed at the intensity of his remorse. "What would you do if I were very tired?" she said.

He hardly dared to speak to her as they went back, and perhaps it was owing to that enforced silence that later he recalled with especial vividness the plash of his oars on their quietly winding way, the little ripples [illegible] among the dry autumnal reeds on either bank, and the light from the west, where a pale sun struggled feebly through the clouds, falling coldly on the beautiful face before him. For Mrs. Austin, meanwhile, a soft current of thought flowed with the river, setting ever more strongly toward a final resolution. If it rested with her to make Gilbert South happy, why should she not do it? He was not what she had once imagined him, yet he was truer and better than she had believed him during the years they had been parted. There was no man living whose thoughts and memories, nay, whose little tricks of speech and gesture were bound up with her past life as Gilbert's were; and the recollection of his troubled face haunted her like a reproach. "Why not?" she said to herself over and over again, to the measured sound of Frank's oars; "why not—why not—if it would make him happy?"

"I don't know why it is," she said to young Leicester, when they had landed, and were walking slowly up to the house, "but I have had a feeling all this afternoon as if something were going to happen."

"That's funny," said Frank; "so have I."

"Have you, really? If I had known that, I might have wondered whether you were really going to drown me. But here we are, safely landed, in spite of our forebodings."

He surveyed the sullen sky. "Perhaps there's thunder in the air," he suggested.

"Perhaps. That might account for my feeling tired. I've been a dull companion, I fear."

"No," Frank was begining to say, when he stoped short. They had just come in sight of the house, and he stared at a farmer's chaise, driven by a laboring man, which was going away from the front door. "That's old Clayton's trap," he said; "what on earth has that come here for? And—why surely that's my mother coming to meet us—they can't possibly have been there and got back by this time!"

"There has been an accident!" said Mrs. Austin, with sudden certainty. "Go and see what has happened. Your mother is safe, but——"

Frank ran forward. It was his mother hurrying down the drive. "What is it?" he said.

"Oh, Frank!" she cried. "Oh, my dear boy! Those dreadful horses!"

"What's the matter? The new horses?"

"Yes. We went up Upton Lane because I wanted to inquire about Barker's wife—by the railway cutting you know. She liked to see one, if it's only for a minute—at least she did like, poor thing!"

Frank stamped impatiently. "—— Barker's wife!" he said. "Is anybody hurt? Is anybody dead?"

"She's dead—she died yesterday—nobody else."

"Oh, go on! go on! What happened?"

"Why, I went in just to speak to poor Barker——" Barker's final destiny was so nearly settled that Mrs. Leicester gasped and hurried on—"and the express rushed by—at least, I think it was the express—they shouldn't make them scream so, Frank; it isn't whistling, it's a downright scream—and the horses bolted down the lane to the left, and he couldn't hold them——"

"The lane to the gravel-pit!" said Frank, in a horror-struck voice.

"Yes! And Tiny and Mr. South! But they dashed against a bit of wall at the turning, and were thrown out."

"Are they hurt—much?"

"No, nobody hurt, only shaken. But oh, Frank!"

"The horses?" said Frank, greatly relieved.

"Nothing much. Robinson says it's quite wonderful. There's no harm done."

"What then?" Frank grasped his mother's arm. "There's something more. Tiny is hurt—I know she is! Why don't you say so?"

"No, she isn't; she isn't, indeed, nor Mr. South either."

"Well?"

"They are not hurt," said Mrs. Leicester, desperately, "but they're engaged to be married!"

She looked as if she expected an explosion, but none followed. Frank's hand unclosed and dropped by his side and he stood for a moment, staring dumbly at

SUNDAY SCHOOL LESSON

June 4, 1916. Lesson X.

The Call of the West.—Acts 15: 36-16: 15.

Commentary.—I. Paul's second missionary journey begun (vs. 36-41). Paul and Barnabas had been companions in the first missionary journey, and when the time seemed to be at hand when the second journey should be undertaken, Paul suggested to Barnabas that they visit again the places where they preached on their former journey. Paul appears to have come into the position of leader, as might well be expected from his zeal and devotion in the work of the Lord. Barnabas was ready to go, but he desired to take with them on this journey his nephew John Mark. Paul was not willing that Mark should accompany them, for he had turned back at Perga on their former journey. Barnabas had faith in Mark and was determined that he should go as their helper, and Paul was as determined that it was not best to take him. When Paul and Barnabas could not come to an agreement in this matter, it was decided that Barnabas and Mark should go together to Cyprus, and that Paul should take Silas as his companion in labor and go to Asia Minor. "The result to the church was that two missionary journeys were undertaken instead of one. Though the apostles might differ in their estimate of Mark, they were at one with reference to the work of the gospel. Barnabas is mentioned no more in the Acts after this chapter. His name occurs in Paul's Epistles (1. Cor. 9:6; Gal. 2:1, 9, 13; Col. 4:10), in which last passage, written no doubt after the events here related, we can see that Mark had been again received as a fellow-worker by Paul. We learn, too, from 2 Tim. 4:11 and Philemon 24 that Paul became warmly attached to him afterward."—Lumby. These workers went northward from Antioch in Syria and turned westward into Cilicia, visiting the churches and giving them instruction and encouragement.

II. Churches revisited (vs. 1-5). In their journey Paul and Silas naturally came first to Derbe and then to Lystra. That there were disciples at Lystra is evident from Acts 14:20, and it is probable that Timotheus (the Latin form of Timothy) was among those who stood about Paul after he had been stoned. His mother was a devout Jewess and his father was a Greek. The apostle saw in him an efficient helper and took him with him on this journey. Because his father was a Greek and there were many Jews in that region who knew that Timothy had not been circumcised, Paul had him conform to the Jewish law in this regard, so that there might be no prejudice against him. This band of workers went from church to church announcing the decision of the Jerusalem Council, and confirming the Christians in the faith. Their labors resulted in many additions to the Church. That there was a rapid increase in the number of converts to Christianity is evident from the expression used in v. 5, that the churches were "established in the faith, and increased in number daily". From this record we would conclude that an extensive revival was in progress, considerably like the work of grace at Jerusalem that followed Pentecost.

III. Paul's vision at Troas (vs. 6-10). 6. Phrygia—This region lay north of Pisidia and northwest of Lycaonia. Galatia—Galatia was northeast of Phrygia. This region is here mentioned for the first time. Paul's letter to 'the churches of Galatia'' (Gal. 1: 2) shows that Christianity was established there, and it is not improbable that on this journey he declared the gospel so effectively that permanent bodies of Christians were organized. Forbidden of the Holy Ghost—The Holy Spirit was directing the missionaries in their movements and was leading them onward to their field of labor in Europe. They must not at this time tarry in Asia Minor. Asia—We now apply this name to the entire continent, but at the time when this missionary journey was made Asia was a Roman province, including only the extreme western part of what we now call Asia Minor. 7. Mysia—A region lying in the northwestern part of Asia Minor. Assayed to go into Bithynia—Paul and his company attempted to go northeastward into the province of Bithynia. The Spirit suffered them not."—R. V. The Lord did not allow them to go into Bithynia, for their labors were needed in another region. 8. Passing by Mysia—Mysia was a part of the province of Asia and Paul had been forbiden to tarry there. Troas—A port in Mysia, on the Aegean Sea.

2. A vision—A clear and definite impression was made upon Paul's mind. The word means something seen and does not necessarily imply that the beholder was asleep, yet the fact that it occurred in the night might indicate that the apostle was asleep at the time. A man of Macedonia—Macedonia was a Greek province across the Aegean Sea from Troas. Whoever this personage was, whether a representative of Macedonia or an angel, Paul recognized him as "a man of Macedonia" with a message for him. Come over .... and help us—This was a call of pagan need for spiritual light. Paganism failed to satisfy the longings of the soul and application was made for the gospel of Jesus Christ. "It was the voice of the sick inquiring for a physician, of the ignorant seeking for wisdom, the voice which ever since has been calling on the church to extend the gospel to heathendom.—'Come over .... and help us.'"—Howson. 10. We—This indicates that Luke joined the company at Troas. Assuredly gathering, etc.—The apostle had no doubt as to the particular place where the Lord would have him labor. His duty was clear to carry the gospel into Europe. A clear conviction of duty goes a long way toward assuring success in the work of the Lord. The apostle could not possibly have any misgivings with regard to his field of labor, and he could move forward with the utmost confidence that his work would be blessed. A new continent was opened to the apostle to the Gentiles.

IV. Work begun in Europe (vs. 11-14). 11. Loosing from Troas—Sailing from Troas. With a straight course—The wind was favorable and in one
lled sixty miles in

thracia and the next day reached Neapolis, the seaport of Philippi, having sailed seventy-five miles. At another time it took Paul five days to travel the same distance. Samothracia—A rocky island in the Aegean Sea. 12. To Philippi—Ten miles from Neapolis. The journey could be made by land or by the river. Chief city—The first city of that region. A colony—A Roman colony was composed of citizens transferred from Rome. They had the organization and customs of the city of Rome, and their city was a miniature of Rome itself. Those who composed the colony were still enrolled as citizens of Rome. There were rich gold mines a short distance north of Philippi. 13. On the sabbath—Probably the first Sabbath after Paul's arrival at Philippi. Where prayer was wont to be made—It seems that there was a place of prayer by the river outside of the city, they went to meet those who would worship the Lord there. Spake unto the women—Those who were interested in the worship of the Lord were women, "and of those women, one was a foreigner and a proselyte, faithful, perhaps, when the birthright Jews were faithless, and to her the gospel is to be an exceeding great reward." 14.—Named Lydia—The name may have been given to her from the town in Lydia. Thyatira, from which she came. This town had long been noted for its manufacture of purple. Whose heart the Lord opened—The Lord moved her by His Spirit to accept the gospel, and she was obedient to the divine impression. Attended unto the things which were spoken—Her hungry heart received with gladness the message which the Lord's servants brought, and she believed the gospel. 15. Was baptized, and her household—Baptism was administered as a sign of the inward washing of the heart and as a testimony to the world of discipleship with Christ. Lydia's household must have included children or servants or both, and all were baptized. Abide there—Thus a home was open to the apostles in Philippi.

Questions.—Why did Paul and Barnabas separate? Where did Barnabas go? Where did Paul go? Whom did Paul take with him? Who joined him at Lystra? Where did Luke join the company? How did the Lord show Paul that they were to go to Macedonia? Where was Macedonia? In what city did they preach? Who was Lydia? What was her native city? Where did the missionaries go to preach to the people?

PRACTICAL SURVEY.

Topic—Progress in missions.

I. Enlarged forces.

II. Extended territory.

I. Enlarged forces. Paul felt he was not called to spend a peaceful though laborious life at Antioch. He felt a tender solicitude for the converts he had won on his missionary tour and an earnest longing to see them again. They were but weak churches in the midst of sinful communities, from which they had lately been taken. They needed careful supervision. There was perfect agreement between Paul and Barnabas as to the visitation of the churches they had established, until there arose a question as to companionship. Each from his own point of view aimed at the good work of Mark and the furtherance of Christ's kingdom. The difference of opinion proceeded from as much excellence of one kind in Barnabas as of another in Paul. They could not agree, and accordingly they wisely decided to divide the field, and provide sufficient workers for both. Paul and Barnabas as to the visitation of the churches they had established, until there arose a question as to companionship. Each from his own point of view aimed at the good of Mark and the furtherance of Christ's kingdom. The difference of opinion proceeded from as much excellence of one kind in Barnabas as of another in Paul. They could not agree, and accordingly they wisely decided to divide the field, and provide sufficient workers for both. Barnabas and Paul had been in most trying circumstances together, contending with bigoted Jews and idolatrous Gentiles. They stood together in the council at Jerusalem in behalf of missions to the Gentiles. They owed much to each other. When Paul first went to Jerusalem after his conversion, Barnabas was the first to trust and welcome him as a disciple. That same trustful spirit was exhibited in behalf of Mark. His encouragement combined with the sharp tonic administered by Paul proved helpful to the young man. There were mitigating circumstances in the controversy. God did not allow honest differences among his servants to hinder the progress of the gospel. We may see a wise providence in their separation, if not in the means by which it was brought about. The Holy Spirit was manifestly present to assist the apostles in their work. God appraised them by their essential, abiding spirit of love and devotion. On Paul's return to Lystra the ordination of Timothy to the gospel ministry took place. As a fellow laborer with Paul he might have been considered a recompense for the cruel stoning which the apostle had received there. His thorough knowledge of the scriptures, gained through the pious care of his mother and grandmother, gave strength to his own faith, and made him capable of dealing with the Jews. His inheritance, both being Jewish and Gentile, gave him influence with both classes. It was not breach of Paul's stern policy, that under circumstances so peculiar he should respect a temporary prejudice in circumcising Timothy. When it was a question of maintaining principle Paul would not consider Jewish prejudice; when a question of conciliating and preparing the way way for the gospel, he put his own views in the background.

II.—Extended territory. In planning his journey Paul depended upon his knowledge of the churches and their needs. He was turned from his course by direct supernatural interposition and called from Asia to Europe. While Paul was urging his way to the East, the Holy Spirit was constraining him to go westward. Twice Paul and his company were held in check. It needed quite a series of unusual providential indications to turn them toward Europe. Supernatural guidance was granted. The decisive command was given by vision to Paul. He recognized the divine summons. He had sufficient reason to believe that God's will was made plain. It seemed an unequal contest into which the apostle and his little band entered, led by the vision which they interpreted as the divine monition. The introduction of Christianity into Europe began in an open air service by the riverside. The day, the place, the persons there assembled, the visit of Paul and his company, made up the opportunity which appeared so humble. The conquest of Europe for Christ was heralded in the salvation of one woman. The church which was raised up at Philippi and which afforded Paul such joy, began with the conversion of Lydia. She exhibited humility, teachableness, thankfulness to God, busy love and kindness and a good example. She unhesitatingly made public acknowledgment of her faith. Hospitality was her choice of immediate usefulness. No sooner had she received Christ into her heart than she welcomed his servants into her home. Thus the gospel entered Europe.

T. R. A.

PEASE SENSE AND NOUSENSE

(New York Tribune.)

It is perfectly clear that Germany is beginning another campaign for peace. Americans should not mistake the machinery that is being employed, nor be surprised at the sudden outbreak of peace talk wherever Germany has friends or influence. This is one more German campaign skilfully directed, but designed to serve German purposes and having no basis in fact in any of the Allied capitals.

What are the facts, as contrasted with the fictions in the peace discussions? It will not be difficult to make peace now if Germany, the only nation which is ready to talk peace, is willing to pay the price that is asked, but is she? This may be doubted.

If Germany is prepared to accept the status quo ante in Europe, permit Russia to occupy Constantinople and to cede Alsace-Lorraine to France, there is little question as to the peace arrangement. Italy would insist upon the Trentino and Trieste. Conceivably she might take the Trentino, and a protectorate of Albania, deduction being made for the northern corner.

But the key of the whole question is Alsace-Lorraine. Germany might be willing to accept the status quo ante, to evacuate Poland, Belgium, Luxemburg and Northern France. It is exceedingly doubtful if she would do this, but unless she is willing to give back what she took from France in 1871 no peace is yet possible in Europe.

On the Allied side France has borne the greatest burden of battle and borne it with the greatest [illegible] victory of the Marne, won with barely a semblance of British support, really decided the issue of the conflict. The war has cost her not far from 800,000 lives. Many of her northern departments have been ravaged and her contribution has been beyond that of her Allies.

If France desires Alsace-Lorraine, Great Britain and Russia cannot do less than back her, and they will, to the end. There is no mistaking the fact that the whole country has fixed its heart on regaining what was taken nearly half a century ago. To-day Frenchmen speak of Lille and Strassburg in the same tone, in the same spirit. Both are occupied by the Germans, both are French. The war must go on until that which belongs to France is restored.

Alsace-Lorraine, the restoration of Belgium and Serbia, the occupation of Constantinople by the Russians; these are the only terms on which Germany can have peace, and unless she is prepared to offer these terms all discussion is empty. A year from now, if she still holds her lines, Germany may find her enemies too exhausted to insist upon the terms they now demand, but certainly not for a year yet will they accept less.

All talk about peace in this country which blinks the facts is nonsense. The Allies are fighting for the liberation of Serbia and Belgium; they are fighting for the liberation of France; they will not stop until they are defeated or exhausted. They are neither defeated nor exhausted, and any American interference will accomplish nothing of good and may have evil effects for us.

The fact that Germany desires peace is significant, but not over-significant. She has the gain of the war in hand, but it is expensive to retain. She is doubtless willing to part with a portion of her conquests. But her enemies are determined she shall give up all, and the conquests of 1870 in addition. Does any American believe Germany will yet do this?

Germany wants peace; so do her enemies; so even more do her allies. But Germany is not yet in any mood to make peace on the basis of the agreement which the Allies have set their hands to. She may be ready to evacuate Antwerp and Brussels, but what of Strassburg and Metz?

A great deal of nonsense will be uttered in this country about peace. But the nations that are fighting Germany have made up their minds to go on to a lasting peace, a peace which shall be lasting because it shall bring no profit to the nation which drew the sword to dominate its continent.

Great Britain, France and Russia will not agree to an end which will leave Germany master of Central Europe, from Hamburg to Constantinople and from Warsaw to Ostend. They will not agree to a piece that gives Germany a virtual protectorate over Belgium or an actual hegemony of the Balkans. They will not agree on a peace that leaves France insecure and still mutilated after her magnificent fight and her tremendous sacrifices.

If Mr. Wilson feels moved to action by the hints from Berlin and Rome, let him make inquiries in Paris, Petrograd and London. Let him ask our French friends how they feel about peace. Let him ask the Germans what they offer their foes for permission to use the seas and resume relations with the world. There is no disguise about the Allied terms. What about the German?

There can be no greater fallacy than to believe an exhausted Europe is clamoring for peace. France, the nation which has suffered most, is the most resolute. Great Britain, with her armies at last in the field, never in her history thought less favorably of peace save at the end of a victorious conflict. As for Russia, even the German press has ceased to talk about Russian weakness.

Germany can have peace by paying for it, but she cannot have it otherwise, and the place to apply is at Paris, not Washington. She can have it by giving back what she has taken in 1870 and in 1914-1915. But she cannot have it at any other figure, and German feeling to the contrary is evidence of Germany's failure to understand the temper of the enemy.

As for the Allies, they will do well to ignore any campaign on behalf of peace which has its centre in this country, whether official or unofficial. The German vote will be a factor in the next national campaign. Every German influence will be exerted to put the Administration into the breach to help along the peace movement. Let all the Allied nations remember that peace talk in America is German-procured save for a little honest pacifism, and let them act accordingly.

SUNDAY AT HOME

THE NOW.

Put hand to the work of to-day
With passion of joy and will,
To-morrow is as far away
As a star above a hill.

Though the torrent to cross is wide
And often stern in its flow,
On the fairer other side
The lilies and the roses grow.

Though the mountain is hard to climb
And rises bold from its base
Into the clear sublime—
Its top for repose has place.

If the zeal for your work endures
Your journey must onward be.
If the land is no longer yours,
What matter—accept the sea.

Your life is the life of your soul,
And your soul shall never die.
The now is your only goal—
You cannot the now deny.
—Alanson Tucker Schumann, Boston Transcript.

GOD SHALL WIPE AWAY ALL TEARS.

He shall swallow up death in victory; and the Lord God will wipe away tears from off all faces; and the rebuke of his people shall he take away from off the earth; for the Lord hath spoken it. Thy sun shall no more go down; neither shall thy moon withdraw itself; for the Lord shall be thine everlasting light, and the days of thy mourning shall be ended. The inhabitant shall not say, I am sick; the people that dwell therein shall be forgiven their iniquity. The voice of weeping shall be no more heard in her, nor the voice of crying. Sorrow and sighing shall flee away.

I will ransom them from the power of the grave; I will redeem them from death; O death, I will be thy plagues; O grave, I will be thy destruction. The last enemy that shall be destroyed is death. Then shall be brought to pass the saying that is written, Death is swallowed up in victory.

ANCHORAGE.

One of the sublimest doctrines a hundred years ago in the Methodist Church was the doctrine of full assurance. They knew they were treading the deck of a ship that could not sink, moreover, in sight of the great Taskmaster's eye. They caught His smile, and whether aloft or on deck, or below, they were assured they could not be wrecked by the incompetency of the pilot.

The ill-instructed Christian is safer than he knows; he is at liberty to throw doubts and fears overboard, and rise to the mastery of absolute certainty and safety. It must be so, it cannot be otherwise. There is no slow growth, it is set fast, fast for ever. Why? Because I hide in the bosom of the unchangeable one, past finding out, but near and warm and true and living, as when a mother comforteth.

The mystic has to watch his bearings lest he gets out of his depth. The idea of progress is a modern idea, the idea of anchorage is as old as the mountains, and older. The mystic is a man of vision, his eye is trained for long distance, he is daring, original, profound, but he must not forget to stay by his moorings.

The stars are anchored, and here abides the subtlety of eternal stillness. The very throne of God is anchored. No storm can break it, no enemy can cut the cable. Anchorage is the sublime law of heaven, earth and hell. The mystic goes deep down to the holding ground of surest anchorage. His prayer is: Hold me, keep me, guide me. Augustine says: "Just love God and you can do as you please." He meant that the moorings of a constraining love will keep a man safe forever.

Defining the Holy Spirit as "God Himself in action—always in action," the Dean of St. Paul's said the spiritual light is not the white radiance of eternity that never changes, but the light that comes into the world and shines more and more unto the perfect day. It is the light of all. And so the truth in the gospels is not a body of dogma; it is the power that makes us free. And life in the gospels is not a deferred reward of goodness, but an inexhaustible spring of divine energy. Just as happy human love transformed everything for the lover, making the grass greener, the sky bluer, and the sun brighter, so the Holy Spirit filled men with all joy and peace in believing, making them abound in hope through the power of the Holy Spirit. If at times this wonderful experience produced a sort of spiritual intoxication, it more often bore fruit in a calm and radiant courage, an untiring zeal in spreading the glad tidings, and a cheerful indifference to poverty, hardship and suffering.

I am lifted high above the mountains of space and time; how dim the distance! I cannot give dimensions, but I see diagrams, patterns, lines; I am attracted by the ever burning light, to a fire that goes not out, and there is a diadem power, a fragrance and a beauty, it is a vast symbol, burdened with personality, related to all, beneficial, claiming my enduring sympathy.

God is in all. He never gives in part. The universe moves towards us, controlled and inspired by Him. He never gives and keeps himself away at a distance. His hands are full. I gather round Him, however, revel in the expanding coronals that flash from the edge of that dark world, which is being eclipsed with the oncoming, long-promised story of an eternal day.

H. T. Miller.

Getting an Autograph.

A Munich boy of fourteen who had seen and admired many of Rudolf von Seitz's paintings was anxious to secure the painter's autograph, but did not know how to go about it. After much thought he wrote a letter, stating that he had send a case of wine to the professor's address and wanted to know whether it had been received. Thinking the matter of sufficient importance, the painter did not write, but called at the address given, met the boy's mother, and the fraud soon became apparent. The boy was thoroughly scolded and next day received this autograph note:

It often happens here on earth
That little rogues to great ones grow,
Some autographs for which you're trying
Can be procured without much lying.

* * *

It's the man with an elastic conscience who doesn't mind stretching the truth.

Was All Choked Up

Could Hardly Breathe.

BRONCHITIS

Was The Cause; The Cure Was

DR. WOOD'S Norway Pine Syrup.

Mrs. Garnet Burns, North Augusta, Ont., writes: "I caught a dreadful cold, going to town, and about a week after I became all choked up, and could hardly breathe, and could scarcely sleep at night for coughing. I went to the doctor, and he told me that I was getting bronchitis. My husband went to the druggists, and asked them if they had a cough medicine of any kind that they could recommend. The druggist brought out a bottle of Dr. Wood's Norway Pine Syrup. I started using it, and it completely cured me of my cold. I cannot tell you how thankful I was to get rid of that awful nasty cold. I shall always keep a bottle of Dr. Wood's Norway Pine Syrup on hand, and I shall only be too glad to recommend it to all others."

Dr. Wood's Norway Pine Syrup is a remedy that has been on the market for the past twenty-five years, and we can recommend it, without a doubt, as being the best cure for coughs and colds that you can possibly procure.

There are a lot of imitations on the market, so when you go to your druggist or dealer see that you get "Dr. Wood's;" put up in a yellow wrapper; three pine trees the trade mark; the price, 25c and 50c.

The genuine is manufactured by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review.

TORONTO.—General business on a solid basis. Within the last few days two competent financial authorities have expressed their faith that 1916 would not witness any set back in trade. Wholesale trade in Toronto is nearly all lines continues normal or better. Orders in drygoods houses continue to come in apace. Shoe firms report a brisk trade for immediate shipment, in spite of persistent advances. Fall placing orders have fallen off a little, because at the moment these are not encouraged by wholesalers. The leather trade is active, both for domestic and foreign account. Prices are on a high basis. The grocery trade is steady, with a firmer tendency in many lines.

MONTREAL.—The larger industries are as busy as ever, iron and steel and textile concerns being filled up with orders. Prices are firm in most lines. The grocery trade is about normal. Footwear houses and manufacturers have all they can do. Business is reported improved in hardware houses.

WINNIPEG.—Trade continues to show expansion. Retail drygoods firms have done a brisk trade. Demand at wholesalers from country dealers has been liberal and collections are good. With higher prices ruling in footwear, demand is brisk, due largely to fear that price lists will go still higher. Spring business has been good in groceries. Prices continue to firm up. Collections and remittances have been satisfactory and this is a stimulant to trade. The hardware trade is active.

CALGARY.—Trade in practically all lines of general merchandise is well maintained. This refers to drygoods, footwear, hardware and groceries. Improvement has been shown in settlements at wholesale houses and the retail trade throughout the country has the same to report.

VANCOUVER — Business conditions here, and in Victoria, are fairly active.

HAMILTON.—The movement of merchandise from retail houses has been fairly large, and this is reflected in demands from wholesale firms, which are doing a normal volume of trade. Collections have kept up well. Prospects are for a solid year in trade.

LONDON.—Spring trade has been good. Fall placing orders are fair.

OTTAWA.—Trade at retail and wholesale houses is fairly active. A steady call for most staple lines of merchandise comes from local and country stores, the bulk of it for immediate shipments.

QUEBEC.—In wholesale circles business as a rule continues satisfactory and the outlook promises well. Hardware and building trade show considerable activity. Local industries are well employed. Reports from country points are satisfactory.

Birds and Disaster.

Tradition has it that a late swallow brings luck to the hostel he favors, and many country people still regard the bird as semi-consecrated and refuse to allow its empty nest to be interfered with during the winter months. With the spring, the birds return to their original eaves, and it is a sign of impending misfortune if they neglect last year's nests. A swallow at sea brings disaster in its train, but a sand swallow is considered a mascot by the surrounding countryside.

Even the little hedge-sparrow may lay claim to some share of notoriety, for illness attacks the occupant of the room into which it gains access. A dead wren is another little treasure, and the superstitious Manx fishermen would never set sail at one time without one. A live wren will not work the same result, but a dead wren can vie with the renowned caul among sea superstitions. It is said that the wren averts a storm. Long ago, an evil spirit haunted the herring fisheries, until it suddenly assumed the form of a wren and flew off.

THE RUSSIANS.

(New York Sun)

For the first time in their history the Russians, collecting their resources with measured deliberation, are making war for God and country, a united, chastened, sober, and clean living and resolute people. Their soul is in the war. Famine cannot touch them. They must grow more formidable as the conflict wears on.

Heart Would Beat Violently.

Nerves Seemed to Be Out of Order.

The heart always works in sympathy with the nerves, and unless the heart is working properly the whole nerve system is liable to become unstrung, and the heart itself become affected.

Milburn's Heart and Nerve Pills will build up the unstrung nervous system, and strengthen the weak heart, so that the sufferer will enjoy the very best of health for years to come.

Mrs. John N. Hicks, Huntsville, Ont., writes: "I am sending you my testimony for the benefit I have received from using Milburn's Heart and Nerve Pills. As a nerve and heart builder they have done wonders for me. At times my heart would beat violently, and my nerves seemed to be all out of order, but after using a few boxes of Milburn's Heart and Nerve Pills I feel like recommending them to others that they might receive benefit as I did."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years, and are universally considered to be unrivalled as a medicine for all disorders of the heart or nerves.

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

"I am not afraid," she smiled. "But ...it seems as if nobody would ...be able to..."

"You said you should like it," Frank persisted, turning his back to the others and ...edly at her.

"...would be ...pleasant if it is a ...," she smiled, quietly. "But ...you to go entirely for ...ought we were all going."

"...s, anyhow," he said, "to-... ...or the next day. I want to ...to Green. Of course you will do ...what you like best. I thought you ...said you would like it."

"I am so sorry I must take Tiny," said Mrs. Leicester. "Old Mrs. Carleton is her godmother, and she wants ...to. I really must. What will you ... Will you come with us, ...or go with Frank? I'm sure ...he'll be very careful, and of course there isn't any danger, really."

Mrs. Austin had no desire to make ...trouble on the last day of ...her stay. "Oh, I should like the row very much, if it is fine," she said.

"That's settled, then," said Mrs. Leicester, cheerfully. "Mr. South, if there's nothing you want to do to-morrow, I'm sure we shall either of us be very pleased if you'll join us."

Frank frowned. But Gilbert, while he professed his delighted readiness to go anywhere or do anything, had not the slightest intention of proposing to make one of the water party. He was convinced that it would be fraught with peril—for him. "That hot-headed boy would certainly do his best to upset me into the river if I interfered with his arrangements," he said to himself. "If he could contrive to give me a ducking without splash... he'd... It would fill his soul with ...delight." Gilbert thought ... would call on old Mrs. Carleton, who was unlikely to indulge in any such pranks.

Mrs. Leicester was really sorry that she was obliged to break up the party on this last day. She could not see for her part, why Mildred and Mr. South had not settled matters a week ago, and enjoyed themselves comfortably as an engaged couple, taking their share of privileges and joking remarks. But she supposed it was to be put off till the end of Mildred's visit, and she was anxious to give Gilbert a chance of coming to the point. She had noticed that Frank seemed to prefer Mrs. Austin to Mr. South, and was inclined to bestow the attention which should have been divided between his guests entirely on her. Frank was inconsiderate at times, but she would give him a quiet hint to leave the two to themselves when they came back from their respectiv...

...unconscious of her ...woke the next ...certainty that ...had been a ... For years ...Fairfax ...ing, the ...He ...again; ...one desir-... At last ...found her no-... still in her ...

sighted, self-possessed, putting aside his attempt to utter his repentance with gentle words about friendship Frank might well worship her in his boyish fashion; he was quite right he had never seen Mildred Fairfax. But for his own part, Gilbert, had he known her intentions, instead of gratefully blessing good Mrs. Leicester, would rather have been inclined to complain to her, very ungratefully and unjustly. "You have

'Unsettled the pure picture in my mind;
A girl she was so perfect so distinct,
I detest all change,
And most a change in aught I loved long since.'"

That was the worst of it. He could not even go back to his dream. Call them up as he would with anxious efforts, his memories of his old love had been slowly dying, day by day, ever since he came to Culverdale. The actual recollections remained, cold, dead facts, but nothing more. There were moments when Tiny Vivian, just because of her youth and hopefulness, seemed nearer the true spirit of his former love than Mrs. Austin. It was not unnatural. If we idealize the past, and most of us do, there is an interval after which old books should not be reopened, old haunts should not be revisited, nor old loves sought out, except with a deliberate view to disenchantment. We expect too much. No sympathy is so perfect as that which we imagine. And Gilbert South had been especially fanciful and dreamy in his recollections. He had had, as it were, just a glimpse of Mildred's pure, girlish love, and then he had been drawn away by a woman older than himself who wanted a little amusement. He had been made a fool of, coarsely, by a practised flirt. Afterward he attempted to go back; he wrote a dozen letters of ... and repentance, and of course sent off the worst. It was a failure, and partly in pique, partly in real disgust at himself, for he had a delicate taste, and his first faithlessness left an unpleasant flavor in his mouth, he swore constancy to Mildred's memory as he supposed, but in reality to himself as he would have had himself. It was that former self, as well as his former love, he had hoped to find again when he met Mrs. Austin.

With her it was different. She had trusted him, and he had failed her; the pain had been keen, but with a touch of scorn in it. And later, when the wound was healed and all bitterness gone, she thought of him, not unkindly, but as one whose nature was light and fickle. When she discovered how constantly he had looked back to that old love with she supposed was utterly forgotten, her memory awoke like the autumn blossoming of spring flowers.

On that last day all the interest seemed to be concentrated on the water expedition, as if it were indeed a voyage of vast importance. Nobody thought about the people who meant to call on old Mrs. Carleton; but one would have said that Frank and Mrs. Austin were going to discover a new Ulano at least, and indeed the young fellow had such an impression concerning it as, if it happens to be verified, we call a presentiment. Mr. South and Tiny came down to the river to see them off, but, owing to some little delay in Frank's arrangements, they were obliged to go back, lest they should keep Mrs. Leicester waiting, and leave Mrs. Austin where she stood, a slim, dark figure at the water's edge. The dull gray surface, with its floating leaves and its grasses drawn by the silent current, was shaded by great groups of trees, whose dusky greenness was lighted here and there by gleams of autumn yellow. Mrs. Austin did not move; no breath of wind stirred the dark masses of foliage overhead; it was like a picture with something of melancholy stillness about it. When Frank was ready the solitary figure disappeared from the bank, and they went gliding from under the shadow of the trees out into the wide, sunless fields.

Honestly, it was not a very beautiful scene. To Frank, who had known it all his life, the question of its beauty or ugliness did not occur; it was simply the river, and as such it had moulded his conception of all rivers. On its dark waters such childish dreams as he had known had embarked and set sail. As a boy he had fished there, just as four or five urchins were fishing now. They stared open-mouthed and silent, at young Mr. Leicester and his boat, but took no notice of the lady who looked with a musing smile at the little rustic group as she went by. Presently came a curve in the stream, where a clump of alders grew, and others leaned despondently over the water, which was eating the earth away from their roots. The more distant prospect showed a monotonous variety of plowed land and pasture, with lines of trees following the hedges, and here and there a cottage or two and a bit of road. Mrs. Austin and Frank talked as they went. He told her how one bitter winter the river was frozen, and he skated to the farm where they were going now. He pointed out a lonely house, and spoke of the people who lived there. He showed how far the floods had reached in a wet season, a muddy expanse in which little lines of cropped willows seemed to wade knee deep, and the water washed through the gates of lost meadows. And he broke off suddenly in the midst of what he was saying to ask, "Where shall you be this time to-morrow?"

"Half way to London, I should think," she answered; "I don't know how long the journey takes."

Frank looked at her, and was silent. He wondered whether he should speak as they came back.

The Greens' house stood by the roadside a little way from the river. The farm buildings and some big stacks had a pleasant, prosperous air; but the house itself was an ugly little plastered box, with a bit of treeless garden in front, blossoming with prim, sulphur-colored dahlias. Frank did not seem to have much to say to old Green, after all. The two exchanged a few words, and then came to the little parlor, where Mrs. ... a horse-h... sof...

lan to the farmer's wife. Frank was on very pleasant terms with his tenants, who evidently thought their young landlord a most important personage. Other people were "high," but vaguely "high," and a duke would not have impressed Mrs. Green as much as Mr. Leicester from the Manor House. The Prince of Wales, perhaps, as a young man residing in palaces, and holding a well-defined position as the Queen's son, might have eclipsed Frank, but it would have taken a prince to do it. Mrs. Austin perceived, with a single smile, how unimportant she was compared with her companion, but she was not in a mood to be amused by that or anything else that afternoon. She was glad to leave the house, to escape from hospitable offers of cake and home-made wine, and to find herself once more upon the road. Even then, however, the old farmer insisted that Frank should look at a shed which was not satisfactory, and she had to wait while the matter was discussed.

There was a little pond, with neat white railings, just opposite the house, and she strolled across and stood by it with a mysterious sense of loneliness and desolation upon her. Still as the afternoon was, she fancied that there was a mournful little rustling in the boughs of a stunted oak which grew a few yards away. The little pool mirrored a vacant gray sky. It was absurd, and yet she felt as if she would have given anything to see Gilbert South coming toward her; instead of which, it was Frank who had torn himself away from the farmer and darted across the road.

"I've kept you waiting," he said; "I'm so sorry! Oh, and you are tired, aren't you?"

"A little," she allowed. "Nothing to matter."

"It's too bad of me! What can I do?" he exclaimed, with anxious solicitude. "Come in again, and let Mrs. Green make you some tea."

"Oh, no, no," she said. "I would rather go back."

Frank was in despair. "What a brute I am!" he reproached himself.

Mrs. Austin fairly laughed at the intensity of his remorse. "What would you do if I were very tired?" she said.

He hardly dared to speak to her as they went back, and perhaps it was owing to that enforced silence that later he recalled with especial vividness the plash of his oars on their quietly winding way, the little ripples ... among the dry autumnal reeds on either bank, and the light from the west, where a pale sun struggled feebly through the clouds, falling coldly on the beautiful face before him. For Mrs. Austin, meanwhile, a soft current of thought flowed with the river, setting ever more strongly toward a final resolution. If it rested with her to make Gilbert South happy, why should she not do it? He was not what she had once imagined him, yet he was truer and better than she had believed him during the years they had been parted. There was no man living whose thoughts and memories, nay, whose little tricks of speech and gesture were bound up with her past life as Gilbert's were; and the recollection of his troubled face haunted her like a reproach. "Why not?" she said to herself over and over again, to the measured sound of Frank's oars; "why not—why not—if it would make him happy?"

"I don't know why it is," she said to young Leicester, when they had landed, and were walking slowly up to the house, "but I have had a feeling all this afternoon as if something were going to happen."

"That's funny," said Frank; "so have I."

"Have you, really? If I had known that, I might have wondered whether you were really going to drown me. But here we are, safely landed, in spite of our forebodings."

He surveyed the sullen sky. "Perhaps there's thunder in the air," he suggested.

"Perhaps. That might account for my feeling tired. I've been a dull companion, I fear."

"No," Frank was begining to say, when he stoped short. They had just come in sight of the house, and he stared at a farmer's chaise, driven by a laboring man, which was going away from the front door. "That's old Clayton's trap," he said; "what on earth has that come here for? And—why surely that's my mother coming to meet us—they can't possibly have been there and got back by this time!"

"There has been an accident!" said Mrs. Austin, with sudden certainty. "Go and see what has happened. Your mother is safe, but——"

Frank ran forward. It was his mother hurrying down the drive. "What is it?" he said.

"Oh, Frank!" she cried. "Oh, my dear boy! Those dreadful horses!"

"What's the matter? The new horses?"

"Yes. We went up Upton Lane because I wanted to inquire about Barker's wife—by the railway cutting, you know. She likes to see one, if it's only for a minute—at least she did like, poor thing!"

Frank stamped impatiently. "—— Barker's wife!" he said. "Is anybody hurt? Is anybody dead?"

"She's dead—she died yesterday—nobody else."

"Oh, go on! Go on! What happened?"

"Why, I went in just to speak to poor Barker——" Barker's final destiny was so nearly settled that Mrs. Leicester gasped and hurried on—"and the express rushed by—at least, I think it was the express—they shouldn't make them scream so, Frank; it isn't whistling, it's a downright scream—and the horses bolted down the lane to the left, and he couldn't hold them——"

"The lane to the gravel-pit!" said Frank, in a horror-struck voice.

"Yes! And Tiny and Mr. South! But they dashed against a bit of wall at the turning, and were thrown out."

"Are they hurt—much?"

"No, nobody hurt, only shaken. But oh, Frank!"

"The horses?" said Frank, greatly relieved.

"Nothing much. Robinson says it's quite wonderful. There's no harm done."

"What then?" Frank grasped his mother's arm. "There's something more. Tiny is hurt—I know she is! Why don't you say so?"

"No, she isn't; she isn't, indeed, nor Mr. South either."

"Well?"

"They are not hurt," said Mrs. Leicester, desperately, "but they're engaged to be married!"

She looked as if she expected an explosion, but none followed. Frank's hand unclosed and dropped by his side and he stood for a moment staring dumbly at ... you...

SUNDAY SCHOOL LESSON

June 4, 1916. Lesson X.

The Call of the West.—Acts 15: 36-16: 15.

Commentary.—I. Paul's second missionary journey begun (vs. 36-41). Paul and Barnabas had been companions in the first missionary journey, and when the time seemed to be at hand when the second journey should be undertaken, Paul suggested to Barnabas that they visit again the places where they preached on their former journey. Paul appears to have come into the position of leader, as might well be expected from his zeal and devotion in the work of the Lord. Barnabas was ready to go, but he desired to take with them on this journey his nephew John Mark. Paul was not willing that Mark should accompany them, for he had turned back at Perga on their former journey. Barnabas had faith in Mark and was determined that he should go as their helper, and Paul was as determined that it was not best to take him. When Paul and Barnabas could not come to an agreement in this matter, it was decided that Barnabas and Mark should go together to Cyprus, and that Paul should take Silas as his companion in labor and go to Asia Minor. "The result to the church was that two missionary journeys were undertaken instead of one. Though the apostles might differ in their estimate of Mark, they were at one with reference to the work of the gospel. Barnabas is mentioned no more in the Acts after this chapter. His name occurs in Paul's Epistles (1 Cor. 9:6; Gal. 2:1, 9, 13; Col. 4:10), in which last passage, written no doubt after the events here related, we can see that Mark had been again received as a fellow-worker by Paul. We learn, too, from 2 Tim. 4:11 and Philemon 24 that Paul became warmly attached to him afterward."—Lumby. These workers went northward from Antioch in Syria and turned westward into Cilicia, visiting the churches and giving them instruction and encouragement.

II. Churches revisited (vs. 1-5). In their journey Paul and Silas naturally came first to Derbe and then to Lystra. That there were disciples at Lystra is evident from Acts 14:20, and it is probable that Timotheus (the Latin form of Timothy) was among those who stood about Paul after he had been stoned. His mother was a devout Jewess and his father was a Greek. The apostle saw in him an efficient helper and took him with him on this journey. Because his father was a Greek and there were many Jews in that region who knew that Timothy had not been circumcised, Paul had him conform to the Jewish law in this regard, so that there might be no prejudice against him. This band of workers went from church to church announcing the decision of the Jerusalem Council, and confirming the Christians in the faith. Their labors resulted in many additions to the Church. That there was a rapid increase in the number of converts to Christianity is evident from the expression used in v. 5, that the churches were "established in the faith, and increased in number daily." From this record we would conclude that an extensive revival was in progress, considerably like the work of grace at Jerusalem that followed Pentecost.

III. Paul's vision at Troas (vs. 6-10). 6. Phrygia—This region lay north of Pisidia and northwest of Lycaonia. Galatia—Galatia was northeast of Phrygia. This region is here mentioned for the first time. Paul's letter to "the churches of Galatia" (Gal. 1: 2) shows that Christianity was established there, and it is not improbable that on this journey he declared the gospel so effectively that permanent bodies of Christians were organized. Forbidden of the Holy Ghost—The Holy Spirit was directing the missionaries in their movements and was leading them onward to their field of labor in Europe. They must not at this time tarry in Asia Minor. Asia—We now apply this name to the entire continent, but at the time when this missionary journey was made Asia was a Roman province, including only the extreme western part of what we now call Asia Minor. 7. Mysia—A region lying in the northwestern part of Asia Minor. Assayed to go into Bithynia—Paul and his company attempted to go northeastward into the province of Bithynia. The Spirit suffered them not."—R. V. The Lord did not allow them to go into Bithynia, for their labors were needed in another region. 8. Passing by Mysia—Mysia was a part of the province of Asia and Paul had been forbiden to tarry there. Troas—A port in Mysia, on the Aegean Sea.

9. A vision—A clear and definite impression was made upon Paul's mind. The word means something seen and does not necessarily imply that the beholder was asleep, yet the fact that it occurred in the night might indicate that the apostle was asleep at the time. A man of Macedonia—Macedonia was a Greek province across the Aegean Sea from Troas. Whoever this personage was, whether a representative of Macedonia or an angel, Paul recognized him as "a man of Macedonia" with a message for him. Come over .... and help us—This was a call of pagan need for spiritual light. Paganism failed to satisfy the longings of the soul and application was made for the gospel of Jesus Christ. "It was the voice of the sick inquiring for a physician, of the ignorant seeking for wisdom, the voice which ever since has been calling on the church to extend the gospel to heathendom.—'Come over .... and help us.'"—Howson. 10. We—This indicates that Luke joined the company at Troas. Assuredly gathering, etc.—The apostle had no doubt as to the particular place where the Lord would have him labor. His duty was clear to carry the gospel into Europe. A clear conviction of duty goes a long way toward assuring success in the work of the Lord. The apostle could not possibly have any misgivings with regard to his field of labor, and he could move forward with the utmost confidence that his work would be blessed. A new continent was opened to the apostle to the Gentiles.

IV. Work begun in Europe (vs. 11-15). 11. Loosing from Troas—Sailing from Troas. With a straight course—The wind was favorable and in one ... sailed sixty miles in

thracia and the next day reached Neapolis, the seaport of Philippi, having sailed seventy-five miles. At another time it took Paul five days to travel the same distance. Samothracia—A rocky island in the Aegean Sea. 12. To Philippi—Ten miles from Neapolis. The journey could be made by land or by the river. Chief city—The first city of that region. A colony—A Roman colony was composed of citizens transferred from Rome. They had the organization and customs of the city of Rome, and their city was a miniature of Rome itself. Those who composed the colony were still enrolled as citizens of Rome. There were rich gold mines a short distance north of Philippi. 13. On the sabbath—Probably the first Sabbath after Paul's arrival at Philippi. Where prayer was went to be made—It seems that there was a place of prayer by the river outside of the city, they went to meet those who would worship the Lord there. Spake unto the women—Those who were interested in the worship of the Lord were women, "and of those women, one was a foreigner and a proselyte, faithful, perhaps, when the birthright Jews were faithless, and to her the gospel is to be an exceeding great reward." 14.—Named Lydia—The name may have been given to her from the town in Lydia, Thyatira, from which she came. This town had long been noted for its manufacture of purple. Whose heart the Lord opened—The Lord moved her by His Spirit to accept the gospel, and she was obedient to the divine impression. Attended unto the things which were spoken—Her hungry heart received with gladness the message which the Lord's servants brought, and she believed the gospel. 15. Was baptized, and her household—Baptism was administered as a sign of the inward washing of the heart and as a testimony to the world of discipleship with Christ. Lydia's household must have included children or servants or both, and all were baptized. Abide there—Thus a home was open to the apostles in Philippi.

Questions.—Why did Paul and Barnabas separate? Where did Barnabas go? Where did Paul go? Whom did Paul take with him? Who joined him at Lystra? Where did Luke join the company? How did the Lord show Paul that they were to go to Macedonia? Where was Macedonia? In what city did they preach? Who was Lydia? What was her native city? Where did the missionaries go to preach to the people?

PRACTICAL SURVEY.

Topic—Progress in missions.

I. Enlarged forces.

II. Extended territory.

I. Enlarged forces. Paul felt he was not called to spend a peaceful though laborious life at Antioch. He felt a tender solicitude for the converts he had won on his missionary tour and an earnest longing to see them again. They were but weak churches in the midst of sinful communities, from which they had lately been taken. They needed careful supervision. There was perfect agreement between Paul and Barnabas as to the visitation of the churches they had established, until there arose a question as to companionship. Each from his own point of view aimed at the good work of Mark and the furtherance of Christ's kingdom. The difference of opinion proceeded from as much excellence of one kind in Barnabas as of another in Paul. They could not agree, and accordingly they wisely decided to divide the field, and provide sufficient workers for both. Paul and Barnabas as to the visitation of the churches they had established, until there arose a question as to companionship. Each from his own point of view aimed at the good of Mark and the furtherance of Christ's kingdom. The difference of opinion proceeded from as much excellence of one kind in Barnabas as of another in Paul. They could not agree, and accordingly, they wisely decided to divide the field, and provide sufficient workers for both. Barnabas and Paul had been in most trying circumstances together, contending with bigoted Jews and idolatrous Gentiles. They stood together in the council at Jerusalem in behalf of missions to the Gentiles. They owed much to each other. When Paul first went to Jerusalem after his conversion, Barnabas was the first to trust and welcome him as a disciple. That same trustful spirit was exhibited in behalf of Mark. His encouragement combined with the sharp tonic administered by Paul proved helpful to the young man. There were mitigating circumstances in the controversy. God did not allow honest differences among his servants to hinder the progress of the gospel. We may see a wise providence in their separation, if not in the means by which it was brought about. The Holy Spirit was manifestly present to assist the apostles in their work. God appraised them by their essential, abiding spirit of love and devotion. On Paul's return to Lystra the ordination of Timothy to the gospel ministry took place. As a fellow laborer with Paul he might have been considered as a recompense for the cruel stoning which the apostle had received there. His thorough knowledge of the scriptures, gained through the pious care of his mother and grandmother, gave strength to his own faith, and made him capable of dealing with the Jews. His inheritance, both being Jewish and Gentile, gave him influence with both classes. It was not breach of Paul's stern policy, that under circumstances so peculiar he should respect a temporary prejudice in circumcising Timothy. When it was a question of maintaining principle Paul would not consider Jewish prejudice; when a question of conciliating and preparing the way for the gospel, he put his own views in the background.

II.—Extended territory. In planning his journey Paul depended upon his knowledge of the churches and their needs. He was turned from his course by direct supernatural interposition and called from Asia to Europe. While Paul was urging his way to the East, the Holy Spirit was constraining him to go westward. Twice Paul and his company were held in check. It needed quite a series of unusual providential indications to turn them toward Europe. Supernatural guidance was granted. The decisive command was given by vision to Paul. He recognized the divine summons. He had sufficient reason to believe that God's will was made plain. It seemed an unequal contest into which the apostle and his little band entered, led by the vision which they interpreted as the divine monition. The introduction of Christianity into Europe began in an open air service by the riverside. The day, the place, the persons there assembled, the visit of Paul and his company, made up the opportunity which appeared so humble. The conquest of Europe for Christ was heralded in the salvation of one woman. The church which was raised up at Philippi and which afforded Paul such joy, began with the conversion of Lydia. She exhibited humility, teachableness, thankfulness to God, bray love and kindness and a good example. She unhesitatingly made public acknowledgment of her faith. Hospitality was her choice of immediate usefulness. No sooner had she received Christ into her heart than she welcomed his servants into her home. Thus the gospel entered Europe.

T. R. A.

PEASE SENSE AND NONSENSE

(New York Tribune.)

It is perfectly clear that Germany is beginning another campaign for peace. Americans should not mistake the machinery that is being employed, nor be surprised at the sudden outbreak of peace talk wherever Germany has friends or influence. This is one more German campaign skilfully directed, but designed to serve German purposes and having no basis in fact in any of the Allied capitals.

What are the facts, as contrasted with the fictions in the peace discussions? It will not be difficult to make peace now if Germany, the only nation which is ready to talk peace, is willing to pay the price that is asked, but is she? This may be doubted.

If Germany is prepared to accept the status quo ante in Europe, permit Russia to occupy Constantinople and recede Alsace-Lorraine to France, there is little question as to the peace arrangement. Italy would insist upon the Trentino and Trieste. Conceivably she might take the Trentino, and a protectorate of Albania, deduction being made for the northern corner.

But the key of the whole question is Alsace-Lorraine. Germany might be willing to accept the status quo ante, to evacuate Poland, Belgium, Luxemburg and Northern France. It is exceedingly doubtful if she would do this, but unless she is willing to give back what she took from France in 1871 no peace is yet possible in Europe.

On the Allied side France has borne the greatest burden of battle and borne it with the greatest ... victory of the Marne, won with barely a semblance of British support, really decided the issue of the conflict. The war has cost her not far from 800,000 lives. Many of her northern departments have been ravaged and her contribution has been beyond that of her Allies.

If France desires Alsace-Lorraine, Great Britain and Russia cannot do less than back her, and they will, to the end. There is no mistaking the fact that the whole country has fixed its heart on regaining what was taken nearly half a century ago. To-day Frenchmen speak of Lille and Strassburg in the same tone, in the same spirit. Both are occupied by the Germans, both are French. The war must go on until that which belongs to France is restored.

Alsace-Lorraine, the restoration of Belgium and Serbia, the occupation of Constantinople by the Russians; these are the only terms on which Germany can have peace, and unless she is prepared to offer these terms all discussion is empty. A year from now, if she still holds her lines, Germany may find her enemies too exhausted to insist upon the terms they now demand, but certainly not for a year yet will they accept less.

All talk about peace in this country which blinks the facts is nonsense. The Allies are fighting for the liberation of Serbia and Belgium; they are fighting for the liberation of France; they will not stop until they are defeated or exhausted. They are neither defeated nor exhausted, and any American interference will accomplish nothing of good and may have evil effects for us.

The fact that Germany desires peace is significant, but not over-significant. She has the gain of the war in hand, but it is expensive to retain. She is doubtless willing to part with a portion of her conquests. But her enemies are determined she shall give up all, and the conquests of 1870 in addition. Does any American believe Germany will yet do this?

Germany wants peace; so do her enemies; so even more do her allies. But Germany is not yet in any mood to make peace on the basis of the agreement which the Allies have set their hands to. She may be ready to evacuate Antwerp and Brussels, but what of Strassburg and Metz?

A great deal of nonsense will be uttered in this country about peace. But the nations that are fighting Germany have made up their minds to go on to a lasting peace, a peace which shall be lasting because it shall bring no profit to the nation which drew the sword to dominate its continent.

Great Britain, France and Russia will not agree to an end which will leave Germany master of Central Europe, from Hamburg to Constantinople and from Warsaw to Ostend. They will not agree to a piece that gives Germany a virtual protectorate over Belgium or an actual hegemony of the Balkans. They will not agree on a peace that leaves France insecure and still mutilated after her magnificent fight and her tremendous sacrifices.

If Mr. Wilson feels moved to action by the hints from Berlin and Rome, let him make inquiries in Paris, Petrograd and London. Let him ask our French friends how they feel about peace. Let him ask the Germans what they offer their foes for permission to use the seas and resume relations with the world. There is no disguise about the Allied terms. What about the German?

There can be no greater fallacy than to believe an exhausted Europe is clamoring for peace. France, the nation which has suffered most, is the most resolute. Great Britain, with her armies at last in the field, never in her history thought less favorably of peace save at the end of a victorious conflict. As for Russia, even the German press has ceased to talk about Russian weakness.

Germany can have peace by paying for it, but she cannot have it otherwise, and the place to apply is at Paris, not Washington. She can have it by giving back what she has taken in 1870 and in 1914-1915. But she cannot have it at any other figure, and German feeling to the contrary is evidence of Germany's failure to understand the temper of the enemy.

As for the Allies, they will do well to ignore any campaign on behalf of peace which has its centre in this country, whether official or unofficial. The German vote will be a factor in the next national campaign. Every German influence will be exerted to put the Administration into the breach to help along the peace movement. Let all the Allied nations remember that peace talk in America is German-procured save for a little honest pacifism, and let them act accordingly.

SUNDAY AT HOME

THE NOW.

Put hand to the work of to-day
With passion of joy and will,
To-morrow is as far away
As a star above a hill.

Though the torrent to cross is wide
And often stern in its flow,
On the fairer other side
The lilies and the roses grow.

Though the mountain is hard to climb
And rises bold from its base
Into the clear sublime—
Its top for repose has place.

If the zeal for your work endures
Your journey must onward be.
If the land is no longer yours,
What matter—accept the sea.

Your life is the life of your soul,
And your soul shall never die.
The now is your only goal—
You cannot the now deny.

—Alanson Tucker Schumann, Boston Transcript.

GOD SHALL WIPE AWAY ALL TEARS.

He shall swallow up death in victory; and the Lord God will wipe away tears from off all faces; and the rebuke of his people shall he take away from off the earth; for the Lord hath spoken it. Thy sun shall no more go down; neither shall thy moon withdraw itself; for the Lord shall be thine everlasting light, and the days of thy mourning shall be ended. The inhabitant shall not say, I am sick; the people that dwell therein shall be forgiven their iniquity. The voice of weeping shall be no more heard in her, nor the voice of crying. Sorrow and sighing shall flee away.

I will ransom them from the power of the grave; I will redeem them from death; O death, I will be thy plagues; O grave, I will be thy destruction. The last enemy that shall be destroyed is death. Then shall be brought to pass the saying that is written, Death is swallowed up in victory.

ANCHORAGE.

One of the sublimest doctrines a hundred years ago in the Methodist Church was the doctrine of full assurance. They knew they were treading the deck of a ship that could not sink, moreover, in sight of the great Taskmaster's eye. They caught His smile, and whether aloft or on deck, or below, they were assured they could not be wrecked by the incompetency of the pilot.

The ill-instructed Christian is safer than he knows; he is at liberty to throw doubts and fears overboard, and rise to the mastery of absolute certainty and safety. It must be so, it cannot be otherwise. There is no slow growth, it is set fast, fast for ever. Why? Because I hide in the bosom of the unchangeable one, not finding out, but near and warm and true and living, as when a mother comforteth.

The mystic has to watch his bearings lest he gets out of his depth. The idea of progress is a modern idea, the idea of anchorage is as old as the mountains, and older. The mystic is a man of vision, his eye is trained for long distance, he is daring, original, profound, but he must not forget to stay by his moorings.

The stars are anchored, and here abides the subtlety of eternal stillness. The very throne of God is anchored. No storm can break it, no enemy can cut the cable. Anchorage is the sublime law of heaven, earth and hell. The mystic goes deep down to the holding ground of sure anchorage. His prayer is: Hold me, keep me, guide me. Augustine says: "Just love God and you can do as you please." He meant that the moorings of a constraining love will keep a man safe forever.

Defining the Holy Spirit as "God Himself in action—always in action," the Dean of St. Paul's said the spiritual light is not the white radiance of eternity that never changes, but the light that comes into the world and shines more and more unto the perfect day. It is the light of all. And so the truth in the gospels is not a body of dogma; it is the power that makes us free. And life in the gospels is not a deferred reward of goodness, but an inexhaustible spring of divine energy. Just as happy human love transformed everything for the lover, making the grass greener, the sky bluer, and the sun brighter, so the Holy Spirit filled men with all joy and peace in believing, making them abound in hope through the power of the Holy Spirit. If at times this wonderful experience produced a sort of spiritual intoxication, it more often bore fruit in a calm and radiant courage, an untiring zeal in spreading the glad tidings, and a cheerful indifference to poverty, hardship and suffering.

I am lifted high above the mountains of space and time; how dim the distance! I cannot give dimensions, but I see diagrams, patterns, lines; I am attracted by the ever-burning light, to a fire that goes not out, and there is a diadem power, a fragrance and a beauty, it is a vast symbol, burdened with personality, related to all, beneficial, claiming my enduring sympathy.

God is in all. He never gives in part. The universe moves towards us, controlled and inspired by Him. He never gives and keeps himself away at a distance. His hands are full. I gather round Him, however, revel in the expanding coronals that flash from the edge of that dark world, which is being eclipsed with the oncoming, long-promised story of an eternal day.

H. T. Miller.

Getting an Autograph.

A Munich boy of fourteen who had seen and admired many of Rudolf von Seitz's paintings was anxious to secure the painter's autograph, but did not know how to go about it. After much thought he wrote a letter, stating that he had send a case of wine to the professor's address and wanted to know whether it had been received. Thinking the matter of sufficient importance, the painter did not write, but called at the address given, met the boy's mother, and the fraud soon became apparent. The "boy" was thoroughly scolded and next day received this autograph note:

It often happens here on earth
That little rogues to great ones grow.
Some autographs for which you're trying
Can be procured without much lying.

It's the man with an elastic conscience who doesn't mind stretching the truth.

Was All Choked Up

Could Hardly Breathe.

BRONCHITIS

Was The Cause; The Cure Was

DR. WOOD'S Norway Pine Syrup.

Mrs. Garnet Burns, North Augusta, Ont., writes: "I caught a dreadful cold, going to town, and about a week after I became all choked up, and could hardly breathe, and could scarcely sleep at night for coughing. I went to the doctor, and he told me that I was getting bronchitis. My husband went to the druggists, and asked them if they had a cough medicine of any kind that they could recommend. The druggist brought out a bottle of Dr. Wood's Norway Pine Syrup. I started using it, and it completely cured me of my cold. I cannot tell you how thankful I was to get rid of that awful nasty cold. I shall always keep a bottle of Dr. Wood's Norway Pine Syrup on hand, and I shall only be too glad to recommend it to all others."

Dr. Wood's Norway Pine Syrup is a remedy that has been on the market for the past twenty-five years, and we can recommend it, without a doubt, as being the best cure for coughs and colds that you can possibly procure.

There are a lot of imitations on the market, so when you go to your druggist or dealer see that you get "Dr. Wood's;" put up in a yellow wrapper; three pine trees the trade mark; the price, 25c and 50c.

The genuine is manufactured by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review.

TORONTO.—General business on a solid basis. Within the last few days two competent financial authorities have expressed their faith that 1916 would not witness any set back in trade. Wholesale trade in Toronto in nearly all lines continues normal or better. Orders in drygoods houses continue to come in apace. Shoe firms report a brisk trade for immediate shipment, in spite of persistent advances. Fall placing orders have fallen off a little, because at the moment these are not encouraged by wholesalers. The leather trade is active, both for domestic and foreign account. Prices are on a high basis. The grocery trade is steady, with a firmer tendency in many lines.

MONTREAL.—The larger industries are as busy as ever, iron and steel and textile concerns being filled up with orders. Prices are firm in most lines. The grocery trade is about normal. Footwear houses and manufacturers have all they can do. Business is reported improved in hardware houses.

WINNIPEG.—Trade continues to show expansion. Retail drygoods firms have done a brisk trade. Demand at wholesalers from country dealers has been liberal and collections are good. With higher prices ruling in footwear, demand is brisk, due largely to fear that price lists will go still higher. Spring business has been good in groceries. Prices continue to firm up. Collections and remittances have been satisfactory and this is a stimulant to trade. The hardware trade is active.

CALGARY.—Trade in practically all lines of general merchandise is well maintained. This refers to drygoods, footwear, hardware and groceries. Improvement has been shown in settlements at wholesale houses and the retail trade throughout the country has the same to report.

VANCOUVER.— Business conditions here, and in Victoria, are fairly active.

HAMILTON.—The movement of merchandise from retail houses has been fairly large, and this is reflected in demands from wholesale firms, which are doing a normal volume of trade. Collections have kept up well. Prospects are for a solid year in trade.

LONDON.—Spring trade has been good. Fall placing orders are fair.

OTTAWA.—Trade at retail and wholesale houses is fairly active. A steady call for most staple lines of merchandise comes from local and country stores, the bulk of it for immediate shipments.

QUEBEC.—In wholesale circles business as a rule continues satisfactory and the outlook promises well. Hardware and building trade show considerable activity. Local industries are well employed. Reports from country points are satisfactory.

Birds and Disaster.

Tradition has it that a late swallow brings luck to the hostel he favors, and many country people still regard the bird as semi-consecrated and refuse to allow its empty nest to be interfered with during the winter months. With the spring, the birds return to their original eaves, and it is a sign of impending misfortune if they neglect last year's nests. A swallow at sea brings disaster in its train, but a sand swallow is considered a mascot by the surrounding countryside.

Even the little hedge sparrow may lay claim to some share of notoriety, for illness attacks the occupant of the room into which it gains access. A dead wren is another little treasure, and the superstitious Manx fishermen would never set sail at one time without one. A live wren will not work the same result, but a dead wren can vie with the renowned caul amongst sea superstitions. It is said that the wren averts a storm. Long ago, an evil spirit haunted the herring fisheries, until it suddenly assumed the form of a wren and flew off.

THE RUSSIANS.

(New York Sun)

For the first time in their history the Russians, collecting their resources with measured deliberation, are making war for God and country, a united, chastened, sober, and clean living and resolute people. Their soul is in the war. Panic cannot touch them. They must grow more formidable as the conflict wears on.

Heart Would Beat Violently.

Nerves Seemed to Be Out of Order.

The heart always works in sympathy with the nerves, and unless the heart is working properly the whole nerve system is liable to become unstrung, and the heart itself become affected.

Milburn's Heart and Nerve Pills will build up the unstrung nervous system, and strengthen the weak heart, so that the sufferer will enjoy the very best of health for years to come.

Mrs. John N. Hicks, Huntsville, Ont., writes: "I am sending you my testimony for the benefit I have received from using Milburn's Heart and Nerve Pills. As a nerve and heart builder they have done wonders for me. At times my heart would beat violently, and my nerves seemed to be all out of order, but after using a few boxes of Milburn's Heart and Nerve Pills I feel like recommending them to others that they might receive benefit as I did."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years, and are universally considered to be unrivalled as a medicine for all disorders of the heart or nerves.

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FARM AND GARDEN

THE PLACE OF THE HORSE.

There are few ways in which Canada can be more benefited than by breeding good horses. Every horse bred that is of any value materially enriches both his own and the country. The automobile and the traction engine have not yet produced the horseless age. On the contrary, the more the country is opened up, the busier the country gets, and the greater will be the demand for the horse. In every European country and in the United States artificial power, both for pleasure and for business, had made immense strides before the war, and yet each year saw the number of horses increase. In Canada there was no slump in numbers, although there was in prices. The latter had three causes—first, the approaching financial crisis, and cessation of the real estate boom; second, the reduction in construction works consequent either upon completion or financial stringency; and, third, the superabundance that had been caused by inflated prices in the boom period. Then came the war, and uncertainty increased, while financial matters went temporarily from bad to worse.

Now there are plentiful signs of improvement. Orders are circulating from the West, the trade in pure breds has greatly developed, and the prices realized at recent sales are significant of promise. Meantime, two factions are working for the improvement of the horse himself, as well as for a decrease in numbers. In the first place, the stallion enrolment laws that have been enacted, and the suppression of scrubs, cannot but have a progressive effect on values, and, in the second place, the poor market of the last few years has checked breeding to a considerable extent. There will not be the surplus of 1912, 13 and 14. In addition, there is a spirit of great hopefulness apparent in the United States, as well as in Canada. Every horse-owner and every breeder is agreed that the outlook has materially improved in the last month or two, and that the prospects favor still further advancement. How far the export trade may extend in the near future, considering the difficulties of shipping, it is impossible to say, but of a certainty when hostilities cease there will be a rush for quality in quantity such as the world has never previously seen. And the rush will not be confined to one type. All classes will share to some extent. Undersized ponies, being a luxury for the little children of the rich, may take some time to come to their own, but draught horses and saddle horses will be in demand. Carriage horses will be slow in returning, although they, too, and the ponies as well, will have their market for the show ring and the park. But ring and park will also take time to reach the height of that luxurious existence which characterized them in the late years of the last century and the early years of this.

Looking the situation full in the face, and having regard to the times and signs, it seems impossible not to feel optimistic regarding the future of the horse. The wastage in the war, owing to the system of trench fighting on the one hand, and machine hauling on the other, has not perhaps been quite as great as was at first anticipated, but it increases in volume as the volcanic disturbance goes on, owing to the destruction of automobiles and the scarcity of sundry material used in the component parts. Horses, too, have the advantage in being more easily transported, and in the climbing of mountains, in the threading of forests, and in the crossing of sand, extra soft places, and streams. In open fighting and over widespread areas also they are in demand. Hence, as the war extends, the call for the horse will extend, for the draught horse perhaps more than the saddle horse, and yet for both sufficient to promise great depletion and a huge demand before sufficient years have rolled round to see the maturity of the foals of 1916. Hence, by breeding now, horse-owners will be building up a future for themselves and their country; in other words, helping in production, while by using judgment in their breeding, and utilizing the best they will be practising the best element in thrift.

SPRING REPORT, BEEKEEPING IN ONTARIO.

(Arranged by Morley Pettit, Provincial Apiarist.)

Eight hundred beekeepers reported 27,733 colonies in the fall and 24,953 colonies in the spring, showing a winter loss of 2,755 colonies, or 10 per cent. There are probably fewer beekeepers in this province to-day than a few years ago, due largely to the winter loss, diseases, and possibly to the extra farm work and shortage of labor from war demands.

The mild spell in January caused the bees to rear brood and draw heavily on their stores. This, with the high price of sugar last fall causing a start on feeding heavily, resulted in many colonies starving towards the end of the cold weather. A few warm days early in April gave the bees a splendid cleansing flight, and their condition now is reported as very good. The continued cold, wet weather has retarded building up and the gathering of fresh stores, and many colonies may perish if neglected.

The clover prospects are very good throughout the province. The latter part of the season of 1915 being wet, gave the new seeding an excellent start, and the scarcity of farm labor has increased the acreage seeded down. The honey market in Canada seems to be practically bare at present, and dealers are already contracting for 1916 crops at advanced prices. The scarcity of sugar assures a good market for a large crop of honey.

The following gives the report of counties near Hamilton:

Halton—Good prospects; good general condition of bees.

Haldimand—Good prospects; fair general condition of bees.

Lincoln—Good prospects; good general condition of bees.

Welland—Good prospects; good general condition of bees.

Wentworth—Good prospects; good general condition of bees.

APIARY DEMONSTRATIONS, 1916.

To help you "keep better bees and to keep bees better," the Ontario Department of Agriculture is arranging to hold apiary demonstrations in all parts of the Province. The practical nature of the programme is very inviting to all interested in beekeeping, and in almost any district. A specially trained practical beekeeper is sent to take charge of the meeting and handle the bees, and he is generally assisted by local beekeepers. Several hives are opened, and the actual working of the bees explained. Often a queenless colony, or one preparing to swarm, serves as an excellent object lesson. No matter how many or how few colonies you keep, you are sure to learn something at one of these meetings.

Already arrangements are well under way for over fifty of these meetings. The Department of Agriculture attends to all the advertising and supplies the speaker, so that the beekeepers do not incur any expense whatever.

Interested beekeepers desirous of having demonstrations in their apiaries should communicate immediately with Mr. Morley Pettit, Department of Apiculture, Ontario Agricultural College, Guelph, so that arrangements can be made for the meetings.

SAVE MONEY ON ROOFING

HALLIDAY CO., Limited

BOX 81, HAMILTON, CANADA.

NOTES.

Oats and bran make a good ration for ewes with lambs at their side.

In growing tomato plants for transplanting it does not require a rich soil, as the transplanting of a tomato plant from a rich soil to the field is apt to stunt it.

Use lots of well-rotted manure in the field. Acid phosphate to reinforce the manure would be a good investment. One grower has good success by applying wood ashes at the last hoeing. He uses a handful of ashes, applied on a paddle, to each plant. He also uses wood ashes in maturing the melon crop. He advocated level culture on light soil, and would hill up a bit on the heavy soil.

A Scotch farmer says that sheep breeding and root cultivation are the sheet anchors of advanced agriculture. This is true of Scotland, and ought to be true of many of our farms.

People like milk fat better than any other form of fat, and it is a more valuable food than the other fats.

It is a queer fancy with some men that sheep can get enough drink by eating grass when the dew is on it in the early morning. Stop and think how very, very little water a sheep could get that way. Give them a good spring or a trough to drink from.

First-class potatoes, says an expert, should contain no tubers that will go through a hole 1 7-8 inches square. It may be added that over-large potatoes should also be left out, if one is putting up a car of first-class potatoes. The more uniform the potatoes, the better price they will usually bring.

No More Corns

Cure Guaranteed

Never known to fail; acts without pain in 24 hours, is soothing, healing; takes the sting right out. No remedy so quick, safe and sure as Putnam's Painless Corn Extractor. Sold everywhere—25c per bottle.

MANKIND'S WORST ENEMY.

(Rochester Herald)

The worst enemy of the human race is the hypocrite, and the chief reason perhaps why he is such lies in the fact that he cannot be converted from his hypocrisy. A miser may learn to despise his avarice; a drunkard may reach a depth of misery so profound that he will turn his face, as John B. Gough did, in the direction of sobriety; old age will cool the blood of the lecher, and even the thief may reform, but the hypocrite of age. The light that would reveal his hypocrisy to him in its true color will never shine within the corridors of his being, for a hypocrite is, by the very nature of things, an opaque soul.

Artificial Ears.

Artificial ears are so skilfully made that they may with difficulty be distinguished from natural ones, so it is claimed.

When the person who has lost an ear applies to the manufacturer for a substitute, there is made a mould of the remaining ear. If there be left any part of the other, a mould of that part also must be taken to assist in the fitting of the artificial. Manufacturers assert that no two ears are alike, and that it takes a skilful workman to prepare an ear for the mould or moulds.

When finished the new ear is pasted on the stump, or simply set in the position of the lost ear. It is really only the first artificial ear that is expensive, the chief cost pertaining to the making of the mould. Vulcanized rubber, which can be bent and twisted, has been found to constitute the best material for the making of artificial ears.

TWO FREE SCHOLARSHIPS

Mr. George Bury, vice-president of the Canadian Pacific, announces, in a special circular, that two free scholarships, covering four years' tuition in the Faculty of Applied Science in McGill University, are offered to apprentices and other employees enrolled on the permanent staff of the said company, and under 21 years of age, and to minor sons of employees, the same being subject to competitive examination.

The competitive examination will be held at the University, Montreal, and at other centres throughout Canada, in June, 1916. The candidates making the highest average and complying with the requirements of admission will be awarded the scholarships and have the option of taking a course in any department of applied science.

The scholarship will be renewed from year to year, to cover a period not exceeding four years, if, at the close of each session, the holder thereof is entitled, under the rules, to full standing in the next higher year. In case a scholarship holder finds it necessary to interrupt his course for a year or more, notice must be given at the close of the session to the railway company and to the head of the railway department of the university, in order that the scholarship may be open to other applicants.

In order to establish prior claim to the next available scholarship, notice of the student's intended return must be given to the railway company and the head of the railway department not later than January 1st preceding the opening of the session in which such scholarships will be available. Applications for certificates entitling eligible persons to enter the competition should be addressed to Mr. C. H. Buell, staff registrar and secretary pension department, Montreal.

Keen Scented Deer.

Under the most favorable atmospheric conditions deer can scent a man at the distance of a mile and a half. If he is smoking the range may be increased to two miles. They have been known to refuse to cross a man's track more than four hours after he had passed, but rain may destroy the scent in ten minutes. St. James' Gazette.

Home Is—

Where you wish you were about twenty times a day when you are away from it.

Where you got three square meals a day and didn't appreciate them.

Where you can use the shower bath any time you want it.

Where you can step across the hall wearing a Turkish towel and a cake of soap without fear of seven or eight people seeing you.

Where you don't have to dress for dinner.

Where you don't have to tip some one every two hours.

Where the view isn't much, but the food and beds and company and general environments have got it all over any other spot on the map.

Where you go when all the other places are closed.

SIR JAMES WATSON'S OPINION CONSIDERED MOST VALUABLE

He says that the commonest of all disorders, and one from which few escape is Catarrh. Sir James firmly believes in local treatment, which is best supplied by Catarrhozone. No case of Catarrh can exist where Catarrhozone is used; it is a miracle-worker, relieves almost instantly and cures after other remedies fail. Other treatments can't reach the diseased parts like Catarrhozone, because it goes to the source of the trouble along with the air you breathe. Catarrhozone is free from cocaine, it leaves no bad after effects, it is simply nature's own cure.

Beware of dangerous substitutes offered under misleading names and meant to deceive you for genuine Catarrhozone, which is sold everywhere, large size, containing two months' treatment, costs $1.00; small size, 50c; trial size, 25c.

Perpetual Motion.

Several people have had a shot at making something that would go on forever, like Tennyson's brook. And these have not all been cranks. A mechanician, for instance, made a top, which was balanced on diamond tips and spun in a vacuum, which ran for twelve months.

A Swiss watchmaker has invented an electric watch which will go for fifteen years without requiring to be rewound.

A watch and clock maker of Burton had in his possession an electric clock of his own making which has already gone twelve years and has never failed to record the time during that period although it has never been rewound. He claims that the mechanism will last fifty years and that he would not be surprised if the clock ran uninterruptedly for a century.

Of course the possibilities of radio-activity are to-day only dimly known, but they may yet revolutionize all our notions of motion and energy and put even electricity out of court.

"What do I want with the font?" said the old gentleman. "Oh, I beg your pardon," said the cleric. "I thought you had brought this child to be christened."—New York Journal.

"SALADA" TEA

PIGEON SPIES.

Feathered Soldiers Carry Messages and Take Photographs.

All the nations at present fighting use carrier pigeons, not only for carrying messages, but also for taking photographs. In the equipment of all the German and French army corps are to be found a number of wicker panniers containing pigeons, special men being told off to look after the birds.

The messages which these birds carry are written on fine tissue paper which is generally rolled around the leg and fastened there by small rubber band.

To show how useful the French and German authorities regard these pigeons it has only to be stated that in France no fewer than 15,000 are reserved for government use, and 8,000, according to official statistics, in Germany.

Our own authorities, too, realize their usefulness—and danger—and have made it illegal for any German or other alien to possess carrier pigeons during the war, for undoubtedly many messages from spies, especially during the early days of the war, were sent over to Germany by this means. These messages of from 200 to 300 words can easily be carried from the east coast to parts of Germany in a day.

During the siege of Paris in 1870, when 363 birds were sent out of the doomed city, one bird succeeded in carrying to the outside world on one trip no fewer than 40,000 messages, each of twenty words, the equivalent of four or five novels.

This extraordinary feat was accomplished by means of microphotography, the message being first printed in ordinary type, and then photographed. The photographs were reduced many hundred times on to films of collodion, each of which about two inches square, contained 50,000 words. Sixteen of these films, rolled up in a quill, weighed only one-twenty-fifth part of an ounce. The messages were read by means of a microscope, thus doing away with the necessity of rephotographing and enlarging.

The quills in which these messages are placed, for they are still used on pigeons of to-day, are fastened lengthwise in one of the tail feathers. The cost of sending one of these long dispatches was very high during the siege of Paris, in one case no less than £10,000 being paid in fees by the various people concerned. The messages were, of course, duplicated and sent out by a number of pigeons to insure safe delivery. The Germans did everything to prevent the birds arriving at their destinations, even to the extent of training falcons to attack them.

In Germany birds have been trained for some time past to take photographs as well as to carry messages. These photographs are taken by a special camera, which only weighs just over a couple of ounces.

It is attached to the bird by a kind of harness. This consists of two India-rubber straps cropping over its back and fastened to an aluminum plate on its breast. It is to this plate that the camera is fixed.

The time that it takes for a bird to pass over any particular spot is calculated, and by an ingenious arrangement the shutter of the camera is released at the desired moment and the photograph taken.

The way the shutter is released is as follows: Attached to a lever is an India-rubber ball in which there is a very small hole. The ball, when fully blown up, takes ten minutes to empty. Supposing it is known that the bird takes five minutes to arrive over a certain spot which it is desired to photograph. The India-rubber ball in that case is half inflated, and empties itself in five minutes. When the air is exhausted the lever falls and releases the shutter.

A bird carrying a camera, however, cannot fly anything like the distance one with a message can. In fact, 100 miles is about the limit for a pigeon photographer.—Pearson's Weekly.

Pepys at a Feast.

Pepys' account of the lord mayor's banquet which he attended in 1663 illustrates the earliness of the proceedings at that time. He made his way to the Guildhall at noon, "went up and down to see the tables" and then had a drink, refusing wine in consequence of a vow, but persuading his conscience that he might indulge in hippocras, a compound of wine and spices. Soon after 1 o'clock came the lord mayor, "and so all to dinner." Afterward Pepys strolled about the ladies' room, but could not discern one handsome face there, and "being wearied with looking upon a company of ugly women," went off to Cheapside to see the pageants, "which were very silly." Thus the lord mayor's show in those days came after dinner.—London Standard.

Better Than Spanking

Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

Getting an Autograph.

A Munich lady of fourteen who had seen and admired many of Rudolf von Seitz's paintings was anxious to secure the painter's autograph, but did not know how to go about it. After much thought he wrote a letter, stating that he had sent a case of wine to the professor's address and wanted to know whether it had been received. Thinking the matter of sufficient importance, the painter did not write, but called at the address given, met the boy's mother, and the fraud soon became apparent. The boy was thoroughly scolded and next day received this autograph note:

It often happens here on earth
That little rogues to great ones grow.
Some autographs for which you're trying
Can be procured without much lying.

NERVOUS HEADACHE

Headache is not a disease in itself, but comes as a warning to tell you that there is something wrong with the system. Consequently when you stop a headache by the use of powerful narcotic drugs, you merely stifle the "danger signal" by which Nature tells you that there is trouble ahead.

A starved condition of the nervous system is by far the most frequent cause of headache. You may be going too fast a pace and burning the candle at both ends. The nervous system has no opportunity to renew its vigor, and the result is nervous headache, sleeplessness, indigestion and irritability.

Why not select a treatment that aims to remove the cause of trouble by enriching the blood and building up the starved and exhausted nerves. Such is Dr. Chase's Nerve Food, and the effectiveness of this food cure is so well known that we scarcely need tell you about it.

In almost every newspaper you will find some cure reported as a result of using Dr. Chase's Nerve Food. The mention of it among your friends will reveal the fact that nearly everybody knows it as the standard medicine for diseases of the nerves and other ailments arising from a watery condition of the blood.

50 cents a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations disappoint.

Dr. Chase's Nerve Food

Dr. Chase's Recipe Book, 1,000 selected recipes, sent free if you mention this paper.

One Misery of Anglo-Indian Life.

Every night at dinner the Anglo-Indian holds a kind of levee. The insects which attend dance gaily round the lamp, and one has to watch one's plate and glass carefully lest some of the insects should dance into them. There is one insect—a little, flat, brown, shining creature—which emits the worst odor in the world. If one of these touches your food the whole is tainted and rendered inedible. You dare not kill these pests, for if one be squashed the whole room becomes filled with its disgusting smell and is uninhabitable for the next half hour. So these abominable insects fly about with impunity, while the poor Anglo-Indian must perforce look helplessly on and inwardly sigh "spero meliora."—London Saturday Review.

Gretchen und Her Pup.

Gretchen haf von goodle pup
  Mit white und voolly vleece;
Vhere Gretchen vent dot pup vould up
  Und valler like a geese.

It vent mit her von market day;
  De butcher man vas vise—
"Dot pup so nice und vat," he say,
  "He make good sausage pies."

Und den, vhen Gretchen not him seen,
  He schoop 'im in a sack,
Und run 'im through dose meat machine—
  Den Gretchen get 'im back.

Und Gretchen eat unt eat and eat;
  She lofe dot pup, you know;
So, now, vherever Gretchen vent
  Dot puppies shure to go.

—Jerome D. Bell.

BE CURED TO-DAY OF BACKACHE

Your persistent back-ache can have but one cause—Diseased Kidneys—and they must be strengthened before the back-ache can be cured.

Your best remedy and the quickest to act, is Dr. Hamilton's Pills; they cure kidney back-ache in a hurry. Simply wonderful is the action of this grand old medicine which for liver, kidney and stomach disorders has no equal. Dr. Hamilton's Pills will surely cure your back weariness, they will bring you appetite, color, strength and good spirits. Being purely vegetable they are mild, not drastic. Get a 25c bottle of Dr. Hamilton's Pills to-day.

TECHNICAL MATTERS.

A new 6,000 mile coal basin is being opened up by a 500-mile extension to the Siberian Railway.

An electrically-lighted cross revolves on top of a San Francisco steeple.

Forty-eight different materials are used in the construction of a piano, which come from no fewer than sixteen countries.

Bananas can be best ripened in a room kept at 110 degrees.

Eighteen thousand bricks can be manufactured by the steam process in ten hours.

Every day the River Thames scoops 1,500 tons of earth from its banks.

A full-grown elephant yields 120 pounds of ivory.

The tuberculosis death rate of New York, Philadelphia and Boston combined has declined from 380.6 per 100,000 of population in 1882 to 164 in 1914. The 1914 death rate was, therefore only 43.2 per cent. of that of 1882, or, to put it the other way, the death rate of 1882 had by 1914 fallen 56.8 per cent.

No other plant gives such a quantity of food to the acre as the banana, which is more than 40 times more than that of the potato and 133 times more than that of wheat.

Granite is the bottom of the earth's crust.

Quicksilver is 13½ times heavier than water.

Every square mile of sea is estimated to contain about 120,000,000 fish.

An induction balance has been devised for the purpose of locating buried shells in the soil of the former battlefield, so that the farmer may go over it safely with the plow.

The twelve countries having the least blindness are as follows: Belgium (before the war) had 43 blind persons to every 100,000 of the population; Canada, 44; Netherlands, 46; Saxony, 47; New Zealand, 47; Western Australia, 50; Hong Kong, 51; Prussia, 52; Denmark, 52; Germany, 60; New South Wales, 60; the United States, 62.

Extensive asphalt beds have been uncovered in Honduras.

Except that of China, San Marino has the longest national hymn.

The failure of the mortality rates of measles and whooping cough to show a reduction during the last fifteen years is due to the fact that they are highly communicable in their early stage, when diagnosis is most difficult.

Odds and Ends.

In Great Britain a billion is reckoned as a million millions. In the United States it is only a thousand millions.

In Mexico and parts of Colorado there grows a "soap plant" the roots of which upon being placed in water form suds and are suitable for washing the body.

When the water spider wants to dive he makes use of an apparatus similar to the diving bell.

A single gallon of gasoline will milk 300 cows, bale 4 tons of hay, mix 35 cubic yards of cement, move a ton truck 14 miles, plow three-fifths of an acre of land or generate sufficient electricity to illuminate the farmhouse for thirty hours.

German shippers have never favored the Kiel Canal, as they prefer the long sea voyages to the toll charges.

Since the temporary closing of the Panama Canal it is no common sight to see a train of 25 tank cars, containing 250,000 gallons of oil, in shipment from the Pacific to the Atlantic coast.

NO TWO-PARTY RATES.

(Telephone News)

The subscriber carelessly called the wrong number. Being in a hurry, he promptly asked for a box for two.

"But we don't have boxes for two," said a startled voice at the other end of the line.

"Why, isn't this the theatre?"

"No," was the reply; "this is Blank's the undertaker."

GILLETT'S LYE

EATS DIRT

MADE IN CANADA

WEAR THE KILTS!

Your Last Chance is to Join the 173rd at Hamilton.

The Scotch are the salt o' the earth and there's na doot o' it! The 173rd Battalion, Canadian Highlanders, now nearing full strength at Hamilton, Ont., will be the last Highland Battalion formed in Canada and issued with the Highland uniform. There is still room for a few good men and those desirous of enlisting with the last fully equipped Scottish Battalion, should send in their names at once to Capt. A. R. Bell, Adjutant, care of the Armories, Hamilton, Ont.

As this Battalion will leave for camp at Niagara-on-the-Lake on June 1st the time for enlisting is limited. This is positively the last chance to serve your King and Country, wearing the good old Scottish uniform.

Mrs. Flatbush—She got all her furniture on the installment plan. Mrs. Bensonhurst—Are you sure? Mrs. Flatbush—Positively. You see, she's been married five times and she got a little furniture with each husband.—Yonkers Statesman.

DID THEY ENLIST?

(Montreal Gazette)

A hundred and fifty thousand men and women marched in procession in New York on Saturday for the purpose of showing that they favored a policy of preparedness on the part of the United States for repelling an enemy's attack. The exhibit was imposing. It is not said how many presented themselves at the recruiting office later in the day. That exhibit would have been enlightening.

BABY'S WELFARE

The welfare of the baby is the fond mother's greatest aim. No mother wants to see her little ones suffering from colds, constipation, colic or any other of the many ills that so often affect little ones. Thousands of mothers have learned that by giving an occasional dose of Baby's Own Tablets to the children they can keep them well. Concerning the Tablets Mrs. Richard Boston, Pembroke, Ont., says: "Baby's Own Tablets saved my little girl, when nothing else appeared to help her. I would not attempt to raise a baby without keeping the Tablets in the house." They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

An Indian Marriage.

It seems almost incredible to an English girl that her little Indian sister never sees her husband until after the marriage ceremony. The parents choose the wife for the son of the house without consulting either party. Sometimes the bride is as young as fourteen. The child is gorgeously dressed, and placed on a dais behind a sheet; the women of the family being in attendance.

On the other side of the sheet is the bridegroom and many of his young men friends. The groom keeps throwing over jewels attached to flowers, which the women on the bride's side remove and place in her lap or on her person.

This first ceremony is called the Shahdee, and although a man is allowed four wives, no other even holds the same position as the first chosen for him. The others are of little importance, living their lives more or less as servants to the first wife. As the first wife gets to middle age she is known as the Begum.

LITTLE WORRIES IN THE HOMES

It is These That Bring Wrinkles And Make Women Look Prematurely Old.

Almost every woman at the head of a home meets daily many little worries in her household affairs. They may be too small to notice an hour afterwards, but it is these same constant little worries that affect the blood and nerves and make women look prematurely old. Their effect may be noticed in sick or nervous headaches, fickle appetite, pain in the back or side, sallow complexion and the coming of wrinkles, which every woman dreads. To those thus afflicted Dr. Williams Pink Pills offer a speedy and certain cure; a restoration of color to the cheeks, brightness to the eye, a hearty appetite and a sense of freedom from weariness.

Among the thousands of Canadian women who have found new health through Dr. Williams Pink Pills is Mrs. N. Worrall, Broughdale, Ont., who says: "After the birth of my second child I was so weak and run down that I was unable to do anything. The doctor said I had scarcely any blood in my body. I could not walk half a block without being completely exhausted and all the treatment of the doctor did not seem to help me. I called in another doctor, but with no better results. My feet and legs became frightfully swollen, I suffered with severe pains in my back and sides. I would be all day dragging around at my household work, and I was beginning to give up all hope of recovery. I had been urged to try Dr. Williams Pink Pills, but like many others, thought they could not help me when doctors had failed to do so, but after much urging I decided to try them. To my surprise, in a few weeks I gladly continued their use and found myself constantly growing stronger, and eventually able to do my house work without fatigue. I strongly advise every weak woman to give Dr. Williams Pink Pills a fair trial."

You can get these Pills through any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

WIT AND HUMOR

CONCEITED SAM.

(Windsor Record)

Sir Sam Hughes shows signs of being toned down. It needed something to puncture his inordinate vanity.

PROBABLY NOT.

(Farm and Fireside)

"They say George has brain fever."

"Nonsense! Can an angleworm have water on the knee?"

ATUHORITATIVE.

(Hartford Courant)

"Spring is about due."

"What's the harbinger?"

"I see the style notes and beauty hints have had to get off the baseball pages."

THE BUSY MOTHER.

(Browning's Magazine)

"O-o-o-oh! I b-b-broke a plate."

"I can't be disturbed just now. Run and ask father if he'll be kind enough to spank you for me."

GO HEAD.

(Philadelphia Bulletin)

Teacher—If a farmer sold 1,673 bushels of wheat for $1.17 a bushel, what would he get?

Boy—An automobile.

SUITABLE.

(Philadelphia Ledger)

"I want to sweep the cobwebs from my brain."

"Why not use a vacuum cleaner?"

HIDDEN.

(Chicago Herald)

Mistress—Did you see if the butcher had pig's feet?

Maid—No, ma'am, I couldn't—he had his boots on!

THE REAL FACT.

(Baltimore American)

"My airship is laid up for repairs."

"I suppose that is the proper position for an airship, but when I saw it, it looked very much laid down.

A WISH.

(Detroit Free Press)

"I wish success were a woman."

"Why?"

"Then everybody would know its secret."

FAR, FAR BACK.

(Life)

"Yes, there is a real idea back of everything he writes."

"Yes, all the way from 1,000 to 2,000 years back."

HIS VILE DISPOSITION.

(Judge)

"Fine day, Mr. Gloom, and——"

"Well, you didn't make it, did you?" snapped J. Fuller Gloom. "Then, what are you bragging about it for?"

HARD TO BELIEVE.

(Boston Transcript)

"My feet have a habit of going to sleep."

"With those loud socks?"

FLATTERED.

(Judge)

Ethel—Mama seems to like Jack; wonder why?

Fanny—He mistook her for you one night!

OFTEN THE CASE.

(Judge)

"Duty calls, Madame!"

"Ah! Just say that I am out."

PERKINS' PARADOX.

(Boston Transcript)

"Can't Perkins support his wife?"

"Why, he can support her all right, but he claims that she is insupportable."

THE ONLY THING.

(Baltimore American)

"What did you catch on your fishing trip in the country?"

"The last train back."

IF.

(Judge)

Marjorie—Do you believe in eugenics?

Patricia—I don't know. But if I could once get married I wouldn't care what happened to me.

NOT FILLING.

(Answers)

Lady of the House—You say you haven't had anything to eat to-day?

Tramp—Lady, de only t'ing I've swallered to-day is an insult.

NOT THEIR LONG SUIT.

(Judge)

Gazzam—Cholly comes of distinguished ancestors.

Miss Cayenne—Distinguished no doubt—but not as ancestors.

JUST DARED HIM.

(Daily Oklahoman)

Irate Customer—I have a good mind to mop up the floor with you!

Merchant—Do it, I'll dare you to do it. It will be put in the papers, and I'll get lots of free advertising and have a rush of business. Hit me, you coward! Hit me!"

THAT FELLOW FEELING.

(Record)

"Prof. Jones has no right to teach. He doesn't understand his subject and he can't explain——"

"Yeah, I know. He gave me a low mark, too."

NARROW ESCAPE.

(Baltimore American)

"It was while traveling in Switzerland that I proposed to Miss Smith on the verge of a mountain gorge."

"Horrors! Suppose she had thrown you over!"

MERE MATTER OF FORM.

(Browning's Magazine)

"He said he was a bank cashier, and we investigated and found that he was."

"What bank?"

"Well, it's a gravel bank, and he's paymaster of the shovel gang."

THE UNFORTUNATE PART.

(Judge)

Willis—This war has made a lot of difference with the fashions—I mean as respects the fellows who design them.

Gillis—Yes, and it hasn't made any difference at all with the fashions—I mean as respects the fellow who pays for them.

COURAGE.

(Life)

Louise—Don't you get awfully hungry when you cook?

Julia—Horribly! Sometimes I'm almost willing to eat what I cook myself.

THE USUAL WAY.

(Baltimore American)

"My butler left me without any warning."

"You got off easy. Mine left me without any spoons."

HELP IS NEAR.

(Browning's Magazine)

"Some of the greatest problems of life are yet struggling for solution."

"Yes, but don't worry. Graduating day essays are on the way. They'll settle 'em."

Beef or mutton should be a deep rose color and the fat of a rich cream. The choicest cuts for roasting are the sixth, seventh and eighth ribs, the sirloin and porterhouse cuts. Sirloin and short cut porterhouse steaks are best, although many prefer the pin bone steak.

"Father, what is an 'eye-opener'?"

"An alarm clock, son."—K[illegible] Star.

WALKERTON TELESCOPE
$1.50 per year in advance.
LORNE A. EEDY - PUBLISHER
Phone No. - 48
Residence - 146

WALKERTON, JUNE 1st, 1916.

WILL HAVE TO HURRY

Walkerton's 1916 Council started out with every chance to make good and we trust they will be there "with the goods" when they have to face the electors again. They will have to move quickly though if they are going to accomplish the things that were outlined in Mayor Lippert's inaugural address last January. The Mayor spoke of side-walk building, he spoke of improving the roadways to the G. T. R. Station and to the cemetery; he spoke of improvements to the Town Hall and urged the desirability of a hydro by-law to the people. It is perhaps too early to accuse the Council of lack of faith in not attempting to carry out its promises, but we cannot refrain from noticing that the year is nearly half gone and a start has scarcely been made towards carrying out the fairly large program of the year. If the Town Council is going to carry out its promises to the ratepayers, it has a lot of ground to cover.

EDITORIAL COMMENT

Chesley will have hydro on June 15 h.

✦ ✦ ✦

It is not more horses but better horses Canada needs, says the Farmer's Advocate.

✦ ✦ ✦

Walkerton's debt is small and the town can well afford to make any necessary expenditure such as the building of a permanent roadway from station to station.

✦ ✦ ✦

A professor in a New York college says what the world needs is a new religion. What the world needs, on the contrary, is a people who will live up to the ideals of the religion we already have. Edward Everett Hale was once asked: "Is Christianity a failure?" "I do not know," replied Dr. Hale; "it has never been tried."—Orillia Packet.

✦ ✦ ✦

From Mr. Rowell's point of view, the usefulness of a party does not depend on the chance of its being in power or in Opposition. A party that is fully alive and sincerely devoted to its principles will be able to render service under all conditions.—Woodstock Sentinel Review.

✦ ✦ ✦

Apropos of the claim that all newspaper jokes are at least two or three thousand years old, what about the following: "You advertised as chauffeurette-maid." "Yes, madame." "What were your duties at your last place?" "I drove and cleaned the cars singlehanded." "And as maid?" "I took down my lady at night and assembled her in the morning, madame."

✦ ✦ ✦

As one of the outcomes of the war, Ontario egg producers have renewed their hold on the English market. We should see that this hold is retained. The Western Provinces, in which Ontario eggs have been largely consumed of late years, are going to meet their own requirements, and a little better, in future. The probabilities are, too, that for a year or two at least after the war, city consumption in Eastern Canada will be less than it has been. It is, therefore, doubly important that the English market be retained and in this case, as in bacon, regularity of supplies is essential to retention. Poultry, like hogs, form a side line but an important one. A very large flock of hens may not be profitable, but a flock of 100 to 150 on the average farm can be made, in proportion to capital invested, one of the most profitable branches of farm operations. —The Weekly Sun.

✦ ✦ ✦

Another of the steadily growing evidences of the extravagance of the Ontario government in years when they should have been economical and thus have avoided the necessity of taxing the people of Ontario in such onerous ways as they are now doing, is furnished by official information secured from the government upon request of the Opposition showing the increases in the Civil Service Staff. In the last ten years the number of employees in the Ontario Civil Service, excluding the Department of Public Works, has increased from 771 to 1383, an increase of 594 or over 77%. If the Public Works Department figures were included this increase would assuredly be greater.

✦ ✦ ✦

The Montreal Daily Mail, a journal friendly to the Borden Government, says of the revelations before the Meredith-Duff commission:

There is no use mincing words over the position of Allison. He was a middleman fortified by a close connection with the Minister of Militia that apparently gave him the entree everywhere and the means of awarding contracts on his own terms. Evidence appears in the exposures of Allison's United States connections to explain why the people across the border got so much of this munition business which should have been placed in Canada. Allison had the connections in the United States. He did not have them in Canada. Fishing was so good that such a mighty angler as B. F. Yoakum threw in his hook. Apparently, the important consideration was that orders had to be placed where J. Wesley Allison had the connections.

It has been shown already that Allison's commission ran into hundreds of thousands, in short order, and the Meredith-Duff Commission has hardly commenced to uncovered his operations, many of which are not within the strict scope of this enquiry.

Walkerton Boys Write Home From Trenches

FROM ED. ERDMAN

Somewhere in France.
Sunday, May 7th, 1916.

Mrs. M. Erdman,
Walkerton, Ont.

Dear Mother and Brother:

Well, Mother, as this is Sunday and things not very busy around the camp just thought a short note to you would help pass the time away until supper time. Well I don't know whether I told you of the job I have landed or not but I will tell you in this note. The Sergeants of each Co. have started mess and I have been elected head cook and chef of our Co's. mess and it is up to me to fix up the fancy dishes for our boys, such as fried bully beef, ha, ha. Well I had to quit and get supper, we had some lunch to-night, we had cold ham, cold roast beef, mashed potatoes, parsnips, lettuce salad, rhubarb, hot buscuits and cake, oh, this was some meal, I see where we will have a sick bunch of Sergeants after eating my pastry, ha, ha, but through good luck and hard work we may make out alright. For a cook house and mess we have an old blacksmith's hut rigged up and it makes a fairly good place to cook and dine but anything will do in time of war. You see when we first landed here we all had to dig in and fix up the support work and we got things in good shape and now they work two platoons one night and another two the next night and this way of doing has eased us some and the fellow who is helping me is a light duty man and he looks after business when I take my turn in with my platoon, I was to go out to-night but got orders "knock off" so you see I can finish this note. Well Fritz's is putting over some big shells at present and the boys are out watching them burst, they are all going over our head and it is a very good thing too, they come through the air making an awful howl and when they burst they make quite a noise but don't do as much harm as the Huns think they do, for the Fritzies think every shell they put over kills hundreds but he puts most of them in the fields, it is the best place for them at any stage of the game. Well, Mother, we have been getting some great weather of late, it has been very hot the past week but to-day we got some rain and the air has cooled off somewhat and it is just like a real summer night. Levi was over last night to see us, he is with headquarters and they are about three miles from our camp. He is fine and the mule that hit him didn't do too bad. It gave him a couple of nice souvenirs which will make him a little bit tough where it hit. Wm. Bell is still in the ring and in good health. Well, Mother, now as the weather is nice and real summer is setting in, I suppose you will be doing a good business. It is hoped that the 160th will be left there this summer as I know that it sure would make things lively in the old town. I have a faint idea how things would be with all ye rough necks away. Well, Mother, I think I will close for to-day, hoping all is well as it leaves me in good health.

Your boy,
Ted.

ALFRED TOLTON WHITES

In Belgium,
May 5th, 1916

Dear Mother:—

The parcel you sent me for Easter arrived to-day. It was a pleasant surprise for me for I don't remember you having said anything about sending one in any letter. Everything was in good condition and is quite tasty after being so long coming. That is the proper way to send eatables from Canada. I sampled the maple sugar just before I came over to this Y. M. C. A. hut to write and it was real good. It seemed as though it had only been made a day or so for the cakes were comparatively soft inside.

We are having beautiful weather now and it is quite warm, two days ago we had a thunderstorm and a heavy rain. The boys did like that thunder. It sounded so much better and more natural than that made by a bombardment.

We have been very busy for a few days getting everything cleaned up about camp, oiling harness, getting wagons washed ready for painting clipping mules etc. We had an inspection by a general in command of the Canadian forces this forenoon. I understand everything was O. K. The wagons that are painted look well and are a credit to the wheelwright who is doing the work.

I suppose you were wondering what I did on Easter Sunday. Well I performed whatever work I was called upon to do and in the evening went to the church service in the Y. M. C. A. in the town about a mile away. The place was crowded with soldiers. The sermon was splendid and the music furnished by a large brass band from a Western Canada battalion was also all that could be desired. They played some special selections beside playing for the singing of the congregation. I also attended the Good Friday evening Service. Regarding our chaplains let me say this, they are as big and able as to the boys to whose spiritual needs they are trying to attend to. When there is some activity up on the firing line and wounded men are coming into the dressing stations they are there to help. I attended our own battalion's church parade last Sunday morning. The Commander-in-Chief of the Canadians over here was there and addressed the men in a few quiet words at the conclusion of the service. I had not seen him since we came in last Fall.

Well I must conclude, I think I have covered about everything worth while telling, nothing much can be said about what's going on here you know so far as the war is concerned. I think our supper of tea, cheese, bread and jam will be ready, I shall have some variety this evening at any rate. Thank you very much for the box and please let know if there is anything I might send you in your next letter. With best wishes, I remain

Your affectionate son,
Alfred.

CARRICK TP. COUNCIL

Mildmay, May 22nd, 1916

Carrick Council met this day pursuant to adjournment. All the members present. The Reeve in the chair. The minutes of last regular and special meetings were read and adopted.

The Court of Revision was then constituted, all the members being duly sworn. The following appeals were heard and disposed of as follows: Chas. Koenig, buildings assessed too high, assessment sustained. Anth Opperman, hotel assessed too high in view of prohibition, reduced $500. Geo. Kuenneman, hotel assessed too high in view of prohibition, reduced $300. Heisz & Tiede, brewery assessed too high in view of prohibition, reduced $1,000. Edward Ruland, assessed for bitch, which he killed, struck off roll. I certify that the foregoing is a correct record of the proceedings of the Court of Revision for the year 1916.

Finance Report

The following accounts were referred to the Finance Committee and recommended to be paid:

Chas. Wendt, wrist watches for soldiers	$150.00
Mildmay Gazette, 100 pathmasters lists, 100 pathmasters by-laws, adv. Court of Revision, 500 envelopes....	10.25
E. Stroeder, 12 lds gravel, keeping 2 lights 11 nights	2.22
Formosa Elec. Light Co., street lights to April 30	28.75
J. A. Johnston, stationary, postage, telephone	3.10
S. Herringer, bal. sal. as assess.	70.08
J. Weber, 2 trips hauling tile to Ambleside	4.50
M. Filsinger, 1 mtg., 2 days R&D	7.50
L. Doering, 1 mtg., 1 day R&D..	5.00
J. Montag, 1 mtg., 1½ days R&D	6.25
A. Lewis, 1 mtg., 2½ days R & D	8.75
C. Wagner,, 1 mtg., ½ day R&D	3.75
Statute Labor Commutation	
D. W. Clubine, 143½ hrs. work..	$25.11
G. Schnurr, 55½ hrs. work	8.33
N. Kreitz, 5 hrs. work	75
J. Weller, 9½ hrs, with team..	2.88
J. Weber, 23½ hrs. with team..	7.05
Jos. Hotten, 5 hrs. with team ..	1.50
Jac. Palm, 3 hrs. with team....	90

Robt. Brown asked for a rebate of his poolroom license money, as his poolroom is not in operation now. The matter is laid over until next meeting to obtain fuller information.

Wagner—Lewis—That Mr. Jas. C. Thomson be named as the Carrick representative of the Clifford Farmers' Union Institute to serve on the Ontario Board of Agriculture.—Carried.

Petition of Mr. H. G. Wright and 167 others was presented to Council, praying for a grant of one thousand dollars to the Patriotic Fund.

Doering—Lewis—That this Council grant the sum of $1000 to the Patriotic Fund, to be paid as follows:—$500 at once, and $500 on December 15th, 1916.—Carried.

Pathmaster A. Rehkopf asked for assistance in repairing Blind Lane at Cons. 2 and 3.

Montag—Wagner—That the sum of $15 be granted to assist in repairing said road.—Carried.

Montag—Doering—That Messrs. Filsinger and Wagner be a committee to act in conjuction with Normanby Council to repair Normanby townline between Moltke and Neustadt.—Carried.

Wagner—Lewis— That Messrs. Filsinger and Doering be appointed a Committee to examine the Kopass bridge and rebuild same if necessary. —Carried.

Doering—Montag—That this Council do now adjourn to meet again on Monday, the 19th day of June next to transact general business.—Carried.

So far there have been no casualties in the typewriting contest between Washington and Germany.

While lots of men are doing their bit for the country, one named Allison seems to have been getting his bit.

Beats all what fickle things men are. Many a man who is going to turn his back yard into a bower of bloom eases off as soon as he digs up a couple of rows across the far end of the lot.

The Crest of the 160th Overseas Battalion

The "Bruce Battalion" Canadian Expeditionary Forces

Stirred by the love of liberty and honor—called by the Empire's need—undaunted by the hardships and carnage at the Front—keen to be in at the finish—Canada's finest manhood is getting into khaki!

Men who thus give up income and home comforts, and risk life itself, certainly should not have to sacrifice such civilized habits as a clean, smooth shave whenever they want it. Experience has shown that the only way to be sure of this at the front is to have a Gillette Safety Razor.

Wherever there is soap and water, and five minutes to spare, the Gillette will give a real velvet shave. Take one to the Front yourself if you can—if you cannot go, see that your enlisted friend has a

Office Stationery

BUSINESS Stationery should reveal the spirit of the business for which it is used. An appropriate letterhead for a profession would be inappropriate for a mercantile house.

The typographical appearance of a letter head for a doctor should be small, neat, dignified—almost feminine; for a blacksmith, black, rugged, plain; for a vaudeville performer, loud, showy, big; for a bank, rich, dignified, restrained; for a store, neat, practical, harmonious, and so on.

Correspondence paper should not reflect poor judgment. Everything counts in these days of sharp competition.

VIOLENT ATTACKS OF DYSPEPSIA

Suffered Tortures Until She Tried "Fruit-a-tives"

ST. JEAN DE MATHA, Jan. 27th, 1914.

"After suffering for a long time with *Dyspepsia*, I have been made well by "Fruit-a-tives." I suffered so much that at last I would not dare to eat for I was afraid of dying. Five years ago, I received samples of "Fruit-a-tives" and after taking them I felt relief. Then I sent for three boxes and I kept improving until I was well. I quickly regained my lost weight—and now I eat, sleep and digest well—in a word, *I am fully recovered*, thanks to 'Fruit-a-tives.'

MRS. CHARBONNEAU.

50c. a box, 6 for $2.50, trial size 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

POETS' CORNER

THE SCHOOLBOY'S DREAM

It was on Recitation Day,
And to the rostrum high,
Ten schoolboys mounted, one by one,
Each with a bloodshot eye;
Each with a voice that shook with fear,
And blistered lips and dry.

That Midnight, in his troubled bed
One dreaming schoolboy lay.
Long since the village Curfew Tolled
The Knell of Parting Day,
And left the fields in darkness where
Maud Muller Raked the Hay.

The Midnight Passed; the Boy Awoke;
That Bright Dream was his Last.
He waked to hear the Light Brigade
Charge, full Six Hundred, past;
His Brow was Wet with Honest Sweat
As he looked on aghast.

The Boy Stood on the Burning Deck
Whence All but Him had Fled;
The Flames that Leaped Above the Wreck
Shone Round Him o'er the Dead.
On Fame's Eternal Camping Ground
Their Silent Tents were Spread.

It was the Schooner Hesperus
That sailed the Wintry Sea;
Near Linden, When the Sun was Low:
And, Rolling Rapidly,
Was Iser, and Untrodden Snow—
The Boy, Oh, Where was He?

He climbed far out upon the mast,
With Large and Sinewy Hand:
Far down below him he could see
The Village Smithy Stand
Beneath the Spreading Chestnut Tree,
And home and native land.

"Ho! Blacksmith!" cried the Boy aloft
"Mark thou my crossbow well;
Hold firm the apple on thy head
Lest some disaster fell
Come to thee from this shaft I send—
For I am William Tell!"

"Shoot, if you must, this Old Gray Head,"
The Village Blacksmith cried;
"But Spare Your Country's Flag," he said,
"For men have bled and died
Where Freedom, From Her Mountain Height,
Unfurled it far and wide."

"The Melancholy Days Have Come,
The Saddest of the Year."
The Boy replied in Accents Wild,
In which was little cheer;
"For men may come and Men may Go,
But I am prisoned here."

In the Signal Tower of the Old North Church
He saw a lantern shine;
'Twas the Midnight Ride of Paul Revere,
Hard by the foaming brine,
When he rode down From Bingen—
From Bingen on the Rhine.

"Friends, Romans, Countrymen!" he cried;
"To be or not to be?"
Then high up on the mast he spied
The Boy, far out at sea—
"It is the Little Peterkin
In very truth," quoth he.

"Now blessings on Thee, Little Man;
My Barefoot Boy," he cried.
"Art thou the Little Peterkin?"
"Nay, nay," the Boy replied:
"Look close and see that We are Seven,
Myself and six beside.

"One is the Village Blacksmith there,
And you are Paul Revere;
And one of us is William Tell;
Another one's up here:
Three more upon this rostrum high
Will presently appear.

"So you must Give Me Liberty
Or Give Me Death!" he cried
"Jump, Boy—Far Out, and leave that wreck
Upon the foaming tide:
And I will catch you in my arms."
So Paul Revere replied.

"Sail on, Sail on, Thou Ship of State,"
The Boy cried out, "Adieu!
The Muffled Drum's Sad Roll Shall Beat
Thy sailor's Last Tattoo."
He Leaped into the Ocean's Arms,
A Brave but Fallen Few.

Below him was the burning deck
Where flames rolled hot and red—
Great stars he saw, and then sat up
To rub his aching head
When he waked up at last—for he
Had jumped right out of bed.

James W. Foley

News About Town

The average age of the British generals is about 55½ years: that of the Germans is 63¼.

In some places garden seeds are coming up very rapidly—especially where the poultry has been turned loose on them.

The shop license of Harding Bros. of Guelph has been suspended from May 20th to June 5th for shipping liquor to fictitious addresses in Chesley and Brampton.

Out of 11,143 small retailers in the United States who closed their doors in a year, it is claimed over half of them did not realize the necessity of proper advertising and many of those who did were at times careless in the preparation of their copy. The big successful store is simply a result of organization made possible by concentration of capital, backed up by good and continuous advertising.

His Honor Judge Klein, will hold County Court in the Town Hall on June 5th and 6th. It will be an important event. Among those who will be here will be the Clerk of the County Court, Sheriff Jermyn, who will have on the robes of office, the Court Crier and the Constables. There will be a great array of legal talent as there are a number of cases of some importance. Judge Klein has done a wise thing in holding the court at Wiarton, and the precedent will do good.—Wiarton Echo.

$11 to $11.50 a hundred live weight for hogs, recalls the time when, in Upper Canada, the price of dressed hogs went as low as $2, or ten shillings currency, as it then was, per hundred. This was in 1835, the winter of the McKenzie rebellion. The same winter the farmer who told the writer of that experience drew oats 15 miles to Galt and sold them for "a York shilling"—twelve and a half cents—a bushel—both pork and oats being payable in store goods, at more, on the average, than double present prices. A very poor quality of red flannel sold at a dollar a yard, and a very inferior quality of tea brought the same price a pound. As a favor, the farmer was allowed enough to pay his toll on the way home, having been given credit on the way out. Do any of us do well to grumble at present-day prices or conditions? — Orillia Packet.

Must Report All Fires.

A new regulation requires the chief in every municipality that has a fire brigade organized to report every fire within three days after its occurrence to the fire marshal. For doing this the chief receives no extra remuneration; but for not doing it he is fined fifty dollars. In this report he must enumerate the amount of damage done (estimated cash value); the amount of insurance carried; by whom it is carried; and the cause of the fire and other particulars concerning it. In the case of townships, the clerk of the township is required to forward the information to the fire marshall. The clerk received 50 cents for each report he sends in. From these reports are compiled the fire statistics of the province and it is hoped by carefully scanning these reports to soon eliminate a large number of the disastrous fires that mean so much loss in the year.

CORP. PILKINGTON

Engine Through Bridge

Mr. Herman Boettger of Paisley had a thrilling experience when the engine of his well-drilling outfit broke through a small wooden bridge and dropped to the bottom of the bridge on the 20th side line of Bruce between the 8th and 10th cons. Mr. Boettger was at the throttle himself standing on the engine platform when the accident occurred but was lucky enough to come out of the mess without a scratch. The creek bottom is about ten feet from the floor of the bridge and the engine was partly over-turned in about four feet of water. The water tank wagon was hitched to the back of the engine and was almost up-ended but did not go down altogether. There will be considerable difficulty in extricating the outfit from its position and the extent of the damage will not be known until it is out of the water.

+ + +

How He Sold the Calf.

I asked eight dollars and a half for one fine black Poled Angus calf, which price was not too high; I hoofed it west, I hoofed it east endeavoring to sell the beast, but no one wished to buy. Day after day I toiled along and bored men with the same old song, "I have a calf for sale; I ask eight bones and fifty cents, for this unequalled critter, gents—who will dig up the kale?" Then said a friend, "Oh, rest your feet, and quit your wearing out the street, and howling by the year; spend fifty cents and advertise your sawed-off cow of pocket size, and buyers will appear." I followed up that same advice, and put my jaded feet on ice; and when the ad. appeared ten customers came to my gate. One bought the calf and paid the freight, and others bucked and reared. And thus by printing little ads, the wise man gathers in the scads and rests his aching corns; a little ad. will make more noise than fifty-seven little boys all tooting on their horns. — Walt Mason

WOMEN CAN'T VOTE

Do You Know, Asks a Leading Walkerton Citizen of the Telescope, That Women Can Not Vote in the Administration of Any of Our Church Affairs.

"Do you know," asked one of our leading citizens, as he dropped into the TELESCOPE the other morning, "that in the churches of this town the women have no vote." "This to my mind," said he, "in this twentieth century, is a most outrageous state of affairs."

And was he not right? Upon whom does the heaviest part of the labor in connection with the church work fall but upon the women. The work of their hands is in evidence at every gathering. Their assistance is needed and utilized in every undertaking. And yet Man alone is the administrator. But a better day is dawning.

The time has gone by when women were denied the delight and pleasure and honors that result from the study of science and literature. They are no longer condescendingly complimented upon the smallest indication of thought and competency. They have taken their place side by side with the foremost minds of the age as the exponents of all that is noble and elevating. They have in their humble way contributed to the success of man and have had no share in the honor that he has reaped therefrom, just as in the wider sphere of religious matters they have borne the weight of the burden but man has refused them a voice in the administration of church affairs. That their influence is being recognized is becoming manifest in the widening of the concessions granted them as the years advance, but possibly no single recognition of woman's worth stands more prominently before the Anglo Saxon world today than that of the late Lord Disraeli, of England. When Mr. Disraeli retired from the premiership he was offered a place among the hereditary aristocracy with the title of Earl. He declined it with the intimation that, if there was any reward thought to be deserved, he wished it conferred upon his wife, to whom he attributed all his success. On the day he retired from power his wife took her place among the noble ladies of England by the title of Viscount Beaconsfield. But the movement for woman's freedom has gone slowly, but steadily, on since John Stuart Mills' plea in 1869 for perfect equality of the sexes, when he held that the principle which regulates the existing social relations between the two sexes—the legal subordination of one sex to the other—is wrong in itself, and is now one of the chief hindrances to human improvement, and that it ought to be replaced by a principle of perfect equality, admitting no power or privilege on the one side, nor disability on the other.

Great concessions have been made to women since Mills' day. Politically, their status is yet far inferior to that of men in spite of the fact that the municipal franchise has been extended to them. But one of the recompenses of the present war will be the recognition of woman's place in church and politics. Is it fair to hold woman in the main responsible for the training of the children and then deny her all authority in choosing the teachers who along with herself, and sometimes more powerfully than herself, shape the destiny of these children?

Is it fair to tell women every Sunday that they are chiefly responsible for the moral characters of their sons, and then give them no power to say whether or not houses of drunkenness and of prostitution shall be licensed by the side of the home, the church, and the schoolhouse to entice these sons to ruin?

Yes, woman is the weaker vessel. But when the world's work is surveyed, woman will be found to have done her share. When the great roll call of service is rendered woman's answering voice will be heard. She has gone—gone from homes of culture and the enchantments of Christian society—gone to isolation and the dreariness and monotony of heathen misery—gone into hovels in India and in China, camped among the Indians of the West, crept on hands and knees amid the smoke and vermin of the Zulu's kraal, sung Christian hymns to savage crowds, bound the bruised and broken body on the battle front, slept quietly on the infinite arm in the habitations of cruelty and the abodes of lust, sympathized with the fallen, mothered the waifs and homeless children, given to mothers a loftier idea of motherhood, addressed other women on national reforms in the interests of their sex, and been "living epistles" of the everlasting Gospel. And all this they have done, not under the impulse of mere sentiment, but with patience that could plod, with ingenuity that could create, and with practical wisdom that could conserve, they have prosecuted their work in a way and with results which may challenge comparison with that of their brethren of any century and of any clime.

Orillia has now a population of upwards of 8,000, an increase of 600 over last year. It is to be noted that every inch available of advertising space in the local newspapers is occupied with announcements by the merchants of the town, which emphasizes the fact that a town is progressive only to the extent of the enterprise and intelligence of its business men. —Collingwood Enterprise.

Showing a Roof Covered with Brantford Slates in Solid Color.

There is Safety Under This Roof

Have you ever had a fine job of decorating spoiled by a leaking roof? If you have, you certainly are in a position to appreciate the value of a roof that is positively water-proof. Some of the troubles common to wooden shingles to-day are that they are apt to split, warp or blow off as well as leak, soon after they are put on. Years ago they were good, but the quality has since gradually depreciated as the available supply of suitable timber became exhausted.

Brantford Slates have none of the faults of wooden shingles. They cannot rust. They do not allow rain to be driven under them as do metal roofs. They do not require rigid supporting as do the common tile or slate roofs. On the other hand *Brantford Slates* afford the utmost protection with little weight. They are made on a long-fibred felt "base" which is thoroughly saturated under pressure with asphaltum or mineral pitch. Crushed quarried slate particles are then deeply embedded in the surface of this "base", making it water-tight and fireproof.

Brantford Roofing

Brantford Slates are made in the natural slate colors of green, red, black and grey. The colors never fade and the slates do not require painting nor repairing. These slates are pliable and fit readily around gables and into the angles of any roof. This means a continuous roof without seams or joints. Sparks die on Brantford Slates. When you have these slates "on" you are done with the job. Remember they don't require painting or staining and may be selected to harmonize with almost any exterior color design, and the price is not beyond your reach. We would be pleased to send you samples and our Roofing Booklet.

CURRENT COMMENT

Gen. Pershing's spring drive has yet to come off.

Good Boy-Ed has been decorated by the Kaiser as a sort of black eye to President Wilson.

It is reported that agents of the German Government have bought fifteen miles of the coast of Massachusetts. Perhaps Germany believes in preparedness for a descent on the U. S. shores.

Three hundred Harvard men are said to have enlisted in the European war, and not a few of them have lost their lives. The United States is well represented in the ranks of the Allies, and more are joining every day.

The German propaganda in Sweden has failed. The Swedish Government has answered that it will continue to adhere to its policy of neutrality. The conspirators have been no more successful there than they were in the United States.

The energy expended just now in Great Britain in expressing opinion on the German answer might profitably be employed in formulating one of her own on a related subject.—Pittsburg Gazette-Times.

She has already done so, and is awaiting a reply.

Mr. S. M. Mitric, a Hindu writer, in the London Outlook, asks that German missionaries be not allowed to return to India after the war. He quotes extracts from their sermons delivered in Germany as a reason why they should be barred from India. The extracts prove his case.

German Consuls throughout the United States have been instructed to admonish German subjects to observe scrupulously American laws. The stockyard chaps who have been putting small prongs and hooks into the frozen beef intended for the soldiers of the allies could not have heard of this instruction.

The New York Times believes that it succeeded in making an actual count of the marchers in the preparedness parade in New York on Saturday last, and that there were 125,000 of them. The chief marshal thinks there were 10,000 more, but he did not count them. But the women suffragettes may yet do better than that.

Children are being taught to dance by the hundreds on Fletcher's Field, and it is the intention to extend the work so as to take in other playgrounds. One estimate is that eventually 10,000 youngsters will have learned their steps, says the Montreal Gazette. Here's a hint for our playgrounds promoters. Any objection?

Those who wonder what the British fleet is aiming at doing should read the following by Admiral Sir A. Wilson: "The main object aimed at by our fleet, whether for the defence of commerce or for any other purpose, is to prevent any ship of the enemy from getting to sea far enough to do any mischief before she is brought to action."

Judge Horne, in sentencing Robert Fay to eight years' imprisonment for placing infernal machines in vessels at New York, said: "This court is going to convince you, and thoroughly warn others, that this country is not a proper place in which to carry on the war, and that our laws are still binding, notwithstanding the war in Germany." Bernstorff ought to take this warning to heart.

Is France beginning to wonder why Britain does not make her long-promised drive? Senator Humbert writes in Le Journal of Paris: "France has accomplished fully, and more than fully, her share in the common task. Has not the moment come to take this into account? It was in the interests of all, and in order to allow others in their turn to play their part, that she went ahead of her comrades on the path of sacrifice. What other country has, like ours, so strained its resources of able-bodied men, subjecting the unfit to such frequent medical tests? Where is the country that has called to the colors the classes of 1888 and 1917, men almost old and children?" But Britain has also done more than was expected of her, and promises to do much more.

The New York Sun notes that fifty Irish prisoners in Germany accepted $50 as a bribe to desert Britain and enlisted in the German army at the instigation of Sir Roger Casement and declares:

These fifty soldiers were not conscripts or pressed men, but volunteers who entered the British army without compulsion. They undertook the dangers of a soldier's life of their own free will. Their violation of their oath and enlistment against their country, to fight the men with whom they had stood side by side, are therefore peculiarly abhorrent, and the possibility that their present employers may eventually transfer them to that portion of America embraced within the boundaries of the United States is a matter of serious import to this country. The United States does not want them. It has no room for them.

'TWIXT LOVE AND PRIDE

"Mabel, open the door, dearest," she said, knocking gently on the outside whereupon, after a minute's interval, Mabel did open the door, and stood on the threshold slightly defiant in appearance.

"Oh, it is you, Mildred!" she said, with an assumption of surprise. "Well?"

"May I come in, darling?" inquired Miss Trevanion, reproachfully.

"Of course you can come in," the "queen" answered, ungraciously, moving a little to one side.

Mildred went a few steps into the room and closed the door.

"Mabel, will you not show it to me?" she said.

"So that is it!" cried Mabel. "I thought so. Aunt Harriet's revengeful expression when the post came in was not thrown away upon me. She has been dictating to mamma, and saying of me all sorts of things as unjust as they are untrue; and mamma, in turn, has been dictating to you. Now there is no use in you trying to gloss over matters, Mildred; I can understand it all as distinctly as though I had been present. I have never before been asked to deliver up my letters for public inspection, and I don't intend to do so now. It is easy in such cases to draw conclusions, and if Aunt Harriet imagines she can control my actions, she makes a very great mistake—and so you may tell her. He did not write for her eyes—he wrote solely for mine."

She had worked herself into a high state of indignation by this time.

"Of course he did," said Mildred; "do you think I cannot understand that? Mamma said distinctly you were not to be asked to show your letter even to her, until you wished to do so of your own accord." Then, sympathetically: "Is it a love letter, Mabel?"

"Well, yes, I suppose so," acknowledged "the queen," demurely, her whole pretty, angry face breaking into smiles of inexpressible happiness, as she thought of all the love the letter contained.

Then there came the unconquerable longing to share her secret with somebody—to let some other eyes beside her own see how dearly she was beloved—to hear some other voice declare how sweet and true and perfect a letter it was.

"If—if you will promise faithfully, Mildred, not to tell any one, I will let you see it."

"I promise faithfully," said Mildred.

And then Mabel went over to her drawer, and having opened it, slowly and tenderly drew from it the harmless letter that had caused all the disturbance downstairs.

"Now read," she said; and Mildred, taking it, she drew back behind her sister, lest by any chance the flush that brightened her cheeks during the reading might be seen.

"My darling queen," it began, and, after the usual run of information relative to the passage, reception, climate, and such like uninteresting matters, went on to say how much the writer missed her—how well he loved her—how entirely every thought of his was centred upon her alone, and how he had that day written to her father explaining how affairs stood between them, and asking permission to make her his wife as soon as things should have arranged themselves.

It was very like all other love letters and wound up with an earnest, loving entreaty that she would not forget him—that whatever happened she would be true to him.

"I would rather be dead than hear that you had been untrue to me," were his words. "Remember this! Not that I feel anything but the utmost faith in you. Ever, my own darling, your affectionate Roy Blount."

So it ended. Miss Trevanion, as she folded it, felt a sensation of sudden tightening at her throat. How good a thing it seemed to her just then to be beloved—to have tender words on a paper folded up and sent to one with the certain knowledge in one's breast that somebody was waiting with impatient heart for other tender words in return.

Meanwhile "the queen" was standing gazing into her face with eager, longing eyes.

"Is it not the very sweetest letter?" she said, innocently.

"The very sweetest letter I ever read," returned her sister, kissing the upturned lips.

Then she went back to the cherished production, and read it again with a fresh warm interest that went straight to Mabel's heart.

"Well, perhaps you had better take it down and show it to mamma," she said, relenting, "but do not let Aunt Harriet see you—say you will not, Mildred."

So, Mildred having given the desired assurance, carried the letter away with her to Lady Caroline, who read it with eyes tenderly suffused. Sir George, coming in at the moment with the companion epistle in his hand, containing a manly straightforward proposal for Mabel, read it also, and signified his intense satisfaction in and approbation of the entire affair. But the engagement must of necessity be a long one, so he decided, the young man—though with great expectation on all sides—having just at the present time beyond his pay. They were both only just at the commencement of their lives, so could afford to wait until a year or two had gone over their heads; and when once Roy could sign himself "captain" they might begin to look at things in a nearer light.

So it was arranged, to the delight of all concerned, except Lady Eagleton, who objected to every argument that could be produced in their favor, protesting obstinately to the very last that the girl was throwing herself away.

Having this standing grievance, they hoped she would rest satisfied, and require no further imaginary ills to keep up the usual grumbling species of excitement that went far to constitute her daily life. But they hoped in vain.

It so happened that by mutual consent they had all maintained strict taciturnity on the subject of the Younges—their antecedents as merchants pur et simple not being considered such as would meet the views of Lady Eagleton. She had wonderfully relieved their minds by letting them know of her intention to spend Christmas with some more fortunate relatives further south, and indeed had named a day in the ensuing week as that on which she would deprive them of her society.

The whole house instantly brightened up, and began to look more like itself, while it was thought with confidence that the Younges' visit might now indeed be kept forever in the dark, so far as their grandaunt was concerned. But Eddie, unluckily, as it appeared afterward, had been the only one not warned on the matter, and therefore it was he who, on the Sunday before her departure, brought down her ladyship's wrath upon the family.

Lord Lyndon was a great favorite with her, he having a certain placid deferential way with him that never failed to propitiate even the most obdurate of old ladies. She characterised him as well-bred, courteous, and gentlemanly, looking upon him as a young man who had happily escaped all the contaminations of the period. She never tired of speaking of his many perfections, holding him up in triumphant comparison with others of her acquaintance, instancing with special unctuousness on these occasions the detested Roy.

"I consider it a most fortunate thing, in this out-of-the-way place, your having as a constant visitor a young man so distinguished," she said, and then she asked again for about the hundredth time, "And where did you first become acquainted with him?"

"Well, just about the time the Younges were here, as well as I can recollect," answered Eddie, promptly, who was unhappily present, and then went on with his fish—they were at dinner—blissfully unconscious of all the mischief he had done.

"The Younges? Who are they that I have never heard their names mentioned?"

Lady Eagleton, though considerably aged, had lost none of the perspicuity that had characterised her earlier days; so she looked sharply first to the right, then to the left, and, overtaking an agonized glance of Lady Caroline's on its way to Mildred, felt herself completely mistress of the situation. She turned her keen, searching old eyes once more on the unsuspecting Eddie, and began:

"And who were these Younges?" she asked, in her most insinuating tone.

"Old Younge went in for cotton some years ago," answered Eddie, frankly, and without a moment's hesitation—"a mode of making money that I fear your ladyship will scarcely appreciate; but it paid uncommonly well in his case, if we are to believe all the accounts we hear. Strange to say, too, the trade mark is not so apparent on them as it might have been. The son, Denzil Younge, is one of the nicest fellows you could possibly meet, while the daughter—you should just ask the girls about her, Aunt Harriet; they will tell you about her—what a 'perfect treasure' she is."

Her ladyship was above understanding "chaff."

"Oh, indeed," she said, in such a constrained, stiff tone that Eddie looked up amazed, and, catching sight of his mother's despairing and Mabel's dismayed expression, discovered for the first time that he had been the cause of much disturbance in the bosom of his family for the past five minutes.

Lady Eagleton maintained a studied, not to say ominous silence during the remainder of the meal, giving no vent to her outraged feelings until the ladies rose to return to the drawing-room, leaving the happier sex to discuss their wine in peace.

When the former were seated round the fire—for it was more than ordinarily cold even for November—and the old lady had comfortably ensconced herself in the snug arm-chair specially brought down from the upper regions to meet her wants, she began:

"Caroline, is this thing true that I have been hearing?" she said, solemnly.

"What thing, Aunt Harriet?" asked her niece, faintly.

"Don't prevaricate," said Lady Eagleton. "It were you it is best to be open and above-board with me. Speak the truth—is it possible you have had a cotton merchant's family on terms of intimacy at King's Abbott, enjoying free association with your daughters, your sons?"

Poor Lady Caroline felt herself a child once more, in hopeless bondage to her aunt, and, crossing her soft white hands helplessly upon her lap, looked with imploring eyes at Mildred, and Mildred looked straight into the fire.

"They were friends of George's, Aunt Harriet," she ventured to murmur, at length.

"Then they were here?" ejaculated the old woman, in an awful voice.

"Yes, they were here," confessed Lady Caroline, in a nervous, subdued whisper.

"I did not dream I should ever have lived to hear such an acknowledgment from your lips," said Lady Eagleton; after which, for several minutes, there was complete silence—silence that was to Mabel the most intense agony; as it was, by a superhuman effort she kept herself from bursting into a ringing laugh.

The whole scene was irresistibly comic—Lady Eagleton, stiff, rigid, swelling with outraged pride—Lady Caroline, nervous, frightened, scarcely knowing whether to laugh or cry—Mabel, demure and speechless.

"Mabel, my smelling salts," said the dowager; and Mabel rose to comply with her demand.

"Would you wish for some eau de Cologne, Aunt Harriet?" she asked, meekly, in a deeply concerned tone, and made a little mischievous grimace at Mildred over her grandparent's irreproachable blonde cap. "It might do you good."

Aunt Harriet took no notice of the considerate offer.

"I always felt George was a Radical," she said in an aggrieved voice; "I always knew his tendencies were low. But for that I do not blame him. Few people are fortunate enough to be brought up with the unremitting devotion that was lavished on all our family. But that he should go to the length of introducing to his private circle people connected with trade never for an instant occurred to me as possible, even in my wildest flights of imagination. How could you, Caroline, stand tamely by and permit such proceedings to be consummated in your house? How could you allow low, vulgar persons to associate with the members of your household?"

"But they were not at all vulgar," Lady Caroline ventured to remonstrate.

"Do not tell me," interrupted her aunt, warmly, "and do not try to excuse your conduct by endeavoring to throw a halo of respectability around such people. Edward spoke of a son; was he the sort of a person to be thrown in your daughter's way—to aspire to the hand of one perhaps! Mildred, I appeal to you as the most rightly-judging individual in this house, what was your opinion of this Mr. Younge?"

Even Mabel grew suddenly grave as this direct question was put to Mildred, while Lady Caroline glanced imploringly at her daughter, though without the slightest hope that the answer would be favorable to Denzil.

Mildred's long dark eyelashes quivered slightly, and her color rose a degree as for a moment she hesitated, but, when at length she did speak, it was with perfect composure.

"I think that in bearing, look and manner he was an unmistakable gentleman," she said—"the warmest-hearted and the truest I have ever met."

Lady Eagleton was struck dumb. She was astounded. She had so entirely depended upon Mildred for support; and now she found herself astonished and disgusted, with no language ready in which to express her just indignation; while, as for Mabel and her mother, no words could explain their surprise and content. For Mildred to be even neutral in such a cause they had considered beyond all hope; and now here she was of her own free accord nobly doing him justice, and succeeding, for once in her life, in completely silencing her grandaunt.

There was a visible air of triumph about her relatives that maddened the ancient dame.

"You have made me acquainted with a new phase in your character," she said to Mildred in what she meant to be a withering tone—"one with which I have been hitherto totally unacquainted. And, as I find I have not an idea in common with anybody in this house—now that you have declared yourself—I think the sooner I leave it the better. I shall therefore hasten my departure even more than I have done, and beg you all to understand that I depart on Wednesday."

This terrible announcement she uttered as though it could not fail to strike despair and remorse into the hearts of her hearers; and, indeed, in Lady Caroline's breast it awoke mingled feelings of joy and terror, though in those of Mildred and Mabel the joy reigned supreme.

Lady Caroline attempted a faint remonstrance, but was sternly silenced; and on Wednesday, two days earlier than that on which she had originally decided, the old lady, bag and baggage, swept out of King's Abbott, very much to the relief of those she left behind.

CHAPTER XVI.

And now came the most trying time in all poor Mildred's life. During all the past weeks that she had been suffering violence at the hands of her relatives, Lord Lyndon had become a constant, untiring visitor at King's Abbott, taking no rebuffs, nor open slights, nor petulant actions to heart, but, as might a faithful animal, attending all the more assiduously to her wants who was his acknowledged mistress.

Patience, assisted by perseverance ever been known to work wonders, so it followed that in process of time he became—though so imperceptibly that it was without her knowledge—necessary to Mildred; so much so indeed that fewer and fewer grew the slights and unkindnesses on her part, while in their place a certain winning friendliness came and increased, raising false hopes in Lyndon's breast that should never have been there.

The end of all this was that close upon Christmas-time, somewhere about the middle of December, while all their minds were fully occupied with Lady Eagleton's sayings and doings, Lord Lyndon proposed for Miss Trevanion, and was rejected. This blow might perhaps have effectually daunted another man; but Lyndon, still following up his trusty instincts, determined to bide his time and never surrender hope until another and more favored suitor took his place.

Mildred, having lively recollections of the treatment she had received on a similar occasion, thought well to keep her own counsel in this matter; and so it was agreed upon between them to hold the entire circumstance a secret from the rest of the family—to insure which, things of course went on in the usual way, he calling every other day, and she accepting his attentions—which were never of the obtrusive description—in the same manner as formerly. So well did they sustain their several parts that even Lady Harriet's keen old eyes failed to detect that anything was amiss.

Sir George's affairs at this time were going from bad to worse. He had been hard at work for the past two months trying to find the ways and means to ward off the inevitable day of reckoning, and had suggested plans and pursued theories, all of which his man of business had frowned at and pooh-poohed as utterly impracticable. Nothing but the possession of a large sum of money — and that to be written in five figures — stood between him and complete ruin; and how to procure this money was the difficulty—a difficulty beyond all surmounting unless somebody could be found who for pure friendship's sake would lend it for an indefinite period, trusting to time and chance for repayment. Such a friend was hard to find.

One evening Mildred, on her way to her mother's room, was stopped by a servant with the intelligence that Lord Lyndon had just called, and was in the drawing-room.

"Would Miss Trevanion go down and receive him, while she informed her ladyship of his arrival?"

To which Mildred made answer that she would tell Lady Caroline herself, and went on to her mother's apartment.

(To be continued.)

"Isn't it queer," remarked the typewriter boarder, "that a printed sheet, even if square, is called a circular?" "Not necessarily," rejoined the cheerful idiot. "You see, it is intended to go round."—Indianapolis Star.

A New Blood-Food Has Been Discovered That Works Wonders

Said to Put New Life Into People That Are Run-Down.

For years doctors have been searching for a combination that would enable them to inject into thin blood the elements it lacked. This can now be done, and any weak-blooded person can quickly be made strong and well.

Already a small army of ailing people has proved the merit of taking after each meal with a sip of two of water, two chocolate coated Ferrozone Tablets. This is easily done, and even one week's use of this wonderful blood-food will prove how nourishing and strengthening and flesh-building the treatment is.

Just think of it—Ferrozone uplifts the entire nervous system, renews the blood, makes it rich and red — gives the sort of aid that's needed in throwing off weakness and langour.

Tens of thousands enjoy the advantages of renewed health through Ferrozone;—if you'll only use it, you'll surely grow strong too; it's beneficial action is noticed even in a week. You see it goes right to work, removes the causes of the trouble and then quickly makes a cure.

For those who sleep poorly and have nervous apprehensions, Ferrozone is a boon; it is a specialist in such cases.

Where there is paleness, poor appetite and langour, Ferrozone makes the patient feel like new in a few days.

In tiredness, nerve exhaustion, spring fever and debility, the power of Ferrozone is known from coast to coast and universally used with grand results.

Let Ferrozone build you up, let it win you back to robust health—it will do so quickly if you give it the chance. Sold by all dealers, 50c per box or six boxes for $2.50. Remember the name Ferrozone.

PAT TO HIS BROTHER TIM.

Now what in the divil ailed ye,
To strike at a decent rule?
'Tis good that the peelers jailed ye,
For maybe yere head will cool.
If only a thief I'd hailed ye,
But lie ye there for a fool!

For liberty, Tim, ye're longing—
The freedom our father missed.
Ye've cried it to good men thronging,
Yet what is your freedom? Whist!
Ye go and ye work for wronging
A tool in a German's fist!

For liberty then ye're bleeding—
A ghost that ye seek to find.
O Tim! will ye e'er be heeding
The men of the Continent kind?—
A mad dog doing the leading
For God's own fool that's blind!

Ye prate of the old oppressing:
The ravage of fire and sword;
Of priests they killed at confessing;
Of babes drowned at the ford?
Was it worse than the left-hand blessing
Ye'd get from a German lord?

Ye'd welcome these new directors,
The Emperor's steel-ruled hosts?
Ye'd hail them as yere protectors
From Erin's heart to her coast?
Go ask of the Belgians' specters!
Go ask of the Louvain ghosts!

Me boy, ye're made to trifle;
The morrow is too immense.
Ye're heart is no thing to stifle;
'Tis only ye're head is dense!
Here! give me that d——d-fool rifle!
And, Tim, God give ye sense!
—John O'Keefe, in the New York World.

No Sense of Proportion.

The young man who had spent his efforts for several years without result in studying art was talking with his practical uncle, who had patiently paid the bills.

"Of course," said the young artist, "I know I haven't made much of a go of it, but I don't think you ought to advise me to try something else. You know it's best to put all your eggs in one basket and watch that basket."

"Um! That may be, Charlie; but did you ever think how foolish it is to put so many baskets around one bantam egg?"

The practice of the Golden Rule is an excellent specific for health.

A physic is a poor substitute for exercise and temperance, essentials of health.

Minard's Liniment Cures Colds, Etc.

About the only time some fellows can raise the wind is when they blow the froth from a glass of beer.

WHERE HANS FAILED.

Snipers Hunted Each Other, but German Got Careless.

One of the more humorous stories concerns two snipers, German and British, who spent a whole night hunting for each other. It was at a point in the lines where the trenches suddenly veered 1,200 yards apart, with a little mountain of coal slack between. Here it was that the snipers plied their trade, fellows that from cover of the slack could shoot round a corner and hit a nail at five hundred yards. An Irish Guardsman told the story.

"I was doin' a wee bit o' pot-shootin' and be blowed to you work on the other side of the slack, and my eyes open all the time for an enemy's back. There was one near me, but I'm beggared if I could find him. 'I'll not lave this place till I do,' I says to meself, and spent half the nights I was there prowlin' round like a dog at a fair, with my eyes open for the sniper. I came on his post wan night. I smelt him out, because he didn't bury his sausage skins as we do, and they smelled like the nethermost hole where an ould sinner is fryin' in. I went to his sandbagged castle, with my gun on the cock, and me finger on the trigger, but he wasn't there; there was nothin' in the place but a few rounds of ball and a half-empty bottle. I was dry as a bone, and I had a sup without winkin'. 'Mother of Heaven,' I says when I put down the bottle, 'it's little ye know of hospitality, stranger, leaving a bottle with nothin' in it but water. I'll wait for ye, me bucko,' and I lay down in the corner and waited for him to come in.

"But sorrow the fut of him came, and me waitin' there till the color of day was in the sky. Then I goes back to me own place, and there he was waitin' for me. He only made one mistake; he had fallen asleep and he just sprung up as I came in by the door. Immediately I had him by the big toe. 'Hands up, Hans,' I said, and he didn't argue, all that he did was to swear like one of ourselves and flop down. 'Why don't ye bury yer sausages, Hans?' I asked him. 'Why don't ye have something better than water in yer bottle?'"

Just One More Direct Message

NEW BRUNSWICK WOMAN SAYS USE DODD'S KIDNEY PILLS.

Mrs. Patrick Williams Tells How Her Headache and Weakness Vanished When She Used the Great Canadian Kidney Remedy, Dodd's Kidney Pills.

St. Sodme, Kent Co., N. B.—May 29.—(Special.)—"I feel it my duty to tell the public the great relief from headache and weakness I found in Dodd's Kidney Pills."

This is the message Mrs. Patrick Williams, of this place, sends to suffering women all over Canada. Like many other women, she dislikes talking about her troubles, but she feels she would not be doing right to let others suffer when she had learned from her own experience how great is the relief and how easy is the cure to be found in Dodd's Kidney Pills.

Nine-tenths of the weakness and suffering women bear so bravely comes from sick kidneys. Sick or disordered kidneys fail in their duty of straining the impurities out of the blood. This means that these impurities, these seeds of disease, are carried to all parts of the body. The natural cure is Dodd's Kidney Pills. They always cure sick kidneys.

Internal Portraiture.

An art patroness was gushing over a portrait in the presence of the artist.

"I do not know how it is," she said, "but when you paint a portrait you seem to put more into it than anyone else can see."

"Madam," he exclaimed in rhapsody, "it is not faces alone that I paint; it is souls!"

"Oh," she replied, cuttingly, for his enthusiasm was too warm, "you do interiors, do you?"—Exchange.

Putting the Blame On Noah.

A tablet believed to be 4,000 or 5,000 years old and to antedate the book of Genesis by 1,000 years sets forth, according to the translation of Dr. Steven Langdon, of Oxford university, England, that it was Noah and not Adam and Eve who brought about the fall of man. Noah was commanded not to eat of the cassia tree in the garden of paradise, the translation has it, and when he disobeyed the curse of ill health and an early death instead of a life span of 50,000 years like that of his ancestors, fell on him. According to Babylonian and Sumerian accounts, the flood occurred about 35,000 years before Christ, and the period between that catastrophe and creation—432,000 years—was filled in by ten kings, so that each must have ruled something like 43,200 years. The comparatively short reigns of later kings is explained as being the result of Noah's sin in eating of the cassia tree.

Premier Borden left for a week's holiday in the Gatineau Hills, accompanied by E. N. Rhodes, Deputy Speaker of the Commons.

Books as Carriers of Disease.

The report of the U. S. commissioner of education undertaken to reassure persons who are fearful of the spread of disease through books by recording the results of recent investigation at Yale university. During the cleaning of the library a chemical analysis of the dust was made. About half of this was found to be mineral matter, while the other half was organic, including paper fiber, wood fiber and molds. No mouth bacteria were found, and in general the analysis showed the harmlessness of the dust.

Minard's Liniment Cures Garget in Cows.

A Paradox.

A maiden well advanced in years used to wait every morning for the postman, a bachelor of about her age, and ask him if there was not a letter for her. Several weeks passed thus, but the anxiously expected letter did not arrive. Finally one morning the postman said to her, "Well, to-morrow you shall get your letter, if I have to write it myself."

"That's right; do it," replied the old maid. "I shall be delighted to accept it."

"Well," said the postman, smiling, "what do you want me to write—a business letter or a love letter?"

"If you mean business please write a love letter," was her blushing reply.—London Answers.

Minard's Liniment Cures Distemper.

Alverstone as a Musician.

The late Lord Alverstone was passionately fond of music. For many years he was a prominent member of the choir of St. Mary Abbots Church, Kensington, and he played the organ like a professional.

He could sing a good song, and not infrequently did at the Savage Club, of which he was a member. In 1900 at the club he asked Robert Martin, of "Killaloe" fame, to sing "Ballyhooley."

"Divil a note will I sing for the Lord Chief Justice until he sings too," said Martin.

The Lord Chief Justice took up the challenge, and led the way with "The Heart Bowed Down" and the Judge's Song from "Trial By Jury."

I fell from a building and received what the doctor called a very bad sprained ankle, and told me I must not walk on it for three weeks. I got MINARD'S LINIMENT and in six days I was out to work again. I think it the best Liniment made.

ARCHIE E. LAUNDRY.

MONSTER WATER BUGS.

One of Them Can Grip and Easily Put to Death a Frog.

The frog's worst enemy is a monster water bug which inhabits the tropical waters of both North and South America. This water bug is one of the largest aquatic insects. It is called a giant by comparison with other bugs, but it is much smaller than any of the frogs on which it preys. Yet so powerful are its legs that it is sure death for the frog that gets within their grasp.

The two principal joints of the forelegs fold down on one another, and the stouter of these two has a groove along its front to receive the sharp inner edge of the next joint, much as the blade of a pocketknife folds down.

In the pools and the estuaries of tidal waters these giant bugs hide among stones and rubbish, from which they dart rapidly to attack passing frogs and occasionally fishes. The victim is clasped by the bug's forelegs, and the needly beak between its two compound eyes is plunged deep into the flesh.

This is not a case of taking toll merely of the victim's blood, as in the case of many other sucking insects; it is speedily followed by the death of the bug's victim. This appears to be due to copious supply of liquid from around the base of the beak, which finds its w into the puncture.

Professor Locy has traced this t pair of glands in the head of the gi water bugs. Their secretion prod death very quickly.

Catching Redhot Rivets.

This would not seem to be a plea ing occupation even if the rivet is caught in an old mail bag, yet the fea is constantly performed by workmen. Ordinarily they catch rivets in a rivet keg or something of that sort, but there are men who catch rivets with a pair of tongs—just reach out for them and nip a redhot rivet out of the air with the nipper part of the tong in much the same way that a bird nips a flying feather out of the air with its beak. The feat is commonly seen by persons who watch workmen on high buildings.—Harper's Weekly.

Magic "Nerviline" Ends Stiff Neck, Lumbago

Any Curable Muscular or Joint Pain is Instantly Relieved by Nerviline.

GET TRIAL BOTTLE TO-DAY.

You don't have to wait all day to get the kink out of a stiff neck if you rub on Nerviline. And you don't need to go around complaining about lumbago any more. You can rub such things away very quickly with Nerviline. It's the grandest liniment, the quickest to penetrate, the speediest to ease muscular pain of any kind.

One twenty-five cent trial bottle of Nerviline will cure any attack of lumbago or lame back. This has been proved a thousand times, just as it was in the case of Mrs. E. J. Grayden, of Caledonia, who writes: "I wouldn't think of going to bed without knowing we had Nerviline in the house. I have used it for twenty odd years and appreciate its value as a family remedy more and more every day. If any of the children get a stiff neck, Nerviline cures quickly. If it is earache, toothache, cold on the chest, sore throat, Nerviline is always my standby. My husband once cured himself of a frightful attack of lumbago by Nerviline, and for a hundred ailments that turn up in a large family Nerviline is by far the best thing to have about you."

General Dissatisfaction.

Tiny Elsbeth was taken by mother to an afternoon tea, fashionable, but where the various ladies present were well acquainted and indulged too freely in gossip. The little girl sat very straight and still, listening to all that was said. Critical remarks were made about absent friends, and even guests who took their departure were discussed with same freedom.

Elsbeth edged closer to her mother and remarked in a solemn whisper:

"Nobody seems jes' exactly satisfied with anybody, does they, mamma?"

Minard's Liniment Cures Diphtheria.

How to Ride.

In ridin', sit erect and don't slouch along. Don't try to be a cowboy if you aren't. We have the real simon pure cowpunchers and broncho busters; always have the born variety of the same species. Steer clear of the latter; also be careful not to get into that category yourself.

Remember that a horse is only flesh and blood, and not a machine. He gets tired, hungry and thirsty, and for goodness' sake treat him accordingly. Because he is a livery horse and you are paying his hire, treat him white just the same. Remember that some one else rode him yesterday, and another will probably do so to-morrow. Give your horse the same kind of a deal that yourself would demand if you were in its place. Even a broncho has feelings and will appreciate your thoughtfulness.—Outing.

Made-in-Canada.

Canada's Traffic on the Great Lakes

Of primary importance to Canada and Canadians is the fact that right in the heart of the North American continent is situated the largest body of fresh water in the world, and that the great navigable outlet of the vast inland seas which make up this body lies through Canada to the Atlantic Ocean. We try to imagine what Canada would be like if the international boundary line lay to the north of the Great Lakes, and we had no share in these waters, and no pride of ownership in the world's greatest inland marine that finds a home thereon.

But we are doubly fortunate, not only in sharing the Great Lakes with the neighboring Republic on equal terms, but also in having the St. Lawrence running through our own territory, and giving to Canada the distinction of having the greatest natural artery of traffic of any country in the world.

The area of the Great Lakes exceeds 90,000 square miles. We can get a good perspective idea of them if we imagine them as a series of enormous cups, placed one below the other, and each emptying into the one next it. The cup of Lake Superior is held aloft at a height of 600 feet above sea level. That of Lake Michigan and Huron is considerably lower, and that of Lake Erie slightly lower still. Then comes an enormous drop down to the level of Lake Ontario, which is only 250 feet above sea level. It is that great drop which makes Niagara Falls. The depths of the vast cups in which the Great Lakes are contained varies greatly. Lake Superior is the largest of all, and has a depth 1,200 feet. Lake Huron is 1,800 feet deep, Lake Erie 270 feet and Lake Ontario 500 feet.

The international traffic on these Great Lakes is enormous. Its importance in the trade and prosperity of North America may be gauged from the fact that more than half of the vessels registered in the United States are to be found on the waters of these lakes. Its importance to Canada may be gauged from the fact that the arrivals of Canadian vessels trading on rivers and lakes between Canada and the United States (which mostly means the Great Lakes and St. Lawrence system) numbered about 9,000 last year, with a total of over 6,000,000 tons register.

Together, the people of the United States and Canada save hundreds of millions of dollars per annum through the cheapness of transportation on the great lakes as compared with rail transportation. In fact, transportation on this great highway of nature's own providing is so cheap that much of it has been done at an average cost of 50 cents per ton per one thousand miles, or for about one-half a mill per ton mile! Surely the cheapest transportation in the whole world.

Shipping of every imaginable kind is to be seen on the Great Lakes. There are palatial passenger ships, rivaling in luxury and appointments the finest of ocean liners. There are great freight boats, many of them constructed especially for carrying oil, or coal or ore, or wheat, and large numbers of them of a design not seen anywhere else. There are railway cars ferries, carrying freight and passenger cars across. Then there are sailing vessels, lovely private yachts, and fishing boats, for the fisheries of the Great Lakes are of vast extent.

The Great Lakes are navigable for vessels having a draught up to 19 feet 4 ins. from Fort William, at the western end of Lake Superior, to Port Colborne, at the foot of Lake Erie. This is a distance of just over 1,000 miles. The Welland Canal provides access from Lake Erie into Lake Ontario, but at present this only allows the passage of vessels of fourteen feet draught. The new Welland Canal being built by the Canadian Government, however, will allow vessels of 24 feet draught to pass, and then the great freighters of what are known as the Upper Lakes will be able to make the journey as far as Kingston, at the foot of Lake Ontario, only 175 miles from Montreal.

Although the Great Lakes are international, the spheres of international territory in them are clearly defined, the Canadian vessels are able to make the journey from one end to the other without passing through foreign territory. Thus at the "Soo," both Canada and the United States have separate canals—one in Canadian territory and the other in American territory. Both are open to shipping of either nation, free of all taxes or tolls, and are used by ships of both nations, according to which is convenient for passage at the moment of arrival. Lower down, the St. Clair and Detroit Rivers, giving passage between Lake Huron and Lake Erie, are bounded on one side by United States territory, and on the other by Canadian territory, and are thus international waterways. The Canadian Government maintains a patrol service in one part of the channel to regulate shipping, and the United States maintains a patrol service in another part of it for the same purpose.

The traffic on the Great Lakes is growing by leaps and bounds every year. In the Detroit River the tonnage has exceeded 60,000,000 tons in a season. It was not long ago when there was a great fuss in the papers about the total freight tonnage for the year through the Canadian Sault Ste. Marie Canal, which connects Lake Superior with Lake Huron, reaching 25,000,000 tons. But for 1913, when the traffic was the highest on record, it reached a total of 42,699,221 tons.

Canada's share in this traffic was 4,954,731 tons; and that of the United States 37,744,690 tons: a huge disproportion, but not comparatively so, when we remember that the population of the United States is over twelve times the size of the population of Canada. The figures, moreover, are suggestive of what Canada is building up to. The traffic through the American canal at the Soo for the same year was 37,022,201 tons of American and Canadian freight. Thus the total freight tonnage passing through the Soo Canal in the year 1913 was 79,721,525 tons. When this is compared with the 20,033,884 tons which passed through the Suez Canal in the same year, some idea of the enormous magnitude of the Great Lakes traffic may be gained.

An indication of the relative importance of the Great Lakes traffic to the industries of the country may be found from the fact that whereas the total agricultural produce included in the tonnage passing through the Canadian canal was 5,253,665 tons, that of mine products was 36,642,593 tons, forest products 62,958 tons, and animal products 198 tons. This shows that the Great Lakes are of paramount importance in developing the great basic manufacturing industries of the country, to which the cheap carriage of coal and ore are so necessary. When we think of the Great Lakes as a means of bringing out the wheat from the west to ocean ports, let us not forget of their even greater importance for purely inland and more or less local traffic in bulk and package freight. They form a magnificent means of communication between Eastern and Western Canada, which we, as a country, ought to develop to the utmost.

It is difficult to give any figures as to passenger traffic on the Great Lakes, but close upon 40,000 passengers have passed through the Canadian "Soo" in a year, and over 20,000,000 passengers are estimated to have travelled last year on steamships plying on the Great Lakes. As supplementary to the Great Lakes traffic, it may be stated that over 127,000 passengers passed through the St. Lawrence canals in 1913.

From Canada, fine passenger liners run between local points, notably between Georgian Bay and North Channel ports to Sault Ste. Marie, and between Sarnia, Detroit and the Soo. There are also many fine passenger routes radiating from Toronto and Kingston, on Lake Ontario. On the American side there are passenger lines running between Buffalo and Chicago, Buffalo and Duluth, and on many other shorter routes. Both the Canadian and American vessels are equal in accommodation to the finest trans-Atlantic liners.—By-water Magazine.

Crepe and Pompadour Taffeta

This charming frock is fashioned of white georgette crepe and pompadour taffeta, the white ground striped with pink and dotted with pink rose buds.

The failure of the mortality rates of measles and whooping cough to show a reduction during the last fifteen years is due to the fact that they are highly communicable in their early stage, when diagnosis is most difficult.

WHERE HANS FAILED.

Snipers Hunted Each Other, but German Got Careless.

One of the more humorous stories concerns two snipers, German and British, who spent a whole night hunting for each other. It was at a point in the lines where the trenches suddenly veered 1,200 yards apart, with a little mountain of coal slack between. Here it was that the snipers plied their trade, fellows that from cover of the slack could shoot round a corner and hit a nail at five hundred yards. An Irish Guardsman told the story.

"I was doin' a wee bit o' potshot-and be blowed to you work on the other side of the slack, and my eyes open all the time for an enemy's back. There was one near me, but I'm beggared if I could find him. "I'll not lave this place till I do," I says to meself, and spent half the nights I was there prowlin' round like a dog at a fair, with my eyes open for the sniper. I came on his post wan night. I smelt him out, because he didn't bury his sausage skins as we do, and they smelled like the nethermost hole when an ould sinner is fryin' in. I went to his sandbagged castle, with my gun on the cock, and me finger on the trigger, but he wasn't there; there was nothin in the place but a few rounds of ball and a half empty bottle. I was dry as a bone, and I had a sup without winkin'. "Mother of Heaven," I says when I put down the bottle, "it's little ye know of hospitality, stranger, leaving a bottle with nothin' in it but water. I'll wait for ye, me bucko," and I lay down in the corner and waited for him to come in.

"But sorrow the fut of him came, and me waitin' there till the color of day was in the sky. Then I goes back to me own place, and there he was waitin' for me. He only made one mistake; he had fallen asleep and he just sprung up as I came in by the door. Immediately I had him by the big toe. 'Hands up, Hans,' I said, and he didn't argue all that he did was to swear like one of ourselves and flop down. 'Why don't ye bury yer sausages, Hans?' I asked him. 'Why don't ye have something better than water in yer bottle?'"

Fresh Meat For Every Farmer, All Summer

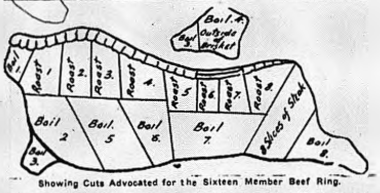
How it Can be Secured by the Organization of a Beef Ring—Methods Followed and Results Obtained--by Some.

(From the Canadian Countryman.)

Curious beliefs have many persons of farm conditions. So many have been prone to picture the farmer as one living in luxury, with a table groaning beneath food produced on the farm, while he lingers on the shady side of the house watching the crops grow. But farming these days hasn't much lingering around in shady corners about it—never did have—and the farmer's table is supplied by comparatively little of what he grows. For agriculture has become specialized—only a few things are produced, and with the proceeds of sales from these everything else is bought.

That is why we find even the beef producer securing meat for his table from the local butcher—and mighty tough meat it very often is. In the winter, when meats can be preserved easily, most farmers usually stock up with sufficient of the home-grown material to last till spring. But hot weather is a different proposition—and salt pork gets mighty monotonous.

In many districts farmers have co-operated to overcome this difficulty by forming beef rings. These provide excellent meat and eliminate all middlemen's profits. An animal is killed each week, and every member secures, at lowest cost, meat that otherwise he would have difficulty in buying at any price in the ordinary way.

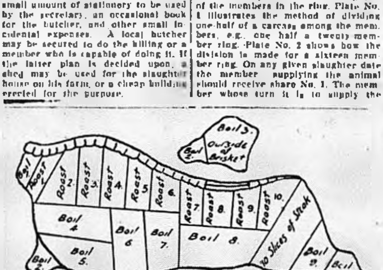


Showing Cuts Advocated for the Sixteen Member Beef Ring.

THE TWENTY MEMBER RING SATISFACTORY

In organizing a co-operative beef circle or ring, it is only necessary to get some 20 members who are willing to fatten one animal each. If two or three wish to get the work under way, they can usually find others to go in with them to make it successful. Often 16 members are secured, and sometimes 24, but in most cases 20 have given best satisfaction. In this case, if the ring begins operations in the middle of May, and one animal is slaughtered each week, the work will be continued for twenty weeks, thus assuring an abundant supply of meat during the fall operations of harvesting, threshing, silo filling and apple picking.

In organizing, a small membership fee, usually of one dollar, is paid with which to buy killing instruments, a small amount of stationery to be used by the secretary, an occasional book for the butcher, and other small incidental expenses. A local butcher may be secured to do the killing or a member who is capable of doing it. If the latter plan is decided upon, a shed may be used for the slaughter house on his farm, or a cheap building erected for the purpose.



How the Carcass is Divided for the Twenty Member Ring

EACH MEMBER MUST SUPPLY ANIMAL.

For a 20-member ring each member must agree to supply an animal which will dress between 400 and 600 pounds, thus supplying each one with 20 to 30 pounds of meat per week. In case this quantity is too large for some families, two small families may take one share between them, and supply but one animal. On the other hand a very large family may take two shares and supply two animals.

Of course, to make it fair for every one, some weight of carcase must be definitely fixed upon and a price per pound decided at the annual meeting. Then, if a carcass is lighter or heavier within reasonable limits, this sum will be charged up to those with the smaller animals and paid those with the heavier. This precaution ensures the satisfaction of each member. Some rings stipulate that all animals supplied up to the end of the second week in June be stall fed, and as these have cost more to produce than the later grass fed beeves, the owners are allowed a bonus of two or three cents per pound, which is charged against the other members.

To determine the particular week each member shall deliver his animal lots are often cast. Numbers, to the extent of the number of members, are put in a hat and are drawn. Thus if a man drew No. 14 he would be member No. 14 and would deliver his animal the fourteenth week. In case for any reason, any members wish to exchange numbers immediately after the drawing they should be permitted to do so.

The animal intended for slaughter should be delivered to the butcher at least twelve hours before the time set for killing and should not be given any solid food for at least 24 hours prior to killing. Usually, Friday is the day selected for killing. The carcass is allowed to cool over night and is cut up early Saturday morning.

It is divided so each member will receive a roast, a boiling piece and a steak. Each allotment is then placed in a bag and hung upon a hook designated by the member's number. The meat is then ready for the different farmers or their representatives to call for. When several members live near each other they generally take turns in delivering the meat, reducing the time spent to a minimum.

As will be noted from the foregoing the expense in connection with a beef ring is very small. The butcher is usually given the hide of the beast and a set fee of one or two dollars, each member paying when his animal is delivered. The heart, liver and tongue are allowed the member whose beef is dressed. Then a small fee, as already stated, is collected from each one to pay for the equipment, such as a derrick for raising the beef, butcher knives, saws, meat hooks, etc.

If trustworthy members are selected there is no reason why a circle cannot be continued year after year, giving perfect satisfaction to all. There is yet time to organize this year. Call your neighbors together and talk it over. When drafting out a constitution specify the place of killing and time, weight of animal and price, elect officers and auditors, and appoint a butcher. Stipulate the charges each member will be called upon to pay, the length of time operations will continue, and all other points that seem necessary.

Care must be taken in dividing the carcass, to give every one a fair deal. The following methods for use by 20 and 16-member rings, respectively, are advocated by the Co-operative Organization Branch of the Saskatchewan Department of Agriculture:

The carcass is first cut in two in the ordinary way by sawing lengthwise through the backbone. Each half is then cut up and divided among half of the members in the ring. Plate No. 1 illustrates the method of dividing one-half of a carcass among the members, e.g., one half a twenty member ring. Plate No. 2 shows how the division is made for a sixteen member ring. On any given slaughter date the member supplying the animal should receive share No. 1. The member whose turn it is to supply the next animal should get share No. 2, and so on through. In a twenty-member ring shares No. 1 and 11 will be alike, one being cut from one-half of the carcass and the other being the same cuts, but from the other half of the carcass. In a sixteen-member ring shares No. 1 and No. 9 will likewise be alike.

The following is suggested as an equitable division for a twenty-member ring. Of course, the heaviness of fleshing will vary in different animals and the cuts will have to be varied accordingly, but by exercising care the butcher will soon be able to make a satisfactory division.

Members	Roast	Boil	Slice of Steak
No. 1 and No. 11—	1	5	1
No. 2 and No. 12—	2	6	1
No. 3 and No. 13—	3	7	1
No. 4 and No. 14—	4	8	1
No. 5 and No. 15—	5	9	1
No. 6 and No. 16—	6	10	1
No. 7 and No. 17—	7	1	1
No. 8 and No. 18—	8	2	1
No. 9 and No. 19—	9	3	1
No. 10 and No. 20—	10	4	1

For a sixteen-member ring the division could be made as follows:

Members	Roast	Boil	Slice of Steak
No. 1 and No. 9—	1	5	1
No. 2 and No. 10—	2	6	1
No. 3 and No. 11—	3	7	1
No. 4 and No. 12—	4	8	1
No. 5 and No. 13—	5	1	1
No. 6 and No. 14—	6	2	1
No. 7 and No. 15—	7	3	1
No. 8 and No. 16—	8	4	1

A Paradox.

A maiden well advanced in years used to wait every morning for the postman, a bachelor of about her age, and ask him if there was not a letter for her. Several weeks passed thus, but the anxiously expected letter did not arrive. Finally one morning the postman said to her, "Well, to-morrow you shall get your letter, if I have to write it myself."

"That's right; do it," replied the old maid, "I shall be delighted to accept it."

"Well," said the postman, smiling, "what do you want me to write—a business letter or a love letter?"

"If you mean business please write a love letter," was her blushing reply. —London Answers.

Even an incipient moustache hates to be called down.

Reprove your friends in secret, praise them openly.—Syrus.

Dressy suit of taffeta is a garment of unparalleled use during the spring and summer. This one in black consists of a suspended frock and short loose jacket.

POTATO CULTURE

About forty distinct experiments with potatoes have been conducted in field plots at the Ontario Agricultural College. Each of these experiments has extended over a period varying from five to twenty-six years. As supplementary to the work at the college an average of about 1,600 farmers have conducted annually co-operative tests with potatoes on their own farms.

Potatoes can be grown successfully on almost any fertile and friable soil which is either naturally or artificially well underdrained. Good soils, whether loams, sandy loams or friable clay loams, might be mentioned as particularly well suited for the potato crop. Rich sandy loams are specially favorable for the production of potatoes for early use. On light sands, heavy clays and black muck soils the growing of potatoes is usually more difficult, although good results are sometimes obtained from even these soils. The most of the soils of Ontario are very well suited to potato production, providing they are properly underdrained either naturally or artificially. Some sections are particularly well adapted to potato growing on a large commercial basis.

Potatoes do exceptionally well after sod, and especially if it is clover. When potatoes are planted after sod it is a frequent practice to plow the land in the latter part of May to a depth of about four inches. The potato sets are dropped in every third furrow. The land is harrowed a few times before the potato plants reach the surface. The young growth of the grass and the roots of the plants keep the soil in a friable condition, and if the soil is properly handled excellent results are sometimes obtained from this method.

Another plan is to plow the land deeply in the early part of the autumn and at a later date to cultivate the soil and give it a dressing of manure, after which it can be put into ridges thirty inches wide with a double mould-board plow. This protects the manure and the mellow soil in the ridges and enables the air and the frost to come into direct contact with the subsoil in the furrows. It is the practice of some potato growers to place the manure on the sod in the summer, autumn, winter or spring and to plow the sod with its top dressing of manure before planting time. If potatoes follow corn or roots the fresh manure is often used to advantage with the latter instead of the former. When potatoes come after a grain crop the stubble land is frequently worked on the surface as soon as possible after harvest in order to conserve soil moisture and to induce the weed seeds to germinate. With this preparation the land is in excellent condition to be plowed to a good depth in the autumn even though the weather is comparatively dry. If manure is applied to the land in the spring for the potato crop it should be well rooted and mixed throughout the soil instead of being placed with the seed potatoes in the rows, as the manure has a tendency of increasing the scab. The cultivation of the soil for potatoes should be deep and thorough. There are but few crops which respond more readily than potatoes to the careful preparation of the seed bed.

Soon after planting, the field should be lightly harrowed to smooth the surface, to check the germinating weed seeds, and to conserve soil moisture. This process can be repeated just as the young plants are appearing through the ground. As soon as the plants are up, the soil between the rows should be cultivated deeply. Other cultivations should follow every week or ten days, according to weather conditions, should become more shallow as the season advances, and should be continued until the tops come together in the rows. Thorough cultivation mellows the soil, conserves the moisture, kills the weeds and greatly assists in the production of large yields of well formed tubers.

Numerous experiments have been conducted with fertilizers and manures with potatoes at the college and throughout Ontario. It has been found that on the average economical returns have been produced by an application of 320, 640 or 960 pounds of commercial fertilizer per acre. The fertilizers used contained nitrogen, phosphoric acid and potash in about the proportions of 3, 7 and 4 respectively. The highest average yield of potatoes per acre was made from twenty tons of farmyard manure, the second highest from ten tons of manure and 320 pounds of fertilizer, and the third highest from 960 pounds of fertilizer per acre.

According to the results of the definite experiments which we have conducted in the Department of Field Husbandry, at our college, we have found that spraying the crop with Bordeaux Mixture, and with Paris Green or Lead Arsenate, or both, guards against blight, protects against insects, stimulates and prolongs growth, and increases both the yield per acre and the percentage of marketable potatoes.

It is an excellent practice to go through the potato field in the summer and to dig up, gather and destroy all weak and unhealthy plants. This also gives an opportunity for removing plants which are not true to variety, and for marking with stakes a few of the hills having vigorous plants with the best foliage and the least amount of blight and other diseases. These specially marked hills can be dug later and the potatoes from the best plants will furnish seed of superior quality.

In growing potatoes in Ontario, farmers may work independently of each other, or they may co-operate with some organization which is working in a definite and a systematic way. Some of the organizer agencies in operation in Ontario are: The Experimental Union, the Canadian Seed Growers' Association, the Acre Profit Contests, the Field Crop Competitions, and the Potato Growers' Co-operative Associations. The work of some of these agencies will likely be increased in the near future.—C. A. Zavitz.

Ontario Agricultural College,
Guelph, Ont.

Alverstone as a Musician.

The late Lord Alverstone was passionately fond of music. For many years he was a prominent member of the choir of St. Mary Abbots Church, Kensington, and he played the organ like a professional.

He could sing a good song, and not infrequently did at the Savage Club, of which he was a member. In 1900 at the club he asked Robert Martin, of "Killaloe" fame, to sing "Ballyhooley."

"Divil a note will I sing for the Lord Chief Justice until he sings too," said Martin.

The Lord Chief Justice took up the challenge, and led the way with "The Heart Bowed Down" and the Judge's Song from "Trial By Jury."

Putting the Blame On Noah.

A tablet believed to be 4,000 or 5,000 years old and to antedate the book of Genesis by 1,000 years sets forth, according to the translation of Dr. Steven Langdon, of Oxford university, England, that it was Noah and not Adam and Eve who brought about the fall of man. Noah was commanded not to eat of the cassia tree in the garden of paradise, the translation has it, and when he disobeyed the curse of ill health and an early death instead of a life span of 60,000 years like that of his ancestors, fell on him. According to Babylonian and Sumerian accounts, the flood occurred about 35,000 years before Christ, and the period between that catastrophe and creation—432,000 years—was filled in by ten kings, so that each must have ruled something like 43,200 years. The comparatively short reigns of later kings is explained as being the result of Noah's sin in eating of the cassia tree.

NO TWO-PARTY RATES.

(Telephone News)

The subscriber carelessly called the wrong number. Being in a hurry, he promptly asked for a box for two.

"But we don't have boxes for two," said a startled voice at the other end of the line.

"Why, isn't this the theatre?"

"No," was the reply; "this is Blank's the undertaker."

Use MILBURN'S LAXA-LIVER PILLS FOR A SLUGGISH LIVER.

When the liver becomes sluggish it is an indication that the bowels are not working properly, and if they do not move regularly many complications are liable to set in.

Constipation, sick headache, bilious headache, jaundice, heartburn, water brash, catarrh of the stomach, etc., all come from a disordered liver.

Milburn's Laxa-Liver Pills stimulate the sluggish liver, clean the coated tongue, sweeten the obnoxious breath, clean away all waste and poisonous matter from the system, and prevent as well as cure all complaints arising from a liver which has become inactive.

Mrs. John V. Tanton, Birnam, Ont., writes: "I take great pleasure in writing you concerning the great value I have received by using your Milburn's Laxa-Liver Pills for a sluggish liver. When my liver got bad, I would have severe headaches, but after using a couple of vials, I am not bothered with them any more."

Milburn's Laxa-Liver Pills are 25c a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

THE POULTRY WORLD

START RIGHT.

In selecting the future poultry plant, choose the part of the land on which the water will drain away from the poultry buildings, and if possible the ground sloping towards the South. The yards should be large enough and well built to last. The first cost may be high, but it is economy in the long run. Trees such as peach, plum and cherry, where they do well, and apple should be planted. Shade is essential, natural shade being the best, as it gives a good air drainage. It is a good proposition to plant trees in the poultry yards if the trees never bear any fruit, although after a few years a big crop of fruit can be gathered. For the first few years the trees must be protected by wire netting. If not, the fowls will eat the tender green shoots as they appear in spring, and in the end kill the trees. After the trees have made good growth the fowls will not bother them, and the few lower leaves that would be eaten by the poultry will do no harm.

Shade in the poultry yards will protect the poultry from the hot rays of the sun during the summer. If the poultry runs contain no shade the fowls will be compelled to keep in the poultry building, which no matter how well constructed, is bound to be hot during the daytime. Grass in some form is another essential, and this feature should be carefully considered. Double yards, either on the south side of the poultry buildings, or runs on the north and south sides, will enable the poultry keeper to have green food a greater part of the year, and this natural feeding of green, either in clover, alfalfa, mixed grasses, rape, oats, etc., is better than the feeding of cabbage, beets, etc., during the whole year. The south side yards can be used in winter, when the weather is fit, until the late spring or early summer; then the north side yards can be used until winter sets in.

While growing stock has been successfully raised on bare ground, in the long run the flocks that have the best growing conditions will not only cost less to feed, but will be generally more healthy. Many beginners have erected buildings without forethought and after a few years have seen the mistake when too late, oftentimes selling to again start a plant that according to their idea and experience is better adapted to produce the lasting results that every poultry keeper should strive for. These plants are again often sold to beginners with the same results, unless remodeled at some expense.

Plan for the future, if only a few chicks are produced the first year. Plant the ground to grass and trees, that they will have a good start when the poultry grow up to it. Do not wait until the ground is well covered with growing poultry for the start will be much harder and both time and money will have been lost. Yards should be so constructed that a horse and plow can go in from time to time to turn the ground when new seeding of grass is desired. This turning of the soil every year or so, and with a good spreading of lime, will do much to keep the ground in a fresh and pure condition, aid the new clovers, grass, etc., to start well, and help the growth of the trees planted. Peach trees should be planted 18 by 20, plum 18 by 20 apple at least 30 feet apart. Peach and plum trees can be planted between the apple trees, but must be cut down when the apple trees get to be of some size, which will, according to the care and ground, be in six or seven years from planting.

The poultry-keeper with limit space must of course resort to smaller yards, but the same care should be given to the yards as in the case of the poultry-keeper with more ground. One should remember the better the ground fixes, grass, etc, the better the results will be in the long run.

POULTRY NOTES.

More each year the hen is losing her job of hatching out chicks. With the improved incubator and more knowledge of incubation, "Biddy" is made to keep on laying while the "wooden hen" does the work of hatching for her.

Still time to plant peach, plum, cherry or apple trees in the poultry runs. The chicks and fowls need the shade. Shade and grass or clover are more than most poultry keepers seem to realize.

The early-hatched chicks are the ones that will win at the early fall fairs, and lay early in winter when eggs command the best figures. While later-hatched chicks will make winter layers, they must be kept steadily growing to catch up to those who had the early start.

MANKIND'S WORST ENEMY.

(Rochester Herald)

The worst enemy of the human race is the hypocrite, and the chief reason perhaps why he is such lies in the fact that he cannot be converted from his hypocrisy. A miser may learn to despise his avarice; a drunkard may reach a depth of misery so profound that he will turn his face, as John B. Gough did, in the direction of sobriety; old age will cool the blood of the lecher, and even the thief may reform, but the hypocrite of [illegible]. The light that would reveal his hypocrisy to him in its true color will never shine within the corridors of his being, for a hypocrite is, by the very nature of things, an opaque soul.

Had Dyspepsia.

Says: HE NEARLY TURNED UP HIS TOES.

Burdock Blood Bitters CURED HIM.

Mr. H. N. Manderson, Stettler, Alta., writes: "About twenty-five years ago, in the Province of Quebec, I came pretty near turning up my toes with dyspepsia. A cousin of mine persuaded me to try Burdock Blood Bitters. In about two weeks I could eat anything from raw fat pork to unleavened bread. Three bottles did the job, and I have never been troubled with my stomach since. You would say that this is wonderful if you could only see what we sometimes have to live on in this country; bannock, half cooked beans, etc."

Burdock Blood Bitters has been on the market for the past forty years, and cannot be excelled as a medicine for all diseases or disorders of the stomach.

B.B.B. is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

SOLWAY

A pleasant time was spent at the home of Mr. P. Quirk, the occasion being a reception and presentation to Pte. Clayton McWhinney. Quite a number of the soldiers of the 160th were present, besides about seventy friends and neighbors. There were short addresses by Reeve Nesbitt, W. Findlay, James and John McWhinney, also solos by Pte. Wilson and others. The evening was spent in games and dancing. Mr. Nesbitt read the following address, when Mr. Quirk presented the watch. Pte. McWhinney replied in a few well-chosen words.

Mr. Clayton McWhinney,
Tp. of Brant, Ont.,
Dear Clayton:—

As a native born son of the Township of Brant in the County of Bruce, who in a short time will depart from the scenes and haunts of the days of your youth, we desire to extend to you a temporary farewell and a sincere expression of our general goodwill and friendship. Your early enlistment without solicitation into the ranks of the 160th Bruce Battalion is ample proof that your heart beats right for the cause of your King and Country and that you are earnest and willing to do your part in assisting to crush the foe that is a menace to civilization. The Bruce Battalion is recognized in all military circles throughout Canada as one of the best that has been raised in Canada and you can always take pride in the fact that you belong to such a fine body of soldiers. The highest type of citizenship is exemplified in the man who will risk his life for his country. We are sure you will do credit to yourself, to the regiment to which you belong and to your many friends you leave behind. We will ever be interested in your welfare. We are pleased to meet you here to-night to say good-bye and we hope and pray that no matter where your Army duties may place you, an all-wise Providence will keep and protect you. As a token of our friendship and esteem we kindly ask you to accept this wrist watch and hope that pleasant recollections will always be associated with it.

Signed on behalf of the neighbors:
H. NESBITT,
G. CRAIG
C. ORMISTON
P. QUIRK

Solway, May 22nd, 1916

Mr. and Mrs. John McWhinney from Markdale attended the reception of their son. Mr. and Mrs. James McWhinney of Maple Hill also attended.

OTTER CREEK

Mr. Daniel Wolfe was a visitor at Clifford last Sunday.

Mr. Alfred Weber took Mr. and Mrs. Joseph Lombertus up to Teeswater to visit Mrs. Lambertus's brother-in-law, Mr Kroetch who is on the sick list.

Mrs. Charles Schmidt is on the sick list.

Mr. and Mrs. Yerdin and Wickle were visiting in Mildmay Sunday last.

The electric and wind storm did considerable damage. The wind blew Mr. Polfus barn door off and felled a tree across Mr. John Schmidt's lane. He had to cut it up before he could get out and also blew Mr. Henry Wolfe's driving shed off.

GLAMIS

Mr. and Mrs. D. Finlayson and family left our village on Wednesday to reside in Port Elgin, where Mr. Finlayson has a position. All are sorry to see this family leave.

Miss Margaret Campbell of Harriston, accompanied by Miss Reta Whaley, spent a couple of days at Miss Campbell's home here.

Mr. Thos. F. McFarlane returned to Toronto on Friday after a few days visit with his parents.

Mr. James Downey attended the funeral of his brother-in-law in Toronto last week.

Mr. and Mrs. McKeeman and Mr. and Mrs. Maber spent the 24th at "Cosy Nook," Inverhuron.

Privates Archie McLeod, James Thompson, Albert Grovee, Lorne Reid, Walter McKenzie, James Symons and Neil McDermid are all home having been given ten days more reading furlough.

Mr. and Mrs. James Brown and young son of Paisley Sundayed with her parents, Mr. and Mrs. S. Stevenson.

Mrs. L. B. Tufford of Beamsville is visiting with her parents, Mr. and Mrs. W. J. McKeeman.

Anniversary Services:—The 42nd anniversary of Glamis Baptist church will be observed on Sunday, June 4th. Prof. J. H. Farmer, L. L. D., Dean of Theology in McMaster University will preach at 10.30 a. m. and 7.30 p. m. On Monday evening, June 5th., Prof. Farmer will deliver his lecture entitled, "Fundamentals in the Light of the War." All are welcome to these services.

Messrs. Hugh McKinnon and Jos. Wrightson finished the shingling of the Free Methodist Church on Thursday.

Private Mac. McKinnon of N. C. O. School, Walkerton, spent a few days at his home here.

Mr. J. A. McKeeman motored to Durham on Wednesday with Mr. and Mrs. W. H. Moffat, Miss Agnes and Mr. Wilfred Moffat of Narva, who were attending the wedding of a relative.

Private Ross Woods of the 144th Batt., Winnipeg, is home on a visit before going overseas.

Mr. and Mrs. Albert Pickard and family of Wiarton were visitors here on Thursday and Friday.

Rev. J. M. Eagle of Sarnia, conducted Quarterly Services in the Free Methodist Church over the week end.

Messrs. J. E. McCauley, Allan McKinnon and Christopher Young, Misses Margaret McKinnon and Laura Cunningham are delegates from the Baptist Church here who are attending the Walkerton Association of Baptist Churches, which meets in Clinton on 29th, 30th and 31st of this month, (May). They were motored to Lucknow on Monday by Mr. McGregor.

Miss Phyllis Moffat returned from Walkerton on Friday after a few days visit there. She was accompanied home by Mrs. (Mayor) Moffat.

The I. O. O. F. attended Divine Service in St. Paul's' Church on Sunday morning. The turn out was not so large as usual.

Glamis and vicinity was largely represented in Walkerton on the 24th of May. All report a big time.

Mr. and Mrs. Alf. Fiddis of Pinkerton were Sunday visitors in the burg.

Mr. Duncan Guest of Hervie spent Saturday and Sunday here.

EDEN GROVE

List of the Red Cross work done by a few ladies of Eden Grove. In the past six months they have sent in 120 pairs of socks to Mrs. Ramsey of Walkerton who provided the yarn. Mrs. J Seiler took charge of the work of giving out the yarn and has given a great deal of her time to the work. Mrs. J. Alexander 2 pair, Mrs. N. Alexander 2 pair, Mrs. Childs 1 pair, Mrs. J. Belbach 13 pair, Mrs. S. Childs 3 pair, Mrs. Fair 20 pair, Mrs. C. Stanneal 6 pair, Mrs. A. Reed 2 pair, Mrs. McKeeman 2 pair, Mrs. Yemott 2 pair, Mrs. Fordive 2 pair, Miss Knaggs 2 pair, Mrs. S. Leeller 32 pair, Mrs. J. Seller 22 pair, Mrs. Jos. Belbach 2 pair, Miss M. Fordyce 2 pair. Socks are badly needed as, many French soldiers have gone back to the trenches without socks.

SOLWAY

Mrs. Peter Bruden, a former resident here spent a few days at her brothers, Messrs. W. and J. Lambertus last week.

We are sorry to report the illness of Mrs. Malcom Thompson. Her sister, Mrs. H. Brandon from Parkdale, Toronto is a visitor there.

The surprise party at Mr. Geo. Ernest's on Thursday eve was enjoyed by all present.

Miss Emma Koller of Guelph is in attendance on her Mother who is under the Dr's. care.

A large number, of old and young, celebrated the 24th in Walkerton, and all report a good time.

Mr. Wes. Birrell has purchased a McLaughlin runabout.

The Oddfellows from this vicinity took part in the parade at Glamis on Sunday morning.

Senator Donnelly has returned from a business trip to Trout Creek.

Miss Myrtle Garland and Master Thompson Garland, spent over Sunday in Walkerton.

Pte. Gordon Garland spent Sunday at his home here.

Mr. John Mutrie is having his hay pressed.

CARGILL

D. D. G. M. W. J. Loughleen visits Port Elgin on June 15th when he will dedicate the new Masonic Hall.

Mr. Frank Scherrer of Walkerton Sundayed with James Alexander Jr.

Mrs. John Clancy was in the County Town on Monday.

Mr. Thos. Nee who has been a resident here for the past 5 years moved to Palmerston on Tuesday where he and Walter have secured lucrative positions.

Mr. J. T. Clancy spent the week-end in Southampton.

Messrs Saunders, Hood, Chisholm and Balsdon accompanied D. D. G. M. Loughleen on his official visit to Kincardine on Monday.

Mr. Andy Hanmore, our enterprising liveryman, has purchased a Ford car and has set aside the whip for the gasoline.

Miss Hannah Sweeney spent a few days this week in North Brant with her sister, Mrs. Hugh Ferguson.

Special Services will be held in the Anglican Church on Sunday 18th. June when Rev. Sage of St. George's Church London will preach.

Messrs Burrows and Zeigler of Harriston were in the burg on Monday.

Mr. Henry Bester of Walkerton moved on Monday into the house he purchased from Thos. Abell.

Mrs. Wm. Grainger and children after a few weeks visit with her parents Mr. and Mrs. Browncombe returned to her home in Stratford on Tuesday.

HANOVER

Mr. and Mrs. H. H. Miller had a couple of interesting letters the past week from their son, Lance Corp. Fraser Miller, who is in the trenches. He has been in some hot fighting lately but has kept off the casualty list thus far and is feeling fine.

The big truck of the Hydro company operating in this vicinity weighing about 6500 lbs. loaded with wire went partly through the iron bridge at Eidt's saw mill on Monday of last week. Block and tackle had to be utilized to raise it. The Hydro men were afraid to tackle the bridges on the town line and so took this side line, but as will be seen with no better result. The road has been closed for a few days while the bridge is being repaired.

Mr. Fred Gibbon fell in the roller rink injuring the elbow and requiring a couple of stitches to close the wound.

The home of Mr. and Mrs. Wm. R. Hegley, Davenport Road, Toronto, was the scene of a pretty wedding on Wednesday afternoon, May 17th, when their nephew, Mr. Thomas J. Little of Hanover was united in marriage to Miss Sarah Anna Forster of Toronto.

Mr. James Riley, fireman of Mendes Upholstering Co., had the misfortune to injure his right hand by running a piece of wood into the back of it, inflicting a nasty wound.

KINLOSS

The Red Cross Society held their regular meeting Saturday evening.

Miss Florence Heid who has been visiting her sister in Teeswater returned home on Saturday evening.

Quite a number took in the celebration in Walkerton on the Twenty-Fourth and report a good time.

Pte. Jack Rumminger spent Sunday in the village.

A large percentage of our farmers have finished seeding.

We are very sorry to hear of the illness of Pte. Richard Portke, who has been operated on for appendicitis. We hope he will have a speedy recovery.

Mr. Roy Cole has purchased a fine set of single driving harness.

Pte. Samuel Sturgeon who had the misfortune to burn his hand with a rope while taking exercise in Walkerton, is off on ten days furlough.

Regimental Policeman J. H. Armstrong is home to say good-bye prior to going overseas.

MILDMAY

A very large number of our town folks spent a very enjoyable day at the County town on Victoria Day. All report having been well pleased with the sights.

Mr. Edward Deibel and Mr. Wm. F. Wendt visited in Clifford on Sunday.

The At Home to be given on Monday evening to the Carrick boys of the 160th Batt. was called off owing to several difficulties arising and preventing it being carried out. A dance however was held at a later hour for the lads in khaki.

The many friends of the late Mr. Walter Schmitt collected funds on Monday to buy a wreath.

The soldiers who had not yet received their watches were presented with them on Monday evening in the Town Hall.

Mr. Simon Kaechele is erecting a new brick residence on his place on on the Walkerton road just north of the village.

Mr. Elmo Schnurr visited in Ayton on Monday.

Mr. Sigmund Emil of the 8th Con. is erecting a large brick residence this summer.

The Carrick Council at their meeting on Monday gave $1,000 to the Patriotic fund.

Mr. Rudy Kauffmann of the 6th con. has purchased a Ford car.

Mr. Clarence Selling has enlisted in the 113th Battery at Guelph. He came up to visit at his home here over Sunday and to renew acquaintances.

Mr. Edward Deibel has brought a 7 h. p. Indian twin cylinder motorcycle from a dealer in Hanover. The machine was delivered on Saturday last.

There is a rather large class of pupils at the Public School to write on Entrance this year. The Principal, Mr. Kidd has also six pupils trying the the third class exams. The principal is doing a lot of extra work this month.

Isn't it queer, how many people see the evil in the good and how many see the good in the evil.

Sergt. J. Reichenbach and Pte. C. Wendt of Walkerton made a short visit to Mildmay on Sunday.

Pte. Fair and Mrs. Fair, nee Miss Gertrude Richards, of Harriston spent Sunday in town.

Mr. John Krueger of the 11th con. has secured an Overland touring car from Mr. Peter Roheur, the local agt.

Pte. B. B. Patten of 113th Guelph Battery spent Sunday in town with friends.

Mrs. Wellington Richards of Harriston spent Sunday at Mrs. J. Steward's.

Mrs. Reba Schwalm and Miss Dora Wendt of Harriston spent Sunday at their home here.

RIVERSDALE

Miss Stuart who has had an enjoyable visit at the home of her mother, Mrs. McDonald returned to her home in Mornington on Monday last.

Pte. Jack O'Neil spent Sunday in the village, also Ptes. Lamonte and Pettaplace visited here last week.

A number from the village spent the holiday in Walkerton.

The farmers are rejoicing over the fine weather, most of them have almost completed seeding.

There was a very successful bee at Peter Valad's farm on Monday.

Mr. Albert Dietrich returned home from a visit to Toronto on Monday last.

Miss Jeanie Scharbach is visiting at the home of Mr. Steve Scharbach.

Mr. and Mrs. Jas. Halladay narrowly escaped injury when the horse which they were driving on Sunday became unmanageable breaking the harness and part of the buggy.

GREENOCK

Mr. Wallace Cunningham returned to Toronto last week after spending a short vacation at his home here.

The young folks from around the burg gathered at the home of Mr. Geo. Winter last Thursday where a very pleasant evening was spent dancing and playing cards.

Quite a number from around here took in the 24th at Walkerton and report a very large crowd and a good day of sports.

Mrs. Joe. Lawrence of Clifford is spending a week visiting her parents here.

Mr. and Miss Moore of Alphast visited at Mr. John Cunninghams for a couple of days last week.

Miss M. Kirktown spent the week end at her home at Glamis.

By the look of the orchards we will have lots of fruit this year.

Miss Olive Schurter spent a couple of days at Riversdale last week.

Mr. Geo. Ernewein had a very exciting runaway when going home from Mr. Winters' party Thursday night when the horse took fright and ran away upsetting the buggy and breaking the harness, but Mr. Ernewien escaped unhurt.

Mr. David Pinkerton is on the sick list these days. He is suffering from paralytic stroke.

IN THE TRENCHES

Corp. Geo. Kingsbury writes Mr. Truax Of Stirring Experiences "Somewhere in Belgium"

R. E. Truax M. P. had a letter this week from Corp. George Kingsbury, who is on the firing line in Belgium. Corp. Kingsbury writes:—

Dear Mr. Truax:—

I am taking the pleasure of dropping you a few lines, glad to say that up to the time of writing all is well, am in the best of health, and feeling fine. Have been wondering if my last letter to you ever reached its destination. In my letter I told you of my promotion to Corporal, being promoted during the operation of my machine gun in the firing line in the first line trenches. Just lately we have been having some exciting and also very rough times, having been moved to a new part of the line where conditions are very active. Counting up the months I find that we have put in eight solid months in the firing line without a rest and no leave, but I am sticking it fine.

Must say, during the past few weeks have had some very close calls but am still breathing freely. The night before last, the Sargeant and myself went around to all the guns, to see if there were any casualties. On the way we were sniped at, one bullet came so close that we both blinked our eyes at the same time and then looked at one another to see if we had got it but Fritz missed his target. Yesterday morning we were bombarded for two hours. I got annoyed, having had my breakfast at half-past five, and it being half-past eleven, I was good and hungry. Telling the boys to keep where they were under cover, I ran to the dug-out, where the rations were kept, got some bread and butter, jam and cheese, and on the way back, bang! bingo!! smoke, sandbags, bricks, dirt, all went up in the air. Good-bye eatables. Luckily I stayed on my feet, but went hungry. But at night we all had a good supper. This is the life!

Leave has been granted again, two or three going every week now, and if all goes well, I will be getting mine about the end of next month or the first week in July.

Please remember me to Mrs Truax. Hope she is quite well. I thank her very much for sending me the Special Edition of the Telescope. It was indeed a fine paper, I was delighted with it and will keep it for a long time. The Bruce Battalion is some regiment, by what I read, of course no one wishes this war to continue forever, but it will till we are masters of the situation.

As the 160th are making such a good name for themselves, whilst in training. I hope that they will have the opportunity of making a name for themselves when they reach the trenches and have to go over the parapet to meet the dirty Huns. Now I must quit and go to the guns, having quite a bit of responsibility placed on my shoulders now. How is Harry getting along? Remember me to him and I hope he is quite well. Well goodbye for this time, hope to hear from you soon. Wishing you the very best of health, I remain,

Yours truly,
George Kingsbury

GREAT TIME AT CHESLEY

Soldiers of 160th Batt. Were Royally Entertained—Impressive Ceremony of Presenting Colors Witnessed by Thousands

What the citizens of even a small town can do by working harmoniously and enthusiastically together was well shown by the Military Day put on in Chesley on Saturday. The affair was a great success in every way. The 160th Battalion was royally entertained, their battalion funds swelled by over a thousand dollars as a result of the celebration, and the boys were sent away feeling that Chesley was one of the best little towns on the map. A big feature of the day was the presentation of the Battalion Colors to the 160th by Mrs. Holliday, wife of the generous donor, Mr. M. A. Halliday, one of Chesley's most prominent citizens. Two distinguished Bruce boys graced the occasion, the Hon. W. H. Hearst, Premier of Ontario, and Col. Robt. Johnston D.D. of Montreal, one of America's foremost preachers. Those who had the good fortune to hear Dr. Johnston will never forget the inspiring message which he gave to the Battalion on Sunday morning. Another important ceremony was the official farewell of Bruce County to Bruce's Own Battalion by Warden A. E McNab, who in wishing the boys god-speed, presented the Battalion on behalf of the County Council with a purse of $500. The boys covered the sixteen-mile march to Chesley in good shape, and made an excellent impression there by their smart appearance. Returning they left Chesley about nine o'clock Monday morning, stopping for the noon hour near Alex. Rae's in Brant. Here they enjoyed an unexpected treat, some Chesley citizens coming along in an auto with a number of crates of oranges, which certainly "touched the spot." The soldiers reached Walkerton at 4:15, and were met at the top of the hill by a cheering throng of Public and Separate school children of the town who had turned out to greet them.

Capt. Reid Wounded

Today's casuality list gives the name of Capt. John A. Reid of Pinkerton, son of Mr. Adam Reid, among those wounded. Capt. Reid is a graduate of the Medical Faculty, University of Toronto, and was with the Army Medical Corps at the Front. A brother, Lieut. A. E. Reid, is with the 71st Batt.

+ + +

71st. in France?

Walkerton people are following the casualty list with genuine concern these days. It is thought that a number of Walkerton boys were in big fighting with the Canadian Division. It has been persistently rumored that the 71st Batt. is already in France but there is no confirmation of this report.]

+ + +

Got Stepped On

A misstep by a soldier of D. Co. resulted in placing Pte. McRae in the hospital on Tuesday night. Pte. McRae was sleeping soundly when a soldier weighing about 185 lbs. attempted to pussy-foot across the room. When he stepped on McRae's solarplexus the latter thought he was done for, but he will soon be alright again.

+ + +

Will Attend Church

There was some talk of Service being held on the Armoury lawn next Sunday morning but the idea has been abandoned. The Telescope learns authoritatively just before going to press that the orders of the day will provide for the soldiers attending their own Church as usual next Sunday morning.

+ + +

Promotions in "A" Co.

A number of promotions have been made in "A" (Walkerton) Company as follows:—Corp. McCaw to be sergeant, Corp. Watts to be sergeant, Corp. McCarter to be lance-sergeant, Corp. Diss to be lance-sergeant, Pte. Swanston to be lance-corp., Ptes. Howe, J. Henderson, E. G. Davis, Eagles, Woodcock, Wendt to be lance-corporals.

+ + +

Battalion Romance

Probably no member of the 160th Batt. made better use of his month's leave than Private Donald McTavish Lamont, who returned to the Battalion last week with a pretty young bride in the person of Miss Mary Florence Webster of Saugeen. The young couple were wedded at Toronto on May 31st by Rev. N. McQuarry.

+ + +

May Leave June 19th

No definite date for the departure of the 160th Batt. for London has yet been fixed. Lt.-Col. Weir is at London to-day and he may have this information when he returns. The measles epidemic is being squared away, and as no week-end passes are being issued there is little likelihood of fresh cases developing. The probable date for the Battalion's departure is said to be Monday, June 19th.

Appeals Against Assessment.

Court of Revision, composed of Couns. Pletsch, McCarter, Russell, Lattner and Arscott, heard six appeals from the 1916 Assessment on Monday night. John Bilger's assessment was reduced from $1550 to $1250. The business tax on Binder Twine Factory was knocked off. John Joynt appealed against business tax on the Evaporator. The Committee decided to wait and see whether the evaporator would be run this season. The assessment on Mr. H. A. Stephan's house was reduced from $3400 to $2800. The assessment of land on which Stephan Bros. store is built, was cut from $700 to $600. John Ward, proprietor of Weiser House, claimed that his assessment was at least double what he would sell the property for. His appeal will be dealt with at an adjourned meeting next Monday night at 7.30.

+ + +

The Western Fair

One of the changes that will be noticed by visitors to the Exhibition in September next, at London, will be the new Process Building, which has been erected since last year's Exhibition. It is expected that this building will be a hive of industry during Exhibition week. Some of our largest Manufacturers have already taken space and arrangements are being made with others, so that this building will certainly be an attractive one with machinery in motion, showing different kinds of goods in course of manufacturing. Many firms require space in this, or any other building, application should be made to the Secretary at once, as a large amount of space has already been alloted. This is a very important matter to Exhibitors as late applicants have to take what is left. All applications for space and all other information regarding the Exhibition should be addressed to the Secretary, A. M. Hunt, London, Ontario.

Deanery Meeting

A most successful and well attended meeting of the Bruce Deanery Chapter and the Bruce Deanery Branch of the Women's Auxiliary was held in the Church of the Ascension, Paisley, on Wednesday of last week. Rev. W. E. Philip of Chesley, was the preacher at the morning session, followed by the administration of the holy communion. Mrs. Gahan, of London, addressed the ladies of the W. A. in the church while the Deanery Chapter met for business at the rectory from 2 to 4 p.m. At a united meeting at 4 o'clock Mr. Baldwin, of Toronto, gave a paper on church literature, and strongly urged the use of the press in church work. Rev. O. C. Brett, missionary to the Yukon for the past five years, gave an interesting account of his work among the Indians in the north. Rev. Canon Gould, the general secretary of the Church of England in Canada, gave an inspiring address, leading his hearers into various mission fields, and made the picture so real that one could catch the vision. He also gave another impressive address at the missionary meeting in the evening. The ladies of the church served a very appetising luncheon on the church lawn to about one hundred. The officers of the Bruce Deanery W. A. for the coming year are:—Mrs. (Rev.) Diehl, of Paisley, President; Mrs. (Rev.) Homer, of Cargill, Sec.-Treas. The Deanery co-operative bale is being sent to Cedar Lake, Sask.

IN MEMORIAM

In loving memory of Hector Herd, who died June 8th, 1915.

Another year has passed, our hearts still sore
As time goes on we miss him more.
His cheerful voice, his welcome face,
No one can take a father's place.
We'll catch the broken threads again
And finish what we here began,
Why hopes are checked and castles fall,
Some time, some time we'll understand

Inserted by his friends.

CARD OF THANKS

Mr. and Mrs. C.B. Schnurr and family desire to thank the many friends of Walkerton and district who so generously assisted them during their recent sad bereavement. They desire also to extend their very sincere thanks for the many floral and spiritual offerings.

AN EXPLANATION

A good many contributors will wonder what has happened to their news items this week. Several columns of our best reading matter including the weekly budgets from our live correspondents in Cargill, Mildmay, Glamis and Pinkerton, have been held over unavoidably, and the TELESCOPE delayed in publication, owing to "mechanical troubles", which fortunately have been adjusted.

NEWS ABOUT TOWN

Fresh fish at McIlwain's.

See McCarter's $15 harness.

Wool wanted—S. A. Rife & Co.

Mr. Dick McCrum is visiting at Galt.

Mrs. Hamilton of Chicago is visiting her sister Mrs. John McLean.

Fresh herring, whitefish and trout every Tuesday and Friday at McIlwain's.

Mr. and Mrs. John Vogt and Miss Vogt, spent a few days at Hamilton the past week.

Capt. Walter Lamb was here from Toronto on Saturday attending his sister's wedding.

Mr. A. D. Farguson B.A., has secured Mathematics Specialist standing from the Faculty of Education.

Pte. William Brislan, of Toronto, was home for a few days visiting his parents, Mr. and Mrs. James Brislan.

Mrs. J. H. Walhquist and daughter, Florence, of Freehold, New Jersey, is visiting her parents, Mr. and Mrs. N. Eidt.

The appointment of Lieut. McDonald and Krug of Chesley, two young officers of the 160th, was made this week.

Messrs. J. J. Schumacher and Guy Carney (Durham) bought Overland cars this week from J. E. McGregor, local agent.

Good homes wanted for a girl 10 years old, boy 6, boy 5, boy 4, boy 3, all orphan children. Apply to Rev. D. McLennan.

A vagrant, named Joseph Richardson was brought down from Hepworth this week to serve 60 days at the County goal.

Mrs. K. M. Taylor, accompanied by Sheila and babe, left on Tuesday morning for a month's visit to Belleville and Perth.

Mrs. Heinz was here from Stratford this week and took her sister, Mrs. Pelch, who has been poorly for some time, back to Stratford with her.

Ensign Fred W. Martin of London, a staff officer of the Salvation Army, was here yesterday taking subscriptions for the Army's Prison and Rescue work.

Eldon Lewis, B.A., secured Specialist standing in the teachers' examinations at Faculty of Education. Miss Helen Hartley has passed as high school assistant.

In the absence of Rev. D. A. Walker at Conference, Rev. J. W. Sanderson supplied the pulpit of the Methodist Church in the morning and Mr. H. L. Willoughby at night.

When Rev. Dr. Johnston called for three cheers for the most popular officer in Ontario and best horseman in Chesley on Saturday, the crowd made the welkin ring with lusty cheers for Col. Weir.

The spring crops are having a good growth the last ten days. Fall wheat will be an excellent crop on high land but on low-lying soil is worthless. Prospects are excellent for a good crop of hay.

Mrs. Channing and her two sons arrived back this week from England where they went a year ago after Mr. Channing had enlisted. Mrs. Channing has rented the house recently vacated by Mrs. Moody in the East Ward.

Mrs. Catherine Houck has sold her fifty-acre farm in North Brant to Mrs. Jane Goodfry for $3,250. The deal was put through by Mr. James Whitehead. Mrs. Houck has not decided where she will make her home but may come to Walkerton.

Rev. G. C. Little, B.A., of Paisley, left on Monday to attend the General Assembly at Winnipeg. The other commissioners from the Bruce Presbytery are:—Rev. A. G. Howat, Salem; R. M. Gale, Pinkerton; J. R. Hunter, elder, Tiverton.

President Smallfield of the Canadian Press Association said at Toronto last week:—If one hundred newspaper editors of Ontario were asked which weekly paper had the best editional page, one hundred would reply. "The Orillia Packet." Surely the Packet has a reputation worth while.

Mr. James A. Lamb who visited Guelph on Monday, says that the crops in this section are more advanced than they are further south and that conditions there have been more aggravated by the rains. In one field he noticed a farmer sowing by hand, the ground being too soft for machinery.

Town Council meets Monday night.

Two cases of mumps are reported in the 160th.

County Council is meeting at Port Elgin this week.

Judge Klein is holding County Court at Walkerton this week.

Mr. E. J. Skelton arrived home from an extended business trip to the West last week.

Have your wedding invitations printed in the latest designs from new type at the Telescope.

The Huron Battalion added 134 recruits during May. The Battalion's strength is now about 900.

Irwin Bros. shipped three carloads of horses to-day. Two loads to the West, and one to Montreal.

The Methodist Congregation had an inspiring sermon Sunday night from Principal Willoughby.

A few turns of the watering cart would be a blessing to the dust-chocked folks on Durham St. these days.

Walkerton Oddfellows will hold Decoration Service on Sunday. The 160th Batt. Band will be in attendance.

Lightning struck the barn of Rev. Mr. McFarlane, Kincardine, on Sunday night, doing considerable damage.

The ladies of Chesley provided 3,000 pies for the boys of the Battalion. And maybe the boys didn't enjoy them!

For a clean scalp and glossy healthy hair use "93" Shampoo Paste. 25c. at Rexall Drug Stores only.—A. P. Sieveright.

Mr. A. S. Hoyce is making extensive alterations to his house, including the addition of a couple of rooms on the second floor.

The Bruce County W. C. T. U. will hold its twenty-eight Annual Convention in Knox Church, Walkerton on June 15th and 16th.

Don't be backward about letting us have your personals. They help us make a newsy paper and that's the kind we always try to publish

Major J. J. Fraser is editor of the Splint Record, a live sheet published at the Front by No 2 Field Ambulance. The Telescope has been favored with a recent copy and will publish some spicy item extracts in next week's issue.

Little Betty Player, the two-year-old daughter of Mr. and Mrs. R. M. Player, underwent a serious operation by Dr. Hall for mastoid trouble at the Bruce County Hospital on Saturday afternoon. Betty is making a splendid recovery.

Farmers should have printed stationery just as well as business men. Try a small lot for a start, and see how you like it. We'll give you 250 envelopes and 250 note heads, neatly printed, for $2; or 500 of each for $3. We have cheaper kinds but do not recommend them.

"Much sickness would be prevented if the public would remember that constipation is one of the first causes." "Rexall Orderlies" is the best remedy for men, women, or children. 15c and 25c, exclusively at Rexall Drug Stores. —A. P. Sieveright.

Rumors of obstreperous conduct at Chesley by Indians who had obtained fire-water, were current on the streets on Saturday. The reports proved to be greatly exaggerated. Two Indian brothers of the 160th, who had got hold of a bit of liquor, "locked horns," causing a small disturbance for which they were given a few days "C.B."

New Dental Office

Dr. Slater, L. D. S., D.D. S., wishes to announce that he has opened his office in the Wiser Block, formerly occupied by Dr. Lount. Excellent equipment has been installed.

+ + +

Wanted

At once, a reliable man of good address with some experience among farmers, to act as county representative for Bruce County. — Stone & Wellington, Nurserymen, Toronto, 19-23

+ + +

A June Fete.

A Garden Party under the auspices of the Bruce County Hospital will be held on the Armoury Grounds on Friday, June 9th, afternoon and evening. Strawberries, ice cream, cakes, sandwiches, tea, coffee, candy, fruit, etc., will be served. Battalion Band in attendance. No admission fee. Everybody welcome. Come and help the Hospital.

+ + +

A Timely Gift

The material for two "cook-boxes" has been presented by Walkerton Chapter, Daughters of the Empire, to each of the four companies of the 160th Batt. The cook-boxes resemble piano boxes, but in reality are huge kitchen cabinets. The design was drafted by Sergt. James and they are being made up by the carpenters of the battalion. The cook boxes are a very handy labor-saver for the battalion cooks.

Freak Rye

Mr. Philip Gress came across a strange phenomenon in plant growth on his farm near Otter Creek. A cluster of rye, all sprung from the one kernel, contained no less than 90 stalks by actual count.

+ + +

Former Greenock Farmer

The death occurred at Teeswater on Saturday of Mr. George Hardy, a former Greenock resident who was well-known here. Mr. Hardy, who was in his 61th year, succumbed to an attack of typhoid fever. He was in his 61th year.

+ + +

Open Air Service

Ensign Fred W. Martin, of the Salvation Army Headquarters staff, was here yesterday taking subscriptions for the Rescue and Prison work of the Army. The Ensign who is one of the youngest and most active leaders in the Army's work, met a number of Salvationists in khaki while here, and arranged to be in Walkerton Sunday night when the local Salvationists numbering eight or nine will hold a street service.

+ + +

Suspected a Spy

A farmer living near Hanover telephoned the police on Tuesday that a suspicious looking character was driving about the country buying produce. He could scarcely speak a word of English and the farmer sized him up as a sure-enough spy. The Chief waylaid the produce buyer as he came into town and had a look at his credentials. As he proved himself to be the agent of a large Toronto produce house and had no bombs or seventeen inch guns on his person, the Chief permitted him to go in peace.

+ + +

Newspapermen Get Together

Canadian publishers foregathered at Toronto last week from every Province of the Dominion for the annual meeting of the Canadian Press Association. The gathering was held in the new Central Technical School, the finest institution of the kind in existence. Many problems of mutual interest were threshed out. L. A. Eedy of the Telescope was re-elected a director of the Association, also appointed a member of the Advisory Board of five members who, when it is impracticable to call the Board of Directors together, will look after the business of the Association.

+ + +

Death of Mrs. Degurney

Mrs. Geo. Degurney, a very old and esteemed resident of North Brant, passed away at the home of Mrs. Sweeney, Scott St, on Sunday afternoon. She had been poorly for some time, death resulting from a gradual breaking up of forces due to old age. She was but a young girl when she came to this district from Scotland. She spent nearly her whole life on the farm on con. 11th, Brant. Her husband predeceased her four years ago. Her only near relative is a nephew, Mr. D. Manorgan, who has the old homestead. Funeral service was conducted at the R.C. Church on Monday morning by Rev. Father Cummings, the remains being taken to North Brant Cemetery for interment.

+ + +

A Brant Wedding

The marriage of Miss Norma E. Lamb, eldest daughter of Mr. and Mrs. James A. Lamb of Brant to Mr. G. Lawrence McClennan of Sherbrooke, Que., was quietly celebrated at the family home, Brant, on Saturday last at one o'clock. Rev. Thos. Wilson, pastor of Knox Church, Walkerton, performed the ceremony. There were no attendants and only the immediate relatives were present. After luncheon had been served, Mr. and Mrs. McClennan left on the afternoon train for Toronto and Ottawa, the bride wearing a travelling suit of navy blue silk. They will make their home at Sherbrooke, Que. where Mr. McClennan is accountant of the bank of Montreal. Before her marriage Mrs. McClennan was for three years lady superintendent of the hospital at Sherbrooke, and she was the recipient of beautiful presents from the hospital board there, as well as from a multitude of friends.

+ + +

New Methodist Pastor

The reports of the sessions of the Methodist Conference have been closely watched by local Methodists the past week, as almost every circuit in this district was due for a change of pastor. The final draft of stationing committee issued on Tuesday indicates that the call of the Preston Church to Rev. D. A. Walker B. A. has been sustained by Conference. Mr. Walker will be succeeded here by Rev. Rev. C. W. Cosens of Elmira, a former Paisley pastor, who is known to many Walkerton people. Rev. Dr. Ross, a former Walkerton pastor, goes to Norwich. Rev. J. W. Cooley is stationed at Stoney Creek. Rev. A. J. Crighton will be at Paisley, and Rev. W. W. C. Almack at Elmwood. Hanover gets the President of Conference, Rev. J. A. Jackson. Rev. D. A. Walker was honored with the appointment of Ass't-Secretary of Conference. It was noted that no less than 16 Ministers of this Conference are in khaki, four of them as Chaplains.

FARMER COMMITS SUICIDE

George Flach of Brant Township Cut His Throat with Pen Knife—Had Been Acting Strangely of Late

When George Flach, a Brant farmer, did not appear for supper last Wednesday, his family became anxious, as he had been acting strangely of late, and started a vigorous search. Flach had said on leaving after dinner that he was going to see a neighbor about some pigs. Enquiry proved that he did not go to the neighbor's place at all. It was not until the following day that a searching party found his lifeless body in the woods, with a deep gash in the throat. They immediately notified the Coroner, Dr. Porter. On visiting the scene, Chief Ferguson found traces of blood, sixty-five yards from the body, indicating that Flach's attempt to end his life, was not immediately successful. A small two-bladed pen-knife in the grass told the tale. The Coroner impannelled a jury the following day, who brought in a verdict of suicide. Flach, who lived two and a half miles south west of town, leaves a wife and three children. He was a quiet respectable citizen, but about a year ago began acting peculiarly. He was examined for his sanity at that time but the doctors could not not find sufficient evidence of insanity to have him committed to the asylum.

BOYS AND GIRLS

Collected Over 8,000 lbs. of Old Newspapers for Red Cross Fund

As a result of the campaign to collect old newspapers, the pupils of the High and Public Schools have collected no less than 8,391lbs. which will net a snug sum for Red Cross purposes. A prize was given by Mr. David Robertson K.C. for the three highest contributors in each school. A list of the contributors is published herewith:—

High School Contributors

Nelson Lay 815, Geo. Pinkney 671, Victor Eidt 348, Arthur Johnston 312, Oscar Schwindt 141, Winnie Wilson 175, Florence Taylor 170, Margaret Chisholm 110, Sylvia Brockelbank [illegible], Hazel Irwin 37, Emilette Stevens [illegible], Gertrude Lewis 16.

Public School Contributors

Armond Taggart [illegible], Eldridge Truax 1018, Bruce Smith [illegible], Harry Myles [illegible], Eddie [illegible], [illegible] George 200, Catherine Attwood [illegible], Milton Ramsey 170, Rhoda [illegible] 152, Walter Hartman 142, Thelma McEwen 131, Jean George 114, Norman Truax 103, Shellac Taylor [illegible], May Pardue 97, Margaret Shaw 91, [illegible] Hunter 79, Eddie Singer 77, Francis Nutting 76, Ruth Pye [illegible], Dorothy Truax 63, Price McConnel 48, Anna Reichenbach 41, Norma Forsythe [illegible], Lloyd Searle 14, Arthur Whitehead 8.

LATEST WAR NEWS

By G. N. W. Wire Up To Time Of Going To Press

London, Eng., June 7th.—It is announced that Premier Asquith will take temporary charge of the war office. The admiralty have made no further statement regarding the Hampshire disaster.

French war office announces powerful German attacks which continued last night on Fort Vaux were broken up by French machine gun fire. Announcement adds enemy retreated in disorder, abandoning dead and wounded. Heavy artillery fighting is in progress at Hill 304 and Caurettes Woods.

Copenhagen despatch says unofficial estimate issued at Kiel of German losses in North Sea fighting place number at 6,600.

Despatch from British headquarters indicates that both Generals Mercer and Williams are likely prisoners.

Walkerton Hero?

A London paper stated on Saturday that Private Haucock of Walkerton, a member of the 19th Batt. had been awarded the Military Medal for conspicuous bravery. No such individual is known in Walkerton as far as we have been able to learn.

+ + +

Gateman—Misch

A pretty wedding took place at the Lutheran Church at three o'clock on Tuesday, June 6th, when Miss Esther Misch was united in marriage to Mr. Louis Gateman of Brant. The ceremony was performed by the pastor Rev. Mr. Mosig. The bride was becomingly gowned in duchess satin trimmed with shadow lace and wore the regulation veil with orange blossoms, carrying a boquet of lily of the valley and white carnations. Mr. John Tots supported the groom. A dainty luncheon was afterwards served for the wedding party at the home of Mr. A. J. Misch, uncle of the groom. In the evening a reception was held in honor of the happy young couple at the old Gateman home in Brant. Mr. and Mrs. Gateman will reside on the former's farm, concession 4, Brant.

CROSS PURPOSES

"No, indeed; I was in the cottage when the train came. Oh, it's quite true, Frank. You know I really couldn't help it. Are you angry?"

"Angry?" he repeated; "why should I be angry? I'm dreaming, I think it isn't a joke?" he said, suddenly, with a threatening frown.

"Oh; no, no. Is it wrong, do you think? What could I do?"

"Tiny and South!" said Frank. "Tiny! Well, if she likes him! I don't see why it should be wrong," he went on, bewildered, yet beginning to perceive how in some ways it might be marvelously right. "That's for their own people to decide. If they haven't any objection. But Tiny and South!"

"You are not angry, then? You don't mind?"

"No; why should I? If Tiny is happy, it's all right. But I don't seem able to believe it yet."

"Well, here is Mr. South," said Mrs. Leicester, more cheerfully. "Perhaps you'll believe him."

Frank looked up, and saw South coming across the grass. He was pale, but there was a peculiar brightness about his face. His eyes were shining; he smiled a little defiantly. Surprise is not the easiest thing in the world to encounter, especially if one is a little surprised at one's self. Gilbert had only just found himself out. Before Frank could take a step to meet him, Mrs. Austin, who had come up during the explanation, went forward swiftly and held out her hand.

"Gilbert, is this true?" she said. "I may congratulate you not only on your fortunate escape, but on your engagement, too?"

(Mrs. Leicester in the background arched her eyebrows and looked at Frank. "I had forgotten her!" she whispered).

South ceased to smile, but he met her questioning eyes honestly enough. "Yes," he said, slowly, "it's quite true." He looked at her as if he would have said more.

"Then I wish you all happiness—I wish it with all my heart," she replied. There was no tremor in her soft, clear, voice. "I think our old friendship gives me the right to be one of the first to congratulate you."

"Thank you," Gilbert replied, confusedly. He still held her hand, and looked anxiously at her as if he feared some hidden meaning in her words. "Mildred!" he said, and there was a world of pleading in his tone, "tell me——" he stopped short. What was he going to say?

"Believe me," she said, and he felt her fingers tighten on his in a kindly clasp as she spoke, "I have always wished your happiness—always. And I am glad to think that you have found it." And with that she nodded a smiling little farewell, and walked toward the house.

Gilbert gazed after her with a throb of regretful pain. He had known that it was impossible to go back to the old days; Mildred had taught him that. And yet, as he looked over his shoulder at the retreating figure, he had a strange fancy that it was the very past itself, the past which he had so long worshipped and from which he had so suddenly awakened, which was at that moment leaving him forever, a stately shape passing silently away, and never looking back. [illegible] would not have recalled her, [illegible] could not recall the Mildred who believed in him and looked at him with happy hope in her eyes. It was Tiny who believed in him now. Mildred had no need of him. Tiny had called "Gilbert!" in their peril that afternoon, and his heart had answered the innocently appealing cry, the name by which she had never called him, uttered as her one word then. Tiny had no need to grudge his old love that one backward glance. It was all over in a moment, and Gilbert drew a long breath, and went forward to receive Frank's congratulations.

They were rather briefly and bluntly given. Frank was eager to be gone; the picture which for Gilbert embodied a softly sentimental regret was for him a vision of hope, which beckoned him to follow. He uttered such good wishes as came readily to his lips, and were suitable to anybody who was going to be married. He realized the accident by the gravel pit more clearly than the engagement, but he was too impatient and preoccupied to talk much even about that. "It's a mercy you weren't killed!" he said, shortly.

"Well, I suppose it was a narrow escape," Gilbert answered, with a smile.

"A narrow escape—yes, I should think so! It couldn't very well have been much narrower, as far as I can see. However, a miss is as good as a mile, I suppose."

"So they say," Gilbert replied; "but for my own part, I should prefer the mile next time. And so would your cousin, I fancy."

"Ah, Tiny knew what you were coming to! It's no wonder if she was scared, poor child!" said Frank. "There isn't a nastier place about here. By the way, I haven't seen Tiny yet." And he brushed past Gilbert and departed, as if to congratulate Tiny were the one object of life.

He went by the stable-yard, where he speedily ascertained that the amount of damage done was so absurdly small that there was nothing serious about the whole business, except what might have been. He cut Robinson's explanations short, and hurried to the house, where, as luck would have it, he met Tiny in the hall. She looked a little like Gilbert South, pale with agitation, and yet radiant. Her great brown eyes were shining, and her lips quivered with excitement, which might end either in sobs or smiles. "Oh, Frank!" she exclaimed; and she, too, looked up anxiously to see how the young master received the news.

"Well," he said, taking her hands in his; "this is a pretty afternoon's work! What will your people at home say, do you suppose?"

"Oh, my people at home. They'll say what I say," Tiny answered, with a tremulous laugh. "I shall make them."

"And what do you say?"

"Oh, Frank, isn't it strange? I'm so glad, but I want you to say you are glad too. Frank, you do like him now, don't you? You are not vexed?"

"No, I'm not vexed, if you are happy. Oh, I like him well enough, but I think you ought to have had somebody younger," he said, doubtfully.

"Oh, no, Frank," Tiny replied, with great decision. "It doesn't matter the least bit when it's the man. If it were the woman now, it would matter; but not when it's the man."

"Well, you know best." And Frank released one of her hands. "I'm sure I wish you all happiness. It comes rather suddenly," he said, with a laugh.

"So it did to me," Tiny replied; "and I'm not sure he would have told everybody directly, but we were in the Barkers' garden; we couldn't go in, because poor Mrs. Barker is dead, you know, and we were waiting until they got something to bring us home——"

"Oh, that's where it was settled?"

"Yes," Tiny answered, with a conscious little laugh. "No; I think it was settled as we tumbled out, but that was where he said it properly. And your mother came round the corner upon us——"

"I see," said Frank.

"They do grow such a lot of southern wood there," Tiny went on, as the color rushed to her cheeks. "He leaned against the palings, and there was a great bush of it. He smelled like a Sunday school nosegay as we were coming back; but he says he shall always like it now."

The sight of Tiny alive, laughing, and talking nonsense with quivering lips, suddenly brought the thought of her peril vividly before Frank. "Oh, Tiny!" he said, "you might have been killed!"

"Don't," she said; "I saw it all—the gravel pit, you know, just as we went into it one day: do you remember? Ever so long ago, almost the first time I staid here. I saw it all, as if there were a terrible light in it, and I said to myself, 'I shall die there!' And then I called to Gilbert, and I remember his face for one moment, and we got to the turning, and before we could jump out it was all over; and there we were, picking ourselves up, and none the worse!"

"Thank God!" said Frank.

"Only so dusty; and somehow I felt very small when I found it had all ended in nothing at all."

Frank laughed "Never mind; it was better than being a smashed heroine."

"And it has ended in something, only a different sort of thing hasn't it?" said Tiny. "Where is everybody, Frank? In the drawing-room?"

"Everybody?" No; I left him with my mother on the lawn."

Tiny made a face at him. "Oh, by the way, I know Mrs. Austin isn't there. I met her a minute ago on the stairs, and she kissed me and congratulated me. I say, who told her?"

"She heard my mother telling me, I believe."

"Oh, I wondered if Gilbert had. Do you suppose she minds much?"

"I don't believe she minds at all," said Frank. "Why should she? She told him she was very glad."

"I believe she does mind, though," Tiny nodded. "She was very fond of talking about old times."

"Rubbish!" Frank exclaimed; "you are as bad as my mother!" and he walked off, leaving Tiny happily convinced that it was impossible Mrs. Austin should not envy her the possession of Gilbert's love.

"Now or never!" he said to himself, as he went slowly up the stairs. His life hung in the balance, his heart was beating fast, and every throb brought him nearer the decisive moment. He turned into a little room where Mrs. Leicester and Tiny sometimes sat. He would lie in wait for Mrs. Austin there; she must pass the door as she went down.

Frank leaned against the window, looking at the dim undulations of the landscape, and vaguely recognising familiar points. It was strange to stand in that little room which he had known all his life; he could remember learning his lessons there at his mother's knee, waiting for his fate to come to him. At any moment it might come, with a quiet step, and the soft sweeping of her dress in the passage. Before a dozen more of those strong heart-throbs were over, her eyes might be meeting his. She would look him in the face, he knew, but what would she say to him? Frank had never thought less of himself than he did at that moment, and yet beneath all his anxiety he had an unreasoning faith in his good-luck. Fortune had always been kind to him; people had always done what he wanted them to do. Yes, but Mrs. Austin was different. He dared not hope, and yet the mere thought that success was possible flushed him like a draught of wine. Then she would not be Mrs. Austin, but—Mildred; he would not have to count the days and nights as steps toward parting, they would all be his, other people would come and go, but she would stay. When she said "home" she would mean Culverdale. On that last thought he dwelt with exquisite delight, as if he could hear her uttering the word. It was the wildest dream, yet in a few minutes that dream might be his actual life; that was the wonder of it. And was not fortune smiling on him already? He had been afraid of Gilbert South, he had had misgivings about Tiny's troubled eyes, and now just at the right moment all his doubts and fears had vanished away, he was free to go to his love, and she was free to come to him. There could be no shadow of reproach or regret between them.

He heard her footfall in the passage; he called "Mrs. Austin!" It paused, and she appeared on the threshold of the open door.

He had been expecting and watching for her, and yet when she came in answer to his call, he felt as if he were taken by surprise, and had not a word to say. She stood in the doorway, waiting for him to speak, and on her delicate lips was that faint smile which seemed to Frank to be the point of all the poetry in the world. "What is it?" she said. "Did you want me?"

"Don't go down for a few minutes," he entreated. "I have something to say to you?"

She looked unsuspectingly at him. "Some other time," she said; "I really must go to your mother."

"My mother? Oh, she will wait a few minutes for me!" And, before she could speak another word, Frank, with eager eyes and stammering speech, was telling the story of his love. Even as he looked at her pale, startled face, before she had opened her lips to answer him, he knew that he had failed. And yet failure, now that it had actually come, seemed so incredible that Frank tried to avert it, by repeating what he had already said, as if every second which elapsed before she spoke was something gained. But all at once he stopped short, with a sense of the utter uselessness of any words.

"Oh, I am sorry!" said Mrs. Austin, meeting his eyes with a simple, tender sorrow in hers. She might have looked something the same if she had inadvertently hurt some dumb creature in the Culverdale woods.

"Don't!" said Frank.

"I never dreamed of this—never! I'm more sorry than words can say if anything I have said or done——"

"No!" Frank exclaimed. "You have done nothing wrong. If I'm a fool, I don't know that it's my fault, but I'm sure it isn't yours."

She could not help smiling so gentle a smile that it could not wound him. "You must not think of this," she said. "It can't be. For one thing, you must remember that you are a young man, and I am an old woman. You will choose better one of these days—you have your life before you." She added, after a moment, "Mine is behind me—at least the best of it."

"Don't talk like that!" said Frank. "What do a few years matter one way or the other? I would be older if I could, of course." (He could wish to be changed, but he could desire no change in her.) "But I shall grow older," he said, trying to laugh.

She shook her head. "And so shall I!"

"If that is all," he exclaimed, hotly, "it would be cruel——"

"But it isn't all. Believe me, Mr. Leicester, what you ask is impossible."

"I know I'm not good enough; but isn't there anything I could do? If I tried to get into Parliament, should you like me to do that?" said Frank, desperately. His hurried thought caught any possible advancement that might make him more worthy in her eyes. "I'm not clever, of course, but surely a man must be good for something if he tries with all his heart. Tell me what you would like me to do, and I'll do it!"

He stood opposite her; his face was pale and keen with excitement; he looked so roused, so manly, so earnest, that for one moment the thought crossed Mrs. Austin's mind that, if fate had but sent Frank instead of Gilbert into that earlier life of which she had spoken, he might have become such a hero as she had dreamed. But it was only a passing thought. Something told her that Frank, as he spoke, touched the highest point of which he was capable. It might be that he, too, felt that at this moment the flood of passion and resolution reached its limit; but he believed that the wave, if not repulsed, would have force enough to carry him onward through the lower waters of his later life.

"I think you are good for a great deal," he said; "but that isn't the question. You must believe me when I tell you that I am very sorry, but what you ask me can't be."

"You are quite sure? There is no chance for me?"

She paused for a moment, looking at him. Then, as if it pained her to speak that last word, she answered with a little negative movement of her head.

The eager expression died out of his eyes, and his face relaxed. "Very well," he said. "Then I suppose there's nothing to do but say good-bye." He seemed to be making an effort to master himself, and Mrs. Austin looked aside at the window and waited till he should speak again.

"See here," he said, after a brief silence, "I shall tell my mother I have to go up to town on business this evening, but that I'm coming down to-morrow morning. I shall get away so, without any fuss, and to-morrow I shall telegraph that I'm detained, and I shan't come back for a day or two."

"Yes, I understand," she answered. "This is good-bye. And when we meet again, I hope——"

Frank had taken up a pencil which happened to be lying on the table, dropped it, and stooped to find it on the floor. He rose with a slight flush on his cheek. "People don't always meet," he said. "Sometimes it's years first. Perhaps we never shall meet again."

"Perhaps not. That is possible, of course." Mrs. Austin was a little puzzled by his manner.

The color deepened on his face. "Well," he said, "why should we? If it must be all over, let it be all over!" He looked at her, crimsoning with the consciousness that he was saying something altogether unlike his ordinary every-day talk. "I would rather we didn't meet. I would rather say good-bye now. You understand, don't you? Remember me a little as I am to-day."

"I shall always remember you," she answered.

"And let me remember you as you are. If we chance to meet, why we must. But why should we? We never met till now. If it depends on me, I think we will never meet again."

(To be continued.)

British Orders for Women.

There are several British Orders and decorations which, though not exclusive to women, may yet be won by them upon occasion. For example, the greatly-coveted Order of Merit has been conferred upon one woman—Miss Florence Nightingale. The rarely-awarded Lloyd's Medal for saving life at sea has also been conferred upon one woman, Miss Kate Gilmour, for heroism in connection with the burning of the passenger steamer Sardinia, in 1908, off Malta—a unique honor.

The Order of the Hospital of St. John of Jerusalem in England is a decoration that can be worn by women in any position in life. In practice, however, it is almost wholly awarded to nurses, or women interested in nursing. It is a small Maltese cross, enamelled white, bearing the word, "For Service in the Cause of Humanity," and it is worn suspended from a black ribbon of watered silk. The wearers of the decoration, no matter which class they belong to, have reason to be proud of it, for it is one of the very oldest Orders extant, dating back to the year [illegible]. It was not, however, until it was incorporated by Queen Victoria in 1888 that it was allowed to take its place among recognized orders.

SUNDAY SCHOOL LESSON

June 11, 1916. Lesson XI.

Sowing and Reaping Temperance Lesson. Galatians 6: 1-18.

Commentary.—I. Charity and helpfulness (vs. 1, 2). 1. Brethren—Paul addressed the Christians in Galatia with true affection. This love grew out of the fact that they were the children of God, and out of the fact that he had been associated with them in Christian work. Be overtaken in a fault—The language implies that one may be taken by surprise and be overcome by temptation. It does not necessarily mean that he has deliberately gone into sin. The Christian on earth does not get beyond the possibility of falling into sin, even though the love of God fills his soul. He is still subject to the assaults of Satan and liable to yield to temptation, yet he can withstand, and be kept by the power of God through faith. Ye which are spiritual—Those who walk in the Spirit and live in the Spirit (Gal. 5: 16, 18, 25); those to whom the Father has given the Holy Spirit (Luke 11: 13); those who are born of the Spirit (John 3: 5, 8). Restore such an one—One that is "spiritual" can reprove and encourage those who have fallen into temptation and have been overcome. They can lead them to Jesus, who alone has power to pardon transgression. In the spirit of meekness—Effectiveness in restoring those who have been overtaken in faults depends upon the manner in which the effort is made. A harsh, driving spirit is out of place. There is need of loving counsel and meekness in such cases. Considering thyself—"Let him that thinketh he standeth take heed lest he fall" (1 Cor. 10:12). Lest thou also be tempted—The apostle exhorts the brethren to put themselves in the place of him who were overtaken in a fault, and judge how they would choose to be dealt with under such circumstances. The sin is not in being tempted, but in yielding to the temptation. 2. Bear ye one another's burdens—There are none of us who are exempt from burdens, and the apostle points out a way of relief. This spirit of mutual helpfulness makes the machinery of life run smoothly. There is great blessing for him who charitably and earnestly undertakes to help another. Our burdens are at once made lighter when a brother becomes helpful to us in the sense set forth here. Fulfil the law of Christ—This is the law of love (James 2:8). The Christian should reach out a helping hand to those who have fallen a prey to intemperance. Here is an opportunity to exercise patience and charity.

II. Duty to one's self (vs. 3-5). 3. To be something—One's duty to himself requires that he be humble. The gospel everywhere commends humility and condemns self-exaltation and pride. There is danger of relying upon one's strength of will and favorable surroundings to escape falling into error. Satan is ever ready to encourage one in his good opinion of himself and thus prepare the way for a fall. When he is nothing—The apostle leaves no room for boasting on the part of any one. He who thinks himself to be "something," in that very imagination declares himself to be "nothing." He is without strength to resist the attacks of Satan and the hard things of life. Deceiveth himself—The Greek word is expressive and means to cheat one's brain. The one in this condition can never resist to the degree he thinks he can, and he makes himself contemptible in the sight of others. 4. Prove his own work—The test which we are to apply is the word of God. Through humility, earnestness and faith we may bring the truths of the scripture to bear upon us as a test. In doing this a man will not think more highly of himself than he ought to think (Rom. 12: 3). Rejoicing in himself—He who has a consciousness that he conforms to the word of God, and who, in his efforts to restore those overtaken in faults, manifests a spirit of meekness, is blessed with a joy divinely implanted in his soul. Not in another—The genuine Christian has received from God deliverance from sin. He possesses the kingdom of God, which is "righteousness, and peace, and joy in the Holy Ghost" (Rom. 14:17). He is not dependent upon others for his joy, although he rejoices with those who rejoice. 5. Shall bear his own burden—This is not a contradiction of v. 2. There is an important sense in which one can assist another to bear his burdens. However, there are burdens that can not be shifted from one to another. He who tries to escape the burden that belongs to him is disobeying the Lord's command, and is losing the divine approval.

III. The harvest expected (vs. 6-10.) 6. Is taught in the word—The apostle refers to those who have a knowledge of the truths of the gospel. Communicate—Impart the knowledge that he has. The treasures of the word are beyond price. Those who know them are in duty bound to make them known to others. That teacheth—There are those who are particularly called to teach others, and all who are able should assist them. Good things—The truths of the kingdom. It is thought by some that this refers to temporal support. The idea of personal responsibility runs all through this lesson. 7. Be not deceived—This is a timely warning in view of the fact that Satan, the great deceiver, is constantly trying to deceive mankind. He would make the sinner believe that he has plenty of time to follow the bent of his sinful nature. God is not mocked—God is infinite in wisdom and in justice. What he says is true. Satan disputed the word in Eden, but that word was true, and the race has felt the force of the divine sentence during the ages since. Soweth .... reap—This applies to every choice and act. Evil habits bring dire results. Alcohol is a poison, and even in small quantities shows injurious effects.

8. Soweth to his flesh—Yields to the temptations of Satan. Reap corruption—He reaps moral pollution, bodily disease, mental weakness and eternal death. Soweth to the Spirit—The flesh and the Spirit are contrasted. The flesh stands for all that is evil and degrading, and the Spirit for all that is pure and uplifting. Through grace every one who will meet the conditions of salvation can be enabled to sow "to the Spirit." Reap life everlasting—In striking contrast to the harvest of those who sow "to the flesh." 9. Let us not be weary—The thought in v. 1 is continued here. As we have commenced to help others, let us continue. If we faint not—The efforts of the consecrated, persevering worker will bear fruit. 10. Do good—We shall not lack opportunities to do good to others, and the exhortation will be obeyed if we have the right disposition. Household of faith—Those who are the children of God.

IV. Glorying in the cross (vs. 11-18). The apostle expresses his determination to glory only in the cross of Christ. There were those who laid great stress upon the keeping of the law of Moses, and insisted that Gentile converts should conform to that law; but Paul maintained that the great essential to salvation was faith in the crucified and risen Christ, resulting in a new creation. He had suffered much for the sake of the gospel, and it is probable that the marks of which he spoke (v. 17) were the scars of wounds received by him from his persecutors. The cross of Christ had brought to Paul all that he had that he esteemed of real value. He could overlook the reproaches that had been flung at him. He could pass over lightly the physical suffering his persecutors had inflicted upon him. He could look with pity upon those who would cause him distress of mind. He set all those things down as accompaniments of bearing the cross of Christ. He could class them as "light afflictions." He could well afford to class them as incidents in his Christian life. The great things were the revelation of Jesus Christ that came to him, the transformation of his moral nature and life, the fellowship which he had with the Father through his Son and the hope of a glorious immortality. The work to which he was divinely called was a delight to him. He took pleasure in the hard things he met with in Christian service, for he was blessed with the consciousness of the divine favor and presence.

Questions.—From whose writings is the lesson taken? Where was Galatia? What object had the writer in sending this epistle to them? What duty do we owe to an erring brother? What is said about mutual helpfulness? How may one have true rejoicing? What parts of the lesson teach temperance? How are the terms "flesh" and "Spirit" used? To whom do we owe special duties? What rewards are promised? To whom are we exhorted to do good? Who constitute the household of faith?

PRACTICAL SURVEY.

Topic.—The Gospel Standard.

I. A life of active philanthropy.

II. A life of fellowship in Christ.

I. A life of active philanthropy. We have here presented the Christian's vocation. The measure of opportunity fixes the measure of responsibility. The work of the Christian resolves itself into the work of restoring the erring. It is the most delicate form of philanthropy to deal with a brother's sins. It requires an absence of self exaltation. It calls for self-humiliation and gentle dealing. The law of Christ is the law of universal love. It requires every man to be interested in other men and his difficulties. It is a law of compassion, universal, continuous, adequate, vital, active. It changes stern necessity into sacred duty. It requires a sympathy which overcomes evil and strengthens good. It is the law of co-operation, of mutual duty. Relationships to one another, with the possession of advantages and talents, involve manifold responsibilities. This law forbids all moral indifference to others, all severity and unnecessary censure. No one can fulfil the spirit of the law of Christ who does not dwell in the spirit of love. It must be a living principle and persistent habit, divinely begotten and sustained. The apostle was cautioning the Galatians against a vainglorious disposition utterly inconsistent with the possession of genuine Christianity. He was bringing before them the true standard of character, urging them to be seriously concerned about ascertaining their real condition before God, and to avoid the habit of measuring their own goodness by the lack of goodness in others. He urged that conceit was fatal to the duty of burden-bearing, that the greatest of all delusions was that which men voluntarily practised upon themselves. He urged that the man who labored most for the good of others was most effectually employed in training his own soul; and further, that the training of the entire being under the master impulse of love brought appropriate results in the proper time.

II. A life of fellowship in Christ. The apostle recapitulated in a few words the contents of the epistle, exhibiting the falseness of his Judaistic adversaries in a clear light, showing their dogmatic attitude their urgent zeal and the true motive of their conduct. The carnal, self-interested way in which they got over the offense of the cross was to insist on the circumcision of the Gentile converts. They hoped that by making them all Jewish proselytes they would secure Christianity from persecution. It was a policy of compromise, under the guise of philanthropy. Paul trusted in the cross of Christ for his salvation. He gloried in it as a marvellous exhibition of divine love, righteousness, power and wisdom. To him it was of no importance that men should be outwardly marked. He had received sufficient scars to place his relationship as a servant and apostle of Christ beyond all doubt. It produced strong emotion in Paul to know that the Galatians, among whom he had planted the standard of the cross, were trying to conceal its odium, if not to abandon it altogether. In the cross Paul saw the character and glory of God fully displayed. It had taught him his own wretchedness, and led him to abandon the way of righteousness by the law, and to trust in the atoning death of Christ for salvation, and to see that the new creation was the whole of religion, that the foundational fact in Christian life was regeneration, and that spiritual renewal sprang from union with Christ. Paul appreciated the efficacy of the cross. He recognized its claims. He was completely a new creature, with affections detached from the unholy and fixed on eternal prospects. He considered the change a sufficient vindication of his resolution that he would glory only in the cross. Its glory eclipsed every other object. The current of his affections was changed. His apostolic benediction was an outburst of a heart filled to overflowing with the spirit of impassioned consecration. It sealed all that preceded it. It was a wish that they might constantly and richly experience all the truths of the gospel and be led from external things to things spiritual.

T. R. A.

Bread is the staff of life, but lots of us subsist on pay-roll.

ODD DENIZENS OF THE DEEP

Some remarkable models of fishes that inhabit the great depths of the Atlantic, Pacific and Indian Oceans have just been put on exhibition at the American Museum of Natural History. Only two sets of these models have been made, one for the British Museum in London and one for New York. They are considered the most noteworthy contributions yet made to popular knowledge concerning the appearance, complicated structure and habits of the curious creatures that dwell from one to five miles below the surface of the ocean, in regions never penetrated by sunlight.

Among the queerest and most astonishing of them are the luminous fishes, which possess organs for projecting light—veritable electric light plants—The habitat of these extraordinary looking creatures is the deep sea floor, a vast region of everlasting darkness and eternal silence. At an average depth of two miles the sea floor forms an abyssal plain, 50,500,000 square miles in extent, or nearly half the surface of the earth. The fishes, of which models are shown, were captured and brought up to the surface from enormous depths in recent deep-sea explorations; as soon as they reached the vessel's deck was casts were made of them.

Notable researches of this kind have been made by the Albatross, controlled by the United States Bureau of Fisheries, Dr. Charles H. Townsend, now director of the New York Aquarium, commanded this vessel for a number of years on its voyages and made many interesting discoveries of the life of the deep. The British ship Challenger also made a notable cruise around the world for the purpose of deep-sea investigations. Its trip yielded larger results than any other single cruise, but the Albatross has made a far greater number of expeditions.

Among the foremost living deep-sea explorers are Sir John Murray, of England, the great authority on this subject, and the Prince of Monaco, who is one of the most active students and patrons of oceanography of today. He maintains the steamer Princess Alice, well equipped and specially designed for deep-sea exploration. He also has established an oceanographical museum at Monaco to exhibit deep-sea inhabitants.

Fishing at depths of from one to five miles, to bring up to the surface specimens of hidden inhabitants of the deep sea floor, is accomplished by means of a large trawl net about 15 feet wide and 25 long. This is attached to a steel wire cable wound on a drum and is let down to the desired depth. When it has reached the bottom the vessel steams slowly forward, dragging the net for many miles. Then by means of a steam windlass the net is drawn aboard the ship. In the net many curious fishes are caught as it drags along the bottom.

At great depths there is no movement of the water, no tides are felt. At the bottom of the abyss there is simply cold and darkness and perpetual silence. It is difficult to realize the immense pressure of such deeps; at a depth of 15,000 feet the pressure per square inch is two and a half tons, whereas on land the pressure is under 15 pounds per square inch.

The tremendous pressure of the water keeps the creatures developed in it from extending their range upward or downward. A deep sea fish rising above its depths is killed by the reduction of the outside pressure, its tissues swell, its blood vessels burst, its eyes are forced out. On the other hand, a fish sinking below the range to which it is accustomed is soon crushed or suffocated by the unaccustomed pressure. Sometimes the deep-sea fish, in a struggle with its prey, is carried above or below its depths, in which case both are destroyed.

When fish from the greatest depths reach the top they are always dead, having been killed by the change in pressure in the early stage of their upward journey. Many of the creatures from the depths are cartilaginous and do not have a bony structure. Nearly all the fishes have formidable teeth and are extremely voracious, with mouth of enormous capacity; in fact, some have stomach of such expansion that they can perform the astonishing gastronomic feat of swallowing animals larger than themselves.

Probably the most interesting and astonishing of the deep-sea dwellers are the luminous fishes, marvellously equipped with organs for projecting light. These light organs are a means of illuminating the dark abysmal regions which they inhabit and of enabling them to avoid foes, recognize their own kind and capture prey. Many of these fishes display curious eyelike organs down the sides of the body, forming as it were a series of miniature bull's-eye lanterns. Again, others possess light-emitting organs behind the eyes or on the head and shoulders.

Provided with lanterns or luminous spots, these fishes find their way in the great depths and plow through the dark waters like flaming torches. Some of the deep-sea fishes are provided with a rod which is hinged so that its tip can be swung immediately over its back or in front of the voracious mouth. At the end of this rod is a luminous lure. This decoy attracts other sea inhabitants, which are quickly engulfed as they approach this shining point. Thus the fishing rod is employed by the fishes of the deep.

The lamp is also used by the fish itself in pursuit of prey, throwing out a beam of light like a searchlight as it darts to and fro in the inky waters. Many of the fishes are totally blind; these fall easy prey to the hunter after being detected by the bright rays of the lure.

BEYOND THE SUN'S RAYS.

It has been found that at a depth of 3,000 feet the sun's rays cease to penetrate the ocean. The eyes of the deep-sea inhabitants have undergone some curious modifications. In the majority of cases it is found that the eyes are either very large or very small. A large proportion of the denizens of the deep possess either no eyes or eyes reduced to mere vestiges. The very large eye seems to represent an effort to make the most of what little light there is.

The deepest sounding so far reached on the ocean floor is in the North Pacific, near the Island of Guam, 5,269 fathoms, or 31,614 feet, or about 66 feet less than six miles. This enormous depth is 2,612 feet greater than the highest land elevation above the sea, that of Mount Everest, in the Himalaya Mountains, being 29,000 feet. These great deeps, as they are termed, vary in form and size. The Nares Deep, lying wholly in the Atlantic Ocean, north of the West Indies, is the largest. The floor of this deep sinks to 4,000 fathoms and is estimated to cover an area of 700,000 square miles.

The animal life on the ocean floor is enormous. Not all of the species have as yet been described.

SUNDAY AT HOME

WHATEVER IS—IS BEST.

I know as my life grows older,
And mine eyes have clearer sight—
That under each wrong somewhere,
There lies the root of Right;
That each sorrow has its purpose,
By the sorrowing oft unguessed,
But as sure as the sun brings morning
Whatever is—is best.

I know that each sinful action,
As sure as the night brings shade,
Is somewhere, sometime punished,
Tho' the hour be long delayed.
I know that the soul is aided
Sometimes by the heart's unrest,
And to grow means often to suffer,
But whatever is—is best.

I know there are no errors
In the great Eternal plan,
And all things work together
For the final good of man;
And I know that my soul speeds onward,
In its grand Eternal quest,
I shall say as I look back earthward,
Whatever is—is best.

—Ella Wheeler Wilcox

A SERVANT OF JESUS CHRIST.

Ye call me Master and Lord: and ye say well; for so I am.—If any man serve me, let him follow me; and where I am, there shall also my servant be: if any man serve me, him will my Father honor.—Take my yoke upon you, and learn of me; for I am meek and lowly in heart: and ye shall find rest unto your souls. For my yoke is easy, and my burden is light.

What things were gain to me, those I counted loss for Christ.—Being made free from sin and become servants to God ye have your fruit unto holiness, and the end everlasting life.

Henceforth I shall call you not servants; for the servant knoweth not what his lord doeth: but I have called you friends for all things that I have heard of my Father, I have made known unto you.—Thou art no more a servant, but a son.

Stand fast therefore in the liberty wherewith Christ hath made us free, and be not entangled again with the yoke of bondage. For, brethren, ye have been called unto liberty; only use not liberty for an occasion to the flesh.

AFTER THE WAR—WHAT?

There will be a harvest. Blood is the seed grain, mighty and eloquent. "The voice of thy brother's blood crieth unto me from the ground." The very earth responds the stars shudder; every drop has a tongue, full of pleading; vicarious, redemptive, restorative. The cry is not a death pang, but a birth throe. Out of the soaked earth shall come the fairest flower. Day is breaking, the dawn is rosy, mists are rising. The men to take hold are born and trained. The hour and the man shall meet and work.

Rulers have to unlearn; they have to pull down, and rebuild; even things of divine origin have to come down and be let go. The pattern shown in the mount was glorious, and God was King of Jeshurun. Men asked of Christ His authority. "Destroy this temple in three days." Why? Because it was the ministration of condemnation the ministration of death; it was a shadow of good things to come; it made nothing perfect; it was done away in Christ's finished work. The law of the prophets were until John, including John and his rite; now they are gone, and the candle is blown out of the lantern. Look at Christ's method of warfare. He did not come to fight men. He came to rescue men. He came to destroy the works of the devil, not to put men into the breach; not to array heavyweights against heavyweights, but to face superhuman powers with the havoc of rust and microbes, with the soft wing of the moth, with lice and frogs and locusts and caterpillars, and palmer work. "My great army," saith the Lord.

Look at this list of conquests: Slavery is gone, and witchcraft, and hanging for sheep-stealing. The throne of King Alcohol is tottering, and war is on the way to the pit of doom.

Christ was born under the hostile Roman, an alien flag flew over His head. His mother went to market with Roman coin in her pocket, and the tax gatherer was a Roman officer.

We claim the Carpenter of Nazareth as the model patriot, and if His patriotism differs from the modern type, so much the worse for the modern type.

Thirteen false Christs arose (so they say). They took the sword in hot blood. They perished with the sword.

Britain will alter her land laws, her game laws. Sir John Lackland will make room for the man with three acres and a cow. Woman will enlarge her powers of earning a living, and peace shall multiply her blessing a thousand-fold.

H. T. Miller.

Old Time Temperance.

Germany would seem to have given the lead in the matter of temperance societies. On Jan. 19, 1517, a man named Sigismund de Dietrichstein formed the Order of St. Christopher, and in 1600 the landgrave of Hesse formed the Order of Temperance, both societies aiming at the promotion of moderation. What moderation meant in bygone Germany may be gathered from the fact that members of the first order pledged themselves to abstain from toast drinking, while those of the second were pledged "not to drink more than seven glasses of liquor at a time and that not oftener than twice a day."

Shoulder of pork is delicious when stuffed. Buy a nice fresh shoulder, have the butcher bone it, then stuff it. Sew it up tight, roll it in a cloth and boil it two hours. Then remove the cloth from it, put it in an iron baking pan and bake it two hours.

HONESTLY BELIE
HE WAS GOING INT
CONSUMPT
DR. WOOD'S
Norway Pine Syr
CURED HIM.

Mr. Frank E. Anthony, 6 Street, Winnipeg, Man., writes: " taken several bottles of Dr. Norway Pine Syrup, during the weeks, to relieve a chronic cou general throat trouble, allow me press my unbounded satisfactio thanks as to its sterling qualities short time ago I became suddenly sub to violent coughing fits at night, directly after rising in the morning about an hour, and found I was gradu losing weight. All my friends chee informed me that I looked as th I were going in consumption, a honestly believed such was the However, after having taken sev bottles of 'Dr. Wood's' I am please relate that the cough has entirely appeared, along with all the o symptoms, and I have since regained lost weight. I have no hesitation recommending Dr. Wood's Norway P Syrup as a sure cure for all those troub in a like manner."

When you ask for "Dr. Wood's" that you get what you ask for. put up in a yellow wrapper; three trees the trade mark; the price, 25c 50c.

Manufactured only by The T. Mil Co., Limited, Toronto, Ont.

SAVE THE VOICE.

Do Not Sing Nor Talk When S fering From Throat Fatigue.

Fatigue injures the voice. Exce use of the voice weakens its curr power. From overuse or imprope of the voice a chronic pharyngi velops. Every one knows the toms of overuse of the voice. voice is husky, and its use is fol by distress. There is an increa secretion and a constant desire to clear the throat, and there are disagreeable sensations, as fullness, tickling and the like. After a long day of shopping, sightseeing or one's daily routine of work, it is quite common to be troubled by hoarseness, which does not indicate a "cold," but is merely fatigue of parts which produce the voice.

The muscular system all over the body is tired, relaxed. The throat, being a muscular structure, shares this fatigue, and it should never be used for any particular purpose, singing or reciting, until the whole body is rested. If one has arr to use the voice at the close of day or at any other time, it not be when suffering from fat

Public speakers and singer care of their voices and never ly use them long enough at a weaken them. Singing only one extra may hurt the voice once impair its clearness, and freq overdoing may result in a perman weakness. Rest before using voice and taking care not to use long when singing or speaking the voice and keeps it clear and and gives it carrying power.

HEROES AND GENTLEM

British Officer and Tommy Praised by a "Neutral" Soldier.

The following letter, which ed in the London Spectator, is young citizen of the United St fighting with the Allies: "I've be mixed up with the British soldiers some time now," he says, "and I you there is not a cleaner fighter better gentleman in the world the average Britisher. They how to win and they know how lose. They never forget they gentleman, no matter what they and they have the courage that kn no ending. Napoleon said, 'The British nation is a race of lions led asses,' and he was quite right as the nation. They are thought snobs, but I admire them. I have seen the snobs out in France, braver men nor truer gentlemen ne lived. They share the hardships the men and never ask them to what they wouldn't do themselves. The men worship them, and will follow them anywhere. I have witness a German officer leading men in a charge. They follow But the British officer always his men, and so does the French

"For an example of the av British officer, let me tell you company commander, Lieut. Scott was only a boy of twenty, and a di descendant of Sir Walter Scott. was an only son of one of the pr est families in Scotland. When was any risky work would not shift it off onto a serg or corporal, but would ask for teers, and when he had those he w ed would lead himself. His unfli ing devotion to what he consid his duty and quiet courage in the formance of that duty was some beautiful to witness."

Was Not Much of a Belie
in Patent Medicines
But Milburn's Heart and Ner
Pills Are All Right.

Mrs. Wm. McIlwain, Temp Vale, N.B., writes: "I am not muc believer in medicines, but I mus Milburn's Heart and Nerve Pills ar right. Some years ago I was tro with smothering spells. In the ni would waken up with my breath all and think I never would get it back was telling a friend of my trouble, a advised me to try Milburn's Heart a Nerve Pills. He gave me a box, a had only taken a few of them when I c sleep all night without any trouble did not finish the box until some after which I felt my trouble com back, so I took the rest of them and they cured me."

Milburn's Heart and Nerve Pills have been on the market for the twenty-five years. The testimony of the users should be enough to convince you that what we claim for them is true. H. and N. Pills are 50c per box, 3 boxes for $1.25; at all druggists or dealers, mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

CTION TO CAPACITY.

rmer justified in believing a firm tone of the horse market h present high prices for live eat upon a secure foundation? look forward with any con- to the next season's or next arket? Should he prepare, as in advertised shortage and lem for all classes of farm , by breeding a larger num- mares or of cows, sheep, hogs ltry? We are confident that mer has never been in a more position than the present, as the extension of his breeding ations, but, to enable him to form easily his own conclusions, the wing facts are submitted:

nce the outbreak of the war, the tish Remount Commission has chased in Canada 15,000 horses; have been bought by French ractors and 25,000 by the Cana- Department of Militia. The De- ment of Militia is now engaged in ing an additional thousand head. British Remount Commission has chased over 200 since March and uying daily in Montreal. French ractors are anxious to obtain sup- s and are arranging to buy all that available both in the east and in west. It is understood that, as a lt of the purchases already made, buyers are finding it increasing- fficult, both in United States and anada, to readily secure the num- of horses which they require, par- arly of the type suitable for y cavalry or heavy artillery.

addition to the purchases for account, commercial activity two distinct quarters has ex- a very evident influence upon anadian horse market during the three or four months. Since the nning of the year, 6,000 horses ched the Winnipeg Stock Yards m Eastern Canada, and 6,917 were ped from the same yards west- d, mostly to Saskatchewan. Dur- the months of January, February March, 1,605 horses were ex- l to the United States. A few red more went forward to the market in April. The horses ex- d were good farm chunks weigh- 1,300 to 1,500 lbs. As high as $500 ir was paid for animals possess- g extra quality and confirmation. his new movement in the horse mar- et is having its effect upon prices ll over Canada.

Buyers report that the better classes f drafters and farm chunks are get- ng scarce and hard to buy. The same olds true of good big roadsters and addlers. The noticeable scarcity of ood horses of these descriptions il- ustrates the fact that demand has al- eady overtaken supply and makes it ry evident that all the really good und mares in the country should be ed this year. It cannot be too ongly emphasized, however, that should be mated only with strict- igh class sires. The number of es rejected by army buyers clear- dicates that there is no place for nsound horse or for the misfit. nimals have been, are now and ys will be a drug on the market. to the best if you would have m. Unsound or malformed mares ket as bad as unsound stallions. s easier to raise a good animal an a poor one. Manage the work spring in order that the best mare the farm may be regu[illegible] return- the horse. Next year, a good lot of sound, healthy colts will be good as a bank account. Canada is ly to enter shortly the commercial t market, and that market will quire all you can produce.

REVENTING MOTTLED BUTTER.

Mottled butter, though it may be very good flavor, is strongly dis- minated against by the purchaser. this is a defect of workmanship, can be overcome by the application proper methods on the part of e buttermaker.

Mottles are caused primarily by an even distribution of salt in the ter. This may be produced by in- ficient working of the butter or churning, washing, and working at a very low temperature, or by ing or working it at a tempera- e lower than the churning temper- ure.

When the quantity of butter made one churning is much less than al, it is necessary to work it a eater number of revolutions of the urn than usual in order to produce same results on the butter.

Extremely low temperatures should avoided, because they pro- ce so firm a butter that it is only th great difficulty that the salt be worked uniformly into it. gh temperature of churning, shing and working must also be avoided to prevent an abnormal loss of fat in the buttermilk and also the making of greasy, leaky butter.

Great variations in temperature during the manufacturing process should always be avoided. Under normal conditions the temperature of the wash water should be the same as, or within two degrees of, that of the buttermilk.

When the churn room is so cold that the butter becomes chilled before working is completed, mottled butter is frequently the result. To prevent this it is preferable to increase the amount of working rather than to raise the temperature of the wash water.

Mottled butter, then, may be prevented by using methods that will insure a uniform distribution of salt.

TO TELL WHEN IN CALF.

Someone was asking how, by the taste of milk, to tell where a cow was in calf. Here is a way we have used for some time, without failure.

Take a glass of clear, cold water and from the end of a straw or knitting needle, drop a drop of fresh milk into the water. If not in calf, the milk will at once mingle with the water and make it milky, but if in calf, the milk will go in a string in a spiral shape to the bottom of the glass, and the farther on a cow is in calf, the heavier the string and the more noticeable it is, but it can be detected even after the first few months. For an inexperienced person it is well to take the milk of a cow known to be not in calf and compare the results.—H. S.

NOTES.

Barnyard manure is the most effective of all fertilizers. The liquid portion of the manure is the most valuable. Use sufficient litter in the stables to absorb the liquid. The amount of manure on a farm being insufficient, frequent light dressings are advisable instead of larger ones at longer intervals. It is not wise to "bury" the manure; a shallow plowing under is more advisable. Manure is worth more when first voided. Rational farming involves a rotation of crops. Investigation has proven the high manurial value of clover, alfalfa and other legumes. The lesson is: Grow a leguminous crop in the rotation, as all other crops, save the legumes, leave the soil poorer for their growth. Commercial fertilizers cannot be depended upon profitably to maintain the soil; hence their exclusive use is discountenanced. By home mixing of fertilizers a saving of 25 to 33 per cent. can be effected.

To meet the fertilizer requirements of tomatoes, use a fertilizer carrying 4 per cent. of nitrogen and 8 per cent. of phosphorus. The lack of potash is not going to cause much inconvenience. Plenty of humus will help make potash in the soil available. We want to grow vigorous plant first, then plan to grow fruit. Stable manure is a good source of nitrogen for tomatoes. It should be well rotted when applied and well incorporated with the soil, or the crop in advance of the tomatoes given a heavy manuring. Tomatoes want a good amount of nitrogen early in the season.

The Iowa Experimental Station has made investigations covering three years, to determine the effect of solutions of formaldehyde and corrosive sublimate, and also of formaldehyde gas treatment on the germination of potatoes. The station found that where whole potatoes are treated with formaldehyde at the rate of one pint to thirty gallons of water, or corrosive sublimate solution, two ounces to sixteen gallons of water, no harm will result if the tubers are soaked from two to six hours. If the tubers are left in the solution for longer periods, or are not spread to dry immediately, the germination of the tubers is considerably diminished. It is well to remember that the tubers should be soaked in the formaldehyde or corrosive sublimate solution before cutting.

MODERN WIRE ROPE.

Mathematical Precision Rules Every Process in Its Making.

Although wire rope has been used as a mechanical appliance for almost 5,000 years, it is commonly regarded as a modern invention. During the many years which have elapsed since the first records of its use wire rope has passed from a crude to a highly developed product, and the purposes for which it is employed have increased a thousandfold. In no other branch of the American steel industry is there so great a demand for material of proved integrity, for it might be safely suggested that wire rope is born to be abused. It is subjected to tremendous tensile strains; it must withstand constant bendings, abrasion, corrosion and the peculiar internal stress produced by vibration.

Wire rope as it is made to-day is the product of the metallurgist and the mechanic. Every process, from the smelting of the ores, the cold drawing of the wire and the heat treatments it receives down to the stranding or laying up of the cable, is conducted with mathematical precision.

The chemist sees that only steel of the proper analysis is used; the electric pyrometer insures uniformity of heat; treatment in various testing machines clearly develops the worth of the product before it is allowed to leave the mill. Wire rope is used in the mine shafts more than a mile in depth, and may be found on aeroplanes which sail a mile or more above the ground.—Technical World

"The All-Purpose Sugar"

When Fashions Lasted for Years.

In times past a fashion lasted with slight modifications for years. Much the same fashion continued through the long reign of Louis XIV., and another through that of Louis XV., while the ladies of the middle ages never thought of varying their costumes. As for the Greeks and the Romans, generation succeeded generation with little change in female dress, and yet all these ladies of the past were more artistically dressed than those of to-day. Many no doubt spent more than they could afford, but when they had a costly dress they kept it and did not throw it away to replace it with another.—London Truth.

Hawaiian Guitars.

The manufacture of ukuleles is one of the industries of Hawaii. Early in the eighties Portuguese immigrants from the Madeira Islands arrived in Honolulu, many of them bringing what appeared to be a very small guitar. It was played by holding it close to the body, the fingers of the left hand grasping the neck and the fingers of the right hand sweeping the entire set of strings. The rapidity of the motion with the right hand caused the Hawaiians to call the instrument "ukulele" or "dancing flea."

He is Just One More of the Many

WHO HAS FOUND NEW HEALTH IN DODD'S KIDNEY PILLS.

Philip McLeod Tells How He Suffered From Kidney Trouble for Years and Found a Quick and Complete Cure in Dodd's Kidney Pills.

Tarbot, Victoria Co., C. B., June 5—(Special)—Philip McLeod is just one more of the many residents in this neighborhood who have found new health in Dodd's Kidney Pills.

"I have used Dodd's Kidney Pills with great success," Mr. McLeod states. "For years I had kidney trouble and could get nothing to help me. Hearing of what Dodd's Kidney Pills have done for others led me to use them. Five boxes cured me completely.

"I have recommended Dodd's Kidney Pills to many people. I cannot speak too highly of them."

The testimony of people who have been cured is better than all the theory in the world. Dodd's Kidney Pills are purely and simply a kidney remedy. If you have kidney trouble all you need to do is to ask others. They will tell you that Dodd's Kidney Pills will cure you.

They will also tell you that Dodd's Kidney Pills cure rheumatism, dropsy, heart disease, diabetes, gravel and Bright's Disease. That is because all these diseases are either kidney diseases or are caused by diseased kidneys.

Clever Pigeon.

A planter in South Carolina writes that he once saw a hawk dart into a flock of pigeons, but miss his strike. The pigeons scattered and the hawk singled out one for pursuit. The pigeon rose to a great height, always keeping above the hawk to prevent it from striking. When the pigeon got directly over an old horsepower gin house it suddenly darted by the hawk and came groundward like a shot, in line a few feet from the side of the ginhouse. The hawk pursued, and like two streaks they came down. Eight feet from the ground the pigeon swerved aside under the ginhouse. The hawk fell headlong to its death on the ground.

A TEAPOT TEST

will convince you of its sterling merit. Let us send you a trial packet at the same price you now pay for ordinary tea. Black, Mixed or Green. Address Salada, Toronto. B 192

SALT AS A LUXURY.

In Most European Lands It is Dear and Used Sparingly.

Along many parts of the Brittany coast where the land is low you may see the sea salt industry being carried on on a large scale. In the United States salt is cheaply produced at inland points by evaporation from salt water pumped from deep wells, but in most of the countries of Europe the bulk of the salt which is consumed is made by the evaporation of sea water.

Sea salt is not so pure as salt which is produced from wells, as it contains a percentage of salts of magnesium, potassium and lime, with traces of iodine and other elements, in addition to the sodium chloride, which is the desired substance. But it answers the purpose about as well.

The sea water is let into great shallow basins or ponds at high tide, the flow being controlled by gates. The sun, which shines very powerfully on the south Breton coast, gradually evaporates the water, and the brine becomes constantly stronger. More water is let in from time to time, until a certain point of saturation is reached, and then the water is allowed to dry up, and the salt is left heaped as a thin crust or coating on the bottom of the ponds.

The salt is then gathered by means of rakes and scoops. In this form, of course, it is very impure, for in taking it up a large amount of dirt is taken up with it. It is piled up, and in due course the action of the rain and weather serves to filter out most of the dirt, and the salt is left in fairly pure condition.

As you go along through the salt districts you will see hundreds of these white piles of salt, containing perhaps a ton or so each. The crude salt is finally taken to mills, where it is put through refining processes and made ready for market.

Salt brings high prices in most European countries. It is such a luxury that the people have to be sparing of it. You might wonder why this is when Europe has such a huge coast line and all that is necessary is to let the sea water evaporate under the influence of old Sol to produce all the salt any one could want.

But here is where the law steps in. The Government assumes that the sea is its property, and it will not allow ordinary citizens to make salt from it or in fact make any other private use of it without a license.

Poor fishermen in Turkey were put in prison because they boiled sea water and made their own salt. This illicit making of salt was against the law, just as the making of spirituous liquor without a proper license from the Government is against the law in this country.

The Heat of Australia.

Australia is the hottest country on record. I have ridden for miles astride the equator, but I have never found heat to compare with this. Out in the country in the dry times there appears to be little more than a sheet of brown paper between you and the lower regions, and the people facetiously say that they have to feed their hens on cracked ice to keep them from laying boiled eggs.—Sydney Telegraph.

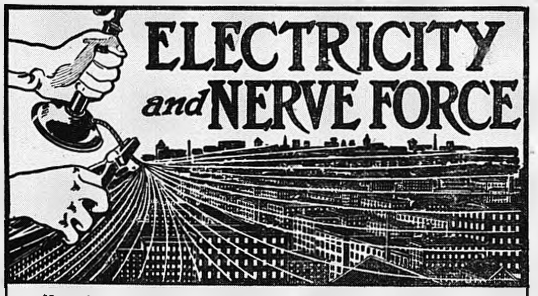
Drooping, Tired, Weary, Try This Remedy!

Don't give in to that depressed, played out, don't-care sort of feeling. Better days are ahead. Cheer up, do as the other fellow is doing, tone and strengthen your blood, and you'll feel like new again. You'll dance with new-found energy once you use Dr. Hamilton's Pills. They will quickly fill your system with energy, bring back the old appetite, restore that long lost complexion, make you feel like a kid again. A wonderful medicine, chocked full of health bringing qualities. You need Dr. Hamilton's Pills. Get a 25c box to-day, at any dealer's.

The Giant Bible.

There is in the royal library at Stockholm among other curiosities a manuscript work known as the giant Bible on account of its extraordinary dimensions. It measures [illegible] centimeters in length and is 50 centimetres in breadth that is about [illegible] by [illegible] inches. It requires three men to lift it. There are [illegible] pages, but seven have been lost. The parchment of which the book is composed required the skins of 160 asses. There are two columns on each page, and the book contains the Old and New Testaments, with extracts from Josephus. The initial letters are illuminated. The binding is of oak, four and one-half centimeters in thickness.

ELECTRICITY and NERVE FORCE



Nerve Force is so much like Electricity, and the latter is so much better understood, that we have used this vivid telephone picture to illustrate what takes place in the human system when the connecting nerve fibres are deranged or something goes wrong at Central.

In the nervous system the brain is the Central where the Nerve Force is created, and whence are issued the orders which control the whole human body. Here is consumed one-fifth of the blood in the human body, and when the blood supply is deficient in quality or quantity, the brain and the nervous system are first to feel the effects.

Neuralgic pains and headaches, inability to rest or sleep or concentrate the mind, dizziness and noises in the ears, are some of the symptoms of a starved nervous system.

Just as machinery lags when the current of electricity fails, so the bodily organs weaken when the supply of nerve force runs low. Digestion is impaired and you lose appetite, the liver, kidneys and bowels are slow in performing their functions, the heart's action weakens, circulation is slow, hands and feet are cold, you are easily tired, lose ambition and grow downhearted and discouraged.

This describes the condition under which Dr. Chase's Nerve Food can prove of greatest assistance to you. Forming new, rich blood it feeds the starved, exhausted nerve and brain cells back to health and vigor. The new vital, nerve force flows out through the intricate system of nerve fibres to every member and every organ of the body, carrying new vigor, energy and strength and driving out pain, weakness and disease.

50 cents a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations disappoint.

ANOTHER VERSION.

(From Sydney Bulletin)

I didn't raise my boy to be a soldier,
I want another's boy to fight for me;
I'd rather know another's heart is bleeding
That I may live in sweet security;
I don't care if my neighbor sends a dozen,
Provided of my brood there isn't one
Who goes to face the shrapnel for his mother—
I didn't raise a soldier in my son.

And if the foe should level our defences,
And pour their spoilers in our little town,
And give the houses up to fire and pillage
With no respect to babe or woman's gown;
When I am rudely handled by the butchers,
And shrieks announce "The ravishing's begun,"
My boy can lie concealed within a garret—
I'd never seek protection from my son.

But if the troops again return triumphant,
With victory like an eagle on their crest;
I'll sing in joy (and he will sing beside me)
"We didn't do our duty with the rest!"
We share, of course, the freedom they have gained us,
And glad are we of all the boys have won,
But as to risking him—Oh, no! my neighbors,
I didn't raise a soldier in my son!

Corns Cured Quick Applied in 5 Seconds

Sore, blistering feet from corn-pinched toes can be cured by Putnam's Extractor in 24 hours. "Putnam's" soothes away that drawing pain, eases instantly, makes the feet feel good at once. Get a 25c bottle of "Putnam's" to-day.

AMUSING POLITENESS.

When a Couple of Natives Pass the Time of Day in Japan.

I had always heard that there was lots of politeness in Japan, but I had hardly expected to find that it often blocked traffic. When two Japanese meet on the narrow streets you've got to wait until the ceremony is over or go around. On meeting they do not shake hands and have it over with, as we do back home, but begin bowing and each asking the other the latest news from his worshipful ancestors. It would be an open insult—smack in the face—for one Japanese to meet another without asking him how his ancestors fared. Their ancestors are always an open subject for discussion. A Jap is never too busy to engage in conversation about his dear, departed forbears. The weather can look out for itself. The gripping topic is how some of the ancestors are getting along who passed to their reward a couple of hundred years ago.

When two Japanese meet they stop squarely in the middle of the street and begin bowing. Their bow is not just a twitch of the head. Instead of that, it begins at the waist, sweeping over the entire upper part of the body, even to the outlying hands, bending the figure over until it looks like a great inverted V teetering for a moment on one prong. There are traces of the colonial in their bow, with a pronounced military strain running through it.

When they are doubled over one of them says to the other, "Oh, honored sir, to what do I owe my great good fortune that I have the pleasure of meeting such an esteemed man this day?"

The other man, with his head down, comes quickly back with: "You do me a great honor with such words, and I only wish that I were worthy of them. May I crave your indulgence while I ask how your stomach finds itself this evening?"

The first concern on one Japanese on meeting another is to know how the other's stomach fares, and after this momentous question is settled they pass on to their ancestors, who while the conversation is on the stomach have to take a back seat.

The Vampire Bat.

The true vampire bat is a quite insignificant creature, not unlike our noctule bat in general appearance and size, but with a small "nose leaf" and no web between the hind legs. The really remarkable thing about it is its perfect adaptation for secret and painless bloodletting. Most bats have teeth very like those of the carnivora, with long canines and small incisors, but in the true blood sucking vampire bat the incisors are very large and broad and exceedingly sharp edged, thus being able to inflict a shaving surface cut which causes no pain, but a great deal of bleeding. Indeed, not only does the winged bloodletter's attentions, but a bite may be inflicted unfelt on a person who is awake at the time.—London Graphic.

FAT STOCK SHOW

The management of the Toronto Fat Stock Show announce their intention of holding a show at the Union Stock Yards, Toronto, Dec. 8th and 9th, 1916. We understand the prize list will contain many new classes, and offer some handsome prizes to breeders and feeders of cattle, sheep and hogs.

Mrs. Talkalot—What I have just told you is a great secret. It was told to me in confidence. I must caution you against repeating it. Miss Cautique—I shall endeavor to be just as cautious as you are.

SEVENTH ANNUAL
TORONTO FAT STOCK SHOW
WILL BE HELD AT

VANISHING GOLD.

What Has Become of All That Metal That Has Been Mined?

What becomes of gold?

Where is all of that yellow metal that has been mined?

It is one of the oldest metals in human use. There are gold beads dating back to the stone age. It is an object of almost universal desire. It is proof against almost all the influences which destroy other metals, and it has been mined in enormous quantities. Yet to-day more than two-thirds of the gold in use has been dug since 1849.

What becomes of the rest? Where is the gold that set Jason wandering into the Black Sea, that filled the treasuries of Croesus, that paid the terrific tribute which Persian kings assessed against the Punjab? What has happened to the yellow dust and "electrum"—an alloy of gold and silver—which negro traders brought down the Nile to Egypt for 4,000 or 5,000 years? Ancient gold like that of modern times was used for money and for ornaments, but both have disappeared. Where?

The most enduring of metals and yet the most evanescent, perpetually sought and yet constantly escaping the hands of even the successful seeker—that is gold. What is the reason for its curious elusiveness?—Chicago Journal.

Weak, Sickly Folks Regain Health Quickly By New Remedy!

A Blood-food Now Manufactured That Accomplishes Marvels.

Lots of people that were thin and miserable for years have recently been restored by this simple treatment. All you have to do is take two little chocolate-coated tablets with a sip of water at the close of each meal.

The tablets, which, by the way, are called "Ferrozone," are in reality a perfect food for the blood. They contain exactly those elements your blood lacks when it becomes thin, weak, and unhealthy.

This is just the time to use Ferrozone: it excites splendid appetite, gives digestion splendid aid, supplies nourishment for all weak organs. At once you feel buoyant and strong. Nutritious blood courses through your veins, supplies strength, makes you tingle with animation and ambition.

No more headaches.

None of that tired languor.

You feel like doing things because Ferrozone completely renews and strengthens your whole system.

No medicine on earth gives such quick, lasting benefits as Ferrozone. It has raised thousands from downright weakness, brings robust health simply because it contains the fortifying elements that run-down systems require.

One week after using Ferrozone you'll feel like new, you'll appreciate what real robust health means, in a month you'll scarcely credit the push your vigor and spirits have received. Ferrozone is more than a tonic because its work lasts, its benefits remain and are not temporary. It restores health where other treatments fail, and should be used by every man, woman and child. Try it, 50c per box or six boxes for $2.50. Sold by all dealers or by mail from the Catarrhozone Co., Kingston, Ontario.

The Norwegian Costume.

It is at church in Norway that the national costume is best seen. In the north the women wear short dark gowns, with fringed handkerchiefs tied becomingly over their curly fair hair, black ones for the matrons and white ones for maidens. In the south the old Norwegian dress is often worn. It consists of a short dark petticoat, with a stripe of bright colors, a full white blouse and a red bodice heavily embroidered, while on Sundays a quantity of silver pins and chains are added. The headdress varies according to the occasion and the wearer's social condition. The girls wear jaunty red caps, the married women a coif made of many folds of starched white linen, plaited over a wooden frame, and a bride wears a high metal crown curiously chased and set with jewels.

It is just as well to parade your intelligence, especially if you want to escape jury duty.

OTHER PAPERS VIEWS

THE LADIES' COSTUMES.

(Rochester Herald)

"Women's wear quiet," says the Dry Goods Economist. Shucks! it's the noisiest thing on the sidewalks.

OR IS IT BULGARIA'S TURN?

(Montreal Mail)

All on board the French ship Mira were lost when she sunk in the Mediterranean. Turkey did this, no doubt.

STRANGE.

(London Advertiser)

Strange those American senators who are horror-stricken by the execution of Irish rebels had nothing to say when the Lusitania was sunk.

TOO BAD.

(Toronto Telegram)

Too bad that the health of Hon. Col. J. Wesley Allison is so uncertain. Otherwise Col. Allison might take over the succession to Sir Robert Borden if Sir Robert should renounce the privileges as Sir Robert long since renounced the powers of the premiership.

INCONSISTENT LARKIN.

(Rochester Post-Express)

Mr. Jim Larkin had his say, but put the auditor out who wanted to express his opinion. What Jim objects to in England is that there is no freedom of speech.

THIS EDITOR IS MARRIED.

(London Advertiser)

A rebuke from his sweetheart is said to have caused a young man to commit suicide in Detroit. Had he married her, she would soon of have been a widow, if he had remained so sensitive.

NOT BRITISH.

(Montreal Star)

Under-Secretary Tennant does not need to assure the British House that German prisoners in England would not be starved in reprisal for German treatment of British prisoners. That sort of thing just "isn't done" in Britain.

WOULD HELP EVERYBODY.

(Toronto Telegram)

An hour's extra daylight at the close of the working day would "increase the pleasures of everybody, and decrease the pleasures of nobody." There seems to be no good reason why the hands of the clock should not be pushed forward an hour so as to make the most of the daylight.

AN OPTIMIST.

(St. Thomas Journal)

At any rate there is no excuse for being dirty in these days of continual rain.

UNFAIR TO ITS FRIENDS.

(Cincinnati Times-Star)

The German Government is not fair to German-American editors. After the latter had become thoroughly convinced that the Sussex was not torpedoed by a U-boat, along comes a specific confession from Berlin.

A REVERSED RALLYING CRY.

(Toronto Star)

Canadians who wish to put in tenders for fuse contracts seemed to find the Shell Committee resolved to "have no truck or trade with Canadians."

THE DOC. IS WRONG.

(Ottawa Citizen)

Dr. Sargent, Harvard's physical director, says that fat is uninvested capital. The doc. is wrong. Most of the fat ones sported by the citizens of Milwaukee, Toronto and such places represent a lot of invested funds.

WORSE THAN DISHONESTY.

(Toronto Telegram)

If a country could escape disasters that can be traced to WELL-MEANING VANITY, INCORRUPTIBLE STUPIDITY AND UNPURCHASABLE INCAPACITY in public office the tragedies wrought by dishonesty in public office would not be worth mentioning.

WHEN EXTREMES MEET.

(Guelph Mercury)

A Philadelphia despatch says that this summer women will wear abbreviated hosiery that will just meet the hem of the dress. We don't just get this. Unless they change the cut of cuttin' of the skirts, the stockings will still have to be tolerably long.

HIDING BEHIND THE FLAG.

(Ottawa Citizen)

The fact is becoming painfully apparent that so many secrets and individuals are hiding behind the old flag that even the casual observer is becoming suspicious that some have no business there at all.

WILL HELP FATHER.

(Guelph Herald)

This scheme of putting the clock one hour ahead will commend itself to the fathers of marriageable girls, whose admirers are in the habit of staying too late at nights.

TOO LATE FOR SERVICE.

(London Advertiser)

President Wilson hopes the United States after war, will be able to lift up a symbol of the "still small voice of humanity." It might have been more impressive if it had come when Belgium was invaded.

THE PECULAR THING.

(Pittsburg Gazette-Times)

Now cometh from the valleys fair
And from the mountain tops
The joyful news of bumper pear
And peach and apple crops,
The which are like the one we lost
Some thirty days ago,
When all were slaughtered by the frost
Or perished in the snow.

NEEDLESS WORRY.

(Montreal Star)

The man in charge of the British censorship says he does not want too much praise bestowed on the system by London correspondents, and that would seem to be the one sure thing on earth about which he would not need to worry.

CASEMENT AND LARKIN.

(Chicago Tribune)

Mr. Larkin, we believe, had a good deal to do with starting the trouble in Dublin. Sir Roger Casement also had something to do with it. If one wished to note a difference between Casement and Larkin it might be said that Casement went to Ireland when the time for effort came.

GET TOGETHER, GENTLEMEN.

(London Advertiser)

Is it not time that the "big orators" of both parties should join to arouse the nation? Sir Wilfrid Laurier has given the lead by resolving again to carry the cross of fire into Quebec. Could not Sir Robert Borden join him? Why should not Foster and Graham, Meighen and Clark, Carvell and Cochrane go out as "teams" to show that they have ideals about their politics? It would hearten the people and increase respect for their leaders.

THE "AIDING GERMANY" SQUEAL.

(Ottawa Citizen)

It would be instructive if some of our Canadian legislators would take the British statesmen as prototypes in this matter at least. The British leaders seem to take refuge behind such paltry and insincere pleas that free and beneficial discussion of army matters must not be permitted because of the comfort and information that might be given the enemy. The British public would laugh out of public life any representative who would advance this as a reason for not doing his duty by his constituents and his country. But perhaps this is only something we do better over here. At any rate most of our alleged statesmen appear to think so.

LETTER FROM WEST

Old Bruce Boy Describes the District Around Kindersley

The Telescope received the following interesting letter from one of its readers, Mr. H. A. Keyes of Kindersley, a former resident of the neighborhood.

Editor Telescope:—

Dear Sir:

I am going to try to describe Kindersley and the surrounding country now if possible.

Kindersley is located one hundred and thirty miles from Saskatoon in a south western direction and is on the Goose Lake line of the Canadian Northern Railway, which runs from Saskatoon to Calgary. It is right in the heart of the famous Goose Lake country, which is noted as one of the finest farming localities in the west. It is a famous wheat growing country also noted for flax on the first breaking of prairie. Wheat has yielded as high as sixty bushel per acre which of course is an exception, and flax has been known to go over thirty, while about twenty bushel is an average crop. Oats and barley also yield excellently.

The land varies in nature here according to locality. The land around Kindersley is very heavy, and requires considerable power to plow. From four to five horses are used on a fourteen inch sulky plow. Considerable farming is done in this part by gasoline tractors, but they do not seem profitable to the small farmer. One engine near here seeded 410 acres in a little less than four days, and was handling seven drills. The land is level in places and other places rolling, which is not a fit place to work tractors on. North west of Kindersley is a tract of country which is of a lighter nature. This land is located between Smiley on the Grand Trunk Pacific and Pinkham, which is two stations west of Kindersley. This light land is earlier, both seeding and harvest time, but the yield on a good year is not so high as on the heavy land. But it does not require the same power to work it.

The land in this district is farmed on the dry farming scale. Two crops are generally taken then summer fallowed. Stubble is rarely plowed in the fall on account of never having proved successful.

The people of the Kindersley locality are of various nationalities, but are a very fine class of people. Many of them originate from Ontario and the United States.

The seeding operation of the present spring is almost at a close. At time of writing, a small quantity of flax and oats are to sow yet throughout the district. Wheat has a uniform start this spring and we have ample moisture to last for some time.

Wages are very high here this summer and many men will be required in this district this coming fall, if there is a crop.

People intending to come west this harvest would not do better than to come to this part. Either C. N. R. from Saskatoon or G. T. P. from Biggar to Loverna, take you into the famous Goose Lake Country.

Yours sincerely,
H. A. Keyes.
Box 219, Kindersley, Sask.

DIED AT OTTERVILLE

Mrs. Donald McKay was Resident of Walkerton Thirty-five Years.

The death occurred at the home of her daughter, Mrs. Robt. Thompson at Otterville on Friday of Mrs. Donald McKay, in her eighty-fourth year. Mrs. McKay had been a resident of Walkerton until about four years ago, and was well known and highly respected here. She was born in the North of Ireland, though of Scotch descent, and came to this country with her people while yet a bit of child, setling near Aurora in King Township. After her marriage she came to Walkerton, her husband being for many years a member of the high school staff. He predeceased her about twenty years ago. Mrs. McKay was a motherly body, devoted to the home and here her family grew up around her. She was a member of Knox Church and a woman of sterling character. The family who survive are: Mrs. Jos. Wallace of Walkerton; Mrs. John Wallace of Paris; Mrs. Davis of Listowel; Mrs. Upton and Mrs. Smith of Dryden; Mrs. Robt. Thompson of Otterville; S. H. McKay of Brandon, Man.; Donald McKay of Toronto; Karl McKay of Walkerton. The remains were brought here for burial on Sunday afternoon, service being conducted by Rev. Thos. Wilson, pastor of Knox Church.

THE WESTERN FAIR

The Grounds and Buildings at Queen's Park, London, are being put into shape as rapidly as possible for London's great Exhibition to be held this year, September 8th to 16th. The entire park has been in use by the Military authorities since last September and a lot of work will have to be done, in order to be ready for the Exhibition. The fine new steel Grand Stand will be in readiness to accommodate the large crowd expected. The management have under consideration the installation of a new system of admission turnstiles for both outside gates and Grand Stand. The amusement programme this year will be the best possible to secure and the Midway will be away above the average. There will be two Speed events each day and it is expected that the entire programme both afternoon and evening, will be the best ever offered. Prize Lists, entry forms and all information given on application to the Secretary, A. M. Hunt, London, Ont.

Bruce Preparedness League

Minutes of a meeting of citizens of the County of Bruce held at the Court House, in Walkerton, called pursuant to a circular of Judge Klein to form a Patriotic League in the County of Bruce.

The following gentlemen were present:—

C. M. Bowman M.P.P., Major Eckford, Dr. Laird, Southampton; Reeve Cass, Elderslie Tp.; Reeve McDonald, John Purvis, Kinloss Tp.; Reeve McDonald, Allen Nelson, Norman McDonald, Tiverton; Reeve Johnston, Bruce Tp.; Mayor Baines, Sheriff Jermyn, Reeve Kaster, Ex-mayor Tyson, Ex-mayor Symons, Postmaster Allen Martin, Wiarton; H. A. Vandusen, C. E. Start, Jas. A. McDonald, Tara; C. J. Mickle, Dr. Biehn, Chesley; Ex-warden Shoemaker, Hugh McKerracher, G. L. Carter, George Welsford, Paisley; W. D. Cargill M.P.P., Reeve Phelan, S. Hawthorne, David Pinkerton, Albert Pinkerton, Senator Donnelly, Greenock; Lt.-Col. Clark, Mayor Miller, County Clerk Malcomson, Ex-mayor Patterson, R. J. Stewart, Reeve Hunter, Dr. Bruce, Kincardine; Reeve Nesbitt, Ex-Reeve McCallum, George Sirrs, Brant Tp.; Rev. James, Lionshead; Ex-Reeve Campbell, Hepworth; Reeve Filsinger, Carrick; Warden McNabb, Crown Attorney Dixon, Judge Klein, Judge Gregg, W. H. McFarlane, D. McKechnie, Major Henderson, C. W. Cryderman, A. Wesley, Rev. Perdue, County Treasurer Robertson, James Warren, Duncan McKerracher, G. S. Schwindt, Walkerton; Reeve Christie, Ex-Warden McCannel, Saugeen Tp.

Moved by Sheriff Jermyn, seconded by Mr. H. A. Vandusen, that Judge Klein be the chairman of meeting.—(Carried).

Moved by Reeve Johnston, seconded by Ex-Warden A. McCannell, that the Warden, A. E. McNab , be the secretary of the meeting.

The Chairman and a number of others addressed the meeting in favor of forming a league along the lines afterwards adopted by the meeting.

Letters were read from the Toronto Speakers' Patriotic League, Kent County Recruiting League, and from a large number of prominent men of Bruce expressing their sympathy in favor of a League in Bruce and their regret of being unable to attend.

Moved by Sheriff Jermyn, seconded by Ex-Warden Shoemaker, That this meeting do heartily agree with objects set out in circular letter sent out by the Chairman some time ago and that we form ourselves into a Patriotic League, a society, the name and objects to be given and recommended by a committee to be appointed at this meeting.—Carried.

Moved by Mayor Baines, seconded by Reeve Christie, that the Chairman name the members of the Committee to deal with the objects of this meeting and report at 2 p.m.—Carried.

The Chairman named the following gentlemen as the Committee:— C. M. Bowman M.P.P., C. J. Mickle, H. A. Vandusen, Sheriff Jermyn, W. D. Cargill M.P.P., Reeve Castner, Ex-Warden McCannell, Reeves Cass, Johnston and D. A. McDonald.

Meeting adjourned at noon and resumed at two p.m., when the Committee presented the following report:—

REPORT OF COMMITTEE

Your Committee recommends that a League of the men and women of the County of Bruce be formed to be known as the "Bruce Preparedness League" the object of which shall be:—

1. Prepare to aid further recruiting.
2. Prepare to employ returned soldiers.
3. Prepare to care for and to honor the wounded and disabled soldiers.
4. Prepare to aid farmers in securing help when sons enlist for the war.
5. Prepare for the end of the war.
    1. By campaigning for rigid economy in public and private life.
    2. By organizing for immigration in co-operation with all immigration Departments.
    3. By urging preferential appointments and situations for returned soldiers and nurses.
6. Prepare for co-operation with Federal, Provincial and County Committees organized to deal with present and after the war problems.
7. Prepare Canadian youth for new social, industrial and economic conditions.
    1. By promoting a spirit of patriotism and sacrifice for Canada.
    2. By inculcating high ideals of citizenship.
8. Prepare to aid our country in adopting methods for increasing national efficiency.

A. B. KLEIN,
Chairman.

Moved by T. C. Allen, seconded by Reeve Christie, That report of Committee be adopted.—Carried.

Moved by H. A. Vandusen, seconded by C. J. Mickle, That the officers of the "Bruce Preparedness League," be a President, a Vice President for each municipality in the County, a Secretary, a Treasurer and an Executive to consist of the President and five other members of the League.—Carried.

The meeting elected officers, viz.:—

Judge Klein, President.
Warden McNabb, Secretary.
E. Roy Sayles, Treasurer.
C. M. Bowman M.P.P., W. D. Cargill M.P.P., Sheriff Jermyn, Reeve Hunter and Ex-Warden McCannell, Executive Committee.

Moved by Sheriff Jermyn, seconded by W. D. Cargill M.P.P., That a copy of the minutes of this meeting be sent to the Head of each municipality in the County with an urgent request that he call a meeting of the men and women in his municipality to elect a Vice President and a Managing Committee for his municipality and report to the secretary of this League at an early date and copies of the minutes of this meeting be sent to His Honor, Lieut.-Governor Hendrie, Hon. W. H. Hearst, Premier of Ontario and N. W. Rowell, K.C.—Carried.

Moved by Ex-Mayor Tyson, seconded by H. A. Nelson, That three members of the Executive Committee shall form a quorum.

Moved by Duncan McKenacher, seconded by Sheriff Jermyn, That Lt.-Col. Clark, Messrs. Bowman, Cargill and McCannell be a delegation to interview the County Council at its next meeting and ask for a money grant towards paying printing and postage bills of the League.—Carried.

Moved by Mayor Miller, seconded by Hugh McKerracher, That Messrs. Bowman, Cargill, Clark and Truax be a delegation to attend the Speakers' Patriotic League, of Toronto, when this League is invited to attend a meeting of that League.—Carried.

Moved by T. Shoemaker, seconded by Geo. Welsford, That the next meeting of this League be held at the village of Paisley when called by the President.—Carried.

Moved by Reeve Johnston, seconded by Rev. Mr. James, That this meeting express to Col. Weir, of the 160th Bruce Battalion, its hearty appreciation of the exemplary and good conduct of his officers and men since the commencement of the formation of the regiment and also that we have every confidence that they will never be cowards or guilty of any misconduct or act of inhumanity. And also that we have every reason to be proud of every member of the Battalion.

After usual vote of thanks to Chairman and Secretary meeting adjourned after singing "God Save the King."

BIG VALUES IN OVERLANDS

Overland 86

The WILLYS-OVERLAND firm is not guaranteeing shipments later than June—and that on an output of 10000 cars a day. This gives you an idea of the appreciation the public is showing of the big values in OVERLAND Cars, $850, $965, $1575 and $1600. See the 7-passenger, 6-cylinder, also the silent Knight engine, the only thing of its kind in Canada.

Office Stationery

BUSINESS Stationery should reveal the spirit of the business for which it is used. An appropriate letter head for a profession would be inappropriate for a mercantile house.

The typographical appearance of a letter head for a doctor should be small, neat, dignified—almost feminine; for a blacksmith, black, rugged, plain; for a vaudeville performer, loud, showy, big; for a bank, rich, dignified, restrained; for a store, neat, practical, harmonious, and so on.

Correspondence paper should not reflect poor judgment. Everything counts in these days of sharp competition.

POETS' CORNER

TO BRUCE AND HER BATTALION

Bruce, oh Bruce! we are proud of you,
Proud of those sons that you gave,
Proud of your citizens, so loyal and true,
Of Donald and Archie and Dave;
Of all who were ready and willing
To answer their Country's call,
And who've won the right to sing with their might,
"We'll never let the old flag fall."

Bruce is named for Scotland's hero,
That noble Bruce who rose like a star
Just when his country needed a saviour
And scattered the enemy near and far.
Now our great Mother Britannia calls us,
And bids us fight for the highest of all,
For honor, and you have nobly responded,
With your bravest and best you've answered her call.

Many there are of Scotch descent,
Many are English and Irish too;
And some have German blood in their veins,
But all are staunch and true,
And proud to defend their country,
This fair Canadian land,
This great and broad Dominion
From the German Kultur's hand.

Some have been to the battle's front,
And come back with honored scars,
And some have gone who will never come back,
But let us through our tears
Thank God for our good and gallant men
Who are not afraid to die,
And though their graves may be lonely
In honored glory they'll lie.

Some even now are struggling
In battle with the Huns,
Fighting loyally, fiercely, steadily,
Facing the German guns;
And waiting, waiting for comrades
Back in the dear Homeland;
Cheer up boys for they are coming,
Headed by the one-sixtieth band.

From the rocks of old Bruce peninsula,
From the fertile farms of the south,
From every town and village
Are coming the noble youth
Of our county, coming to help you
In this great war of wars
To win Bruce her share of glory
Which no dishonor mars.

So people of Bruce, so loyal and true,
Thank God for your noble sons,
Thank God for the best old country on earth,
Thank God for our mighty guns,
And our wonderful navy alert and strong,
Without whose watchful care
Our shores would not be safety,
Nor our transports be free from snare.

Then here's to the Bruce Battalion!
To the boys of one-six-o!
Whose help will do not a little,
To quell our masterful foe.
They are splendid looking khaki lads,
And we know that they're true blue,
They'll do their bit well for their county,
And the dear old red, white and blue.

—R. HOWIE.

News About Town

Public School closes June 29th.

Town Council meets Monday night.

You will find profit every week in reading the Telescope's advertisements.

Some advertisers forget that a small plaster never draws a large gathering.

One way to boost Bruce County is to build a trunk road straight up the centre of it from Teeswater to Tobermory. Another way is to bring the Hydro in.—Lionhead News.

Getting Ready at London.

Lieut. Loggie Foster and 24 men of the 160th Battalion are hard at work on the camp of the Bruce unit. They have dug almost half a mile of trench for water mains, and have started work on the bathhouses, wash troughs, etc. Lieut. Foster hopes to have the canvas up by Wednesday next, although the men from Bruce are not expected to be in town before the following Monday. The camp is well situated on a gentle slope. The soil is sandy and water does not stand long on the surface. The Bruce Battalion numbers over 1,300 men, the largest by a comfortable margin of any unit in the district. Over five hundred of the men are farmers, and of the balance a good part are lake and woodsmen. "System" is given as the reason for the strength of the battalion. The central recruiting committee in Walkerton divided the county into divisions, subdivisions and saw to it that every eligible man was approached personally. Ten weeks sufficed to bring the unit up to strength. Lieut.-Col. Weir is spoken of as a highly efficient and popular officer.—London Advertiser.

BRANT TP. COUNCIL

The municipal council of the township of Brant met at the township hall on Thursday, the 25th day of May. Members all present. Minutes of last meeting read and declared correct.

Johnston—Gregg: That this Council do now go into a committee of the whole with the Reeve in the chair as a Court of Revision to determine the various appeals against the Assessment Roll for the current year.—Carried.

The following appeals were heard and disposed of:— W. Barry, Assessment, reduced, $200; R. Burrell, assessment, sustained; W. D. Cargill, business assessment reduced, $600.00; Ed. Hopkins, assessment sustained; M. Jacklin, assessment reduced, $50; C. Koehn, assessment reduced, $250; J. Mortimer, assessment reduced, $400; C. Mauer, assess. reduced, $200; Wm. Miller, assess. reduced, $300; Mrs. Fegels, assess. reduced, $50; Fred Wilken, assess. reduced $200; B. J. Waeschter, assess. sustained; S. Thaler, assess. reduced, $500; Mrs. McNaughton, assess. reduced, $200; R. B. Simpson, assess. sustained; E. Connors, assess. reduced, $200; Mrs. Jane Carnegie, assess. sustained. The following were added to Roll: Wm. White, laborer, village Lot 12, Cargill, tenant; Geo. Weishford, laborer, village lot 31, Cargill, tenant.

Rowand—Johnston: That this Council do now adjourn as a committee of the whole and transact general business.—Carried.

Rowand—Weir: That the Assessment Roll as revised be accepted and that the same be the basis upon which the rates and levies for the current year be struck and that the assessor be paid his salary in full of $100.—Carried.

Weir—Rowand: That Wm. Tullock be appointed pathmaster in Div. 58 instead of J. A. Rae and Jas. Metcalf instead of H. Chrispen in Div. 23 and that the bylaw be changed in accordance with this resolution also that Ben Stansall be appointed poundkeeper instead of Wm. Alexander.—Carried.

Weir—Johnston: That a grant of $10 be given to the Richardson family of Cargill, cheque to be issued to C. W. Keeling.—Carried.

Gregg—Rowand: That the Reeve and Clerk issue orders on the Treasurer for all accounts passed at this meeting of Council, viz as follows.—Carried.

C. Riechenbach, wrist watch for Pte. Barry, returned soldier, $10; W. Findlay, light at washout, con. 8, Lot 15, $2; A. McCurdy, roadway through property, $5; F. Roumig, repairing road lot 10, con. 8, $1; P. McGerrity, repairing hill lot 15, con. 13, $3.50; J. Crawford cul. lot 4, con. 6, $10.50; J. C. Leach, filling washout Durham road, lot 50, $1; E. McNaughton, filling holes on Durham road, west of Hanover bridge, $3.25; L. Lambertus, repairing Eberth's bridge, $1.25; W. Miller, labor on Town Line, Brant and Bentick, $7; H. Frook, repairing two culverts on 4th con., $1; G. Gateman, drawing stone and gravel, $11.20; D. Noble, work on hill opposite lot 7, con. 4, $26; V. Hanmore, sheep killed by dogs, $10; J. Monk, valuating sheep killed by dogs, $1.50; R. E. Truax, top for flag pole, $1.25; T. Kerry, work on Stansalls hill, $21.40; F. Atkinson, filling washout, lot 23, con. D., $1; J. Watson, opening road with disk, $1.50; W. Delgamo, dragging road townline B. and G., $2; Jenkins & McConnell, for flag pole, 60c; S. W. Vogan, hardware account, $4.02; J. F. Schlorff, work and gravel, $4.60; J. Chrispen, repairing Francis hill $1.50; Municipal World, supplies, 85c; E. Connors, putting up flag and pole, $3.50; C. W. Keeling, relief of Richardson family, $10; Dr. Bricker, B. O. H. meeting, $3; Wm. Rowand, B. O. H. meeting, $2.30; M. A. McCallum, B. O. H. meeting, $2.46; S. Parker sal. as assessor, $100; R. S. Nesbitt, B. O. H. meeting and council meeting, $5.07; A. Weir, council meeting, $2.70; W. A. Rowand, council meeting, $2.85; W. Johnston, council meeting, $3.30; D. Gregg, council meeting, $3.50.

Rowand—Weir: That this Council do now adjourn to meet on Monday, the 12th day of June for the transaction of general business.

M. A. McCALLUM.

Culross Tp. Council

Town Hall, Teeswater, May 29th, 1916.—Council met on above date. Members all present. The minutes of the previous meeting were read and sustained. Moved by John S. Armstrong, seconded by Wm. Case: That we appoint Donaldson and McPherson to investigate the demands made by the ratepayers at Lots 25 and 26, on sideroad Con. 15, and have the same repaired if necessary.—Carried.

Armstrong—McPherson: That we appoint the Reeve and Donaldson to investigate the branch drain at Lots 15 and 16, Con. 15, on gravel road, as complaint has been made by those implicated and to act as they think advisable.—Carried.

The Court of Revision of the Assessment Roll was then opened.

Donaldson—McPherson: That the Reeve be chairman of the Court of Revision.

Armstrong—Donaldson: That as Mr. Anthony Schnurr, of Formosa, has appealed against his assessment on account of the Ontario Temperance Act that we reduce his assessment three hundred dollars on real property.—Carried.

Donaldson—Case: That whereas this Court, having tried and disposed of all appeals. That the Clerk make the following changes and additions in the Assessment Roll:— Joseph Sillick as owner of part Lot 19, Con. 12, in place of Robt. Smith; Thaudius Collison F. S. Lot 25, Con. 13; Andrew Opperman, joint owner Lot 5, St. John St., Formosa; Peter Grant F. S. Lot 19, Con. 10; John Smyth, F. S. Lot 14, Con. 12. And whereas with the reductions made and the changes named, this Council adopts the Roll and it shall be the basis for all levies for the current year and that this Court do now close.—Carried.

Armstrong—Donaldson: That we appoint Case and McPherson to have the bridge at Lot 20, Con. 6, repaired as soon as possible.—Carried.

Case—Donaldson: That we appoint Thos. B. Aitkens, Pathmaster, in place of John Aitkens, resigned.—Carried.

Case—Donaldson: That this Council petition the County Council of the County of Bruce to have the Culross and Greenock town line surveyed according to the survey act, and that the Clerk forward a certified copy of this resolution to the County Clerk forthwith.—Carried.

McPherson—Donaldson: That John Armstrong have the road repaired opposite Lot 6, Con. 12, as it is unsafe.—Carried.

Case—McPherson: That the Engineers Award on the Pennell Drain is hereby adopted and that the Clerk notify all parties interested according to law.—Carried.

Finance

A. Campbell, fees as fenceviewer	$2.00
A. McDonald, rep. 3 cul. and wash.	5.00
J. Murray, 3 dys.' oper. grader	6.75
N. Melvin, moving grader	3.50
A. McDonald, assessor, bal. sal.	10.00
A. McDonald, postage	1.00
F. Rettinger, repairing hill at Lts. 4 and 5, Con. 10	12.00
Electric Light, Formosa, qr. term	14.72
D. Thompson, rep. sinkhole Lot 24, Con. 12	10.50
W. Bannerman, rep. cul. Lot 21, Con. 14	2.00
A. Caslick, pt. sal. as Collector	5.00

Armstrong—McPherson: That the Finance Report as just read be adopted and orders issued for payment of the accounts and that this Council do now adjourn to meet again on Monday, June 26th or at the call of the Reeve.—Carried.

CHAS. BUTTON,
Clerk.

HOW AN AMERICAN SEES IT

[Mr. Booth Tarkington, the well-known American novelist, gives the following brilliant summary of the diplomatic correspondence which preceded the war.]

Austria: (To Serbia) You scoundrel, get down on your knees and eat ten mouthfuls of dirt! Do it in one minute or I'll shoot!

Russia: (To Austria) I'll shoot if you do. (To Serbia) Eat all the dirt you possibly can; do your best to keep him from shooting. I don't want to have to shoot.

England, France and Italy: (To Austria) Please wait a minute. (To Germany) Austria is your brother; he does exactly what you tell him to do. Ask him to wait just a minute longer before he shoots. We can arrange this to satisfy Austria, if you'll get him not to shoot.

Germany: No.

Serbia (on his knees and swallowing): There! I've eaten nine mouthfuls, and I will eat the tenth if you'll give me just a few seconds for digestion.

Austria: No, your minute is up and I shoot.

England and France (imploring Germany): Please stop him! You are the only one who can. Won't you say a word to stop him?

Germany: No.

Russia (beginning to load his old-fashioned shot-gun): I hope you'll stop him. See here, Austria, can't we talk things over and see if there isn't a better way out?

Austria: Perhaps we could if——

Germany (interrupting): Russia, quit loading that gun!

Russia: I can't while things are in this shape, but I will quit loading at once if Austria will promise not to shoot Serbia.

Germany (interrupting): I love peace and I have done more than mortal may to preserve it. The sword is forced into my hands, evidently by God, and I defend myself. (Draws two well-oiled and loaded guns of a magnificent new model and begins to shoot, while France and England run home to get their guns.)—The Metropolitan (New York).

Mr. C. C. James points out that the dairy cow "has done more for Canada during the past ten years than have our wheat fields, and there is a possibility that the dairy products of Canada in 1916 may exceed wheat in value."

"W. L. S." of the Weekly Sun, in course of some interesting recollections of Goldwin Smith, says: "In his Bystander column, he wrote and re-wrote, revised and re-revised. His copy was written out two or three times before reaching the office; it was revised at least twice, and more frequently three times, after being put into type. No labor was too great, if it but assured the presentation of matured thought in the printed page. And all this by a man who had passed the space allotted by the Psalmist, and who, at the same time, was carrying on a voluminous private correspondence, besides writing occasionally for other publications.

You can feed the fire with utmost ease owing to the generous double feed doors—no scattering of fuel and room to insert big chunks of wood.

McClary's Sunshine Furnace

If you have five or ten minutes to spare come in and I'll show you the other advantages of this splendid furnace.

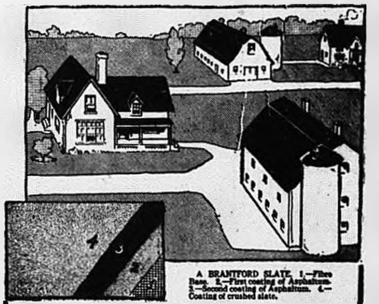
S. W. VOGAN



A BRANTFORD SLATE. 1.—Fibre Base. 2.—First coating of Asphaltum. 3.—Second coating of Asphaltum. 4.—Coating of crushed slate.

Yesterday and To-day

Wooden shingles of twenty or thirty years ago were of splendid quality, and answered the purpose very well. There was nothing better at that time. In fact no other roofing material was on the market. Yet who would think of putting on shingles to-day? When the deterioration of wooden shingles became noticeable, efforts were made to invent a roofing that would not only be an economical and permanent substitute for wooden shingles, but one that would outlast them in service.

Brantford Roofing was the result. It has "made good." The secret of its success is this: First, the base is of pure, long-fibred felt which is thoroughly saturated with asphalt or mineral pitch. The asphalt and crystal roll roofings are then thickly coated with crushed rock particles, which adhere tightly to that base, and the whole forms a permanent fireproof, water-tight roof.

Brantford Asphalt and Rubber Roofing are made in three different weights. Crystal is made in heavy weight only, and in red or green natural colors. All three grades are pliable and well suited to either flat or steep roofs.

Brantford Roofing

comes in rolls with protected ends. The layers do not stick together and the roofing is easily laid. It requires no painting or tarring when put on. It does not crack with the cold nor melt with the summer's heat. It does not curl, split, rust or blow off. It gives permanent weather and fire protection at a reasonably low initial cost.

May we send you our roofing book and samples? They will show you the real value of these roofing materials.

The Dutch have now been told by Germans that the Tubantia was sunk by a torpedo that was fired ten days before and had been floating around in the water all that time. That's a worse yarn than the Sussex one.

Germany is said to have lost 350,000 men at Verdun. But the Crown Prince says that there are plenty more where these came from.

The Greeks will deserve all that is coming to them if they quietly submit to an invasion of their country by their arch enemies, the Bulgars.

Gen. Joffre and Sir Douglas Haig sent congratulations to the Canadian troops in honor of Empire Day. Both testified to the valor of the Canadians.

The Australian wheat crop, which is 50 per cent. bigger than any former crop and more than six times the size of the last crop, is now being moved under government supervision. This year's Canadian wheat crop will be much smaller than last year's, but much of this year's crop is not yet disposed of.

Cleveland plays more tennis and plays more baseball since it turned its clocks an hour ahead. According to statistics compiled by the Cleveland Chamber of Commerce, the daily average of people who play baseball in the afternoons has increased by 2,000 and that of tennis 1,000 since Cleveland adopted eastern time. Hamilton can have one more hour's play.

The C. P. R. continues to pay its employees who enlist, for six months—that is, from the day they step on board the ocean transport for the other side. They are not paid while in training here. The Grand Trunk, until recently, did the same thing; but the depletion of men became so marked that the company discontinued the practice. It has paid out over $100,000 in wages to those who have gone to the front already. The two systems sent at least between 4,000 and 5,000 men to the front since the war began, says the Montreal Gazette.

The Winnipeg Free Press first crop report for the year says that one hundred and fourteen points give conditions as generally favorable with warm weather and rains from now on—that wheat seeding was completed by May 20. The decrease in acreage from 1915 is approximately 20 per cent.—22,000 acres was re-seeded from drifting. The increase in coarse grains will be probably 20 per cent. Eighty-four points report 19,556,000 bushels wheat to come—thirty-two points have no oats to sell. Labor is sufficient, but costly.

Jim Larkin, the Irish labor and political agitator, at a public meeting in Chicago to protest against the execution of the Irish rebels made a somewhat startling statement. He is said to have raised one of three rifles stacked upon the stage dramatically above his head and exclaimed: "Perhaps you don't know who brought these kind of rifles to Ireland. Of course you don't, because the press has never told you. Well, it was Angelia Spring Rice, sister of Ambassador Rice. It was she who smuggled them in to us." The Ambassador may explain, if he can.

Britain and the United States are feeding daily 9,000 Belgians and French. This duty should devolve on Germany. But she ignores it. Premier Asquith said the other day "All the moral obligations which up to now have been recognized by every civilized power to provide for the population in occupied country seem to be disregarded," and he added: "There will come a day—soon, I hope, but sooner or later that day will come—when King Albert's brave Belgian troops and our brothers-in-arms in France will succeed in relieving the whole of the Belgian people from the tyranny which at present overshadows them, and in restoring to them the prosperity which they gladly sacrificed rather than sacrifice their honor and their independence."

BACKWARD LOVER.

(Life)

It was Easter eve in leap year, and the young thing, who had been receiving long but somewhat unsatisfactory visits from the very shy young man, decided she might take a chance. Robert had brought her a splendid Easter lily.

"I'll give you a kiss for that lily," she promised, blushingly.

The exchange was duly, not to say heartily, made. Robert started hurriedly toward the door.

"Why, where are you going?" asked the girl in surprise.

"To the florist's for more lilies!" he replied.

'TWIXT LOVE AND PRIDE

When she came to the bedroom, she found the door closed, but opening it, passed on toward an inner room beyond, where Lady Caroline usually sat, and whence voices, suppressed yet distinct, reached her. As she approached still nearer, they rose still higher, and words became intelligible to her ears.

"If I do not get this money without delay, we are simply ruined," said Sir George, irritably.

"Then I suppose there is nothing left for you but to ask Mr. Younge for it," returned Lady Caroline, in a reluctant tone.

"I suppose not," said Sir George.

Ask Mr. Younge! Ask the father of the man whom she had not considered good enough to marry for money! What could it all mean?

Mildred stopped short, and pressed her hands tightly together. Surely she had not heard aright. They could not mean—She drew her breath hard, and swept like a whirlwind into the room.

"Papa," she said, "what are you thinking of? What have you been saying? I heard you as I came along. By what right do you intend to ask money of Mr. Younge—of him of all men? What claim have you on him that you should do so?"

"Mildred, you do not understand," began her father: "it is a loan I speak of."

"Yes, I do understand," broke in the girl, passionately—"only too well. You speak of a 'loan'; when, then, do you expect to return it—in months, in years? Why, you, yourself told me only the other day that you could not hope to see the time the estate would retrieve itself. I ask you, therefore, is it honorable to borrow?"

"Something must be done," Sir George urged, feebly. "Else we must starve."

"Then let us starve," cried Mildred vehemently; far better do that, or work for our daily bread as others have done before us, than live comfortably on other people's money. Let us be honest, whatever we are; and surely to borrow without hope of being able to repay is the very acme of all dishonesty."

Lady Caroline rose, pale and trembling.

"Mildred," she said, "how dare you speak so to your father! You have altogether forgotten yourself, I think. How can you presume to dictate to him what is right or wrong? Is he not your father? Are you not his child? Ah, it is because he has been so good to you that you now fail in love and obedience to him."

It was the first time she had ever rebuked Mildred within her memory, and her voice shook with the unwonted agitation.

"Do not speak to her like that," interrupted Sir George, gently. "She is right; she has but spoken the truth. I can not see for myself that my intention was dishonorable and dishonest."

But Lady Caroline was still stung to the quick.

"And you, you ungrateful girl," she went on, taking no notice of her husband's speech, "how can you claim to have any voice in the matter at all—you, who could have saved us all by putting out your hands and would not—you——"

"Hush, Carry!" interposed Sir George, authoritatively. "We have had enough of that subject; I will hear no more of it. Thinking it over of late, I can see no just reason why Mildred should sacrifice herself to please her family. If I am to be beggared in my old age"—he said, with a wretched attempt at a smile—"the sooner it comes to pass the better. I dare say we shall at least manage to exist in one of those French towns, or Brussels, or somewhere."

As he finished his head drooped upon his breast, his assumed bravery deserted him, his whole attitude was expressive of deepest despair.

"George, dear," cried Lady Caroline, miserably, "do not give way like that!"

She threw her arms around his neck. To her he was once more the husband of her youth, her gay, handsome, gallant, young lover. To see him now so crushed and broken was terrible to her. She laid her head upon his shoulder and began to cry, softly, but very piteously.

An awful pain arose in Mildred's heart; her mother's words had sunk deep into it. Was she indeed the cause of all this cruel suffering? Was it through her fault that sorrow had fallen upon the closing years of her father and mother?

CHAPTER XVII.

"Mamma, mamma," exclaimed Mildred, with sudden determination, "do not cry like that. I will do anything you wish me—only do not cry." She pressed her lips to her mother's hand as it lay on Sir George's shoulder, and ran out of the room.

She descended the stairs rapidly, and hurried across the hall, giving herself no time to think of or meditate on what lay before her, and, going into the drawing-room, found Lord Lyndon standing with his back to the fire. She went up to him, and held out her hand without a word of greeting; after which, passing over to the window, she put her cheek against the cold glass, and gazed out upon the dismal darkening landscape.

Lyndon, when he had given utterance to the first usual remark on taking her hand, relapsed into silence, and stood watching her, expecting some communication from her lips. He felt that her strange, unhappy manner betokened something wrong—that some chord in her sweet life-music had been played falsely; and, having so guessed, he waited patiently until she should unburden her heart to him of her own accord.

Presently she spoke.

"I want you to do something for me," she said, in a low, choked voice, still with her face turned from him, her cheek pressed against the chill pane—"will you do it?"

"Of course I will," he responded in his pleasant, cheery way. "Why do you ask me that? Have you yet to learn that there is nothing in the world I would not do for you if I could?"

"Hush!" she said. "I would rather you did not promise just yet. Wait until you have heard my request, for it is no ordinary one. I do not think you can grant it. I shall not think it in the least strange if you tell me you cannot."

"At least let me hear what it is," he requested, gently.

Mildred tried to speak, but could not; she felt powerless—miserable. It was the bitterest moment in all her life. To one of her nature, with whom excessive pride was a chief characteristic, her present situation caused unspeakable torture. Never afterward did she remember that hour without a thrill of anguish. At length she said, faintly—

"I want you to lend me—for an indefinite period—fifteen thousand pounds."

When the terrible sentence had been uttered—had gone out into the world of sounds, never to be recalled—she grew suddenly calm, and, with her hand resting on a chair, waited with almost reckless coolness for the answer that should be her rescue or her doom.

Lord Lyndon was so taken aback that at first he scarcely recognized the importance of an immediate reply. He was rich, certainly—richer far than many men who were accounted well possessed of this world's goods; but fifteen thousand pounds was a sum that few could put their hands on at a moment's notice. He hesitated, therefore, for a little, and then, recovering himself, said, quietly:

"What day shall I bring it to you? Or would you prefer my paying it in anywhere?"

"You will give it to me, then?" cried Mildred, leaving the window at last to come eagerly toward him, and feeling that her one faint chance of rescue had become a certainty. "You really mean it? Are you sure—certain? Think what a large sum it is, and how small is your hope of repayment, and do not speak in too great a hurry."

"I am sure," he said. "I promise you."

"And about securities," questioned Mildred trying anxious to recollect all that she had ever heard about money matters, and not succeeding at all.

"We will not speak about securities," answered Lyndon, gently. "Let it be an arrangement between you and me alone; I shall trust to you to repay me the moment you are able."

The utter kindliness and nobility of his nature touched her to the heart.

"What shall I say to you " she said, in a low tone, while a strange trembling pervaded her voice. "How shall I thank you?"

"Say nothing—do not thank me at all," he answered, in a hurried, pained manner, moving back a few steps from her.

Meanwhile time was flying. One, two, three minutes passed, marked by nothing except the small ormolu ornament on the chimney-piece, as it ticked away its little monotonous existence. He, gazing presently into the fire, bethought him of what all this might portend; she thought of nothing—remembered nothing—beyond the fact that, for her, life's sweetness, liberty, and tender sympathy were not.

At length, rousing herself with an effort, she went up to Lyndon, and placed her hand on his. Her heart was beating wildly. Her face was the color of death.

"Do you remember a question you asked me about two weeks ago?" she said. "Do you still care to remember it? Because, if so, I have a different answer to make you now."

"Two weeks ago I asked you to marry me," he replied, in a forced, unnatural manner.

"And then I said 'No,'" she murmured, faintly; "now—now—I would say 'Yes.'" She covered her face with her hands; a thick, dry, tearless sob escaped her.

"But I have not asked you to say it," observed his lordship coldly, still keeping down with firm hand the rising hope that was consuming him. "What, Mildred, do you imagine that, because I have been able to help you in this little matter, I have a claim on you? You are doing both yourself and me a great injustice."

"You are too good for me," said Miss Trevanion: "and yet I know you love me. If you still care to marry me, I will gladly be your wife."

"Mildred, Mildred, what are you saying?" he cried, all the icy brave reserve breaking down in an instant. "Think what your thoughtless words must mean to me—life, hope, happiness greater than I have ever dared dream of—and beware lest I take advantage of them. If you are saying all this—as I feel you are—from a mistaken sense of gratitude or pity, I implore you to desist and leave me as I was before."

"Listen to me," entreated Mildred, determined honestly to advocate her own doom, and holding out to him her hands, which he gently took and held. "If I tell you that I do not love you with that passionate love with which some women love the men they marry, but that I respect you above all living men, will it content you—will you take me as I am?"

"No, I will not," he answered, distinctly, "because I love you too well to permit you to sacrifice yourself for me. My affection is not so poor a thing as that, darling; I would rather wait until your heart and lips could join to tell one tale."

"It may be too late then," urged Mildred passionately. "I ask you to take me now. How will it be if, later on, I am not here to take?"

"If I were quite sure you would be happy," he began, reluctantly.

"I am quite sure I should be happy," she interposed, and burst into bitter tears as she spoke.

After a little she recovered herself.

"I feel nervous," she declared, trying bravely to appear her usual self, and smiling a wan, faint smile, though heavy drops were on her lashes; "you should have come to my rescue—it is not every day the proposal is made by the woman."

"My darling," he said, tenderly caressing the small hands, of which he had again possessed himself, "I hope—I think—you will never regret it. Mildred, if I were quite certain that this was for your good, and that you would never wish unsaid the words you have just now uttered, I believe I might feel satisfied."

"Be satisfied, then," she returned, but there was a terrible, dull, aching pain at her heart as she gave the expected assurance.

He moved a few steps nearer to her, and pressed his arm round her waist, quietly, and without any undue demonstration of affection; but, as he did so, Miss Trevanion was conscious of a sudden, sharp, distasteful shiver that passed over her from head to foot. Only a few minutes since, when first she was made aware of the extreme generosity and nobility of his disposition, she had been so near loving him as was ever likely to be the case; but now, as he stood there in possession—when she felt how completely she had given herself into his hands—she could feel nothing but a terrible sense of disloyalty and a wild longing to be free.

"Shall I go now, Mildred?" he asked, kindly, gazing down into her wearied face. "You are looking very tired, my love; you have worn yourself out, thinking for and worrying about other people as usual."

Mildred sighed.

"I feel tired," she said; "but not from that. So you may go now, and come again to-morrow at——"

"Twelve?" he suggested, eagerly; but Miss Trevanion said:

"No, come at four; I cannot see you before then. I shall be particularly engaged all the morning."

For a moment Lyndon felt wounded and disappointed. Surely all love was not so cold, so immovable as this. Here there was none of the sweet anxiety to see him again, the tender regretfulness at parting which he had so frequently thought of, and imagined dimly, as likely some day to show itself. Had she, possibly, not even a kindly regard for him?

"Very well," he said; "I will come then at four. And, Mildred, would you wish me to speak to your father to-morrow, or allow you still further time to reconsider this matter?"

"No; you may speak to papa to-morrow," she answered; "and you must try to trust me more than you do, and believe that I feel quite happy about it all."

"I do trust you altogether," he said, fervently; "and I believe that some day you will learn to love me, although as yet, perhaps, it is a thing difficult to you. And now good-bye, my darling."

"Good-bye until to-morrow," Mildred responded.

He bent his face down to hers.

"May I?" he whispered. And Mildred said "Yes."

So he kissed her; but, as his lips touched her, no soft fond blush rose to dye her cheeks and mark the loving act—no happy tremor seized her, no tender agitation filled her breast. She endured his caress, went through it as part of the wretched task she had undertaken to perform, feeling numbed and chilled and lifeless the while.

When he was gone she went upstairs again to the room where she had left her father and mother, and found them still there—Sir George standing at the window gazing out upon the snow-covered ground, Lady Caroline before the fire, as though in the act of warming herself, but it had gone out without her knowing it, so deeply was she immersed in saddest thought and nothing now remained but the gray half-warm cinders. Everything looked cold, cheerless, comfortless. The traces of tears were still upon her mother's cheeks, and even as Mildred gazed a heavy drop fell upon her lap.

"Mamma, be comforted," cried Mildred, coming suddenly forward from where she had been standing unnoticed, in the shadow of the door; "I have done what you wished me to do—I have got the money for you."

Lady Caroline started and turned toward her, so did Sir George.

"Mildred, what do you mean?" he exclaimed.

"The day after to-morrow you shall have the fifteen thousand pounds," she said; "and I—I am engaged to be married to Lord Lyndon."

Her mother rose, flushed and triumphant. Here indeed was a match worthy of her darling. All recollection of the relief to be gained through the promised money faded in comparison with this wonderful piece of news. At last Mildred had made her choice, and it was a most wise one.

"Oh, Mildred, is it true? How glad I am!" she began. "I think——"

But the girl put up her hands to her ears and recoiled from her touch.

"Not now—not now!" she exclaimed, almost roughly.

How could she endure congratulations and good wishes about what seemed to her the cruelest event in all her life? How submit to questionings and kindly probings, when she felt her heart was breaking? Surely in such a case congratulations were a mockery.

She left them, and, hurrying to her own room, strove hard to quiet the thoughts that raged within her; while they, remaining behind, asked each other in whispers how it had all happened, and half feared to believe the welcome news was true.

But Lady Caroline's heart smote her when she remembered the look in Mildred's eyes when they had met hers—the great unhappy light that had shown in them, revealing so much that she would gladly have kept untold.

But the mother's eyes had seen it, and so she followed Mildred to her room, only to find the poor child pacing up and down with restless, feverish hands, and face grown old with passionate care. She stopped as her mother entered, sighing heavily. Lady Caroline stretched out her hands.

"Mildred, tell me what it is," she entreated, wistfully, with sorrowful, longing sympathy in her tone. "Am I not your mother?"

And Mildred cried, Oh, mother," and falling on her knees, with arms wound round the mother's waist, and eyes hidden, sobbed a little of her grief away.

All in vain. The next morning brought a letter from Lady Eagleton's solicitor, containing the news of her ladyship's sudden death, and stating that on her will being opened, it was discovered that she had bequeathed to her "beautiful and well-beloved grandniece, Mildred Trevanion," the sum of thirty-five thousand pounds.

CHAPTER XVIII.

The train steamed slowly out of Clinton Station, leaving Denzil Younge once more alone upon its little platform. A dog-cart was in attendance, but, there being nobody in it except the groom, Denzil decided on walking to King's Abbott, and leaving the man to look after his luggage, he started briskly down the village street.

Here the lounging shop-keepers were gaping at their open doors, and the ruddy children shouting at their play, many giving him kindly words of welcome and smiles of recognition as he passed, while he, smiling back his acknowledgments in return, felt his blue eyes kindle and knew how sweet a thing it is to be remembered.

(To be continued.)

DOES CATARRH BOTHER YOU?
ARE YOUR NOSTRILS PLUGGED?

Why not give up that snuff and stop dosing your stomach? The one sure treatment is "Catarrhozone," sure cure because it goes where the disease really is. Certain to cure in your case because it has restored tens of thousands worse than you are. Catarrhozone is a thorough cure because it destroys the causes as well as the effects of the disease. Relief is prompt, the cure is quick with this powerful remedy which is guaranteed to cure Catarrh in any part of the nose, throat, bronchial tubes or lungs. To be really cured, use only Catarrhozone and beware of dangerous substitutes meant to deceive you for genuine Catarrhozone which is sold everywhere, large size containing two months treatment costs $1; small size, 50c; trial size, 25c.

If a Naturalist Painted.

If I were to paint the short days of winter I should paint two towering icebergs approaching each other like promontories, for morning and evening, with cavernous recesses and a solitary traveller wrapping his cloak about him and bent forward against the driving storm, just entering the narrow pass. I would paint the light of a taper at midday, seen through a cottage window, half buried in snow and frost. In the foreground should be seen the sowers in the fields and other evidences of spring. On the right and left of the approaching icebergs the heavens should be shaded off fom the light of midday to midnight with its stars, the sun being low in the sky.—Henry David Thoreau.

Minard's Liniment Cures Garget in Cows.

A Hard Job.

One of the hardest jobs I know of is to take a ride, when you're feeling nice and sociable, in a left hand drive machine with a fellow who is deaf in the right ear and has to stop the car and turn his head toward you every time you make a remark to him.—Farm Life.

STINGING NEURALGIA

The Trouble Due to Nerves Starved for Lack of Good Blood.

An eminent medical writer has said that "neuralgia is the cry of starved nerves for better blood." The one great symptom of this trouble is pain, fierce, stabbing pain, that almost drives the sufferer frantic. The one cause is poor blood; the only cure is to enrich the blood. Heat applied to the inflamed nerve will give relief, but does not cure. Dr. Williams' Pink Pills furnish the blood all the needed elements, and the blood conveys them to the nerves. The only way of getting food or medicine to the nerves is through the blood, and the only way to enrich the blood is through a fair use of Dr. Williams' Pink Pills. In this way neuralgia, sciatica and other nerve disorders are promptly cured, and the whole system benefited and strengthened. Mrs. M. Gleason, R. R. No. 1, Uxbridge Ont., who was a great sufferer from neuralgia, says: "I suffered intensely from neuralgia for four years. My blood was thin and I was completely run down. I suffered intense pain all the time. At different times I consulted three doctors, but their treatment did no more than give me temporary relief. Then I tried different medicines, but the result was the same—they seemed no good in my case. I was growing steadily worse, and finally could not leave the house nor do a bit of work. The last doctor I consulted could do nothing for me but give me morphine tablets to ease the pain, and by this time I had about resigned myself to a life of pain. Then one of Dr. Williams' almanacs came to our house and I read of similar cases cured through the use of Pink Pills. I got three boxes and before they were all gone the pain began to decrease, and I began to have a better appetite. By the time I had taken six boxes I was again a well woman, and my neighbors could hardly realize that such a change could be made in so short a time. Later I was bothered with eczema, and Dr. Williams' Pink Pills cured me. I have found these Pills worth their weight in gold, and I cheerfully recommend them to all who are ailing."

You can get these Pills from any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

THE UBIQUITOUS TURKEY.

He Has Spread All Over the World Despite His Retiring Ways.

In every corner of the globe almost, at least where civilization has spread its epicurean taste, may be found the domesticated turkey—not, however, of his own volition. Never would he, in his wild state, have sought to cross the stormy seas to find green fields and pastures new.

He is not so constructed. He is not bold or adventurous of disposition. On the contrary, he is timid and much afraid of things he does not understand and when undisturbed is prone to let well enough alone and get along with his accustomed feeding grounds.

Again, as a flier the turkey is not a pronounced success. He flies ponderously, almost painfully and with great effort, and only when very much frightened. His flight can be sustained for only a short distance, but what the wild turkey lacks as an aviator he fully makes up as a sprinter. He can outrun a race horse, especially in his own native forest, where undergrowth and bushes seem but to add to his speed. But he could not have flown over the ocean even if he had had that unnatural desire.

He was taken over by the hand of man, first to Spain, then to other Mediterranean countries, to northern Europe, and the far east, until now he is well nigh omnipresent. And this spreading out of his kind even unto the ends of the earth is all due to the entrancing qualities his meat takes on when properly baked or roasted.

HALLIDAY CO., Limited
BOX 61, HAMILTON, CANADA.

WHY NOT?

If a female duke is a duchess,
Would a female spook be a spuchess?
And if a male goose is a gander,
Then would a male moose be a mander?

If water you freeze is frozen,
Is the maiden you squeeze, then squozen?
If a thing you break is broken,
Would a think that you take be token?

If the plural of child is children,
Would the plural of wild be wildren?
If a number of cows are cattle,
Would a number of bows be battle?

If a man who makes plays is a playwright
Would a man who makes hay be a haywright?
If a person who fails is a failure,
Would a person who quails be a quailure?

If the apple you bite is bitten,
Would the battle you fight be fitten?
And if a young cat is a kitten,
Then would a young rat be a ritten?

If a person who spends is a spendthrift,
Would a person who lends be a lendthrift?
If drinking too much makes a drunkard,
Would thinking too much make a thunkard?

But why pile on the confusion?
Still, I'd like to ask in conclusion:
If a chap from New York's a New Yorker,
Would a fellow from Cork be a Corker?
—Walter G. Doty, in Life.

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength, and happiness by this method. Write today. Address: Mrs. M. Summers, Box 8, Windsor, Ont.

ANTIQUES

The motifs of design in cut-glass of to-day are in many cases readily traceable in their features to the now antique forms and decorations in vogue in Ireland when that country was at the zenith of its glass-making art.

Little is known of the early history of Irish glass, but there is sufficient to warrant the assumption that it was among the arts practised at a period when Ireland was world famous for its skilled craftsmen, in such industries as wood-carving, metal working, etc. An old Irish saying gave "The best hands in the world are the hand of a good carpenter, the hand of a good smith and the hand of a skilled woman."

At the time when Irish glass was at its best, from the decorative point, facetted cuttings largely preponderated. The chief centre of the facetted industry was Waterford, but Cork, Belfast, Dublin, Londonderry, Dundalk and Carrickfergus in the order named—all contributed, some of the districts having decorating plants only. A peculiarity of the Dublin centre was the manufacture of the blue-glass linings so frequently seen in the perforated silverware baskets, sugars and creams, and the table salt-holders of the Queen Anne and Georgian period styles. Cork also had its own specialty in its combination of engraving and gilding combined with the facetted cuttings. Engraving, by the copper wheel process, was mainly used upon glass for the dinner table, while the gilding was applied to articles for milady's dressing table, cologne bottles, powder boxes, brush and pin trays. It is these combinations in treatment that the cut glass of to-day resembles the work of other days long past. The glass-cutter now is doing the work of the engraver of olden times, and by using stone instead of copper wheels, in completing the double-motive design, brings his work into the glass-cutting class.

A feature common to both periods is the chequering which covers the facet of the hobnail formed by the interlaced lines of the cutting.

A comparison of old Cork glass designs with the latest conception in Canadian glassware specialties just put upon the market, will demonstrate this.

Another antique in glass decoration is resuscitated in the Tudor style. It is a long spell from the fifteenth to the twentieth century, but the dictates of fashion cannot be denied and thus we have a five century old decoration adapted to articles of present day use.

Pleurisy Pains Vanish!
Chest Colds Cured!

NERVILENE HAS NEVER FAILED TO CURE.

Don't suffer!
Nerviline is your relief.
Nerviline just rubbed on, lots of it, will ease that drawn, tight feeling over your ribs, will destroy the pain, will have you smiling and happy in no time.

"I caught cold last week while motoring," writes P. T. Mallery, from Linden. "My chest was full of congestion, my throat was mighty sore, and I had the fiercest stitch in my side you could imagine. As a boy I was accustomed to have my mother use Nerviline for all our minor ailments, and remembering what confidence she had in Nerviline, I sent out for a bottle at once. Between noon and 8 o'clock I had a whole bottle rubbed on, and then got into a perspiration under the blankets. This drove the Nerviline in good and deep, and I woke up next morning fresh as a dollar and absolutely cured. Nerviline is now always part of my travelling kit, and I will never be without it."

The large 50c. family size bottle is the most economical, or you can easily get the 25c trial size from any dealer.

The Devil's Knell.

Among the famous bells of Dewsbury, Yorkshire, England, is one known as "Black Tom of Soothill," which was presented to the church in expiation of a murder. "Black Tom" is always rung on Christmas eve. Its solemn tolling as it strikes the first top at exactly midnight is known all over Yorkshire as the "devil's knell," it being the notion that when Christ was born the devil died.—London Globe.

Swords and Walking Sticks.

The walking stick, as we know it at present, gained its popularity in France during the eighteenth century, when it came to be carried by rich people who had no right to wear swords. The dandies twirled thin bamboo canes in their fingers, but the great financiers, who had considerable influence at that time, made the sticks fashionable additions to their wardrobes and sometimes paid as much as 10,000 crowns for one. This carrying of a walking stick was regarded as a democratic triumph over the nobility, who refused the commoners the right to wear swords.—London Standard.

Minard's Liniment Co., Limited.

Drummondville, August 3rd, '204.

KEEPING A PIANO IN TUNE.

Use All the Keys Every Time the Instrument is Played.

The trained musician has little trouble in keeping his piano in excellent tune. But the amateur pianist who just plays little scratches of this and that soon finds that some of the keys are in much better tune than others.

The fault is not always that of the piano tuner, nor is it always due to the fact that the piano has been exposed to dampness or left in a strong draft of air. Usually it is because the amateur player doesn't use every key when he plays. The musician who plays merely for his own benefit and who is far from being a skilled pianist discovers that he plays better in some one key, and consequently he selects all his music from that key. The true musician pays all keys and has no preference for any particular one.

The skilled musician runs his fingers lightly over the whole keyboard before starting any piece, thus bringing all the notes into action. But the clumsy amateur usually starts without the slightest pretense of a prelude or calling forth the different tones of the piano. No piano can be expected to keep long in perfect tune unless every key is used about as much as every other key. The well modulated instrument is the one whose notes all see equal amount of service.

The piano like the voice, must be evenly used to be perfect. Any one who talks in a high pitched voice and only calls forth the high tones of his throat cannot expect to talk in a low, well modulated voice when he never uses the low, soft strains. A cheap piano well taken care of will sound better if played by a musician who uses all the keys than a higher priced one which is only allowed to produce the tones of the single key which the amateur player can read best.

AN EXCELLENT MEDICINE FOR CHILDHOOD AILMENTS

Baby's Own Tablets are an excellent remedy for childhood ailments. They regulate the bowels, sweeten the stomach, banish colds and simple fevers and cure all minor ills of little ones. Concerning them, Mrs. H. N. Elsam, Owls Head, N. B., writes: "I always use Baby's Own Tablets for my little ones and find them an excellent medicine for childhood ailments." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A CURIOUS ANIMAL.

The Sea Cow Gave Rise to the Legend of the Sirens.

The dugong, or sea cow, is a peculiar animal. It resembles the familiar seal, but it has no hair on the body and is more nearly related to porpoises and whales.

This animal is found on the shores of the Indian Ocean, about fifteen degrees on each side of the equator, from East Africa to Australia, and also in the Red Sea. It is a marine animal which never ascends the rivers, its food consisting chiefly of seaweed and the algae found in the water. Years ago it was reported to have been found in large herds of several hundred individuals and to have been so fearless as to allow itself to be touched with the hand of man. In recent years, however, it is met with only in twos and threes, and has become very shy and wary. Its flesh has been regarded as a delicacy, and it is stated that the Malay kings claim as royal property all those taken within their domain.

Its habit of raising its round head out of the water, and its great affection for its young, which it carries under the fore fin, are thought to have given rise to the legend of the mermaid. In allusion to which the name sirenia was given by this order of mammals. It was recorded that it was with the skin of the dugong, or sea cow, that the Jews were directed to veil the tabernacle and not the "badger" skins as translated in the authorized version of the Bible.—New York Post.

Minard's Liniment Cures Diphtheria.

GOLDEN MOMENTS.

(Boston Transcript)

Caller—Have you a few moments to spare, sir?

Capitalist—Young man, my time is worth $100 an hour, but I'll give you 10 minutes.

Caller—Thanks, but if it's all the same to you, sir, I believe I'd rather take it in cash.

ISSUE NO. 23,

HELP WANTED.

WANTED—COMPETENT MAID-GE eral. Family of three. Go wages. State age and experience. A dress, P. O. Box 65, Hamilton, Ont.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCAtion to train for nurses. Apply, Wellandra Hospital, St. Catharines, Ont.

Saltness of the Sea.

The saltness of the waters of the ocean maintains a certain uniform figure simply because the inwash of things from the continents by way of the rivers is also fairly uniform. The saline matter entering the seas year by year remains about the same, and consequently the ocean waters vary but little in their saltness.

Minard's Liniment Cures Distemper.

Carlyle and His Home.

When the great writer Carlyle was engaged to Miss Welsh the latter induced her mother to consent that Carlyle should live with both of them and share the advantage of an established house and income. But Carlyle answered Miss Welsh's proposal by saying that two households could not live as if they were one and that he would never have any right enjoyment of his wife's company till she was "all his own," adding that the moment he was master of a house the first use he would make of it would be to slam the door against nauseous intruders.

WANTED

Help for Woollen Mill—Carders, Weavers, Fullers and Napper Tenders. Good wages paid in all Departments, and steady work assured. We have several openings for inexperienced help, where energy and ability will bring promotion. Wages paid to apprentices while learning weaving. Special inducement to family workers. Write, stating full experience, if any, age, etc. to The Slingsby Mfg Co., Ltd., Brantford, Ont.

Times Office, Hamilton.

Mighty in Titles.

The ruler of Turkey in addition to the titles sultan and kha-khan (high prince and lord of lords), also claims sovereignty over most districts, towns, cities and states in the orient, specifying each by name and setting out in each of his various titles "All the forts, citadels, purlieus and neighborhood thereof" in regular legal form. His official designation ends, "Sovereign also of diverse nations, states, peoples and races on the face of the earth." All this is in addition to his high position as "head of the faithful" and "supreme lord of all the followers of the prophet," "direct and only lieutenant on earth of the Mohammed."

Minard's Liniment Cures Colds, Etc.

Solubility of Gold.

Gold is one of the groups of metals soluble only in that mixture of nitric and hydrochloric acids known as aqua regia. It has been found, however, that the presence of certain organic compounds renders gold soluble in hydrochloric acid. Thus a mixture of this acid and chloroform is found to be a solvent. Ethyl, or ordinary alcohol, methyl alcohol and amyl alcohol are among the other substances which give to hydrochloric acid the power of dissolving gold. The solution takes place slowly in the cold acid and more quickly on heating.

Better Muscle, Better Work—the power to do things comes from food that supplies the greatest amount of strength-giving nutriment with the least tax upon the digestive organs. Shredded Wheat Biscuit contains al the muscle-making material in the whole wheat grain—the most perfect food give to man—made digestible b steam-cooking, shreddin and baking. Contains more real nutriment than meat or eggs and costs much less. Being ready-cooked and ready-to-serve, it is the ideal Summer food. Delicious for breakfast, for luncheon or any meal with milk or cream, or with fresh fruits.

Made in Canada.

OLLY GROWS UP

(From the Saturday Journal.)

The difficulty is to describe Molly. ...e wore the simplest gowns, and ...ked simply charming in them. She ...d her hair anyhow, but that proved always the perfect way. Even when it broke into open mutiny against ribbons and hairpins and streamed down in glossy cataracts, it heaped loveliness upon the indifferent Molly. But when she swept it together and bunched it up anyhow again, Molly was prettier than ever.

Beauty in confusion has always been most admired, and Molly confused everybody—even herself.

As a child she roamed in and out of her father's studio when she pleased. Those days glowed with color, were bright with success. John Melvinstone's pictures were in great demand, and he was making a name throughout the world.

"Molly the Mascot," he called her, since success had come to him from the year of her birth. Her mother and sisters were always seeking her and finding her and losing her again. Molly the truant, made a playroom of her father's studio, and he neglected his work to romp with her to her heart's content.

Sometimes her mother opened the studio door and peeped in at them. She felt rather inclined to protest against Molly's intrusion when so many commissions were on hand, but somehow she never protested. The time was soon to come in which she looked back with tear-stained eyes to those play-days in the studio, and hugged Molly to her heart.

Even in those dark days Molly lit up the house with the wonder of childhood. And when it was uncovered by loving hands, her father's last canvas made the studio radiant. He had painted her, enthralled with new toys, sprawled on the studio floor, and it seemed as if his caress still lingered round her, as if the texture of the canvas glimmered with the joy he felt in her presence. Molly turned from the picture and ran sobbing to her father's chair. On the canvas he had written "Molly in Childhood," and under this title it was sold a year later, the dealers making such tempting offers that, out of consideration for her young family, the artist's widow could not refuse to sell it.

By the sale of this and other pictures they were well provided for, and Molly was brought up in very comfortable circumstances. She was the only one of the three girls who appeared to possess real artistic talent.

"But I shall never make a true artist," she plaintively declared. "There's something wanting in me, and I just can't see what it is. I'm still Molly in Childhood. I don't seem able to find myself. I have never grown up really. I love to be among pictures, ...ut I'm afraid of them all the same. ...here seems some impenetrable mystery haunting the rooms where great pictures are hung. I suppose all true artists see visions. But I don't. I'm ...ly a commonplace girl."

...s she grew up she seemed quite ...onscious of her great beauty, or ...rly careless regarding it. She long... to be an artist. She worked hard ... obtained the necessary mastery of ...nique, but there was still that elusive something which she sought after ... vain. Would it forever be unattainable to her?

"When I go into a great picture gal... I move about as if in a dream," ... explained. "The color and the ... amaze me. I feel as if it is hopeless to persist in painting, and ... I cannot give it up. As an artist ... am still a child; perhaps I shall ...er grow up. By the way, mother, ... you know that Molly in Childhood ... recently been purchased for an ...merican collector named Claxton. ... he paid £10000 for it? Fancy, £10,000! And they only gave you £1,500. I saw a newspaper paragraph about it. Of course, I'm thankful that father's picures are increasing in value every day. I wish I could only paint something myself—" She hesitated.

"That would sell dear?" her mother suggested.

Molly shook her head.

"No—that would live. I believe I could paint pictures that would sell easily."

She colored up.

"Oh, how dreadfully thoughtless I've been, mother. With a houseful of unmarried girls, money is very useful and necessary. I'll set out to make some at once. I'll paint some pictures to sell—pot-boilers they call them."

But Molly's pot-boilers were too delicious to sell. They depicted the world seen through the eyes of a child.

The first dealer she took them to blinked behind his glasses.

"I am sorry," he said, shaking his head. "They are far too good for what we require. Blake might have done them."

"But, surely, that is in their favor," Molly protested.

"I'm afraid not, miss. If I were an art critic I should advise you to persevere. As I'm merely a picture-dealer, I advise you to do something entirely different. Such as this—"

"But it's awfully crude, you know!" Molly could not resist the remark.

"I pay the artist between £20 and £30 a week for his crudities," the dealer answered.

There was nothing more to be said. Molly splashed paint on what she considered a wretched daub, let it dry, and was about to tie it up, when the feeling came upon her that her work was entirely unworthy of her. It would kill her ambition in time. She would never find herself artistically if she took to doing such wretched stuff.

"I'll not take it," Molly decided, and threw the offending canvas on the fire. She watched it flare up with the gleeful eyes of a child, and some gleam of the vision she sought after seemed to light her face from the reflecting flame.

Molly's sister, Vivian, was going away to South Africa to be married, and Molly's outlook on life broadened. Vivian fell in love and married! Vivian was consummately happy and yet she was leaving her mother, her sisters and the home of her childhood.

"I don't suppose I shall ever fall in love," Molly said, meditatively.

"Oh! but you will—you must!" Vivian answered, quickly.

Molly's childish eyes widened.

"Why must I?"

"Every woman does."

"But I seem doomed to be disappointed. I want to be an artist, and I can't somehow. As for falling in love, in my case, it is absurd."

Molly's laugh was checked by her sister's answer.

"To my knowledge half a dozen nice boys are infatuated with you, if you'd only give them a chance of speaking."

"So I am —with art."

"But you never encourage them. You go about in a preoccupied atmosphere of your own, which suggests that you are already in love."

"Molly, you'll never make any money out of painting." Her sister's arm caressed her. Forgive me speaking plainly, but you're no longer a child. You ought not to turn every man down who approaches you. You're a lovely girl, you are, indeed, and you don't seem to know it. You could marry almost anybody you chose."

"I marry!"

"Of course. A husband and a home should be every girl's ambition."

Molly passed a hand across her dizzy head.

"I suppose I've never grown up."

"That's exactly it. Give up your silly idea of painting for a living and become engaged. Don't be so dreadfully impracticable. You'll never make money by art, and even if you could, your charms will fade and think how lonely your life must be when anything happens to mother."

A cry of despair broke from Molly's lips.

"Don't—please!—don't!"

"Oh! but you ought to see things sensibly. Mother would wish you to. When I'm gone, do think over what I've said, there's a dear."

Molly groped her way to the next room, and throwing her arms around her mother's neck, clung to her passionately.

After her sister's departure for South Africa she determined to make what talent she possessed pay for her further education in art. She showed some of her work to a magazine editor. He gave her a children's story to illustrate and she embellished it with the dreams of a child. The result was acceptance, and an immediate cheque. Molly was immensely encouraged, and he sent her other stories with the demand for more dream pictures. Very soon she had made £20 out of her sketches, with a good prospect of regular work.

"Now, I shall put in all my spare time studying the great masters, until I really find myself, and the vision comes," she told her mother in triumph.

Josiah Claxton, the American purchaser of Molly in Childhood, introduced his son to the picture by the extensive flourish of a strong cigar.

"That's my last deal in canvas before we do Europe, Stafford," he drawled. "What do you think of it?"

"It gets right there," Stafford Claxton admitted. "I'd like to meet Molly since she's grown up. If she's kept the promise she gave the artist, Molly's some girl, now, sure."

"How old would she be?" the millionaire mused.

"I'll figure that out," the young man said. "The picture was painted fifteen years ago. Makes her twenty or thereabouts, Miss Molly's grown into a woman."

"Well, anyhow, her childhood's there for all time. She'll never grow out of it while paint and canvas last. You'd better begin to pack for Europe, Stafford, I've booked by the Mauretania. We'll be in London this day week."

The vision came to Stafford Claxton first. A dream of loveliness in an overall copying Mrs. Siddons at the National gallery. It was students' day, of course—at one time or another every art student in London must have copied Sir Joshua Reynold's great portrait of Mrs. Siddons and, Molly was merely having her turn.

"That's one of the loveliest faces in Europe," Josiah Claxton drawled, pointing at the incomparable Mrs. Siddons.

"I'm with you there," his son said, glancing at the incomparable Miss Molly. At this moment Molly looked up. He was watching her with unconcealed admiration. She colored furiously, and went on with her work.

"As I can't buy the original, I'd like to have a good copy of this portrait," the millionaire continued.

"Perhaps the young lady who is copying it now would sell," Stafford suggested, unblushingly. "I guess her copy's miles ahead of the original."

As he expected, his father butted in with a bid for Molly's unfinished copy.

"I am not copying this picture for sale," Molly said, indignantly. "I believe you Americans think you can buy the earth. Oh, no, I am not offended. But it should scarcely have been necessary for me to explain that I am copying the portrait as an art student—trying to arrive at some idea of Sir Joshua's method."

The younger man fixed his grey business eyes upon her.

"Do you really believe that he had a method? I should say it was rather a scheme. The successful man seldom fails. What we understand of art is often beyond the artist's comprehension."

She stared at him bewildered. Molly's perplexity made her look perfectly adorable.

"I don't quite understand you," she said slowly.

He saw his advantage and followed it up.

"No, you don't exactly get me. But do you imagine this painting in any way resembles, Mrs. Siddons, the actress?"

"Of course, it's her portrait," Molly gasped.

"It's Sir Joshua's idea of her portrait, I allow. But it does not follow that it bears any resemblance to Mrs. Siddons. Reynolds was far too great an artist for that."

Molly was more perplexed than ever, them up.

He was talking nonsense but he was in deadly earnest about it.

"Why should Reynolds or any other artist paint a portrait that bears not the slightest resemblance to the original?" she asked.

"That's the question," Stafford admitted. But he was not going to be cornered. "It brings us over to the futurists," he added.

"Then you are a futurist!" she answered, rather coldly.

He glanced into her eyes with what might have been either enthusiasm or admiration. "Yes, I am a futurist," he declared, with finality and conviction in his voice.

As they turned away, Josiah Claxton drawled:

"You had me guessing, sonny. I didn't know you held such advanced views on art. Go ahead. I've got a guide book."

Stafford left his father in the next room and hurried down the Strand to the office of the American private detective.

"Been robbed?" that gentleman inquired, crisply.

"Not much."

"Some of your luggage at the hotel missing?"

"No, it's a case of lost identity. There's a girl with mahogany hair copying a painting at the National gallery. I want to know who she is. Just come along, right now, and I'll point her out to you."

"There's the girl and there's the picture," Stafford said, as they entered. Molly and Mrs. Siddons.

The detective came back to him after an interval.

"Her name is Molly Melvinstone," he informed the young man. "Her father was John Melvinstone, the celebrated artist, who painted By Shadows Sweetest and a score of other fine pictures."

Stafford Claxton thanked the detective and crushed a £10 note into his handshake.

"The artist's daughter," he muttered. "Then this must be Molly grown up. I wanted badly to meet her, and I've got my wish.

Somehow, Molly wondered if he would return next students' day. He did.

"So Mrs. Siddons still engages your attention?" he said, calmly.

"Yes, and your opinions are the same, I suppose?"

"Oh, yes; I'm still a futurist."

Now canvases were being fixed up. Afraid of being crowded out, he decide to hustle his lovemaking.

"Do you know I came to London to find you?" he whispered.

"To find me?"

She stood with uplifted brush, wondering if he had gone mad.

He nodded gravely.

"Yes, I knew you as a child."

"Oh, that's impossible."

"Nothing is impossible to an American, Molly."

He had spoken the name ever so softly.

"Molly!"

"You see, I know you quite well. Don't attempt to freeze me, Miss Melvinstone. I'm unfreezable. I've got the hardest business face in Wall Street. I came to London to find you, and I've found you. A few months ago my father bought your father's picture Molly in Childhood. Well, I fell in love with Molly as a child, and now I've found her grown up. I'm so much more in love with her that life means nothing at all without her. I know I haven't been properly introduced, except by Mrs. Siddons who's looking on as if she approved; but here's my card, and if you find I'm a white man through and through, will you—will you marry me, Molly?"

"I cannot answer you now. I am going home," was all that Molly said.

The great pictures around her were lighted up by a wonderful new radiance. What could it mean? Molly felt as if she were awakening from a dream. Was she on the threshold of the dawn? Had the vision come to her at last?

For the next three days in her father's old studio, she painted longingly, almost feverishly. Her canvas portrayed a woman awakening—"as blossom from the bough into the sun."

It was Molly Grown Up!

On the third day her mother found her in tears at the foot of the easel.

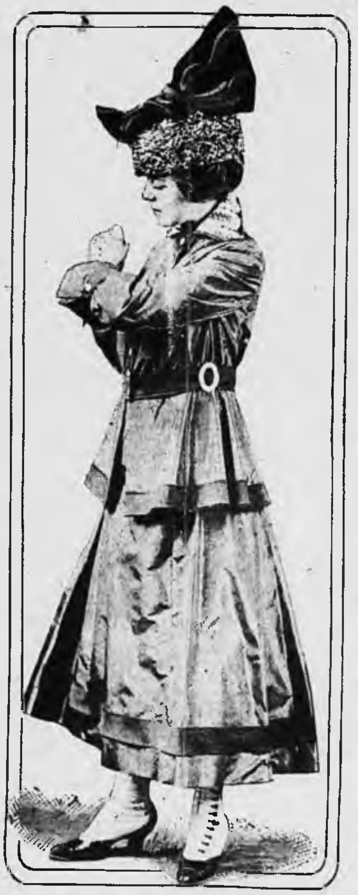
"What is it, dear?" she asked, gently.

"I have grown up, mother," Molly replied, and drew aside the curtains of the canvas she had painted.

Mrs. Melvinstone started back, as if dazzled, then, with a cry of joy, caught her daughter in her arms.

"At last you have found yourself, Molly!"

"No, I have lost myself," Molly answered in a whisper. "But, mother, I have found love!"



Smart Silk Suit

Navy blue taffeta with bands of navy blue serge. Never before have these two materials been confined to such advantage as in this season's costumes. The skirt flares decidedly. The navy serge belt is fastened with a pearl button.

"THE MAID O' DUNDEE"

"So that's the lass you're a lovin', Stephen? No denial, lad, when the blood in your cheek's giving you away!" Old Archer McLauren's quizzical gray eyes twinkled, resting on the dark face of the big young fellow beside him.

Stephen Lowry was taking his leave after a Sunday afternoon's visit at his old bachelor friend's stately home.

An automobile, with an elderly lady and a middle-aged man in the back seat and driven by a remarkably pretty brunette girl, passed. The girl bowed with swift and smiling friendliness and, as she turned the corner, looked back and waved her hand.

"Loving that fine, young thing ought to put heart in a young fellow," Archer went on, "and yet, for a month past, I've noted there's something wrong with your spirits. What is it, Stephen? She's promised to marry you, hasn't she?"

Stephen's face lost its color. "I haven't asked her to marry me, sir. I haven't the right. I—I'd be a nervy sort to offer the slim proceeds from a public repair shop and garage, would I not?"

McLauren looked at him keenly. "I suppose, then, a young man who takes his little capital when he comes west and invests it and pertinaciously sticks to his business until in three years it's on a firm footing—a fine, fit, clean and good-looking specimen of young manhood—counts for nothing, does he, in the inventory of what he has to offer a woman. You're not going, Stephen, yet. I want to talk to you."

But Stephen, with a murmured excuse for haste, was gone. McLauren went indoors, his face clouded, and bade Cleophas, his black servitor, light a fire in the fireplace. "Foolish boy," he repeated to himself at intervals. "He must not be allowed to make the mistake I did. He must not."

Both Stephen and Nathalie were leaders in the choir and in the Young People's Endeavor Society in the unpretentious church attended by the family of Abner Kirk, a wealthy merchant of the city. But for months now Lowry had been bringing himself to a resolution to change his attendance to another church. Seeing her bright face Sunday after Sunday, though it was his own pleasure, was a pleasure so full of pain that he found it almost unbearable.

"If it weren't for that money," he said to himself savagely as he let himself into his rooms, "I'd have the right to tell her I love her! I believe I could make her love me. She—she —" A kind of stubborn gallantry would not permit him to say that he believed she loved him already. "But I've got a little decent pride left," he concluded, his teeth set firmly.

The next Sunday afternoon, his heart heavy, he went to his old friend's home.

"Still brooding, lad," McLauren said to him. "I don't like it. Ah, Stephen, Stephen, I don't want your life to be like mine!"

"Why, you've everything to be wished for, sir!" Stephen exclaimed.

"Yes, and loneliness along with it that drives me nearly mad at times. Nobody of my house to care a hang whether I live or die! When I was your age, Stephen, I loved a girl as sweet and pretty as that one you are breaking your heart over. And she'd have married me, too, if I'd asked her. But her father was rich and I had nothing. He would have opposed the marriage. So in my stubborn pride I would not ask her. When the pain of seeing her became too much for me I came away.

"The evening before I left the town I went to her father's house—ostensibly to return some books. I couldn't resist the temptation to rest my hungry eyes on her one last time.

"She could sing like a linnet. I asked her to sing for me. She selected the Scotch ballad, 'Bonny, Sweet Bessie.' You know how the lines run, Stephen—

"'The lass had lands,
But the laddie had nane,
And yet to her it was all the same.'

"Beneath the words of the song I could hear her voice pleading, 'Archer, Archer, tell me you love me—tell me you love me before I go!'

"But I didn't speak, and I never saw her again. I love her yet, Stephen. Sometimes I fancy I see her sitting there at the table, maybe gray and old, like myself, but still cheery and smiling. Sometimes I wake myself in the night calling 'Katy, Katy!' And it's been forty years—forty years or more!"

After a moment's silence Stephen looked at his watch. "I'm afraid I'll have to go, sir. I promised I'd meet the rest of the Endeavorers on Mount Joy street at 2.30 to go out to the home. We are to sing for the old folks there at 3 o'clock."

"It's near 3 now, I'll take you over to the home in my car," suggested McLauren.

"Nathalie's our Scotch singer," suggested her cousin. Worth Shaw, and Nathalie sat down and softly touched the keys.

Then a little old lady, about 65, with brown eyes as bright as a bird's, her tiny figure oddly alert in an old time black silk gown came up behind the girl and joined in the lines in a thin, sweet old voice.

When the last words of the song died away the listeners were amazed to see Archer McLauren leap to his feet, his arms outstretched. "Katy! Katy Denham!" he cried.

The little old singer looked up at him one long moment, her eyes dilating, her breath coming fast.

"Archer! Archer!" she cried. "Oh, Archer, I never thought of you being old like me!"

He took her trembling hands. "How came you here, Katy?"

"I have been poor a long time," she answered. Father lost everything after you went away, and I—I did what I could until this last year—I got kind of weak and tired of struggling. They took me here. It's a good place to live, Archer!"

McLauren forgot the wondering faces around him. "Get your bonnet, Katy," he cried, "and come with me. I've got a home I want you to see!"

That evening there was a simple wedding service at the First Church in Buren street. In the vestibule of the church, where the young people watched the elated old bridegroom conducting his lady to their car, garlanded with roses and hung with white ribbons, Stephen Lowry came up to Nathalie Kirk.

"May I go home with you?" he asked humbly.

A little later she led him into a luxuriously furnished parlor, but the luxury that spoke of money did not trouble him. When she came into the room again, after removing her hat and gloves, a ... wave of happiness swept over ... so long he had resisted her little womanly efforts to make him see that she could care, but now his eyes were saying 1,000 tender things. "Did you ever see any people as happy as those two dear old things?" she breathed breathlessly in an effort to appear at ease.

But Lowry did not seem to hear. He came forward to meet her. "McLauren says," he said abruptly, his breath coming quick, "when a man loves it is due the woman that he tell her, even though he realizes he is beyond the pale. And so I've come to tell you, Nathalie, that I love you. I loved you when I first saw you and shall love you all the rest of my life. I'm goodby and forgive me, dear."

Nathalie looked over his outstretched hand. "Why do you call yourself 'beyond the pale'?"

"The lass she has lands, but the lad he has none!" he quoted.

Nathalie came forward and put her arms about his neck. "Oh, Stevie," she whispered, blushing at her temerity, "to her it is all the same!"

GETTING THE GREATEST PROFIT FROM THE HOG

Common Mistakes to be Avoided at Weaning—The Importance of Green Feed in Ration—Relative Value of Pasture and Soilage.

While almost any man can make substantial profits in feeding hogs at present prices, an intelligent consideration of cost and management will tend to greatly increase them. Every stage in the hog's development should be carefully studied, the object being to get maximum results at minimum cost.

Great care is particularly necessary at weaning time to get the pigs safely over this crisis of their lives and well started without any serious set-back. Very often the profits are sacrificed from a batch of pigs because of lack of skill at this time. A stunted animal of any kind is always unprofitable, and this is doubly true of a pig. The feeding period in his life is too short to recover the loss due to a setback at weaning.

A common error which must be avoided is that of feeding a strong grain ration to compensate for the loss of the mother's milk. If properly managed the pigs will be eating so freely at the trough as nearly to wean themselves. About the only change to be made in the ration is to give them a sufficient quantity of skim milk and it is better to do this before the removal of the sow, as the loss of the dam's milk, small though it may have become in quantity, is change enough at one time. A good many farmers make a small trough in the pen, protected from the mother, in which the young pigs are fed. If this is done there should be no set-back at all when the pigs are weaned.

Thrifty Hogs but Unfinished, weighing from 125 to 150 Pounds. They have the Frame and need only a Strong Fattening Ration.

BUILD FRAME, NOT FAT.

The very young pigs require a ration that is easily digested and that is rich in protein, that is to say in flesh and blood forming material. The mistake must not be made, however, of over feeding. Before the removal of the sow just as much feed should be given as she and the litter will clean up at each feeding; when the sow is taken away the pigs should receive just what they will eat with relish. If food lies in the trough the weanlings, missing their dam, are tempted to overtax their digestive system and the portion remaining in the trough is apt to ferment and become foul. In either case digestive troubles will inevitably follow and these, if not fatal to the pig, are disastrous to the owner's chance of profit. The ideal method of feeding woul be to feed at regular intervals as much as the pigs will clean up in a few minutes after feeding. While it is not often possible to make our practice conform fully to this ideal, it should be kept in mind that the nearer we can approach to it the greater will be our success.

A mixture of middlings and chopped oats has given very good results. This is rich in ash and protein for nourishment of the growing bone and muscles, enabling the pig to build a strong frame rather than to lay on fat. It is also palatable and easily digested. Skim milk should always be provided where possible. If it can't be secured, some product such as tankage, which can be obtained from the large packing houses in Toronto, should be given in the proportion of one part of tankage to eight or nine parts of meal. For pigs under twelve weeks, the oat chop should be passed over a coarse screen to remove the hulls. The very best results will be obtained if a quantity of bran is added, equal to that of the oat hulls removed. The bran is more palatable and more easily digested than the oat hulls and it lightens up the ration, preventing the meal from lying in too close and solid a mass in the stomach.

GRAIN FEED HALF THE RATION

As the pig grows older, roots, rape, clover or some other kind of green food, either in the form of pasture or soilage crop should be gradually introduced, until they constitute about half of the ration by the time the pig is three months old. In whatever form the green food is given it has been proven that it enables gains to be made much more cheaply. In Ontario the practice has been to pasture the hogs. Owing to present labor conditions this practice will no doubt be rather extensively followed this year. Experiments conducted at the Ontario Agricultural College have proven, however, that much cheaper gains can be made when the green crop is fed as soilage, cut and fed in the pen. In every case the hogs should have access to earth, where they may take plenty of exercise. This will bring them through in a vigorous and very healthy condition and there will be no trouble with paralysis or with pigs going "off their feed."

In the experiments with soilage aforementioned, it was found that when green food was fed in the pen it only took 395 pounds of meal to produce 100 pounds of gain, whereas when hogs were turned on pasture it took 523 pounds. The meal ration in each case consisted of two pounds of ground barley to one part middlings, by weight. The inside pigs were fed all the green food they could eat, receiving lares until August 6th, and rape after that date. The outside hogs were pastured on these same crops. After the hogs were killed it was found that there was no difference in the quality of bacon produced.

Summing up the results of this experiment, Prof. G. E. Day who conducted it, writes as follows: "First, in this experiment feeding hogs on pasture proved a very expensive method, whereas feeding in pens with same kinds of food gave reasonable economical gains. Second, the outside hogs ate more meal and made slower gains than those fed inside. Third, all the hogs produced bacon of satisfactory firmness. This confirms the result of a previous experiment with rape and goes to show that a reasonable supply of green food with a liberal meal ration produces a good quality of bacon. Fourth, succulent food tends to keep animals thrifty whether it be green food or roots, and thriftiness is conducive to firmness in the bacon produced. Fifth, the inside hogs consumed on an average nearly four pounds of green food each per day, together with 4 1-2 pounds of meal. Sixth, as this proportion of green food to meal is practically the same as the proportion of roots to meal which we used with good results, it seems safe to assume that the use of equal weights of succulent food and meal tends to produce bacon of form and quality. Seventh, the time required to attend to the outside hogs was just about half of that required for those inside. Eighth, it must not be forgotten that the pigs fed in the pens had the run of a small paddock in which they took exercise at will and had unrestricted access to the clay. Where these conditions do not exist as good results, of course, cannot be secured. It must also be remembered that although greater gains may be obtained from a given amount of food consumed there is a considerable item for labor to be included in the cost of pork produced in this way. Whether or not it will pay to pasture hogs in summer or to cut green forage and haul it to them in the pens will depend largely on the facility one has at his disposal, especially in the matter of labor."

FINISH HOG AT 200 POUNDS.

As the Professor has stated, the methods followed by Canadian farmers will depend upon local conditions, but at any rate, every man who seeks to make money in feeding hogs should supply green food. It has been well established that hogs can't be fed to the best advantage on a complete grain diet, especially during the growing period. The result of heavy feeding is to check the growth and to cause the pig to lay on flesh and become too thick and fat before the desired weight has been attained. The better practice is to maintain the pig on a cheap, bulky, easily digested ration, rich in bone and muscle-forming elements, until he reaches a weight of from 130 to 160 pounds. Then the hog should be finished on a stronger ration such as barley or corn and shorts until he is in prime condition, but not too fat, and weighs from 180 to 220 pounds.

Of forage crops, perhaps rape is the most valuable for pasturing. It grows rapidly and may be sown at successive intervals so as to furnish a continuous supply from the first of June until the frost comes. It furnishes a large area and although hogs do not like it at first, they soon acquire the taste and eat it freely. For hogs, rape should be sown somewhat thickly in rows from 24 inches to 28 inches apart. Three pounds of seed per acre will give a very good stand if it is of good quality. If the rape is allowed to grow too thickly, it becomes coarse in texture and the pigs will not eat it so readily.

Alfalfa is another very valuable crop for hogs, but of course it can't be pastured. The animals are very fond of it and will make very satisfactory gains if it is fed with care. It should be given to them before it blossoms and before it becomes too woody. After that time it is less valuable and less digestible.

Ideal Hogs for Bacon Trade, weighing from 180 to 200 pounds. They had Exercise and Muscle-building Feed to Induce Rapid Growth.

Common red clover is excellent for both pasturage and soilage, while peas, vetches and almost any succulent forage crop can be used to advantage.—From the Canadian Countryman.

Silk Culture in Italy.

About 500 A. D. Persian monks first brought silkworm eggs concealed in the head of a hollow staff to Constantinople. Thence silk culture spread into Greece. A little later conquest carried it to Sicily. From there to Italy it was but a step. Soil, climate, people suited it. The industry took root, grew, throve and continues to this day.

The thrifty peasant manages to get silk and oil and wine from the same small holding. First he plants his mulberry trees, sixteen feet each way. Next he prunes the heads into a hollow cup and trains his vines all over them, and finally around the edge he sets a shelter of olive trees. So all seasons bring him labor and the reward of it.—London Standard.

Nell—A girl should always allow her parents to pick out a husband for her. Belle—The very idea! Why should she? Nell—Oh, then she can always blame it on them.

Suffered Awfully

FROM

BILIOUS HEADACHES.

When the liver becomes sluggish and inactive the bowels become constipated, the tongue becomes coated, the stomach foul and bilious headaches are the upshot.

Milburn's Laxa-Liver Pills will stimulate the sluggish liver, clean the foul-coated tongue, do away with the stomach gases and banish the disagreeable bilious headaches.

Mrs. J. C. Kidd, Sperling, B.C., writes: "I have used Milburn's Laxa-Liver Pills for bilious headaches. I suffered awfully until I started to take them. They were the only thing that ever did me any good. I never have any bilious headache any more."

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Bradstreet's Trade Review.

Toronto—In nearly all branches the movement from warehouses has been large, in most cases ahead of last year. Boot and shoe firms are an example, the volume sold for immediate needs being well in excess of a year ago. The drygoods trade is only restricted by lack of certain staple lines much in demand just now, cottons and woollens being mentioned as well as linens. Some prominent grocery firms state that the business done is away ahead of last year. Back of prosperous conditions in the cities and towns of Ontario is a farming community making money at a rate unknown before in the history of farming.

Montreal—Manufacturers are most of them working to capacity still. The warmer weather has given an impetus to wholesale and retail trade, especially in summer lines. Seasonable hardware of every description is moving actively now. Drygoods firms have been doing a normal trade. The port is busy, with freight bottoms at a premium.

Winnipeg—Business proceeds on a satisfactory basis. Orders for drygoods are large, but the old complaint of slow deliveries to wholesalers is heard. Shoe firms are doing well and the grocery trade is satisfactory, the volume of staples moving being ahead of last year, according to leading houses. The movement of shelf goods from hardware houses has improved, although sales of building materials have not expanded much lately.

Calgary—Country demand has kept up, and the movement of general merchandise from warehouses has remained steady. Other cities of the prairie west have the same to report.

Vancouver—There is little new in trade. The movement of goods from wholesale and retail houses is fair.

Hamilton—General business continues active. Industrial activity is reflected in the extensions made at a number of plants, and the fact that new metal manufacturers are locating here. Wholesale and retail trade continues satisfactory.

London—Fundamental conditions in Western Ontario are steadily improving. The farming community is prospering as never before, and this has been reflected in the large movement of commodities to the country trade, especially drygoods, groceries, farm implements and hardware of various kinds.

Quebec—Little change is noticeable over that of the preceding week. In wholesale circles activity prevails, especially in building trades, the latter are well employed. Shoe manufacturers are busy. At country points conditions are favorable. In the city trade is fairly active. Collections as a rule are fair.

When the future commercial and financial prosperity of Canada is in question, one has but to look to agriculture to be reassured. The farmer is receiving exceptional prices for almost every product. He has made large profit out of grain, dairy produce and live stock, especially the latter. Hogs have been selling at unprecedented prices for many weeks and week by week cattle have been climbing to new high record prices.

Light and the Blind.

Light has use, even if men cannot or will not see it. Baring-Gould tells of an institution for the blind that was built in England without windows. "Why," argued the committee, "should we provide windows for those that cannot see out of them!" So scientific ventilation and heating were provided, but the walls were left unpierced by any pane of glass.

But soon the poor inmates grew pale, and a great languor fell upon them. They were restless and dissatisfied. They fell sick, and one or two died. Then it was that the committee decided to open windows in the walls. In came the healing light, and the human plants responded to it at once in revived spirits, ruddy cheeks and restored health. Light is good, the light of the world is good even for those who shut their eyes.—Christian Herald.

Hope should be the physician when calamity is the disease.

His Face Was Covered With Pimples.

Pimples are not a serious trouble, but they are very unsightly.

Pimples are caused wholly by bad blood, and to get rid of them it is necessary to purify the blood of all its impurities.

Burdock Blood Bitters has made many remarkable cures; the pimples have all disappeared, and a bright, clean, complexion left behind.

Mr. Lennox D. Cooke, Indian Path, N.S., writes: "I am writing you a few lines to tell you what Burdock Blood Bitters has done for me. Last winter my face was covered with pimples. I tried different kinds of medicine, and all seemed to fail. I was one day to a friend's house, and there they advised me to use B.B.B., so I purchased two bottles, and before I had them taken I found I was getting better. I got two more, and when they were finished I was completely cured. I find it is a great blood purifier, and I recommend it to all."

Burdock Blood Bitters has been on the market for the past forty years, and is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

HANOVER

The Hanover Portland Cement Co. have purchased the water power of William Knechtel & Son, Grist Millers.

Mr. H. H. Miller, in his most able manner, addressed the members of the Epworth League on Tuesday evening on the subject: "How Canada is Governed."

Their Golden Wedding—50 years of married life—was celebrated by Mr. and Mrs. Fred Gateman of Hanover on May 24th. The children were all at home and they gave their parents a number of handsome presents. Mr. and Mrs. Gateman are both enjoying good health, being 73 and 68 years of age respectively.

With the reorganization of the training system now in effect in Military District No. 2, now under contemplation, it is said that one of the results of the changes will be the practical elimination of Niagara as a military camp. While it has not been definitely stated, it is said that one of the battalions to go to the new Camp Borden, at Angus, will be the 147th.

The flower beds of St. Mathew's Lutheran Church property, the Town Hall square and elsewhere have been wantonly damaged by some careless or mischievous people, presumably children.

There was some excitement among residents of the west end of the town the other night about 9:30 o'clock when it was rumored about that a "hold-up" had taken place at the railway bridge. Constable Beamish was got on the telephone, but the affair "blew up" when it was discovered that the bold highwayman had nothing more dangerous than a black pipe for a revolver and that in fact nothing in the nature of a "hold-up" was purposed.

Sneak thieves entered the store of E. H. Lorenz one night recently. Entrance was effected by lifting the grate in the sidewalk and smashing in the cellar window. Fortunately all entrances to the main floor were under lock and key and the thieves' ramifications were confined to the cellar. The marauders were evidently after cash for nothing else was missed from the premises.

Teeswater is having a typhoid epidemic. A dozen cases are reported already. The cause of the outbreak has not yet been discovered.

SOLWAY

Mr. and Mrs. Joe Gruppe from Formosa were visitors at Mr. John Stradders on Monday.

Miss Bessie Burrell and Messrs Christopher and John and Mr. Baird from Markdale called on Mr. Alex Rae and other friends here over the holiday.

The "March Past" on Friday and Monday was much enjoyed by the people of this vicinity.

The marriage took place near Chesley on Wednesday 31st, of Mr. Will Atton to Miss Mina Jackson. They will reside near Chesley.

Mr Kober and sister from Desmerton spent a few days at Mr. John Stembro.

Miss Emily Moncton who has been residing with Mrs. M. McIntyre has returned to Peterboro.

Wedding bells are ringing.

Miss Mary Pickerton of Toronto is spending a couple of weeks at her home here.

Mr. Ed., Miss Rachael and Bella Steffler of Ambleside spent Sunday visiting Mr. and Mrs. Jake Kraemer.

Mr. Raymond and Misses Milly and May Schurter of Mildmay visited at Mr. John Schurter's on Sunday.

Mrs. Joe Lawrence returned last Friday to her home near Clifford after spending a couple of week with her parents here.

WESTFORD

Mr. and Mrs. P. Maloney and little daughter Ellen of Mildmay spent Sunday at Linehan's.

Mrs. Peter Murray visited friends in Walkerton on Thursday last.

Mr. A. E. Haldenby and family visited friends in Glamis on Sunday.

Mr. Jas. Murray of Walkerton and Frank of Chepstowe called on friends here last week.

Born—On June 2nd, to Mr. and Mrs C. Hetherington, a son.

OTTER CREEK

Mr. George Smith of Ayton was visiting at Mr. John Smith's on Sunday last.

Mrs. Philip Russworm of Carlsbrue were visiting at Mr. Wm. Polfuss's on Sunday.

Mr. Wesley and Clara Stemler were visitors on the fourteenth on Sunday.

Mr. Harry Brunt spent Sunday in Hanover.

Mrs. Ernest Smith is very seriously ill at Mr. Wm. Perchbacher's.

Mr. John Fenner is at present putting up a stave silo.

BRUCE'S FAREWELL TO 160th.

Chesley, June 3rd, 1916.

Lieut.-Col. A. Weir, Officers, Non-commissioned Officers and Men of the 160th Overseas Battalion.

Dear Soldiers:—

As this may be the last public appearance of the Battalion in the County of Bruce, I feel that we cannot let this occasion pass without expressing in some slight degree our appreciation of the splendid sacrifices you have all made in voluntarily enlisting in this Battalion and bringing yourselves to an efficient state of training in so short a time.

The people of Bruce are proud of the record that has so far been made by your Battalion, a record second to none in the Dominion of Canada. From the time recruiting commenced in the various centres in the County, we have followed the course of the Battalion with pride, which has kept steadily growing until now we see you form a perfect Battalion.

Your conduct during the time you have been with us has been exemplary, and while we are loathe to part with you we feel that duty calls you from us and we soon part. As the familiar saying goes, we are "Happy to meet, Sorry to part, Happy to meet again." You can rest assured that the citizens of Bruce will follow your subsequent career with longing eyes and you are sure of a right royal welcome back when God in His goodness sees fit to allow you to return.

Men of Bruce, you are engaged in a fight for righteousness and liberty and what more appropriate watchword could you adopt than the immortal lines of Burns:

> Scots wha hae wi Wallace bled
> Scots wham Bruce has aften led
> Welcome to your gory bed
> Or to victory.
> Lay the proud usurpers low
> Tyrants fall in every foe
> Liberty's in every blow
> Let us do or die.

We feel that in entrusting the honor of the County of Bruce to your hands in the day of battle, we are placing it in safe hands.

We wish to assure you that you will ever be uppermost in our minds during your absence and wish to extend to you the sentiments expressed in the following lines:

> Blessed be the tie that binds
> Our hearts in Christian love,
> The fellowship of kindred minds
> Is like to that above.
> We share our mutual woes
> Our mutual burdens bear,
> And often for each other flows
> The sympathising tear.
> When we asunder part
> It gives us inward pain,
> But we shall still be joined in heart
> And hope to meet again.

The County Council which has always taken a keen interest in your welfare, also desires to take advantage of this opportunity to present to you the attached cheque for five-hundred dollars to be expended by your Commanding Officer in purchasing conveniences for the men.

Signed on behalf of the Citizens of Bruce,

A. E. McNAB, Warden

Dr. Zinn, who enlisted as lieutenant in the 160th Battalion, is having some difficulty in obtaining his commission. He enlisted to serve in his professional capacity, and it appears those oportunities are made through the Militia Department, instead of the local officers.—Mildmay Gazette.

AUCTION SALE

An Auction Sale of office and household furniture will be held at the office of the late J. S. Reed, on Saturday, June 10th, 1916 at 10 a.m. Terms cash. E. Briggs, Auctioneer.

The Crest of the 160th Overseas Battalion

The "Bruce Battalion" Canadian Expeditionary Forces

Stirred by the love of liberty and honor—called by the Empire's need—undaunted by the hardships and carnage at the Front—keen to be in at the finish—Canada's finest manhood is getting into khaki!

Men who thus give up income and home comforts, and risk life itself, certainly should not have to sacrifice such civilized habits as a clean, smooth shave whenever they want it. Experience has shown that the only way to be sure of this at the front is to have a Gillette Safety Razor.

Wherever there is soap and water, and five minutes to spare, the Gillette will give a real velvet shave. Take one to the Front yourself if you can—if you cannot go, see that your enlisted friend has a

Will Keep Position Open.

A meeting of the Public Library Board was held on Monday night to organize the work during the absence of the Secretary and Librarian, Mr. W. B. Thompson, who has enlisted. The Board rightly took the stand that the position should be kept open for him, and appointed Mrs. Thompson, who is familiar with the work to carry it on as ass't librarian. Mr. H. G. Hunter, a member of the Board, will act as Secretary.

✦ ✦ ✦

Michlhausen-Glauser

Miss Undrella Glauser, daughter of Mr. and Mrs. Chas. Glauser of Elmwood, and Mr. Frank Michlhausen, son of Mr. and Mrs. John Meilhausen, were quietly married at the Evangelical parsonage on Wednesday morning by Rev. J. H. Grenzenbach. Mr. and Mrs. Meihlhausen left on the early morning train on a wedding trip to Niagara Falls and other points. On their return they will reside on the farm which Mr. Michlhausen acquired recently in Greenock.

✦ ✦ ✦

Will Purchase Mess Tents.

The 160th Batt. will go into camp next week in London with the most complete outfit of any of the Battalions training there, and all furnished by the contributions of the people of this County. The Walkerton Twenty Fourth of May Committee put on the finishing touches when it met on Tuesday night and decided to purchase five messing tents, each 30 x 50 feet, also a large tent for recreation, reading and writing, possibly 60x80 feet. All this comes out of the net proceeds the big day here, which have netted $1400 after paying a ll expenses.

✦ ✦ ✦

Died in Flanders

Thomas Feirne, a young Englishman, who was employed by farmers near Walkerton for several years, was among those who made the supreme sacrifice in the heavy fighting in Flanders last week, his name appearing in Thursday's list of the dead. Feirne, who was unmarried, and in his thirties, was a South African veteran. He was employed for three years with Mr. John Richardson and had been working about a year with Mr Julius Holm when he enlisted. He was a quiet industrious fellow, well spoken of by his employers. He went to England with the 34th. His mother and relatives live in England.

✦ ✦ ✦

Art Taggart Missing.

Mr. David Taggart received word yesterday afternoon by wire from Ottawa that since the big battle in which the Canadians engaged on June 3rd, his son Arthur has been missing, which means that he either fell in the battle or was taken prisoner. Arthur was a fine young fellow, born and raised in Walkerton and it is sincerely hoped that he may yet turn up alive. He was a member of the Bank of Commerce staff here, and later went to Edmonton, where he enlisted with the 49th. In England he was transferred to the 10th, of which Batt. he was a member at the time of the big battle."

✦ ✦ ✦

Bernard Robinson Wounded

Lieut. Bernard H. Robinson, a former Walkerton boy, who has been serving at the front with an English regiment, has been wounded, according to information which has come to relatives. Lieut. Robinson is a son of Rev. S. F. Robinson, of Strathroy, at one time rector of St. Thomas Church, Walkerton. He is a Master of arts McGill of University, and was taking a course of study at Oxford when war was declared. He returned to Canada and joined the first Canadian contingent and went with it to England. While there, however, he transferred to the British army and was appointed to a machine Gun corps. He was 27 years of age. A year ago his brother Capt. F. W. Robinson, of the First Canadian Battalion, lost his life at the Battle of Givenchy.

71ST BATT. BROKEN UP

Walkerton Boys Write Home That They Have Been Transferred To Other Battalions

The 71st Battalion is to be broken up and the men distributed to reinforce different units of the Fourth Canadian Division. The announcement which is referred to in letters received from the boys in England this week, was a great disappointment to the men but they realize that they enlisted not to uphold the honor of Western Ontario, only, they are ready to serve cheerfully wherever they may be of most service to the Empire. Pte. Ed. Eidt states in an interesting letter to a member of the family, part of which is reproduced on page 4, that all the boys of the 71st are to be in the same Division, some in the 73rd, 51st, 53rd 46th, 47th and several other Battalions. Pte. Eidt says that forty of "C" Co., including most of the Walkerton boys, have been picked out to train as trench mortar section. Trench mortars are guns used for throwing bombs and are right in the first line trenches.

ORGANIZE RECRUITING

Col. Shannon Wants Geo. D. McKay To Take Charge For All Western Ontario

Col. Shannon, the officer commanding Military District No. 1, has paid a striking tribute to the Bruce County Recruiting Organization by calling upon the man behind the gun, Mr. Geo. D. McKay of Walkerton to take full charge of an immense recruiting organization to cover his entire military district which includes the counties of Western Ontario all the way from Tobermory to Windsor. The invitation came to Mr. McKay from Col. Shannon by phone on Tuesday night, but the proposition is such a big one, as only a man who has been at the work can realize, that Mr. McKay will be unable to give a definite answer before looking into the matter thoroughly. To run the fine tooth comb through all Western Ontario as it has been done in Bruce would require a very complete organization and a very large expenditure of money. In Bruce the sinews of organization have been provided by the county. Whether the Militia Department would back a scheme for all Western Ontario on the same basis is a point which remains to be seen. Since the 160th Batt. broke all records in recruiting, all eyes have been on Bruce and its recruiting system. That Col. Shannon has shown keen judgement in selecting Mr. McKay for the big job ahead of him, all those who are familiar with the situation, thoroughly agree.

DEATH OF MRS. EIDT

Had Been in Poor Health Upwards of Three Years

In the death of Mrs. Nicholas Eidt which occurred on Friday morning, a life which counted for much in the home and family was removed to another sphere. While her heart interest centred in the family of boys which grew up around her, the strength and beauty of her character shed its influence upon many outside the immediate circle of the home. "A fine woman" was the tribute heard on many lips the past week. Mrs. Eidt had been poorly for over three years with nerve trouble, but the immediate cause of her demise was heart trouble. Her maiden name was Annie Victoria Ross, her parents being Andrew and Mary Ross. She was born in Nassagaway, Halton County, and came to Walkerton when in her nineteenth year. About two years later she was married and she had been a resident of the town ever since. Six children survive, one daughter, Mrs. J. S. Wahlquist of Freehold, N. J., who arrived home a few days previous to her mother's death; and five sons:— Fred A., of Elmsford, N. Y.; Charles R., of New York City; Edward, of the 71st Battalion in England; Frank, of the Telescope; Sergeant Walter H., of the 160th; and Victor at home. Private funeral was held on Sunday afternoon at two o'clock, which was conducted by Rev. G. C. Roth. Among those from out of town who attended were: Mr. Wallace Johnston, Miss Ada Ross, and Mrs. Colvin of Teeswater; Miss Ella Simpson of Allenford; Mr. and Mrs. A. Ross of Listowel; Mr. and Mrs. C. Eidt, Mrs. H. Bottnager, Miss L. Gross and Mr. Henry Gross of Hanover and Mr. and Mrs. Wm. Eidt of Ayton.

BORN

McNAUGHTON—In Brant, on Monday, June 12th, to Mr. and Mrs. Herbert McNaughton, a daughter (still-born.)

DIED

EIDT—In Walkerton, on Friday, June 9th, Annie Victoria Eidt, beloved wife of Nicholas Eidt, aged 56 years 8 months and 17 days.

HIMMELSPACH—At Carlsruhe, on Saturday June 10th, Mich. Himmelspach, aged 24 years.

"Gabe" in France

Mr. Alex. Haas had a letter from his son, Gabe, yesterday stating that he and all the Walkerton boys who were with him in the 34th have landed in France and expected to be on the firing line in about two weeks from time of writing (May 28th.)

✦ ✦ ✦

Constable Dismissed.

County Constable Joe Armstrong of Black Horse was dismissed from his position at the Court of General Sessions here on Tuesday. The action of the court was foreshadowed by a motion passed at the County Council in January, releasing him. Armstrong is now a Sergeant of the frontier guard at Niagara.

✦ ✦ ✦

Vic Bell Wounded

The name of Signaller Victor Bell appeared in Monday's casualty list. He was wounded in the arm. Victor is well-known in Walkerton having lived here for some time with his relative, Mr. Henry Williams and Telescope readers have enjoyed his letters from time to time. His father Mr. David Bell of Goderich, and three brothers are also in khaki with the Huron County Battalion.

✦ ✦ ✦

Lieut. Young in France

Lieut. Leslie Young of the 71st cabled his mother, Mrs. Young of Cargill on Saturday that he was off for France. This means that he has gone to take the officer's training course which all the Canadian officers must pass before being given commands at the Front. In a letter to Mrs. E. J. Skelton, Lieut. Young states that on the breaking up of the 71st Batt. he was transfered to the 46th Batt.

✦ ✦ ✦

The Printer's Troubles.

Says the Teeswater News:—This week we regret a day's delay in issuing the News. As usual, there is a loan at the bottom of it. James Gale played possum. With High School exams on for the only boy left of our three, two serving with the Bruce Battalion, a wedding in the family of another member of the staff, and the manager dead beat with an ulcerating tooth, we know our subscribers will excuse the delay.

✦ ✦ ✦

Killed in Action

A wire from Ottawa yesterday informed Mr. and Mrs. Patrick McGarrity of Brant that their son, Pte. Dan McGarrity, had been kill in the big battle on June 3rd. Dan, was a fine strapping fellow, about 22 years of age and the pride of the family. He enlisted at Calgary last year in the 12th Mounted Rifles. His brother Jack is at the Front also, having arrived in France from Bermuda a couple of weeks ago.

✦ ✦ ✦

More Casualties.

The casualty lists are being closely watched here every day, as in all Western Ontario towns, and every day brings more news of heroic young fellows who are making the supreme sacrifice for their country. The latest casualty lists have the names of three more boys from this neighborhood: Louis Ruostadtler, of Walkerton, wounded; Donald McDermid of Glamis, wounded; Art. Taggart of Walkerton, missing.

✦ ✦ ✦

A Regrettable Mistake

Mr. K. N. Taylor, manager of the Merchants Bank, received a wire on Sunday stating that his only brother had been killed in action. On Monday morning he was greatly relieved to learn that the first message had been sent by a most regrettable error and that his brother is still safe and sound in Flanders. Lieut. Taylor, who is personally known to many Walkertonians, having visited his brother here, was Western manager of The London Guarantee and Accident Co. at Regina, and enlisted shortly after the war broke out. For some time he has been divisional instructor and supervisor in grenade throwing at Bramshott Camp and it was only a couple of weeks ago that he was sent to the battle line in Flanders. His wife is at present in England and his sister, whose husband is at the Front as a Medical Officer in the A. M. C. is also in England. Mr. Taylor is still anxious regarding his brother as the second wire came from his sister in England may not not have been based on latest information.

EXTRACTS FROM THE LISTENING POST

Who is the Corporal in the 7th Batt. who signs himself: Yours, with Ypres of love, Bill?

Overheard in French Shop

Learned Tommy:—Avez you writing papier, Mad-moselle, s'il vous plaise?

Learned French Belle:—We sure have, kid. How much do you want?

Ever hear this one before? The Germans are getting in wrong with the Board of Health because they have not yet cleaned up the Allies. (alleys).

Young Hopeful—"Daddy! What did you do in the big war?

Daddy—(Absent mindedly) "28 days.'

NEWS ABOUT TOWN

Mr. and Mrs. J. R. Huether are in Toronto.

Mrs. J. H. Appel is visiting in Toronto this week.

The danger of a drought has again been postponed.

Mr. John Ryan has bought Mrs Baulk's house on Yonge St.

Mr. and Mrs. A. J. Wesley and babe spent the week end at the latter's old home at Hervie.

Mrs. Herbert Schlegel and two children of Berlin have been visiting Mr. and Mrs. H. J. Sean.

Mrs. Leslie, who has been visiting her daughter, Mrs. H. J. Sean returned home to Guelph on Friday.

Mrs. Herbert McNaughton, Brant, who was very low for several days this week, is reported to be doing very very nicely.

Pte Charlie Lundy, who is with B. Co., 4th Pioneers Batt. at St. Andrews, N. B. writes home that he is well and doing fine.

Mrs. Courtney and daughter, Beatrice, of Tottenham, have been spending a week with Mrs. Courtney's aunt, Miss Janet Johnston.

A new rural mail route starts today to be known as R. R. No. 1 Cargill, John Beckbeger is the carrier. Forty-one farmers will be served by the new route.

Two former Walkertonians, Mrs. Michael Delaney, of Detroit, and her son-in-law, Simon D. Knox of Jackson, Mich. are visiting old friends in town this week.

Mr. and Mrs. Joseph Hoffman Riversdale, announce the marriage of their daughter Mae, to Mr. F. Clarence Ostrode of the Cleveland Railway Co. Cleveland Ohio.

Mrs. John Maloof and daughter Yvone and Mrs. F. Clarence Ostrode, Cleveland Ohio are on an extended visit to their parents, Mr. and Mrs. Jos. Hoffman, Riversdale.

A movement is on among the Walkerton merchants to start a general parcel delivery system for the town. The scheme has worked out splendidly in a number of other towns.

A Tara boy, Norman Monkman was reported killed in action this week. He was a son of Thos. Monkman, a well-known resident. Pte. Albert Monkman of the 160 Batt. is a cousin.

The regular meeting of Walkerton Chapter, I. O. D. E. will be held on Saturday afternoon at 3.30 at the Town Hall. Nomination by ballot for the office of regent will be held and all members are asked to be present

An electrical storm, accompanied by rain, passed over a strip of country about two and a half mile wide in North Brant on Saturday night. During the storm Wes. Abell of Dunkeld had a cow killed by lightning and another one injured.

A Walkerton boy, writing home, states that on the passes which are now being issued to soldiers at the Front, they are ordered to report for duty at Headquarters in England in case hostilities have ceased before the expiry of their leave.

Pte. Bert Bell, who was ill with pneumonia at the County Hospital for several weeks has been recuperating at his home at Pine River and arrived here last week to spend a few days with relatives around Walkerton before reporting for duty.

On Wednesday evening last the friends and neighbors met at the home of Mr. Robert Pinkney to present Pte. James Scott and Pte. Stuart Pinkney of the 160th Bruce Battalion with wrist watches prior to their leaving for London. A very enjoyable evening was spent by all.

Naturalization papers were granted at General Sessions this week to Jacob Huber, Anne Huerman and Eleanor Strunk of Formosa. A number of applications from persons born in Germany were laid over for another year, as citizenship papers cannot be granted to such persons during the war according to the latest ruling of the courts.

Dr. Malcolm A. McKechnie, who was here recently visiting his parents, Mr. and Mrs. D. McKechnie before taking up military duties, received the appointment last week of Medical Officer for the 179th Cameron Highlanders, with the rank of Captain. Capt. McKechnie is with his battalion at Camp Hughes, Manitoba, where at least thirty thousand soldiers are in training.

Mr. and Mrs. Thick, who are now living in London, Eng. write to friends here that they recently had a visit from Pte. Chas. K. Sutton of the 7th Infantry Brigade and were joined on Sunday by Mr. Francis and family, making quite a Walkerton party. Mr. and Mrs. Thick are living at 32 Larkhall Lane, Clapham, London S. W. Eng. and state that they will be pleased to see any of the Walkerton boys.

Mrs. Lay is visiting in Toronto this week.

Miss Ella Beattie was in Toronto Monday.

Mrs. (Judge) Klein was in Toronto this week.

Mr. David Noble has bought a new Dodge Bros. car.

Mr. Armstrong of Hanover was a visitor in town Sunday.

Mr. and Mrs. N. C. McKay motored to Guelph on Saturday.

Miss Jean Everett returned from Stratford Normal on Monday.

Mr. Wm. Zing of Hanover visited old friends in town on Sunday.

Mrs. Coombe, of Kincardine, has been visiting her sister, Mrs. James Warren.

Mr. Hank Irwin has purchased a new six cylinder Studebaker runabout.

Mr. D. S. Campbell of Hepworth was a visitor at Mr. Wm. Pryne's on Sunday.

R. E. Truax M. P. and L. C. Benton took a fishing trip to Hepworth on Saturday.

McIntyre Bros. of Brant had a big bee yesterday, hauling lumber for their new barn.

The latest recruit to sign up with the 160th Batt. is Gordon L. Pinkerton of Pinkerton.

Mr. John Whitehead attended the Convention of the Christian Church at Erin last week.

Mr. James T. Clancy, the genial G. T. R. agent at Cargill, was a Sunday visitor in town.

Mr. McDonald of Chesley has taken a position as plumber and tinsmith with Patterson Bros.

The newest in hats, Senate Straws and Panamas, 50c to $7.00—G. T. Rourke Men's Store.

Miss Marion Huegham, trained nurse, of Stratford, visited her father and brother over Sunday.

Mr. C. W. Cryderman, Inland Revenue Collector, is at Owen Sound this week, relieving the Collector there.

Mr. Wm. VanHorne will represent Bruce Lodge, No 66, O. O. F. at High Court meeting at London next week.

Lieut. Danard of Owen Sound who was killed in action last week, was a nephew of Capt. Danard of the 160th Batt.

Messrs Ed. Wettlaufer of Berlin and Nelson Wettlaufer of Lindsay visited their old home here the past week.

Rev. D. A. Walker B. A. is at Port Elgin today, taking part in the ceremony of dedicating the new Masonic Hall.

Mrs. D. Sheehan and daughter Dorothy of Niagara Falls, N. Y., are visiting at the home of Mr. and Mrs. A. Ernest.

Mr. Fred Eidt of Elmsford, N. Y. was home attending the funeral of his mother, Mrs. Nicholas Eidt on Sunday.

Mr. E. Glave removed yesterday in Mrs. MacLean's house on Victoria St. the house formerly occupied by Mr. W. M. Shaw.

Mr. Thomas Cunningham was seized with a bad spell of sickness on Tuesday morning but is making a good recovery.

Miss Marjorie O'Connor of Toronto, accompanied by her little niece, Constance O'Connor Gordon, are guests at Mr. M. Goe's's.

The engagement of Miss Elizabeth Heldmiller to Mr. Jacob Schurter has been announced, the wedding to take place on June 21st.

Mr. Charles Stephan, who has been under the weather for several months, has gone off for a holiday, on his doctor's advice, in Algonquin Park.

A merchant suggested to the Telescope to-day that the business people close up a couple of hours Saturday afternoon during the Military Sports.

Open air service for the 160th Batt. will be held on the Armoury Lawn next Sunday morning at 9.30 o'clock. It will be short service and it is expected that all the ministers of the Town will take part.

Misses Hazel Ritchie, Mabel Ackert, and Messrs. Alex. Bain and Wilford Johnston of Paisley, Mr. and Mrs. W. Ritchie and Bobby Taylor of Walkerton spent Sunday with Mr. and Mrs. Gordon Ritchie at Greenock.

Jupiter Pluvius did his very worst to ruin the June fete given by the Hospital Aid on Friday, but on this occasion the old fellow was no match for the plucky Entertainment Committee, who went right ahead with their arrangements in spite of everything and what is more made a success financially of their venture. The net proceeds of the affair amounted to $135.00 Had the lawn not been water soaked, and the clouds spilling rain intermittently, it is safe to say that these figures would have been easily doubled.

"Rexall Orderlies are the most pleasant and sure remedy for constipation." Sold only at Rexall Drug Store, 15c and 25c. A. P. Seiveright.

George Kilmer, an old Walkerton boy, and son-in-law of Mr. N. Crawford, has been appointed Corporation Counsel of Toronto at a salary of $7,100.

Arthur Cryderman, teller, of the Bank of Commerce, Niagara Falls is spending his holidays with his parents, Mrs. and Mrs. C. W. Cryderman.

Rev. F. H. Russell, who is returning to India after a year's furlough, along with Mrs. Russell, will preach at Knox Church next Sunday, at both services.

Elliott Dixon writes to his father, Crown Attorney Dixon that on the breaking up of the 71st Batt. he was transferred to the Machine Gun Section of the Grenadiers of Montreal.

The young people of the Evangelical Y. P. A. held an enjoyable social evening on the parsonage lawn on Tuesday evening, games were enjoyed followed by a contest, and a tasty lunch.

Mr. William George had a largely signed petition of citizens ready for presentation at the council meeting on Monday night but was detained at Hanover and did not get the petition in. It urged the council to action regarding the station to station permanent roadway. "Billy" said he had no difficulty in getting signers. In fact he had no refusals, everybody being a unit in boosting for a good roadway.

Large crowds attended the open air services which were held at the Bell Telephone Corner on Sunday and Tuesday evenings by Ensign Martin of the Salvation Army. The Ensign was here in connection with the Social and Prison work during the past week. He was assisted by a number of Salvationists belonging to the 160th Batt. and on Tuesday night by Lieut. Rowland of Listowel. A total of $77 was collected for the work.

The rediculous story that the socks knitted by the ladies do not get to the soldiers at the Front finds no champion in Mrs. Joseph Quinlan of Chepstowe, who was pleased to receive the other day a warm acknowledgment from a Canadian soldier at the Front, who received a pair of woolen socks knitted by her hands. By an odd coincident the recipient of the socks, Pte. M. J. Quinlan, bears the same good old Irish name as the donor. "Many, many, thanks", he writes, "It is indeed a great credit to the kind ladies of Canada who have done so much for the comfort of the boys out here."

✦ ✦ ✦

Housekeeper Wanted

For farm home; family of three; no children. Apply at Goode & McKay's

✦ ✦ ✦

Killed Near Hanover

A young farmer named Himmelspach, living between Carlsruhe and Hanover, was killed on Saturday by a load of stone falling upon him. He was in his 24th year.

✦ ✦ ✦

Kraemer—Casganette

The marriage of Miss Olive Casganette to Mr. Peter Kraemer was quietly solemnized at the R. C. church, Riversdale, on Wednesday of this week, Rev. Father Capp, officiating.

✦ ✦ ✦

In French Hospital.

Word was received at Hanover on Saturday that Lieut. Harold C. Young, who was reported in the casualty list last week as missing has turned up wounded and is in a hospital in France.

✦ ✦ ✦

Leave Next Wednesday

Lt.-Col. Weir informs the Telescope that the 160th Battalion will entrain for London next Wednesday morning at 9.30 o'clock. Two special trains, both double headers, will convey the battalion to camp at London.

✦ ✦ ✦

Military Sports

A big program of military sports is being put on by the boys of the 160th Batt. at the Exhibition Grounds on Saturday afternoon. As this will be the last chance to see the boys before they leave for London, a big crowd is expected.

✦ ✦ ✦

Children's Shelter

A Children's Shelter which has been a very great need of the County Children's Aid Society is to materialize at last. The County Council agreed at the June meeting last week to provide $1,000 for the purpose of obtaining and furnishing a suitable building, and a grant of $300 per year towards maintenance.

✦ ✦ ✦

Saved From Waters Grave

By the good work of scores of soldiers and civilians, Alvin Gillnitz to-day is lucky to be alive. While driving up Campbell Street about 9.30 last night in Mr. Albert Bell's car, he in some way lost control and the car plunged over the little bridge into the creek turned turtle and Alvin underneath, when luckily some soldiers happen to be near and ran to the rescue and managed to lift the car enough to let Alvin out, who for all he went through was none the worse but for a good soaking. The car was badly damaged.

TOWN COUNCIL MEETING

Will Pass By-Law Regarding Sanitary Matters — No Word Yet From Hydro Electric Commission

The Town Council held its regular monthly meeting on Monday night, Mayor Lippert in the chair and all the members present.

Mr. James Warren, C.E. wrote to the Council suggesting that the town sewers would be the better for a thorough flushing out. This suggestion will be acted upon by the Streets Committee.

Sec. F. S. Spence of the Ontario Municipal Association invited the Council to join the Association and send a delegate to the Annual Convention at Toronto on August 30-31. No action was taken, Coun. Russell being the only councillor to speak up for sending a delegate.

A letter was read from Mr. Henry Williams stating that he had found he had been paying $1.50 per year for water service for a horse the past six years, and as he had never kept a horse during all that period, he asked that the amount be credited on his account. Mr. Williams' complaint will be investigated by the Waterworks Committee.

A Sanitary By-law

A letter was read from Mr. A. Collins, Secretary of the Board of Health, suggesting that the Council pass a bylaw dealing with the regulation of water closets, similar to the bylaw in use in the town of Clinton. There all closets have to be disinfected by the owners, and properly looked after, and a suitable person is engaged to remove the contents of all closets once a month between May 1st and Nov. 1st, and at least twice during the balance of the year. The Streets Committee thought well of the suggestion and recommended that a bylaw be drafted along those lines.

Civic Holiday for Walkerton was fixed for Monday, August 7th.

Mr. Wm. Hutchison called the Council's attention to the fact that sidewalk on Queen St. had been left uncompleted since 1913. The Council decided to hold a special meeting in two weeks' time to deal with the question of what sidewalks are to be laid this year, and to pass sanitary by-law.

John A. Robertson, Secretary of the Fire Underwriters' Association wrote calling attention to the complaint regarding the condition of hydrants in their inspector's report.

On the recommendation of the Fire and Water Committee, Secretary Freiburger of the Fire Brigade was given a salary of $3 a year and the Steward of the Brigade $3 a year, a report to be sent in to the Council at least once a year.

What About Hydro?

Chairman Russell of the Streets Committee reported progress on the scheme to build a station to station permanent roadway. He had written to the Highways Branch of the Provincial Government for certain information and expected to have an engineer on the job before long.

Councillor Douglas asked if any information had been received from the Hydro Electric Commission.

Town Clerk Collins stated that only the one letter, which he had showed the Mayor, had been received. It simply acknowledge the receipt of the Town Council's request to send an engineer to Walkerton, and stated that the letter had been handed over to the Commission.

Councillor Douglas thought the Commission ought to be made to understand that the Council was getting anxious about the matter.

Mr. Collins said he would write again the following day, calling the Commission's attention to the matter.

Coun. Russel asked the Council's permission to get some gravel for patching the road between the two stations.

Coun. Arscott asked why not get the old crusher out and grind up some of the stone pile for that purpose.

Tax Collector N. Crawford reported that he had handed in his tax roll. The total amount collected was $27,000 with about $1000 unpaid, including arrears.

The report of the Underwriters' Secretary was received, recommending an electric gong for the fire hall.

New Mathematics Master

The High School Board has engaged Mr. John T. Knowles B. A. as Mathematical Master to succeed Mr. R. A. Ferguson B. A. who goes to Georgetown. Mr. Knowles is an honor graduate of Queen's University in Mathematics and Physics and has had four year's teaching experience. His salary will be $1100.

✦ ✦ ✦

Capt. Reid Not Wounded

Mr. Adam Reid of Pinkerton received a reassuring cablegram from his son, Capt. John A. Reid C. A. M. C. whose name appeared among the wounded in last Thursday's casualty list. The cable read:—

"Casualty list mistaken. Not wounded at all."

Capt. Reid has no doubt been in the thick of the recent fighting and it is a source of great comfort to his people to know that thus far he has come through unscathed.

CURRENT COMMENT

Sir Douglas Haig may be just waiting for the word from Joffre.

Right and justice have triumphed over prejudice, and Mr. Brandeis, the Jew, will be elevated to the U. S. Supreme Court.

Now that Rome has adopted the daylight saving movement, let us do as the Romans do.

Ontario has borrowed $1,000,000 at 5 per cent. in New York. What with borrowing and automobile reciprocity, we are being slowly merged into our neighbors.

If Germany could dictate terms she would not bother about peace conferences.

The Belgian refugees living in Britain cost her $5,000,000 a month. Truly the old country is financing her allies.

The Buffalo News declares that Britain "stands to-day as the hope of the Allies for their ultimate success." Correct.

Five hundred bartenders are out of work in Manitoba. The recruiting officer should get busy.

The Winnipeg Board of Trade is trying to educate the public into the use of coppers as a medium of barter. It used to be nothing else than a nickel in Winnipeg.

One hundred and sixteen men of the National Guard of Texas refused to turn out to protect the State from invasion by the Mexicans, when called upon by the authorities. Some slackers there.

"If the wives of soldiers are [illegible] better now than before the war, as they should be," said Sir John Willison. We agree. They should not [illegible] for because their husbands are at the front.

A Montreal man got $1,050 damages for the injury of his daughter, who was hurt by a street car, part coming from the city and part from the street railway company. Both were to blame.

The refusal by Germany, says the Buffalo Express, to accept Great Britain's conditions for sending food into Poland because Great Britain stipulated for the simultaneous feeding of Serbia, Montenegro and the portions of Poland occupied by Austria appears both petty and cruel.

The Financial Post of Canada favors the exhibition at the Toronto Exhibition of those articles which Germany supplied to Canada in so large numbers before the war, with a view to have all such manufactured here. It would like to see the exhibit shown in Hamilton also. The idea is not a bad one.

Col. T. L. Cantley, of the Nova Scotia Steel & Coal Company, which is building a 2,000 ton collier for the coasting trade, says, "This initial venture may lead to far-reaching results in the development of a naval and commercial steel shipbuilding industry." The colonel evidently believes that Canada could build a navy.

The crime for which Waite, the New York poisoner, was sentenced was committed on March 12th. The murderer was indicted on March 31, arraigned May 10, put on trial May 22, and declared guilty on May 26. He was sentenced on June 1 to die in the week beginning July 10. No needless delay here. But he will not die in the week specified. His appeal for a new trial will keep him alive for some months at least.

Count Reventlow writes: "We regard it as one of the most important economic questions of the future, a question that is most intimately connected with Germany's ability to compete in the world's market, that Belgium should cease to be an economic barrier between the Germans and the industrial districts and the ocean. If that be the German view, the war will go on until the view changes.

But the contention of the Canadians that citizens of the United States have no exclusive rights in the name "American" is worthless. Ong Habinen, at the time of the Revolution, used the name "American" to distinguish the residents of the Thirteen Colonies from the residents of Canada, and Canadian writers have used the word "Americans" in contrast with "Canadians."—Philadelphia Record.

Then Frenchmen have no claim to be called Europeans. A man who is born on the American continent has a perfect right to be called an American.

Now we are beginning to understand why Grand Duke Nicholas was drawn out of the Carpathians and back into Russia. It was treachery in high places at home. Soukhomlinoff, the War Minister, is in jail charged with high treason. The failure of munitions was traced to Soukhomlinoff. He was responsible for thousands of lives lost, for thousands of wounds and mutilations suffered by the rank and file of the brave Russian army. He lasted until March, 1916, when he was deposed from the Council of the Empire by the Czar, and could wear his crosses, stars, medals and regalia no longer. Now he has been degraded.

'TWIXT LOVE AND PRIDE

He was in a delightful mood this morning, as he held his head high to catch the fresh, invigorating January breeze, walking quickly onward the while. Did not each step bring him nearer to her who was his chief thought, nearer to the time when he should see her, hear her voice, touch her hand again? The world seemed to him a beautiful place just then, free from stain of care or sorrow, the leafless trees even, as they sighed in the wind and rattled their naked arms together, possessing a charm unknown to him before.

He had built his castle, and was living in it blissfully, unthinking of the morrow. Alas, that so soon that castle's foundations must be proved but air!

And he passed the ivy-covered church that every Sunday was thronged with the church-going folk of Clifton, he perceived the side door open, and, pausing, partly from vague curiosity, partly from an indistinct longing to see again the pew where he had seen her sit, he turned aside, and, entering, advanced two steps within the portal.

But no further did he go, for even as he stopped his eyes fell upon the sole occupant of the building—upon Mildred—as with clasped hands and bended head she knelt before the altar rails.

She might have been almost carved in stone, so motionless she knelt, nothing betraying the life within her; while from the stained glass above a stream of crimson, gold and blue, born of the wintry sun, fell down upon her, illuminating all her yellow hair and violet velvet dress.

Her attitude might betoken devotion, sorrow, or despair; who could say? She was on her knees, lost to the world, ignorant of Denzil's presence, as he stood, spell-bound, and watched her. Then all at once her white fingers trembled, and a faint, sad sound escaped her. Was it a sob—a sigh?

Denzil went out into the churchyard again, and continued his way, the memory of that faint, uncertain sound chilling to death all the gladness that had been in him. Was it a sob? Could anything have happened?

At the park gates he came upon little Paul, the heir of Ryelands—Lady Caroline's only grandson—engaged in "fisticuffs" with the gate-keeper's boy. Denzil being a special favorite of his, as indeed he was with most children, Paul at once forgot all about the score he had been so anxious, only a minute before, to settle with young Duffy, and, running to his newly-recovered friend, threw his arms around his neck with boyish fervor and enthusiasm.

"Oh, Denzil, is it you?" he cried, rapturously, while young Duffy looked on in high disgust at having his chance of "licking a swell" so unceremoniously put an end to. "I am so glad to see you; and it was only this morning Eddie told me he firmly believed you were not coming at all. How long are you going to stay? Why don't you come for Christmas? Did you remember to bring me the knife you promised?"

Denzil certainly had not remembered but he wisely refrained from saying so, and, putting his hand into his pocket, drew out a very handsome knife of his own, which he presented to the expectant boy.

"Oh, what a beauty!" cried Paul. "Three blades—and what is this? A corkscrew! Oh, father's has a corkscrew! How did you guess the one I should like, Denzil? But"—checking himself suddenly—"come home and see them all."

As they moved off, young Duffy could restrain himself no longer, and flung his parting shaft.

"So ye were frightened, were ye?" said he, with an unpleasant grimace.

"I wasn't!" roared Paul, indignantly, facing round. "Do you suppose I'd be frightened of a fellow like you? Why, I'd thrash you, and half a dozen like you, as soon as I'd look at you! I must go home with my friend now; but I'll meet you here again to-morrow with the greatest pleasure."

"Oh, you will!" returned young Duffy, with charming brevity.

"Yes, I will!" returned Paul, furiously. "What a cad you are, you Duffy, to think a fellow would say a thing of the kind and not mean it! Look here—I'll fight you to-morrow at this hour, and lick you, too, into the bargain, if you choose to be here."

"Oh, I'll be here!" said young Duffy, still laconic and still sneering, with heavy emphasis on the personal pronoun.

"Come away, Paul," interrupted Denzil. "I am in a hurry. You can fight him to-morrow, if you wish it—but come with me now."

"Frightened of him indeed!" muttered the incensed Paul, as he suffered himself to be led off without further parley.

On his way he recovered his spirits.

"We have all been so awfully dull," he confided to Denzil—"every one of us—even Aunt Queenie. You know Mr. Blount went away to Ireland, so she has been in the 'blues' ever since. When I heard you were coming, I asked mamma to let me stay with gran-ma for a while, and she let me, because Florence is getting her teeth, and that makes her dreadfully cross, you know, and mamma was glad to get one of us out of the way—we are so many, and so extremely troublesome," prattled Paul, with artless candor, borrowing words and phrases originally uttered by his elders.

"Well, I consider it rather a fortunate thing for me, that Florence should be cutting her teeth just now," said Denzil; 'otherwise I might perhaps have missed the pleasure of your society."

"Just so," returned Paul; "mamma is so particular about us, and says Eddie is not at all a good child's guide. But I did not tell you about my white pony that papa gave me as a Christmas box—such a darling—goes like wind, and jumps, mind you—jumps"—in a mysterious whisper—"as well as a big horse. But don't tell that to gran'ma, because she would tell mamma, and they they would take Madge away from me. It is a horrible nuisance being the only boy, you know," wound up Master Paul, plaintively; "they make such a fuss about one, and coddle and bother one so."

"Poor fellow!" said Denzil, sympathetically.

"I suppose there will be some fun now that you have come," went on the lad, with that happy inability to preserve silence peculiar to boys; "and I am sure I hope so. Aunt Mildred mopes so, and looks so discontented, though one would think she ought to be satisfied at last, now she has made up her mind."

"Made up her mind about what?" asked Denzil, quickly.

"Why, about that Lyndon, you know," said Paul.

"What of him?" demanded Denzil, sharply.

"Why, she is engaged to him," replied Paul—"did you not hear of that? I thought all the world knew it by this time. They are to be married in the spring, and she looks as if she was going to be buried instead of wedded."

"Paul," said Denzil, "run in and tell Lady Caroline I am coming. I will follow you presently. Hurry, my lad—I should like her to know of my arrival."

"All right," returned Paul, and hurried away on his errand, suspecting nothing of the bitter agony he had raised in the bosom of his friend.

CHAPTER XIX.

When the boy was out of sight, Denzil turned, and entering a smaller avenue that led away toward the park, walked on rapidly in a direction leading from instead of to the house. This path wound its way through the wooded parts of King's Abbot almost into the village, and was a favorite short cut with the Trevanions, being in summer shaded from the sun, and in winter dry and sheltered.

Suddenly, without a moment for reflection, with no sound of approaching footsteps to warn him, he came upon Mildred Trevanion, advancing slowly and with listless footsteps to where he stood, stayed by the unexpected apparition.

She was thinner than when he last saw her, he fancied, and the traces of tears lay still wet upon her face—not enough to disguise its beauty, but to render it pale, sad, pitiable. With all Paul's tidings yet fresh within his mind, he knew that he had never loved as he loved her now. Mildred, cold and indifferent, had chained his heart against his will; to Mildred, white and mournful, he gave it with a passionate rush of tenderness that almost overwhelmed him with its intensity.

She came on toward him, with head bended, and thoughts far away in either past or future, not thinking of him until she stood within a few paces of where he was. She started then, but not very perceptibly, while a faint flickering of her eyelids alone betrayed the agitation she really felt.

"You have arrived, Mr. Younge," she said, in a studiously composed tone, and held out her hand, which he took and held for a moment, even returning its pressure, though he never afterward remembered having done so.

"How did you leave them all at home?" she asked presently.

"All very well, thank you," he answered, being still in his dream, and uncertain of everything except that Mildred was close to his side.

When she once more moved to proceed on her way homeward, he turned also and walked on beside her in silence, until they reached a small path, gravelled and hedged in on either side by laurels, rhododendrons and myrtles, which led more directly to the house. Already the chimneys were visible, and Denzil, knowing that another turn would bring them within full view of the windows, stopped abruptly.

"I hear you are to be congratulated," he said—"is it true?"

"Yes, it is quite true," answered Miss Trevanion, steadily, disdaining to put off the evil hour by equivocation or pretended ignorance.

"Then you are going to marry him after all," said Denzil.

"I am engaged to be married to Lord Lyndon," returned Miss Trevanion, coldly.

"And have been so for two months," said Denzil, hurriedly, "yet I never heard it—no one remembered to tell me, leaving the news to be broken to me by a boy—a mere child."

"Was it Paul who told you?"

"Yes—Paul. I met him at the entrance gate, and he told me as he came along." Then, very abruptly, Denzil asked, "Are you happy?"

"Of course I am happy,' she answered, with a faint accession of color. "Why do you ask me such a strange question? Do I look unhappy?"

"I think you do," he said, gently; "your face seems changed to me, it does not wear its old expression; and just now, as I was passing the village church, I glanced in for a moment"—she raised her eyes anxiously—"and saw you. You were kneeling at the altar rails, and, as I watched you—forgive me, it was but for an instant—I thought I heard—Mildred, were you crying?"

"And so," observed Mildred, pettishly, giving no heed to his question, "because one happens to feel a little fretted about some trifling matter, and cries a few silly tears, one is to be considered in the lowest depths of despair? It is absurd. I will not listen to such folly; Lord Lyndon, I am sure, would not wish me to do so, and ——"

"And he is everything to you now, while I and all the rest of the world count as nothing," interrupted Denzil, bitterly—"is that so? Do you expect me to believe that? Because, if you do, I shall tell you plainly that I do not believe it, and never shall. He is unsuited to you in every way, having not an idea in common with you. Oh, Mildred"—passionately—"why have you done this thing? Why have you sacrificed your whole long, sweet life so miserably? Was there not some good reason for it of which I have never heard? Could you not have waited? My love, my darling, is there nothing I could do for you?"

His whole heart was in his voice as he concluded, while his beautiful eyes, large and dark always, appeared now haggard and almost blue-black with the pain that filled them.

Looking at him, Miss Trevanion felt her own eyes grow dim and sad with tears, but she was yet faithful to the man she had promised to marry, and would make no concessions.

"There is nothing I would have done," she answered, half angrily. "Why will you persist in thinking I have done something worthy of repentance? I am happy—do you hear me?—perfectly happy. I have accepted my position willingly and of my own free choice, and I do not wish it altered or undone in any single way. I have quite made up my mind; and, although you once told me you considered me unworthy to be the wife of any honest man, still I am vain enough to believe that at all events I can make this most honest man fairly contented."

"I was mad when I said that," rejoined Denzil, slowly. "Many a time since have I recollected my words, and felt how brutal they must have sounded. But surely you will forgive me now—at this moment when I am learning for the first time how miserable and bare and cold a place this world is. Let me bid good-bye to all my hope with the certainty that at least you bear me no ill will."

He held out his hand as he spoke and took hers. Mildred's voice failed her, but she managed to whisper faintly—

"Give me your forgiveness also."

"If you think it necessary," he said, "you have it; but I can remember no wrong you ever did me."

They were standing with hands clasped and eyes reading each other's hearts. Denzil drew his breath quickly.

"Good-bye," he murmured, despairingly, and turning away abruptly, passed rapidly out of her sight.

And now began his misery; not until now—in spite of all Paul's information—did he thoroughly realize to himself the full extent of the misfortune that had befallen him. True, he had been refused, slighted, almost scorned by this girl; yet not until the hour came when all hope must necessarily be at an end did he learn how vivid his hopefulness had been.

For the last months, almost unknown to himself, he had lived on the thought of seeing her again—had been picturing her in every graceful attitude and position his too faithful memory had kept warm within his heart. And now everything was at an end; never more could he think of her but as of one dead, or suddenly removed and passed away from him forever. Lyndon had gained easily, and as it seemed to Denzil, without any very great desire for it, that for which he would have willingly bartered away all he possessed on earth.

And yet had he obtained it? Somehow Denzil could not divest himself of the belief that Mildred's love was a thing not included in the wedding arrangements already going forward. She was giving only the half—and that the worst half—of herself to the man she was going to marry, and he was either wretchedly deceived, or, conceding this knowledge, was content to take her as she was. It appeared a horrible thing and unnatural to accept a woman's word and make her a wife, knowing her heart to be still safely locked within her breast—for never for a moment did it seem probable to Denzil that he alone might be the one who could unlock that stronghold. And indeed there was no reason why he should have thought so; of all the lookers-on not one in Clifton imagined that Mildred Trevanion had given her heart to Denzil Younge. Perhaps, had such an idea taken hold of him it might have made the pain a little more bearable; as it was, he covered his face with hands and groaned aloud.

CHAPTER XX.

When all the people at King's Abbott met to dine Denzil was among them, and very welcome he found himself. Charlie alone of all the family was absent; but even he had written word to say that he would be with them for a day or two in the course of the following week. It was a bitter night and freezing hard, so hard as to indicate great things for those who were fond of skating.

"We ought to get up a party and go to the lake to-morrow," suggested Eddie, during a pause in the conversation.

Lyndon, who was also dining with them, and who generally agreed with everybody, said he thought it was "a capital plan," and appealed to Miss Trevanion, who sat beside him. She thought she had lost her skates, or misplaced them, or something; but Frances Sylverton—who had beautiful feet, and never objected to show them in appreciative society—overruled all such opposition by declaring that she had several pairs to lend, and that a day on the ice would be delicious.

"But perhaps it will be hardly safe enough this week," she added, somewhat anxiously. "Shall we wait until Tuesday next?"

"Charlie said he would be down on Monday night," put in Eddie, innocently, a propos of nothing, and without lifting his eyes from the cream, on which he was sedulously intent; whereupon Miss Sylverton blushed furiously, and declined any further investigation of the subject.

Finally, however—chiefly through the instrumentality of Mildred—the expedition was arranged to take place on the Tuesday following, so that Frances, in her inmost heart, was satisfied.

In process of time the day arrived—as also did Charlie the night before, very much to the satisfaction of everybody concerned in the excursion—and, after a considerable amount of harmless and utterly unavoidable squabbling, the party—which had become rather a large one, in consequence of numerous invitations issued later on—divided into twos and threes, as circumstances or inclinations dictated—Lady Caroline, Mrs. Deverill, and one other married lady occupying the first open carriage; while Charlie, Miss Sylverton, Jane Deverill, and Captain Harvey took possession of the second.

Mabel, seeing Denzil looking slightly dejected, with her usual sweetness had entreated him in the prettiest manner to drive her in the dog-cart; and Eddie, who at this period was hopelessly and finally in love—for about the fifteenth time—with an extremely pretty, but decidedly idiotic little girl, staying with the Deverills, had managed to vanish in some mysterious way, in company with others similarly heart bound; while Mildred, whom nobody seemed to want, and with whom none of the opposite sex in these days attempted to interfere, fell to Lord Lyndon's lot, much to his open comfort and satisfaction.

(To be continued.)

Now that Servia has acquired a navy, Egypt will be demanding recognition of her ships of the desert.—Washington Post.

What He Got Them For.

Among some skaters was a boy so small and so evidently a beginner that his frequent mishaps awakened the pity of a tender-hearted, if not wise, spectator.

"Why, sonny, you are getting all bumped up," she said. "I wouldn't stay on the ice and keep falling down so; I'd just come off and watch the others."

The tears of the last downfall were still rolling over the rosy cheeks, but the child looked from his adviser to the shining steel on his feet and answered:

"I didn't get some new skates to give up with; I got 'em to learn how with."—The Presbyterian.

Sore Corns Go! Absolutely Painless

No cutting, no plasters or pads to press the sore spot. Putnam's Extractor makes the corn go without pain. Takes out the sting overnight. Never fails—leaves no scar. Get a 25c bottle of Putnam's Corn Extractor to-day.

ANOTHER VERSION.

(From Sydney Bulletin)

I didn't raise my boy to be a soldier,
I want another's boy to fight for me;
I'd rather know another's heart is bleeding
That I may live in sweet security;
I don't care if my neighbor sends a dozen,
Provided of my brood there isn't one
Who goes to face the shrapnel for his mother—
I didn't raise a soldier in my son.

And if the foe should level our defences,
And pour their spoilers in our little town,
And give the houses up to fire and pillage
With no respect to babe or woman's gown;
When I am rudely handled by the butchers,
And shrieks announce "The ravishing's begun,"
My boy can lie concealed within a garret—
I'd never seek protection from my son.

But if the troops again return triumphant,
With victory like an eagle on their crest;
I'll sing in joy (and he will sing beside me):
"We didn't do our duty with the rest!"
We share, of course, the freedom they have gained us,
And glad are we of all the boys have won,
But as to risking him—Oh, no! my neighbors,
I didn't raise a soldier in my son!

Minard's Liniment Co., Limited.

Dear Sirs,—This fall I got thrown on a fence and hurt my chest very bad, so I could not work and it hurt me to breathe. I tried all kinds of Liniments and they did me no good.

One bottle of MINARD'S LINIMENT warmed on flannels and applied to my breast, cured me completely.

ANTIQUES

None of the industrial arts of our age have been so dependent for their inception and development in their every phase and feature upon the antique models preserved in our public museums and private collections as have those embraced in the craft of pottery making.

Is Canada about to enter this great field of industrial art? The museums of the world are open to us for motifs of form, decoration and purpose. Is the recent announcement that china clay has been found in Canada a "message" to us?

A few years ago the writer of these notes listened to an address delivered by the professor of chemistry from a technical college upon "The Message of Pottery." After quoting the concluding lines of a poem by Keats on "A Greek Urn":

"O Attic shape!—
When old age shall this generation waste,
Thou shalt remain, in midst of other woe
Than ours, a friend to man, to whom thou sayest,
'Beauty is truth, truth beauty'—that is all
Ye know on earth, and all ye need to know."

The lecturer said, "These lines are very noteworthy, but although Keats could see so important a 'message' in a vase, he doubtless had only form and design in his mind, and gave no thought to the material itself. In his day little was to be said of this, the 'scientific brain' had scarce attempted to imperplex its secrets; meanwhile knowledge is grown apace, and the story to be told of mere clay, unworked, unformed, unbaked, scarce digged from the bowels of the harmless earth, is now of transcendent interest; and yet so backward is our civilization how few of us know this." "Clay, sand and limestone are met with all the world over; in fact they are the dominant components of the crust of the globe on which we live. Little which is fundamental in chemistry remains to be learnt when they are understood." "The history of the globe is still in various forms of earth, and the early history of mankind is recorded almost entirely in clay remains."

"We are working with Nature's materials, and we know what infinite variety she has made of them."

The announcement above referred to says: "China clay has been discovered in Canada." This "material" is identical with the "Kaolin" of the Chinese. It is a chemical compound of silica and alumina. It is found in a state of partly decomposed granite, and the portion of the granite which yields the clay is the silica and alumina. The cause of the decomposition of the granite is not positively known, and geologists differ in their views on the subject.

THE SALAD BOWL.

Interesting Discussion About This Health Giving Entree.

Salads are capable of infinite variety, so when fish and cheese fail vegetables which approach animal foods in nutrition may be served, and either the oil in the dressing or the fat in the cream or melted butter of a boiled dressing may be depended upon to supply the necessary oil. Try a bean salad. A pound of this vegetable contains as much protein as is found in half a pound of lamb chops or half a dozen eggs. Cool freshly boiled limas, also some rice (dried in the oven until the grains separate), salt slightly and mix them in equal quantities; fold in some stiff mayonnaise and serve very cold in lettuce cups. Peas and lentils, which are so rich in protein, are very desirable for salads in place of meat. Cover two cupfuls of cold baked beans with French dressing and let stand a half hour; drain, sprinkle with half a teaspoonful of onion juice, mix with cream dressing, arrange on lettuce leaves and garnish with parsley and hard cooked eggs. Lentils combined with onions, peppers and parsley and served on cress with French dressing make a hearty and tasty salad.

A fruit salad has the advantage of being very healthful, for nearly all fruits hold acids and salts in solution which are cooling to the blood, and there are so many fruits available that none needs to become tiresome. Pears as a salad, once tried, will appear often this way: Peel large pears, halve them, remove the cores and drop them into cold water in which is a tablespoonful of vinegar to keep them white. Fill the core cavity with either grated cheese or cream cheese balls and serve on lettuce with French dressing. When mayonnaise is used with fruits leave out the mustard and pepper, put in a little sugar and use lemon instead of vinegar. In no case should a boiled acid dressing be used with fruit salad.

SIR JAMES WATSON'S OPINION CONSIDERED MOST VALUABLE

He says that the commonest of all disorders, and one from which few escape is Catarrh. Sir James firmly believes in local treatment, which is best supplied by "Catarrhozone." No case of Catarrh can exist where Catarrhozone is used; it is a miracle-worker, relieves almost instantly, and cures after other remedies fail. Other treatments can't reach the diseased parts like Catarrhozone, because it goes to the source of the trouble along with the air you breathe. Catarrhozone is free from cocaine; it leaves no bad after-effects, it is simply nature's own cure.

Beware of dangerous substitutes offered under misleading names and meant to deceive you for genuine Catarrhozone, which is sold everywhere; large size, containing two months' treatment, costs $1.00; small size, 50c; trial size, 25 cents.

THEY WERE SPIES.

French Woman Who Suspected Them Did Country a Service.

"Here is a Paris spy story," says an Englishman, "for every particular of which I can vouch. A Parisian petite bourgeoise, who, being half a Lorrainer, knows German, was travelling in the tube. In the same carriage were two men in the uniform of British officers. They spoke in a low voice to one another. She does not know English, and though they might be speaking English, but once or twice they spoke louder, and she thought what they said sounded remarkably like German. She noticed both men particularly, as both were striking looking and handsome.

At one station a fat, heavy man got out and trod on the toes of one of the presumably English officers. The officer ejaculated an oath in unmistakable German. The French-woman was more and more interested. When the two 'British' officers got out at a station near the Etoile a distance. They went to a small, low-class lodging-house near the Porte Maillot. She took note of the address and looked for a policeman. When she found one he washed his hands of the whole thing, and said he could have nothing to do with spies; she had better go to the nearest police commissary. She did so, and reported what she knew.

This was two months ago. She heard no more about it till the other day, when she received a letter from the French military authorities, signed by a high official, and enclosing 1,000 francs with their best thanks. The letter said that, owing to the information she had given two leading spies, who had been going about disguised in the uniform of British officers, had been caught and dealt with. The little bourgeoise's pride at the service she had rendered and at the reward she received may be imagined.

WITHOUT PURE BLOOD HEALTH IS IMPOSSIBLE

Owing to faulty action of the kidneys and liver, the blood becomes filled with disease germs that imperil health.

The first warnings are backache, dizziness, headache and lack of energy. Act quickly if you would avoid the terrible ravages of chronic kidney complaint. Get Dr. Hamilton's Pills today; they cure kidney and liver troubles for all time to come. No medicine relieves so promptly, cures so thoroughly. For good blood, clear complexion, healthy appetite, use that grand health-giving medicine, Dr. Hamilton's Pills. Get a 25c box today.

Posthumous Influence

The relations between man and man cease not with life. The dead leave behind them their memory, their example and the effects of their actions. Their influence still abides with us; their names and character dwell in our thoughts and hearts; we live and commune with them in their writings; we enjoy the benefits of their labors; our institutions have been founded by them; we are surrounded by the works of the dead; our knowledge and our arts are the fruits of their toil; our minds have been formed by their instructions; we are most intimately connected with them by a thousand dependencies. Those whom we have loved in life are still objects of our deepest and holiest affections. Their power over us remains.—Andrews Norton.

TO CANADA.

[Verses suggested by the proposal to plant maple trees over the graves of Canadians who have fallen on the fields of battle.]

Oh, land of gold and snow across the sea,
Through every changing season of thy year
War reaps her harvest of thy chivalry,
And claims her victims of thy loved and dear.

They lie at rest, and there still roars across
Their narrow graves the cannon's deafening boom,
Yet over those mounds already creeps the moss,
And with the soft warm rains fair flowers shall bloom.

With the long years to rise and pass away
Shall emblems of the land they loved be born,
In beauty burst, in fire shall end their day,
Each spring a glorious resurrection morn.
—Charlotte Pidgeon, in the Empire Review.

HIS CAPACITY.

HELP WANTED.

WANTED—COMPETENT MAID-GENERAL. Family of three. Good wages. State age and experience. Address, P. O. Box 8, Hamilton, Ont.

GIRLS WILLING TO WORK ON British Army Orders, knitted underwear. Seamers, plain stitchers and learners. Bright, healthy employment. Good wages. Zimmerman Mfg. Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.

WANTED — HOUSEMAIDS AND waitresses. Previous experience not necessary. Apply, "The Welland", St. Catharines, Ontario.

WANTED—WEAVERS AND LEARNers—wages paid while learning; experienced weavers earn high wages. For full particulars apply, The Slingsby Manufacturing Company, Limited, Brantford, Ontario.

FEMALE HELP WANTED.

LADIES WANTED TO DO PLAIN and light sewing at home, whole or spare time. Good pay; work sent any distance, charges paid. Send stamp for particulars. National Manufacturing Co., Montreal.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCAtion to train for nurses. Apply Wellandra Hospital, St. Catharines, Ont.

How to Free the Place of Rats.

"When I was a boy our farm was alive with rats," a contributor tells in Farm and Fireside.

"We noticed the rats were eating the grain and drinking the water of a sitting hen in a corner of the barn. So when the hen hatched and was moved we put strychnine in the water and the first night killed twenty-three rats and the second nineteen.

"Besides this a good many more went away to die. The best way to get rid of rats is to make them accustomed to drink at one place and then poison the water."

Minard's Liniment Cures Diphtheria.

A CHANCE FOR THE CHAPLAIN.

(The Christian Herald)

"Won't you be very, very happy when your sentence is over?" cheerfully asked a woman of a convict in prison.

"I dunno, ma'am, I dunno," gloomily answered the man.

"You don't know?" asked the woman amazed. "Why not?"

"I'm in for life."

WANTED

Help for Woollen Mill—Carders, Weavers, Fullers and Napper Tenders. Good wages paid in all Departments, and steady work assured. We have several openings for inexperienced help, where energy and ability will bring promotion. Wages paid to apprentices while learning weaving. Special inducement to family workers. Desert Gems.

In 1889 a hunter in the northwest of New South Wales wounded a kangaroo. The animal went off through the mulga and the salt bush at a pace too fast for the hunter to follow and was soon out of sight. The hunter was a bushman and did not despair. He followed the blood trail, hopeful of a short search and a speedy bag. At one point of the pursuit it may be that the trail grew faint and necessitated a closer inspection. Anyway the hunter stopped and picked up a piece of stone. This he examined. The red spot was not on it; it was in it. It was not blood that he saw. It was opal. Such was the beginning of the White Cliff's opal fields.

Minard's Liniment Cures Colds, Etc.

The Great Eastern.

The dimensions of the one-time world famous Great Eastern were as follows: Length, 692 feet; width, 83 feet; depth, 60 feet; tonnage, 21,000 tons; draft, when unloaded, 20 feet; when loaded, 30 feet. She had paddle wheels 56 feet in diameter, and was also provided with a four bladed screw propeller of 24 feet diameter. She had accommodations for 800 first-class, 2,000 second class and 1,200 third-class passengers, 4,000 in all. Her speed was about 18 miles an hour. The Great Eastern was finally broken up for old iron in the year 1889 after a checkered career of some 31 years.

WHAT HAPPENED.

(Judge.)

"What happened to the nest-egg the Smithers set aside when he married?"

"It hatched into alimony."

(Browning's Magazine)

"Did your new chauffeur fill the bill?"

"No. But he came near filling the hospital."

Made in Canada.

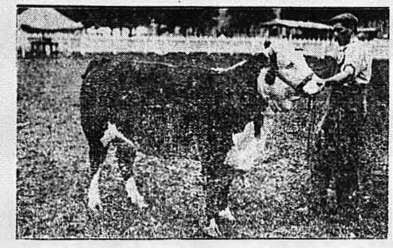
Profitable Beef Production

The Beef Calf Should be Fattened From the Time it is Born—Raising Stockers is Only Profitable on Cheap Land.

(From the Canadian Countryman.)

If the fertility of our soils is to be maintained it must be by raising more live stock and feeding the crops we raise on our own farm. When soil is virgin it has an enormous amount of plant food that is readily available for crop use. For a number of years profitable crops can be grown, but sooner or later the soil will be depleted, and if the land is to be farmed at all means will have to be taken to replace some of the lost fertility. For every 1,000 pounds live weight sheep will produce $26.28 worth of manure; cattle, $29.27 worth; horses, $27.94 worth; hogs, $37.96 worth. When a steer is fed for a year, then, it brings about $29 worth of fertility to the farm. Many think that there is no money in the feeding business. For some this may be so, but when $29 is added to the price of the animal a different light is thrown on the situation.

There are many excellent beef breeds, but for the average farmer who cannot make a specialty of beef production through lack of skill or for some other reason the best breed



More skill is required to produce baby beeves than to raise stockers, but the latter cannot be raised profitably on high priced land.

is probably Shorthorn. If they are of the milking strain the cows will yield good profits as dairy cows, and the male animals can be fattened up and will fetch top prices as butcher cattle. It is to be regretted that for a number of years past many Shorthorn breeders in Ontario in their desire to supply breeding animals for the western trade have gone in more for the Scotch type of Shorthorn and have neglected the milking qualities of their cows.

The quality to produce abundance of milk, however strong it may be, if allowed to remain latent through disuse, will gradually disappear. This oversight on the part of some of our best breeders has led to the fact that when the general farmer and breeder of the Shorthorn grades comes to look for a pure-bred sire it is often impossible to get one that will transmit milking qualities to the offspring, with the result that the farmer desiring to get milking qualities into his herd often breeds his cows to indifferent sires, often of the dairy breeds. Fortunately, however, for the beef industry, there has been a growing tendency lately among Shorthorn breeders to recognize more fully the dual purpose qualities of their favorite breed.

As the dairy breeds have come more and more into prominence and as records unheard of in former years have been produced, some so-called agricultural experts have gone around preaching that there is no such thing as being able to get an animal that will produce milk profitably, and when its service in this connection is past can still be fattened for the block. They have been taught that one must either raise beef animals or dairy animals. The fact that on the high-priced land of the Old Country over seven-tenths of the dairy herds are composed of Shorthorns of the Bates strain shows the fallacy of this argument.

Formerly when land was cheap and the price of meat high, it was the custom to carry cattle along until they were four and five years old and finish them off at a weight varying anywhere from 2,000 lbs. to 3,000 lbs. The meat produced in this way was often very coarse and lacked the juiciness and tenderness that are so desirable. The present day tendency is to have animals finished at an early age—within limits the earlier the better. There are several reasons for the change. First of all there is a considerable saving in the feed bill. In feeding animals of all kinds there is a certain amount of feed wasted. Before the animal will yield a pint of milk or put on a pound of flesh or fat, it must have sufficient food to maintain the normal functions of the body. This food is called the food for maintenance. If an animal is kept two or three years twice and three times the amount of food required for maintenance is used as would be required if the animal were only kept for one year. This points to the desirability of getting the animal finished off as quickly as possible. This does not mean, however, that high finish in young animals can be secured at little expense. The natural tendency of the young animal is to grow rather than to fatten, and if it is fed too much fat forming foods it is very apt to go off its feed. In feeding baby beeves a certain amount of roughage and coarse fodder must be given to stimulate the digestive organs and ensure that the more concentrated food is properly assimilated. Oats are always safe to feed, and some bran should be given on account of its beneficial effect on the digestive organs and the large amount of mineral matter it contains. The rich nitrogenous meals, such as oil cake, gluten meal and cotton seed meal should be fed with corn and similar starchy foods. When the animals are turned out on pasture no roughage will be necessary, but unless the pasture is exceptionally rich it is seldom advisable to dispense with the grain ration entirely.

The production of baby beef may be looked on as somewhat of a special line requiring not only the knowledge of a well-informed breeder, but the skill of a clever feeder. If the calves are not of the thick, well bred kind, they are not likely to make profitable baby beeves. Unless the feeder is able to guage the feeding so as to insure constant growth as well as fattening he may not be able to secure gains in keeping with the daily outlay of heavy feeding necessary in the making of finished beef at eighteen to twenty months old. Unless thick, fleshy, lusty calves are procurable, or unless the cattle can be placed in charge of a skilled feeder, it is safe to adhere to the middle course of aiming to get the finished steers away at from twenty-four to thirty months of age. To defer the finishing beyond this age on high priced land where mixed farming is practised will reduce profits accordingly.

Finishing stockers or feeders is a profitable business if they can be secured at a reasonable price. The question is often asked: "At what age should stockers be bought so as to get the greatest returns for the feed consumed?" As a rule the two-year-old gives the best returns for food consumed, although the profits made will depend, of course, very largely on the price for which the stockers can be obtained. Experiments carried on at the Central Experimental Farm, Ottawa, point to the advisability of letting fattening steers run loose in moderately roomy boxes with eight or ten in a box. Steers running loose will consume more feed, but will make greater gains at lower cost per pound, by anything from ten to thirty per cent. than similar steers fed and tied and given similar feed. From fifty to sixty square feet of space per steer should be allowed.

The length of time to feed will depend largely on the condition of the steers and the quantity and quality of the feed available. As a rule "short keeps" are more profitable than "long keeps." Thin steers getting lots of roughage give good returns and fair results when fed for six or eight months; whereas to get the best returns from well-fleshed steers a shorter feeding period of any from three to four months where the ration includes less roughage and considerable meal of high feeding value will be more profitable. Experience shows that a fairly large amount of succulent feed is necessary, and that silage gives better returns for the money expended than roots. Succulent feed also prevents the cattle to a very large extent from going off their feed and cheapens the cost of production into the bargain. Usually a light ration should be fed at first and the quantity of grain gradually increased, but with "short keeps" it is necessary to start with a fair amount of meal and rapidly raise to heavy feeding. Rich, nitrogenous meals, like oil cake, gluten meal and cotton seed meal may constitute early in the feeding period say ten to fifteen per cent. of the meal ration, and later on as the animals approach the finishing stage they should form thirty or fifty per cent. of the concentrates. The grain used in all cases should be ground. The number of times to feed is to a certain extent a matter of convenience for the feeder. Generally speaking twice a day will be found often enough, but some feeders claim that by feeding three times a day the animals do not eat any more and make better use of the feed they do get.

MEDIEVAL JUSTICE

In the year of our Lord 1370 in the town of Strasburg a man who had for a long while been thinking of the division of time into hours constructed one of the first clocks that was ever made. What led him to do this was that while the people could keep the flight of days by cutting a notch on a stick for every day, they could have no record of the parts of the days except by the sun.

This man who invented the clock—his name is lost, so we will call him Gustav—set it up in the tower of the church, and the people could go to bed and get up by its striking the hour. Some of them considered him an angel who had been sent from heaven for this very purpose. Straightway they committed to his care the town calendar, throwing away the notched sticks, and after that it was only he who could tell them when anything that had been appointed for a certain day was due.

One day a young man—Martin Steiger—went to Gustav and said to him:

"Gustav, I love Katrina, the daughter of Frau Tinkhorner, and Katrina loves me. But her mother is forcing her to marry old Carl Oberman, who is rich or supposed to be. I happen to know a man from whom Oberman stole a valuable jewel. This man's name is Kneift, and he has since been looking all through Germany for the man who robbed him. Kneift is now in Munich. If I go there I can tell him where Oberman is; he will come here; it will be known that Oberman is a thief and Katrina will be saved from marrying him."

"Well, then, why do you not go at once?"

"Katrina in order to gain time has promised her mother that she will marry Oberman in seven days from to-day, binding herself before the judge to do so. I cannot go to Munich, find Kneift and bring him back here before the day set for the wedding. Can you not so disarrange the calendar so that a few days shall be gained?"

"But the people trust me implicitly in the matter of the flight of time."

"What difference will a few days make to them?"

Gustav, who was a good fellow, was persuaded and told Steiger that he would do what he could for him, and Steiger set out for Munich to find Kneift and inform him concerning Oberman's present residence. While Martin was gone the clock became very irregular. One morning it called the people from their beds before the sun was up and the next struck the hour for their rising when it was high in the heavens. Gustav said that he feared the clock was bewitched.

Meanwhile Frau Tinkhorner was keeping the passage of the days on her own account by cutting a notch on a stick for every day that passed. The day before the one set for the wedding she informed her daughter that she must be married the next day. Katrina declared that the time had not yet passed within three days and refused to comply, whereupon her mother summoned her before the judge, submitting to him the agreement between them and bringing with her the notched stick to show that the time would be up on the morrow. The judge looked at it and counted the notches, but the evidence of one interested in the case keeping the record did not coincide with his great judicial ideas, and he sent for Gustav.

"Gustav," he said, "what day of the month will to-morrow be?"

"The 13th, your honor."

"But Frau Tinkhorner says she has kept a record and to-morrow will be the 14th."

"My record by the clock tallies with that," replied Gustav, "but the clock has recently been bewitched and has lost two days."

"Who has bewitched it?"

Gustav approached the judge and whispered something in his ear.

"What is your age, Frau Tinkhorner?" asked the judge.

"I am 48."

The judge started. "Are you sure?" he asked.

"Yes, your honor; I am just 48."

The judge dismissed this matter before him and ordered Frau Tinkhorner into custody on a charge of having bewitched the town clock. Gustav had whispered to him that the clock having gained exactly 48 hours, this indicated that the person who had bewitched it was 48 years old. When Frau Tinkhorner admitted that she was that age it was evident she had bewitched the clock in order to force her daughter to marry old Oberman ahead of time.

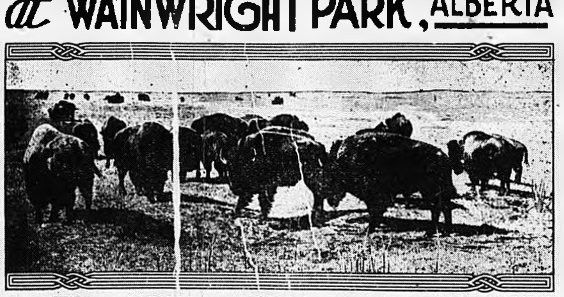
So Frau Tinkhorner was thrown into prison. Two days later Martin Steiger returned from Munich with Kneift, who went before the judge and accused Oberman of having stolen a jewel from him. Oberman was arrested and the jewel found in his effects.

But there was nothing to prove that the jewel belonged to Kneift or that Oberman had stolen it.

The learned judge summed up the case thus: It was plain that the frau had bewitched the clock for the purpose of forcing Katrina to wed Oberman. She was sentenced to be burned at the stake, and Oberman was sentenced to be beheaded.

But Martin and Katrina, having attained their ends, got up a petition to the judge for pardons, and, as he granted them, justice was defeated.

WORLD'S GREATEST BUFFALO HERD is *Now in Canada,* at WAINWRIGHT PARK, ALBERTA



That the Canadian Government is meeting with signal success in its efforts to preserve the buffalo from the swift extinction which threatened it a few years ago, is demonstrated in a report on the growth of the herd at Wainwright Buffalo Park, Alberta, just received by Mr. H. R. Charlton, General Advertising Agent of the Grand Trunk System, from Mr. J. B. Harkin, Dominion Parks Commissioner.

The report shows that in April, 1909, the herd numbered 402. Since then it has gradually increased at the rate of about 200 per annum, until today it numbers 2,077. During the period from 1909 to 1913, 338 head were imported at different times from other herds, the main increase accruing from breeding. The small loss of 71 from various causes since 1909 is high testimony to the suitability of the park as a breeding ground, and the care taken of the herd, especially during the winter, when food is difficult for the animals to find, and it becomes necessary to feed them.

The history of this Wainwright Park herd of buffalo, now the largest in the world, dates back to 1873, when one of the Pend d'Oreille Indians captured four little bison calves—two bulls and two heifers—by cutting them out of a stampeded herd on the Flathead reservation in the State of Montana. In accordance with a peculiar characteristic, often noticed by old plainsmen, these young creatures obediently followed the horses of the hunters who had slain or driven off their mothers. The Indian in question gave them to the Mission of St. Ignatius, where they were kept as pets and became as domesticated as ordinary cattle. When the heifers were four years old, each had a calf. From that time on they gradually increased in number, until in 1884, there were thirteen head, and the Indian owner, finding the care of them too great a tax on his scant resources, decided to the Dominion Government an option sell them. Ten head were purchased for $250 apiece by C. A. Allard and Michel Pablo, who were ranching on the reservation, and were shrewd enough to see that specimens of what was even then supposed to be practically an extinct animal would eventually become very valuable.

The buffalo herd increased under their careful supervision, and in a few years it became possible to sell specimens at very high prices. Some idea of the average rate of increase may be deduced from the observed fact that half the cows give birth to calves every year, while twin calves are not uncommon. As a rule the bison calf is a very hardy creature. There are instances of the Pablo-Allard calves finding their feet in less than a minute after birth and showing fight within half an hour.

In 1906 Hon. Frank Oliver, then Minister of the Interior, obtained for on the 600 unsold head belonging to Messrs. Pablo and Allard, and eventually they were all bought for $200,000. The "round-up" lasted two months, and was carried out by 75 cowboys, horsemen picked for their ability from every part of the great Montana ranges.

The long railway journey of 1,100 miles to Alberta was accomplished with a loss of less than one per cent.

Since it became the property of the Canadian Government this great herd has fared well in the new National Park at Wainwright. The park, which is one of the features on the Grand Trunk Pacific main line between Winnipeg and Edmonton, is becoming a favorite resort of the traveller who is interested in these "living antiques" of the animal kingdom. It has an area of 160 square miles and contains many clean-bottomed lakes, endless chains of hay-swamps and sheltered river valleys, and is securely enclosed with a high fence of wire and tamarac posts. A number of deer are enclosed, so that the bison have companions in their spacious reservation.

In addition to preserving the buffalo, the Government is making experiments with a herd of cattalos, an animal produced by the crossing of the buffalo with the domestic cattle, the object being to produce a strain of beef-producing animals particularly suitable to the more northern and rugged regions of Canada.

The anatomy of the buffalo is favorable to the carrying of heavy carcasses of beef. They possess an additional pair of ribs, as well as much longer spines. Although these extra ribs are not always perpetuated in the cattalo, the length of back persists. Along these spines very heavy muscles are carried, enabling the animals to carry an exceedingly high percentage of beef on the back, which is the most valuable part of the carcase.

PHOTOS AEONS OLD

It is said that the latest, as well as the oldest, thing in the world, from the standpoint of an old master, is the properly autographed photograph of an alpha particle in action, taken by itself some millions of years ago. Joly, who has done practically all the work of investigating these "photographs," draws some very far-reaching conclusions therefrom.

It was in 1907 that Professor Joly's attention was first attracted to some tiny dark rings, less than a three-thousandth of an inch in diameter, which were seen when a thin section of certain kinds of mica was examined under a microscope. Sometimes the whole circle was dark. Oftener a zone of lighter color surrounded the dark nucleus. And all the circles seemed to be of exactly the same size. He christened them "Pleochroic Halos," and set about ascertaining their cause.

In the centre of every halo a tiny particle of some foreign substance, sometimes almost invisible, could be seen. This speck represented a fragment of a different mineral, and, it seemed probable, of a radioactive one. Now, every radioactive element is constantly giving off very rapidly moving helium atoms, which, until they lose their enormous velocity, are known as alpha particles. From each element all the alpha particles start with exactly the same velocity. On the other hand, each different element emits its alpha particles with a speed a little different from that of any other. And so it happens that in air, for instance, the alpha particles from radium have all just enough momentum to carry them 1.3 inches. This is their "range," so to speak. None of them goes any farther. Similarly, the range for radium C is 2.08 inches.

If these alpha particles had to travel through rock instead of through air they could not, of course, proceed nearly so far. For the particular mineral in which the halos were found the ranges for radium A and C were calculated to be, respectively, nine and thirteen ten-thousandths of an inch. This was found to represent almost exactly the radii of the inner and outer circles of the halos.

There was no longer any reason to doubt that the halos were really formed by the action of the alpha particles streaming from the radioactive fragments in the centre. All of the particles worked together to produce the darker inner circle, at the outer edge, of which those from radium A stopped, while the smaller number remaining, due to radium C, went on and produced the lighter shading of the outer ring. In some cases both rings were entirely dark. This was simply a case corresponding to the over-exposure of a photographic negative—the action had been going on too long.

Just how the darkening is produced remains a puzzle, although there is no lack of similar cases. Various radioactive substances cause color changes in glass and minerals exposed to their action. Rutherford once sealed up some radium emanation in a thick-walled glass tube, and when examined later the glass had taken on a reddish color. This color extended into the glass just as far as the alpha particles should have been able to penetrate and there stopped abruptly.

The quantity of radium required to produce one of these halos in mica is all but infinitely small. Some were found, complete and distinct, in which the amount of radium present might have been multiplied by a million, and then by a million again, without becoming large enough to be weighed by the most delicate balance of the scientist.

Those were old fashioned days when one had to sit still in the sun for half an hour to get a daguerreotype picture. But here is a little speck of radium, so tiny that it could shoot out only one single alpha particle every year or so, that sat quietly for its portrait during an exposure of perhaps a hundred million years!

The result is that this inconceivably minute speck, which could not even be shown to exist by any other test, not only makes its presence known, but indicates just where it is.

Joly has lifted these halos out of their position as scientific curiosities, and draws a number of interesting conclusions from them. In the first place, the sharpness of the boundary lines of the circles proved that there has been no change throughout all the ages in the velocity of the alpha particles from radium and therefore probably no change in the rate of decay of radium itself. This is a strong support for the chemist's estimate of the age of the earth, as opposed to the geologist's. The fact that only halos derived from radium and thorium have been found is offered as evidence that no large group of radioactive substances remains to be discovered.

Perhaps the most interesting conclusion of all is that which upsets a pet theory of many scientists. The halo seems to be the most delicate test known for small amounts of radioactivity. It is so sensitive that it would seem nothing could escape it. And yet only the radium and thorium halos are known. Since radium upset the conventional ideas about the permanent stability of elements, the idea has spread that all the elements, from gold to oxygen, were decomposing like radium, but so slowly that the process could not be detected. Joly says that the non-occurrence of halos characteristic of common elements proves their complete stability, and leaves no hope for the theory that every one of them is a radium in miniature.

A FURRED TONGUE.

It May Mean Wrecked Nerves and Not a Disordered Stomach.

"I suppose that there is no more ineradicable idea in the mind of the doctor than that the furred tongue is essentially an indication of a deranged stomach," writes Sir James Goodhart, consulting physician to Guy's hospital, London, in the London Lancet. Yet, according to Sir James, it is by no means always so. And he goes on to prove it by cases in his own extensive practice.

One of these was of a man in a very responsible position, a leader of men, to whom he had to give orders that had to be obeyed and from whom he had to hear much grumbling; a very hard worker and "the fastest talker I have ever struck," full of energy and playing every ounce of it. He was in splendid health, but suffered from a furred tongue and a bad taste in the mouth. In his case these were not due to the stomach at all, but to a disordered state of nerve control.

"Nervous fears and nervous tastes are common enough, and they deserve a special thought," says Sir James. He believes that man is kept sweet and wholesome largely by nervous control, and when he loses this control "the parts become fevered, the mucous membrane dry, the nerves irritated, and taste is perverted." The men so affected are those who are nervous, anxious, hard workers, taking their work home with them to think about and dream about in bed.

Miss De Style—My father brought Samuel Bulwer Lytton.

"OUR OLD GERMAN GOD"

(Robert Herrick in Chicago Tribune.)

I have often wondered about the nature of that "old German god" to whom the King refers so confidently, so emotionally as the great ally of the German nation. He must surely be very different from the God that Christian peoples have thought they were worshiping for the last two thousand years; indeed, I fancy that the German ruler had in mind a private, special divinity, peculiarly devoted to his own people, one not shared by other alien peoples. Just as savage tribes cultivate special deities and bring their gods with them on their conquest, so the Kaiser imagines improving the spiritual state of the world by inculcating reverence for his "old German god" in Paris, in London, in Rome, maybe in New York.

It was not until the other afternoon when I was listening to the "Rheingold" at the opera house that it flashed into my slow mind what Kaiser meant by his "old German god." When, in the second act, Wotan rose from his couch beside his spouse, the jealous Fricka, beneath the shadow of the lofty Gothic castle he had caused to be built for himself and his flock of gods and goddesses, and, perplexed, began to cast about in his mind how to evade payment of the stipulated price to the surly giants who had done the work for him I perceived where the Kaiser got his inspiration. Wotan in a long red beard, with a flowing blue robe and the inevitable tapering spear—that was "our old German god!" To those who have not recently refreshed their memory of the conduct of Wotan (in the Wagnerian version) I will recount of the facts related in the play of this chief of German gods. In his desire to build his big castle Wotan has rashly promised the giants Fasoldt and Fafner his sister-in-law, the lovely Freia, goddess of love and joy, who keep heaven smiling and rosy by her presence. When the uncouth giants waddle from the wings to claim their dues Wotan tries first to put them off by declaring that he never meant to give away the lovely Freia; it was all a joke. As this does not work with the simple giants—they threaten him with their big pine staves—he reconsiders and recollects his bargain. He again interferes with two uppish little gods who attempt to drive the giants away and makes a great play of being the god of justice. "A promise is a promise, etc." But privately he confesses to the bewildered gods that he is trusting to the wit of the clever Loki, who has gone forth upon the earth to find something that the rude giants may be induced to accept in lieu of the precious Freia. Just as the two giants, weary of the palaver, are dragging off their prey the nimble Loki arrives and lays before them in words the lure of the Rheingold. Like other men after them the burly giants, torn between gold and woman, decide to await the arrival of the famous novelty, and in case Wotan can produce the Rheingold as represented to accept it instead of the fair goddess.

Thereupon Wotan, in charge of the clever rascal Loki, descends into the bowels of the earth, discovers where the gnome Alberich keeps his treasures, and by a petty piece of pure knavery gets possession not merely of the coveted golde but of the magic wishing cap and the magic ring as well. It is a plain holdup, and Alberich naturally delivers himself of a few curses, letting the audience know what he thinks of a god like Herr Wotan. Although Alberich himself stole his wealth, one sympathizes with him rather than with the two high handed buccaneers from heaven. Back the precious pair mount to their home, which is now in cloudy gloom because of Freia's temporary absence. They proceed on the arrival of the pair of giants to count out the gold in order to get their beloved love out of pawn. But even now Wotan cannot play fair; he tries first to hold out the Tarnhelm (magic wishing cap) and reluctantly yields it on the demand of the giants. But the magic ring he has no intention of giving up. The episode is as follows:

"But Fafner answered: "Not at all
my friend!
Still gleams on Wotan's finger a gold
ring.
Bring that and fill this crevice tight
and full.'
Great Wotan cried: 'What! Give this
ring to you?'
And Loki said: 'Let me advise you
fools!
That ring belongs to daughters of the
Rhine,
And Wotan merely keeps to give it
back.'

But Wotan interrupted: 'Hold thy
speech!
This prize that I so hardly, dearly
won,
Fearless shall I reserve unto myself.'

Said Loki: 'Then my promise holds
good
That I have given to the sorrowing
nymphs!'

And Wotan spoke: 'Thy promise binds
me not.
The ring is mine—my booty it shall
be.'"

That godlike assertion of Wotan, "Thy promise binds me not," has a familiar ring to it. It smacks of the famous "scrap of paper" theory of morals.

Wotan wrangles with the giants over the ring, and in the end permits them to carry off the fair Freia in spite of all entreaties from Fricka, Freia and others to yield, so infatuated is the old god with his ill gotten trinket. Hereupon Erda, mother of gods rises in sepulcral white from the earth, and with sepulcral tones warns Wotan that he is going too far. It appears that Erda knows a great deal more about things than Wotan himself and much impressed by the awful fate he is running into he most reluctantly gives in. "We buy again," says he, "immortal youth and joy!" but sadly feels, "A shameful price I pay for these my lofty castle halls!" (Like many a smaller Wotan who has tried to build him a big house.) With foreboding in his heart that the gods must eventually give way to a nobler, freer race he leads his flock over the rainbow bridge into Nibelheim.

Not on the whole a noble god! Nor does Wotan appear to better advantage in the succeeding episodes of the Wagnerian cycle. In the next chapter he is engaged in a shameful dispute with his incensed spouse, and is forced by the fiery Fricka to permit the death of his Volsung son because the latter had committed incest with a sister. More humiliation, he must punish his dear Valkyr Brunhilde for attempting to carry out the secret wishes of Wotan's own heart! In spite of his lordly words of farewell when he puts her to sleep within the circle of fire, Wotan plays no god's part here. In "Siegfrid" he appears as the Wanderer, a Wotan grown very old and not venerable. He is muddled about himself and his position in the universe; the world is plainly too much for him. When he tries to oppose the will of his own hero, Siegfrid is doing what Wotan hoped Siegfrid would do, his famous spear is cut in two, and with a flash of stage lightning, the roll of stage thunder, Wotan's utter deposition as first god is announced.

Of course, Nietzsche, who inspired Wagner's arrangement of the old sagas, had no great reverence for gods and intentionally makes Wotan play a mean part of miserable pretense and bluff. But there is more Wotan than Nietzsche's diabolic version of him; he has the form and the accent of that "old German god." It was not Nietzsche that the Kaiser was thinking of; it was the ancient sagas in whom the great god Wotan was hero, an early protagonist of Kaiser Wilhelm himself.

One sees that this Wotan is a most limited god—doubtful of his own powers though an arrant boaster, fearful of the future, afraid of what the other gods and demigods may be thinking and doing to upset his rule. Always the talker, at times capable of spectacular feats of godlike power, he wavers at crucial moments, listens to fortune tellers' tales, and in general has little confidence in himself. One thinks of a supreme god as possessing three great attributes, not one of which Wotan exemplifies—power, justice mercy. Wotan is driven by a fate beyond his own control, is cruel and mean and knavish in his acts, and rules simply for his own personal aggrandizement. Of such stuff no enduring god can be made.

But the worst thing about Wotan is his parochialism, his tribal quality. He is fighting for his own hand, for his flock of gods and his irregular family. He seems to have no conception of the world at large except as a fearful place where ultimately he will be worsted. Now any god worth maintaining as a national deity must have about him something universal, must be a god in power and intelligence beyond the confines of his own state. There, I think, is betrayed the weakness not only of old Wotan, but also of the Kaiser's understanding of what gods should be. A special, local divinity is not worth reverencing. If a god cannot extend his personality beyond his own tribe, he is scarcely worth appealing to. Possibly the Kaiser is uneasily conscious that a universal Jehovah could not be expected to countenance his raid upon the liberties of the world and patriotically is seeking to substitute a more local, personal and national deity under whose protection his armies may fight. Just as the Germans have felt compelled to give up French names for their dishes, to eschew French fashions and English wares, they now feel morally bound to reject any god who might have an interest in an enemy's subjects, who was not a mere partisan.

The weakness, the pathos of such a position, is too evident to need discussion. It is the weakness, the pathos, of the whole German contention—their attempt to set up a private special world all German in the midst of our larger world. It is very lonely, living outside the common world, and it must be getting lonelier as the months pass and it becomes more evident that no considerable portion of the outside world will ever come under the rule of that "old German god."

DOGS DID DUTY.

French Farm Dogs Ran Churn Power Under Shell Fire.

Outside many cottages in Northern France you will see a caged wheel, some six feet in diameter, fastened to the wall. Occasionally you will see a dog enter it, and squirrel fashion set it revolving for about an hour. At the other end of the axle of the wheel, inside the house, there is a churn that is filled with milk every morning. Always at the same moment the dog reports for duty. He steps into the wheel immediately, revolves it faithfully for an hour, and then steps out and goes his way to play like other dogs.

One morning man began showing his superior intelligence by pouring a hail of shells into the quiet village. The shells unroofed the little cottages or converted them into mounds of ruin. The inhabitants fled precipitately. But the dogs did not run away, nor did they consider the shells concerned them.

Punctuality to their hour, they stepped into their wheels and began to turn them. At the corner of the market place three such wheels were visible. A dog was in each of them when the action was at its height and the houses were crumbling on every hand; but the brave dogs went on as if the hurly-burly were no concern of theirs.

A shell-fragment struck one of the wheels and put it out of action—a splinter of a spoke was jammed against the wall. The dog stopped in amazement; but when he saw the other dogs still at work he set himself to overcome the difficulty, and presently succeeded in making the wheel turn uncertainly. Then a shrapnel bullet hit him and he collapsed on the floor of the wheel.

A few moments later one of the other houses was hit; the dog and wheel disappeared under the debris. The third dog completed his churning, trotted out of his wheel, and nothing more was seen of him.—London Field.

SLOW TO START AND SLOW TO STOP.

(Springfield Republican)

Sir Edward Grey's speech in the House of Commons, cool and receptive though it was, suggests a possibility that has been in many minds. Great Britain was slow to be awakened to the actuality of war and slow in the arousing of popular passion. The British may be the hardest to bring to the consideration of peace when the time comes. That the time has evidently not come yet.

PALPITATION OF THE HEART.

Sudden fright or emotion may cause a momentary arrest of the heart's action, or some excitement or apprehension may set up a rapid action of the heart thereby causing palpitation.

Palpitation, again, is often the result of digestive disorders arising from the stomach, or may be the result of over indulgence of tobacco or alcoholic drinks.

The only way to regulate this serious heart trouble is to use Milburn's Heart and Nerve Pills.

Mrs. J. S. Nicholls, Listowel, Ont., writes: "I was weak and run down, my heart would palpitate and I would take weak and dizzy spells. A friend advised me to try Milburn's Heart and Nerve Pills, so I started at once to use them, and found that I felt much stronger. I cannot praise your medicine too highly, for it has done me a world of good."

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25; at all dealers, or mailed direct by The T. Milburn Co., Limited, Toronto, Ont.

BITS OF WIT.

SMASH UP.

(Boston Transcript)

Jack—What sent poor Algy to the insane asylum?

Tom—A train of thought passed through his brain and wrecked it.

COURAGEOUS.

(Browning's Magazine)

"Why did they give Bibbs a medal for courage?"

"He ate mushrooms he gathered himself."

IT'S STRENGTH.

(Baltimore American)

"Did you see where Austria and Hungary are issuing more iron money?"

"I suppose they want to be able to boast they are financially strong."

DEVOTION.

(Life)

She—Would you leave your home for me?

He—I'd leave a baseball game in the ninth inning with the score a tie.

WHEN THE FUSS STARTED.

(Boston Transcript)

"Whenever my wife comes up behind me and pats me on the head I know she's going to ask for money."

"She touches wood for luck, eh?"

"LOOK PLEASANT."

(Philadelphia Press)

Business Caller (looking at photograph)—This is a picture of Mrs. Peckington, I suppose?

Peckington—Yes; that's her when she is—er—getting her picture taken.

EXTREMES MEETING

(Baltimore American)

"That was a remarkable idea of contrasts the animal painter had in his latest zoo picture."

"What was it?"

"He painted a laughing hyena standing under a weeping willow."

BRIGHT BOY.

(Pitt Panther)

Pater—Well, Rizzie did you get through your exam?

Cater—Yes, father, I was the first one through each time.

OSCULATION AT ANY PRICE.

(Chaparral)

Bess—Why didn't you slap Jim when he tried to kiss you?

Tess—Because, dear, I'm too proud to fight.

NO REFERENCES.

(Judge)

Willis—The new cook is a jewel, dear.

Mrs. Willis—Yes, but I'm afraid I must discharge her.

Willis—What's the matter?

Mrs. Willis—I'm suspicious of her. I sent to the library this afternoon and spent three hours in the reference-room and couldn't find any of hers.

WHAT'S THAT!

(Life)

Frost—Davis say she suffers because he has the heart of a woman.

Snow—That's tough.

SOMETHING NEW.

(Boston Transcript)

The Lady—Didn't I hear you quote Omar Khayyam just now?

The Broker—I think not. In fact, I don't think I ever heard of the stock.

CRUEL HINT.

(Baltimore American)

Newpop—Why does the baby make such awful faces?

Mother-in-law—I guess he heard the folks saying that he looks so much like you, and is trying his best to improve on the likeness.

UNFORTUNATELY NO.

(Browning's Magazine)

"Is he a dead beat?"

"Unfortunately, no!" He's a live one!"

THE MODERN BOY.

(Life)

Dyer—Is it the kind of a play you can take a girl to see?

Ryer—No, it's the kind you can't keep her away from.

NOWADAYS.

(Life)

Penitentiary Guard—Convict 41 is not in his cell, sir!

Warden—That's all right! He's still hunting for the ball he lost on the links this afternoon!

CANDID CHILDHOOD.

(Chicago Daily News)

"Do you get plenty of sleep?" said the visitor to small Edward.

"Yes, ma'am," he answered. "Mamma puts me to bed every night at 8 o'clock.

"To keep you healthy?" he was asked.

"No, ma'am," was the reply. "It's so she can mend my clothes."

When the Back Becomes Lame

IT IS A SIGN OF KIDNEY TROUBLE

Doan's Kidney Pills cure the aching back by curing the aching kidneys beneath—for it is really the kidneys aching and not the back.

Doan's Kidney Pills are a special kidney and bladder medicine for the cure of all kidney troubles.

Mrs. Louisa Gonshaw, 663 Manning Ave., Toronto, Ont., writes: "I take great pleasure in writing you, stating the benefit I have received by using Doan's Kidney Pills. About three years ago I was terribly afflicted with lame back, and was so bad I could not even sweep the floor. I was advised to try your pills, and before I had used one box there was a great improvement, and my back was much better. However, I kept on taking them until my back was completely cured. I highly recommend 'Doan's' for lame back."

Doan's Kidney Pills are the original pill for the kidneys. See that our trade mark the "Maple Leaf" appears on the wrapper.

Doan's Kidney Pills are 50c per box, 3 boxes for $1.25; at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

WALKERTON TELESCOPE
$1.50 per year in advance.
LORNE A. EEDY - PUBLISHER
Phone No. - 48
Residence - 146

WALKERTON, JUNE 15th. 1916.

EDITORIAL COMMENT

The people of Canada are not submitting to war taxation with the idea of providing big commissions for munitions grafters.

+ + +

"German efficiency" is illustrated in the way in which thousands upon thousands of German soldiers are being led to slaughter in the vain assault upon Verdun.

+ + +

The weather man at Toronto has been knighted and is now Sir Frederick Stupart. We are assured now of a fine knight, but we should also like a few fine days.—Goderich Signal.

+ + +

Bruce continues to be a leader among the counties. In patriotic giving, and in organizing for recruiting Bruce led the way. The organization of the Bruce Preparedness League, at the suggestion of Judge Klein, is a movement for increasing our national efficiency in which other counties will no doubt follow.

+ + +

Do we understand correctly that the Walkerton Power Co. is willing to give the people hydro rates? Well and good. But at the present rate of going the Town Council will not have a hydro estimate by 1920. It looks to us as if what is the town's business is nobody's business. No private business concern would allow an important matter like this to drag along month after month and nothing done.

+ + +

The County Council took a step in the right direction when it increased its grant to the Bruce County Hospital from $1500 to $2,000. But the County is still far from buying its share. From the annual printed reported just issued we see that the actual cost of maintaining free patients from points in Bruce, outside of Walkerton, was $4,000. No wonder the Hospital has a deficit.

+ + +

What it will mean to this country when soldiers return from European battlefields by the hundred thousand, it is difficult for us to grasp. The problem of providing employment for these men, of looking after the wounded and disabled and of assimilating the new population that will flock to our shores is a proposition of staggering dimensions. Bruce County has done well to get ready for its part in the great work by organizing a Bruce Preparedness League. Other Counties would do well to fall into the line.

MERCHANTS BANK OF CANADA

The Merchants Bank of Canada, that well known Canadian institution whose balance-sheet is now fast approaching hundred-million-dollar dimensions, has made its report for the year ended April 29, and exhibits a notable increase in all classes of business. As indicating the considerable measure of public confidence enjoyed by the bank, and the increasing wealth of the community, it may be pointed out that its interest-bearing deposits increased about five millions during the year, its non-interest deposits about 4½ millions and its note circulation over a million. The total volume of funds entrusted to the bank is well over ten millions larger than in 1915 and thirteen millions larger than before the war, and totals just under 82 million dollars.

The holdings of cash and liquid assets are of great strength, amounting to more than 20 millions of actual cash and equivalent cash which with gilt-edged investments and call loans combine to produce a total of $40,960,486 of liquid resources, being 50 per cent of the public liabilities. A year ago these liquid items totalled $32,066,572 and two years ago the were $24,973,104.

It will be seen that the liquid reserves have not only increased in volume, but are very much higher in proportion to liabilities. The item of Current Loans and Discounts in Canada, which was sharply reduced during the year at the beginning of the war, is now on the upgrade again, but comparatively slowly, as the demand for such accommodation by good borrowers, is still restricted, It is now $48,835,565, against $17,401,658 in 1915 and $53,893,673 in 1914.

Profits in the year just ended were naturally not upon the pre war scale, but were amply sufficent to allow payment of the regular dividend, after full provision for contingencies and payment of the heavy war-tax of the Dominion Government, and make a small addition to the profit-and loss surplus. Owing to the large amount invested in income-bearing securities and municipal government bonds, etc.,—towards the end of the fiscal year, and the improvement in commercial business, the outlook is for an improvement in earning power during the present year, especially as no further provision for depreciation or contingencies is anticipated. In the meanwhile both shareholders and clients of the banks have occasion for satisfaction with the management and the directors for their wise and consistent policy during the past three years of unique conditions.

Many Interesting Letters Home from Walkerton Boys Overseas

LANCE CORP. WILL HANLEY

Mrs. T. Hanley received the following interesting letter from Lance-Corp. Will Hanley, on the firing line in France.

Dear Mother:—

Your letter to hand dated May 3rd. I enjoyed learning that all is well at home. The weather in Flanders is exceptionally fine for the past month. The hay crop and grain are looking well. The song birds are numerous here and sure keep us all in good humour. When we look around and size up the beauty of this country it is hard to realize that such a cruel war is raging throughout the country. The papers of England have long items of peace talk by the Kaiser through Dr. Wilson, president of the United States. Perhaps it is all a fad but we all hope that Germany will soon be worn out so that the world will enjoy its freedom once more. Myself and many of the boys of the Battalion enjoyed Uncle Tom's book of poems he sent me sometime ago. He sure is a poetic genius and a credit to Canada. After we all had our turn reading it, I handed it to our Chaplain priest. He sure was very thankful to receive it. I have so much to carry that even a book extra in my kit bag is too much.

The war is still raging in severity. Let it be so until the Kaiser, with his forty-years of preparation says he has had enough of it and willing to make such terms as never to enable himself or successors to put such a burden upon this world of beauty and love, again if man would only do the right thing towards one another.

I can't understand a number of the Irish of Dublin to be such dupes and fools as to allow the Germans and American Irish to agitate them to such a pitch to start a rebellion in Ireland. It is the duty of every true-hearted Irishman to join the colors and help England to fight the Huns until they say they've had enough of it. However, the rebellion is all crushed now and hope it will cause still more of the Irish to join the colors.

FROM GUS JENKINS

Earl Forsythe had a few lines last week from Gus Jenkins, which we are permitted to publish:—

281 St. Ann's Road,
South Tottenham,
London, England,
May 21, 1916.

My dear Earl:—

At long last I have taken my pen to answer your epistle of the 26th March. I am sorry you had such a bad time of it, hearing all those wild rumours about poor little me being dead. Nevertheless, all is well that ends well, and I am far from dead yet unless a Zeppelin should happen to catch me napping, which is of course, a possibility, as I am at present, only about thirty miles or so from the German trenches and we can often hear the big guns when the wind is in the right direction.

Yes, old boy, I got the "Telescopes" alright, and I want you to thank Frank Eedy very much for me for his kindness in sending them, and also for his very kind reference to my most unworthy self in the aforementioned "Telescope."

How is the 160th Batt. getting on? I suppose they are at London now, aren't they? I have not run into any of the 71st boys over here yet, as they are at Bramshott and I am close to Shorncliffe, which is quite a long way off. Well, bed time now so guess I'll close, remember me to everybody I know or who knows me.

Your loving pal,
Gus.

P. S.

Think of me when you are swimming in the dam. Gee, I would like to be with you all again, but cheer up; I may be back before long yet.

+ + +

PRIVATE JACK WILSON

Mr. T. H. Wilson, Durham Road, had the following letter from his nephew, Pte. Jack Wilson, son of Mr. David Wilson, Toronto, who is with the 83rd Batt. in England:—

Dear Uncle Tom:—

Just a few lines to let you know I am in good health and like old England weather fine. We had a fine trip over the ocean, the trip from Toronto to Halifax was not very interesting, as the land in general was poor, I wouldn't want to farm there on any account.

The farms here seem to be owned by some big lords or dukes and worked by peasants or tenants. The grain seems to have a different green than ours, and where we are stationed is chiefly pasture-land, and sheep seem to be the main product.

We are told that we are going to the Front in about two weeks, but I don't think it will be any sooner than two months as we are shooting down at the ranges, and the range officer tells us that we will be shooting for two weeks. Then we get our six days leave, so I don't pay any attention to what I hear.

I am in good health and ready for any order. I hope all the folks at Walkerton are well.

I may add that the meals are hardly as good as in old Toronto Barracks, and every thing is terrible high. Why tobacco is nearly double as high as in Canada and I can hardly smoke or chew it. I think I will send home for some tobacco as what they have I dont seem to like. In every line of goods it is the same, even to matches. They charge one penny or two cents for a little box of Comet matches which over home I used to get with a package of tobacco. I have just heard that we are moving to Bramshott Camp soon, which is I think some more bull.

Yours Truly,
Jack.

(No. 171866) Pte. J. E. Wilson,
D. Co. 13th Platoon 83rd Regt.
West Sandling Camp,
Kent, England.

LETTER FROM JACK McGARITY

Mr. and Mrs. Patrick McGarity, Fairbank's Farm, received the following letter from their son, Jack, of the Signal Section, in the 38th Battalion, Bermuda Islands:—

My Dear Parents:

Just a few lines to say that I am real well and in the best of spirits. I hope all is going on alright at home and that you are real well. I was hoping I would hear from you the last boat but the letter didn't come. I got The Telescope and that helps a great deal I can tell you.

I don't know whether I answered that long letter that Rosellia wrote me about 10 days ago. I have been so busy and excited at times that really I forget. Anyway it was a real nice one. I am going to write her as long a one before I go much farther, when I am in England or perhaps on the boat. Say, Rosellia I bought a stone for the building of the new Catholic Church down here, and put it in your name. That is the third one I got now. Perhaps you will come down here some time Rosellia and see the nice church you helped to build. The whole signal section had a banquet down at the Kenwood Beach last Saturday and we had some time. Our two officers were there and twenty-seven others. We had a great supper, sang songs, recited, etc., and had a good time. You see it was a farewell supper and we made a good one of it. I will be gone from here when you receive this letter. We expect to sail on Saturday, May 27th and the next you hear from me will be in Bleeding Old England. The first leave I get while in England I am going to see Dear Old Ireland. I am all prepared for the trip and so will be alright. I went to Holy Communion a week ago.

No one can tell, Dan and I may be together before long. I will likely meet a few I know when I go across.

The advance party of the coming regiment, namely the 163rd are here now. They are a French Regiment from Montreal.

Now, dear parents, I don't want you to worry over me, because I am leaving here. I am quite safe where I am going and all will come right in the end. Well, dear parents, I will say good-bye for the present, hoping you are all well at home.

I will write as soon as I know my future address. Fondest love to all at home.

Your loving son,
JACK.

Prospect Barracks,
Bermuda Islands,
May 25th, 1916.

General Manager.

Report of the Auditors to the Shareholders of The Merchants Bank of Canada.

In accordance with the provisions of sub-sections 19 and 20 of Section 56 of the Bank Act we report to the shareholders as follows:—

We have examined the above Balance Sheet with the Books of Account and other records of the Bank at the Chief Office and with the signed returns from the Branches and Agencies.

We have checked the cash and verified the securities of the Bank at the Chief Office against the entries in regard thereto in the Books of the Bank as on April 29th, 1916, and at a different time during the year and found them to agree with such entries. We have also attended at some of the Branches during the year and checked the cash and verified the securities held at the dates of our attendance and found them to agree with the entries in the books of the Bank with regard thereto.

We have obtained all the information and explanations we have required. In our opinion the transactions of the Bank which have come under our notice have been within the powers of the Bank, and the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the books of the Bank.

Overland Model 75 $850 f.o.b. Toronto

A Complete Car in Every Particular
And It's a Car You Will Be Proud to Own

It's the first complete car at anywhere near so low a price.

It stands out alone—boldly—unapproached—a powerful five-passenger touring car complete for only $850.

Note that word "complete."

That means Electric Starter, Electric Lights, Electric Horn, Magnetic Speedometer—in fact, every necessary item. Nothing is lacking. There are no extras to buy.

Note that it is not a small car. The wheelbase is 104 inches. The tires are four-inch size—many cars costing more have smaller tires.

And it is a perfect beauty—snappy, stylish, speedy.

In every way it's a car you will be proud to own and ride in.

No wonder there's a rush to possess the car the world has been waiting for.

Don't delay—see us at once and talk it over.

'TWAS DECORATION DAY

Walkerton Oddfellows Pay Tribute to the Memory of Departed Brethren—Great Crowd Witnesses Impressive Ceremony

The time-honored custom of decorating the graves of departed brethren was observed by the Oddfellows of Walkerton on Sunday. A large turnout of the members, marshalled by Bro. James Crawford, marched to the cemetery headed by the 160th Brass Band and 160th Bugle Band. It was a delightful June afternoon and the whole town and countryside seemed to have turned out to witness the impressive ceremony. The procession drew up in a circle around the lawn and Bro. F. J. Fraser, P. G., after the singing of a hymn, called upon Rev. D. A. Walker to open with prayer. A short but very thoughtful address by Rev. Thos. Wilson followed. Mr. Wilson mentioned some characteristics of Oddfellowship which appeal to the manhood of men. The first was the hand of welcome extended to the stranger, then there was the hand of help to the brother in sickness, the hand of sympathy to the distressed, the hand of remembrance for the departed. The very nature of the gathering inferred the Order's recognition of the immortality of the soul and the necessity of living for another world. Mr. Wilson's address was followed by the decoration of the graves, a beautiful basket of flowers being placed on each of the graves of the deceased Oddfellows. When the company reassembled they sang "Shall We Gather at the River" after which they listened to an appropriate and inspiring address by Rev. D. A. Walker. "Such a service" said the speaker "was a tangible expression of Brotherhood. That was why he liked fraternal organizations. Because they teach and put into practical form the spirit of Brotherhood and such teaching is much in need to-day. Some, as they look out upon this great war, are wont to say that the spirit of brotherhood is being forgotten. If so, then all the more reason why we should uphold and exemplify it. We should not forget that Brotherhood is not merely wearing an emblem, not merely joining a society. Brotherhood means kindness and helpfulness to all in need. Then this service showed they believed in the doctrine of immortality. When they brought their flowers and green sprays, it was an indication that the hope of an after-life was cherished."

The beautiful ritualistic address of the Order was then given by Bro. F. J. Fraser, P. G., in a clear and impressive way. Rev. Thos. Wilson closed the service by the benediction.

The presence of the Battalion bands under Sergts. Wright and Tucker, during the afternoon was much appreciated and added to the interest and impressiveness of the service.

71ST BATT. BROKEN UP

Most of Walkerton Boys will Serve in Trench Mortar Co.—Interesting Letter from Ed. Eidt

The following letter was received from Pte. Ed. Eidt of the 71st Batt. by members of the family on Monday:

We were all granted our six days pass yesterday and I'm writing this from the Maple Leaf Club in the heart of London.

We have been moving around considerably and I haven't had much chance to write. Last Saturday night we had orders to pack up and move to Bramshott Camp, and a party of a hundred of us, 25 from each company, formed the advance party, marched away under full equipment Sunday morning. We marched about ten miles, and arrived at our destination in a field as large as two or three farms which is called Oxney, near the village of Bordon. A transport arrived shortly afterwards with tents and we pitched enough for the battalion, which arrived next morning. We afterwards put up enough tents for another three battalions. So we started to settle down to life under canvas for the summer. We had a holiday as usual on the 24th and the battalion held sports. The place was admirably suited for a camp, with nice green grass and a river running by, and we certainly would have enjoyed staying there, but next morning the colonel formed the men up around him, and read us an announcement which he had received from headquarters, which certainly threw a gloom over us all. The Battalion was to be broken up and the men distributed to reinforce different units of the Fourth Canadian Division. This Battalion last autumn in London, Ont. was 1700 strong, but drafts and special detachments were sent, and we were considerably under strength when we arrived in England and perhaps it was on account of the small battalion that we were picked out to be broken up, although we're better than some of the battalions who were chosen to go in the division as a unit. But we'll all be in the same division, some of us in the 73rd, 51st, 53rd, 48th, 47th and several others. Forty of "C" Company were picked out to train as a trench mortar section, and I am one of them, as are also most of the Walkerton boys. A trench mortar is a gun which is used for throwing bombs, and are right in the front line trenches. The barrel of the gun weighs sixty pounds and the shell at fire about ten. We will be under two of our own officers, which is indeed fortunate, as most of the boys will be under strange officers, so I don't know what my new address will be but I'll write you as soon as we arrive there. It will likely be at Bramshott though.

I got the Special Edition, which is certainly a good job. Nearly all the Walkerton boys received one, and they were very glad to get it.

With love to all,
Ed.

Bruce County Council

Favors Good Roads Scheme and Appoints Committee to Report in December — $500.00 Granted Towards the Establishment of Children's Aid Shelter.

The County Council of the County of Bruce met for the June Session at the Town Hall, Port Elgin, on Monday evening, June 5th. All members were present.

D. Izzard, Reeve, on behalf of the Council and Citizens of Port Elgin, extended a hearty welcome to the Council, to which the Warden suitably replied.

Communications were read from the Canadian Patriotic League and from the Belgian Relief Committee giving particulars of the work done and thanking very heartily the Council and people of the County of Bruce for their very generous treatment of these funds, and for the example they had thereby set for others.

The Government Officials notified the Council that an Order-in-Council had been passed, allowing deer shooting on the Peninsula this fall, but no dogs will be allowed. For the next two years after no deer hunting will be allowed there.

Mr. John Douglas, Reeve of Hepworth, presented a very instructive report of the proceedings of the Ontario Educational Association, to which he had been sent by the County. A large number of interesting and important matters, especially dealing with Rural Schools, were considered and some important legislation may grow out of the Association recommendations.

It was decided to pass a by-law licensing junk dealers in the County.

Grants were made of $2000 to the Walkerton Hospital, $1000 to the Kincardine Hospital, $50 each to the Villages of Tiverton and Hepworth for roads.

Mr. Anderson, of Lucknow pointed out the difficulty there was in many parts of the County in obtaining magistrates to try cases and especially liquor cases, and thought the Government should be asked to appoint police magistrate for districts. The Council however declined to take any action in the matter.

A by-law was passed to raise $42,000 for Patriotic purposes. This money is required to pay the grants for this purchase made at January Session of the Council. The money is payable under the by-law in ten years. No further grants were made at this Session for these purposes.

Messrs C. M. Bowman and W. D. Cargill, M P P's were present on behalf of the Bruce County Preparedness League and explained fully the objects of the League. On motion of Messrs. Christie and Hunter the Council declared itself fully in sympathy with the objects of the League, and granted $100.00 toward its expenses.

Special grants were made to Eastnor and Amabel of $100.00 to assist in maintaining roads over which the whole traffic of the Peninsula moved, and which had to be kept up for the benefit of several townships.

A very lively fight developed over the equalizations of the County. For some time the question as to whether or not income and business assessments should be included in the equalization, has been a bone of contention, the representatives of the rural municipalities contending they should be, and those from the towns and villages they should not be. Up to 1912 these were included but in that year Judge Barrett, on an appeal to him, struck these assessments off, leaving the County rates to be levied on the real estate only. Last year Judge Klein on appeal to him, held they should be included. The Equalization Committee this year brought in a report recommending that that they be not included but on a close vote in council this report was sent back to the Committee to include the assessments. The Committee reported later with them included. After considerable discussion another vote was taken on the question by the whole Council, when, by a majority of one it was decided that these assessments should not be included. The County rates will therefore again be levied on the real estate only.

Another question of large importance which was before the Council was the question of good roads. In January a Committee was appointed to look into the question and report and their report was now presented. The Committee had arranged with Mr. McLean, of the Government Highway Dept. to be present and explain the good roads legislation, which he did at length and very clearly. He pointed out that other counties had adopted the movement and not one of them had raised any objections or tried in any way to withdraw from it. Many people had the idea that it was an expensive system but Mr. McLean thought this had come from some parts where they had no gravel and had to import crushed stone which ran the cost up considerably. In a county like Bruce where they had fair roads to start on and lots of good gravel the expense would be very light while the roads would be materially improved. The government was spending large sums of money to help counties in this work and he thought Bruce should take up the question and get its share of the money.

The matter was thoroughly discussed at length and the Council passed a resolution approving the scheme and appointed a Committee to look into it and report at December Session.

Messrs. Morgan, Gunton and Sayles addressed the Council pointing out the necessity for a Children's Shelter in connection with the work of the Bruce County Children's Aid Society, and the liability of the County in such matters under the Statutes. After full consideration it was decided such a shelter should be provided by the County, and a grant of $500 a year made towards its maintenance. A committee was appointed to look after the matter.

The usual number of accounts were presented for payment, and the usual number of committees appointed to attend to repairs on County bridges.

The Committee appointed to consider the adoption of the bridge on the 6th Con. of the Township of Brant as a County bridge reported against its adoption, and this report was adopted.

The citizens of Port Elgin made things most pleasant for the members of the Council during the week, and treated the members to an auto trip, so they could all see the large County bridges in that section, which was very much appreciated by the Council.

Council adjourned to meet at Council Chambers, Walkerton, on Monday, Dec 4th, next.

P. A. Malcomson,
County Clerk.

I.O.O.F. Decoration Day

Names of Deceased Brethren whose Graves were Decorated by Walkerton Lodge No. 84, I. O. O. F. on Sunday.

1 Bro. Wm. Collins, P.G., Died 18th April, 1901
2 Bro. W. R. Telford, P.G., Died 6th Sept, 1900
3 Bro. Hugh Beattie, P.G., Died 8th Mar., 1906
4 Bro. Wm. McIlveen - Died 3rd March, 1883
5 Bro. C. Morrison - Died 23rd March, 1911
6 Bro. J. T. Nichols - Died 29th January, 1906
7 Bro. H. B. McKay - Died 13th August, 1904
8 Bro. Chas. Stovel, Died 18th December, 1898
9 Bro. Jos. Herbley - Died 16th January, 1889
11 Bro. Gordon Traill - Died 14th April, 1897
12 Bro. Jas. Gibson - Died 16th September, 1910
13 Bro. Jas. Rothwell, P.G., Died 15th May, 1896
14 Bro. Jas. A. Crouden, Died 18th Dec'ber, 1906
15 Bro. A. Shuttleworth, Died 24th August, 1903
16 Bro. Robt. Best - Died 21st November, 1888
17 Bro. Capt. Wm. Moffatt, Died 25th Mar., 1888
18 Bro. Wm. Tindall - Died 31st January, 1906
19 Bro. J. J. Teasdale, P.G., Died 6th May, 1890
20 Bro. Robert Hill - - Died 3rd June, 1903
21 Bro. Wm. Rolph - - Died 15th April, 1888
22 Bro. C. Rettlebron, P.G., Died 10th June, 1906
23 Bro. Jas. Lewis - - Died 2nd April, 1903
24 Bro. Niel McPhaill - Died 11th May, 1906
25 Bro. T. Whitehead, P.G., Died 8th Feb., 1900
26 Bro. Thos. Chittick - Died 2nd August, 1911
27 Bro. Thos. Barnett, Died 12th Decem'er, 1911
28 Bro. Wm. Norrish - Died 7th July, 1912
29 Bro. J. S. Reed - - - Died Feb. 1st, 1916
30 Bro. Ray Vogan - - Died Feb. 16, 1916

COUNTY CORRESPONDENCE

See also Page 8

MILDMAY

Mr. Wm. Diebel, of Kincardine, visited at his home here over Saturday and Sunday.

Mr. Edward Harris, who has been attending Harbord Collegiate Institute in Toronto, is home for the summer holidays, his school days being over.

Miss Pauline Clapp, who has been attending Faculty at the University of Toronto, is home for her vacation.

Mr. Edward Diebel made two trips to Kincardine on his motorcycle last week.

Mr. Urban Schmidt now has his large Overland car, and is learning to run it.

Mr. and Mrs. Geo. Frank and daughter spent Sunday with Walkerton friends.

Pte. Charles Wendt, of the 160th Battalion, was successful last week in securing his Corporal's stripe.

The Ministerial meeting and Sunday School Convention of the Hanover District of the Evangelical Association, is held here this week. The Convention opens on June 7th at 2 p.m. A large attendance is expected at the Convention.

A small fire occurred in Liesemer and Kalbfleisch's store in a small room upstairs where blinds and picture mouldings are kept. It was put out luckily with only slight damage to the goods.

A railway company timber buyer, Mr. Geo. Rudolf, of Elmwood, was in this locality buying up timber last week.

Mr. Art. Kennedy, of Harriston, Miss Bessie Daly, of Palmerston, Mrs. Reba Schwalm and Miss Dora Wendt Sundayed in town at Mr. Charles Wendt's.

Mr. Amiel Goetz has bought a Chevrolet car from Hergott Bros., the local agents.

A moving picture firm is giving moving picture shows each night in the town hall. The shows are reported as being first class.

Mr. Murao, a native Japanese, delivered a talk about Japan, illustrated with views, in the Methodist Church on Saturday evening. On Sunday evening he preached on behalf of the Upper Canada Bible Society. A large congregation was present.

Rev. Sage, of London, will preach both morning and evening in the Anglican Church at Anniversary Services on Sunday, 18th.

Sergt. R. Loughleen, of 157th Battalion, Barrie, spent the week end with his parents.

Mrs. W. D. Cargill spent a few days this week in Toronto.

PINKERTON

Mrs. Pitcher and daughter, Mrs. Milne, of Toronto, spent a few days at Mr. Adam Reid's.

Miss Sadie Colwell spent Sunday at her home in Kincardine.

Rev. Mr. Crozier, of Guelph, will occupy the Presbyterian Church pulpit here for the next two Sundays.

Rev. and Mrs. R. M. Gale left on Monday for Winnipeg, where Mr. Gale will attend the Assembly, and where they will spend their holidays.

Misses Hattie and Gladys Gale are visiting friends in Alma.

Mr. and Miss Harrigan and Miss Nesbitt, of Bervie, visited at Mr. D. Elphick's last week.

Communion services were held on Sunday last in the Presbyterian Church here, when two new members were enrolled.

Mrs. (Rev.) Walker, of Owen Sound, is visiting at Mr. A. Pinkerton's.

A very interesting lecture, under the auspices of the Pinkerton Branch of the Bible Society, was held in the Anglican Church here on Tuesday evening of this week.

A number from here attended the celebration at Chesley on June 3rd.

The Football Club are holding a Patriotic Dance in the Hall here on Friday evening. All welcome.

A large number of young people attended the reception at Mr. John Mutrie's on Thursday evening, and report a most enjoyable time.

KINLOSS

Mrs. Thos. Bushell, who has been on the sick list, is improving.

Mr. John McNeice had a valuable flock of sheep killed and worried. We understand he has the dog.

Mr. Duncan Campbell and William Armstrong have both purchased new buggies.

Miss Abbie Rowe, who has been in Teeswater with her mother, returned home again on Sunday.

Mr. and Mrs. Edgar, Harriston, spent the week end with the former's parents here.

Mr. John Winterstein is busy in Mr. Haldenby's mill at Westford.

A very pleasant time was spent in Mr. John Hodgins' bush on Tuesday afternoon and evening, boating and dancing being the order of the day. We had people from Westford, Bervie, Kingarf and Kinlough. Mr. Walter Nicholson and Claude Doore were the main starters.

The Methodist Church will hold their regular service next Sunday at 3 o'clock in the afternoon. Please attend.

Thrice the capacity of ordinary grates is given because the Sunshine grates are three-sided, one side at a time meeting the fire. Bulldog teeth smash clinkers easily.

McClary's Sunshine Furnace

Wouldn't you like to know the cost of installing a Sunshine in your home? I'll gladly give you particulars without obligation.

SEED CORN

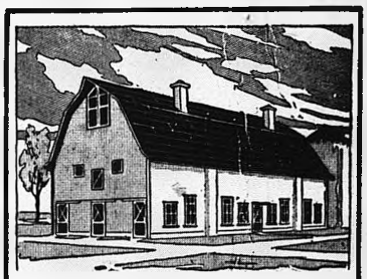
We have just received our stock of SEED CORN. The Corn is of first class quality and the prices are right.

Buy a New Perfection COAL OIL STOVE and you will never regret it. We have them in 2, 3 and 4 burners.

Try a load of D. L. & W. SCRANTON COAL and be convinced it is the coal to burn.

FRESH CEMENT on hand all the time.

S. W. VOGAN



The foundation is not the most important thing

True, you can't have a good barn without a good foundation, but don't forget either that the roof has to stand most of the punishment. Upon it falls the burden of resisting the destructive influences of weather and changing seasons.

Now, the question is "Where am I going to find a roof which will meet these conditions?" Certainly not in wooden shingles which have rapidly deteriorated during the past few years. Not in anything so perishable as wood, nor yet iron, which lets in driving rain, but rather in a permanent mineral composition such as Brantford Roofing.

Now, let us look at a section of Brantford Roofing. First, you notice it has a pure, long-fibred felt base. This is thoroughly saturated with a filler coat of asphalt or mineral pitch. Then it is given another coat. Finally, the surface is thickly covered with crushed slate. You can imagine what a job rain, snow, fire or heat would have penetrating a roof like that. As for comparing

Brantford Roofing
Nature's Waterproofing

with shingles on the score of permanency, or protection, or appearance, or even economy, there is no comparison. You put a Brantford Roof on once, and it will last as long as the building; it will always look well and it will never need repairing.

Why not let us send you samples, also a copy of our booklet which explains how Brantford Roofing is "always on the job". Or, if you will give us the dimensions of your barn or house roof we will gladly submit estimates without charge or obligation.

CROSS PURPOSES

Mrs. Austin looked at him with an expression which was at once startled and thoughtful, and a faint tinge of rose on her pale face made answer to Frank's blush. The entreaty, "Let me remember you as you are," touched her strangely. She knew that she was beautiful, but she knew also that her beauty was on the wane, and there was a melancholy pleasure in the thought that, though for the world she might grow old, for this one man she should always remain such as she was at that moment of farewell. She could not marry him, she did not love him, but woman-like she did desire to be always young for her young lover. She desired it too for her own sake. Otherwise it seemed to her that the mere lapse of a few years might turn Frank's passionate devotion and her answering pity into a ridiculous joke. If she were a faded elderly woman, and he a heavy respectable squire, would it be possible to remember without laughter that they had ever felt and spoken as they were feeling and speaking then? Why should not Frank have his way, foolish and boyish though it might be?

"Let it be so, then," she said. "If you like it best, we will say 'Good-bye' here and now." She looked at him very sadly. "I wish I had never come here."

"No, no," cried Frank, with sudden passion, almost as if he thought that her wish could really take her sweet, unapproachable presence out of his memory. "No; I can part with you—I must part with you—but I couldn't part with the time I have had."

"I feel as if I had done nothing but harm, and yet I can't help it," she went on, half to herself.

"How have you done any harm?" Frank demanded. "Because I love you, and you won't have me? Do you think"—this with an uncertain laugh—"that I shall take to drinking perhaps—go to the dogs—after loving you?"

"No, I don't think that; but I'm sorry you should have wasted your love on me."

"It isn't wasted," said Frank, after a pause, gazing intently at the floor. "Look here, Mrs. Austin, I shall never, as long as I live, love any woman as I love you now. It can't be. One must have one best love of all in one's life, and I've given mine to you. But it isn't wasted for all that. If ever I marry, and you hear of it, you'll know that my love was better worth having than it could have been if I had never met you. That isn't being wasted, is it? And you have done good instead of harm—no harm at all."

He looked up quickly, and saw that her eyes were full of tears. "I think she will be a happy woman who loves you and whom you love," she said, half turning from him. "And now, good-bye."

"Stay one moment more," he entreated. "Let me have one last look. Remember, I'm never going to see you again; I want to recollect you as you are now."

She paused with perfect simplicity, and faced him where he stood. He looked at her, turned his eyes away for a moment, and then looked back.

"It's no good," he said. "When I look away I see you as I saw you that first night, when they were playing, and you walked past me and were not thinking of me. I can see you so any moment I like. Or in the boat this afternoon—you were not thinking of me then, either. Perhaps afterward this will come back to me too," said Frank, still gazing at her as if he would learn her face, with its far-off compassion, by heart. "Well, good-bye!" he ended, with something of rough abruptness in his tone. But even as he said it, in the bitter wrench of parting, the sound of his own voice jarred upon him with a sense of unfitness. "Good-bye," he repeated, with the gentleness he had learned from her.

"Good-bye," said Mrs. Austin, and held out her hand, white, and a ring sparkling in the evening light.

He clasped it with the tender reverence which that last touch demanded. "I should like you to say 'Good-bye, Frank,' just for once, if you would," he entreated.

With a faint smile of assent she said it very sweetly, drew her hand out of his and went away.

Frank stood where she had left him, at first with feelings too exalted to be conscious of anything but her beautiful, sorrowful face, and the sudden blank of her departure. But, as his excitement subsided, the gray light, which always finds its way from the outer world into a passionate sorrow, crept into his heart. There is nothing so dreary as the realization of loss under its commonplace aspect, no longer as a blow, but as a lasting absence of beauty and joy in dull days to come, the foreshadowing of life's inevitable routine at the moment when it is unendurable even to remember that the days of the week will follow each other in their accustomed order. Frank hated Culverdale as he stood gazing out of the window. There were streaks of yellow and sullen red in the cloudy west, and it seemed to him that never since the world began had there been so ugly and cheerless a sunset. The wind was getting up, and there was something inexpressibly mournful in the shivering of the trees; and yet he stood there, looking and listening till the slow striking of a distant clock startled him from his reverie, and reminded him that he had no time to lose.

As he went down he paused for a moment on the stairs to make sure of his calmness, and, looking into the shadowy hall below, he saw the door of the drawing-room open, and Tiny come out. When she passed, a slim, dusky figure, before a gray window, Frank could not have put the thought into words; but it was his turn to feel, as Gilbert South had felt, as if he saw his old life passing away with bowed head and lingering steps. "Tiny!" he called, and came flying down the stairs in his impetuous fashion.

"Yes," she said, and stopped short. She could hardly see his face in the twilight.

"Tiny," said Frank, breathlessly. "I'm going away—I've had a letter. It's only till to-morrow—it's nothing—but I don't think I congratulated you properly just now——"

"Oh, yes, Frank, you did," said Tiny, who felt that he must have congratulated her properly, since he had thought enough about it to excite himself like this.

"No, I didn't—not as I meant to. I hope you will be very happy—very happy, always."

"Oh, yes," said Tiny, promptly, as if her uninterrupted bliss were the simplest matter of course.

"Look here," Frank continued, "this is a sort of good-bye, because it won't be the same thing now. You'll have South to think of——"

"Oh, Frank, but I'm not going to forget you"!

"No, no," said Frank; "we've been something like brother and sister, haven't we?" He held her hand tightly in his, and looked at her through the dusk. "I don't think I ever kissed you, Tiny, even when you were little; and after all we are cousins, you know." She put up her face and kissed him silently. The remembrance of their pleasant days at Culverdale was about them as their lips meant; it was like a shadowy little world of meadow and copse and cornfield, garden and river, bounded by the far horizon of childhood. Both were conscious of that dim background, though Tiny's consciousness was only a half sweet, half sad regret in the midst of new-found joy. As for Frank, he felt that if South didn't make Tiny very happy—always — he should like to horsewhip him. And he would do it, too! For Tiny must and should be happy, though he couldn't be.

V.

Frank was at Tiny's wedding early in December; but he contrived, on one pretext or another, to be away from Culverdale during the greater part of the winter. He ended his wanderings, and arrived at home toward the close of March. "Like the swallows," he said, as he took up his position on the rug, and surveyed the familiar room. There was a little change in Frank himself; he looked a little keener, a little older, and he had learned to laugh a little, to himself as well as to other people, at things which could not be mended. He stood smiling and interested while his mother poured out her news.

"And I had a letter from Tiny this morning," she said. "The child seems quite absurdly happy."

"It's a good thing for you that she is happy," said Frank. "You are responsible for that marriage, you know."

"How can you say so? I'm sure I had nothing to do with it. I never dreamed of such a thing!"

Frank shok his head. "Oh, you're a terrible matchmaker there's no escaping you. If you miss one you make another. Where is Tiny now?"

"Rome. Would you like to see the letter?"

He took the flimsy sheets, and deciphered Tiny's dashing raptures rather laboriously. It was the same Tiny; yet not quite the same. There were pretty little airs of authority, and turns of expression which showed that Tiny, who had never been very important before, felt herself something of a queen in her new life. There was wonder at novel sights and experiences—he seemed to see her wide brown eyes as he read—and a profound belief in her husband's perfection. Frank folded the letter and gave it back. He perceived that there was no need for him to start off to Rome with a horse-whip to secure Tiny's happiness. It was taken out of his hands altogether.

Having told her news, Mrs. Leicester began to make inquiries. Had Frank seen anything of the Stauntons as he came through town?

He had called there, and afterward had been asked to dine.

"Well, then, what is this about Mrs. Austin? I had a note from Mrs. Staunton a day or two ago, and she said she thought I should soon hear some news about her that would surprise me. What does this mean?"

Frank looked vaguely in the direction of the piano. "It means that other people can try their hands at match-making as well as you."

"Oh! Is she going to be married? I thought perhaps it was a sisterhood, or something of that sort. Is she really going to be married?"

"Can't say. People don't always succeed with their matches, you know. But there's a man who admires her very much, it seems, and Mrs. Staunton is always trying to bring them together. It's a nice little amusement for her, I suppose; she doesn't seem to have much else to do, except drink afternoon tea."

"Did you see Mrs. Austin?"

"No," said Frank, still staring into space; "she was out of town."

"And who is this man? What is his name?"

She was informed that his name was Rowland.

"But who is he? Tell me something about him."

"Oh, I don't know. He's a middle-aged man—Fred. Staunton pointed him out to me—getting a little gray."

"But you must know more about him than that. What does he do?"

"Breaks stones, I believe," Frank replied.

Mrs. Leicester looked so utterly astounded and aghast that he began to laugh. "Oh, don't be frightened," he said. "It's all right. It all depends on what you do it with. He breaks 'em with a little hammer, and that's very respectable."

"Oh, you mean that he's something—what do you call it?—something geological!" she exclaimed, and was much relieved.

"That's about it," said Frank. He threw his shoulders back and stretched his long legs. "Upon my word I think I'd sooner do an honest day's work on the roads than go knocking off little clips of stone and writing papers about 'em. But I suppose he likes it."

"Dear me!" Mrs. Leicester mused. "I should really think it would be a very nice thing for Mildred."

"I should leave her to decide that, if I were you."

"It must be very lonely for her as she is. I wonder when the wedding will be. Last time we gave her a pair of pink and gold candlesticks——"

"Did you?" said Frank. "Then don't do it again."

"Why, no, of course not. Well, I must think about it."

"If I were you, I'd wait till I knew there was something to think about," said Frank, dryly, and there was a silence broken after a time by Mrs. Leicester. "I've got an idea!" she announced.

Frank looked round rather impatiently, expecting to hear of a wedding present. "I've been thinking," said his mother, "wouldn't you like to ask her to come down again before her marriage? You would—wouldn't you?"

He started. "No!" he said.

"No—really?"

"No," he repeated. "Why should she come? It was all very well for once, when you were match-making, but I don't want to see Mrs. Austin again."

"Really," said Mrs. Leicester, "Well, you surprise me—there's no making you out, Frank. I knew you didn't like her at first; but at the end of the time I thought you were just a little taken with her——"

Frank's answer was an impatient movement of his shoulders.

"Oh, I was wrong, I suppose," Mrs. Leicester continued, cheerfully; "but it was so. First I thought you didn't like her, and then I didn't know, and then I thought you did."

"Well, you were right once," said Frank.

"Yes; but it was very funny, I really thought you did. I don't mean anything serious, of course; but I thought, now, if she had been a little younger —— Or that you would take a fancy one of these days to somebody younger, but that style, you know."

"Did you?" he answered, with a laugh. "Then you were wrong—quite wrong. I shall marry some time or other, but my wife won't be the least bit like Mrs. Austin."

"Well, then, my dear boy, I'm sure it was very nice of you to be so attentive just because she was your mother's old friend. I hadn't the least idea you disliked her as much as all that."

"Disliked her—rubbish!" cried Frank. "You're always going from one extreme to the other." He turned round and stood with his hands in his pockets, and his head bent, staring so absently at the fire that his mother said, smilingly:

"A penny for your thought! Come, they must be worth hearing!"

"Oh, I don't know," he began, rather sulkily; but all at once he laughed and looked up. "Here, hand over that penny," he said; "I was wondering how long it took to get over the measles."

Mrs. Leicester was much amused at the absurd idea, and gave him very precise information as to the time which had elapsed in his own case before his recovery was quite complete. "But I don't know that it is the same with everybody," she said.

"No, I dare say not," he replied, a little vaguely. "But I suppose a fellow always does get over them some time or other, doesn't he?"

The End.

MEALS FOR MEN.

Masculine Peculiarities Worth Heeding for Sake of Harmony.

"Now, that's the kind of dinner I like," said a big business man after dining at a friend's—"no frills, no pastry, and yet the whole dinner fine and dandy. Why don't more women make meals like that instead of all those dinky dishes?"

The conversation following brought out further points of difference between men meals and women meals, the ornate, the complex, the really disguised foods whinch she herself relishes with delight.

Several men have these peculiarities. One has for breakfast, morning after morning, a bowl of top milk and white bread, with eggs in different forms; another lunches on rice dishes of the plainest of stews, and all men seem to like the dinner consisting of the following: A good strong cup of bouillon or plain soup, a steak or chops with peppers or mushroms, a plain salad with French dressing and salted wafers and perhaps pie, with a strong cheese. These are not the plates preferred by madame. She it is who likes the nameless dishes of entrees, the deviled and pastrified meates or pates. She it is who likes the elaborate and creamed vegetable. She it is whose chief delight is the complex fruit salad with sweet dressing and the still sweeter cake and comfit dessert.

Now, this is but a plea for women to understand the tastes of men and not cook for them what in reality the women like most themselves. We believe that this century old fiction that man has a capricious appetite is disproved by fact and that most men prefer the plainer, less elaborate dishes. We believe also that most of man's superior strength lies in the secret of his more wholesome feeding. We feel like believing that woman, too, might attain this superior strength if she also ate more plainly and spent less time in making concoctions. "Feed the brute," yes, but what he really wants, and then eat it ourselves, so we may attain his superior strength and physique in order to shoulder high with him when that great wave of equality comes.

Melbourne, a City That Planned.

There is and always has been a great amount of public spirit in Melbourne, due, in large part, to the Scotch element that has predominated from the beginning. "The first citizens, led by Scots, as a rule, set to work with magnificent faith in the future. A city was planned worthy of being the capital of 10,000,000 people, and the public buildings were designed on the same generous scale. The soil on the site was deep and rich. That suggested tree planting, and most of the streets are to-day relieved by handsome foliage, and the parks which ring the city round have trees worthy of the forests of Europe. The avenue of elms in Fitzroy gardens certainly represents that tree at its best. —Bishop E. E. Hoss.

A CHANCE FOR THE CHAPLAIN.

(The Christian Herald)

"Won't you be very, very happy when your sentence is over?" cheerfully asked a woman of a convict in prison.

"I dunno, ma'am, I dunno," gloomily answered the man.

"You don't know?" asked the woman amazed, "Why not?"

"I'm in for life."

SUNDAY SCHOOL LESSON

June 11, 1916 Lesson XII.

The Philippian Jailer.—Acts 16: 16-40

COMMENTARY—I. An evil spirit cast out (vs. 16-18). Evil spirits undertook to testify of Jesus during his earthly ministry (Mark 1:24; 5:7), and he was unwilling that the declaration of his Messiahship should be made by demons, so he cast them out. The demon-possessed girl in Philippi undertook to declare the reliability of the apostles as religious teachers, and Paul, in the name of Christ, commanded the evil spirit to come out of her. The apostles were unwilling to have such witness borne to their mission. The young woman was cured of her malady, and this was the occasion of a bitter outbreak against the apostles. She was a sorceress, pretending to foretell future events and to give advice regarding mysteries.

II. Paul and Silas imprisoned (vs. 19-24). 19. Hope of their gains was gone—The young woman was a slave and her masters were receiving money for her utterances. When they found that she had lost the spirit of tended prophecies, or oracles, and divination, they knew that they could receive no more money for her pretended prophecies, or oracles, and they were enraged. Drew them into the marketplace unto the rulers—It was the custom for the complainants to drag the defendants before the magistrates. The market-place was the great place of assembly and was where the magistrates held court. "Rulers" is the general term for authorities. 20. Trouble our city—It was difficult for the masters to bring a charge against the apostles for ruining their business, hence they accused them, as Jews, of bringing trouble and confusion upon the city by their new teachings. 21. Not lawful for us to receive—The apostles were preaching the gospel of Christ, and this they had a right to do if they did not interfere with the religion of the Romans. 22. The multitude rose up—This accusation had the desired effect and the people were aroused to join with the masters of the sorceress in opposition to the apostles. Rent off their clothes—The magistrates stripped off the garments from Paul and Silas and gave orders to the officers to beat them. 23. Laid many stripes upon them—The Roman lictors who beat the apostles were armed with rods and used them upon the bare bodies of their victims. 24. Having received such a charge—The charge was to keep the apostles securely imprisoned. There must have been a fear that Paul and Silas might escape unless a strict guard was maintained. The inner prison—They were pestilential cells, damp and cold, from which the light was excluded, and where the chains rusted on the limb of the prisoners.—Howson. Feet fast in the stocks—The feet of the apostles were placed in heavy wooden frames so securely that they could not move them.

III. The Prison Opened (vs. 25-28). 25. Paul and Silas prayed, and sang praises—The situation the apostles were in was not conducive to sleep, even if they were disposed to rest; but they doubtless chose to spend the time in prayer and song. They praised God for his great mercy to them and for the privilege of suffering for Jesus' sake. The tense of the verbs in this sentence is the imperfect, which indicates that they kept praying and singing praises to God. The prisoners heard them—It is safe to say that no such sounds were ever before heard in the jail at Philipi. 26 and suddenly there was a great earthquake—While Paul and Silas were praying and singing with loud voices, the place was shaken with an earthquake. During the service that followed Peter's miraculous release from prison some time before this, the place was shaken where the Christians were assembled (Acts 4:31). Immediately all the doors were opened......bands were loosed. In the presence of God's power, strict orders to keep prisoners securely, inner prisons, stocks and guards were unavailing. The Almighty set one of his many agencies into action and his servants were set free. God employed one of the most powerful agencies in nature to do delicate work that night. Prison doors were opened, stocks were unfastened, and no one was injured. 27—Would have killed himself—The jailer was responsible for keeping the prisoners committed to his care, and if they escaped, his punishment was death. He saw the prison doors open and concluded that the prisoners had escaped, hence his purpose to take his own life. 28. Paul cried with a loud voice.—In the dim light the jailer could not see the prisoners, but Paul could see him, and saw what he was about to do. In the place where Paul and Silas then were it was dark, but the jailer was outside where some light fell upon him. Paul was in earnest in warning the jailer not to injure himself, assuring him that no prisoner had escaped.

IV. The jailer converted (vs. 29-30.) 29. Called for a light—The Greek has lights. The jailer was in haste to see the condition of things in the prison. Trembling—The jailer at once recognizes that God has testified for these men as his own ministers and messengers by the terrible shaking he has given the prison. He recognizes his own guilt in being the instrument of the magistrates in violating the sacredness of their persons.—Whedon. Fell down before Paul and Silas—An act of fear and reverence. 30. Brought them out—The jailer brought Paul and Silas either into the court of the prison or into his own apartment. He had no fear now that they would escape. Sirs—Lords. The jailer addressed his prisoners as his superiors. What must I do to be saved—The jailer was not asking how to be saved from punishment for allowing his prisoners to escape, for they were all in custody still; but he was asking about the salvation of his soul. He was moved by the Spirit and by the influence of the apostles to realize his sinfulness and his need of salvation. 31. Believe on the Lord Jesus Christ—This included the acceptance of Jesus as his Saviour, and complete surrender to him. It meant the giving up of paganism even in the midst of pagan influences. Thou shalt be saved—Saved from sin and placed in the way of final salvation. And thy house—All would be saved on the same conditions. 32. Spake... the word of the Lord—Paul and Silas preached the gospel to the jailer and his household in the night and amid the marvelous results of the earthquake. 33. Washed their stripes—The jailer tried to make amends for the severe treatment the apostles had received at the hands of the people of his city. Baptized.... straightway—The jailer and his household made no delay in makinf full declaration of their faith in Christ and receiving the seal of entrance into the Christian church. 34. Set meat before them—It was a wonderful night, both for the apostles and the jailer's household. The jailer fed the apostles and it seems as if he could not do enough for them.

V. The apostles dismissed (vs. 35-40). By morning the magistrates were convinced that Paul and Silas had been unjustly dealt with, and ordered their release. Paul declared that he and Silas were Roman citizens and their rights had been seriously violated. He objected to being dismissed secretly and demanded that the magistrates release them as publicly as they had imprisoned them. The officers were glad to humble themselves and beg the apostles to leave the city. Paul and Silas went to the home of Lydia and comforted the saints before leaving Philippi.

Questions.—Where is Philippi? How did Paul come to be there? Who was with Paul at this time? Why were he and Silas arrested? What did the magistrates command? What was the Roman custom as to beating? What is meant by the inner prison? The stocks How did Paul and Silas spend the time? What occurred at midnight? Why did Paul insist on a public release? Why did the magistrates fear? What did they do?

PRACTICAL SURVEY.

Topic.—Apostolic ministry defined.

I. By the statement of a slave girl.
II. By an overruling Providence.
III. By a converted Roman jailer.

I. By the statement of a slave girl. This lesson presents a remarkable example of the champions of faith and falsehood and the characteristics of each. The apostles appear as men of transparent integrity, living for one object, the presentation of truth to men for their present and eternal good. The masters of the slave girl represent self-interest in arms against the truth. The message of the apostles was directly antagonistic to paganism and idolatry, and they were right in guarding it against all perilous association. Paul had to dissociate the conjurer from Christianity to prevent the gospel from being regarded at Philippi as another form of divination. Paul was grieved to see a human being the victim of demoniacal power; to see the malignant design with which her testimony was given and to see the sordid motives of the masters of the girl. Paul did not act from impulse, but upon the principle of compassion for the girl. Her owners cared nothing for her benefit. They cared not how her nature was degraded if only their mercenary desires were satisfied. When their profits were gone their anger knew no bounds. The statement of the slave girl was truth. Paul wished her to experience the benefits of that truth. When the kingdom of Christ was brought into contest with the kingdom of Satan it revealed its victorious might. The weapons of falsehood, the root of opposition to truth, were no longer effective.

II. By an overruling Providence. The magistrates of Philippi hastily adopted the opinions of the clamorous multitude. This was the first time Roman law was invoked against Christians. While his servants suffered in silence, God conducted their affairs. By his permission of their affliction God made ready for the first ingathering of souls among the heathen of Europe. The apostles knew they were not imprisoned by chance or accident, but were under the wise control of the eternal Father. They were not moved from their steadfastness. Abounding joy in suffering for Christ overflowed. Only heroes of highest type could have prayed in such a place. Their fervent devotion was superior to physical discomforts. The consciousness of having done right was a sustaining power. The results were extraordinarily great, proofs of the divine presence, an illustration of the divine power, a sign of the divine indignation, a symbol of the divine goodness.

III. By a converted Roman jailer. The conversion of the Philippian jailer was a glorious consummation of the persecution. He had rightly connected the earthquake with God and the presence of his servants. The supernatural aspect of things aroused his conscience, and smote him with a sense of guilt and alarm. His question implied a sense of peril and a sense of necessity of individual effort. He asked the most weighty question a man can ask of that God in His mercy can answer. It was the great cry of the human soul. Simplicity and immediacy characterized Paul's answer. It was from the sleep of sin that the jailer was called. He was ignorant of the ground of a sinner's hope. He looked to something he might himself do rather than what might be divinely done for him. Following his emotion came the necessary instruction. What the marvelous event could not do was done by the gospel. Paul's "we are all here" exactly met the occasion. The apostles were there with the prayer of love ready to prevent the jailer from self - destruction and to direct him to true safety. As soon as faith entered the jailer's heart it was manifest in a deed of kindness. Paul had not forgotten the spiritual interests of the jailer in his own spiritual uplift. The jailer did not forget the spiritual needs of the apostles in his new-found deliverance. Instead of the sudden and hopeless death the jailer received the gift of temporal and spiritual life. That Philippian jail was the first in Europe to contain a mercy-seat A complete evangelistic service was conducted, consisting of prayer, praise, preaching and conversions. This was the beginning of the Christian Church in Europe. T. R. A.

Posthumous Influence

The relations between man and man cease not with life. The dead leave behind them their memory, their example and the effects of their actions. Their influence still abides with us; their names and character dwell in our thoughts and hearts; we live and commune with them in their writings; we enjoy the benefits of their labors; our institutions have been founded by them; we are surrounded by the works of the dead; our knowledge and our arts are the fruits of their toil; our minds have been formed by their instructions; we are most intimately connected with them by a thousand dependencies. Those whom we have loved in life are still objects of our deepest and holiest affections. Their power over us remains.— Andrewa Norton.

Stammering

The stammerer looks at his watch and says: "Ten o'clock." You fail to understand and you glance at him inquiringly. He is dumb as quick as thought. Possibly his difficulty is thought—both are alike in quickness. Assume that thought causes stammering.

Observe the stammerer's contortion as he compresses his lips, twists his mouth and does all the other distressful things that repel his auditors, to his chagrin and disappointment.

What is most evident in those contortions? Effort.

What is the next most evident thing? Misdirection of the effort. He holds his mouth shut; but he should be opening it. He holds it open, but he should be closing it.

So far, we have two elements, a thought and a misdirected effort. Do they belong together? Let us analyze the thought. What thought would occur to the stammerer when you wanted his words repeated? Answer it by another question: "What is uppermost in the stammerer's mind when he is required to talk? Why, "I can't talk." That is the thought.

When a person is required to do what he fears he cannot do, what does he do? He makes a desperate effort. It is safe to assume that the stammerer will make a desperate effort to talk. We see the effort and see that it is misdirected. We also see that the thought of disability and the effort have a logical connection. And we know that frightened efforts are often misdirected.

Take for the theory that stammering is a misdirected effort prompted by a mistaken idea of disability. Understand that it is only a theory. The thought element was adopted on account of its quickness only; whereas the misdirected effort was obvious. The misdirected effort is the more credible element; but even its credibility is lessened by its combination with the less credible element, the thought. Consequently, the combination is merely an unproved theory.

If the key fits the lock we conclude we have the correct theory. But several keys might fit one lock. However, the theory has to meet so many different requirements that there is practically no chance for duplicate theories. It is no inflexible rule of science that the theory which best fills all the requirements must be accepted as a working theory until a better one is found, and if neither a better one nor the need of a better is found, the working theory must be accepted as the truth.

Let us see how the requirements are met by the theory that stammering is a misdirected effort prompted by a thought of disability.

Stammering does not begin until after speech acquisition; the number of beginnings is greatest then, and it decreases with advance in age to practicaly zero in adult life. According to the theory stammering could not occur until after speech acquisition, for a sense of ability would have to precede the thought of disability. Soon after speech acquisition the still insecure faculty could not readily be upset by misdirected effort; but in adult life normal speech would be so firmly fixed that it could not be readily upset.

Stammering is frequently first observed after a convulsion. According to the theory, the physical weakness caused by the convulsion would make the child's speech halting, and would thereby instill an idea of disability which would prompt the misdirected effort. This explanation would hold for all cases arising from severe debility, such as sickness, injuries, fright, etc. Similarly mimicry of stammering and the habit of repeating words—stuttering—would, when somewhat fixed, cause a thought of speech defect which would prompt the misdirected effort. In short, all verified causes of stammering justify the theory—a statement that cannot be made for any other theory that has ever been suggested.

Stammering in decreased to the extent of disappearance by solitude. According to the theory, no fear of disability would rise, for it would matter not in solitude whether the stammerer talked or remained silent. Similarly the little girl who stammers talks freely to her doll; the stammerer can readily repeat a remark which he knows you understand, and he can read or recite in concert.

Through all the long list of phenomena which characterize stammering the theory will be found to fit. Consequently this theory that stammering is a misdirected effort prompted by a thought of disability is probably the most reliable working theory that has ever been propounded for any disorder.

The application of the theory is that stammering is merely a habit—although a peculiar one—and may be stopped like any other habit merely by declining to indulge in it. The common schools are fostering the habit by requiring the child to stammer, and are spreading it as well, for stammering is highly contagious. When stammering is forbidden on school property the disorder will be unable to pas the schools and will be entirely wiped out after adult stammerers seek cures or die off. Recovery may be hastened by increasing the usual amount of free talking, but this requires skill.—Scientific American.

Gott's Mitt Us Yet!

"With burning hearts we thank God, who has helped us so far."—Dr. Theobald von Bethmann-Hollweg, the Imperial German Chancellor.

Gott of our Kaiser, known of man,
King of our world-known nation fine,
Beneath whose mighty arm we plan
Possession over land and brine;
Ach, Men of Mein, don't let's forget,
Gott's mit us yet, Gott's mit us yet!

The anguish and the horror rise;
A people and their king depart;
Fast swings the torch while frantic flies
A nation weak, with sickened heart;
Ach, Men of Mein, don't let's forget,
Gott's mit us yet, Gott's mit us yet!

Far-famed our navy sails away
To rake and wreck and tumble down;
Ah, see our pride return to say
We've ruined yon defenceless town!
Ach, Men of Mein, don't let's forget,
Gott's mit us yet, Gott's mit us yet!

So drunk with hope of power, we loose
Our ships that sail the upper air,
And floating do we put to use
These engines dire on all that's fair;
Ach, Men of Mein, don't let's forget,
Gott's mit us yet, Gott's mit us yet!

You simple folk we do not spare
From submarine and seeking 'scope;
We slyly thrust them unaware,
For worldly gain through shell and shot,
And turning leave them without hope
Shed favor on thy people, Gott!

—Observo, in Montreal Star.

AT HAPPY CAMP.

"'Cause, Mother, there wouldn't any more of 'em get in front of his gun.

SUNDAY AT HOME

DO THOU FOR ME.

Do thou for me, God—my God;
Helpless, I appeal to thee;
What is best I cannot tell,
What is right I cannot see.
Blind, I dread to stand or go,
And I fear to lose the way,
For I know not what to do
And I know not how to pray.
Hear my cry: "Do thou for me—
I can trust it all with thee."

Fight thou for me, God—my God
How shall I my foes withstand?
I should only fail and yield;
Take the battle in thy hand.
Thou my Rock, my Strength, my Shield—
Lo, I flee to thee for aid;
Weak—so weak—but be my strength
Perfect through that weakness made.
Hear my cry: "Fight thou for me—
More than conqueror I shall be."

Live thou for me, God—my God;
Come thou and abide in me,
That my sinful self may die,
Daily crucified with thee.
Think my thoughts and speak my words,
Move my lips, my hands, my feet,
Till thou art unveiled in me
And thine image is complete.
Hear my cry: "Live thou for me—
Thus alone I live for thee."

—Annie J. Flint in the Christian Herald.

HE HATH GIVEN ME COUNSEL.

His name shall be called Wonderful, Counsellor.—Counsel is mine, and sound wisdom; I am understanding, I have strength.—Thy word is a lamp unto my feet, and a light unto my heart; and lean not unto thine own understanding. In all thy ways acknowledge Him, and He shall direct thy paths.

O Lord, I know that the way of man is not in himself; it is not in man that walketh to direct his steps. —Thine ears shall hear a word behind thee, saying, This is the way, walk ye in it, when ye turn to the right hand, and when ye turn to the left.—Commit thy works unto the Lord, and thy thought shall be established.—Man's goings are of the Lord; how can a man then understand his own way?

Thou shall guide me with thy counsel, and afterward receive me to glory. —This God is our God for ever and ever; He will be our guide even unto death.

EXCELSIOR.

To excel is to be superior to, to rise higher, out and up. An empty bag cannot stand upright, but fill it with grain and it stands firm. When I ask a man to give up the world and serve the Lord he won't do it, he holds what is good, but when I put him in possession of something higher and better and more beautiful than he will let other things go.

"Who that one moment has the least descried Him
Dimly and faintly, hidden and afar,
Doth not despise all excellence beside Him,
Pleasures and homes that are not and that are."

The change from the Old Testament is amazing. Paul, no mean authority, calls the old economy, a ministration of death, written in stones.

A ministration of condemnation, all that the law can do is to condemn, a mere shadow of good things to come. How many are satisfied with the carnal and the present. But when they see beauty in the face of Jesus, when they catch His spirit, live His life, adopt His aims, then they let go these perishing things and hold on to the things which are eternal.

The ministration of death was glorious; it was revealed to Moses, it came from God, amid signs of glory and terror; it had to be looked at afar off—men were not to come near, bounds were set that they might not pass. The Lord Jesus did not say, go away from Me—but He says come Me—Suffer the little children to come unto Me. He does not stay at the invitation. He invited Himself. "I stand at the door and knock; if any man hear My voice I will come in." The kingdom is not in the lonely mountain, blazing with fire—the kingdom is within, in the heart of woman, of a child even. He wants your company, your welcome, your glad appreciation. He offers companionship, protection, pardon for all at the beginning, a safe escort all the journey, and triumphant entry into port. You are invited to make the comparison; the former glory shrinks into small proportion by reason of the glory that excelleth. That which is done away was glorious, how much more that which remaineth exceeds in glory.

Here is the secret of that great mystery. People wept when they saw the martyrs burn out of sheer pity. They did not see the glory that excelleth burning in the soul, a candle lighted by the Lord, a light that never was on sea or land, and cometh not from the sun.

What to thee is shadow, to Him is day,
And the end He knoweth,
And not on a blind and aimless way
The spirit goeth."

H. T. Miller.

OLD TIME WITCH FINDERS.

Sure Signs by Which Agents of the Evil One Were Detected.

Three hundred years ago the business of finding out witches was well established and accepted in courts of law as highly proper.

In 1649 it is recorded that the magistrates of Newcastle, England, sent to Scotland for an expert witch finder. This gifted person proceeded to show his skill by quickly discovering fifteen witches and securing their conviction. One Matthew Hopkins was a celebrated witch finder of that period.

It was easy to discover witches when you knew how. The suspected person could be forced to weep and then detected by the well known fact that a witch could shed only three tears and those from the left eye, or she could be pricked with pins to discover the spot insensible to pain, which was a sure sign of dealings with the devil.

That women were far more likely to dabble in witchcraft than men was conceded. The reason was satisfactorily explained by a famous German text book on witches published in the fifteenth century. It was simply that women were inherently wicked, whereas men naturally inclined to goodness.—Exchange.

A COLD
Settled On Her Lu
Causing Great Pai

THE CURE WAS
DR. WOOD'S
Norway Pine Syrup.

Miss D. M. Pickering, St. Catharines, Ont., writes: "Having derived great benefit from Dr. Wood's Norway Pine Syrup, I thought I would write and tell you of my experience. When I first came out from England I contracted a severe cold, owing to the change of climate. It settled on my lungs, and caused me a great deal of pain. I tried every remedy I could think of, but got no relief. My father, who had heard a great deal about the good qualities of Dr. Wood's Norway Pine Syrup, advised me to try it. I did so, and I am pleased to say, found immediate relief. I only took one bottle and it cured me completely. My mother had a severe cold also, and Dr. Wood's Norway Pine Syrup cured her, so we never fail to keep a bottle of it in the house."

See that none of those so-called "pine syrups" are handed out to you when you go to your druggist or dealer and ask for "Dr. Wood's." It is put up in a yellow wrapper; three pine trees the trade mark; price, 25c and 50c.

Bradstreet's Trade Review

Toronto— Favorable statemen continue to come in from business ci cles. Some of the larger drygoo houses have had stocks heavily dr ed. The volume of business is e to the banner year 1913. Collect have been encouraging up to Oils and paints have moved from ers and wholesalers in large vol and hardware merchants find a sale for seasonable lines from th shelves. Building continues sl however. Grocery firms report bu ness normal. Leather houses h about all they can handle in the of orders. Jewelry firms refer to watch business as exceptionally tive.

Montreal—Trade continues on encouraging basis. Factories a foundries are practically all busy o war and commercial orders and have orders well ahead. Business is cor respondingly good in wholesale an retail trade, in groceries, drygoods leathers, seasonable lines of the hardware, oils and paints. Collections are good, comparatively speaking.

Winnipeg—A good deal of grain, especially wheat and oats continues to be sold for export, although the flour trade is dull The commodity market is otherwise active, especially in staples. Orders for drygoods keep up well. The boot and shoe trade continues satisfactory. The same is reported by grocery houses. Paints have been moving freshly from hardware stores, and other shelf lines have sold in good volume.

Calgary—The new season ope auspiciously. The agricultural outlo is promising, although it is early count much on crops. The moveme of merchandise to the country kept up and collections have bee good. Edmonton reports business wholesale and retail houses well to the average, and Saskatche centres report the volume of tr well in advance of 1915.

Vancouver—Wholesale and ret trade is fairly good, much in excess the corresponding period a year ag Mining companies are making mo some of them in a phenomenal ner. The fishing industry is exp ing.

Hamilton—Industrial situatio solid. The big plants are going time and orders on hand promise continuous circulation of funds th makes directly for prosperous co mercial conditions. Wholesalers retailers feel this, the volume business keeping pace with fo favorable showings. Bank clear were almost $17,000,000 in M against $12,200,000 in May, 1915.

London—Business is as reported in recent weeks. Industries are busy an the movement of merchandise continues large.

Ottawa—Business is fair. Or from the retail trade have been mal. Factories too have most of been busy up to date.

Quebec—Business conditions much about the same as the pr ing week. In the several branc fair volume of business continue be done. Collections on the are fair. The outlook as a rule tinues favorable.

THE WISE YOUNG MAN.

(Saturday Night)

He had been calling on her twic week for six months, but had not proposed. He was a wise young man, a didn't think it necessary.

"Ethel," he said, as they were taki a stroll one evening, "I—er—am goin ask you an important question."

"Oh George" she exclaimed "this is sudden. Why I—"

"What I want to ask is this," he interrupted; "What date have you your mother decided upon for our ding?"

HALF THE ILLS OF LI
Are Caused By CONSTIPATION

When the bowels become consti the stomach gets out of order, the does not work properly, and then the violent sick headaches, the so of the stomach, belching of wind burn, water brash, biliousness, general feeling that you do not c anything.

Keep your bowels regular by Milburn's Laxa-Liver Pills. Th clear away all the effete matt collects in the system and make y that "life is worth living."

Mr. B. W. Watson, St. John writes: "I have been troubled constipation, for the last three and during that time have tried remedies, all of which failed to hel A friend recommended Milburn's La Liver Pills, and after using three or vials, I felt like a new man. I am still taking them, and am positively sure that I am on the road to recovery. I strongly recommend Milburn's Laxa-Liver Pills.

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all drug stores or dealers, or will be mailed on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FARM AND GARDEN

WARRING ON WEEDS.

June is the month of weeds and the cultivator must be kept on the move. One hoeing is better than three waterings.

Prof. Bailey gives this advice on keeping weeds in check:

1. Practice rotations; keep ahead of the weeds. Certain weeds follow certain crops; when these weeds become serious change the crop.

2. Change the method of tillage. If weed persists, try deeper or shallow plowing or a different kind of harvalor, or till at different es or seasons.

Harrow the land frequently when in fallow or is waiting for a crop. w it, if possible, after seeding. before the plants are high enough roken by the implement. Potars and other things can be harafter they are several inches and sometimes the land may be wed before the plants are up.

Practice frequent tillage with surface working tools throughthe season. This is hard on weeds does the crop good.

Pull or hoe out stray weeds that s the wheeled tools.

Clean the land as soon as the is harvested, and if the land lies n in the fall, till it occasionally. any persons keep their premises rupulously clean in the early season, ut let them run wild late in the fall, thus is the land seeded for the folwing year.

7. Use clean seed, particularly of rops that are sown broadcast and which, therefore, do not admit of illage.

8. Do not let the weeds go to seed n the manure piles, in the fence corners and along the highways.

9. Avoid coarse and raw stable manure, particularly if it is suspected of harboring bad company. Commercial fertilizers may be used for a time on foul land.

10. Sheep and pigs sometimes can e employed to clean the weeds from oul and fallow land. Land infested ith Jerusalem artichokes is readily eaned if hogs are turned in.

11. Induce your neighbor to keep his d as clean as you keep yours. Rank weeds and their like as a complient to a man's soil. Land that will grow weeds will not grow crops, crops are only those particular ds of weeds a man wants to raise. ds have taught us the lesson of d tillage. There is no indication t they intend to remit their efforts our behalf.

OD FARMERS NOT TROUBLED.

here the soil is properly tilled and ution given to a suitable rotation rops, weeds are of little consence. The Farmers Cyclopedia of culture says the possibility of a ufiant growth of weeds simply furhes an urgent reason for thorough age of the soil, and the result is in better crops of cultivated uts.

gardens, cultivation and handing are the sovereign remedies for ds. In lawns, annual weeds may destroyed by repeated mowing. Perennial weeds may be eradicated by digging and pulling and by sowing and better grass seed. Weeds lands are to be crowded out by securing a thick sod. If the grass ds is impure and the stand of grass oor, it may become necessary to and reared.

cereal and other field crops the of horse-power weeders has been ded with good results. Where a rational rotation of crops is followed, weeds seldom obtain a foothold.

Special attention should always be given to waste-places and roadsides in order to prevent weeds from going to seed in such localities.

Many weeds may be destroyed by repeated cutting before the seeds have become mature. If, for example, the oxeye daisy is cut within ten days after blooming it will be prevented from reseeding.

In recent years extensive experiments have been made in destroying weeds by means of chemicals. At the Rhode Island station it was found that common sorrel could be gradually driven out of acid soils by liming. Lime increases the yield of timothy, orchard grass, brome grass and clover, but greatly checks the growth of sorrel. This may be accomplished by applying five tons of air-slaked lime per acre, followed by an application of three tons per acre during the next year. In North Dakota it was found that nearly all the annual weeds commonly found in grain fields could be killed by spraying with copper sulphate without injuring the grain. About one barrel (30 to 60 gallons) of a solution of copper sulphate in the proportion of one pound to four gallons of water is required per acre. This application is not effective in dry weather. Spraying should be done when the young weeds are just out of the ground, while the grain stands from five to ten inches high. Experiments in Vermont showed that the various species of wild mustards could be cheaply destroyed in this manner. A number of other chemicals have been tested in spraying weeds, but usually without satisfactory results.

FARM NEWS AND VIEWS.

Rhubarb is usually propagated by division of the fleshy roots, small pieces of which will grow if separated from the old established roots and planted in rich, mellow soil in either spring or fall. Poor soil should be made rich by spading out at least three feeting of the surface, filling with well-rotted manure to within one foot of the level, throwing in the top soil, setting the roots with the crowns four inches below the surface and firming them with the feet. The stalks should not be cut for use until the second year. See that the plant does not want for water when it is making its heavy leaf growth.

In fall, coarse manure should be thrown over the crown, to be forked or spaded in lightly when spring opens. Cultivation will not be necessary throughout the summer if a mulch is placed over the ground on each side of the plant. The great overhanging weeds are quite effectual discouragers of weeds, and few, if any, will grow in the immediate neighborhood of the root.

Old rhubarb plants in the garden should be dug up, divided—and plants with only two or three buds should be replanted in very rich soil every four or five years. The seed should be cut off as soon as it appears, so as to throw the strength into the leaves and stalks. If given good care and well manured these plants will live for many years and yield abundantly.

Skim milk fed to calves should be supplemented by oats, bran, cornmeal and hay and pasture.

The best indication of the breeding value of a bull is furnished in the milk records of his dam.

ry Wage Earner Should Answer Question Himself or Herself

hat Does the Future Hold For You if Health Gives Way?

In dollars and cents what is the th of the brawn of your arm; t is the value of the staying power that permits continuous labor— at are they worth to you?

uppose you did something so foolas to reduce your strength, vitalur judgment one-half, and it were possible to get them back—how uch would you pay to regain the portion?

hen you let yourself run down, d reduce your chances for success life—if sleeplessness comes you lower still—should appetite or tion fail, you are stared in the hy physical bankruptcy.

t let it go so far, take Ferro It has cured thousands and it cure you; it builds up bodily gth, makes muscles like steel, s tiredness by energy and new rrozone rebuilds sick folks be It contains the strengthening nts that every run-down system ires.

pecially at this season, everyone a purifying tonic—Ferrozone the bill exactly—nothing known l rejuvenates and uplifts so fast.

t once the appetite improves. You st well and arise next morning feeling fit and fine.

Headaches disappear, weakness gives way to the vigor that only Ferrozone can supply. Try it, results are guaranteed, 50c per box or 6 for $2.50 at all dealers or by mail to any address, if price is remitted to the Catarrhozone Co., Kingston, Ontario.

G. L. McBROWN PRAISES "ANZACS"

On April 24th the Pall Mall Gazette of London, England, contained many views of the celebration of Anzac Day at Westminster Abbey commemorating the landing of troops from Australia and New Zealand on the Gallipoli Peninsula, which occurred on April 25, 1915. Among them appeared the following glowing tribute paid by Mr. George McL. Brown, European manager of the C.P.R.

"The solemn beauty of Westminster Abbey, which echoes with the story of our past, is a fitting shrine in which to commemorate the noble 'Anzac' dead. Not alone because of the valor, the fortitude and the sacrifice, are the memories of those lives laid down, precious to the Empire, but because they symbolize the high qualities which throughout centuries have gone to the building up of the British race. The courage and the chivalry of our forefathers lived again in those dauntless heroes of Gallipoli who have passed on undimmed the traditions of our history. And wherever those traditions are reverenced, in the United Kingdom, in their own homelands of Australia, New Zealand and Tasmania, in Canada, in South Africa—wherever the British flag flies there will be glorified those valiant men who strengthened the old, and forged new bonds to draw closer together and make of us one people. As a Canadian, I speak with certainty when I say that in no part of the Empire is the service the Anzacs have rendered more universally recognized than in Canada. We feel that their splendid story is our pride and honor too, and that they have to bring home to us afresh the truth that though seas may roll between, we are all mother country and daughter nations, one Empire; not each for us, but one for all—we die, we live."

BALLIN REFUTED.

(Philadelphia Record)

Herr Ballin announces that "the concept of freedom must be so established that Germans, in regard to the world trade, need no longer be forced to live as tenants of England." The enormous expansion of Herr Ballin's steamship line, and of the North German Lloyd, the Kosmos and other German shipping companies, gives no evidence whatever that they existed by sufferance of England. Germany acquired colonies—many of them—and extended its trade and its steamer lines all over the globe, and got a good deal of trade away from England. It was a very independent and prosperous "tenant."

BY A GIRL'S GRAVE.

(By George Herbert Clarke)

Under this immobile stone
Lies a little girl, alone.

It was a joy her life to see,—
So glad, and virginal, and free!

Her laughter gave the birds of spring
Sweet phrases for their musicking.

There is no laughter now, nor song,—
Silent she lies here, all day long.

All day the roses over her
Blossom and blow; the winds murmur;
She heeds them not; she does not stir.

A little girl, so soon at rest;
The secret longing unexpressed
Wakened, then paled within her breast.

God knows I loved her; and I know
(E'en though she never whisper'd so)
Her heart was mine, for weal or woe.

And now—she lies beneath the roses,
While man his thousand tasks disposes;
And the day breaks, and the day closes.
—From the Canadian Magazine for June.

As there is much beast and some devil in a man, so there is some angel and God in him.—Samuel Taylor Coleridge.

Melbourne, a City That Planned.

There is and always has been a great amount of public spirit in Melbourne, due, in large part, to the Scotch element that has predominated from the beginning. "The first citizens, led by Scots, as a rule, set to work with magnificent faith in the future. A city was planned worthy of being the capital of 10,000,000 people, and the public buildings were designed on the same generous scale. The soil on the site was deep and rich. That suggested tree planting, and most of the streets are to-day relieved by handsome foliage, and the parks which ring the city round have trees worthy of the forests of Europe. The avenue of elms in Fitzroy gardens certainly represents that tree at its best. —Bishop E. E. Ross.

Bullets in the Brain.

Several months ago a Belgian was struck by a dart dropped from a German aeroplane. It went right through his head vertically and between the two sides of his jaw, coming out under the chin. It was a clean cut. The man was treated in a London hospital and recovered. He is in London today, perfectly well, and had no symptoms except once a slight fit.

Another instance of marvellous recovery was that of a youth who was shot through the frontal lobe. London surgeons took away the whole of the bone of his forehead and a large piece of his brain. He made an immediate recovery. A medical student received a shell wound in the frontal lobe. He spent six months in various hospitals and made no progress. They told him he would heal up. He came to London, and it was found there was a chunk of shell in his brain. This was removed and he is now getting better. Playing his part in heroic action, an Australian got a bullet through his brain, the effect of which was loss of speech and paralysis of one side of his body. He was brought over here, the bullet was removed from his brain and he recovered his speech.

THE WISE YOUNG MAN.

(Saturday Night)

He had been calling on her twice a week for six months, but had not proposed. He was a wise young man, and didn't think it necessary.

"Ethel," he said, as they were taking a stroll one evening, "I—er—am going to ask you an important question."

"Oh George," she exclaimed, "this is so sudden. Why I—"

"What I want to ask is this," he interrupted; "What date have you and your mother decided upon for our wedding?"

"Thank you, I will take the Nerve Food with me."

"I don't want to miss a single dose, because it is doing me so much good. My nerves were so bad that I could not rest or sleep, and would get up in the morning feeling tired out.

"Besides that, I frequently had severe nervous headaches and got so cross and irritable that every little noise would set my nerves on edge. I did not seem to have any energy or strength, and the slightest exertion would use me up entirely.

"Then a friend told me of the benefit she obtained from using Dr. Chase's Nerve Food, and I decided to give it a trial. It was not long till I found that I was sleeping better and enjoying my meals. There did not seem to be so much to worry me, and I began to find a new pleasure in life. It is wonderful the way the Nerve Food is building up my health and strength, and since I have been using it I have found out that many of my lady friends have had a similar experience."

This is the way women everywhere are talking about Dr. Chase's Nerve Food. Seldom has any treatment ever aroused so much favorable comment. While natural and gentle in action, this food cure is wonderfully potent in building up the run-down system. Ask your friends about it and put it to the test when in need of restorative treatment.

50 cents a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations disappoint.

Dr. Chase's Nerve Food

Dr. Chase's Recipe Book, 1,000 selected recipes, sent free if you mention this paper.

Gott's Mitt Us Yet!

"With burning hearts we thank God, who has helped us so far."—Dr. Theobold von Bethmann-Hollweg, the Imperial German Chancellor.

Gott of our Kaiser, known of man,
King of our world-known nation fine,
Beneath whose mighty arm we plan
Possession over land and brine;
Ach, Men of Mein, don't let's forget,
Gott's mit us yet, Gott's mit us yet!

The anguish and the horror rise;
A people and their king depart;
Fast swings the torch while frantic flies
A nation weak, with sickened heart;
Ach, Men of Mein, don't let's forget,
Gott's mit us yet, Gott's mit us yet!

Far-famed our navy sails away
To rake and wreck and tumble down;
Ah, see our pride return to say
We've ruined yon defenceless town!
Ach, Men of Mein, don't let's forget,
Gott's mit us yet, Gott's mit us yet!

So drunk with hope of power, we loose
Our ships that sail the upper air,
And floating do ye put to use
These engines dire on all that's fair;
Ach, Men of Mein, don't let's forget,
Gott's mit us yet, Gott's mit us yet!

You simple folk we do not spare
From submarine and seeking 'scope;
We slyly thrust them unaware,
For worldly gain through shell and shot,
And turning leave them without hope
Shed favor on thy people, Gott!
—Observe, in Montreal Star.

PILES.

You will find relief in Zam-Buk! It eases the burning, stinging pain, stops bleeding and brings ease. Perseverance, with Zam-Buk, means cure. Why not prove this? *All Druggists and Stores.—50c box.*

Zam-Buk

MONEY STONES OF YAP.

Natives of the Island Do Not Carry Change in Their Pockets.

Propped up against the house of the native chief of Yap, which is one of the Caroline island lying southeast of the Philippines, may be seen a row of "money stones," the current coin of the island. In shape these stones are like millstones, but they do no grinding. They serve simply as a parade of the wealth of the village. Their value lies solely in the difficulty with which they are obtained.

The yellowish granite of which they are made is found only in the island of Palao, 200 miles away, and when the monsoon favors forty or fifty natives voyage there in their canoes. After pacifying the king of Palao with presents the works of hewing the walaba, or money stones, begins, lasting for months until the monsoon changes when the toilers start homeward with their "coin."

The smallest of these stones is about a foot in diameter and three inches thick, with a round hole through its centre. It will buy food for a family for a month. The large stones, about three feet in diameter and eight inches thick, have relatively much greater value, since it is more difficult to transport them in cranky canoes over such a long stretch of sea. Indemnities can be paid with such a stone or the aid of neutrals purchased in time of war.—William L. Cathcart in St. Nicholas.

COMPLETE EVIDENCE.

(Argonaut)

Over in the college city of Berkeley one evening Perkins looked over the fence and said to his neighbor: "What are you burying there?"

"I'm just replanting some of my seeds, that's all," was the response.

"Seeds!" exclaimed Perkins, indignantly. "It looks more like one of my hens."

"That's all right," came from the man. "The seeds are inside."

FROM THE ORIENT TO YOUR TABLE

SEALED PACKETS ONLY. BLACK, MIXED OR GREEN. B183

Who Got the Baby?

Once upon a time a crocodile stole a baby and was about to make a dinner of it. The frantic mother begged so piteously for the child that the crocodile said:

"Tell me one truth and you shall have your baby again."

The mother replied, "You will not give him back to me."

"Then," said the crocodile, "by our agreement I shall keep him, for if you have told the truth I am not going to give him back, and if it is a lie I have also won."

But the mother said, "If I told you the truth you are bound by your promise, and if it is not the truth it will not be a lie until you have given me my child."

Who got the baby?

WORTH-WHILE CITIZENSHIP.

(London Advertiser)

In the midst of the most immense and terrible war the world has known, the British Government takes time to make arrangements for rescue expeditions to save twelve men from Elephant Island and a number stranded on a barrier in the Ross Sea.

This is what British citizenship means.

"Nerviline" Cures Cramps Ends Misery Instantly

NO REMEDY SO SPEEDY OR EFFICIENT.

A real cramp cure?

Yes, a real one—in a twinkling the cramp is a dead one, and the last squirm is over, once you get a stiff dose of Nerviline on the inside.

This isn't mere talk—it's a solid, truthful fact. No other remedy—not a single one—will cure cramps so quickly and harmlessly as Nerviline. It hits the spot in a jiffy and saves a heap of misery.

"Last Saturday night my stomach felt like an infernal machine," writes T. P. Granger from Hartford. "I was awakened from a sound sleep and found myself suffering the worst kind of torture. I was so doubled up I could hardly cross my room. I had used Nerviline before for the same thing and took a real good dose. Once I felt the warm, soothing sensation of Nerviline in my stomach I knew I was all right. It finished the cramps —just one single dose."

Sickness at night is rendered a nightmare of the past if Nerviline is handy. It may be earache, toothache or cramps. Nerviline in every case will cure at once and save calling the doctor. Nerviline is a family physician in itself. The large 50c family size bottle, of course, is most economical. Small trial size costs a quarter. All dealers sell Nerviline.

POVERTY IN EGYPT.

It Often Drives Parents to Sell Their Children as Slaves.

In the whole land of Egypt there are now only two cities, Alexandria and Cairo. Yet once Egypt was the grandest country of the world, having as many as 200 cities, but these have been all long swept away or covered with the sand of the desert.

In these two cities, Alexandria and Cairo, all the principal people of Egypt reside, while in the country districts up the Nile there are no towns and hardly any villages, but only scattered settlements of peasants, who are called fellahs or fellahin.

These fellahs, though of the same Arab race and religion as the people of Cairo, are very different in most other ways. Instead of the turban, the flowing robe and the gay slippers, which the men of the city wear, we see only a half clad figure with matted hair and skin blackened by the sun; instead of the veiled lady in a robe of silk, here is a poor woman with naked feet in a dress made of grass. One thing, however, both use in common—a bracelet.

The fellahs of upper Egypt are very numerous, but they are all very poor. Their houses are mud huts, used only to sleep in, as they are in the open air most of the day. Their food consists chiefly of vegetables, which they eat uncooked, such as maize, melons, gourds, beans, lentils and dates; those that have a cow can get milk, and all can get fish. Meat they seldom taste, and their bread is only a half baked paste of bruised maize or millet. Rice is too dear for them. One luxury, however, all the men—and women, too—manage to get whatever else they go without—that is, the ever present long wooden tobacco pipe, smoking.

The poverty of many fellahs is so great that a family of children is often a great burden to the parents. Many cases yearly occur of parents selling their children as slaves to escape from the expense of their support.

A parent will sometimes make a long journey to Cairo to get rid of his young children. Some time ago a woman brought to a rich lady of that city an infant, which she said she found at the door of the mosque. The lady said she would take the child and adopt it and handed the woman a small sum as a reward for her trouble in bringing the child. The woman refused the offer, blushed and withdrew. She was the child's own mother.

All Are on Time at Sydney.

At Sydney, Australia, any telephone subscriber can obtain correct standard time by calling up the Sydney observatory, says the Scientific American. If he wishes merely to check his watch or clock he asks for "Time," and is connected with an operator who reads off the correct time to the nearest half minute from a clock controlled by the standard clock of the observatory. If more accurate information be required he asks for "Exact Time" and is connected with a high frequency buzzer, which transmits the actual beats of the observatory clock.

JUST IN TIME.

(New York Evening Times)

Blinker—I woke up last night with the feeling that my new gold watch was gone. The impression was so strong that I got up to look.

Jinker—Well, was it gone?

Blinker—No, but it was going.

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength, and happiness by this method. Write to-day. Address: Mrs. M. Summers, Box 8, Windsor, Ont.

INSECT METAL BORERS.

Wasps With the Ability to Eat Their Way Through Steel Plates.

The voracious and destructive habits of the white ants of the tropics are widely known. Metal is almost the only substance that they are unable to destroy. There is an insect, however—and it is not necessary to go to the tropics to find it—that can bore through metal as easily as the white ant can bore through wood.

Any one can hear this insect buzzing in the pine woods in midsummer or perhaps see the flash of its yellow wings. Sirex gigas is its formidable scientific name, but we know it simply as the horn-tailed wasp. This wasp bores into the tree in various places with its long tail and in each hole leaves an egg.

The ensuing larvae, a white, six-legged grub, fitted with powerful jaws, takes up the work of boring into the wood, and as it advances closes the passage behind it with sawdust. If uninterrupted the larvae continues boring deeper and deeper into the tree, and since it is, of course, growing all the time, it makes a larger and larger passage.

After about two years it makes its cocoon of silk in the burrow. Then, after the pupil skin is cast off, the winged insect breaks through its cocoon. Immediately, with feverish haste, it begins boring toward liberty. Finally it reaches the bark of the tree and then the open air.

It is often the case that during the larval period the tree in which the horn-tailed wasp is burrowing may be felled, sawed into planks and used in building operations. Sometimes for some particular purpose the timber may be incased in a metal sheathing. That does not disturb the wasp at all. When its time comes it applies itself with energy to its task and soon bores a hole through which it can escape.

Holes made by these insects have been found in tin roofs, and in the mint at Vienna was a safe the half inch steel plates of which the wasps had perforated. Some extraordinary cases of their activity were brought to the notice of the Academy of Sciences in Paris.

A barrel of cartridges that had been stored away for some time showed the ravages of the wasps in their search for light and freedom. The insects had not only eaten their way through the wooden barrel, but through the cartridges and leaden bullets as well.

Other boxes of cartridges, dating from the Crimean war, were shown completely riddled by wasp borings, an excellent illustration of the tremendous strength and the determination to accomplish their purpose that these fragile insects possess.

Muggins—Say what you will of Skinnum, he always does his best.
Buggins—Yes, even his best friend.

Same Old Story From Cape Breton

DODD'S KIDNEY PILLS CURED WHEN DOCTORS FAILED.

Mr. M. A. Morrison Suffered from Kidney Disease for Five Years—Dodd's Kidney Pills Cured Him.

Tarbot, Victoria Co., C. B., June 12. —(Special.)—Cured of kidney trouble of five years' standing and of which three doctors failed to cure him, Mr. M. A. Morrison, a well-known resident of this place, has no hesitation in stating that he owes his health to Dodd's Kidney Pills.

"I was so weak I could not walk a quarter of a mile, and to-day I am able to attend to my work as well as I was twenty years ago," Mr. Morrison says. "For five years I suffered from Kidney Disease. I was treated by three skilful doctors, but got no benefit.

"Then a friend advised me to use Dodd's Kidney Pills. I went to the druggist and got five boxes. Before I had used four boxes I was completely cured.

"I advise anyone suffering from kidney disease to use Dodd's Kidney Pills. Anyone who wants to know more about my cure has only to write to me and I will tell them all about it."

Dodd's Kidney Pills are no experiment. They have been curing kidney disease in all parts of Canada for a quarter of a century. Ask your neighbors about them.

OTHER PAPERS VIEWS

PATRIOTISM.

(Ottawa Citizen)

If Samuel Johnson were alive now he would feel constrained to elaborate one of his famous sayings and declare that patriotism was the final refuge of politicians, munitions middlemen, lawyers and some partisan newspapers.

TOO ONE-SIDED.

(Windsor Record)

This practice among certain Canadian newspapers of misrepresenting the political attitude of contemporaries is not at all creditable.—London Free Press.

There would be no chance to make a mistake in the case of the F. P.

A POOR PROPHET.

(Philadelphia Record)

Berlin is reported as triumphantly predicting that "the Anglo-French expedition at Saloniki will be thrown into th Aegean Sea." Simultaneously, we suppose, with the capture of Verdun, th destruction of the Suez Canal and t running of through trains between Ber and Bagdad.

THIS SHOULD HOLD SAM.

(Ottawa Citizen)

Sir Sam Hughes quite rightly says that if he were conducting the war it would be run differently—but the puzzle is why he should boast of it.

THE FIRST OFFENDER.

(Chicago Tribune)

The young man who goes to jail for a peccadillo often returns for a crime. The people who put him in jail the first time are responsible for both crime and criminal.

HARDLY LIKELY.

(London Advertiser)

Was there by any chance, a contract awarded in which Col. Allison was not "interested?"

HUMAN NATURE.

(Buffalo Courier)

In war or in peace human nature is much the same the world over. Those who have plenty of money and refuse to spend it in self-indulgence in some form are the exceptions.

THOSE AWFUL BERLIN NAMES.

(Toronto Star)

The committee that selected the six possible names for Berlin, Ont., must have been trying to avoid picking one that would prove acceptable.

SEEING THE LIGHT.

(St. Thomas Journal)

The new Conservative minister of public works in New Brunswick was defeated by a Liberal candidate. Slowly but surely, the whole country is seeing the light. Will there be a Tory left after all the elections are held?

AGRICULTURAL ITEM.

(Brantford Courier)

The Teuton crop in German East Africa is suffering from Smuts.

ALLISON'S BUSINESS.

(Guelph Mercury)

Let's see, we'll put Col. Allison down as a commission merchant.

RECKONING WITH UNCLE SAM.

(London Advertiser)

Despatch from Washington says: "The United States must be reckoned with in the settlement of the great European war." This probably means some financial debts must be paid.

A POOR BEST.

(Woodstock Sentinel-Review)

It costs ten dollars a year in postage to send a daily paper from a Canadian town to a boy in the trenches. Is that the best the Canadian post office department can do?

A LOST OPPORTUNITY.

(Montreal Mail)

That big deal in which Canada sold another icebreaker to Russia must make Colonel J. Wesley Allison's mouth water.

ASK GERMANY.

(Buffalo Courier)

Why do not the warring powers break the monotony by having a battle between big battleships?

FATAL JOY RIDES.

(Pittsburg Gazette-Times)

The automobile may be deadly in war and fatal in peace, but it is in pleasure that it reaches the real zenith of mortuary malignity.

COLOSSAL NERVE.

(Goderich Signal)

Newspapers which accept the presence of Quebec Nationalists in the Borden Cabinet have colossal nerve to accuse Sir Wilfrid Laurier of consorting with the Nationalists.

SHOULD MARK OUR HEROES.

(Toronto Star)

Canadian soldiers who are back from the front after doing their part and being honorably discharged ought to be furnished with some readily distinguishable mark of their status at this time. Each officer and man ought to be wearing something better than a button—a neat armlet or something like that.

"PEACE" ATMOSPHERE.

(New York Sun)

In the dealings of nations with one another arbitrary force must be rejected and we must move forward to the thought of the modern world of which peace is the very atmosphere.—President Wilson.

In a large part of the "modern world" poison gas, released by modern man to overcome their enemies, constitutes the atmosphere and peace wears a strange garment.

NOT ALARMED OVER CROPS.

(Belleville Ontario)

Our worst troubles are those that never happen. Last year the rains that ushered in and monopolized the month of June threatened dire destruction to the ripening crops. But none the less Ontario harvested last year what was by far the greatest grain crop in her history.

History may repeat itself in a similar manner this year. In any event we would far rather take our chances in a year that was excessively wet than in one that was excessively dry.

A PLAN FOR CANADA.

(London Advertiser)

A great war board, lifted beyond the touch of partizanship, is required to fulfil the promises made by Canada. Recruiting, business mobilization, fresh trade opportunities, munitions and other war contracting, production, returned soldiers, transportation, ship-building and greater than all, the future of Canada, demand the giants of the country. There is not a city in Canada which has not some outstanding figure who could give his country service beyond price at the present time. Call them to arms, Sir Robert!

BITS OF WIT.

EXTREMES MEETING

(Baltimore American)

"That was a remarkable idea of contrasts the animal painter had in his latest sea picture."

"What was it?"

"He painted a laughing hyena standing under a weeping willow."

NO REFERENCES.

(Judge)

Willis—The new cook is a jewel, dear.

Mrs. Willis—Yes, but I'm afraid I must discharge her.

Willis—What's the matter?

Mrs. Willis—I'm suspicious of her. I went to the library this afternoon and found her in the reference-room and couldn't find any of hers.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

MILDMAY

Mr. Emerson Berry who is well-known here having made his home in Mildmay for many years is now a fullfledged dentist having graduated from the Ontario College of Dental Surgeons in March. Mr. Berry is a Sergeant in the North Bay Batt. and is dentist for the Batt.

Mr. Edward Diebel visited Neustadt on Sunday.

A splendid Young Peoples Alliance Rally was held in the Mildmay Evangelical church on Sunday evening. The attendance was good. The proceeds were in aid of the Upper Canada Missionary Society.

Pte George Helwig who is taking a Lieut's. course in London, visited at his home over Sunday.

Mr. and Mrs. J. R. Wendt of Wroxeter spent Sunday at Mr. C. Wendt's.

A meeting of Carrick men and women is to be held in the Town Hall next Monday night to elect a vice-president of the Bruce Preparedness League and to organize the carrying on of the work in Carrick.

Mr. John W. Hecker of the 12th con. had the misfortune to suffer a a fracture of his arm last week.

The Ministerial meeting and Sunday School Convention held in the Evangelical church was well attended. The meetings were interesting and splendid helpful addresses bearing on Sunday School work, teacher training, etc., were given. The Hanover District comprises the following fields: Chesley, Elmwood, Listowel, Mildmay, Normanby, Walkerton, Port Elgin and Wallace.

Mr. and Mrs. Wm. Helwig and Pte. George Helwig motored to Walkerton on Sunday.

Mr. and Mrs. J. H. Schnurr spent Sunday in the County town.

Several of the pupils of the Continuation School are writing their exams in Walkerton commencing on Tuesday.

FORMOSA

Mr. Will Folmer of Chepstowe was here on business last Saturday.

Ted Dendinger who was on the sick list is able to be around again.

Joseph Graf of Berlin formerly of our town is at present visiting here. His furrier business is dull now.

Rain and rain was all the go the last few weeks.

Mr. and Mrs. Ambrose Zettel, Mrs. Joseph Hauck, and Mrs. Jacob Brick went to Detroit last Thursday and intend to visit other towns in Michigan.

This is a poor year for fishing. The water is too high.

Heitz and Fiedemont brewers here, are fixing up their houses, painting, papering and other improvements.

The automobiles got stuck in the mud during the recent heavy rain.

Herman Doerr has sold his house to Tony Opperman and moved to Hanover with his family.

Mr. and Mrs. Dendinger were in Mildmay on business last Thursday.

The beef rings have started again.

Mr. and Mrs. Martin Meyer of Mildmay visited their relatives here last Sunday.

Mr. Charles Hutton, Culross Township Clerk, was here on business on Monday.

Joseph Benewein of Belmore was here last Sunday.

KINLOSS

Mr. Wesley Lemon delivered his black horse to town last week.

Mr. Earl McDonald made a business trip to Wingham last week.

Mr. and Mrs. Eldon Bell and family and Mr. Howard Chrispin of Hanover spent Sunday at the former's home here.

The Red Cross Society had a very successful meeting Saturday, afternoon and evening.

Pte. Bill Portice of the 160th was home over Sunday. We are pleased to know that his brother Richard Portice of the 160th also is on the mend.

Mr. James Brownscombe of Owen Sound called on old friends Friday last.

We have reason to be proud of our Silver Lake. Two gentlemen came up from Lucknow the other day to fish.

Mr. John Portice purchased a fine pair of pigs last week. He says the price of hogs is terrible.

Don't forget Church next Sunday evening.

SOLWAY

Mr. and Mrs. Jno. Strceder spent Sunday at the home of the latter's parents Mr. and Mrs. Fischer of Carlsruhe.

A quiet wedding took place on Saturday at the home of Mr. and Mrs. D. Thompson when their daughter Selina was united in marriage to Mr. Alex. McIntyre. They will reside on the groom's farm on the 9th con.

Miss Margaret Quirk spent the week end in Walkerton.

Mr. Tony Kober is on a business trip to Berlin and vicinity.

Mr. Peter McGarrity has purchased a new rubber-tire buggy.

The marriage took place on Wednesday at the home of the bride's parents, Mr. and Mrs. Geo. Hossfeld of their daughter Annie to Mr. Henry Hamel of Bentinck.

Miss Marjorie Weir spent Sunday with friends in Walkerton.

Mr. and Mrs. Dave O'Connor from Elderslie spent the week-end with Mr. E. O'Connor and friends in Walkerton.

PINKERTON

Miss Coulter of Walkerton spent a few days at Mr. A. Pinkerton's.

Miss Verna Donnelly and Mr. Gordon Pinkerton returned from Stratford last week having completed their course there.

Owing to the disagreeable night only a small crowd attended the Patriotic dance in the Hall here on Friday evening, but what lacked in numbers it made up in good looks. An enjoyable time was spent by all present.

Miss Sylvia Reid of Harriston spent Sunday at her home here.

Rev. Mr. Crozier of Guelph occupied the Presbyterian Pulpit here on Sunday and delivered two excellent discourses.

The Canadian Order of Foresters will hold their annual parade to the Anglican Church here on Sunday afternoon, June 25th at 2.30 o'clock. Members from outside lodges are invited to join the parade.

Senator Donnelly is building a garage for his new Overland car.

We understand Mr. William Taylor has secured a new Overland, Mr Geo. Gilchrist making the sale.

Mrs. A. Kennedy and children of Brandon, Man. are visiting at the home of her parents, Mr. and Mrs. Adam Knox.

Mrs. Capt. J. A. Reid returned from Blenheim this week.

A wire to the effect that Capt. J. A. Reid had been wounded on June 2nd. was received last week by his father Mr. Adam Reid. Capt. Reid had been in Belgium about four weeks when he was wounded.

GREENOCK

Miss Mary Pinkerton returned to Toronto on Monday after spending two weeks at her home here.

Messrs. Fred and Alex. Kraemer and Jake Koller are busy this week shingling Mr. Linus Bruder's barn.

We are pleased to report that Mr David Pinkerton is recovering and will be able to be out again.

HANOVER

Sergt.-Major Wm. Butler was given a hearty welcome back from the Front by the people of Hanover. The Town Council, Town Band, members of I. O. O. F. and crowd of citizens met him at the station and gave him a public reception at the Town Hall. "Billy" was "buried" several times by shell explosion, and was once wounded by shrapnel on the hand. But, like many other heroes of this great war, he received a blow on Dec. 12th, 1915, at 7 o'clock p. m., that ended his remarkable career at the Front. After spending four months in hospitals in France and England, he sailed for Canada on April 4th, on the Scandenavian, landing at St. Johns on April 13th, 1916. He is now undergoing treatment at Brantford and Toronto and expects to receive his permanent discharge some time in July.

Pte. Adair of Hanover is home from Niagara suffering from a shock as a result of the recent severe storm.

Lance Corp. Fraser Miller, son of Mr. H. H. Miller ex-M. P. was in the hospital a short time recently suffering from touch of fever.

Lieut. Harold C. Young is among the missing Canadian officers in the big fighting last week. Lieut. Young was in charge of a machine gun section. He went overseas with a draft of the 76th.

Mr. J. S. Wilson received a telegram from Ottawa last week stating that his son Pte. Selkirk Wilson was slightly wounded in the leg.

Two freight cars on the cement company's siding "ran away" last Saturday afternoon, and ran into the circus advertising car standing on the siding of the G. T. R. One of the freight cars jumped the track, and the circus car was somewhat damaged by the car. A number of little children were down seeing the circus car when the accident occurred, and had the circus car gone over on its side—as it seemed it would—there would have been a number killed.

A familiar figure on the streets of Hanover for over 25 years was removed by death when Mr. Philip Belstein passed away as the result of an accident on the 21st. inst. He was in the store of his son-in-law Mr. Louis Klemmer, and fell down an open trap door in the rear of the Klemmer store, a distance of about six feet, striking his head, inflicting a nasty gash, and fracturing his skull. The overflow of a pipe had made it necessary to open the trap door. He was unconscious when picked up, and never spoke again, passing away at midnight. He was 79 years and 7 months of age.

OTTER CREEK

Miss Susie and Jennie Ball were visiting at Mr. Theodore Lotus's on Tuesday.

Mr. and Mrs. Rev. J. Burn of Mildmay were visiting on the fourteenth on Tuesday.

Mr. and Mrs. Emerson Schomacher were visitors at Mr. Phillip Gress's on Sunday.

Miss Lulu Pfohl returned home from London last week.

Quite a number from here attended the Sunday School Convention of the Evangelical association which was held in Mildmay, everybody reported an enjoyable time and the convention was the most successful in years.

Misses Lillie Gress and Alma Damm of Hanover were visiting at Mr. Philip Gress's.

CARGILL

Mr. and Mrs. Wesley Brownscombe left on Friday for Sarnia where he has secured a lucrative position with Imperial Oil Co.

Mr. Ed. Hardeker formerly of here but now of Flint Mich. spent the week end with his daughter, Mrs. Geo. Schramm.

Mr. Jos. J. Schmidt west of the village had a very successful barn raising on Wednesday.

Mr. Jno. Murray of Bermington spent a few days with his sister Mrs. Napper.

Mr. M. H. Ziegler went to Toronto on Friday and returned on Saturday with a Reo. Roadster for Dr. Bricker.

Mrs. H. W. Brownscombe and Miss Clara Grainger are visiting in Owen Sound this week.

Rev. J. Lionel Homer is attending the Synod in London this week and Rev. Dr. Sage of London will occupy the pulpit here on Sunday.

Dr. J. G. Bricker spent a few days in Toronto last week attending the Medical Association.

Mr. John Purvis, the well known auctioneer of Holyrood, was a caller in our village on Thursday on his way to John Stewart's sale, which was largely attended and good prices realized.

Promoted to Wiarton

Mr. E. Taylor, a recent employee of the G.T.R. at Palmerston, has been promoted to a higher position at Wiarton. Mr. Taylor possesses a well trained tenor voice and Knox church of Palmerston regrets his removal from its choir.

The above refers to one of our former citizens, whom we are pleased to hear is climbing the ladder of success.

Mr. and Mrs. Jas. A. Garland and Mr. and Mrs. Alf. Garland attended the Cruickshank-Mutrie reception on Thursday evening.

Miss Mary O'Connell left Monday on a two weeks' visit with friends in Guelph and Brantford.

Miss Estella Keys, of Toronto, is spending her holidays under the parental roof.

GLAMIS

Preparatory Service in St. Pauls Church on Friday evening was conducted by Rev. Mr. Robinson of Tiverton.

Mr McConley is spending this week at his home in Tara, owing to the serious illness of his mother.

Teddy Chapman who enlisted with the 160th Batt. five months ago has been dismissed from same owing to defective eyesight and Teddy has again resumed work on the farm and will "do his bit" there.

Mrs. (Rev.) P. Reith was called to Toronto on Monday to attend the funeral of her youngest brother, Mr. Javons, who passed away on Sunday. Her many friends extend to her sincerest sympathy.

Mrs. McDermid received a telegram from Ottawa on Saturday informing her that her son Pte. D. McDermid, No. 117977 has been wounded on June 1st. Gun shot wounds in wrist and scalp. He was admitted to No. 3, General Hospital, Belgium. No further particulars have been received. His many friends here hope to hear of his speedy recovery.

A number from here attended Anniversary Services in Tiverton Baptist Church on Sunday.

Mr. Norman McLeod, and Miss Isabel Downey, both 2nd con. Bruce were united in marriage at Niagara Falls last week. Their many friends here join in wishing them much joy and happiness.

Nurse McCreath of Kincardine who has been in attendance with Mr. McFarlane for several weeks returned to her home on Saturday. Miss McBeth of Paisley is now in attendance. We regret Mr. McFarlane is not gaining much strength.

Misses Mary Webb and Nettie Gunn of Stratford Normal School are home for their summer vacation.

Miss Daisy Cronin spent a couple of days in Walkerton last week with her brother, Lieut. Cronin.

Mr. and Mrs. Agar of North Bruce visited at Mr. John Wrightson's last week.

Miss Jennie McKeeman has returned home from Toronto.

Miss Kathleen McLeod returned to Detroit, Mich., this week.

Mrs. (Rev.) Dr. Miller has been in attendance at Camp Meetings at Port Rowan for the past week, also renewing acquaintances near Hamilton.

The Ladies Missionary Society of St. Pauls Church met at the home of Mr. Alex. McKennett on Wednesday afternoon.

ART TAGGART TURNS UP

A Shell Buried Him and He Woke Up to Find Himself in Dr. J. J. Fraser's Hospital.

Art Taggart is in no. 2 Field Hospital "somewhere in Belgium" under the care of Major J. J. Fraser of Walkerton and although suffering from shell-shock does not expect to be laid up for any great length of time. This news came in a letter on Tuesday from Art himself and relieved to a large degree the anxiety under which his parents and friends have been labouring ever since the despatch came last Wednesday announcing that Art was "missing." A second telegram from Ottawa received on Saturday stated that he was suffering from shell-shock in a hospital, name not stated. The letter from Art arrived on Tuesday and it certainly made good time being in his parents' hands two weeks after he was missing on the battlefield.

Art says the battle was simply indescribable. Eight men along side of him were struck and killed by a single shell. He himself was buried by a shell and the next thing he remembers was waking up in the hospital. This was Art's second dose of shell-shock within a month and he expects that he may be sent to the firing line again in a short time. It was a strange coincidence that he should drop into Dr. Fraser's hospital. His parents were naturally relieved to hear of this good fortune, as the good Doctor will no doubt see that he gets the best possible care.

THE FIGHT ON JUNE 3rd

Victor Bell, who was Wounded in the Big Battle, Writes from English Hospital

Writing from Dartmouth Hospital England, where he is nursing a wounded arm, received on June 3rd, while serving with the Royal Canadian Regiment, Victor Bell says:—

Dear May:—

Just a line to let you know I arrived in England alright. Had a dandy trip across. We are just 11 miles out of London in huts made especially for us. Oh, I tell you it is certainly a relief to get away from the sound of the shelling for a while. They shelled us for ten hours steady. The shells were falling around us like rain. Then they made an attack and we drove them back. They came up again, and just as we got them back for the third time a piece of shell caught me on the right arm and I had to get back to the dressing station. I heard afterward that they blew us up and that there is not one of the company left but what is wounded. Most were killed, so you see I was fortunate in getting hit when I did. I was wounded Saturday, June 3rd. The nurses are certainly nice and use us well in every way, at least in every hospital I have been in, we could not have been treated better and I have been in six different hospitals and dressing stations before we landed here. We never had to walk more than the length of a house as there was always a motor or train waiting to take you. I was buried twice in the trench but wasn't hurt either time. I guess I will close now and drop a line to Mother. This address will find me: Dartford War Hospital, Ward 14, Dartford, Kent, Eng. Love to Emma, Henry and yourself.

Victor.

Dartmouth Hospital,
June 6, 1916.

Former Pastor Killed.

Rev. Charles E. Stafford, a former pastor of Walkerton Methodist church, was fatally injured in a railway accident near Elora on Monday night. Mr. Stafford was a passenger on the C. P. R. mixed train which left the track owing to a broken rail, the passenger coach being rolled down a ten-foot embankment. Four other passengers were also hurt, but not seriously. Mr. Stafford passed away at his home in Elora on Tuesday.

DIED FOR HIS COUNTRY

DANIEL P. McGARRITY

"Killed in Action" was the sad news of their son Dan that came to Mr. and Mrs. Patrick McGarrity of Brant on Wednesday last. He fell in the great battle of the Ypres Salient, between June 2nd and 6th, being numbered among the gallant Canadians who made the supreme sacrifice for their Country, bringing lasting honor to themselves and to all Canada. Dan was born at Fairbanks Farm, in Brant, and was in his twenty-first year. He was a graduate of the De La Salle Institute, Toronto. When he heard the call to arms this young Canadian of true-hearted Irish ancestry, responded quickly. He was in Calgary at the time, where he had been living for a year and a half, and enlisted with the Twelve Mounted Rifles. He had been in the trenches four months before the big battle. Just a day before the telegram came, his mother received a letter from Dan, thanking her for the welcome gift of socks and stating that he would write her again before returning to the trenches. An impressive memorial service was conducted at Walkerton R. C. Church on Saturday morning by Rev. Father Cummings at which there was a very large attendance of relatives and friends from the town and countryside.

Going To London

Joe Ming, who has conducted a laundry here the past six years is leaving Walkerton the first of July to manage a large Chinese Restaurant for his cousin at London. His many friends here will miss the genial Joe and wish him success. The laundry business here will be conducted by his cousin, Mr. E. Sing.

+ + +

Sinclair—Rogers

The marriage took place at Hamilton on Monday, June 19th, of Miss Mina M. Rogers, daughter of Mrs. Margaret Rogers, 9 Spruceside Ave, Hamilton to Dr. Herbert H. Sinclair of Walkerton. On their return from a ten days' wedding tour, Dr. and Mrs. Sinclair will reside in the house recently leased from Mrs. McKillop, on Jackson St.

+ + +

Motorist's Ill-luck

When Nelson Rivers, liveryman, of Teeswater, left for Walkerton Monday morning with a car full of soldiers, he was driving a pretty good car. When he arrived home later in the day the machine, according to report, was ready for the scrapheap. The first mishap occurred on the Durham Road when he collided with a car driven by his own brother. The windshield and lamps were badly smashed as a result of the encounter. On the return journey while turning onto the Teeswater Road a wheel came off causing the car to go over into the ditch at a good clip and badly smashing the machine. Mr. Rivers fortunately escaped without injury.

News About Town

Girls wanted for Hosiery Factory S. A. Rife & Co.

Miss Roland of Toronto is visiting the Misses Clarke.

Mrs. Millard Stauffer is returning to Toronto on Friday.

Mrs. Chas. Shaw has been spending a week with friends in town.

Miss Ryan of Bracebridge has been visiting Mrs. Rev. G. C. Rock.

Pork Sausage, Bologna, and Special Roll at the Central Grocery, Phone 161.

Mr. R. H. McCrum returned on Thursday from a ten days' visit to Galt.

Mr. Arthur Lee of Tara spent Sunday with his brother, Mr. Richard Lee.

Fifty soldiers of the 160th Batt. were left behind in Walkerton on sick leave, mostly measle cases.

Mrs. James Tolton is spending a couple of weeks in Toronto with her daughter, Mrs. D. C. Wilson.

Dan McDonald and Fred Young of Kingarf were here on Wednesday seeing off the boys of the 160th.

Mr. Wm. Adamson returned this week from near Clifford where he has been putting in a tile-making plant.

Fresh Fruits arriving daily Bananas, Pineapples, Strawberries, Oranges, and lemons Central Grocery, W. G. Searle.

Pte. Joe Rennie was presented with a fountain pen before leaving for London by Mr. Norman Robertson on behalf of the Knox Church Sunday School.

The Soldiers enjoyed a treat on Friday provided by the ladies of Cargill. The ladies sent down seventy-five cakes which went the way of all good things.

Prin. Morgan received from the Education Department on Saturday a cheque for $100 in favour of Miss Helen S. Haskley, winner of the first Carter Scholarship for Bruce County.

Mrs. A. O'Neill of Hanover, an old lady of eighty years, underwent a serious operation by Dr. Hall on Saturday and is reported to be doing nicely. Mrs. O'Neill is the mother of Dr. O'Neill of Winnipeg, formerly of Paisley.

A rare beauty spot just now is the town cemetery. By dint of close application at all seasons, Supt. R. K. Sutton has got the property into fine shape. "Dick" takes pride in keeping things right and the results are very apparent.

Lieut. McKay of the 160th Batt. took charge of the service at the Baptist church on Sunday morning, preaching a thoughtful sermon on the theme: "God's Plan for Our Lives." Capt. Whitehead sang a very fine solo, "This is My Task."

Bandsmen W. B. Thompson, Capt. Ross Clarke, and Sergt. Thos. Lamb were each presented with fountain pens by their fellow-members of the Knox Church Choir on Friday night. Mr. Thompson was the second oldest member of the Choir.

Miss Robina Clarke was taken very ill on Monday, her condition causing great anxiety. On Tuesday she underwent a very serious operation at the County Hospital by Drs. Groves and Stalker. No change in her condition is expected for a day or two.

Mr. J. H. Wiles, Supt. of the House of Refuge, received word that his brother, Ernest M. Wiles had been wounded in the big battle on June 3rd. Mr. Wiles left a wife and family of three small children to enlist with the 34th. His home is in Preston.

Miss Mae Cryderman B. A. of Durham, Miss Ethel Cryderman, trained nurse of Toronto, spent Sunday with their parents, Mr. and Mrs. C. W. Cryderman. Their brother, Mr. Art Cryderman of the Bank of Commerce Niagara Falls, is home on holidays at present.

The last recruit to sign up with the 160th Batt. was Gordon L. Pinkerton, the only son of Postmaster Albert Pinkerton of Pinkerton. Gordon is well-known here, being a graduate of Walkerton High School. He has just graduated from Stratford Normal and joined the King's colors just as soon as his examinations were over.

An unfortunate accident befell Mrs. Grant of Paisley who was here the past week, attending the W. C. T. U. Convention. She was going through the C. P. R. station, when by mistake she opened the door leading to the cellar way and fell through to the basement. She was very badly bruised about the face and body, and is still confined to bed at the home of Mrs. Stauffer.

The Hon. D. Marshall, Minister of Agriculture, Mr. A. Eddy, Superintendent of the demonstration farm and Mr. Wm. McKinnon, all from Olds, Alberta, autoed from Chesley to Wingham on Saturday afternoon and while in Walkerton called on Mr. and Mrs. D. McKechnie and Mr. and Mrs. J. Ramsbottom. Messrs Marshall and Eddy are purchasing pedigreed Shorthorn Durham cows and Mr. McKinnon, well-bred heavy mares.

Bruce's Own Battalion Is Off to London Camp

Town Closes Up to See Boys Away

Speakers at Formal Farewell Have Nothing but Praise for Conduct and Efficiency of the Battalion—Colonel Weir Acknowledges Support of Bruce People and Promises Wives and Mothers to Look after the Boys.

The 160th Battalion entrained yesterday for London Camp. The town took a half holiday to see them off, and a great throng, their hearts touched at once with pride and sadness saw our stalwart soldier boys, the pride of Bruce, march to the G. T. R. station and start on the initial stage of the journey which may soon land them on the battleground of Europe.

Everything went like clock-work. The baggage cars had been loaded the previous day and practically all the men had to do was to march to the station and board the train. At 8.30 to the tick the battalion left the Armoury grounds followed by scores of autos and a crowd that numbered several thousands. At the station two special trains of twenty-six coaches in all, awaited them and by 9.30 the first train was loaded and away.

The leave-taking began really on Sunday morning, when the battalion drawn up on the Armoury lawn, heard a parting message from clergymen of the town. On Tuesday afternoon again on the same grounds, the soldiers were given an official farewell by the citizens of the town and county. Major John Henderson, chairman of the Military Demonstration Committee, who has been fifty years a soldier, presided, and after a few appropriate words of introduction, in which he lauded the 160th Batt. as the finest body of men he ever knew in his experience, read the address of appreciation published below, while Mr. K. N. Taylor, on behalf of the Twenty-Fourth Celebration Committee handed Lt-Col. Weir a cheque for $1400. to provide mess-tents and a recreation tent for the Battalion. In replying Col. Weir expressed the grateful appreciation of himself, officers non-coms, and men of the 160th for assistance and many kindnesses shown them by the Twenty-Fourth committee, the War Auxiliary, Daughters of the Empire, the Town Churches, Ministers, individual citizens and all who helped. He believed he was taking away the finest body of men that would leave Canada, and expressed to the wives, and mothers, a keen sense of responsibility for the physical and moral well-being of the men. Mr. John Rowland presented to the two bands a purse of $210 which he had collected during the afternoon. A number of brief but excellent speeches were made by leading citizens for which space will permit only the publication of the speakers' names. These included Rev. Fr. Cummings, Rev. Thos. Wilson, Rev. D. A. Walker B. A., Rev. G. C. Rock; M. A. Halliday, C. J. Mickle, K. C. of Chesley; Reeve Douglas of Tara; W. D. Cargill, M. L. A. of Cargill; J. J. Hunter of Kincardine and others.

MAJOR A. McLEAN MOFFAT

Senior Major of the 160th Batt. who has proved a wizard in organization work.

Women's Institute

The Women's Institute will meet at the home of Miss Jean A. Rowand Walkerton, on Tuesday, June 27th. Miss H. T. Job of *Freeman* will speak to the women on an interesting subject.

LIEUT.-COL. A. WEIR

The popular Commanding Officer of Bruce's Own Battalion, the 160th.

Near Fire At Saddlery

When the fire alarm announced a blaze at the old Canada Saddlery factory on Saturday afternoon, some of the shareholders felt that Providence was intervening to get them a bit of insurance money. Dense smoke issued from the north end of the building but it proved after all a small affair which gave the Fire Brigade very little difficulty. It was discovered that the clouds of smoke were caused by some carbide which was stored in the building becoming wet from a leaky roof.

Military Sports Day

The Military Sports held on Saturday provided a good afternoon's entertainment for the large crowd that attended, as well as for those taking part in the games, and netted the tidy sum of $133.50 for the Battalion funds. The Walkerton Boys of "A" Co. won the tug of war, and also first place in the baseball match. Hanover brought a fairly good lacrosse team but they were no match for the 160th line-up which had some real players. In the 100 yds. race, Wes. Russell took first, H. Walker, D Co., 2nd; D. Cameron, D Co., 3rd. The mile event was cancelled owing to rain. The Committee wishes to thank very heartily all those merchants who contributed towards the prizes.

Car Turned Turtle.

While driving to Port Elgin on Thursday evening to attend a Masonic gathering, four Walkertonians had an exciting experience. They were nine miles this side of Port Elgin and were going at a pretty good clip, when the car, which was driven by Mr. Alex. George, suddenly turned turtle in the middle of the road. The whole party landed underneath the car, and how they managed to escape is a mystery. Rev. D. A. Walker was somewhat bruised, but the other occupants, Alex George, John Douglas and Peter Bremner, came through without a scratch. The top was badly smashed, but otherwise the car was not damaged. The sudden jamming on of the brake is what caused the accident.

Pardy-Woodman

A pretty wedding took place at High Noon yesterday at the home of Mr. and Mrs. Matthew G. Woodman when their only daughter, Miss Winona was united in marriage to Mr. G. Russel Pardy, C. P. R. engineer of Smith's Falls, a former popular Walkertonian. The ceremony was performed by Rev. D. A. Walker, B. A., in the presence of a small company of immediate relatives and friends. The bride who looked pretty in white duchess satin and a bridal veil of white tulle caught with orange blossoms, was given away by her father. Miss Wilson of Drayton, cousin of the bride, played the wedding march. After a dainty luncheon had been served, Mr. and Mrs. Pardy left on the afternoon train for Detroit and other points. On their return they will make their home at Smith's Falls. Both are well-known in Walkerton and have the best wishes of a wide circle of friends here.

BRUCE LEADS!

Bruce County leads all the Counties of Canada in recruiting. This interesting bit of information was brought back from Toronto on Friday by Judge Klein who was in the City attending the Annual Meeting of the National Service League. The Judge was informed by Dr. Abbott, secretary of the League, that Brigadier-General Hodgins had made the statement that Bruce heads all the Counties.

News About Town

Miss Walker is visiting at Hamilton.

Mrs. Arthur Pier on went to Toronto on Monday.

Mr. Hank Irwin is driving a new Studebaker car.

Mrs. George Bruder is visiting relatives at Breslau.

Mrs. J. H. Appel arrived home from Toronto on Friday.

Mr. J. J. Schumacher is in Ottawa on business this week.

Miss Gretchen Roether is visiting Miss Gleason at Corinth.

Mrs. Fahey of Toronto is visiting her mother, Mrs. P. Todd.

Mr. L. C. Benton is on a business trip to New York this week.

Dr. M. Tindale of Drayton renewed acquaintances here this week.

Mr. Elliot Law of Preston has been visiting his aunt, Mrs. John Wolfe.

For Sale, a Gasoline Engine, almost new, a bargain. Write Box A, Telescope. 23-26

Mrs. John Conner of Eden Grove spent Sunday with her sister, Mrs. Scanlan.

Mrs. T. D. Crosbie of Toronto is visiting at Mrs. McConkey's, Spring Hill Farm.

Mrs. David Robertson and Miss Robertson are visiting at Hamilton this week.

Mrs. Wm. Husband (nee Miss Mattie McLennan) has been visiting her aunt, Mrs. A. Swanston.

Miss Doris Graef of Clifford and Miss Gladys Miller of Berlin visited Mrs. F. Eidt on Monday.

For June weddings, order your wedding invitations at the Telescope, latest designs from new type.

Mr. Victor Scanlan of Brantford spent the week-end with his father, Mr. John Scanlan of Brant.

A washout on the G.T.R. near Drayton caused the night train to be over three hours late on Thursday.

Bishop Dowling will visit Walkerton R. C. Church on Sunday. Confirmation service will be held at 10 a. m.

Miss Florence McNeil of the Royal Alexander Hospital Staff is visiting her brothers and sister at Glint's Corner.

Mrs. G. H. Russell of India is visiting at the manse this week and will receive with Mrs. Wilson on Friday afternoon.

Ptes. Chester E. Gowdy of Mildmay and Archibald McNeill of Paisley were in Monday's list of wounded Canadians.

Norman Yaeck was operated on at the County Hospital on Saturday for appendicitis. He is reported to be doing nicely.

Mrs. Robert Hanbidge, Mrs. E. H. Eidt, Mrs. Dr. Philips, and Mrs. George of Port Elgin were visitors at Mrs. Robt. Smith's.

The Annual Garden Party of Eden Grove Methodist Church is being held on Mr. A. Blue's lawn at Eden Grove this (Thursday) evening.

"Let it be a box of Liggett's Chocolates" "Your sweetheart's choice." Sold exclusively by all Rexall Drug Stores.—A. P. Sieveright.

Pte. Thos. Babcock, of Paisley, was among the Canadians who fell in action. He was instantly killed by shrapnel, which struck him in the head.

Mr. E. A. Schnurr, Manager of the Bell Telephone Co., Orangeville, and Mrs. Schnurr, returned home on Monday after spending a couple of weeks' holidays here.

Mr. Tom Sinclair, who passed his final examinations in Medicine at Toronto University, has also passed the Ontario Medical Council and is now a full-pledged M. D.

Mr. Alex. Butchart of Burlington, formerly teacher here, Mr. Ed. Butchart of Edmonton, and their sister, Mrs. Hamley of Calgary, called on old friends in town on Saturday.

The five year old son of Mr. Kunzenhausen, Brant, had his scalp badly cut by falling off a couch against the baseboard on Thursday evening. Several stitches were required to close the gash.

Miss Vera Norrish of the Niagara Falls Collegiate, is spending a few days at her home here before leaving for Toronto to examine papers in connection with the Departmental Examinations.

"A safe, gentle, inexpensive laxative such as "Rexall Orderlies" kept in the home will pay the biggest dividends of any investment ever made." 15c and 25c, exclusively at Rexall Drug Store.—A. P. Sieveright.

A party of local Masons motored to Port Elgin on Thursday night to attend the dedication service of the new Masonic Hall. The party included.—Rev. D. A. Walker, I. P. M.; P. Bremner, W. M.; J. Douglas, P. M.; N. Walford, N. Hiscox, and T. Boss. *Rev.* Mr. Walker acted as Grand Chaplain in connection with the ceremony of dedication.

KILLED IN ACTION

PTE. RAY HYSLOP

The first Walkerton boy, actually living in town at the time of enlistment, to give his life at the battle-front, was Private Ray Hyslop, son of Mr. and Mrs. Thos. Hyslop of this town. The news that Ray had fallen in action on the Ypres Salient between June 2nd. and 5th. came by wire from Ottawa on Saturday morning. Ray was a fine young fellow in his 23rd. year, well thought of in the town, and the news of his death was received with keen regret. Ray went to England with the 34th, last year and was transferred later to the 49th Batt. with which he and other Walkerton boys went to the firing line.

The Hospital Aid.

The Fifteenth Annual Meeting of the Bruce County General Hospital Women's Aid Society was held in the Council Chamber at Walkerton. The Treasurer's Report showed that the total receipts for the year were $455.86, the Walkerton Branch contributing $395.35 of this amount. It is to be regretted that the other municipalities do not take a greater interest in this most necessary work as they all reap considerable benefit from the Hospital. The cost of non-pay patients alone amounted to $3000 last year.

A Day at the Lakeside

July 1st is always Port Elgin's Day. Last year 5,000 people took the opportunity to spend a day at the beautiful park on the lake, to witness the races and other big attractions. This year they offer horsemen purses amounting to $1,000 and already horses in the 2.10 and 2.12 class are entered. Then, too, an opportunity will be given to witness a fireworks display excelled only at Toronto Fair. These with other platform performances, band music, etc promise a day and evening everyone will enjoy. Plan to spend the day at Port Elgin. Entrance fee is low, only 15c and 25c. Good accommodation for all. Special train home. Cheap fares. We want you. Bring the family. Give them a day at the lake and enjoy the fun. 23-24.

+ + +

Flood At Chesley

The Saugeen ran amuck at Chesley on Saturday, following the heavy rain and caused very serious damage. The total losses from the flood are estimated at $35,000. A dozen bridges in the neighbourhood were swept away. In the town a loss of $10,000 was sustained by Mr. M. A. Halliday, when the flood swept away the dam at the Royal Mills, and the flume which supplied the water for operating the electric light system. This plant was put out of commission entirely and Chesley was in darkness for one night. The following day the new hydro plant was turned on. Other losers in the flood are A. Dawson, who had $3,000 worth of logs carried down stream and Krug Bros. who had a dam worth $2,000 wrecked.

The Soldiers' Service

An open air service was held for the protestant members of the 160th Batt. on Sunday morning at 9.30 on the Armoury Lawn. The battalion was drawn up facing the High School grounds, the high terrace serving as a platform for the speakers and the Band. The men stood in line during the service and gave an attentive hearing. Revs. Wilson, Walker, Rock, and Perdue, took part, Rev. Mr. Wilson preaching the sermon which was short, but very earnest and pointed. The reverend gentleman took for his text Acts, 20:32: And now brethren, I commend you to God, and to the Word of his grace, which is able to build you up, and to give you an inheritance among all them which are sanctified. He presented this great truth to the members of the Battalion emphasizing the assurance of victory and security presented in the text. He referred incidentally to the joy that the ministers had had ministering to the soldiers. Speaking for the ministers, the citizens and County of Bruce, he gave this parting message to the soldiers, "We commend you to God."

TEN COMMANDMENTS OF SUMMER DIET.

Thou shalt take every precaution with thy digestion during the heated spell.

Thou shalt not eat three heavy meals per day, when the weather is hot, for much food keeps the body heated.

Thou shalt eat meat but once a day, and only sparingly then.

Thou shalt make up thy summer menu very largely of vegetables and fruits.

Thou shalt be unusually slow and deliberate, chewing thy food carefully, for digestion's sake.

Thou shalt not go out into the hot sun just after a hearty meal, but rest awhile in quiet.

Thou shalt not eat heartily after violent exercise, while thy body is excessively hot.

Thou shalt not continually pour cold water or iced drinks down thy throat, if thou wouldst keep thy [illegible] in condition and [illegible].

Thou shalt avoid as much as possible heat-producing foods during the summer months.

Thou shalt eat very sparingly when traveling by land or water if thou wouldst keep well.

—Harvey Peake, in Philadelphia Record.

Bits About Beasts.

You think you know something about animals, eh? Well, let us put your knowledge to a few simple tests.

Frogs, to begin with. Can they breathe with their mouths shut? Certainly they can. As a matter of fact, they always do. If they kept their mouths open they would suffocate.

Next, hares. When do they close their eyes? Answer, never. You see, they haven't any eyelids, so they can't. But they have a thin membrane, which performs the service of eyelids when they are asleep.

What is the color of a horse's eyebrows? That's a difficult one. Think hard and then learn that a horse hasn't any eyebrows.

You may like to know in addition, that turtles and tortoises have no teeth; that parrots, unlike the majority of birds, can move both mandibles of their beaks, and that fishes never masticate. They simply haven't time between breaths.—London Answers.

Burns and Fame.

It is amusing to learn that Burns when just emerging from obscurity jocularity anticipated that his birthday would come to be noted among other remarkable events. In a letter to his early patron, Gavin Hamilton, in 1786 he says, "For my own affair I am in a fair way of becoming as eminent as Thomas a Kempis or John Bunyan, and you may henceforth expect to see my birthday inscribed among the wonderful events in the Poor Robin and Aberdeen almanacs along with the Black Monday and the battle of Bothwell Bridge."

Sulphur in New Zealand.

Sulphur deposits are found on White Island in the bay of Plenty, on the coast of the North Island of New Zealand, about thirty miles from the mainland. This island, which covers about 600 acres, attains a height of 900 feet on one side and opens to the sea on the other. Its topography indicates an old crater, and the boiling lake on the island, which is one of the awe inspiring sights of New Zealand, is a further evidence of volcanism. After the New Zealand Sulphur company had spent $100,000 in preparation for mining sulphur in this locality a volcanic disturbance wrecked the camp and killed ten men.

WHAT SHALL WE SAY, AMERICA?

What shall we say, America, in the golden years to come,
In the silence of the rifle and the thunder of the drum?
What shall we say, America, when the valiant tale is told
Of the men who valued honor more than they valued gold?

Of the men who left the treasure, threw comfort to the winds,
Went gaily forth to battle for the freedom of their kind?
Of the husbands and the fathers, of the widows' only sons,
Who left the love of women for the thunder of the guns?

What shall we tell our children, when they point across the seas,
And ask, with stern insistence, 'Fathers, what of these?'
When they see your ensign waving, framed in the distant blue,
"Tell us, O father, we pray you, what did America do?"

You, that are sons of a freedom forged with your own strong hand,
Born of a deathless heritage, set in a glorious land;
Loving your wives and daughters, holding their honor dear;
What should you know of doubting? What can you know of fear?

What shall we say, America, when the books of Fate are closed,
Of the land where Hope and Liberty in safety reposed?
When the judgment of the nations who have won a brighter day
Shall pass for time eternal, O tell us what to say!

O, tell us what to answer when the hour of Fate shall come,
In the silence of the rifle and the thunder of the drum,
That we may give our children an answer straight and true,
"Tell us, O father, we pray you, what did America do?"

—Capt. William [illegible] Shaw, Middlesex Regiment, British Territorial Force.

Asia's Great Sink-Holes.

While Asia has the loftiest mountains in the world, it also possesses the deepest and most extensive depressions in the land, several of them sinking below sea level, so that if the ocean could flow into them they would form great lakes. In the deepest parts of them water now stands, forming small seas. Others are destitute of water. Among these is the Lukchun depression in Central Asia, which in places sinks as much as four hundred feet below sea level. The sink hole in the middle of the largest of the continents is also remarkable for its meteorological features, the yearly amplitudes of the barometer being greater than are recorded elsewhere on earth. In summer the temperature rises to Saharan heat, a record of 118 degrees Fahrenheit having been obtained in July while the air is of desert dryness.

Home of the Chinchilla.

The chinchilla, a little animal the size of a squirrel, is met with only in the Andes of Bolivia, Ecuador, Peru and Northern Chile, and is never found under a height of 9,000 or 10,000 feet. The Indians are eager trappers and hunters of it for its fine fur. The skins are well seasoned with salt and made up into small packages for dispatch to the towns, whence they are shipped abroad.

'TWIXT LOVE AND PRIDE

Sir George had declined to accompany them, "not being partial," he said, "to broken bones or rheumatism"; so when they had spent half an hour laughing at, and reasoning with him without effect, they started, leaving him behind.

When at length the lake was reached, considerable confusion ensued, caused partly by apprehensions that skates had been forgotten, or would not go on, or were too large, or showed unmistakable symptoms of a determination not to be fastened. This latter was perhaps the most frequent grievance; Eddie, for instance, being seen kneeling for an unconscionable time before little Miss Lisle, who, though deplorably silly, could always manage to look charming—which, of course was a point gained.

When fairly started, the skaters made as picturesque a group as any eye could wish to rest on, the girls in their soft luxurious furs and brilliant satin petticoats striking out boldly on the glassy surface of the lake. Frances and Mildred were accomplished skaters, Mabel was not quite so good; still the latter could hold her own and certainly beside the Deverill girls—who were generally clumsy—looked everything that could be desired.

"You will help me, Mr. Younge," she had whispered to Denzil, as he assisted her down from the dog-cart.

So, when he had fastened her skates, and pronounced her "fit," she started bravely enough on the slippery promenade. At one end there rose a post marked "Dangerous," of which, as usual, those whom it should have warned remained profoundly ignorant. Denzil alone had observed it; others, if they observed, attached little importance to it.

The day was magnificent — hard, dry, and as bitterly cold as frost could make it—too cold, perhaps, for the dowagers, who, in spite of their warm mufflings, sat shivering, but heroically, while the youngsters enjoyed their fun.

Miss Trevanion and Frances Sylverton, with merry, gay laughter, that rang through the crisp air, were trying to outdo each other in grace and agility, Frances decidedly having the best of it, she being one of those girls who do anything they set their hearts on "better than anybody else."

As Denzil turned from watching them, he perceived Lord Lyndon at a distance, leisurely, but surely, making for the forbidden spot; and, as he saw this, an almost savage desire to see this man, who had robbed him of his all, humiliated before the eyes of his betrothed, took possession of him.

He knew the ice in that part to be thin and dangerous for skating on; but once in, he could easily pull Lyndon out again—no harm could come of it beyond a severe wetting, and the endurance of the ridicule that was sure to follow when once the object of alarm was out of danger; besides, it was no affair of his if the man chose to be so foolhardy.

A minute later, however, and—having deposited Mabel on the bank—he was skating hurriedly toward the unsuspecting lordship.

"Lyndon!" he shouted, when still some way from him, and shortly afterward laid his hand upon his arm. The sudden collision nearly upset them both.

"Hullo!" exclaimed Lyndon, trying to keep his balance, and succeeding with much difficulty. "What is the matter? You have very nearly thrown me! Anything wrong, eh?"

"Don't you see where you are going?" cried Denzil, angrily and ungraciously, being considerably out of breath and temper. "Have you no eyes? Unless you want to be drowned, or, at all events, wet to the skin, you will get away from this place. Can't you see it is marked 'Dangerous?'"

"No, I can't," returned Lyndon, still vague. "Where?"

"There," answered Denzil, pointing contemptuously to where loomed the announcement, which certainly was high enough to put the necessary word almost beyond reach of sight.

"Never saw it until this very moment, I give you my honor," said Lyndon, solemnly gazing up at the warning as though lost in amazement at his own want of observation. "I should have gone straight on, and in another moment—— I am awfully obliged to you, Younge—indeed, more grateful than I can tell you."

"I do not see that there is anything to be so very grateful over," rejoined Denzil; "I had only to skate across to you from the opposite bank. It did not cause me the slightest inconvenience, I assure you; probably had it done so, I should have left you to your fate."

"Oh, no, you would not," said Lyndon, amiably—"you are much too good a fellow to do anything of the kind. I know you better, you see, than you do yourself. Why, but for you, I might at this moment have been drowning, or freezing to death, or, at all events, cutting a most sorry figure, and before all these girls too! You have in fact saved my life; and I only hope I may be able to do something similar for you before——"

"I hope you won't," interrupted Denzil, grimly.

"Oh, ay, just so—ha, ha!" laughed his lordship, with determined good humor. "You would not care to be in such a predicament so that your life would require saving? Well, never mind; you have kept me from making a fool of myself, and with Mildred looking on, too."

"Don't let us stand talking here all day," said Denzil, roughly, and turning, skated back again to where he had left Mabel sitting.

Yes, Mildred had been looking on, as Lyndon fancied, and, having witnessed the whole scene, had understood it thoroughly—had seen her future lord and master gliding to his doom, and had half started up to call out or warn him in some way of his danger, when Denzil's figure, flashing before her eyes, showed her that he, too, had recognized Lyndon's peril, and was on his way to tell him of it.

As Denzil returned from his mission and cast his eyes upon her, she appeared unconscious of everything, but the dainty little pair of skates she was in the act of unfastening. He stopped.

"Can I help you?" he asked, and she answered, promptly, without lifting her eyes—

"No, thank you. I am quite accustomed to do this sort of thing for myself"—whereupon she drew off the skates, in confirmation of her words, and Denzil went on to Mabel.

An hour crept by, and then Lady Caroline, feeling that she had suffered enough for her friends for that one day, declared her intention of returning without further delay, and forthwith departed, carrying with her Mabel, who was anxious to reach home before the post-hour arrived.

The eldest Miss Deverill was afflicted with nervousness, and, having been driven to the lake by "Sonny" Sunnerly—who was in bad temper, and knew as much about driving as "the man in the moon"—had endured such agonies on the journey as determined her, whatever came of it, to drive back in different company. So going up to her cousin, Lord Lyndon, who was an undoubted "whip," she entreated him as follows:

"Promise me," she said, "that you will drive me home."

"My dear Margaret," said Lyndon, "do not ask me to do that. You know I have Mildred under my care."

"My dear Henry," returned Miss Deverill, desperately, "you must drive me, or you will have my death to answer for. I will not trust myself again to that hare-brained boy, who sulked the entire way here, and knows nothing whatever of driving. Indeed, my nerves are at present in such a state that I can go home with nobody but you; besides, anybody can see that that horse is positively dangerous."

Lyndon glanced toward the animal in question, and saw that it was unquestionably skittish, displaying an evident desire to bolt, and seeming to take particular delight in taxing the patience of the small groom who stood on tiptoe to hold him, after which he looked once more at his cousin's dolorous countenance and relented.

"Well, somebody must take care of Mildred," he said with hesitation, "and—where is Mildred?"

"She went toward the wood about half an hour ago—somebody ought to find her and say that we are on the move," responded Harvey from beneath a horse, where he was busily arranging a twisted strap.

"Eddie, go and find her," said his lordship, distractedly.

"Can't, my dear fellow; don't you see how engaged I am?" answered Eddie, casting an expressive glance at Silvia Lisle, who blushed and simpered, and lowered her white lids in acknowledgment in the most bewildering manner. "Denzil, you are doing nothing—go and succor the lost damsel, and restore her to the bosom of her bereaved family."

"Yes, do go and explain things to her, Younge," implored the unsuspecting Lyndon, "and just say how it was I was put in for my cousin. It is an awful bore," confided his lordship, in a heart-broken whisper, "but what can a man do when a girl comes crying to him about some miserable boy's stupidity? You bring Mildred home safely—there's a good fellow; remember, I leave her to you;" and, without waiting for a reply, Lyndon bustled off, greatly to his cousin's relief, who dreaded lest some inopportune chance should again consign her to young Sunnerly's care."

Both Lady Caroline and Mabel, who alone there knew his secret, had gone long since so Denzil was left with no one to assist him in this hour of perplexity—with no one to aid him in escaping the tete-a-tete drive that apparently lay before him. Ever since his arrival at King's Abbot he and Mildred had scarcely spoken to each other—had shown, indeed, a mutual though an unspoken determination to avoid each other in every possible way. And now to have her thrown on his hands in this unavoidable manner was most distasteful to him.

Then came the thought that she—knowing nothing of the circumstances—would perhaps imagine that he had connived at this arrangement, and had made the most of the opportunity offered to gain undisputed possession of her society for the long homeward drive.

This idea was particularly galling to his pride, and, as it grew on him, he gnawed his mustache savagely, and reproached himself for not having left Clinton days before.

Why had he stayed? What inducement to linger could there be, when every hour caused him a fresh pang—every day brought new misery into his life? At first he had persuaded himself that it would be "dishonorable to withdraw directly and without sufficient public cause fearing he might compromise her in the eyes of Lyndon, who, he felt intuitively, knew nothing of his—Denzil's—hopeless infatuation for his promised wife. Women might perhaps feel themselves bound to tell their future lord of affairs in which their own hearts had been concerned, but surely there was no reason why they should reveal rejected addresses, and so betray the secrets of others.

Whether right or wrong, Denzil at least knew that Mildred had kept his intact, so he persuaded himself, on that first day of his coming, how impossible it would be for him to take his departure until a certain time had elapsed; though in his inmost heart he was aware that inclination, not necessity, was keeping him.

Now he was repenting sorely of his decision as he shrunk from intruding himself upon Mildred and cast about vainly in his mind for some excuse to offer Lyndon for his seeming discourtesy; and, as he thought, two of the carriages, to the sound of merry laughter, started on their journey, while others hastily followed, leaving the pony phaeton, which had brought Miss Trevanion, and which was to carry her home again, in the care of a small stray boy, who, the grooms having vanished with the other vehicles, had agreed for a consideration to take care of it until Denzil had returned from the quest.

The latter, seeing all this, muttered an impatient exclamation below his breath and moved away toward the wood, following the direction he had seen Miss Trevanion take.

Meantime Mildred was in sadder plight than Denzil dreamed. Having wandered rather further than she had had any intention of doing on first setting out and discovering that a wood in January is by no means the same thing as it is in July, she began to retrace her steps with the design of returning home with her mother. Dreading that she might be late and feeling, besides, intensely cold, she commenced to run, and, as she ran, her foot came upon a little frozen pool, slipping upon which she came heavily to the ground.

Raising herself up again directly, and thinking nothing of it, she hurried on once more; but presently an intense pain in her foot startled her, which in a few minutes increased to such a degree that she was obliged to seat herself on the trunk of a fallen tree, and, acknowledging herself disabled, consider how best to acquaint her friends with her mishap.

Fully half an hour passed thus, and she was almost upon the verge of despair, when footsteps coming hurriedly toward her from a side direction roused her, and, raising her eyes, she beheld Denzil. She blushed crimson.

"What has brought him?" she wondered. "Surely Lyndon——"

"At last I have found you," said Denzil, in his coldest tone, and as though he were politely bored at having been put to so much inconvenience. "I have come to tell you that the others have all gone."

"Gone!" echoed Mildred, with astonishment. "Then where is Lord Lyndon?"

"His cousin, Miss Deverill, was so nervous that she insisted on his driving her home, so he commissioned me to find you, and bear you his apologies," returned Denzil, repeating his lesson with prompt decision.

"I do not understand his treating me in such a manner," said Miss Trevanion, very pale and proud; "and where were Eddie and Charlie?"

"They also were fully occupied," Denzil said, bitterly; "but your sister preferring to return home with Lady Caroline, unfortunately left me free."

Mildred bit her lip.

"I regret very much that you should have given yourself this trouble," she said, slowly—"I am sorry you have come."

"And so am I," returned Denzil, haughtily; "but it is none of my doing. I beg you to believe, Miss Trevanion, that, if I could have avoided it, I would have done so." Then, seeing she made no attempt to move, he added, "Had you not better come? It is getting very late."

She made no answer, but, putting her hand against the side of the tree, raised herself to a standing position. As the injured foot, however, was brought more firmly to the ground a spasm of pain contracted her face.

"What is the matter? Have you hurt yourself?" he asked, in a somewhat softer tone.

"I have strained my foot in some awkward way—it is nothing," she answered.

"Perhaps you had better take my arm," said he, still coldly; and she returned:

"No, thank you; I think I can manage to get on," and she did manage for a few yards or so, when she faltered, uttering a faint moan.

"What is the use of your persisting in this folly?" exclaimed Denzil, angrily. "Do you wish to be laid up for a month? Take my arm directly or"—ungraciously—"shall I carry you? I think it would be better. I dare say I could do it without breaking down, as it is not very far"—with a rapid glance toward the end of the path, where, just out of view, he knew the phaeton stood.

"No," she answered indignantly—"certainly not. I can walk quite well." But she took his arm for all that, and for a while hobbled along, miserably, beside him, her face white with pain.

Denzil, who was watching her furtively, and who was secretly cut to the heart and sick with anxiety about her, attempted another remonstrance—

"You know you are suffering horribly," he said; "why will you be so obstinate? If you will only permit me to carry you to the end of this path—only a few yards now—it will be so much better for you. Do try to understand"—savagely—"that I have no desire whatever to carry you, for my own part—that I think you would be rather heavy than otherwise; but I cannot bear to see any creature enduring pain."

To which extremely rude exhortation she did not deign to make reply of any kind, beyond a faint pretense of withdrawing her hand from his arm, which he refused silently to let her do.

In this manner, and in dignified silence, they proceeded yet a few steps further; and then suddenly Miss Trevanion stood quite still, and gazed up at him with wide, agonized, and almost appealing eyes.

"This is madness!" cried Denzil, and forthwith, not asking any further leave, took her up in his arms, and walked on again, so burdened, with a frowning brow, and a set, unpleased expression about his lips.

Miss Trevanion was so taken by surprise, and so utterly prostrated with pain, that at first she made no protest, but presently began to cry quietly in a broken, wretched sort of way. Denzil stopped.

"Shall I put you down?" he asked, sternly.

The situation, being unsought by him, and extremely distasteful—with his heart beating passionately, as if to warn him how insufficiently under control it was—compelled him to assume an ill-temper he was very far from really feeling. Miss Trevanion sobbed on, but made no reply, knowing she had none to make, and so wisely refraining from speech of any kind; whereupon Denzil marched on as before, not addressing another word to her.

He was a strong man; but a full-grown, healthy young woman was no light weight—so it was no disgrace to his manhood to confess that, when at length he had her safely deposited in the carriage, he was rather glad than regretful. Taking the reins from the boy, and throwing him some silver, he drove away without a single glance at his companion, as she lay back exhausted among the cushions he had carefully, but sulkily, arranged for her.

The pretty little bay ponies suffered more than they deserved at his hands that day, being disgracefully wet when they came into their groom's care, about an hour and a half later; but of what their driver was thinking, or whether he was grave or gay, Miss Trevanion had no opportunity of judging, as, from the time they started until they reached home, he never opened his lips to her.

(To be continued.)

And Finis in the Middle.

The real topsy turvy land is the dictionary, for there age comes before youth, divorce before marriage, autumn before summer, digestion before eating, the finish before the start and death before life.

Mighty few of us are color blind where the long green is concerned.

A Strange Rock Dweller.

One of the strangest creatures known to science is the pholas, or boring clam. When still very minute the animal bores into the sandstone ledges at extreme low water, by means of its sharp shell, which is replaced by secretions as it is worn away. It penetrates the rock to a depth of six or eight inches and hollows out its burrows as it increases in size. Shaped roughly like a top, it could not leave its rock dwelling even if it wished to do so. For food it depends on the animalcules that float in sea water, which it seizes by its long siphon, or tongue. The pholas is in great demand at the seaside resorts along the Pacific coast for its meat is very tender and makes excellent soup. The clams are dislodged in great numbers from the ledges by the use of dynamite, although it is possible to obtain them with a pick or crowbar.—Exchange.

Corns Drop Out INSTANT RELIEF

Paint on Putnam's Corn Extractor tonight, and corns feel better in the morning. Magical, the way "Putnam's" eases the pain, destroys the roots, kills a corn for all time. No pain. Cure guaranteed. Get a 25c bottle of "Putnam's" Extractor to-day.

Poulbot and "Zozo."

Perhaps no cartoonist in Europe has depicted war from the same standpoint as Poulbot, of Paris. It has remained for him to interpret the "great adventure" through the minds of children, and he, himself, according to a writer in Cartoons Magazine, is a "big, awkward boy."

His mother kept a municipal kindergarten, and it is the little "partgois"—the children of the poor—whom the artist has taken for his models. "Poor little dolly, does the guns scare you?" is the question put by one of his little gamins, who has sought refuge from the big guns, and, all alone in a dark cellar, tries to console her paper doll.

"The Poulbot home," continues the writer, "has a tyrant, an idol, a pet, in 'Zozo,' an adopted child of those tenements. It was because this little orphan used to open her mouth like a baby bird when it was time to be fed that they named her 'Zozo,' a diminutive form of 'oiseau,' or bird.

"Zozo thrived marvelously in her new home. Prosperity, however, rather spoiled her. Able to eat at any time as much as she wanted, she rounded out and became quite a bouncer. Also she became the law. She broke the heads of Poulbot's famous dolls—like Caran d'Arche, he likes to model clay puppets—tore up his sketches, and otherwise asserted her authority, while the artist laughed at her. It is not unlikely that you will find a picture of Zozo tucked away in the corner of almost any of his drawings.

FREAKS OF MEMORY.

(Browning's Magazine)

"Why have you got that string tied to your finger, Uncle?"

"Oh, my wife put that there to remind me to mail a letter for her."

"And did you mail it?"

"No, she forgot to give it to me."

Women With Weakness Find New Strength

For all special weakness from which girls and women suffer, no surer remedy exists than Dr. Hamilton's Pills; they maintain that bracing health every woman so earnestly desires, they uproot disease and bring strength that lasts till old age.

The blood is richly nourished by Dr. Hamilton's Pills. Appetite increases, weakness and secret ills give way to surplus energy and reserve vigor.

No pale girl, no ailing woman can afford to miss the enormous good that comes from Dr. Hamilton's Pills; get a 25c box to-day.

Poison in Young Rattlesnakes.

Observations on live rattlesnakes show that the poison glands become functionally active as soon as the snakes begin to shift for themselves, which must be very soon after birth. Experiments on the young ones six days after birth proved the presence of venom in small quantities. Experiments made three months after birth showed that considerable venom is secreted, as a pigeon inoculated at this time died in two hours with the usual symptoms of poisoning.

Minard's Liniment Cures Distemper.

Mohammed's Carpet.

Once a year a strange custom is observed in Cairo. A piece of carpet on which, according to tradition, Mohammed once sat and which is the most famous sacred relic of Islam is carried through the streets, and the khedive and his troops all receive it in review order and salute it as they pass. The relic is guarded most carefully at ordinary times, and the officer in charge of it each morning must salute it with his sword raised, while the bugler blows three blasts before it.

The Twelve Jurymen.

A prisoner is tried by twelve of his fellow countrymen. This custom is a thousand years old, and we get it from the vikings. The vikings divided their country up into cantons, which were subdivided into twelve portions, each under a chieftain. When a malefactor was brought to justice it was usual for each chieftain to select a man from the district over which he ruled and compel him to try the prisoner, the verdict of these twelve men being declared by the judge to be final.

Minard's Liniment Cures Colds, Etc.

One of the World's Dark Spots.

Even to-day inland New Guinea is one of the world's dark spots. The country is a nightmare of gigantic precipices, huge ravines, great swamps and soaking forests. In 1901 the Danish explorer Peterson, with three companions, dived deep into the heart of this unknown country. They were captured by a tribe of savages, who killed their carriers and made them prisoners. For long they were believed to be dead. Then, to every one's amazement, a letter in Peterson's writing was brought by a native to the coast. It told of his miserable plight, and an expedition was at once sent inland to bring him home.—London Spectator.

Have Been Tried and Found Good

WHY DODD'S KIDNEY PILLS ARE SO POPULAR.

They are Invaluable as a Tonic and Family Medicine As Well As a Preventive and Cure for the More Serious Kidney Diseases.

Chelmsford, Ont., June 19.—(Special)—"We have found Dodds Kidney Pills extremely good. We are in good health, thanks to Dodd's Kidney Pills."

These are the words of Miss Delia Charron, a well known resident here. Others tell the same story. They have tried Dodd's Kidney Pills and found them good.

For Dodd's Kidney Pills as a tonic and family medicine are without an equal. When you feel worn, tired and run down the chances are ten to one that your kidneys are at fault.

When the kidneys become clogged or out of order, the circulation becomes sluggish, the impurities are not strained out of the blood and the result is weariness and lack of energy all over the body.

This condition is not only disagreeable, but dangerous as well. The impurities in the blood are the seeds of disease. If they are not removed Rheumatism, Lumbago, Gravel, Dropsy, Diabetes, or Bright's Disease may result.

Guard against these diseases and get back your accustomed energy by using Dodd's Kidney Pills.

Chinese Proverbs.

Think twice and do not speak at all.

At 70 a man is a candle in the wind.

A thousand soldiers are easily obtained; one general is hard to find.

Do not lace your shoes in a melon patch.

Easy to open a shop; hard to keep it open.

Of all important things the first is not to cheat conscience.

All pursuits are mean in comparison with learning.

In a united family happiness springs up of itself.

He bought a dried fish to spare its life.

Win your law suit, lose your money.

Better do kindness near home than go far to burn incense.

If you suspect a man don't employ him; if you employ him don't suspect him.

Unskilled fools quarrel with their tools.

It's a little thing to starve to death; it's a serious matter to lose one's virtue.—World Outlook.

NAME NEW STATION PETAIN

Junction of K. V. and C.P.R. Will Bear Historic Designation.

In honor of the gallant French general who has been in command of the operations at Verdun during the terrific onslaughts delivered by the Germans, the junction point of the Kettle Valley Railway with the main line of the C. P. R., near the station of Hope, on the north side of the Fraser River, has been named Petain. The appellation appears in the new summer time schedules, which are now in the printers' hands, and will be issued shortly.

The new time table will become effective on June 4, as previously announced. The junction point of the Kettle Valley and the C. P. R. lines near Otter Summit, where the Spences Bridge branch of the latter road ends, has been designated Brodie as a compliment to H. W. Brodie, general passenger agent for the C.P.R.

Minard's Liniment Cures Garget in Cows.

AN OLD POEM.

SONG OF THE QUEEN'S OWN RIFLES.

Up, comrades, up! 'tis our bugle—
The assembly, it sounds loud and clear;
Of time, as of fare, let's be frugal,
And on with our old fighting gear.
Though our feet be sore with the marching,
And hunger won't leave us alone,
Though with thirst our lips be parching,
We're prepared—are we not—Queen's Own?

CHORUS:

Though our feet be sore with the marching,
And hunger won't leave us alone,
Though with thirst our lips be parching,
We're prepared—are we not—Queen's Own?

II.

On! Comrades, On! travel faster;
On! not a moment's delay;
'Twill bring but disgrace and disaster,
And may make many sad hearts to-day.
On our quick march, perchance, are depending
Victory and the lives of the brave;
The quicker—the sooner it's ending,
And rest comes with peace or the grave.

CHORUS.

Though our feet be sore with the marching,
And hunger won't leave us alone,
Though with thirst our lips be parching,
We're prepared—are we not—Queen's Own?

III.

Home! comrades, home; rifles slinging,
Hearts bounding with delight;
Flags are flying, the joy bells are ringing,
As they welcome us home from the fight.
Now off to our peaceful vocations,
The workshop, the desk, or the gown;
We are sure of good quarters and rations,
Till the next time they need the Queen's Own.

CHORUS.

Now off to our peaceful vocations,
The workshop, the desk or the gown;
We are sure of good quarters and rations,
Till the next time they need the Queen's Own.

Some men are born popular, some acquire popularity and others are just born.

Lachute, Que., Sept. 25, 1903.

Minard's Liniment Co., Limited.

Gentlemen,—Ever since coming home from the Boer war I have been bothered with running fever sores on my legs. I tried many salves and liniments; also doctored continuously for the blood, but got no permanent relief, till last winter, when my mother got me to try MINARD'S LINIMENT, the effect of which was almost magical. Two bottles completely cured me, and I have worked every working day since.

Yours gratefully,
JOHN WALSH.

Halcyon Days.

The expression "halcyon days" originated with the ancient Sicilians. They firmly believed in an old legend that during the seven days preceding and the seven following the winter solstice—Dec. 21—the halcyon, or kingfisher, brooded over her young in a nest afloat on the surface of the water and that during these fourteen days the seas would be calm and safe for the mariner; hence the name "halcyon days," when, according to Milton, birds of color sat brooding on the charmed wave."

Minard's Liniment Cures Diphtheria.

Sulphur in New Zealand.

Sulphur deposits are found on White Island in the bay of Plenty, on the coast of the North Island of New Zealand, about thirty miles from the mainland. This island, which covers about 600 acres, attains a height of 900 feet on one side and opens to the sea on the other. Its topography indicates an old crater, and the boiling lake on the island, which is one of the awe inspiring sights of New Zealand, is a further evidence of volcanism. After the New Zealand Sulphur company had spent $100,000 in preparation for mining sulphur in this locality a volcanic disturbance wrecked the camp and killed ten men.

ISSUE NO. 25, 1916

HELP WANTED.

WANTED—COMPETENT MAID-GENERAL. Family of three. Good wages. State age and experience. Address, P. O. Box 65, Hamilton, Ont.

GIRLS WILLING TO WORK ON British Army Orders, knitted underwear. Seamers, mate stitchers and learners. Bright, healthy employment. Good wages. Zimmerman Mfg. Co., Ltd., Aberdeen and Gerth streets, Hamilton, Ont.

WANTED — HOUSEMAIDS AND waitresses. Previous experience not necessary. Apply, "The Welland", St. Catharines, Ontario

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCATION to train for nurses. Apply Wellandra Hospital, St. Catharines, Ont.

"We" and "They."

In the smaller towns and country districts people say "we" when they speak of governmental activity. "We" built the courthouse and got it done at low cost. "We" organized the high school. "We" pay the expenses of keeping prisoners in the jail.

In the big cities people say "they." "Why don't 'they' do thus and so?" People wonder when the city government falls down. It isn't a personal matter with them. The government isn't their government. It belongs to somebody else.

There is a world of difference in the two attitudes. When the people of the cities get to saying "we" about their cities and counties, then they are going to clean house and take possession.

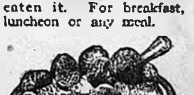
The Equinoctial Storm Fiction.

The widespread belief in the existence of an equinoctial storm and Indian summer comes, to a certain extent, under the head of popular superstitions. If the equinoctial storm is defined as a rainstorm, lasting at least three days at the 21st of September, then there is very seldom a year when several equinoctial storms do not occur. The reason for the belief in an equinoctial storm is probably the fact that about that time of the year the first storms of the winter type, with steadily falling precipitation, make their appearance. They stand in sharp contrast to the summer type with the sultry weather and thunder showers. Storms of the winter type can occur, however, during any month of the summer. The amount of precipitation near the 21st has been shown by averaging the observations at many stations to be no greater than before or after this date.—Willis Isbister Milham in Meteorology.

When an old bachelor begins to think that a wife is essential to happiness, marriage is the only thing that will dispel the delusion.—Indianapolis Star.

A Blessed Boon to Busy Brides—easily and quickly prepared—full of strength-giving nutriment—the cleanest, purest, cereal food in the world, **Shredded Wheat with Strawberries.** A combination that is a perfect, complete meal. You don't know the greatest of palate joys if you have not eaten it. For breakfast, luncheon or any meal.



Made in Canada.

FATE —AND— BILL BURTON

The huge white-washing brush, filled to dripping point with an emerald green distemper, wavered in its sweep across the wall and came to a standstill.

"Shall I say it plump out?" reflected William Burton. "Or shall I beat about the bush?"

The green distemper ran down the wall, spread out on the linoleum or reached the edge of the orange and green carpet.

"Diplomacy and tact," murmured Bill, to himself. "O' course, sh'll be wild—wouldn't be a woman otherwise. The very fact of my bein' 'ome on a Wednesday gives the show away——"

He heard Miriam's key grate in the lock. A sickly look dawned in his mild eyes and his narrow shoulders seemed to droop.

"'Ello!" he ejaculated, in badly simulated cheeriness. "That you, Miriam?"

"Whatever are you doin' home so early?" demanded Mrs. Burton, from the gloomy passage-hall. "What ever are you—doing?"

She paused—the emphatic, horrified pause between each word grew longer. There was tragedy in her eyes, which swept comprehensively round the room. In one glance she saw the stained linoleum, the ruined carpet, the splattered hearth-rug, the spotted velvet mantel-cover.

"Had the afternoon off," murmured her husband.

"Thought I'd turn to and give you a surprise."

His attempt to smile was pathetic.

"You've got the sack?"

"That's about it," he admitted.

She sat down heavily and glared at him.

"I might ha' knowd it 'ud come to this," she said. "Can't say I didn't 'ave no warning. My poor dear mother used ter say, 'You've only to look at his shoulders'—meaning yours—'they are like a bottle. 'E'll never do you no credit.'"

"Wasn't my shoulders what got me the push?" said Bill, huffily. "It's the war! Nuff to drive a man to drink!"

"Wish it 'ad!" cried his wife.

Once more she examined the room.

For an hour Mrs. Burton raged. Never before had Bill realized the depth of her contempt for him. It stung him. Mild as he was, it infuriated him. He seized his hat and escaped.

There were tears in his eyes as he reached King's road. Outside a public house—a house he had often looked at but never dared enter—he paused.

Bill Burton swung open the door and ordered three pen'orth of whiskey. Drinking it he found his spirits diminished as rapidly.

What was the use of going on? What was the use of trying any longer? She hated him, that was clear. He wished he hated her—he did hate her ways and her manners and her tongue. But somehow in the back of his heart there struggled, stunted and starved, the plant of love.

"This beats everything!" groaned Bill Burton. "This puts the lid on it. Wasn't I down enough—being sacked an' all?"

By chance he trudged down Edith road and reached the embankment. He leaned over the railings. Looking down into the brown water. After a bit he began to shiver. The tide was up and the dingy swirling water began to fascinate him. He grew afraid. He hated water.

A scream startled him. He swung round and glanced back towards the bridge. A group of dirty, ragged little urchins had been playing on a gravel path—an oasis in the general mud—beneath the bridge. The patch was small, the swiftly ebbing tide had exposed a few square yards. In it a dozen children or more had been clustered.

They were wading when he glanced at them now and a shrill chorus went up.

"Wot's up, guv'nor," queried a diminutive boy at Bill's elbow.

"Can't see," said Bill, and cocked up one leg on the parapet.

A gleam of something red, then white, a hand and arm flung high above the surface of the brown water explained matters.

"Someone fallen in!" cried Bill, in excitement: "It's one o' them children! Gosh 'ow the tide's runnin'—"

Turning over, showing now the gleam of a little white face, then a wavering streak of floating hair, the child slid rapidly down towards him.

"There she is!" shouted Bill, to no one in particular. "Il—there she is—there!"

The tail of his splashed coat caught in something. He tore at it and continued shouting directions.

"It's a nail, guv'nor!" cried the small boy. "You goin' in? My, you're a plucked one!"

The hook on which lifebuoy was hung had caught the tail of Bill Burton's coat. He had no intention of going in, as the urchin put it. He was not such a fool. Besides, he could not swim.

"'Art a tick, guv'nor!" shouted the boy, releasing Bill Burton's coat at last. "Now, you're free. Hooray!"

He caught Bill's leg and swung it into the air. Bill screamed, clutched at the parapet! His fingers slipped. Still screaming, he fell into the water. It was all over, he knew it. Then, suddenly, miraculously, it seemed to Bill, he began to rise. There was light and air around him. He gasped and again. His twitching, waving fingers caught something that floated. He seized it.

Once more he came to the surface. Something clutched at his hair—a little cold hand. Bill opened his eyes. A great gush of pity, the spark of heroism in the most cowardly, lit up his soul. It was the child he held. He tried to raise it and hold it aloft. The movement made him sink once more. He shot out his legs. They met solid ground solid ground. Bill Burton stood erect, swaying with the current, his head and neck above water, the child in his arms, held high.

Bill began to laugh, strange, chattering laughter, and the water ran from his hair and mingled with the tears in his eyes. He did not know why he laughed or why he cried. He tingled, cold as he was, and exulted. It seemed suddenly so overwhelmingly important that the wee child was safe.

He heard someone shout Brave! He saw a line of faces—men, women, children, and a policeman's helmet over the parapet. The constable flung in the lifebuoy many yards upstream.

"Don't you move," he warned Bill Burton.

The lifebuoy floated down, and Bill seized it. He heard voices behind him and a boat slid up, with two men, one a policeman. Inside it, dripping and shivering, Bill and the child were dragged in.

"She's safe?" queried Bill anxiously.

"I'm a doctor—come to the steps!" shouted someone in the crowd.

The crowd was of quite a size when the boat grated against the steps. The doctor took the child in his arms. Someone ran out from one of the great houses opposite.

"Come in and have your clothes dried, sir," said a kindly young voice. A young man spoke.

"I saw you from my top window," he said. "What happened on the top of the parapet—I saw you struggling——?"

"Couldn't get free," explained the urchin, who had toppled Bill in. "Alsd 'e was. 'Is coat was caught. I set 'im free—me."

"Did he?" asked the young man.

"He did, sir," said Bill.

The urchin received a shilling. The crowd clustered round and asked questions.

"'E can't swim," said the constable. "Waited till she was just below 'im, then pounced in. May I have your name, sir?"

The ubiquitous reporter of some newspaper pushed his way through the crowd. A volley of questions and the clicking of a snapshot camera clustered Bill Burton. He looked helplessly at the young man who said, "It's a shame to keep you here. Come in and get dry! Fine, sir, you've a good nerve. Even a swimmer doesn't always behave so gallantly and promptly."

"Not at all, sir!" mumbled Bill.

Someone raised a cheer. Bill followed the young man into the house and upstairs.

"Get your things off. Put on these," said his host, throwing a serge suit from a drawer. "Have a good rub down."

He looked critically at Burton as Bill stripped. The little clerk's narrow chest and puny arms made his heroism more emphatic. A lion's heart in the body of a mouse, he reflected. "It was devilish plucky," he added. "Here's a towel. Rub hard. May I ask what chance brought you to the embankment?"

"I'm a clerk—just a clerk—auctioneer's office," said Bill. "Fact is, I'm out o' work."

He looked eagerly at the questioner. The house was huge. Its owner must be wealthy.

"A man as brave as you've proved yourself to be," said the host, "is wasted as a clerk. You ought to have been a soldier. You're the man the army wants. By the way, my name's Fakenham—Lord Fakenham. I'm a captain."

"Me a soldier!" said Bill, with a grimace.

"A dose of gym and route-marching, exercises, Swedish drill, and so on would put a couple of inches on your chest in no time. Besides the tape can slip a bit—if a doctor wants it to. I'd like to have you in my company." You'd soon be promoted, you know."

Bill blanched. Enlist! Great heavens! Be bullied in the barrack-room! Sworn at by sergeants! Shot at! Not he!

"I'm a married man," he observed.

"You're just the man, then. You're out of work. You'll lose nothing. You've everything to gain. If you were to lose a good job it 'ud be different. I'll see your wife is looked after. We want—you. Look here, we are stationed at Chelsea barracks—just round the corner. Stroll round with me."

So Bill enlisted. He had been introduced to Sergeant Bray as a hero who could not swim, but yet had dived into the river and saved a child's life. The sergeant had wrung his hand. He had drunk beer with a couple of corporals. England was in peril. Bill Burton 'had come to the rescue.

This mood carried him as far as the Chelsea palace. Then the very familiarity of King's road began to rub the gilt from his dream. The familiar scenes brought familiar emotions. With a sinking sensation he remembered Miriam.

"She'll flay me!" he muttered.

"Miriam, you there?" he asked, hanging up his hat. "I want my tea."

"You—what?"

"My tea!" he reiterated, his courage oozing out.

"I wonder you weren't ashamed to show your nose," she said, slowly. "Ruined my 'ome more'n a fire. The carpet——"

"'Ang the carpet!" said Bill Burton. "I've enlisted, I 'ave. I want my tea. D'you 'ear!"

He stared at her. His blood seemed to be suddenly chilled. Her white, hard face seemed to prophesy such a storm of rage as he had never yet encountered. He knew he could not stand up before it. He had shot his bolt.

She stumbled back into the parlor, where she had spent hours on her knees clearing up as best she could the havoc he had made.

He followed her silently. Was she inarticulate with fury? What was she going to do or say?

Miriam walked unsteadily to the red velveteen covered sofa, stood there, drawing deep, shuddering breaths, then suddenly threw her apron over her head and sat down, sobbing loudly.

"My dear," he said, shakily, "I know I ought to have consulted you! 'Twasn't fair. But England wants men. There's no time. England wants—me. Don't take on. You're to be looked right to be angry, I own. Don't know what came over me. I kind o' 'ad to do it. It's—it's been like Fate—all day——"

She dragged her apron down, groped for her handkerchief, and rubbed her eyes dry, then stood up, very swiftly, and as swiftly and very unexpectedly flung her arms round Bill's neck.

"Oh, Bill, Bill—angry!" she cried, and the crowning surprise of that day of dumbfoundedment made him speechless. "Angry! My Bill! When I'm so proud!"

An hour later Bill had finished his high tea and had told Miriam of the accident on the embankment.

"I always knew you was brave," she said. "When I used to get in a—in a tantrum and you said nothin', I knew it was just your kindness 'olding you back. You was always brave, Bill—that's what made me love you."

From the chest he was throwing and the swagger of him when we met in Sloane square last Sunday, I'm beginning to suspect Bill Burton thinks there's something in him after all.—Pearson's Weekly.

Fascinating Dance Frock of Tulle

Yards and yards of tulle are now being used, both light and black shades This one is layer on layer of white, with embroidered underskirt and spangles.

Early History of Underwater Craft

Although much had been expected of the submarine, it cannot be denied that craft of this type have fully met, if not exceeded, expectations. On second reflection this statement stands amendment; it is perhaps more logical to state that in purely naval engagements, i.e., in warfare against recognized armed vessels, the submarine has not accomplished what had been expected of it; but, on the other hand, its versatility in penetrating underwater barricades, in bombarding land works and troops, and in warfare on unarmed merchantmen has been truly startling and, indeed, a revelation.

The submarine, although recognized as a latterday instrument of warfare, dates back much further than is generally believed. Leaving out of account the early attempts of a Dutch physician in 1620, and those of the Englishman, Symons, in 1747, it may be a surprise to many Americans to learn that the first submarine attack was undertaken in the War of Independence in 1775. David Bushnell, an American patriot, constructed a crude vessel of wood, which was manually propelled. Behind the vessel was a magazine containing about 150 pounds of powder and a clock-work exploding device. In marked contrast to present day practice, in which the submarine accomplishes its destructive errand by discharging a self-propelled mine or torpedo against an enemy vessel, the magazine of Bushnell was attached to the hull of an undesirable ship by means of a cable terminating in a wood screw. It was thus kept in position until the explosion took place sometime later. Bushnell carried out a submarine attack on the British warship Eagle, and, although he succeeded in manoeuvering his craft under the unsuspecting enemy, he failed properly to attach the mine or magazine to the bottom planking of the Eagle, with the result that the explosion took place about an hour later at some distance away from the intended victim, and without causing any damage to the enemy.

Although Bushnell's attempt was not successful, it held much promise, and for that reason it was not lost sight of. Robert Fulton, who built the famous steamer Clermont, offered Napoleon a submarine of his invention for the contemplated invasion of Great Britain, and a German engineer, Wilhelm Bauer, in 1850, came forth with plans for a submarine by which, to use the words of Burgoyne, an English writer on marine subjects, "The solution of the problem of submarine navigation was promoted to a higher degree than any other inventor."

Wilhelm Bauer, constructor of the first German submarine, was born in 1822 at Dillingen, Bavaria. He took part in the German-Danish War during 1840 as an artilleryman of the Schleswig-Holstein army. Thanks to financial help extended to him by the army and navy authorities, as well as by private persons, in 1850, at Kiel harbor, he was able to put into practice his ideas relating to the construction of a submarine. His craft was intended for use against the Danish warships then blocking German harbors; but it never made an attack on the enemy fleet. In connection with an experiment in Kiel harbor in 1851, the vessel foundered, but the crew was saved. Thirty six years later, in 1887, the submarine was salvaged in connection with the construction of a torpedo harbor at Kiel, and at the present time the remains of Bauer's submarine rest in the court yard of the Berlin Marine Museum.

In 1883 the Swedish engineer, Nordenfeldt, built a submarine boat at Stockholm, which might well be considered as the immediate forerunner of the underwater craft of the present day. This vessel had a length of 64 feet and a displacement of about 60 tons; the propulsion being furnished by a steam engine of 100 horse power. When running submerged, steam stored in large tanks, together with that in the boiler, served to drive the engine; the fire under the boiler being allowed to subside before submerging.

Since Nordenfeldt's submarine, the problem of underwater navigation has been given careful consideration by the leading naval powers. The French marine authorities are recognized as having been the first to undertake methodical tests intended to promote the development of the submarine boat. Other naval powers followed suit, rather slowly at first, but more energetically later, with the result that the underwater craft was rapidly developed from an experiment craft to a practical weapon of attack. Among the last to take up submarine construction was Germany. According to German naval men, there was no harm in maintaining a wise reserve while other nations were spending time and money in costly experiments. Thus it was that the German navy began to concern itself with the submarine as a naval weapon as late as 1906, and it must be admitted that the present war has proved the excellence of that underwater craft as well as the skill of their crews.

A modern submarine boat, to be really effective, should be specially seaworthy not only in the sense of surface navigation, but also in being able to withstand tremendous water pressure encountered when submerged even a slight distance below the surface. The problem of propulsion is one of the most important. In practically all modern submarines, gasoline or oil engines are used when on the surface, while electric motors and accumulators are depended upon for submerged navigation. A speed of ten or eleven knots is ample for submerged navigation, but, while travelling on the surface, speeds of eighteen to twenty knots are attained by the latest German submarines. The radius of action, without replenishing the oil tanks, is as high as 5,000 to 7,000 miles in the most recent models.

The torpedo is to the submarine boat what the projectile is to the gun. It is accordingly essential that each craft must carry a sufficient supply of torpedoes to be effective against enemy ships. Each of the latest type of German submarines is ordinarily supplied with ten or twelve torpedoes, which may be discharged through six torpedo tubes—four ahead and two astern—thus permitting of their discharge in quick succession if necessary.

The diving power of the submarine is, of course, of the highest importance. Sufficient water having been admitted into tanks to cause the boat to submerge until only the conning tower protrudes above the surface, the horizontal rudders are manipulated to overcome the last traces of buoyancy, whereupon the craft plunges to any depth, within certain limits, that may be necessary. In order to rise again to the surface, the water is driven out by compressed air and the horizontal rudders manipulated.

When running entirely submerged a submarine is practically blind; that is to say, the pilot cannot see because of the darkness of the surrounding water, and is accordingly obliged to lay his course entirely by compass and chart. However, when partially submerged or even at a depth of a few feet, it is possible to obtain a view above water through the agency of an optical device known as a periscope, consisting of a tube carrying at the upper end a system of mirror prisms, which reflect the image of the horizon through the tube to the lower prism and then into the interior of the submarine. Thus it is possible for the pilot and crew to obtain a view of the entire horizon, with the craft entirely hidden below the water, barring the single exception of one or two periscopes measuring but a few inches in diameter.

Service on board a submarine is extremely trying. In fact, it places a perpetual strain on the mental capacity of the crew because of the complexity of the manifold apparatus and machinery, gauges, periscopes, compasses, delicate instruments and other devices. Even a slight mistake is at times liable to result in the death of the entire crew. Aside from the mental strain, the lack of exercise and the poor air are but two of the conditions which try the strongest constitutions.

Aside from the remarkable exploits of British submarines in the Baltic Sea and in the Sea of Marmora, the Germans have proved to be the masters of underwater navigation in the present war. Although the allied forces were slow to make use of their submarines in the earlier months of the great war because of the scarcity of enemy ships on the high seas, they have since become very active not only in the Baltic, but also in the closed in body of water, the Sea of Marmora, which has been reached by diving below netting and mines which the Turks placed across the western entrance to this waterway.—Scientific American.

DANGER IN GASOLINE.

This Substance is Seven Times More Powerful Than Dynamite.

Do you know that gasoline gas is seven times more powerful than dynamite? asks the National Cash Register News in an article on the use of gasoline with safety in the home. Gasoline is a thin, water white liquid which evaporates rapidly and throws off vast quantities of vapor very inflammable and explosive when mixed with air.

Substances like cotton, linen, silk, especially when unwashed and undyed, become more or less electrified when rubbed or moved quickly in a bath of gasoline; the gasoline being a bad conductor, the generated electricity accumulates and reaches such tension that sparks are possible, igniting the gasoline and causing fire and explosion. Weather conditions affect the results decidedly, the dry air of winter being more dangerous than moist summer air. Gasoline explosions in garages are often brought about by static electricity, a fact definitely proved.

In case of fire tight cans are liable to explode, throwing the burning gasoline all over the premises, thereby augmenting the fire. For this reason gasoline should be stored outside the house, preferably in safety type cans (cans with fine wire gauze in neck and spout.)

Gasoline used for cleaning should be used outdoors, at least fifty feet from any fire, light or burning substance, never in an inclosed room. The heavy vapors travel long distances and are highly explosive. Never clean gloves on the hands. The rubbing or agitating of clothing in gasoline should be accomplished by means of a dry stick.

Gasoline stoves should never be filled with a light or fire within fifty feet of the stove.

NON-PRODUCTIVE SOILS--- CAUSES AND REMEDIES

Sterility or Partial Sterility in Soil is Due to a Variety of Causes, Many of Which Fortunately Can Be Removed With Proper Treatment.

There are but few soils in Canada that can be called absolutely sterile—that is, that won't grow vegetation of any kind—but unfortunately there are many soils that may be called partly sterile. Sterility or partial sterility in a soil may be due to a variety of causes. Excess or lack of water is the most common in humid regions. Defective aeration of the soil which is closely connected with excess of water also causes it. In the arid or semi-arid regions of the western States of the Union and in some parts of Western Canada excess of alkali salts often interferes with plant growth so much that crops can not be profitably grown, until elaborate and often costly methods are adopted to overcome these conditions. In some parts of Ontario large tracts of land are rendered practically sterile on account of the presence of large quantities of unoxodized iron compounds in the soil. Land that has been cultivated for a long time will become partially sterile through lack of available plant food in the soil, and through the development of acidity.

Some soils through their physical condition are more affected by lack of rain than others. Thus, a sandy loam soil will suffer from drought more quickly than a loam soil, as on account of its open texture the water drains away into the lower strata almost as soon as it falls. On soils of this nature it is very important to maintain the humus and vegetable matter at a high level by the use of an abundance of farmyard manure or the plowing under of green crops, so that the water holding capacity of the soil may be increased as much as possible. Crops often suffer from lack of water on heavy clay soils as on account of their close texture the water cannot reach the roots of the plants with sufficient rapidity to ensure proper growth and development. These soils can be rendered less heavy and tenacious by plowing under strawy manure and the application of lime.

The obvious way of remedying soils that naturally suffer from excessive moisture, such as swamps, etc., is to drain them.

On ordinary soils tile drains are to be preferred to open drains, but when peaty soil has to be drained and a firm bottom can be reached at a reasonable depth, open drains must be used.

It is most essential that the soil should be well aerated, as the majority of those little germs or bacteria that are so useful in changing the plant food in the soil into a form in which it can be used by the plant all require abundance of air.

When an excessive amount of vegetable matter is present, due either to the application of an excess of farmyard manure or to the peaty nature of the soil, the aeration is liable to be bad and the number of helpful bacteria in the soil will be but few. This is why when peat or swamp soils are reclaimed it is often necessary to inoculate them with soil from land that is known to be productive.

Acidity in a soil is due to lack of lime. The amount of lime in the soil may have been originally deficient or the large amounts of farmyard manure that have been added to it may have caused the lime that was originally present in quantities sufficient for crop needs to be washed out of the soil. It is well to apply two tons per acre of ground limestone every five or six years to make up for the lime that is being constantly leached out of the soil. In arid or semi-arid regions where the rainfall is deficient a condition known as "alkali" often is found in the soil. In these regions the alkali may be washed down into the soil for a few feet after a rain, but as soon as dry weather comes capillarity causes the water to rise, bringing with it the salts in solution and the alkali comes to the surface again.

Sodium sulphate and chloride cause what is known as "white alkali" on account of the white color of these salts.

Sodium carbonate causes "black alkali", which is much more harmful to vegetation and more difficult to combat than the white alkali. The carbonate dissolves some of the humus of the soil and makes the incrustation brownish in color though the salt itself is white. Not only is black alkali directly injurious to the plant, but it causes the soil to puddle and makes it very hard to work.

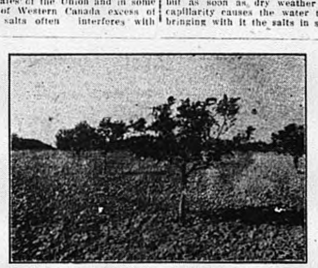
When black alkali is present the first thing to do is to apply land plaster or gypsum to the soil and change the black alkali into the less injurious white alkali. The amount of gypsum required will vary all the way from a few hundred pounds per acre to several tons, depending on the amount of sodium carbonate present in the soil. If there is not much alkali, treating the soil with gypsum may be all that is required to produce good crops.

If white alkali only is present, the application of land plaster is, of course, useless.

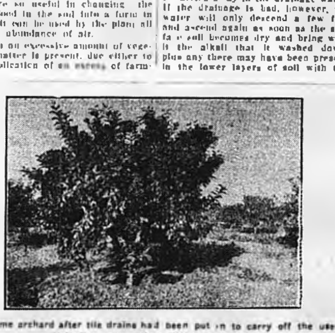
Cultivation and plowing should be twice as deep with soil of this character as is necessary with normal soils.

The application of heavy dressings of manure is found to be very beneficial where the alkali is present in comparatively small quantities, but the best way of all to combat the bad effects of alkali is to remove the cause, by irrigation and underdrainage. Where there is good natural drainage irrigation is all that is required, but this is not often the case, especially if black alkali has to be dealt with. The water supplied washes the alkali down into the subsoil and where there is good drainage it is carried away in the drainage water. If the drainage is bad, however, the water will only descend a few feet and ascend again as soon as the surface soil becomes dry and bring with it the alkali that it washed down, plus any there may have been present in the lower layers of soil with the result that the alkali is worse than ever.

If the land is not well drained naturally and if underdrains cannot be put in on account of the expense, irrigation water should be used in as limited amounts as possible and every effort should be taken to prevent evaporation by keeping the land under crop and maintaining the dust mulch.—From the Canadian Countryman.



Drainage should accompany irrigation. Irrigated orchard affected with alkali. Note the poor condition of the trees.



The same orchard after tile drains had been put in to carry off the used irrigation water. Note difference in trees.

Twenty School Lunches.

To give children variety in their lunches the following suggestions are made:

1. Graham bread with cream cheese. Four large stuffed dates.

2. Two baking powder biscuits with honey. Two snow apples.

3. White bread with cold lamb. Two oatmeal cookies.

4. Eight small crisp crackers with peanut butter. Four stuffed prunes.

5. Graham bread and lettuce sandwich. Twelve salted almonds.

6. White bread with roast beef. One orange.

7. Rye flour muffins. American dairy cheese. White grapes.

8. Boston brown bread with boiled halibut and French dressing. Two sugar cookies.

9. White bread with chopped eggs. Two big figs.

10—Graham bread with cold chicken. One banana.

11. White bread with currant jelly. Twelve English walnut meats.

12. Graham biscuits with bits of cold thin sliced steak. One-half-inch cube maple sugar.

13. White bread with quince marmalade. Fifteen filberts. One orange.

14—Boston brown bread with pimiento cheese. Ten dates stoned and rolled in sugar.

15—Biscuit with sardines and lettuce. One frosted cup cake.

16. White bread with chopped nuts. One cruller.

17. Sandwich made with one slice of Graham and one slice white bread spread with blackberry jelly. One apple.

18. Cornbread with shredded herring. Two molasses cookies.

19. White bread with crisp bacon. One celery heart. Two chocolate marshmallows.

20. Boston brown bread with shaved maple sugar. One small popcorn ball. One tangerine.—Woman's Home Companion.

DOAN'S KIDNEY

Relieve The Kidneys and
Like Ordinary Medicine
Do The Bowels.

When the kidneys get out of orde back is sure to become affected, and pains, sharp pains, quick twinges point to the fact that the kidneys attention.

Plasters and liniments will not cure the kidneys, for they cannot get to the seat of the trouble, but Doan's Kidney Pills do, and cure the kidneys quickly and permanently.

Mrs. Lizzie Melanson, Plympton, N.S., writes: "I am sending this testimonial telling you what a wonderful cure Doan's Kidney Pills made for me. For years I had suffered so with my kidneys I could hardly do my housework. I used several kinds of pills, but none of them seemed to be doing me any good. At last I was advised to try a box of Doan's Kidney Pills. When I had taken the first box I found relief. I have used five boxes, and to-day I feel like a new woman. I cannot recommend them too highly."

Doan's Kidney Pills are 50c. per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

Bradstreet's Trade Review.

Toronto conditions in trade and manufacturing circles are solid. The majority of manufacturing establishments are busy. There is an imperative need for labor. Trade conditions are healthy and while a few commercial casualties have occurred the financial position of the majority of Toronto wholesale firms is secure, in some cases flourishing. Orders are liberal in dry goods houses, some large establishments reporting a heavy clean up of stocks during the past few weeks right up to date. Heads of firms state that there is no present indication that prices will recede. Boot and shoe firms are doing well. New contracts are seldom placed without an addition to prices, but the trade takes them. The grocery trade keeps apace with former favorable weeks. Seasonable hardware continues to move from local houses in encouraging volume.

Montreal—Some of the larger steel, construction, textile and leather concerns have done a phenomenal volume of business during the past few months and at substantial profits, and orders ahead promise a continuance of remunerative operations during the current year. During the past few days wholesale business in seasonable merchandise and commodities has kept up at an encouraging rate. Sorting orders continue to come to dry goods houses in fair volume.

Winnipeg—All grains taken into consideration, the new crop, under favorable conditions, will not greatly yield below last year. The wheat yield will be much less, but the planting of coarse grains will largely make up for this shortage. Meanwhile business keeps up to the normal, wholesale and retail firms reporting a fair volume of trade.

Calgary—Trade is fairly active, the movement of general merchandise including dry goods, groceries and hardware, to country points being fairly heavy.

Vancouver—While general business is not active, it shows improvement over 1915 at this time. Goods of all descriptions, chiefly staples, continue to go up coast and to interior points.

Hamilton—There is a healthy tone to trade, both for local and country account. Seasonable lines of dry-goods have been ordered in normal volume, according to representatives located there. With busy factories public buying power is undiminished. Bank clearings continue to be an index of favorable conditions.

London—Outside trade keeps up.

Quebec—The volume of business done is fully up to expectation, dry goods, groceries, provisions, all report favorably. The hardware and building trades are very active. Shoe manufacturers are well employed. In the city retailers report favorably. City and country remittances are fairly good at the season.

Bits About Beasts.

You think you know something about animals, eh? Well, let us put your knowledge to a few simple tests.

Frogs, to begin with. Can they breathe with their mouths shut? Certainly they can. As a matter of fact, they always do. If they kept their mouths open they would suffocate.

Next, hares. When do they close their eyes? Answer, never. You see, they haven't any eyelids, so they can't. But they have a thin membrane, which performs the service of eyelids when they are asleep.

What is the color of a horse's eyebrows? That's a difficult one. Think hard and then learn that a horse hasn't any eyebrows.

You may like to know in addition, that turtles and tortoises have no teeth; that parrots, unlike the majority of birds, can move both mandibles of their beaks, and that fishes never masticate. They simply haven't time between breaths.—London Answers.

Life has a thousand exits, but none is swifter or surer than changing seats in a canoe when you cannot swim the distance to shore.—Louisville Courier-Journal.

CONSTIPATION

Is Productive Of More Ill Health Than Anything Else.

If the truth was only known you would find that over one half of the ills of life are caused by allowing the bowels to get into a constipated condition, and the sole cause of constipation is an inactive liver, and unless the liver is kept active you may rest assured that headaches, jaundice, heartburn, piles, floating specks before the eyes, a feeling as if you were going to faint, or catarrh of the stomach will follow the wrong action of this, one of the most important organs of the body.

Keep the liver active and working properly by the use of Milburn's Laxa-Liver Pills.

Miss Rose Babineau, Amherst, N.S., writes: "Having been troubled for years with constipation, and trying various so-called remedies, which did me no good whatever, I was persuaded to try Milburn's Laxa-Liver Pills. I have found them most beneficial, for they are indeed a splendid pill. I can heartily recommend them to all who suffer from constipation."

Milburn's Laxa-Liver Pills are 25c a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The Buffalo News asserts that the American flag is not the banner of a belligerent nation, but the emblem of liberty and peace. Liberty to stand aside while others fight that freedom may not be banished from the earth; and peace with profits.—Simcoe Reformer.

OUR WESTERN LETTER

Written for The Telescope
By An Old Brant Boy

This so far has been a very backward Spring. In February it suddenly warmed up after an exceptionally cold winter, our sleighing all went in a hurry and it looked like Spring with a capital S. That lasted some two or three weeks, then it lapsed into winter again, since then we have had a mixture of winter and early fall weather. Fall rye and wheat have made no more growth than spring grain and it has practically made none.

This is certainly the kind of year to make a newcomer feel discouraged although this is the beginning of June there is practically no pasture. It has been too cold for grass to grow.

It will soon be time for the irrepressible crop estimator to begin his funny work. Reports will soon begin to appear in the papers from every district along these lines: "Crops look splendid, Wheat will yield 85, oats 150 and barley 80 bushels to the acre in this district." Then after the grain is threshed we will get the Government statistics which will show the average yield from the Province as: Wheat 15 bu., oats 30, barley 20 bu. per acre. Where are the crops grown that pull down the average?

One beauty about the West is you don't have to wait for the frost to be out of the ground to start plowing. As soon as the frost is out as deep as you wish to plow you get after it. The roads do not get quite impassable here in the spring as in Ontario. The frost keeps slipping out gradually and you don't know when it is gone.

LATER

The weather still remains wet and cold, in a month we should be ready for Timothy Hay harvest. At present you couldn't cut the hay with a barber's clippers. We have never seen such a backward Spring as this in the West. But you will be surprised what a few days warm sun will do and we are not down-hearted. Lots of people here are kicking themselves that they didn't stay with hogs. A year ago last fall when grain went up and hogs went down, the usual cold foot brigade got busy and sold out everything that had a squeal. The man that stayed with the porker, is the man with the broad smile these days. This is a fine place of country. We have not the draw-backs of the open prairie or the heavy timber. We have lots of wood and water, plenty of pasture and fine land for growing grain. For two years we have grown good corn for ensilage.

We have never been able to make out where the Peace River County gets its salubrious climate from. It is situated 50 miles north of Edmonton and from newspaper reports they grow bananas and pine-apples up there. We are 100 miles south of Edmonton and it keeps us hustling to get green tomatoes for pickles.

OUR OTTAWA LETTER

By H. F. G.

Ottawa, June 17th.—It seems the hard fate of this coutry to balance its glory abroad with wholesale brigandage at home. While our officers and men are dying bravely in France and other stricken fields of Europe, the gang of looters stay behind in Canada and squeezes the crisis for its last dollar. In other words, our brave soldiers bleed for their country, but the profiteers bleed it and then trust to the general excitement caused by the war to wash out the guilty stains.

The concluding sessions of the Duff-Meredith Commission were as notable for the matters ruled out as for the evidence put in. Particularly was this the case with Mr. Carvell's request to submit evidence in regard to the completed shells, of which the fuses, made by Allison's pet companies in the United States, were only a part. This evidence was not allowed to go in because it was outside the limits of the inquiry, said limits having been carefully ordained by the government with a view to isolating the danger zone opened up by the Kyte charges. However, Mr. Carvell has this information under his hand and will probably spring it at the next session of parliament or some other ripe occasion. There is enough of it to provide material for another Royal Commission.

According to disinterested observers, the Kyte charges have been more than proved. The member for Richmond, N. S., did not go into much except the fuse contracts, so that all that has been disclosed with regard to the "contractual relations" of the old Shell Committee, the thirty-one million dollar melon, and Colonel Carnegie's enterprise in waving back Canadian manufacturers who wanted to make fuses, is, so to speak, extra measure.

Moreover, Colonel Carnegie's judgment as a ballistic expert has been challenged by a number of witnesses, particularly by Mr. Hathaway, of the Northern Electric Company, one of the Canadian companies turned down when it offered to make fuses in Canada. According to Colonel Carnegie, the loading of the fuses was an intricate and difficult job, which almost needed a skilled watchmaker to do it, but according to Mr. Hathaway, the British Munitions Company of Montreal, which is one of the contingent activities of the new Imperial Munitions Board, is now loading fuses without experiencing any trouble and finds an expert unnecessary. A little ordinary gumption does the trick.

Mr. Wilfred Ohmer, of Dayton, Ohio, was another interesting witness whose statements clashed with Colonel Carnegie's on the matter of time fuses. Mr. Ohmer's company is making two million five hundred thousand fuses for the Canada Car Company, which has a big contract from the Russian Government. Mr. Ohmer's offer to make fuses for the old Shell Committee was brushed aside by Col. Carnegie on the ground that he couldn't make them quick enough. "Urgency of delivery" was the way the Colonel put it in his precise English. As Mr. Ohmer's company has already delivered over a million of these fuses to the Canada Car Company, and Colonel John Wesley Allison's pet fuse companies only started to deliver some two months ago, it looks as if Colonel Allison guessed wrong when he picked the International Arms and Fuse Company and the American Ammunition Company as urgent deliverers. Far from crowding the fuses on the Shell Committee, these two companies were five months behind in deliveries. Most of the urgency, we take it, came from Colonel Carnegie himself, who likes to write admonishing letters. No doubt Colonel Carnegie acted under instructions, but as he has a great habit of claiming the credit for the Shell Committee's good work it is only fair that he should be awarded some of the responsibility for slow performance.

Another of Mr. Ohmer's statements worth remembering is that time fuses of the British type could be and are now being produced in large quantities at $3.25 per fuse. This is one dollar and a quarter less per fuse than the American Ammunition Company is making them for now. Since the Kyte charges were made the price on the graze fuse was trimmed a dollar and a quarter per fuse, but even at that the American Ammunition Company, which has an order for one million six hundred and sixty-six thousand of these fuses, is making sufficient to pay a graft commission to Allison, Yoakum, etc., etc., of one million dollars. The explanation is, of course, that Colonel John Wesley Allison was the negotiator.

Judges, lawyers, witnesses, sundry expenses of one kind and another, the Duff-Meredith Commission is costing considerable each day. What proportion of the people of Canada will have to pay remains to be seen. But the evidence which has uncovered the jaunty way the profiteers handled millions of graft is well worth the money. At its last gasp Sir Sam's lawyers importuned the Commission either to gag George Kyte, who was presumably telling the sad, bad story to the electors of Nova Scotia, or else drag him before the Commission and put him on oath. The Commission very properly refused to abet any such course, no doubt considering that the worst Mr. Kyte could tell the Nova Scotians would make the evidence no blacker.

TELESCOPE LETTER BOX

LETTER FROM ENGLAND

Crown Attorney Thos. Dixon received a letter last week from a cousin in England which gives some interesting information in regard to every day conditions in England just now:

Lilburn Cottage,
West Lilburn,
Alnwick,
May 29th, 1916.

My Dear Cousin:—

We are having very fine summer weather now. The early part of the month was cold and wet, our country is looking beautiful with the trees almost in full leaf and so many shades of colour.

Up to the present we have not heard anything of Elliott. I suppose he will be somewhere about Salisbury Plain, and will not think of coming this far at present, and their duties will be heavy in training for active service at the Front. The fighting has been very severe in France for some time past. I think the Germans are feeling the pinch now but, of course, they cannot give in till they are fairly beaten. It is fearful to think of so many young and valuable lives sacrificed without just cause, and surely there was no just cause in this war except German ambition and greed.

Food of all kinds in this country is now very dear, beef and mutton is 14d. per pound, for ordinary kinds steak 18d. No one ever saw cattle and sheep make such prices. Fat bullocks £45 to £50 and sheep without their wool 80s. to 90s. We are paying more than you for sugar. I got a hundred weight (112 lbs.) a short time ago from Glasgow, pure cane and paid £2 3s. We used to get the same for 18s. Tea is still moderate, 2s 4d. per lb. for good and down to 1s. 4d. Currants and raisins are very dear, but they are a luxury that can be done without if need be. Flour is also very dear, 3s. per stone. Money is very plentiful as wages are very high.

Our Government appointed a Home-grown Timber Committee some time ago to purchase and cut up timber for government use and as labour is so scarce, I see they have imported a large number of tree fellers from Canada, some 1500 are either come already or are coming. I believe they are from Quebec. I sold some very large Scots pine to their Agent the other day, trees that contain up to 90 cubic feet measurement. But whether they will send Canadians to fell them I do not know, men cannot very well be got here. They have got other lots in this neighbourhood. They are giving a much better price than the local timber merchants.

We have a very good prospect for a fall fruit crop of all kinds, and as the blooming is late we may expect to keep clear of frost. We sometimes have frost to do harm later than this.

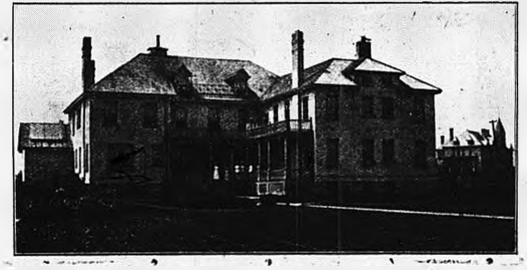
I think Canada has done marvellously well to raise such a large army to send over here. We have got a military conscription bill passed but I think Britain has done well by raising over five millions voluntary.

We have tribunals here for serving in the army. I am a member of the Local Tribunal for this district which takes up a good deal of time as this district is a wide one.

+ + +

LIEUT. LESLIE YOUNG

Lieut. Leslie Young, son of Thos. Young, Cargill, writes Mrs. E. J. Shelton that on the breaking up of the 71st Batt. he was transferred to the 40th. I have been to London, he writes, and to Portsmouth and have stood on the deck of the Victory on the very spot where died the immortal Nelson. I saw his monument on Trafalgar Square. There is an officer in this corps who is a brother of K. M. Taylor of the Merchants, so you may tell him he is well. I think him the right sort. Fit to be a brother of K. M. We are taking very advanced work just now, preparatory to going out, and it is much more interesting than drill. I really like war but am sick of it since they broke up the 71st. I lost all my platoon. Most of them went to the Seventy-first Highlanders.



COUNTY OF BRUCE GENERAL HOSPITAL

WALKERTON - ONTARIO

The financial statement of the Bruce County General Hospital for the year ending May 31st, shows total receipts of $7,617.16, and total expenditure of $9,284.00, leaving a deficit for the year of $2,260.00. While there was an increase in patients' fees of $600.00 during the year, assistance from Women's Hospital Aids fell back almost that much, and various items of expenditure showed an increase owing to the rise in current prices of supplies. The biggest demand on the resources of the hospital is the maintenance of free patients. This item alone amounted to $3,100.31. If this item were covered by the County, and municipalities as it should be, the Hospital Board's financial problem would be largely solved. But the County contributed last year only $1,500.00, while free patients from the County cost twice this amount. The County took a step in the right direction at the June Session when it increased the grant to $2,000.00. Possibly they will go the "full shot" next year. Walkerton Town Council would also do well to increase its grant of $100.00.

The Board of Trustees of the County Hospital is composed of the following gentlemen:—President, David Traill, Hardware Merchant, Walkerton, 1st Vice-Pres., A. B. McNab, Warden of Bruce; 2nd Vice-Pres., F. W. Lippert, Mayor of Walkerton; Sec.-Treas., H. M. Ley, Manager of the Canadian Bank of Commerce, Walkerton. R. E. Truax, M. P., Manufacturer, David Robertson, K. C., S. W. Vogan, Merchant, Walkerton; L. C. Benton, Mgr. Can. Furniture Mfrs., Walkerton, Andrew Oberle, Drover and Exporter, Walkerton; J. J. Schumacher, Mgr. Farmers' Central Mutual Fire Insurance Company, Walkerton; Norman Robertson County Treasurer K. M. Taylor, Mgr. Merchants Bank, Walkerton; Geo. D. McKay, Insurance, Walkerton; H. Pletsch, Walkerton Flour Mills.

Lady Superintendent, Miss Margaret Thirsk.

"GABE" IN FRANCE

Contractor Alex. Haas received the following letter last week from his son, Gabriel, who went over with the 34th:—

Le Havre, France,
May 28th, 1916.

Dear Father:

Well, Dad, we landed in France all O. K. and expect to be in the trenches about two weeks from now. All the Walkerton boys are over with us, that is those that came over in the 34th and were drafted to West Sandling. I met Frank Schefter on the docks, he came over in the same boat as I did and is in the same Camp. I am in good health and so are the rest of the boys except Spegel, he has a bad cold. Your letters from now will be short and sweet, you don't get much time for writing and there is not much to write about. We marched to a little town near camp this morning and went to Mass in a French church. Tell Frankie my new address and tell him to drop us a line. I have lots of socks and when I need some I will let you know a while ahead. Love to all, I remain

Your loving son,
Gabriel.

Pte. Gabriel Haas,
602714, 2nd Batt., 1st Brigade,
1st Canadian Division,
C. E. F., France.

The average cost of each patient per day at the Bruce County Hospital last year was $1.54.

Adam McGill, a well-known resident of Paisley, passed away in Galt Hospital, on June 19th, aged 65 years.

Mr. Oscar E. Seegmiller, son of Mr. Adam Seegmiller, was among the successful candidates for the degree of Bachelor of Pharmacy, and is now a full-fledged Phm. B.

A Complete Car in Every Particular
And It's a Car You Will Be Proud to Own

It's the first complete car at anywhere near so low a price.

It stands out alone—boldly—unapproached—a powerful five-passenger touring car complete for only $850.

Note that word "complete."

That means Electric Starter, Electric Lights, Electric Horn, Magnetic Speedometer—in fact, every necessary item. Nothing is lacking. There are no extras to buy.

Note that it is not a small car. The wheelbase is 104 inches. The tires are four-inch size—many cars costing more have smaller tires.

And it is a perfect beauty—snappy, stylish, speedy.

In every way it's a car you will be proud to own and ride in.

No wonder there's a rush to possess the car the world has been waiting for.

Don't delay—see us at once and talk it over.

The Hackneyed Old Phrase

Now Is the Time To Advertise

HAS special pertinence just now. It is in time of prosperity that money is made. As a result of big crops, demand for war munitions, etc., the country has reached a high stage of prosperity. There is plenty of money in circulation and the people are in a mood to buy liberally.

In such times as these advertising pays more generously than ever. The people are hopeful and confident, disposed to anticipate their wants, to buy the best qualities, and to purchase things they would not have felt they could afford a year ago:

Merchants ought to be able to double their trade under these conditions. But they can't get it by waiting for it. They must attract more attention; take a little more newspaper space, describe their goods a little more fully. A great deal of money will be spent in the next six months, the bulk of it with those dealers who court the most publicity.

POETS' CORNER

THE THINGS THAT MAKE A SOLDIER GREAT

(By Edgar A. Guest in the Detroit Free Press)

The things that make a soldier great and send him out to die,
To face the flaming cannon's mouth, nor ever question why,
Are lilacs by a little porch, the row of tulips red,
The peonies and the pansies too, the old petunia bed,
The grass plot where his children play, the roses on the wall,
'Tis these that make a soldier great —he's fighting for them all.

'Tis not the pomp and pride of kings that make a soldier brave,
'Tis not allegiance to the flag that over him may wave,
For soldiers never fight so well on land or on the foam
As when behind the cause they see the little place called 'home.'
Endanger but the humble street whereon his children run,
You make a soldier of the man who never bore a gun.

What is it through the battle smoke the valiant soldier sees?
The little garden far away, the budding apple trees
The little patch of ground back there, the children at their play,
Perhaps a tiny mound behind the simple church of gray.
The golden thread of courage isn't linked to castle dome,
But to the spot, where'er it be—the humble spot called 'home.'

And now the lilacs bud again and all is lovely there,
And homesick soldiers far away know spring is in the air;
The tulips come to bloom again, the grass once more is green,
And every man can see the spot where all his joys have been.
He sees his children smile at him—he hears the bugle call,
And only death can stop him now—he's fighting for them all.

News About Town

A Beekeepers' Field Day will be held at James Noore's, Greenock, on Wednesday, June 28th at 1.30 p.m.

Eldon Lewis, B. A., secured Specialist standing in the teacher's examinations at Faculty of Education. Eldon is a Walkerton boy, but is well known in Hanover as he played lacrosse for Hanover on a number of occasions. He is a capital sportsman and a very decent chap.—Hanover Post.

Granted Citizenship

Mr. Justice Clute granted citizenship papers at High Court here recently to the following: — Louis Yaeck, George Eckel, and Franz Michel of Walkerton, Alvina Ziegler, Albert E. Ziegler, John Schneider, Anthony Schneider, Ernest Stroeder, and Leopold Bublitzen of Mildmay, and Joseph Anstett of Cargill. The above were nearly all former citizens of the United States. Eighteen applications from persons who are former residents of Germany, were adjourned to the next High Court sittings on November 7th.

+ + +

Thomson-McIntyre.

The home of Mr. and Mrs. David Thomson, Brant, was the scene of a pretty but quiet wedding at high noon Saturday, June 10th, when their daughter, Selina Emmaline, was married to Alexander McIntyre, in the presence of immediate relatives by the Rev. Thos. Wilson of Knox church, Walkerton. Miss Florence Brocklebank, niece of the bride played the wedding march. The bride wore ivory crepe de chene and Georgette crepe, and her little niece as flower girl in white silk. After luncheon had been served Mr. and Mrs. McIntyre left on the afternoon train, the bride travelling in a tailored suit of navy blue with hat to match.

+ + +

Pretty Church Wedding

A pretty wedding took place at the Lutheran Church, on Wednesday afternoon, June 15th at 2.30 oclock, when Miss Margaret Hossfeld, daughter of Mr. and Mrs. George Hossfeld, was united in marriage to Mr. Henry Hamel, a prosperous young farmer of Bentinck. The ceremony was performed by Rev. Mr. Mosig in the presence of a large company of guests. The bride was assisted by Miss Lillie Hamel, sister of the groom, the bride's brother, Mr. John Hossfeld acting as best man. Little Miss Melinda Hossfeld made a very pretty flower girl. The wedding march from Lohengrin was played by Miss Hilda Hamel. The bride was prettily gowned in white silk draped with ninon, carrying a boquet of white carnations. The bridesmaid wore a white voile gown and carried pink roses, and the little flower girl, cream net over silk taffeta with a boquet of pink carnations. Afterwards a reception was held at the home of the bride's parents, the evening being enjoyably spent in music, games and dancing. Guests were present from Berlin, Waterloo, Chesley, Hanover, Mildmay and Walkerton. On Friday morning the happy couple motored to Berlin and Stratford. From there they were to take the train for Detroit, Toledo and other points. On their return from their honeymoon. Mr. and Mrs. Hamel will reside on their farm near Hanover in Bentinck.

Mr. Robert Walton, son-in-law of Rev. J. W. Sanderson, has been given an important promotion in the C. P. R. service. Mr. Walton is now Master Mechanic for the district east of Toronto. The position carries big responsibility and a substantial increase in salary.

+ + +

Judgment Upheld

Chief Justice Falconbridge upheld Judge Klein's decision in the appeal of P. Stroh and Mary Stroh of Carrick re Hopf Estate at Osgoode Hall last week. In giving judgement His Lordship said: —

The payment of this money by executor to his wife without any notice to the beneficiaries was most ill-advised and improper, and even harsher adjectives might appropriately be used. The first notice which the other parties interested had of the payment was by seeing the item in the executor's accounts. If I were concerned with the appeal on the merits of Mary Stroh's claim I would say that I would entirely agree with the findings of the Judge and he had the additional advantage of seeing the witnesses. The alleged rejection of evidence consists in the very proper refusal of the Judge to reopen the case and allow fresh evidence to be adduced under circumstances which would not at all have justified him in so doing, according to the well settled practice of the court. Appeal dismissed, with costs to be paid out of the share of Mary Stroh. The order to be without prejudice to right of Mary Stroh to take such proceedings as she may be advised to enforce her alleged claim on the estate.

W. C. T. U. CONVENTION

Members of County Union Met in Knox Church, Walkerton During the Past Week. — Presentation to Mrs. Stauffer.

The Bruce County W. C. T. U. Convention held here last week proved a most helpful and enjoyable one. The County workers were well represented and the reports and discussions full of interest. Mrs. Pogsley of Toronto, who has been Law & Legislative Supt for the Province for many years was the Convention Speaker, and also conducted a School of Methods in her own able manner. Mrs. Ashcroft of Wiarton, the President, did credit to the office and conducted the sessions with real executive ability. The business was interspersed by music, furnished by local talent. Among the other resolutions was one of appreciation of the kindness of the entertaining union. The following officers were elected: — Mrs. Ashcroft Hunder Vale; 1st Vice-Pres. Mrs. Putman of Paisley; 2nd Vice-Pres. Mrs Wm. Halliday, Chesley; Rec.-sec. Miss Smellie of Chesley; Corr-Sec. Mrs. Chapman of Wiarton; Treas. Mrs. Moore of Teeswater.

On Thursday night the union was addressed by Mayor F. W. Lippert, who gave the Ladies a hearty welcome to Walkerton, and by Mr. L. C. Benton, County President, of the Citizens Committee of One Hundred. Rev. Mr. Wilson, occupied the chair. A pleasing feature was the presentation to the local President. Mrs. Stauffer of a life membership certificate by the local and county unions. Mrs. Stauffer who is probably the oldest, as well as one of the most valued workers in the county was also presented with a beautiful bouquet. Life membership certificate was presented to Mrs. S. A. Rife the gift of Mrs. Stauffer, and to two Port Elgin ladies, Mrs Shier and Mrs Christian. One of the most interesting features was the gold medal contest. The contestants were Miss Bradley of Teeswater, Miss Florence Cunningham, and Bessie Farewell of Walkerton, All the contestants did splendidly, the gold medal being awarded to Miss Cunningham. The judges were Mrs. Ashcroft, Mrs. VanSlyke of Port Elgin and Principal Willoughby. Miss Hazel Irwin gave a splendid recitation and pleasing solos were given by Miss Ryan, of Bracebridge, Miss Pryne, Mr. Gus Royce. Rally Song, composed by Mrs. Moore of Teeswater, was sung by Misses Vera Dippel and Cora Rife, the Chorus and pretty flag drill being well taken by twelve little girls.

The County report on Red Cross Work showed that the Union had raised over a hundred dollars for the soup and chocolate funds. This money goes to carry on service of the W. C. T. U's representatives at the Front who dispense hot soup and hot chocolate to the boys in the trenches.

REV. D. A. WALKER, B.A.

Will say farewell to the Walkerton Methodist Congregation next Sunday. During his four years here, Mr. Walker has shown himself not only a gifted preacher, and devoted pastor, but a good all-round citizen. In recruiting or patriotic work, social and moral reform, or from whatever quarter, the call for service in the best interests of the community came, he served unsparingly. Mr. Walker won a warm place in the hearts of his congregation and those who know him best, predict for this young man in the Ministry a life of great usefulness.

THE BOYS OF THE 71ST

Badly Disappointed That Military Necessity Caused Breaking Up of Battalion—Poem by Young Cargill Officer Shows How Boys Idolized Their Colonel

The letters received here by parents and friends from our boys of the 71st all show the keen disappointment which they felt that their Battalion must be broken up, and lose its identity, to reinforce other units at the Front. Readers may learn something of the esprit de corps of the 71st and the way the boys looked up to their commanding officer by the following little poem, written some months ago by a Cargill boy, Lieut. Leslie Young, and now published for the first time: —

THE COLONEL

A man that can fight, a fighter who's fought,
A man to whom danger to self counts for nought,
A man all the way with a conduct sheet clean,
A man: Colonel Sutherland, that's whom I mean.

As a man and a soldier our colonel's beloved
And admired by those among whom he has moved:
Admired, beloved, yet regarded with awe,
A man and a soldier, sans blemish or flaw.

A man and a soldier, man stamped on his face;
As a soldier, his record decades wont efface.
Insignificant lowly and humble I feel,
When I look on his manhood, his grey eyes of steel.

Today Canada's proud of the sons that she bore,
Proud as she is of her heroes of yore.
Proud of the man who will stick with the game,
Proud of the soldier upholding her fame.
In but six of His days, God, created all earth,
Saved himself but the seventh to rest from His work,
And while resting from care on the seventh He planned
The man of the stamp of the Sutherland clan;
He moulded and made them and placed them on earth,
And the best of them all leads the SEVENTY-FIRST.

S. L. YOUNG.

BRANT TP. COUNCIL

The municipal council of the township of Brant, met at the township hall, Monday the 12th day of June. Members all present. Minutes of last meeting read and declared correct.

Rowand—Johnston: That this council hereby authorise the treasurer of this township, Fred Jacklin, to draw from the reserve fund in the Royal Bank at Cargill, the sum of $2500.00 from time to time as required. Carried.

Johnston —Rowand: That John Whitehead be appointed a Director on the District Board of Agriculture of South Bruce for the ensuing year.

Rowand—Weir: That the clerk be instructed to write Mr. Herman Gruetzner requesting him to cease removing sand near the road south of the Maple Hill Bridge as it is endangering the roadway. Carried.

Johnston—Gregg: That the Reeve and Deputy Reeve be authorized to procure legal advice as to the advisability of asking the county judge to decide as to the responsibility of the county for the maintainence and repair of the bridge over the Saugeen River on the 6th concession of the township of Brant. Carried.

Rowand—Weir: That the Reeve and clerk issue orders on the treasurer for all accounts passed at this meeting of council. Carried.

viz. as follows:

Thos. Pryor, breaking road, $1.50; J. V. Reilly, hauling tile and putting in culvert, $4.00; Jas. Reilly, fixing culvert, 2 yds. of gravel, $8.00; Chris. Pegelo, grading and drawing tile, $19.85; Wm. Leckie, cement tile $12.80; Fred Jacklin, salary as treasurer to July 1st., 1916, $25.00; M. A. McCallum, half year salary, postage and telephoning, $103.40; R. S. Nesbitt, council meeting, $3.70; A. Weir, council meeting, $3.70; W. A. Rowand, council meeting, $2.85; Wm. Johnston, council meeting, $3.30 D. W. Gregg, council meeting, $3.60.

Rowand—Weir: That this council do now adjourn to meet on Monday the 10th day of July, for the transaction of general business. Carried.

M. A. McCallum,
Clerk.

Can You Beat It?

The law has some strange conflictions. According to Statute the clerk of the Peace must keep the list of empaneled jurors under lock and key, and only open it to the public view six days before court sittings. At the same time, we have the sheriff's formal notice to the public that he will be at the County Clerk's office to draft the panels of jurors on June 22nd at 10 a. m. The law in one breath, orders the list locked up where no one can see it, and in the next, writes everybody to come and have a look.

No warping, bulging or breaking at the centre of heat—the strain is taken up by the two-piece fire-pot which permits no ashes to cling or clog.

McClary's Sunshine Furnace

Let me show you the special features of the Sunshine that help to effect that economy in fuel for which it is noted.

AN EVIL HERITAGE

CHAPTER I.

Dinner was over in 31 Laurel road, and the three ladies of the party were waiting for the lamp in the drawing-room, while the one gentleman still sat over his claret in solitary state.

It was a good-sized drawing-room; one of those London rooms which have once upon a time been divided by folding-doors into a back and front parlor, as is proclaimed by the two fire-places, and by the heavy beams separating from each other two ceilings, which neither in color nor design are even distantly related. The furniture solid, but well-worn; most of the wood mahogany, and all the carpets Brussels. The ornaments respectable, but scarcely ornamental, and certainly not according to the spirit of the day. Bouquets of wax flowers under glass, photograph album symmetrically disposed on a table, and not so much as a peacock's feather or a Japanese screen between the four walls.

One of the fire-places was filled with pink and white paper shavings, in what used to be the most approved fashion; the other—the one placed in what had once upon a time been the back parlor—emitted a moderate red glow, very grateful on this chilly evening of early May to the three people assembled near it.

On the long, low fender-stool, with her hands clasped round her knees, with half of her brown head in the firelight, and the other half in the fading daylight, Marian was sitting immovable. From her place she could just see the outline of the stunted laburnum, which was the pride of the back garden, sharply cut against the sky. Often in after-days she would remember this evening, or—to speak more truly—she never forgot it, for this was the evening on which—as she put it to herself—"it all began"; and whenever her memory travelled back to this point she always found herself staring again in spirit at the laburnum and counting the crossings and recrossings of the tiny twigs, while she listened more or less inattentively to the conversation of her two elderly maiden aunts, and while they all three waited for the entrance of Jemima with the lamp.

The Misses Honoria and Valeria Hilton were by no means fixtures in Laurel Road, nothing more than birds of passage up for their annual spring shopping, on which occasions it was undoubtedly very convenient to possess a brother-in-law in London, who again possessed a spare room, even although this particular bit of the neighborhood of Regent's Park was in some respects almost as peacefully slumbrous as the little country town of Accringdon, in which they spent the bulk of their uneventful days.

"And was it from the newspapers only that your father learned his cousin's death?"

Miss Valeria had to repeat her question twice before she succeeded in attracting Marian's attention.

"The newspapers? Oh, no; it was Bernard himself who wrote and announced his father's death."

"Dear me, wasn't that very nice of Bernard, considering the coolness between the two branches of the family?"

Marian laughed a little.

"Oh, but Bernard never went in for coolness. He struck out his own line about that when he was thirteen, and I quite a little girl. I have told you about his visits."

"But he hasn't visited you of late years?"

"No; I suppose his father stopped it."

"Well, his father is gone now, so, unless his head is turned by his accession to power, there is no saying whether he may not resume his visits. He is the only son, is he not?"

"The only son."

"Good gracious! he will be quite ridiculously rich. Thornton is a huge place, I believe, and then there is the West Indian estate. I do hope at least that he is worthier of his fortune than his father was. What sort of a young man is he, Marian?"

"He was scarcely a young man at all when I saw him last," said Marian, resting her chin upon her clasped hands and staring straight into the flames. "I suppose he was about eighteen or so, but I know that his visits used to be so—so refreshing I think I should call it; even mamma looked forward to them. Somehow he used to wake us all up."

"There is Jemima with the lamp," interrupted Miss Valeria. "Jemima, has the evening post come yet? I am expecting a small parcel from home."

"The post has come, ma'am, but there was no parcel; just one letter for the captain."

"My mosaic brooch!" moaned Miss Valeria, as the door closed on Jemima. "I am perfectly certain that I left it lying on the dressing-table this morning. If that fool of a girl had despatched it by the midday post I should have it now."

Marian raised a warning finger. "Take care, Aunt Val! Where are your resolutions of taking things easy? You'll never get plump at this rate."

"I suppose not," acquiesced Miss Valeria, sinking back in her chair with a sigh.

The short silence that followed was broken by Miss Honoria. "I wish," observed this lady, speaking for the first time, "I really wish that I hadn't eaten any of that pudding."

"Dear me, Aunt Hon, why not?" asked Marian, somewhat startled.

"It is too nourishing; I am quite sure it is too nourishing. I have been thinking about it, and I cannot imagine what made me take it; I who am as a rule so particular about my diet. I quite dread getting weighed next week; there is sure to be an increase."

"Is there! Then I wish I had taken a second helping," said Miss Valeria, regretfully. "I never noticed the pudding; my mind was too much taken up with my mosaic brooch."

"What a pity it is," remarked Marian, "that it wasn't Aunt Hon who left her brooch on the dressing-table! Perhaps the anxiety of the loss might have worried her down a pound or two."

The corners of Marian's mouth twitched as she spoke. Since the days of her babyhood her two aunts—the fat one whose ambition it was to grow thin, and the thin one whose dream was plumpness—had afforded her most excellent amusement.

"I am afraid it would take more than a brooch to worry even half a pound off me," said Miss Honoria, with a good-natured laugh. "I am always telling Val that plumpness is more a matter of temper than of food (and yet I wish I hadn't taken any of that pudding!); I can't help taking things easy, the Lord knows it, since He made me that way."

"Why, there is the dining-room door already!" remarked Marian. "Surely father is very early to-night."

A quick but halting step was heard to cross the passage, and in another minute a small, elderly gentleman, with square military shoulders and a decided limp in his left leg, stumped into the room.

"Tired of your own society already?" inquired Miss Valeria.

"Is this in our honor, James?" asked Miss Honoria, smiling her broadest smile.

"Eh? What? Honor? Who is talking of honor?" was Captain Berrincott's somewhat testy reply. "It's a question of light, not honor. The lamp over there seems a trifle dull to-night, and this letter here is the very deuce to decipher; I'm going to have a try at it here. There seems to be some mistake—let me see, where had I got to?"

It was now only that Marian perceived that her father was holding in his hand an open letter which he approached more closely to the lamp.

"Eh? What's it all about? Mr. Parker? Lot 13? I don't believe a word of it."

"Who is Mr. Parker and what is Lot 13?" inquired Miss Valeria sotto voce of her niece. "My dear Marian, something has evidently happened; I have never seen your father so completely off his balance."

"Mr. Parker is Uncle Simon's man of business, and Lot 13—let me see—Lot 13, I think, is the name of the West Indian estate; but I don't understand why—"

"James!" broke out Miss Valeria, in a burst of uncontrollable curiosity, "is there any news in that letter?"

Captain Berrincott lowered the letter and began by giving the questioner a long dazed stare.

"News?" he snorted. "You may call it news if you like, I call it a pack of lies. I tell you I don't believe a word of it."

"A word of what? What is it you are talking about? James, your conduct to-night is extremely peculiar."

Miss Valeria had risen and was approaching her brother-in-law.

Marian, too, was on her feet and stood beside her father.

"Has anything happened, father?" she asked, laying one small hand upon his sleeve.

"That depends upon what you call happened; but you won't get me to believe that Simon has left me Lot 13. There, read for yourselves, if you like."

And flinging the sheet of paper on the table, the Captain began stumping furiously up and down the room.

It was close to Marian's hand that the sheet fell, and with a look of bewilderment on her face she took it up and read. There were not many lines to read, and when she raised her eyes at their conclusion the look of bewilderment had turned to one of surprise so great as to be almost consternation. Silently she held the paper towards Miss Valeria, and presently aunt and niece stared at each other for a full minute, at a loss for words.

And well they might stare. The letter which had reached 31 Laurel Road by the evening post announced to Captain Berrincott, in Mr. Parker's dry, business terms, that his cousin, Simon Berrincott, lately deceased, had bequeathed to him and his heirs for ever the property of Lot 13, situated in Island of St. Clara, in the British West Indies. And this same Simon Berrincott was the very cousin from whom a deadly feud had separated him, well-nigh since boyhood; the man with whom he had not been on speaking terms for the last quarter of a century, who had died without breathing a single word which might have been interpreted into the desire for a reconciliation! How explain this seeming anomaly?

"There's a mistake somewhere, there's bound to be a mistake somewhere," burst out the Captain, still pacing the room as fast as his game-leg would let him. "It's a mistake, it's a practical joke; it's an April hoax; that's what I tell you. It is, so you needn't imagine that you'll get me to believe a word of your stupid nonsense," and coming to a standstill before Miss Valeria, he glared at her as savagely as though she, and she alone, were responsible for the state of things.

Miss Valeria, however, was beginning to recover her self-possession.

"But we are not in April, James," was the first thing she found to say.

"Then it's a mistake—"

"I don't see how it can be. Mr. Parker's language is quite plain. After all, why should Simon not have left you the estate? He was your cousin when all is said and done, and his son has got more money than he can know what to do with."

Captain Berrincott laughed angrily.

"So likely, isn't it, that after racking his wits during twenty-five years for the best ways of spiting me in all and everything, my dear cousin should bequeath me this mark of his affection?"

"But, father," suggested Marian, a little shyly, "perhaps that was just the reason—I mean that perhaps he was sorry at the end, and that it was as a sort of—sort of peace-offering that he left you Lot 13."

The Captain was silent for a moment, apparently reviewing this new aspect of the case; then he shook his head.

"Somehow that's not like Simon," he said, with an accent of conviction.

"And yet it's the only possible explanation," broke out Miss Valeria, in whom a species of mild mental intoxication had completely ousted the first feeling of astonishment. "Simon cannot have been such a bad fellow as I took him for, and I sincerely regret ever having said a word against him. Honoria, my dear, have you heard the news? Don't tell me you're dropping off again—wake up, Honoria, and wish James joy of his good luck! Oh, my dear James, whoever would have thought that we should yet live to see you a West Indian proprietor? Is Lot 13 a large place? I suppose it is very valuable, at any rate, so many people make their fortunes in the West Indies. And, of course, you will get your sugar for nothing, and as many cocoanuts and pineapples as you can eat—good gracious, how glorious! There will be pineapples at Lot 13, will there not, James? What a funny name Lot 13 is, by the by. How did the place come by it?"

The Captain replied briefly that he knew nothing about either Lot 13 or the West Indies.

"Well, you will have to read up now. I still feel quite dazed. What a thing for Marian, to be sure!"

"I wonder whether I shall be able now to afford himself a new evening frock," was the first intelligible thought which after the shock of the news formed itself in Marian's mind, and she cast a furtive glance at her well-worn dinner dress.

The rest of that evening was broken up into scraps of excited talk, alternating with intervals of no less excited silence. For a considerable time after his usual hour of retirement, Captain Berrincott continued to limp from one of the room to the other, declaring that it could not be true, and being assured by Miss Valeria that nevertheless it was true, and listening with a sort of rebellious attention to glowing fancy pictures of West Indian scenery indiscriminately mixed up with plans for Marian's future, of which her eager aunt had sketched out half a dozen within an hour.

Marian herself had resumed her place on the fender-stool, and sat once more staring into the fire, but with a very much warmer flush on her cheeks this time, and a very much brighter light in her eyes. She was not conscious of any inordinate craving for riches and all that riches bring with them, and yet it would not be in human nature not to feel strangely elated by this unlooked-for inheritance. Even Miss Honoria had shaken off her gentle drowsiness, and was gazing at James with a quite new and almost awe-struck interest. A West Indian proprietor cannot fail to be a more imposing object than a retired captain upon half-pay, and neither Miss Honoria nor Miss Valeria had ever before been very closely connected with anyone who possessed so much as a dozen acres of arable land.

Undoubtedly it was a great evening for James Berrincott, as he himself acknowledged indirectly when he gave Jemima the order to bring in the second lamp, for it was only on momentous occasions that the former front parlour partook of the illumination of the back. Jemima looked surprised and a trifle displeased on receiving the order, and the Captain himself, reflecting upon the matter in cold blood, distinctly condemned his own impetuosity; but at the moment he had felt the violent need of marking the occasion by something that lay outside of the everyday groove—and what was the good of running your shins against table corners here in the dark, when over there, across the Atlantic, acres of waving canes were waiting to be turned into golden brown sugar, and that again into singing sovereigns?

It was not till considerably past the usual hour that the household retired to rest that night.

As for Miss Valeria, she sat up till past midnight, penning notes to various of her bosom friends at Accringdon. It is true that she would be home again herself that day week, but a brief review of the situation convinced her that the news of the family's good fortune would not keep till then.

Yes, it was a grand evening for the Captain; and yet that feeling of mistrust which had been the first movement of his mind on receipt of Mr. Parker's news was the last thought to leave him that night.

"I hope to goodness there isn't a screw loose somewhere," was the reflection with which he at length fell asleep.

CHAPTER II.

James and Simon Berrincott had been first cousins who had seen a good deal of each other in their early youth, but who has disagreed upon every single point in life after having agreed in admiring Maria Hilton.

Maria had preferred James, which was all the more galling to Simon as James had little besides his own person to recommend him, so that it was impossible to doubt the disinterestedness of her affection whereas Simon was heir-presumptive to the very considerable family estates.

One of these estates lay on the West Indian Island of St. Clara, and thither Simon used occasionally to be sent by his father, in order to give the manager of the sugar plantation the impression that he was being controlled. It was to St. Clara that Simon retired in dudgeon the moment the knot was tied between James and Maria—not sent by his father this time, but simply following an instinctive desire to sulk, and consequently to burrow out of sight, and Lot 13 was the most convenient spot for burrowing with which he was acquainted.

Sulking alone wouldn't do it, however, as he soon discovered; something more actively aggressive was needed in order to avenge him upon the world in general and upon his family in particular for the disappointment in love which he had suffered. Accordingly, not six months has passed since James' wedding, when every bearer of the name of Berrincott was horrified by learning that he had united his lot to that of a creole girl of the name of Caroline Glover, daughter of the manager of one of the estates adjoining Lot 13.

So long as his father's fury endured Simon enjoyed his new position; once that began to flag he discovered that he was dead-sick of the girl whom he had married in a fit of spite. She was unusually pretty, but she was not a lady, and even in the first heat of his ill-temper he had never seriously contemplated bringing her home. As his continued residence on St. Clara was just as much out of the question, the inevitable result was that Simon and Caroline saw comparatively little of each other during the term of their wedded life. It proved to be but a brief term, for dating from the birth and death of a son at the end of the first year, Caroline began to pine away, and two years had barely passed since the had been rejected by Maria Hilton when Simon Berrincott was again moving in London society, again on the lists of desirable partis, but this time as the widower of Caroline Glover.

(To be continued.)

If you want to make a small man feel big, get him to stand on his dignity.

SUNDAY SCHOOL LESSON

June 15, 1916. Lesson XIII.

The Philippian Christians—Review, Philippians 1: 1-11; 4: 1-9.

(A reading lesson only.)

Summary.—Lesson I. Topic: Conversion. Places: In and near Damascus. Saul of Tarsus had been present at the stoning of Stephen and approved of the course the Jews took in his case. He afterward started for Damascus to prosecute Christians, but on the way he was stricken down and led to acknowledge Christ.

II. Topic: Christian faith exercised. Places: Lydda; Joppa. At the time of the events of this lesson there was rest to the church from persecution. Peter was preaching in various places and reached Lydda, about ten miles southeast of Joppa. Through him the Lord healed Aeneas, a paralytic. He was sent for from Joppa because Dorcas was sick and died. The Lord restored her to life through his prayers.

III. Topic: Christianity interpreted. Places: Caesarea; Joppa. Cornelius, a Gentile of Caesarea, had a vision in which he was directed to send messengers to Joppa to call Peter to him to teach him the way of salvation. A little later Peter had a vision which taught him that Gentiles might be saved. He went with the messengers who came from Caesarea.

IV. Topic: Established truth. Place: Jerusalem. The Easter lesson is taken from 1 Cor. 15, which is the great chapter of the Bible on the resurrection is foundational to the Christian faith. He is certain that Christ rose from the dead, and cites as proof his many appearances after his resurrection.

V. Topic: Contending force. Place: Jerusalem. Herod Agrippa I sought to please the Jews and therefore caused James to be put to death. He had Peter arrested, and intended to have him slain also. Peter was closely guarded, but the Lord sent an angel and brought him out of prison and he went directly to the place where Christians were praying for him.

VI. Topic: Church expansion. Places: Antioch in Syria; Cyprus. A persecution followed the martyrdom of Stephen and Christians were widely scattered, but they were preaching the gospel. A company of disciples gathered at Antioch and Barnabas was sent from Jerusalem to see whether they were really followers of Christ. He saw their faith and encouraged them. He found Saul and they labored together at Antioch. The disciples were first called Christians there.

VII. Topic: Christ, the world's Savior. Place: Antioch in Pisidia. Paul and Barnabas left Cyprus and proceeded to Antioch in Pisidia. They went into the synagogue on the Sabbath and preached Jesus Christ. The people were interested and they preached the next Sabbath.

VIII. Topic: Missionary itinerary. Places: Iconium, Lystra, Derbe, Antioch of Pisidia, Perga, Antioch in Syria. Paul and Barnabas preached at Iconium, where many believed, but the Jews assaulted them and they went to Lystra where a lame man was healed, and Paul was stoned.
